Swain Nelson & Sons Co.

Nursery Products

WE have every confidence that our trees will make good wherever they are planted. For ten to twenty years they have received our constant and careful attention under ideal growing conditions.

We believe it to be an advantage to our customers that we can offer them a large stock to select from. Not only do we offer an extremely large variety of plants, but also an unusually large range of sizes in each variety. Our nursery is the largest in Illinois.

Prices in this Catalogue are at the nursery and represent substantial reductions from previous years. Five plants may be had at the ten rate, twenty-five at the one hundred rate.

Estimates.—We solicit the opportunity to estimate on all planting lists, either public or private. All such lists will be carefully estimated and promptly returned, giving full advantage of our best rates.

Personal Selection at the nursery is preferable whenever possible, but if this is not possible, and we are informed of your requirements, we will take special pains to make a suitable selection for you.

Visitors to our Nursery should notify our General Office, 940 Marquette Building, Chicago. Phone Central 2770 and 2771 and arrangements will be made to have them met at Glenview Station and the usual courtesies extended.

Shipping.—Being a suburb of Chicago, the greatest railway terminal in America,

we can assure direct routing and prompt delivery. Safe arrival is guaranteed. Orders lost or damaged in transit will be refilled without charge if proper notice is given. Within certain distances we are prepared to deliver by motor truck or wagon. These deliveries, however, are matters for special arrangements both as to time for delivery and as to charges.

Replacing.—Any of our nursery products which fail to live will be cheerfully replaced at half of the current "Each" price, provided they have been properly planted and cared for.

Boxing and Packing.—When Cash accompanies order, the packing and boxing will be done **free of charge**. Otherwise, packing will be charged for at the cost of materials used.

Payments.—All accounts are due when bills are rendered, and payment is expected by the first of the following month.

PEONIES

THE QUEEN OF ALL PERENNIALS

THERE never was an old-time garden which did not have the Peony as one of its chief attractions. This queen of garden flowers never fails to produce a wealth of blossoms, nearly all of which are fragrant, colors varying from deepest crimson to pure white. It rivals the rose in brilliancy of color and perfection of bloom. The flowers of some of the sorts attain gigantic proportions, often measuring seven or eight inches in diameter, with stems two and one-half to three feet in length and sufficiently strong to support the blooms. Peonies should be planted in masses, with their colors separate, in order to get the best possible effect, but lend themselves to any form of gardening and grow to perfection in ordinary garden soil.

CLASSIFIED PLANTING LISTS

EVERGREENS

Recent years have seen a great increase in the popularity of evergreens, and this popularity is well merited, as they not only give class to every planting, but they have the added advantage of being highly decorative throughout the whole year.

Low-Growing

For decorative low evergreen planting at the door-step or other prominent situation, group together a number of the following:

	Page		Page		Page		Page
Arborvitae, Tom Thumb..	4	Japanese Golden Juniper.	1	Savin Juniper	1	Tamarisk-leaved Juniper..	1
Dwarf Juniper.....	1	Japan Yew	3	Silver-tipped Chinese	1	Trailing Juniper.....	1
Globe Arborvitae.....	4	Lee's Golden Cedar.....	2	Juniper	1	Variegated Juniper.....	1
Hovey's Arborvitae.....	4	Pfitzer's Chinese Juniper.	1	Spreading Juniper.....	2		

Tall-Growing

Where height is desired either for the sake of skyline or shelter, or as a screen, the most suitable varieties to use are:

	Page		Page		Page		Page
Austrian Pine	3	Colorado Spruce.....	2	Norway Spruce	2	Silver Fir	1
American Arborvitae....	4	Douglas Spruce	3	Pitch Pine	3	White Pine	3
Bull Pine	3	Engelmann's Spruce.....	2	Scotch Pine	3	White Spruce	2

Single Specimens

Single specimens planted on the lawn are always very effective. For this purpose any of the following varieties would be suitable:

	Page		Page		Page		Page
Drooping Norway Spruce..	2	Douglas Spruce	3	Koster's Blue Spruce....	3	Schott's Cedar	2
Doumett's Black Spruce..	2	Chinese Fir	1			Silver Fir	1

