A Personal Word to Our Patrons and Friends:

HEREWITH we present to you the latest revised edition of our Wholesale Catalog—our Fall, 1916, issue—and we assure you that we are just as anxious to serve you through its pages as though you and we were face to face. We shipped our nursery products not only to old customers during the past season, but to new found friends and patrons as well, and a perfect deluge of letters came to our office expressing satisfaction with the stock received. We take this opportunity to thank our customers for their patronage and words of commendation. By dealing direct with the people, by giving the best values, and by doing business on a small-profit-square-deal basis, we built our trade. The fact that we have been wonderfully successful can be readily understood from the vast amount of business we do annually.

We know that in order to retain customers we must maintain the highest standard of quality at all times; in other words, must produce only the very BEST nursery stock. Therefore, we grow our stock up to QUALITY and GRADE, not DOWN to a price, and the merits of our superior products sell them. On account of the large volume of our business we sell all our nursery stock at the very lowest possible price at which it can be offered. You cannot afford to pay less than our price, and there is no sense in paying more. We do not attempt to compete with nurserymen who place cheap stock on the market. The name Kelly has stood for quality, excellence and distinction in nursery stock for over 36 years.

Relative to the superior quality of our nursery products—and we are offering just as high grade and quality—if not higher—to the trade this fall than formerly—we refer new customers to anyone in the United States or Canada with whom we have done business. Our references together with endorsement on Page 3, tell their own story about our financial standing. We Kelly Bros. personally give constant, close and conscientious attention to every important detail of the business, and each order receives the watchful attention of a member of our firm from the time it is received in our mail opening department to the very moment the stock is delivered to the railroad company. Our broad GUARANTEE accompanies every shipment. No stronger proof of the first-class quality of our trees and ornamentals could be offered or asked for than is given in this Guarantee.

We cordially invite our customers and others interested in nursery stock to visit us here in Dansville. We will be pleased to see you at any time and one of the five Kellys will gladly accompany you through our plant.

To those of you who cannot visit us, we ask you to give us a trial order. You may rely on our giving your interests careful attention, for we value your permanent patronage, and we want you to be thoroughly pleased. We cannot afford to have a dissatisfied customer. Your order will be executed with care and dispatch, however small it may be. Remember, always, our customer's satisfaction is our first consideration, and we solicit your orders on the high quality of our stock. **OUR BROAD GUARANTEE INSURES YOUR COMPLETE SATISFACTION.** We solicit correspondence and information will be given to the best of our ability. Our advice is free and we take pleasure in giving our customers the benefit of our experience. First and last, we want you to be thoroughly pleased in all your dealings with **KELLY BROS. WHOLESALE NURSERIES.**

No. 128

STATE OF NEW YORK DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock

This is to certify that the stock in the nursery of Kelly Bros., of Dansville, County of Livingston, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and was found to be apparently free from any contagious or infectious disease or diseases, or the San Jose scale, or other dangerously injurious insect pest or pests. This certificate expires Sept. 1, 1917.

Dated, Albany, N. Y., Sept. 4, 1916.

CHARLES S. WILSON, Commissioner of Agriculture.

BUDDING A BLOCK OF THREE HUNDRED THOUSAND CHERRY TREES

Budding is one of the most important operations of the nurseryman and requires skilled workmen

Advantages of Fall Planting

IT IS a fact conceded by the largest and most successful orchardists, and has been proven by the Experimental Stations throughout the country, that trees, especially Apples, Pears, Plums and Sour Cherries, planted in the Fall give the best results to the planters. Some of the reasons why experienced planters like to buy for Fall delivery are as follows:

1st: Fall-planted trees become firmly established in their new location before winter, and as soon as the Spring opens up, start growing; while with trees planted in the Spring it is oftentimes a month or more before they begin to put out any root growth, although the part of the tree above ground seems to be growing nicely.

2nd: Stock planted in the Fall gets the benefit of the late Fall and early Spring rains, which is of vital importance; on the contrary, stock set in the Spring frequently has to worry through a dry summer, which it is utterly unprepared to do after having been so newly transplanted. The result is that its growth is stunted.

3rd: Experiments at the different State Experimental Stations have proven that immediately after planting in the Fall the trees begin to put out small fibrous roots which take hold firmly in the ground, thus absolutely insuring an early start in the Spring.

4th: When Grape Vines, Currants, Raspberries, Blackberries, Gooseberries, etc., are planted in the Fall, **fruit is produced the first summer.**

5th: Rose bushes and Shrubs set out in the Fall **bloom profusely the first summer.**

6th: Even if the customer is not able to plant until Spring, or the climate is too cold, it is **wise to have the stock delivered in the Fall**, so that he can trench it in carefully, and seize the earliest moment in the Spring to set it out, instead of losing valuable time in the Spring.

How to "Heel in" Over Winter

There is a popular impression that trees dug in the Fall and heeled in over winter are worthless. **If the heeling is well done it is perfectly safe.** To insure success, select a dry spot where no water will stand during Winter, having no grass near to invite mice. Dig a trench deep enough to admit one layer of roots, and sloping enough to permit the trees to lie at an angle of not more than thirty degrees with the ground. Having placed one layer of roots in this trench, cover them with mellow earth extending well up on the bodies, and **see that this is firmly packed.** Then add another layer of trees, overlapping the first, continuing as at first until all are heeled in. As soon as this is done, cover the tops so well with evergreen boughs that they will be thoroughly protected from winds. Roses and other small stock may be wholly covered with earth.

This Catalog is Our Only Salesman We Employ No Agents

We could not afford to sell our stock as cheaply as we do if we employed agents whose salaries and commissions often add 50% to 60% to the cost of stock. This catalog is our only representative and in buying from it you save the agent's or middleman's large profit. It is not our policy, and we believe it is a waste of your time and ours, for us to explain the methods and practices of some other nurserymen; but we do ask you to not believe the story of the agent who says our trees cannot be first class when we offer them at such low figures. Rather should you be guided by the following taken from the Government Department of Agriculture, Bulletin No. 113 :

"If the farmer makes his purchase direct from the nurseryman, he will save the expense of the middleman or agent and is less liable to the mistakes and injuries that may occur through repeated handling."

WHAT IS GOING ON IN THE NURSERY INDUSTRY

WHEN selecting and purchasing your trees, you are casting your lot with the fortunes of one producer, and it is most important that you know what is going on in the Nursery industry—more important than ever before.

Nurserymen and others who offer nursery stock for sale can be divided into three distinct groups. You can easily make an error by purchasing from either of two groups, both of which make a strong appeal to the unwary, and we feel it our duty, both to you and to ourselves, to warn you against making this mistake.

To follow one of these groups is to make the mistake of buying from the Middleman who does not grow the stock he sells but purchases it here and there, wherever it can be had for the least money. Generally, such a one is not a practical Nurseryman, and, taking into consideration the manner in which he secures the stock he offers for sale, who knows whether or not the trees are True to Name, the most important requirement of first-class stock.

In casting your lot with the other of these two groups, you purchase from a firm that claims to offer first-class stock at ridiculously low prices, such as "First-class trees for 5 and 10c, etc.," prices below the cost of production. Such firms are usually not established permanently, have little or no financial responsibility and are not apt to be in business when your trees come into bearing. Events of the past few years prove this statement, as many of these which have sprung up over night, as it were, have vanished as quickly.

The third group comprises the large growers of quality stock, those who grow the trees they sell. Kelly Bros. have been large producers for thirty-six years and grow each and every tree they have for sale. When one considers the permanent nature of the planting of Nursery stock, whether it be fruit trees in a small home orchard, or whether it be on a large commercial scale, the first thought should be to select trees that are RELIABLE and of a sturdy character with a good root system which can only be produced by being grown on good soil and receiving frequent cultivation and proper care; and, secondly, to get trees which are backed by a firm of a recognized standard and RESPONSIBILITY, one that is established PERMANENTLY. Trees procured from such a source are worth more to the planter than the trees he might purchase at a slightly smaller initial cost, but which are lacking in the guarantee of genuineness. Do not get the impression, however, that we are high-priced. We are willing to compete with anyone, both in price and quality. We simply refuse to sell inferior trees at any price. "Good goods at lowest prices," is our motto. When you buy from us you get trees that are strong, sturdy, clean-cut and healthy, and you get them at the lowest price at which trees of such high character can be sold.

Your Protection

Our Broad Guarantee to Customers

Our guarantee is, we believe, the broadest and most liberal of any nurseryman in the country. Our guarantee means something to you, because it is backed by a firm with an established reputation, a firm that is established permanently. We guarantee our stock to reach our customers in good condition. We guarantee our stock to be free from San Jose Scale, Peach Yellows or other injurious pest or pests. We guarantee that all trees and plants purchased from us shall be **true to name** as labelled. **For any stock which does not prove true to name and as represented by us, and as bought by you, we are to make good your loss or damage by reason thereof at any time within ten years of the date of purchase.** In event we cannot agree, we are each to appoint one arbiter who shall choose the third and the award of a majority shall be binding on both parties. If there is any mistake on our part in regard to the stock you purchase from us we want you to tell us about it; and we will adjust the matter to your entire satisfaction. Our interest in the stock we send you does not cease when it leaves our hands. We believe our satisfied customers are our best advertisements.

