Choice Early Tulips

Tulips are of the most satisfactory spring-flowering bulbs. They are extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favorable place. Double and Single Tulips, when associated together and planted in beds or in front of shrubs, maintain a longer display than if either are separately planted. Our collection includes the very best varieties, both in the early and late-flowering classes. (The figures indicate height of flower.)

May-Flowering Tulips

New Dutch Breeder Tulips

Breeder Tulips are similar in habits to the Giant Darwins and bloom at the same time. Their chief attractions are: their immense blooms on tall stems, many of them taller and larger than the gigantic Darwins; their lasting qualities, and their exquisite and odd colorings, making them unique and different.

SUNRISE (Jaune d'Oeuf).—Ruddy apricot with soft yellow edge. The reddish shade of the lower part of the petals ends in a black spot at the base. Hard to describe, but very beautiful. (24 inches.) Price, 7c each; 70c per dozen.

Parrot or Dragon Tulips

Very large flowers of singular and picturesque forms and brilliant colors; very beautiful and interesting. The petals are curiously fringed or cut. They form extravagantly showy flower beds or borders, are of endless variety in form and color, stand a long time when cut, and should be grown in every flower garden in quantity.

The Giant Gesneriana Tulips

This beautiful class is becoming more popular each season. They are quite distinct from the early flowering sorts. Tulips for Home Culture

We would recommend for growing in fibre to bloom during January and February, such Tulips as Kaiser-Kroon, White Hawk, Montresor, Vermilion Brilliant and all the Duc Van Thols. Also Double Murillos, Salvator Rosa and La Matador.

Prepared Fibre for Bulb Growing

This is something new in which to grow and flower bulbs during winter in bowls, jardinières, fern dishes, etc., without drainage. A splendid advantage for townspeople or city people who have difficulty in obtaining good potting soil.

Prepared Fibre is composed of excellent Holland peat, combined with other materials, such as charcoal, crushed oyster shells, etc., to keep it sweet. It does not dry out as quickly as soil nor sour if too much water is given. It is light, clean and nice to handle, and if used as directed will encourage healthy growth and perfection of bloom. By our own testing of this material we have found that the bulbs come into flower two weeks earlier when planted in fibre, and that the flowers are much larger. This is especially true of the four Hyacinths recommended for pot culture. As soon as Hyacinth bud begins to show color bring the pot into a warm, sunny position and give an abundance of water.

An excellent medium in which to grow Hyacinths, Roman Hyacinths, Tulips, Narcissus, Crocus, Chionodoxas, Frezias, Scillas, etc.. Full directions sent with every package.

Price, 12c per quart, postpaid; 4 quarts for 40c, postpaid. By express, 4 quarts for 30c; 8 quarts for 50c.

Bed of Double Early Tulips.

May-Flowering Tulips

Superb Giant Darwin Tulips

This class is without doubt the Queen of Tulips, very stately and beautiful—producing immense flowers on tall stately stems two to three feet in height. The flowers are models of perfection in form and remain perfect longer than any other Tulip. They are constitutionally so strong that grass will not choke them and will thrive for several years with no attention if planted in grassy places. In color they are both dainty and rich—white, pink, rose and crimson, also mauve, light blue, purple or maroon, all with perfectly marked centers.

If you plant Darwin Tulips once you will never again be without them.

A BEAUTIFUL NOVELTY

The Green Tulip "Verdiflora"

This remarkable Tulip is not only desirable because of its rare color, but its real beauty. The flower is large, composed of long pointed petals which curve outward; a most graceful form, and exquisite color. A lovely shade of green with soft yellow edges. Quite a sensation. Price, 10c each; \$1.00 per dozen.

"The Flower That Set a Nation Mad"

The Black Tulip—"La Tulipe Noire"

The largest amount of money ever offered for the production of a single flower was \$100,000, for a perfectly black Tulip, over three hundred years ago, during the Tulip craze in Holland. The romance of its production formed the plot for a noted novel; and it is also responsible for one of the greatest financial panics of the world. The descendants of this famous flower are still very scarce, rare and valuable. We have secured a few bulbs of this historical Tulip and offer you bulbs of the jet black, wonderful large flowered Tulip. There is yet no variety which surpasses this in either beauty or size. Price, 15c each.

Begins blooming in March, and continues in good condition for weeks. Price, 3c each; 20c per dozen; \$1.25 per 100.

Chionodoxa Luciliae

(Glory of the Snow.)

