7 to 9 Feet	\$1.50	\$14.00	\$125.00

(And a limited supply of Russell and Frotcher)

In lots of five, at the ten tree rate; in lots of fifty, at the hundred tree rate.

All orders accepted are subjected to stock being sold, weather and other conditions beyond our control.

A Certificate of Inspection will accompany each shipment, showing nurseries to be free from disease.

Trees will not be dug before order is received, thereby insuring absolutely fresh roots. We dig them with long tap roots.

Every tree grafted with bearing wood and guaranteed true to name.

Any information not contained herein, will be furnished gladly upon request.

TERMS

Cash With Order

DELMAS

A very fine, large nut, well flavored. The tree is a strong and vigorous grower and prolific bearer.

SUCCESS

A very fine nut. Tree fruits well and is quite a favorite.

STUART

A large, excellent nut. Tree young and a heavy bearer; adapted to a larger territory than any other nut.

VAN DEMAN

Fine meat and a first-class nut in every way.

RUSSELL

One of the thinnest shelled varieties, well flavored and a prolific bearer.

HOW TO PLANT TREES

Plant from December to the end of February. Never allow roots to be exposed to sunshine or wind; heel them in or keep covered with a wet sack, and only uncover as needed.

Trim all broken or bruised roots with a sharp knife and set the tree in hole about as deep as it grew in nursery, preferably a little deeper rather than too shallow.

Fill in hole with top soil. If any fertilizer is used at all, use only a small amount of bone meal, well mixed with the soil. Any cultivated crop may be grown between the trees.