Our References

As to our responsibility and reliability we would ask our prospective customers to inquire of Dun's and Bradstreet's Commercial Agencies; Merchants & Farmers' National Bank, Dansville, N. Y.; The Citizen's Bank, Dansville, N. Y., or any person whose letter appears in this catalog.

An Expression from Our Home People

We, the undersigned, wish to say that we have known the Kelly Brothers for several years and have watched the steady increase in their business, until today they are one of the largest growers of fruit trees in Dansville.

We believe their success is due to their thorough knowledge of the business and their square dealing with their customers, and it is with pleasure that we recommend them to the planter and fruit grower.

WM. KRAMER, Pres. of Merchants & Farmers' National Bank
J. M. EDWARDS, Cashier of Merchants & Farmers' National Bank
F. A. OWEN, Pres. F. A. Owen Publishing Co. All of Dansville, N. Y.

Established for Thirty-six Years

In 1880 we started in the nursery business and each succeeding year our business has steadily grown larger. We began growing fruit trees on a small scale, gradually increasing our plantings until now we have one of the largest nurseries in the country. In the development of our business our watchword has always been "the best at the lowest possible price." We have always tried to serve our customers so well as to merit their entire confidence and commendation, and we have only to refer to our thousands of satisfied patrons throughout the United States and Canada to prove that we have succeeded in our endeavor. We know that it pays to produce good stock and believe that poor stock, or stock not True to Name, is dear at any price—in fact, worthless, even as a gift. We have no agents and for this reason you can buy trees of us at a great saving as the agent's expenses and commission often add from 50% to 60% to the cost of stock.

Our Stock

Our stock is the finest and best that can be grown. It is all high grade, well-rooted, mature and healthy. No San Jose Scale or Peach Yellows has ever been found in our nurseries. We grow every tree we offer for sale and thus we are able to guarantee it to be strictly **true to name** and **free** from all disease. We plant only the most select imported seedlings. These we plant in soil particularly adapted to the successful raising of nursery stock. Step by step, through the various stages of cultivation and propagation, we exercise the greatest care, with the result that when the trees are mature, we have the finest and best that can be produced.

If you want stock that is True to Name, the only place to buy it is from the nurseryman who grows it, and not from dealers and agents who buy their stock here and there. It is self-evident that trees handled three or four times are often exposed to unfavorable conditions and thus injured. After trees have passed through so many hands, who knows what the varieties are? Our nurseries are regularly inspected by a New York State Inspector and a Certificate of Inspection has been issued to us. A copy of this certificate is attached to every order shipped by us.

Our Equipment

We have gradually increased our equipment until today we believe no other nursery in the country has better facilities for handling orders whether they are large or small. All of our employees are experienced and competent, many of them having been with us for years, thus grasping our ideas of how things should be done. This makes every detail of our large business work out smoothly and accurately. Our modern and up-to-date packing house contains fifteen thousand square feet of floor space and is absolutely frost proof. We have a private switch right to this packing house and thus there is no chance for our trees to be exposed or injured in any way.

Our Personal Supervision

Each department from the planting, propagating and maturing of the trees to the selling through our catalog is in direct charge of a member of our firm. Following are the names of the members and the department to which each gives his attention: James A. Kelly, selection and planting of seedlings; Edward T. Kelly, selection of scions and budding; William F. Kelly digging and grading of trees; Richard A. Kelly, selling through catalog and correspondence; Clement A. Kelly, packing and shipping of orders. It will readily be seen that in this way the best attention is given every branch of our business—better attention than could possibly be given by the most faithful and painstaking employees.

Some of Our Two Year Cherry Trees—Sweets to the Right; Sours to the Left

Important—Be Sure to Read This Page

Order Early

As our orders are shipped in the rotation they are received, and as we cannot delay orders received first for orders coming later on, we advise the placing of orders early. If for any special reason it is necessary that an order be shipped on a specified date, make a note on the order and we will comply with the request if possible.

Our Shipping Season

Our Fall shipping season begins October First and continues until cold weather, but we would not advise the shipment of stock before the tenth of October as this gives the stock a chance to mature well and to harden up.

How to Order

Make out your order carefully on the Order Sheet enclosed in this catalog. Write the varieties plainly and set down the prices accurately. Specify clearly the grade and sizes of the trees desired. Indicate plainly how you want the stock shipped, whether by freight, express or mail. If by freight or express, give the name of your railroad station, also your own post office address. When specific instructions are not given we will use our own judgment.

How to Remit

Remittances should be made by Post Office Money Order, Express Money Order, Draft on New York Bank or Registered Letter. We disclaim all responsibility unless remittances are made as above directed.

Rates

We allow hundred rates on lots of fifty or more trees, providing your order does not call for less than ten trees of any one variety.

Terms

Cash with order except in large orders when satisfactory reference is given, and then the order must be accompanied by one-fourth cash, and shipment will be made C. O. D. For the benefit of customers who order early, but who do not care to spare all of the money when order is sent, would say, we will accept early orders accompanied by one-third cash and reserve the stock for you. Balance of the amount to be sent when stock is ordered shipped. Prices in this catalog supersede all previous prices.

Special Discount

We will allow a special discount of 10% on all cash orders that are received on or before October fifteenth; after that date, 3% discount.

Boxing and Packing Free

We box and pack all orders without charge. All orders are put up in boxes or bales which are lined with heavy paper to guard against stock drying out. The trees and plants are packed in moist excelsior and straw. This is expensive, but good packing pays—pays customers, pays us. We guarantee the arrival of stock in good condition.

Freight and Express Rates

Do not be influenced by the story of the agent who says that the freight or express on your order will bring our price up as high as his. If you will consult your railroad agent you will find that the freight rates from Dansville to points east of the Mississippi, range from 20 to 40 cents per 100 pounds. First class trees will average about one pound each. Therefore, at the highest rate, 40 cents for 100 pounds, it means that you pay less than one-half cent per tree for freight. Nursery stock is carried by all express companies at a discount of twenty per cent from regular rates.

Misrepresentation of the cost of getting stock from us by freight or express is sometimes made by others. Remember, if you bought your stock delivered, or freight prepaid, the freight would be included in the purchase price. The cash discounts which we allow will, in many cases, more than cover your freight or express charges.

Grading

We guarantee every tree to be up to the grade specified, or better. Many times trees are sold by height only. This, we believe, to be very misleading as we have seen trees which belonged to the second or third grade, (if graded by size or caliper) sold for first grade, as they had the required height. We grade and sell our trees both by height and caliper, and believe this to be the only way that gives entire satisfaction to the planter.

10%

The Cash Discount of 10% that we will allow will in many cases more than pay Transportation Charges

10%

FRUIT DEPARTMENT

Apple Trees

IT IS an established fact that of all fruits the apple is the most important. It has been rightly called the "King of Fruits." Unlike other fruits its period of ripening extends nearly throughout the year, and by judicious selection of varieties, an almost constant succession may be obtained. It is not a luxury, but a staple article of food, and the demand for good apples is increasing faster than the supply. Experienced and successful farmers and orchardists agree that there is more money in growing apples than in any other fruit, and that the orchard is the farm's greatest asset. If there is any kind of trees that we specialize in growing, it is the apple. We use the very best quality of imported French Apple Seedlings to propagate our apples on. We believe this to be of utmost importance in order that the trees may have a good foundation, be free from all disease and insure a healthy and permanent growth. We have discarded all varieties not profitable to the planter, and recommend the following varieties, giving a brief description of each.

Wholesale Prices of all Varieties of Apple Trees

					EACH	TEN	HUNDRED
Largest Size	2 Year	5 to 7 Feet	$\frac{3}{4}$ and up	XXX	.25	\$2.00	\$15.00
Medium Size	2 Year	$4\frac{1}{2}$ to 6 Feet	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.20	1.50	12.00
Smaller Size	2 Year	4 to 5 Feet	$\frac{1}{2}$ to $\frac{5}{8}$	X	.15	1.00	8.50
Largest Size	1 Year	3 Feet and up		XXX	.20	1.50	12.00

10% discount on all cash orders received on or before October 15th. After that date 3% discount on all cash orders.

Summer Varieties

Early Harvest—(Yellow Harvest.) Medium to large; pale yellow; beautiful; fine flavor. Tree moderate, erect grower, good bearer; excellent variety for both orchard and garden. Ripens in August.

Yellow Transparent—Tree upright, and a very early and abundant bearer. Fruit of good size; skin clear white, turning to a pale yellow; flavor acid and very good. Ripens from ten days to two weeks earlier than Early Harvest. One of the most popular market varieties. Ripens in August.

Red Astrachan—Tree hardy and good bearer. Fruit very handsome, large, round, nearly covered with deep crimson, overspread with thick bloom; juicy and good, though rather acid; one of the best of the summer varieties for cooking. The fruit usually sells for a good price in local market. Ripens in August.

Sweet Bough—Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Autumn Varieties

Alexander—An excellent apple for culinary use. Fruit large, firm, crisp, tender, juicy, mild sub-acid. Skin smooth, glossy, pale yellow to "orange yellow" entirely overspread with lively red stripes. Tree large, vigorous and hardy. Season September to November.

