BULBS

for Fall and Winter Planting

HYACINTHS

Hyacinths may be grown in the open ground, in pots, or in glasses, and can be planted from the beginning of October until the end of December.

For the open ground, plant in light rich soil, covering to the depth of 4 or 5 inches.

For pots, plant one in a 5-inch pot, pressing the earth down firmly and leaving one-third of the bulb exposed; then place the pots on the north side of a building or in a cellar and cover with a layer of sand, earth or leaf mould to the depth of about 8 inches; after 4 or 5 weeks unearth the pots and gradually inure to the light.

For glasses, fill the glass with water so as to nearly touch the base of the bulb; place in a cellar or dark place for a few weeks until the roots have grown half way to the bottom of the glass; the water should be changed frequently, care being taken not to injure the roots. A piece of charcoal placed in the water will help to keep it pure.

NARCISSUS

The Narcissus is one of our most beautiful spring flowering bulbous plants, and thrives well in California. Some very desirable effects can be had by planting them in solid beds, and also by planting them among shrubbery and allowing them to become naturalized. They may be planted from the first of October to the middle of January, in any good garden soil, covering the bulbs to the depth of about 5 inches. The polyanthus varieties, of which the Chinese Lily is the best known, also succeed well in water.

Grand Soliel d'Or. Pure yellow, orange cup, extra fine. Each, 5c; doz., \$50c.

Paper White Large Flowering. Produces immense clusters of large, pure white flowers. Each, 5c; doz., 50c.

Chinese Sacred Lily. White with yellow cup; largely used for growing in water. Each, 15c; doz., \$1.50.

JONQUILS

Much prized for cut flowers, on account of their fragrance and graceful forms. They are easily forced, and also grow well in the open ground. Plant in any good garden soil, covering the bulbs to a depth of about four inches.

Single Sweet Scented. Rich yellow. Doz., 15c; 100, \$1.00.

Campernelle. Large yellow. Doz., 25c; 100, \$1.50.

SPECIAL TULIPS FOR CALIFORNIA

For many years it was considered almost impossible to grow tulips successfully in Southern California, but of late years it has been demonstrated that the late flowering varieties can be grown here with the very best of results. A shady or partially shady situation is preferable, and they thrive best in a sandy soil, well enriched with plenty of rotten manure. The bulbs should be covered about five inches deep, and may be planted from October to January, though early planting is advisable. The *Gesneriana Major* is the large, late, scarlet tulip seen in many of the floral stores late in the spring and so greatly admired.

LATE FLOWERING TULIPS

Bouton d'Or. Pure golden yellow, extra fine. Each, 5c; doz., 35c; 100, \$2.00.

Clara Butt. Soft salmon rose, long stems, extra fine. Each, 5c; doz., 60c; 100, \$4.00.

Single mixed. Pkt., 5c; oz., 35c.

Double mixed. Pkt., 5c.

Coronarum. Double, yellow. Pkt., 5c.

Coronarum album. Double white. Pkt., 5c.

inodorum plenissimum. Double white, fine for cutting. Pkt., 10c.

CINERARIA HYBRIDA GRANDIFLORA. Biennial, but treated as an annual in California. Heights, 1½ to 2 feet. Magnificent plant for pot culture in greenhouses, or may be planted out in sheltered and partially shaded situations. Sow the seed in August or September in seed pans, and as soon as large enough pot off into small pots and afterwards transfer to larger pots as required. The strain I am offering is the very best, procured direct from one of the most celebrated growers in Europe, and may be relied upon to produce large flowers of the most exquisite colors. Pkt., 50c.

CINERARIA MARITIMA ACANTHIFOLIA. Perennial. 1 foot high; beautiful silvery foliage, much used for borders and edgings. Sow the seed in seed boxes and transplant. Pkt., 10c.

Miss Jekyll. Flowers of a beautiful corn-flower blue, fine for cutting. Pkt., 10c.

PANSIES

Truly speaking, a perennial, but an annual in California. To obtain the best results the seed should be sown in August, September, or early part of October. Sow the seed in boxes of fine, rich soil mixed with plenty of leaf-mould and sand; cover the seed lightly and keep in a frame, lath house, or outside in some sheltered and partially shaded place. When the plants are large enough to handle, transplant to beds of rich, well-prepared soil, and cover the surface with a layer of well-rotted, sifted manure. Pansies prefer a rather heavy soil with plenty of well-rotted manure, this is very essential. Indeed, it is almost impossible to use too much manure on pansies and the richer the soil the larger and more perfect will be the flowers. Later sowings may be made up to the beginning of February, but they will not do as well as those sown early in the fall, and the blooming period will be much shorter.