One of the most lovely hardy flowering spring bulbs, producing lovely azure-blue flowers with pure white center. It is one of the earliest of all flowers, blooming before the Crocus. Price, two for 3c; 15c per dozen; \$1.25 per 100, by mail.

Select Named Single Hyacinths

Single Hyacinths are much to be preferred to double ones. In double Hyacinths whereas the single florets are doubled, they are much farther apart on the stem, and therefore do not form nearly so handsome a truss as the single varieties, where the trusses are much longer and fuller. We strongly advise the single instead of the double for both bedding and pot culture.

NEW NARCISSUS POETAZ

THE HARDY CLUSTER-FLOWERED POET'S NARCISSUS

These new hybrids between Poeticus and Polyanthus are hardy, healthy, strong growers, some of the varieties attaining the height of two feet. The Poeticus-like flowers are borne in clusters like those of the Polyanthus type. As a border, particularly when edged with Grape Hyacinth, they prove very effective and will become permanent. Excellent for pots, also.

POLYANTHUS NARCISSUS

LARGE-FLOWERED PAPER WHITE NARCISSUS

If grown in pots, six or seven weeks will produce the flowers. We especially recommended to grow this bulb in a dish filled with water and bulbs well supported with pebbles, after the fashion of Chinese Sacred Lilies, as they are far superior to the latter. Flowers appear in six weeks in greater number and more perfected. Failures are not known. It is advisable to start the bulbs in a dark place for four to six days. Grow cool and give plenty of water. Large clusters of pure white flowers, which remain perfect for several weeks. Extra size bulbs. Price, 6c each; 50c per dozen, postpaid.

DOUBLE ROMAN CLUSTER NARCISSUS

Outer petals cream-white with double orange and yellow cup; very early and free-flowering, and valuable for forcing and pot culture. Also splendid for growing in water and pebbles in same manner as advised for Paper White. Price, 6 cents each; 50 cents per dozen, postpaid.

GRAND SOLEIL d'OR

Outer petals rich, golden yellow, cup deep orange-red. Very brilliant. Splendid for outdoor planting as well as for house culture. Price, 7 cents each; 60 cents per dozen, postpaid.

NOTICE The above three Narcissus, Paper White, Roman Cluster and Grand Soleil d'Or, are grown in France, and are hard to obtain this year; though we have fortunately secured a fine lot of them, they cannot reach this country before October 1st, which allows plenty of time for you to bring them into early bloom.

CHINESE SACRED NARCISSUS

ORIENTAL LILY OR "JOSS FLOWER"

The most satisfactory of all winter-blooming bulbs. No home should be without one. Nothing is easier cared for or gives as great an abundance of deliciously scented bloom. Fill a bowl or similar vessel with pebbles, in which place the bulb, setting it about one-half its depth, so that it will be held firmly, then fill with water to the top of pebbles, and place in a warm, sunny window. The bulbs will at once commence rapid growth and bloom in four or five weeks. Price, extra size, 12 cents each; 5 for 50 cents; by express, \$1.00 per dozen.

Narcissus Poetaz.

Growing bulbs in Prepared Fibre is an interesting, quick, easy and cleanly method of flowering them in the house in winter. All the above Narcissus are especially good for growing in Fibre.

NARCISSUS JONQUILA, or Sweet Jonquils

Much prized for their charming golden and delicious sweet-scented flowers; perfectly hardy and flowering very early in the spring; they are admirably adapted for winter forcing.

DOUBLE PEERLESS NARCISSUS

DOUBLE TRUMPET

DOUBLE VON SION—"The True Double Yellow Daffodil." Rich golden-yellow perianth and trumpet. This is the old favorite so highly prized in old-fashioned gardens. It is as handsome as ever, and deserves to be planted in quantity where it can remain undisturbed for several years; it will then thrive and bloom in increasing profusion every spring. It is also one of the best winter-flowering. Mammoth bulbs, producing two or more flowers, 6 cents each; 50 cents per dozen.

INCOMPARABLE—"Butter and Eggs." Full double flower, of rich yellow, with orange nectary. Splendid for blooming in the house. Price, 4 cents each; 35 cents per dozen.

Winter Flowering Callas

PLANTING INSTRUCTIONS—All of the Callas which are grown from bulbs like a rather rough, rich soil. If the bulbs are not large, begin with a three-inch pot and shift several times, and when they are in a six-inch pot, let them remain in that size for flowering. The Calla thrives best in a temperature of about sixty, and after well started should have plenty of water. Having planted it in a rough soil, the grower will find that the water must not be withheld, for with good drainage it will not be hurt by an abundance, and the foliage and flower will be all the finer. Give the plant plenty of sun, and add to the quantity of water as the flower comes on. When done flowering, which will be late in the spring, the plant must be allowed to rest.