Duchess of Oldenburg—Vigorous growth; Russian; large; striped; tender, juicy, sub-acid; good; regular and abundant bearer. One of the hardest kinds known. Ripens in Sept.

Fall Pippin—Very large; yellow, tender, juicy and rich. Tree a vigorous, free grower and fine bearer. An excellent baking apple. Ripens in October.

Fameuse—(Snow Apple.) Hardy, medium size; deep crimson; flesh is snowy white, tender, melting and delicious. Tree vigorous with dark wood; one of the finest dessert fruits, and valuable for market. Ripens in Nov.

The Old Reliable Baldwin in Bearing

Maiden's Blush—Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant but not high flavor. A good market sort because of its attractiveness and the tree's heavy crops. Ripens in September.

Pound Sweet (Pumpkin Sweet)—A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. Oct. and Nov.

Wealthy—This beautiful, moderate sized, brilliant red apple is of fine quality, one of the best of its season; it is a relatively good keeper and owing to the hardiness of the tree, its adaptability to cold climates, and early bearing habits, it can be profitably planted as a filler. Season Oct. to Jan.

Gravenstein—This is a large, handsome apple streaked and splashed with red over a strong yellow. The flesh is yellowish, firm, fine, crisp, tender, juicy and sub-acid. In quality it ranks very good to best. Sept. to Nov.

Winter Varieties

Baldwin—What the Bartlett pear is to pears the Baldwin is to apples for the Eastern and Middle States. No variety yields larger crops or bears shipment better, or is more attractive in color, size and shape than the Baldwin. It is esteemed as an eating apple, and for cooking. For a commercial orchard it can be relied upon. Large, bright red, crisp, juicy and rich; tree vigorous, upright and productive. In New England, New York, Ontario and Michigan, this is one of the most popular and profitable sorts for table or market. Keeps until April.

Ben Davis—A popular apple in Southern New York, Pennsylvania and Ohio. Fruit is medium to large, of a bright, deep red color, or red striped over clear yellow. Has a thin, tough skin. The flesh is whitish, firm, juicy and sub-acid. It is one of the best keeping apples on the market today, lasting in cold storage until June or July.

"You'll Never Regret Planting Kelly Trees"

Winter Apples (Continued)

Northern Spy—This variety ranks about third in commercial importance with the fruit growers of Pennsylvania, New York and Ohio, being surpassed by Baldwin and R. I. Greening. Fruit is large and very attractive, being of bright red color with a delicious bloom; flesh is very juicy, crisp, tender and excellent for dessert or culinary uses. Its fine reputation brings high prices in the market and the fruit is always in demand. The fruit is ready for use in November or December; keeps well in cold storage until April, or if more carefully handled, until May.

Stark—Fruit fair, smooth, uniform and attractive. Large, striped, mild, sub-acid. Valuable as a keeper. A good variety for the commercial orchard because the tree is thrifty, hardy, healthy, a reliable cropper and very productive. Jan. to May.

Grimes' Golden—Vigorous grower; large; golden yellow; juicy, sprightly sub-acid; very good. Keeps until April.

Gano—Similar but superior to Ben Davis. It has all the good qualities in a higher degree, and keeps fully as late. The tree is vigorous and hardy; is a rapid grower; bears while young. Color bright red without stripes or blotches, and large and even in size. Keeps until March.

Jonathan—A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Nov. to Apr.

King—(King of Tompkins Co.) One of the largest red winter apples. It is of extraordinary size, beautiful in color, attractive, and always brings the highest market price. Its size, beauty and good flavor make it in great demand. Nov. to March.

McIntosh Red—Medium size, nearly covered with dark red. Flesh white, fine, very tender, juicy and refreshing with attractive quince-like flavor. A good annual bearer. A very hardy variety, fruit of which is very attractive in appearance, of deep red color, good size, the flesh very tender and delicious. It is especially desirable for fancy trade. It comes into bearing young, yielding large crops of good fruit almost annually.

Pewaukee—Tree spreading, round topped and vigorous. Fruit large, yellowish green, striped and shaded with dull red, overlaid with

a bluish bloom. Flesh yellowish, rather coarse grained, firm, juicy; flavor sub-acid. Keeps until March.

Mammoth Black Twig—The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very high flavored. Keeps until late Spring.

Northwestern Greening—Tree a splendid, vigorous grower, quite hardy. Fruit large to very large; green, becoming yellowish green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive; should be given plenty of room in the orchard to secure large, even fruit. Keeps until March.

Spitzenburg—(Esopus.) Medium to large; deep red, high flavored; valuable for commercial purposes. November to April.

Tolman Sweet—Medium, pale yellow, slightly tinged with red; firm, rich and very sweet; the most valuable baking apple; vigorous, hardy, and productive. Keeps until April.

York Imperial—This is a fine, hardy, large red, winter apple. It succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The foliage and fruit are remarkably free from scab. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Good shipper, bringing highest prices.

Hubbardston (Nonesuch)—Free growth; large striped red and yellow; tender, juicy, rich, slightly sub-acid; very good. Keeps until January.

McIntosh Red Apple

ONE ORDER IS ALL WE ASK. OUR GOODS WILL TAKE CARE OF THE FUTURE

Direct from Grower to Planter

Winter Apples (Continued)

Paragon—Late keeper, large of good color and quality, very productive. Dec. to May.

Wagener—(Red Winter Apple.) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. Dec. to May.

Rhode Island Greening—This large and superior winter apple is famous over a large extent of country, and is more highly prized for cooking and eating than any other variety. It is a good keeper but will keep better if picked early. This Greening is a beautiful yellow color when ripe, and is a most abundant yielder. March to April.

Stayman's Wine Sap—Tree vigorous, hardy, spreading. An early bearer and very productive; fruit medium size, round, approaching conic; skin smooth, greenish yellow, splashed and striped with red and purple; flesh yellow, firm, tender, juicy, rich, sub-acid, aromatic, quality best. Splendid late keeper.

Wolf River—Fruit is very large, some specimens weighing 27 ounces, flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

Smokehouse—A very pleasant flavored dessert apple. Tree a vigorous grower; healthy,

Rhode Island Greening

hardy and reliable cropper. Fruit of medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Seek-No-Further—Medium to large; dull red color; flesh crisp, tender and juicy. November to February.

Yellow Belleflower—Season, winter. A hardy apple of large size, a beautiful golden color, often with red blush; conical in shape.

Picture of one of our large blocks of two year old Apple Trees, taken in early summer

Winter Apples (Continued)

Golden Russet—Vigorous growth; medium; russet; crisp, juicy, mild sub-acid; hardy; very good; long keeper. Nov. to Apr.

Twenty Ounce—Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. Oct. to Jan.

Ramho—Medium, flat streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. Oct. to Dec.

Rome Beauty—Keeps in good condition till May and June. Large, round, mottled and striped in different shades of red; flavor and quality away above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit, Rome Beauty is a variety Eastern orchardists should plant largely. Good grower, blooms late, bears heavily every year, is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York and West Virginia will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure bearing make it a favorite with the grower. Fine quality for use and for handling make it popular with consumers and dealers. When packed in boxes shows up splendidly.

Sutton Beauty—Medium to large; roundish; handsome, waxen yellow, striped crimson; flesh tender, juicy, sub-acid; good quality; keeps well. The tree is a free grower and very productive. Keeps until February.

Wealthy Apple

Winter Banana—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates; its wonderful productiveness will bring quicker and larger returns than any other apple in the orchard. The fruit has a richness of flavor that cannot be described. Flesh golden yellow, fine grained, firm and juicy. Keeps until January.

Bismarck—An attractive apple, making a record for hardiness and fruiting at a very early age; the fruit is of large size, specimens have been grown weighing nearly two pounds each; fruit golden yellow splashed with red; flesh tender.

TREES HEALTHY AND STRONG

The Kelly Brothers have been growing trees for 27 years and all that time they have grown the stock they offered for sale, and they have been so determined to put out nothing but the best trees, healthy and strong, true to name and free from San Jose scale, that they have succeeded in establishing a reputation for honesty and square dealing all over the United States among the firms and individuals they have dealt with.

Their trees are grown in the Genesee valley, the best locality in the world for raising nursery stock, they have a large frost-proof brick packing house, and they will give the closest attention to orders whether large or small. They believe this of benefit to both fruit-grower and themselves, and it is quite certain if testimonials as to their reliability and promptness of attention to orders are required they can be secured from every business man and every reputable citizen in Dansville.

The Kelly Brothers offer the best trees that can be grown, they are true to name, and a fair price has been put on them so that a purchaser will know when he makes a purchase that he will get what he wants and at a moderate price.—*Dansville Express*, Sept. 26, 1912.

Winter Apples—(Con.)

Old Winesap—Winter. Fine keeper; medium size, oblong, smooth, and a fine dark red; flesh yellow, crisp, tender, very juicy, aromatic, firm and good. Tree a strong grower, root-growth exceptionally strong; it comes into bearing early and is remarkable for its regular and abundant crops. One of the very best sorts for lower elevations anywhere south of Pennsylvania, from tide-water to 1,000 feet in Maryland, and to corresponding elevations south of Maryland. One of the sorts you must not overlook for these sections. When grown properly and packed in an attractive manner, it brings the highest prices in the fancy market.