Payne's Royal Exhibition. This is undoubtedly the most superb strain of pansies ever offered on this coast. The plants are of vigorous growth, and are particularly free-flowering. The blossoms are very large, and of fine velvety texture, including all the richest shades, many of them exquisitely blotched, spotted and margined. Pkt., 25c; $\frac{1}{8}$ oz., \$1.00; oz., \$6.00.

Bugnot's Superb Blotched. Extra large, rich colors, each petal having a broad, deep blotch, many of them beautifully lined or penciled. Pkt., 50c.

Cassier's Large Flowered Blotched. A splendid strain; flowers beautifully blotched, of richest shades. Pkt., 25c.

Odier, or Blotched. Beautiful three and five blotched flowers. Pkt., 25c.

Masterpiece. "Frimled Pansy." A grand new class, each petal being conspicuously waved or curled, giving the flower a double or globular appearance. Rich colors mostly of the dark velvety shades. Pkt., 25c.

Orchid or Cattleya-flowered. New, rare shades, extra fine. Pkt., 25c.

Giant Trimardeau. Large flowered, mixed colors. Pkt., 25c.

English Show or Faced Pansy. Mixed colors. Pkt., 10c. All colors mixed. Pkt., 10c.

Sunlight. New, yellow orchid-flowered. Pkt., 25c.

Vulcan. Superb new pansy. Dark red, with fine large black spots. Pkt., 25c.

Prince Henry. New, darkest blue. Pkt., 25c.

GIANT PANSIES, SEPARATE COLORS

Paeony Flowered. Large double globular flowers, mixed colors. Heights 3 to 4 feet. Pkt., 5c.

Ranunculus Flowered. Double flowers about 2 inches in diameter and of every imaginable shade of color. Heights 2 feet. Pkt., 5c.

POPPY, ICELAND. (*Papaver nudicaule*.) A perennial, blooming the first season from seed. Pretty, grayish, fern-like foliage, formed in tufts, from which rise numerous slender stems about 1 foot high, bearing single bright colored flowers. Sow the seed in seed boxes and transplant. White, yellow, deep orange and mixed. Each, per pkt., 10c.

POPPY ORIENTAL. (*Papaver orientale*.) A perennial producing many thick, leafy stems, 3 to 4 feet high, with large, deep crimson flowers, having a black blotch on each petal, exceedingly showy. Sow the seed in spring or early in the fall in seed boxes; when large enough, pot up into small pots and later transplant to the open ground. Pkt., 10c.

Oriental Hybrids. Splendid hybrids of the Oriental Poppy, producing immense flowers 6 inches or more

in diameter and of many beautiful shades of pink, salmon, orange, scarlet, etc. Treat the seed the same as the preceding variety. Pkt., 10c.

PRIMULA SINENSIS FIMBRIATA. "Chinese Primrose."

Beautiful greenhouse plants, blooming in winter and spring. Sow the seed in August or September in pots or seed pans of rich loam mixed with sand, cover the seed lightly and keep in a greenhouse; when large enough, pot into small pots and later to larger pots as required. The seed offered here is of the finest strains, imported direct from one of the best European growers.

Bright Rose. Large. Pkt., 25c.

Defiance. Rich red, with dark eye. Pkt., 25c.

Holborn Blue. A unique shade. Pkt., 25c.

Snow Queen. Pure white, extra fine. Pkt., 25c.

Choice mixed. Pkt., 25c.

PRIMULA OBCONICA GRANDIFLORA. A charming little plant for pot culture. Perennial, but blooming in a few months from seed; height 6 to 8 inches. A profuse bloomer, bearing heads of 10 to 15 flowers on long stems. Sow the seed in August or September in pots or seed pans of light, rich loam and keep in a frame or greenhouse, pot up when ready. Mixed colors. Pkt., 15c.

Malacoides. This valuable introduction from China has proved to be one of the most free-flowering species and especially valuable for pot culture. The flowers are of a delicate shade of lilac. Seed sown in August produces plants which flower throughout the winter months. Pkt., 25c.