Dwarf Calla Little Gem

Strong and dwarf habit. The foliage is of a lustrous dark green, is produced in great abundance; its flowers are produced in great profusion and are pure white. It is practically an ever bloomer. 15c each; 2 for 25c; \$1.25 per dozen.

Grand Improved Yellow Calla Elliottiana, 35 cents.

Yellow Calla

CALLA HASTATA—The flowers are clear lemon-yellow, produced freely on long stems. The foliage is deep rich green, and the plant is quite showy. Does well as a pot plant, strong growing and blooming freely. This new variety is a genuine Calla and is cultivated the same as the common White Calla. It has the habit of the more dwarf sorts by blooming when quite small. Treated as a summer flowering bulb it will bloom as well outdoors as within. Price, 25 cents each; two for 40 cents; \$2.25 per dozen.

Orange-Yellow Calla

CALLA ELLIOTTIANA—This is the great new yellow Calla of marvelous beauty. Flowers are very large, rich, deep orange-yellow, often four to five inches across the mouth, leaves are spotted with white. Handsome foliage, together with remarkable flowers. Price, large flowering bulbs, 35 cents each; 3 for \$1.00, postpaid; \$3.50 per dozen, by express.

SPECIAL OFFER
One each of all the Summer Flowering Callas on this page for \$1.25, by mail, postpaid; \$1.10 by express.

White Calla

NEW GODFREY—A wonderful improvement over the old White Calla. The plant is very bushy, having double as many leaves as the old variety, and producing three times as many flowers. Flowers are unusually large, held high, and on stiff stems. The same plant will grow and bloom for years and the quantity of flowers this variety will produce is astonishing. It is estimated that several plants of the old variety will not produce as many blooms in a single season as this more recent introduction. The blooms are of large size and of snowy whiteness. Price, 20 cents each; 3 for 50 cents; 6 for \$1.00. Large bulbs, 40 cents each, 3 for \$1.00.

White Calla, 20 cents.

Price, good bulbs, 20c each, postpaid; 3 for 50c; extra large bulbs, 30c; 4 for \$1.00.

HARDY GARDEN LILIES

Special Notice Many of the finest Lily bulbs come from Japan, and are not received in this country until November. They cannot be obtained earlier, as the bulbs are not shipped until fully matured. Where bulbs are offered for sale earlier than the latter part of November, they are bulbs which have been kept in cold storage, and thereby have lost much of their vitality, and will not grow as well as fresh bulbs. Therefore, we advise the preparation of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or litter of any kind. This will keep them open, and admit of the planting of the bulbs even if not received until December.

SPECIAL BARGAIN COLLECTIONS For House Culture

The "Winter Water Garden" Collection

Eight Valuable Bulbs by Mail, Postpaid, for 55 Cents.

These are especially adapted for growing in water. When the ground is frozen and earth for growing bulbs hard to obtain, it is very convenient to start a "winter water garden" in vases or dishes of water and pebbles. Fill the dish with large pebbles, place the bulbs so two-thirds of each is above the pebbles, and fill with water to the top of the pebbles. Hyacinths can be grown in water only in hyacinth glasses, or wide mouthed bottles, so that the bottom of the bulb always touches the water. Place in dark for two weeks or more for roots to grow. Sure to bloom.

BEAUTIFUL DECORATIVE FERNS

THE
OSTRICH
PLUME
FERN

Elegantissima Compacta, 20c, 30c and 50c.

The Roosevelt Fern

In general characteristics it resembles the Boston Fern, but with two points of excellence over that variety. First, it produces many more fronds, making it a bushier and handsomer plant; then the pinnae are undulated, giving it a pronounced wavy effect seen in no other Fern. It is highly recommended. Fine young plants, 20 cents and 35 cents each; stronger plants, 50 cents, postpaid.

Roosevelt Fern, 20c, 35c, 50c.

The Original Boston Fern

(*Nephrolepis Exaltata Bostoniensis*)—This popular Fern has proven a most valuable decorative plant. It is a rapid grower of very easy culture, soon forming a large, graceful plant; its beautiful fronds often attaining a length of five to six feet, which arch and droop gracefully. No plant ever introduced has had a larger sale than the popular "Boston Fern." It is still in large demand. You can make no mistake in ordering a "Boston Fern." Nice young plants, 15 cents each; larger plants, 25 cents and 50 cents each, postpaid.