Fallawater—Very large, yellow with dull red cheek, juicy, crisp, pleasant, sub-acid, very productive. Dec. to Apr.

Northern Spy Apple

Delicious Apple

Delicious—A remarkable variety introduced in the West several years ago where it is being largely planted and rapidly taking first rank both for commercial and home orchards. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest, a vigorous grower, with good foliage. A regular annual bearer.

Massachusetts Agricultural College,
Amherst, Mass., Sept. 24, 1914.
Kelly Bros., Dansville, N. Y.

Gentlemen.—I have just been looking over your catalog and I am especially interested in the guarantee which you give. It seems to me this is the only satisfactory way to look at the matter, and it is surprising that some firm has not had enterprise and honesty enough before to do it. I certainly want to congratulate you and hope it will result in your getting lots of trade. Yours very truly,

F. C. SEARS,
Professor Mass. Agricultural College

MIDDLEMEN ADD TO THE COST BUT NOT TO THE QUALITY OF NURSERY STOCK

Crab Apples

Besides producing much sought after fruit the Crab Apple tree is excellent for ornamental purposes. It will grow in any kind of soil and will bear every year. The Crab Apple is a prime favorite with the housewife for jellies and preserves. Many people prefer it to any other fruit for that purpose. We have the following varieties and offer them at the same price as the standard apples.

Transcendent—The best of all Crab-apples; good size, skin yellow striped with red—fine for preserves and jellies. Tree vigorous grower. Ripens in September.

Whitney—Large, averaging 1½ to 2 inches in diameter; skin smooth, glossy green, striped,

splashed with carmine; flesh firm, juicy and rich. Vigorous, handsome.

Hyslop—Almost as large as Early Strawberry Apple; deep crimson; very popular on account of its large size, beauty and hardiness. Keeps well into the Winter.

Dwarf Apple Trees

The Dwarf Apple trees come into bearing much earlier than the Standard trees. Their low, broad heads are within reach so that the fruit can be easily picked. These trees take up so little room that they can be planted in the garden, or even on the lawn, and with care will bear good crops within three or four years. The fruit is of extra high quality. Dwarf trees are secured by propagating on French Imported Paradise stock. We have the following list of best varieties of Dwarf Apples to offer:

Baldwin, Delicious, Fameuse, Grimes Golden, King, McIntosh Red, Maiden's Blush, Nor. Spy, R. I. Greening, Red Astrachan, Wealthy, Winter Banana, Yellow Transparent.

Peach Trees

FOR MANY YEARS it was the popular opinion that peaches would thrive in only certain sections of the country. We know better now. With one or two exceptions it has been shown that this fruit can be grown at a good profit in every state in the Union. Peaches can be grown on any soil that will produce the average yield of farm crops and are especially adapted to the lighter soils. Careful cultivation and intelligent pruning will work wonders in the production of peaches. If properly cared for, the trees are sure to bring in a handsome return on your investment. As in other fruits it is imperative, however, that your trees are of the best stock. It is very important that wood growth on peach trees is well ripened and that they have a good and sufficient quantity of fibrous roots, so they will withstand the hot sun and drought that may occur after planting. We have a very good stock of hardy trees, with well ripened wood and an excellent root system, and we make the lowest possible price consistent with the quality of the stock.

Beers' Smock—Medium to large, round; creamy-white with dark red blush; flesh yellow. tender and rich; good quality; a good commercial peach

Carman—Middle to end of July. Fruit large and broad, oval shaped, yellowish white; flesh creamy white with red tinge, flavor spicy and good. Especially suited to low, wet land, where other sorts will not thrive. Very hardy, and productive every year. A good shipper; quite satisfactory in commercial orchards. Freestone.

Salway—Large; deep yellow, red cheek. Flesh yellow, juicy. Oct.

Gold Drop—Large, good quality, hardy; a profitable market sort; follows Late Crawford.

Greensboro—Large, beautifully colored, bright red over yellow; flesh white; good quality, good commercial sort. July.

Niagara—Large, yellow and red; fine quality; as good as Crawford and a more dependable bearer. Very extensively grown in Western New York. Follows Early Crawford.

Yellow St. John—A desirable peach for home use and profitable for market; orange-yellow, with dark, rich red on sun-exposed side; quality good. Tree strong and vigorous. One week earlier than Early Crawford.

BLOCK OF ONE YEAR PEACH TREES

Peaches (Continued)

Chair's Choice—Deep yellow, red cheek; firm; a few days earlier than Smock.

Crawford's Early—A large, yellow peach of splendid quality; strong grower and prolific fruiter. No other variety has been so extensively planted.

Crawford's Late—Superb yellow peach of large size and excellent quality; great bearer. One of the finest late varieties.

Elberta—Unsurpassed as a valuable, large, beautiful peach of good quality. The best orchard variety. Valuable for planting in garden.

Elberta is hardier in bud than many varieties, therefore a uniform cropper. Fruit is large, yellow, with red cheek, juicy and high flavored, flesh yellow; freestone. Season medium early, following quick upon Early Crawford.

Crosby—This is considered the best variety introduced for years, and is being extensively planted through New England where hardiness is essential. Tree low and spreading. Fruit of medium size, roundish slightly flattened, with a distinct seam on the blossom end. Not so acid as most yellow peaches.

Champion—First of August. Fruit large, creamy white, with red cheek; sweet, juicy, very high quality, and splendid. Good shipper. Its fault, if anything, is that it is too tender. Hardy and productive. Free.

Foster—This variety originated near Boston, Mass., and its popularity has spread over many States. The tree is productive. The fruit is large deep red, especially on the sunny side. The flesh is yellow and very rich and juicy. It has a sub-acid flavor which is very agreeable. It ripens in September and is freestone.

Elberta

Fitzgerald—Originated in Canada. Fully equal to Crawford's Early in size, quality and color, with a much smaller pit; a very early bearer, often when two years from bud; extra hardy succeeding in Canada and in Michigan perfectly; fruit large, brilliant yellow with red cheek; highest quality; ripens after Crawford's Early. Freestone.

Hill's Chili—Hardy, vigorous and productive; of a medium size; oval, with a slight suture; deep yellow, shaded with dark red; flesh deep yellow, red at the stone; freestone.

Early Crawford Peaches

Direct from Grower to Planter

Peaches—(Continued)

A Picture of One of Our Fine Blocks of Peach Trees

Hiley—Large white with high color on sunny side; long keeper and good shipper. Freestone, hardy in fruit bud.

Kalamazoo—Large yellow, with mottled blush; sweet and mild; very productive; a good commercial sort.

Early Rivers—Large light straw color, with delicate pink cheek; flesh juicy and melting, with very rich flavor. Early August.

Wager—Medium, yellow, good quality. Tree hardy and productive. A profitable late variety. Last of Sept.

Belle of Georgia—First half of August. Fruit very large and most attractive in color and shape, with a light red cheek; flesh white, firm, delicious—in all ways the quality is fine. Trees grow quick in shapely form and are very strong. Hardy, prolific. Free.

Triumph—Earliest yellow-flesh peach, with good eating and shipping qualities, sure and abundant bearer; strong, vigorous grower. First of Aug.

Stump (or Stump the World)—Very large, roundish. The skin is white with a bright red cheek. The flesh is white, juicy and good. The tree is vigorous and productive. Ripens near the end of September and is freestone.

Engle's Mammoth—Fruit large; skin yellow, red cheek; flesh yellow, sweet, juicy; stone small; freestone.

Mountain Rose—Medium to large; roundish; whitish, nearly covered with a pretty red; flesh white, juicy, sweet and somewhat vinous. Vigorous and productive. First of Aug.

Wonderful—Not unlike Smock in appearance. Freestone; large, globular; rich golden yellow, partly covered with red; flesh yellow, rich, firm and high-flavored. Productive. Last of Sept.

Reeves Favorite—This is a hardy and productive variety. The flesh is deep yellow and very juicy and melting. The fruit is a great favorite in all parts of the country and makes a ready sale on the market. This is a freestone variety.

Ray—Of good size and has a most attractive red blush of delicate shade. Flesh white, firm and of most excellent quality. Keeps well. A good shipper of fine appearance even after much handling. Trees strong growers, shapely and symmetrical. Old peach orchardists would be surprised to see how quickly they attain good size. A regular bearer of big crops. Ripens Aug. 10th to 25th.

IMPORTANT TO HAVE GOOD ROOT SYSTEM

If there is any one class of fruit trees that receives special attention at Kelly Brothers' Nurseries, it is Peach trees. We exercise the greatest care to have our varieties strictly true to name and by our method of cultivation we get a moderate healthy limb growth and with our climate here get a shorter tree but much more hardy, prepared to withstand the severe weather of the winter.

No matter where you buy Peach trees you cannot get better ones than you will get from Kelly Brothers. We wish every customer or interested person would come to our nursery, and see our clean, healthy, beautiful trees. We have never been troubled with Peach Yellows or San Jose scale in this vicinity.

We wish to impress upon our customers the importance of getting Peach trees with sufficient root system to start with. This is one of the most important points to be considered in planting a Peach Orchard. We do not recommend the planting of large Peach trees. Greater success has been attained by the fruit grower in planting medium or small sized trees.