Formal-Shaped

Formal gardens, or any symmetrical planting, require neat, compact evergreens such as:

	Page		Page		Page		Page
Arborvitae Tom Thumb..	4	Globe Arborvitae	4	Irish Juniper	1	Red Cedar	2
Chinese Arborvitae	4	Hovey's Arborvitae	4	Pyramidal Arborvitae....	4	Swedish Juniper	1

Golden

If a touch of color is needed, add from these golden-hued plants:

	Page		Page		Page		Page
Japanese Golden Juniper.	1	Peabody's Golden Arbor-	4	Vervaeke's Arborvitae....	4	Variegated Juniper	1
Lee's Golden Cedar.....	2	vitae	4				

Silvery Blue

If a silvery-blue tone is required, choose from the following:

	Page		Page		Page		Page
Blue Virginia Cedar....	2	Golden Siberian Arbor-	4	Koster's Blue Spruce....	3	Silver-tipped Arborvitae...	2
Chinese Juniper.....	1	vitae	4	Silver Fir	1	White Spruce	2

STREET TREES

Trees are planted for several purposes; for the street row, for shade on the lawn and for forest effects. The characteristics of the various kinds, and their hardiness under adverse conditions, usually determine their suitability for the purpose intended.

Large Growing

For street planting where it is desired to have large trees when they mature, use the following:

	Page		Page		Page		Page
American Elm	10	English Elm	10	Red Oak	9	Sugar Maple	5
American Linden	9	Pin Oak	8	Silver Maple	5	Sycamore Tree	8

Medium

Where medium sized trees are wanted, select from these:

	Page		Page		Page		Page
Acacia	7	Carolina Poplar	8	Hackberry	6	London Plane	8
Broad-leaved English Elm.	10	English Ash	7	Huntingdon Elm.....	10	Norway Maple	5
Bronze Ash	7					White Ash	7

Small

In some locations it is preferable to plant trees which, even when they are full grown, are still comparatively small. If you have such conditions, select from these:

	Page		Page		Page		Page
European Linden	9	Green Ash	7	Laurel-leaved Willow....	9	Small-leaved European	9
European Mountain Ash..	9	Horse Chestnut	5	Ohio Buckeye	5	Linden	9

LAWN TREES

The trees mentioned above are also suitable for lawn planting; but, in addition, there are many trees which possess special features which should be taken into consideration.

Flowering Trees

Trees which cover themselves with flowers are doubly useful in a landscape. Some of these should be included in every planting:

	Page		Page		Page		Page
Bird Cherry	8	Cucumber Tree	8	Horse Chestnut	5	Parkman's Flowering	
Choke Cherry	8	Double-flowering Crab...	8	Japanese Catalpa	6	Crab	15
Crimson Flowering Cur-		European Alder	5	Native Catalpa	6	Scarlet Haw	6
rant	15	Flowering Crab	8	Ohio Buckeye	6	Small-leaved European	
						Linden	9

Ornamental Fruit

The following trees bear very ornamental fruit, not only beautiful in itself, but very attractive to the birds which come to feed:

	Page		Page		Page		Page
Cockspur Thorn	6	Chinese Cork Tree	8	European Mountain Ash.	9	Scarlet Haw	6

Colored Bark

In planting it is well to provide for winter effects. This is the period when the bark of the trees constitute an important feature of the landscape. The bark of the following trees is quite striking:

	Page		Page		Page		Page
Blue Barked Willow	9	Cut-leaved Weeping Birch.	6	English Ash	7	Golden-barked Willow	9
Crimean Linden	9					Red-twigged Linden	9

Quick Growing

Sometimes it is necessary to obtain quick results, and at small expense. The following will be useful for this purpose:

	Page		Page		Page		Page
Carolina Poplar	8	Native Catalpa	6	Silver Maple	5	Tree of Heaven	5

Formal-Shaped

Where a formal effect is sought, it is often useful to plant trees naturally symmetrical, or artificially produced, such as the following:

	Page		Page		Page		Page
Cornish Elm	10	Globe-headed Catalpa	6	Globe-headed Elm	10	Lombardy Poplar	8

Weeping Trees

No trees are more graceful than those with pendulous drooping branches. They are handsome trees for the lawn:

Conspicuous Foliage

Some planting problems demand trees with marked individuality. This is supplied by trees with characteristic foliage. For such use, consider:

SHRUBS

An amazing variety of beautiful effects may be obtained by planting various combinations of shrubs. They should be considered from the standpoints of form, habit of growth, texture of foliage, and color of flowers and fruit.