The Newport Parlor Fern

(*Nephrolepis Scotti*)—It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds average about twenty inches and three inches in width at the widest point, being more finished than the parent. Nice young plants, 15 cents each; larger size, 25 cents and 50 cents.

SPECIAL OFFER

We will send postpaid six Ferns which we will select from this page, in the small sizes, for 85 cents, postpaid; and the same number (six in all) of the larger size, for \$2.00. (Should be sent by express.)

The Ostrich Plume Fern

(*Elegantissima Compacta*)—The fronds grow very broad and heavy, often measuring six inches or more across, and five to six feet long. The plant assumes an exceedingly massive yet graceful appearance. The divided pinnae or miniature fronds which are so gracefully arranged, keep growing constantly. It is wonderfully valuable on account of its easy culture, hardiness and general adaptability. Is especially suitable for the home culture and conservatory decoration. We offer well established plants at 20 cents each; 3 for 50 cents, postpaid; strong plants, 30 cents each; 3 for 80 cents, postpaid; extra strong plants, 50 cents each; 3 for \$1.25.

The Plumed Scotti Fern

(*Nephrolepis Scholzeli*)—The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all of the merits of that most popular variety, but with the pinnae subdivided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15c; larger sizes, 30c and 50c postpaid.

"Teddy Junior" Fern

It is a sport from the now famous Roosevelt Fern. The fronds have an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy" will produce about four times more fronds than any other Fern. It is a compact, vigorous grower, will thrive under most adverse conditions, making an exceptionally rapid growth and producing a plant of rare beauty and perfection without special care or attention. Finest pedestal plant produced. Fine young plants, 15c each; larger sizes, 25c and 50c.

The Whitmanii Fern

The Whitmanii is of dwarf growth and wide upright, stock shape. The finely cut, fluffy fronds stand erect. Each frond or branch has a double row of perfect little fronds set at right angles to the midrib. They are graceful beyond description, feathery, plummy; of wonderful grace and beauty. Price, 15 cents, postpaid; larger plants, 25 cents and 35 cents each, postpaid; stronger plants, 50c.

Silver Fern (*Pteris Argyrea*) 20c.

Silver Fern

(*Pteris Argyrea*)—A very showy Fern with variegated foliage; fronds large, light green, with broad band of silver-white down the center of each. Very distinct. Price, 20c each; 3 for 50c, postpaid.

Holly Fern

(*Cyrtotium Falcatum*)—We consider this one of the finest Ferns in cultivation to grow into specimen plants, and while it is coarser than the *Tremula* Fern, yet it is very graceful and is becoming very popular. The leaf is a rich, glossy green, and each leaflet is about the shape and size of a Rose leaf. The fronds are fine for cutting on account of their lasting quality. Price, 15c each; \$1.50 per dozen.

HINTS ON GROWING OF FERNS

We have prepared a special circular covering the general care of Ferns, and this circular will be given free on request with an order.

Moss Fern.

Moss Fern

(*Selaginella Emilliana*)—A new, upright-growing Moss, with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain twelve to eighteen inches in height. We know of no other Fern of this type that can equal this variety, either as a Fern for dishes or as a pot plant. Will keep for long time if proper care is given. Highly recommended by all who know it. Price, 15c each; 2 for 25c; large size, 25c, postpaid.

Onychium Japonicum, 15c.

Onychium Japonicum

Of all the dwarf growing ornamental Fern Dish or Table Ferns, this variety is probably the most beautiful and graceful of all. Its light and feathery foliage is distinct and delicate, and the wavy texture of the leaf makes it keep for a long time. A Fern Dish made up of six or more plants of this variety alone is exceedingly beautiful, or the plant grown as a single specimen produces a most unusual ornamental plant. Price, 15c each; 3 for 40c; 6 for 75c; \$1.25 per dozen.

The Popular Maiden Hair Fern

(*Adiantum Cuneatum*)—Forms long, graceful fronds, with the ends of the fronds developed into bunching, tasseled heads; a distinct and lovely variety. Price, 15c each; 3 for 40c; larger size, 25c each (should be sent by express).

Shaking Fern

(*Pteris Tremula*)—The foliage of the *Pteris* varieties is large and very graceful. The slightest movement of the air shakes the leaves of the *Tremula*, which we recommend more than any other for house culture, etc. It grows readily and very fast. Keep the leaves from dust and sprinkle slightly every warm day. Price, 15c each; 3 for 40c, postpaid. Larger size, 25c.