READ WHAT PROF. F. C. SEARS SAYS ON PAGE 11 OF OUR BROAD GUARANTEE

Cherry Trees

A Bearing Orchard of Large Montmorency in Full Bloom

IN THESE days of apparent specialized fruit growing cherries seem to have been neglected. Yet it is safe to say that no fruit will find a more ready market or bring in a larger return on the money invested. The fact that cherry trees can be used for ornamental as well as productive purposes greatly increases their possibilities on the market. Any well-drained soil will be found to be adapted to the sturdy growth of cherry trees. Our cherries are all budded on imported French stocks and these form a fibrous root which reduces considerably the loss in planting. We believe that no fruit will bring greater profits, as the cherry will bear a fair crop two or three years after planting and requires very little care and attention. We have a good assortment of varieties but would especially recommend the Large Montmorency for commercial planting as it bears enormous crops and the canning factories pay a higher price for it than they do for any other sour variety.

Sweet Cherries

Lambert—One of the largest of all Cherries. It is purple-red; firm and rich. Every year sees an enormous crop, and the tree not only grows well, but is a proof against insect and fungous attacks. The finest of shippers.

Black Tartarian—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

"You'll Never Regret Planting Kelly Trees"

Direct from Grower to Planter

Cherries—(Continued)

Napoleon Cherries

Kelly Bros. Cherry Trees Always Bear Good Fruit

Give your cherry trees the right kind of attention so they will produce flawless fruit, then pick and pack this fruit right and ship it to the big markets. You can market cherries by the car load better than in less quantity. From 30 to 50 trees will produce a car load of fruit. Do not hesitate to plant the trees because you fear there will be no market for them; the market is waiting and will be very willing as soon as you have the cherries. The people who are used to the little inferior fruit never stop looking when they see cherries of improved varieties. Proper cultivation has a good deal to do with making the trees produce the finest fruit.

Bing—One of the most delicious Sweet Cherries grown. Tree very hardy and vigorous with heavy foliage. It succeeds in the East better than most sweet varieties. Fruit is large, dark brown or black and very fine quality. Bing is a good shipper and should be planted with Lambert for commercial purposes.

Yellow Spanish—A pale yellow cherry with bright red cheek in the sun. It is one of the best, most beautiful and popular of all of the light colored cherries; vigorous and productive.

Windsor—Tree upright, vigorous and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

Schmidt's Biggareau—The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine rich flavor. Fruit grows in clusters. It is an excellent shipper. July.

Governor Wood—Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

Napoleon or Royal Ann—A beautiful cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

WELL PLEASED

Golden, Colo., April 21, 1915
Kelly Bros., Dansville, N. Y.

Gentlemen:—I received the 700 Cherry trees today all O. K. I am well pleased with the trees.

Yours respectfully,
JOHN MORRIS,
Master Colorado State Grange.

BUY KELLY TREES OF QUALITY AT LOW PRICES

Cherries—(Continued)

SOUR CHERRIES

Early Richmond—One of the most valuable and popular cherries unsurpassed for cooking purposes. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head, exceedingly productive. Ripens through June. The cherry tree bears almost every year, and is an easy fruiter.

May Duke—This is one of the good old standbys which has been so popular for many years in the past, both in the East and West, where it has been largely planted and where it has rewarded the planter by large crops of profitable fruit. The color of this cherry gradually changes from a bright red to nearly black when fully ripe. The flesh is red, becoming dark purple later; is very juicy and melting, rich, acid and of superior quality. It must remain on the tree until fully ripe in order to develop its best character. Season very early. The tree is very hardy and adapted to all localities.

Large Montmorency—This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of the best fruit of all other sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright clear red. The flesh is of fine quality and sub-acid. Fruit ripens 10 days after Early Richmond.

Dyehouse—A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality, its early bearing remarkable as its great hardiness. Has the appearance of being covered with a scarlet cloth such is the abundance of the fruit. Has the smallest pit of any cherry known; a splendid keeper and free from knots. For tarts, pies and especially for canning, it has no superiors among cherries. June.

Osthme—Large; skin red, dark at maturity; flesh liver-colored; tender, juicy, almost sweet; very good; hardy.

Wragg—Large, roundish, heart-shaped dark crimson and when fully ripe, black or nearly so; flesh and juice light crimson, firm and good, very productive; one of the hardiest and is usually a sure cropper.

English Morello—Fruit large elongated; almost blackish red when fully ripe; very rich, acid; juicy and good. A splendid pie cherry.

Large Montmorency Cherries

Tree very hardy somewhat smaller than other sorts but exceedingly productive. This fruit is in great demand by the fruit-juice manufacturers. July.

Olivet—A tree of this variety should be in every garden. The fruit is very large, has a shining deep red color; tender, mild sub-acid flavor. Ripens in June.

FROM A LARGE PLANTER

Sturgeon Bay, Wis., May 15, 1915

Kelly Bros., Dansville, N. Y.

Gentlemen:—The trees recently ordered from you arrived in good condition and we are well pleased with them. We expect to be in the market for several thousand cherry trees this coming fall for next season's planting and will let you know our needs at that time.

Yours truly,

STURGEON BAY FRUIT CO.,
BENJAMIN JELINEK, Mgr.

NOTE OUR SPECIAL DISCOUNT ON ORDERS RECEIVED BEFORE OCTOBER 15.

Bearing Size Trees

EACH year there is a demand for extra size fruit trees, and to supply this demand we have some extra large bearing size three year old trees. During the past season a large number of trees of this grade were purchased by both the large and small planter, giving them the very best satisfaction in every case. These trees are well developed, well rooted, and will give quick results. We recommend this grade of stock to you and list herewith the varieties we can supply in this grade:

Apple Trees

Extra Size 3 Year 7 to 8 Feet 1 to 1½ Inch XXXX	.40	\$3.50	\$30.00

Pear Trees

THE value of this fruit is just beginning to be appreciated and its cultivation is extending. Compared with apples, there are few really fine pears on the market. If growers would specialize in this fruit they would be well repaid for their efforts, as high prices are always obtainable for choice pears. Our pears are all budded on imported French stock which gives them the finest root system. We recommend the following varieties:

Wholesale Prices of all Varieties of Pear Trees

10% discount on all cash orders received on or before October 15th. After that date 3% discount on all cash orders.

Bartlett—Rich golden-yellow when ripe, often with a soft blush; large, thin-skinned; buttery and melting, with a rich musky flavor. Tree a strong grower, bears young and abundantly, but requires careful cultivation to bring it up to its highest excellence. Probably more highly esteemed for canning and shipping than any other. Succeeds best as standard, but does well as dwarf. An old favorite. When planting orchards of standard Bartlett, it is recommended that dwarf Bartlett or dwarf Anjou be used for fillers, since it greatly increases the profit. In planting dwarf pears, they should be set into the ground deeper than the standard trees, the union should be 4 to 5 inches below the surface.

Clapp's Favorite—Large fine; pale lemon-yellow, with brown dots; fine texture, melting, buttery, juicy, with a rich, sweet, delicate, vinous flavor. Tree hardy and very productive. Thrives where other varieties fail.

Wilder—Medium to small, greenish yellow with a brownish red cheek; melting, sweet and very pleasant; vigorous grower; good bearer.

Howell—Above medium, roundish, pyriform; pale yellow, with mostly a bright red cheek and russet dots; flesh whitish, melting, juicy, with brisk, vinous flavor. Sept. and Oct.

Anjou—This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thor-

oughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Oct. to Jan.

Duchess D' Angouleme—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Sheldon—A large, round, russet and red pear of very rich fine quality, melting, and delicious. Tree vigorous, bears well. Oct.

Vermont Beauty—Of medium size, roundish, yellow, heavily shaded with carmine; flesh exceedingly fine, sweet and juicy. The tree makes a strong, healthy growth and bears good crops. October.

Seckel—A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Louise Bonne de Jersey—Large size, pale green in the shade but overspread with brownish red in the sun; very juicy and melting with a rich and excellent flavor. Good commercial sort. Sept. to Oct.

Richview, Ill., Nov. 21, 1914

Kelly Bros., Dansville, N. Y.

Gentlemen: I received the 500 Kieffer Pears, 2 Year, XXX, ordered from you. Trees were fine. You will hear from us again when we are in need of trees.

Respectfully Yours,

C. P. COOPER & SONS

A CAREFUL STUDY OF OUR NURSERY STOCK AND PRICES WILL INTEREST YOU

Direct from Grower to Planter

Pears—(Continued)

Kieffer—Large to very large, skin yellow, with a light vermilion cheek; flesh brittle, very juicy, with a marked musky aroma; good quality. It is unfortunate that the merits of this fruit have been underestimated from the haste in which it is hurried to market in an immature condition, and often before it has attained the proper size. When allowed to hang upon the trees until the beginning of October, and then carefully ripened in a cool, dark room, there are few Pears which are more attractive. Combines extreme juiciness with a sprightly subacid flavor and the peculiar aroma of Bartlett. Fruit should be thinned. 90 per cent Kieffer and 10 per cent Le Conte should always be the arrangement, on account of pollenizing.

Lawrence—Trees healthy, hardy and very productive. Fruit large; skin yellow, covered with brown spots. Flesh whitish, rich, buttery, and aromatic. One of the quality pears that has great merit for commercial orchards.