White Flowers

Classified as to color of flowers, we find that the major number of shrubs have attractive white blossoms. They are:

Double-flowering Plum	8	Judas Tree	6	Rose-flowering Weigela	17		

Yellow Flowers

Some of the earliest shrubs to flower in the spring are the gorgeous Golden Bells. The list of yellow flowering shrubs is a short one, but valuable, viz.:

Double-flowered Japanese		Golden Bell Hybrid	13	St. John's Wort	13	Witch Hazel	13
Globe Flower	11	Golden Bell Weeping	13				

Red Fruit

Shrubs bearing decorative fruit or berries usually produce handsome flowers; and as the presence of berries attracts the birds, such shrubs should be freely planted on all home grounds. Those with red fruit are as follows:

Shade Enduring

To secure forest conditions when planting groves, it is well to plant between the trees, shade-enduring shrubs as under-planting. Shrubs suitable for this purpose are:

	Page		Page		Page		Page
American Black Currant.....	15	Honeysuckle in variety.....	14	Polish Privet	13	Scarlet-twigged Dogwood.....	11

Cornelian Cherry	11	Mock Orange in variety.....	14	St. John's Wort.....	13	Spindle Tree	12
Five-leaved Aralia	11					Sweet-scented Shrub	11

It is often a problem to know what to plant on the ground partially shaded by the house. The following shrubs do well under such conditions:

Amor Privet	13	Five-leaved Aralia	11	Golden Bell Hybrid.....	13	Scarlet-twigged Dogwood.....	11
Bush Cranberry	17	Fragrant Sumac	15	Ibota Privet	13	Snowball Hydrangea.....	13
Coral Berry	16	Golden Bell	13	Ninebark Spirea	15	Snowberry	16

Subtropical

At times it is desirable to secure a luxuriant subtropical effect. Plant the following for this purpose:

	Page		Page		Page		Page
Chinese Angelica Tree.....	6	Chinese Cork Tree.....	8	Hercules Club	6	Tree of Heaven.....	5

Feathery Foliage

There is a class of shrubs having feathery, cut-leaved foliage. They are:

Amor Tamarisk	17	Cut-leaved Elder	16	Fontanesia	12	Kashgar Tamarisk	17
Ash-leaved Spirea	16	Fern-leaved Sumac	15	Japanese Larch	7	Small-leaved Honeysuckle.....	14

Low Growing

An extremely useful class is the low growing kind. These shrubs are indispensable for planting in the foreground.

Hedge Plants

A hedge serves all the purposes of a fence, and at the same time adds charm to the landscape. The following varieties are suitable for hedge plants in this climate:

NATIVE PLANTS OF ILLINOIS

For years we have specialized in growing plants native to Illinois. When our State University began to advocate planting Illinois trees and shrubs, they found our nursery could supply the best varieties of such plants than any other nursery in the State. Our list is as follows:

What Nelson Service Is

Our "Service Department" continues the work which has been well started by our "Nursery Department." After sowing the seeds and starting the slips in the nursery, the tender plants springing up are carefully nursed until they develop into large, vigorous plants ready to go to the gardens of our customers. At this point the "Service Department" is ready to step in, and at a reasonable charge, deliver these plants to the grounds of our customers, arrange them artistically, plant them carefully and guarantee, for two years, their replacement in case any of them fail to grow.

It may be readily seen that our "Service Department" will have more interest in the success of the planting than would the usual outside contractor who takes charge of such work.

In addition to the above, our "Service Department" is equipped for designing and preparing plans for all landscape improvements on the home grounds, and is ready to undertake the construction of the same on a percentage basis, furnishing a reliable estimate of the cost.