Kewensis. Yellow, extra fine. Pkt., 15c.

SCHIZANTHUS. Annual, 1½ to 2 feet, producing pretty butterfly-like flowers in great profusion, exquisitely spotted and marked, resembling some orchids in coloring. Mixed colors. Pkt., 5c.

Wisetonensis. New, white dotted with rose, extra fine. Pkt., 15c.

STOCKS. "Gilliflower." A favorite annual, succeeding best in California during the winter season. Largely grown for cut flowers, lasting a long time in water. Very effective for planting in beds or borders. To obtain the best results the seed should be sown in August, September or early part of October, in seed boxes of rather light soil, and afterwards transplanted to the open ground. In transplanting stocks care should be taken to save the small or weak growing plants, as these generally produce double flowers, while the strong, robust growing seedlings often come single. The seed I offer is obtained direct from one of the best specialists in Europe and can be relied upon to produce a large percentage of double flowers.

Giant Perfection Ten-week. This superb strain originally introduced to the California trade by myself a number of years ago, is particularly adapted to California and is really the best stock for cutting purposes. I have furnished many commercial growers with this strain for a number of years and it has given complete satisfaction. White, sulphur yellow, pink, flesh-color, crimson, lavender, purple. Each, per pkt., 15c. Mixed, pkt., 10c.

Dwarf Large-flowered Ten-Week. Of compact growth, 1 to 1½ feet high, particularly suitable for bedding. White, rose, flesh-color, crimson, violet or mixed. Each, per pkt., 10c.

Perpetual or Branching, Princess Alice. "Cut and come again." Pure white, a favorite for cutting. Pkt., 10c.

Nice, Winter, Beauty of Nice. A splendid new stock, growing 1½ to 2 feet high, forming robust, well-branched, free-flowering plants. Flowers a soft, delicate pink. Pkt., 15c.

Queen Alexandra. Similar to Beauty of Nice except in color, which is a delicate shade of rosy-lilac. Pkt., 15c.

Crimson King. Large spikes, rich crimson. Pkt., 15c.

White. Very free flowering. Pkt., 15c.

Almond Blossom. White shaded carmine. Pkt., 15c.

Mixed Colors. Pkt., 15c.

VIOLA CORNUTA. "Tufted Pansies." Though the flowers are not as large as the regular pansies, they bloom so freely that many people consider them superior where a mass of color is desired. The plants bloom for a long period and the colors are particularly clear and distinct. The flowers are light and graceful, and not so stiff as those of the regular pansy. Sow the seed from August to January in beds or boxes of light, rich soil and afterwards transplant.

White Perfection. Large pure white. Pkt., 15c.

Blue Perfection. Blue. Pkt., 15c.

Purple Queen. Purplish lavender. Pkt., 15c.

Large Yellow. Pkt., 15c.

Mixed colors. Pkt., 10c.

CHRISTMAS FLOWERING SPENCER SWEET PEAS

The greatest novelty in Sweet Peas of late, being the result of several years' careful plant breeding. This grand new class combines the early flowering qualities of the popular Christmas Flowering Sweet Peas with the very large, wavy flowers of the Spencer types. I offer six distinct colors.

Mrs. Skach. Beautiful pink.

Lavender Bi-color. Lavender standard, white wings.

Yarrowa. Bright rose pink with light wings.

Red. Rich red.

White. Pure white.

Mrs. W. Sim. Apricot pink.

Each, per pkt., 25c; per oz., \$1.50.

SPECIAL OFFER

Full collection of the above six varieties, one packet of each, for \$1.00.

PAYNE'S SWEET PEAS

Can be sown at any time from October to March; early planting will produce the best results. They require an open situation, good rich soil and plenty of water. Sow in drills, covering the seed about two inches deep or a trifle more in light soils. When about a foot high, draw the earth up to the stems with a hoe. They should have brush, sticks or wire netting to climb over. By keeping the flowers gathered and any dead flowers cut off the plants will bloom for a long period.

PAYNE'S SPENCER SWEET PEAS

A grand new class of Sweet Peas, having large, round, open flowers of extraordinary size, often 2 inches across, with wavy standard and wide-spreading wings, a large number of the flowers coming four on a stem.