Le Conte—Undoubtedly another hybrid from the Chinese Sand Pear. Large, pyriform; smooth, pale yellow, quality good, juicy and pleasant. Tree remarkably vigorous, healthy and free from blight. A prolific bearer and profitable. Oct.

Beurre Bosc—Greatly esteemed. A large yellow pear; flesh white, rich and delicious; has long stem which allows it to sway in heavy winds without dropping. The tree is a slow grower, but most productive. Keeps until Christmas. We have only one year trees of this variety. Price, 50c each; \$4.00 per 10; \$35.00 per 100.

Worden-Seckel—This beautiful and delicious pear attracted wide attention when introduced recently. In quality it is rated very high. In size it is much larger than Seckel. It is shaped like Bartlett but is not as large. A tree of this beautiful pear is an object of beauty on the home ground when laden with beautiful specimens. Oct.

Flemish Beauty—This fine old pear is still one of the hardiest and most generally successful over a wide range of country, producing good crops annually of large, handsome fruit that is exceptionally good in quality. Sept and Oct.

Garber—One of the Japan Hybrids; larger than Kieffer; hardy, productive, early bearer; excellent for canning. September and October.

Kieffer Pear

OUR NURSERIES ABSOLUTELY FREE FROM SAN JOSE SCALE

It is an established fact that San Jose Scale has never been found in our nurseries. We have here three resident New York State Inspectors who look after our stock from seedling to freight car, and not once has this worst of insect pests made its appearance in our nurseries. We welcome the visits of the inspectors, because we know this helps to keep our stock free from disease. Ours is the only nursery center of any importance in the United States that is absolutely free from San Jose Scale.

SEE OUR SPECIAL COLLECTIONS ON PAGE 32

Dwarf Pear Trees

The cultivation of Dwarf Pears is very profitable. The trees are low-headed and the fruit is easily handled and comes into bearing usually the second or third year. Pears are dwarfed by budding on Quince stock, and the trees should be planted three inches below the union. All varieties of Pear do not give good results as dwarfs. We recommend the following varieties to be good growers and bearers, and to give the best satisfaction as dwarfs:

Bartlett, Kieffer, Clapp's Favorite, Beurre d'Anjou, Duchess d'Angouleme, Louise Bonne de Jersey, Wilder Early and Seckel. (For description of these varieties see Standard Pears.)

DWARF SECKEL

Some Interesting Letters

From Just a Few of
Our Pleased Customers

Here are a *very* few of the *many* unsolicited letters we have received from our customers testifying as to the quality of our stock, prompt attention in filling orders, and fair dealing. Read them:

225 Purchase St., Boston, U. S. A., May 23, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: I returned from New Hampshire yesterday, and wish to say that the trees are all planted. I examined them carefully and am very much pleased with them. I think perhaps you may appreciate the fact that my manager states that this is the finest lot of trees he has ever set out, and his experience covers some 25 or 30 years. I write the above as I know that some people appreciate knowing what a real fruit grower has to say in regard to their stock.

Yours very truly,

W. O. HASTINGS.

Mayville, N. Y., May 15, 1916.

Messrs. Kelly Bros., Dansville, N. Y.

Gentlemen: Am very much pleased with the extra fine stock received from you and wish to thank you for the same. I note that you always make good and do better than you advertise. With thanks, I remain,

Yours very truly,

JOHN S. ABRAMS.

Milford, Del., Feb. 14, 1916.

Kelly Bros. Wholesale Nurseries, Dansville, N. Y.

Gentlemen: I wish to express my appreciation for the trees that I bought of you last Spring; also rose bushes and shrubs the year following. They arrived in first class shape, have grown nicely and lived through the winter—a finer lot of trees I never saw.

Very respectfully,

WILLIAM GRAY.

Rockford, Ill., Apr. 15, 1916.

Kelly Bros. Wholesale Nurseries, Dansville, N. Y.

Gentlemen: Trees shipped April 15th arrived yesterday in good shape. They are a nice lot of well-branched, stocky trees with plenty of roots. I am well pleased with this shipment. You can look for another order from me next fall. I certainly appreciate your dealings with me and will recommend your firm to others.

Respectfully yours,

C. O. MILLER.

Grand Rapids, Mich., May 8, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: I wish to express to you my thanks and also my appreciation for the splendid trees you shipped me last year. I have bought a good many hundred trees in the last ten years from different nursermen, but none up to this time have been equal to trees received from you. I wish to thank you very much for past favors. If you wish to use this letter for a recommendation you are at liberty to do so. I wish you would kindly ship trees per the enclosed order.

Very sincerely yours,

E. J. SHARPE,
Religious and Educational Director
Young Men's Christian Association.

Rossville, Pa., May 4, 1914.

Kelly Bros., Dansville, N. Y.

Gentlemen: I received the lot of trees that I sent for some time ago, and all the people that saw them said that they were the healthiest lot of trees that ever came to this town. I never got a bunch of trees that had such nice roots. The cherry trees were exceptionally nice. Next year you can expect an order for several hundred. Thanking you for your promptness and nice trees, I beg to remain,

Very truly yours,

C. E. GLATFELTER.

So. Norwalk, Conn., Nov. 15, 1915.

Kelly Bros., Dansville, N. Y.

Gentlemen: The first shipment of trees received in fine condition. I have not seen them personally, but Mr. Kunert who is interested with me in the Trinity Lake Fruit and Poultry Farm, reports them to be the finest lot of trees he has seen in this country. He also reports them as being very carefully packed, free from all disease and not a poor tree in the entire two thousand. We thank you very much for the care you have taken to please us.

Yours very truly,

SAMUEL RANDALL.

Hillsboro, N. H., May 8, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: I was in Laconia last week setting out my trees and I found them the finest lot I ever saw. They were perfectly packed and I am very much pleased with them. I shall surely place my next order with you.

Very truly yours,

I. E. P. MERRILL.

Baltimore Parental School, Catonsville, Md., Apr. 8, 1916.

Messrs. Kelly Bros., Dansville, N. Y.

Gentlemen: The shipment of trees was received this afternoon in first class condition. They are clean, well grown and satisfactory in every particular. Expecting fine results from them, I am,

Sincerely yours,

E. H. READ.

413 W. Kerr St., Concord, N. C., Nov. 19, 1915.

Kelly Bros., Dansville, N. Y.

Gentlemen: I wish to thank you for the trees which my man reports were received by him Nov. 16th. I wish also to thank you for the courtesy shown me and promptness used in shipping out my trees. I can assure you that when I am in need of nursery stock, I will let you hear from me.

Yours truly,

JESSE M. HOWARD.

Eaton Rapids, Mich., Apr. 28, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: The roses, shrubs, etc., came yesterday and I want to express to you my satisfaction and pleasure, for they were the finest stock I ever saw, and I think I know nursery stock, having had nearly 30 years experience. Please accept my thanks. You have one satisfied customer in me, and in the future I will deal with no other firm.

Very truly yours,

F. H. PARKER.

Cape May Court House, N. J., May 1, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: Enclosed please find order for fruit trees to be shipped at your earliest convenience. I am pleased to inform you that Dr. John S. Douglas of this county who purchased trees of you this spring is more than pleased with every tree and I can safely say they were as clean and well grown as any trees that I have ever seen. It is the kind of stock that I like to see come into the county.

Very truly yours,

GEORGE B. THRASHER,
Co. Supt. of Farm Demonstration.

Highland Road, Tiverton, R. I., May 2, 1916.

Kelly Bros., Dansville, N. Y.

Gentlemen: I received my order in very good condition and am very much pleased with the stock. Thanking you for the complimentary tree, I am,

Very truly yours,

MINA FITZLER.

We have received hundreds of letters similar to the above from almost every section of the United States and Canada, and if you desire to see some of our stock growing, or to get an expression from some one who has planted our stock—write us about it. It is quite likely there is some one in your vicinity who has planted our stock, and if this is the case we will be pleased to furnish his name and address.

Plum Trees

OTHER fruit tree, unless it is the cherry, will produce more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years but the supply still falls far short of the demand. In general, plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties.

Wholesale Prices of all Varieties of Plum Trees

					EACH	TEN	HUNDRED

EUROPEAN PLUMS

Bradshaw—A very large and fine early plum, dark violet red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety. It ripens ten days to two weeks later than Abundance.

Fellemburg Prune—Dark purple with a dark blue bloom; size medium; oval, pointed and tapering. Flesh juicy and delicious; fine for drying. In the West it is grown by the thousands of acres and shipped by the trainload to all markets of the world.

Geuii—Very large, bluish purple; flesh yellowish green, sweet. Tree hardy and rapid grower.

German Prune—A valuable Plum for dessert, but most esteemed for market and drying or preserving. Fruit long, oval, purple with a thick bloom; flesh firm, sweet and pleasant, separating freely from the stone; moderate growth. A great favorite. A sure market for all you have to sell at very profitable prices.

Lombard—Medium to large, roundish, oval, dark red, flesh yellow, juicy and pleasant flavor; hardy popular, nearly always producing a crop, a valuable commercial sort. August.

Monarch—Very large brilliant; bluish purple; flesh, pale golden green; juicy, abundant bearer and begins fruiting young. Free from rot; excellent for market. September.