Small Leaved Silver Fern

(*Pteris Victoria*)—A very pretty variegated-leaved variety; compact, strong grower, and one of the best for Fern dishes. Price, 15c each; 3 for 40c.

Pteris Tremula (Shaking Fern), 15c.

Maiden Hair Fern (*Adiantum Cuneatum*), 15c.

CHOICE DECORATIVE PALMS

Kentia Belmoreana

The Kentia Belmoreana Palm represents the best of the Palm family. It is a native of the Lord Howe Islands, situated a few hundred miles east of Sidney, New South Wales. Here it grows in luxuriance on the mountain slopes. It has the grace and lightness of the Cocos, but robust in growth and heavy in foliage. As a foliage plant it cannot be excelled, withstanding dust, changes in atmosphere and neglect. It is not susceptible to insects and is a rapid and graceful grower. Price, nice young plants, 40 cents; larger plants, 60 cents and \$1.50, by express only.

Kentia Belmoreana, 40 cents, 60 cents, \$1.50.

of the World.

We Grow Only the
Best Varieties of
Plants, Bulbs, Seeds,
etc., etc.

Areca Lutescens

One of the most beautiful Palms. Its dark, glossy green leaves are gracefully curved on slender stems, and the entire foliage is gracefully disposed; the trunk and stems are golden-yellow. Price, nice plants, 35 cents, postpaid; larger plants, \$1.00 each, by express.

Kentia Forsteriana

One of the finest plants of any of the Palm family for general cultivation, being almost impregnable against disease. Leaves deep, glossy green, fan-shaped, split deeply into segments. Very similar to Kentia Belmoreana, but with broader foliage. Price, nice plants, 40 cents, postpaid; larger plants, 75 cents and \$2.00 each, by express only.

Cocos Palm

(Cocos Weddelliana) — The most elegant and graceful of all the smaller Palms. Its slender stem is freely furnished with graceful and arching leaves of a glossy green color. The smaller sizes are admirable for Fern dishes. Larger sizes make up some of the best specimens of the Palm family. Price, 40 cents, by express.

COCOS
WEDDELLIANA

Fan Leaf Palm

(Latania Borbonica) — This is the typical Palm and is more largely grown than all other varieties combined (possibly excepting the Kentias). Its vigorous, healthy habit and large, glossy green, fan-like leaves commend it to all. Nothing is more satisfactory as a decorative plant than a well-grown specimen of Latania. This is the Palm from which the Chinese Palm Fans are made. Adapted to all decorative purposes within or without doors. Price, nice young plants, 20 cents each; larger plants, 50 cents each; large specimen plants, \$1.00 by express.

Palms Should be

Fan Leaved Palm
(Lat. Borbonica),
20c, 50c, \$1.00.

Ostrich Plume Palm

(Phoenix Roebelinii) — This beautiful Palm has the grace and lightness of Cocos Weddelliana, but is more robust in growth, foliage gracefully curved, spreading in habit. It will be the most popular for house decoration. Has graceful curving leaves with very narrow dark green pinnae, giving it a lightness and airiness not surpassed. At the same time it is as hardy as the Kentia Palm, succeeding admirably as a house plant. Fine plants, \$1.00; larger plants, \$2.00, by express only.

Ostrich
Plume Palm,
\$1.00 and \$2.00.

Notice It may be well to state here that young Palms do not fully resemble the illustrations given, as they do not show their character leaves until the second and third year.

Norfolk Island Pine

(*Auracaria Excelsa*)—As a decorative plant for the house this is one of the handsomest and most serviceable. It has deep green, feathery foliage, arranged in whorls rising one above the other at regular distances; its symmetry of form, grace and beauty of foliage is unequaled. Easily grown and highly ornamental. The soil in the pot from top to bottom should be kept evenly moist, but not continually soggy. During the heat of the summer, to keep up the proper growth, the plants should be kept in practically total shade and syringed constantly and not allowed to dry out for any great length of time. Price, nice plants, twelve to fifteen inches high, three tiers, \$1.00 each; larger plants, fifteen to twenty inches high, \$1.25.

Norfolk Island Pine, \$1.00, \$1.25.