Shipper's Pride—Large and handsome, dark purple; quality fine, juicy and sweet; excellent for canning. September.

Shropshire Damson—Large, amber color, juicy and sprightly; most desirable of the Damson class; productive and not liable to rot; good commercial sort. Sept.

Imperial Gage—Rather large; oval;

greenish; flesh juicy, rich and delicious, parts from the stone. Tree a vigorous grower; very productive and one of the best plums. Middle of August.

Shropshire Damson

Direct from Grower to Planter

Plums (Continued)

German Prune

European Plums (Continued)

Reine Claude—Large, pale yellow, marked with red, excellent and of fine quality; good bearer; valuable for commercial purposes. Middle of September.

York State Prune is one of the largest, best in quality and most productive of all prunes or plums. Size large; color dark blue, covered with purple blush; flesh yellow and delicious; freestone, ripening the last week in September. It originated in Dansville, N. Y.

JAPANESE PLUMS

Abundance—Fruit large, showy, beautiful. Amber, turning to a rich, bright cherry color, with a decided white bloom, and highly perfumed. Flesh light yellow, exceedingly juicy and tender, of a delicious sweetness impossible to describe. Stone small and parts readily from flesh. For canning it is of greatest excellence. Its season is very early, ripening in advance of other plums, thus adding to its special value.

Burbank—When properly thinned, the fruit is very large, nearly round and bright, deep red; flesh a deep yellow, very sweet, meaty and quite firm, keeping and shipping finely. Tree hardy and vigorous, but sprawling in growth; needs close pruning; enormously productive. Burbank orchards have been very profitable up to date.

Red June—The best Japan plum, ripening before Abundance. Medium to large; deep vermilion-red, with handsome bloom; flesh light lemon-yellow, firm; moderately juicy; fine quality. Tree upright, spreading, vigorous and hardy; productive.

Satsuma—Large, globular, with sharp point. Color purple and red with bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small.

Wickson—A sturdy, upright grower; fruit remarkably handsome, deep, maroon-red, covered with white bloom; stone small; flesh fine texture, firm, sugary and delicious; excellent keeper and shipper.

October Purple—Originated by Burbank, who regarded it as one of the best introduced. Fruits on the old wood and frequently measures seven inches in circumference. Tree a strong, erect, grower, forming a shapely head.

Shiro—Medium size, yellow, and very sweet. The best quality of any of the Japan Plums. We have fruited it in Nursery rows and can recommend it highly for garden planting. Sept.

Sultan—A large, handsome Plum of purplish-crimson color; excellent for cooking and preserving. Keeps long and ships well.

Climax—Very large; deep, rich red; fine flavor; one of the earliest to ripen. Mr. Burbank regards this as one of his most valuable productions.

Our nursery stock has the reputation of being the **BEST** that can be grown, and it is our aim to keep it up to the standard in every way. **THE BEST IS ALWAYS THE CHEAPEST.** It is not what you pay, but what you get, that makes the bargain. Every purchase will prove to you the value of buying stock from us.

WE GUARANTEE THAT OUR STOCK WILL REACH YOU IN GOOD CONDITION

Quince Trees

Its pre-eminence as a fruit for jellies and preserves makes the Quince a profitable tree for the fruit grower, farmer or any one having even a small garden. The Quince tree does not take much room on account of its dwarfish character. Any kind of good, rich soil will give good results. It can be grown in bush or tree form. Hardly any family's fruit supply for the winter is complete without the Quince. We recommend the following varieties:

Wholesale Prices of all Varieties of Quince Trees

Orange Quince

Champion—Fruit very large, fair and handsome. Tree very handsome, surpassing other varieties in this respect, bears abundantly while young; flesh cooks as tender as an apple and without hard spots and cores; flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. One of the most valuable.

Orange—Popular, extensively cultivated, reliable and satisfactory. The name was given in an attempt to do justice to its most delicious flavor. Roundish, bright golden yellow, very large, fine grained, fine quality. Best for cooking. Firm, will stand handling and shipping.

Rea's Mammoth—Large, rich golden yellow; flesh cooks as tender as the apple and without hard spots or cores, flavor delicate, imparting an exquisite quince taste and odor to any fruit with which it is cooked. Sure to ripen even in northern latitude. Very hardy and productive. We regard it the best of all quinces. October.

Bourgeat—Bears at an early age, producing large crops of exceedingly large and handsome fruit, of a rich golden color. While it ripens soon, after the Orange it keeps until midwinter, or it is ready to use at once on maturity. It has proved to be free from leaf blight, the leaves keeping green until killed by frost.

Meech's Prolific—The most prolific of all known varieties; ripens between the Orange and the Champion. Bears very early, usually a full crop at three years; quality unsurpassed and size large.

"You'll Never Regret Planting Kelly Trees"

Direct from Grower to Planter

Wayne County Orange Quince

Bearing Orchard of Wayne County Orange Quince on Farm of Mr. Fred Grover, Pultneyville, Wayne Co., N. Y., from which we secured our scions for propagating the Wayne Co. Orange Quince. Mr. James Kelly, Senior Member of our Firm in the foreground.

A few years ago it came to our attention that the Orange Quince, as generally grown by nurserymen, was not the very best strain of Orange Quince; in fact, it was inferior in many ways to what it should be with reference to flavor, productiveness and size. We at once began to look around to locate some good strain of the real old-fashioned Orange Quince. We had heard of the Orange Quince orchard of Mr. Fred Grover, Pultneyville, Wayne Co., N. Y. (near Williamson), which is located in the heart of one of the greatest fruit belts in the United States. After thorough personal investigation, covering a period of three successive years, each of which saw enormous crops of this luscious golden yellow fruit, we decided we had found the very best Quince. Mr. Grover told us that he had lived on this same farm for over thirty years, and that every year, without exception, this orchard had yielded an enormous crop. In fact it is the most productive of all Quinces.

We then made arrangements with Mr. Grover to secure scions from this orchard. These scions were taken from this orchard by us personally, and we now offer Quince trees propagated in our nurseries from this magnificent strain. The Wayne County Orange Quince is very large, fine-grained, almost round in shape, and of bright golden yellow color. It is from a third to one-half larger than any other Quince we have ever seen. Being very firm it will stand handling and shipping. It is of such delicious flavor that we could not attempt to do justice to its high quality by a mere catalog description. Ripens from September first to fifteenth. As the size, appearance and quality is so much better than that of the ordinary Quinces, Mr. Grover has always had a great demand for his crop, and has always sold his Quinces at a figure far higher than the ruling market price. The tree itself is very thrifty and bears at an early age. Mrs. Grover says she remembers the trees bearing when they were very small; in fact, this variety has fruited in our nurseries at one and two years old. With all sincerity we can recommend this variety for commercial purposes, or for home use. You will make no mistake in planting this most productive, highest quality Quince. Be sure to get the *genuine* Wayne County Orange Quince direct from Kelly Bros., the introducers. Each tree has attached our Trade Mark label. On one side of the label is printed: "Wayne County Orange Quince;" on the reverse side, "Kelly Bros., Dansville, N. Y."

Apricots

This is a rich, delicious fruit, coming between Cherries and Peaches. It is very much like the Peach in outward appearance but like the Plum in quality and texture. The Apricot ripens about a month or more before the best early peaches come in, which explains the reason for the great demand and prevailing high prices. It should be planted in deep, rich soil; and care should be taken to know that the sub-soil as well as the top-soil is dry.

Aside from its value as a fresh fruit, the Apricot has a fixed place on the list of fruits for canning and drying, for which purposes vast quantities are used every year. There is always a market for Apricots and the planter should have no fear of over-production. Our stock of Apricots for this season is exceptionally fine and we make a very attractive price on them.

Wholesale Prices of all Varieties of Apricot Trees

			EACH	TEN

10% discount on all cash orders received on or before October 15th. After that date 3% discount on all cash orders.

Alexis—Very hardy; an abundant bearer; yellow, with red cheek; large; slightly acid, rich and luscious.

Budd—Medium to large; light orange with blush on sunny side; flesh sweet, juicy with flavor of the peach; hardy and productive.

Harris—A hardy English sort. Medium size; oblong orange; good quality; very early. The best variety for Eastern culture.

Alexander—Fruit yellow, flecked with red, very beautiful and delicious. July.

Moorpark—One of the largest, orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Gibb—Tree hardy, grows symmetrical, productive. Fruit medium yellowish, sub-acid, juicy and rich. The best early variety ripening soon after strawberries.

Nut Trees

The necessity for the importation of large quantities of nuts each year has awakened American agriculturists to the possibilities in producing nuts. Oftentimes the trees will thrive on soil not adapted to profitable fruit growing.

Black Walnut—This species is a common and stately forest tree in the middle and western states; grows from forty to sixty feet high; has an open, spreading head and is rapid in growth; produces large crops of nuts with rough hard shell containing rich, oily kernels of fine flavor. Trees 5 to 6 ft., 60c each. 4 to 5 ft., 50c each.

American Sweet Chestnut—This is the well-known native variety with which nearly everyone is familiar. It is a stately tree, attaining great height when mature. It is beautifully symmetrical and when in blossom is as handsome as a tree can be. It bears a nut of good quality and seldom fails to produce a good crop. Aside from their crop value, all the Chestnuts are specially desirable for shade purposes and

for ornamental planting. Trees 4 to 5 ft. in height, 50c each, \$4.50 per ten.

English Walnut—A fine, lofty-growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Trees 3 to 4 ft., 50c each. 4 to 5 ft., 75c each.

Chestnut, Spanish—A handsome round headed tree, producing abundantly, very large nuts that find a ready market at good prices. Price of Spanish Chestnut trees, 4 to 5 ft., 50c each.

Butternut—A fine native tree producing a large longish nut, which is prized for its sweet, oily, nutritious kernel. Price of Butternut trees, 4 to 5 ft., 50c each.

WILL WANT MORE

Kelly Bros., Dansville, N. Y.

Gentlemen:—Your shipment of trees came in fine shape and were a fine lot. I was very much pleased with them; shall want more next year.

Derry, N. H., June 10, 1915

Yours fraternally,

WESLEY ADAMS,

Master N. H. State Grange.

THERE IS A REASON FOR OUR LOW PRICES—WE SAVE YOU THE MIDDLE-MAN'S PROFIT

Direct from Grower to Planter

Special Bargains in Fruit Trees

Many planters prefer to plant the smaller size trees as it reduces the cost of investment. In all cases they report success in planting this grade as the fibers of the roots are small and readily adhere to the ground and make a rapid and very satisfactory growth the first year. A few buyers of fruit trees have an idea that the smaller size trees are poor trees and are not fit to plant. This is a mistake as each one of our smaller size trees is a good, clean, straight healthy little tree and is first class in every respect according to grade. These small trees are well rooted and mature, and we recommend them most highly to the planter. We have a good stock of Apple, Peach, Pear, Cherry and Plum and offer them at these special low prices:

Ornamental Department

WELL-KEPT grounds, which necessarily include fine shade trees, ornamentals, flowering shrubs, vines and roses, are naturally a great source of pleasure to a property owner. They also greatly enhance the value of property. A relatively small amount invested in ornamentals will bring a big return should you wish to dispose of your property. Nor does it require a big outlay of money to make your property beautiful by such ornamentation. The trees, shrubs, etc., of course, should not be planted haphazardly. If you do not know just how to go about the matter you can easily obtain competent advice. We take the same care with our ornamental stock that we do with our fruit stock. That means

that it is the best.

Be sure to get our big Spring Catalog which gives full description of the ornamental stock we grow.

Kelly's Bargains in Special Collections

Kelly's Apple Collection No. 1

10 5 to 7 ft., XXX grade Apple Trees \$1.40

- 1 Delicious
- 2 McIntosh Red
- 2 Baldwin
- 2 Northern Spy
- 1 Wealthy

2 R. I. Greening

Special Price \$1.40

Regular Price \$2.00

Kelly's Apple Collection No. 2

10 4 to 5 ft., X grade Apple Trees 75c

- 1 Delicious
- 1 R. I. Greening
- 1 McIntosh Red
- 1 Stayman's Winesap
- 2 Baldwin
- 2 Northern Spy
- 2 Wagener

Special Price 75c

Regular Price \$1.00

Kelly's Cherry Collection No. 3

10 4 to 5 ft., X grade Cherry Trees \$1.10

- 3 Large Montmorency
- 2 Early Richmond
- 2 English Morello
- 2 Black Tartarian
- 1 Napoleon

Special Price \$1.10

Regular Price \$1.55

Kelly's Currant Collection No. 4

10 Strong 2 Year Bushes for 50c

- 3 Wilder (red)
- 2 White Grape
- 2 Black Champion
- 1 Perfection Red
- 2 Red Cross

Special Price 50c

Regular Price 75c

Kelly's Std. Pear Collection No. 5

10 4½ to 6 ft., XX grade Standard Pear \$1.50

- 2 Bartlett
- 2 Kieffer
- 2 Clapp's Favorite
- 2 Anjou
- 1 Seckel
- 1 Sheldon

Special Price \$1.50

Regular Price \$2.00

Kelly's Grape Collection No. 6

10 2 Year No. 1 Strong Grape Vines 55c

- 3 Concord, Black
- 3 Niagara, White
- 2 Catawba, Red
- 1 Campbell's Early, Black
- 1 Delaware, Red

Special Price 55c

Regular Price \$1.00

Kelly's Plum Collection No. 7

10 4 to 5 ft., X grade Plum Trees \$1.25

- 2 Fellemburg Prune
- 2 Burbank
- 2 Abundance
- 1 Lombard
- 1 Reine Claude
- 1 Imperial Gage
- 1 Bradshaw

Special Price \$1.25

Kelly's Collection for the Garden No. 8

2 Elberta Peach, 1 Ey. Crawford Peach, 1 Montmorency Cherry, 1 Early Richmond Cherry, 1 Black Tartarian Cherry, 1 Kieffer Pear, 1 Bartlett Pear, 1 Seckel Pear, 1 German Prune, 1 Lombard Plum, 1 Bradshaw Plum.

12 First Class, X Grade Trees

Special Price \$1.45

Regular Price \$2.00

Kelly's Peach Collection No. 9

10 3½ to 4 ft., XX grade Peach Trees 90c

- 3 Elberta
- 2 Champion
- 2 Carman
- 1 Belle of Georgia
- 1 Early Crawford
- 1 Late Crawford

Special Price 90c

Regular Price \$1.25

Advice to Planters

Preparation of the Soil—Prepare a rich, deep bed of mellow soil, and have the land sufficiently drained to relieve the roots from standing water. To insure a fine growth land should be in as good condition as is required for a crop of wheat, corn or potatoes.

Preparation of Trees or Other Stock—We use great care in digging and packing, but the loss of some small roots and fibers is unavoidable. If stock is properly prepared before it is planted, no permanent injury will result from this, but the preservation of the natural balance between top and roots renders a vigorous cutting back of the former absolutely necessary in most cases. And, therefore, prune off broken ends of roots, if any (a smooth cut root granulates or makes ready to extend sooner than one broken off), cut back the tops to the extent of about one-half the previous season's growth, taking care at all times to prune in such a manner as will tend to develop a well formed head, sufficiently open to admit air and light freely. Evergreen and other ornamental trees, the beauty of which depends on preserving their natural form, should be pruned very little. Hence, great pains should be taken in planting and caring for these. If not ready to plant when the stock arrives, "heel it in" by placing the roots in a trench and covering them with mellow earth, well packed.

Planting—Make the holes large enough to admit the roots without any cramping or bending, and deep enough to bring the tree to its natural depth. The fine surface soil should be used in covering the roots, and this should be carefully worked among them. If the ground is dry it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots by exerting the full weight of the planter upon it, so that there will be no opportunity for dry air or frost to enter and destroy roots deprived of the full benefit of their natural protection. Omission to pack the earth solidly is a most frequent cause of failure in planting nursery stock. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Always remove the label when planting. If this is left until the tree is grown, the connecting wire often cuts into and destroys the tree or branch to which it may be attached. When planting dwarf trees set them low enough to cover the stock upon which they are budded, three or four inches.

Mulching—When trees or bushes are planted, they should be mulched or covered with a layer of coarse manure or litter from three to six inches deep for a space of say, two feet more in diameter than the extent of the roots. This keeps the earth moist and at an even temperature.

After-Culture—Grass should not be allowed to grow about young trees or plants. The ground should be cultivated for a space of at least a foot outside the roots. If the ground is poor it should be enriched with surface application of manure. Pruning should be varied according to the condition of the tree and the purpose of the planter. It should be done regularly every spring before the buds swell any. In this way the removal of any large branches will be avoided.

A Table Showing the Number of Trees or Plants to the Acre by the Square System

Distance	No. of Trees	Distance	No. of Trees	Distance	No. of Trees
1 foot apart each way	43,560	9 feet apart each way	537	17 feet apart each way	150
2 feet " " "	10,890	10 " " " "	435	18 " " " "	134
3 " " " "	4,840	11 " " " "	360	19 " " " "	120
4 " " " "	2,722	12 " " " "	305	20 " " " "	108
5 " " " "	1,745	13 " " " "	257	25 " " " "	69
6 " " " "	1,210	14 " " " "	222	30 " " " "	48
7 " " " "	888	15 " " " "	193	35 " " " "	35
8 " " " "	680	16 " " " "	170	40 " " " "	27

Rule.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43,560), will give the number of trees to an acre.

Distances for Planting

Standard Apples	40 feet apart each way
Standard Pears and Strong Growing Cherries.....	20 " " " "
Duke and Morello Cherries.....	18 " " " "
Standard Plums, Peaches, Apricots and Nectarines.....	16 to 18 " " " "
Dwarf Pears, Dwarf Apples and Quinces.....	10 to 12 " " " "
Grapes.....	rows of 10 to 16 feet apart; 7 to 16 ft. in rows
Currants and Gooseberries.....	4 feet apart
Raspberries and Blackberries.....	3 to 4 feet by 5 to 7 feet
Strawberries, for field culture.....	1 by 3 to 3½ feet
Strawberries, for garden culture.....	1 to 2 feet apart
Asparagus in beds.....	1 by 1½ feet
Asparagus in fields.....	1 by 3 feet