Umbrella Plant

(*Cyperus Alternifolius*)—An ornamental grass throwing up stems about two feet high, surmounted by a whorl of leaves diverging horizontally. Splendid for the center of vases or as a water plant. Price, 10 cents each; 3 for 25 cents; larger sizes, 25 cents; 3 for 65 cents.

Crown of Thorns

(*Euphorbia Splendens*)—A curious plant, with thick, fleshy, twining stems, which are covered with sharp, stout spines nearly an inch long. The foliage is bright green and the flowers are a beautiful coral-pink. Price, 15 cents each; 3 for 40 cents, postpaid.

Asparagus Plumosus (Feather Fern), 15c, 25c.

Asparagus Sprengerii, 15c, 25c.

Feather Fern

(*Asparagus Sprengerii*)—When introduced, at a high price, this plant was received with some hesitation as to its desirability, but after only a limited trial it has come forward with such prominence that the supply will be inadequate to the demand for some time to come. Not only is it useful for cutting in sprays for fine cut-flower work, more particularly in connection with large Roses, etc., but grown in suspended pots, it makes one of the prettiest decorative house plants we know of. Price, 15 cents each; 3 for 40 cents; \$1.25 per dozen; large plants, 25 cents each; 3 for 60 cents; \$2.25 per dozen.

Lace Fern

(*Asparagus Plumosus*)—One of the handsomest of our foliage plants. The leaves are bright green, gracefully arched, and as finely woven as the finest silken mesh. Their lasting quality, when cut, is remarkable, retaining their freshness for weeks. Surpassing Maiden Hair Fern in grace, fineness of texture and richness of color. Easily grown as Smilax. The plants trained on trellises or string will run in height to 25 or 30 feet, and for festooning and decorating it is without equal. Price, nice plants, 15 cents each; 3 for 40 cents; large plants, 25 cents each; 3 for 60 cents.

India Rubber Plant

(*Ficus Elastica*)—*Ficus Elastica*, better known all over the country as the rubber plant, is undoubtedly one of the most popular and satisfactory house plants that has ever been distributed. The plant is of tropical nature, being at its best under moist conditions and high temperature, but if well cared for, the foliage kept clean, good drainage provided, and the soil kept sufficiently moist, it will continue growing throughout the year. Branched plants are produced by simply cutting out the top, which should be done in the early spring. The Rubber Plant does not require more than what might be termed good garden soil. Its wonderful thick leathery leaves enable it to stand excessive heat and dryness, while its deep, glossy green foliage always presents a beautiful appearance. Adapted to house culture and for porch decoration, 50c; larger plants by express, 60c.

Ficus Elastica—Rubber Plant, 40-50 cents.

SAGO PALM

(*Cycas Revoluta*—Japanese Fern Palm)—For years the price of the Sago Palm has placed it beyond the reach of ordinary plant buyers. We have imported a fine lot of *Cycas* from Japan and offer them so as to be within reach of all. It is probably the most valuable decorative Palm grown, both for lawn and house decoration. The heavy, glossy deep green fronds resist alike the gas, dust and changing of temperature to which house plants are frequently exposed. Must be sent by express, too large to mail. Price, nice, small, shapely plants, 75 cts.; 6 to 8 leaves, \$1.00 each; 8 to 10 leaves, \$1.50; 10 to 12 leaves, \$2.00.

Cycas Revoluta

The variety is of strong, compact, bushy habit, holding its foliage well. The color is hard to describe—a fiery amaranth-red. Some describe it as a brilliant rose. Each of the five petals being marked with a large dark brown or black spot in the center, the spot being bordered with scarlet daintily pencilled with crimson. The combination is very striking and at once catches the eye of the most careless observer. The florets are very large, from 2¼ to 3¼ inches in diameter, and are very durable either on the plant or when cut. Price, 20c each.

The Ever-blooming BUTTERFLY BUSH or Summer Lilac

The *Buddleia* or Ever-Blooming Butterfly Bush was one of the show plants of the San Francisco and San Diego Expositions. It attracted unusual attention and was greatly admired by thousands who were given the opportunity of seeing the value and possibilities of this new shrub. The blooms come from the new wood produced through the summer. *Buddleia* is one of the most valuable plants either for border or specimen planting, blooming as it does late in the season, and continuing in bloom from the latter part of June until nipped by the frost. It is very rapid growing, and in two years will make a large spreading bush, four to six feet high. It is an unusually fine plant, and in the next few years will be planted in every yard and garden. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers. Price, one-year plants, 20c each; 3 for 50c; field-grown plants, by express only, 40c each; 3 for \$1.00.
