VERANDA BOX COLLECTIONS

Window gardens have always been popular, but within the living room the plants contend against conditions that are very unfavorable. The gases thrown off from burning kerosene and coal stoves are very injurious to plant growth. The interior window garden adds much to the cheerfulness of the room, but a window or veranda box just outside of the window adds almost as much to the interior effect without taking up the room, and adds very materially to the attractiveness of the exterior. The plants grow much better and bloom profusely with less care.

The box may be made of a great variety of materials, and quite attractive, but since it is only a receptacle for the soil an ordinary box made of pine will answer as well as an expensive one, as the sides will soon be covered up with the drooping and creeping plants. In length the box should equal the width of the window, and eight to twelve inches wide by four to six inches deep, with numerous holes in the bottom for drainage.

NOTE.—We have selected the following plants because they are the most satisfactory for the purpose. This collection contains enough for a six foot box.

Up-to-Date Vase Collections For Filling Vases Exposed to the Sun

Most of these plants will be large, and must be shipped by express at your expense.

Remember, selection of variety must be left to us, but we assure you that only such varieties as are suitable for vase filling will be sent. Quality of stock will be A No. 1.

Vase Collection No. 1 This collection will be made up as follows: One Canna for center, four large Geraniums, two large Begonias, three Petunias, three Coleus, three Weeping Lantana, and for border three Asparagus Sprengerii and six Variegated Vincas. This collection will fill a vase from fifteen to eighteen inches in diameter, and we will send it to you by express for \$2.00. In ordering, please ask for \$2.00 Vase Collection.

Vase Collection No. 2 For \$3.00 we will increase the number of plants in this collection to fill a vase from eighteen to twenty-four inches in diameter. In ordering, please ask for \$3.00 Vase Collection.

Place your confidence in us for satisfactorily filling these collections, and we will not disappoint you.

Another pretty effect may be had by filling vase with Red Salvia and bordering with Variegated Vinca.

Still another nice way is to fill the vase with Ferns and border with either Asparagus Sprengerii or Vincas, but when so filled it must not be exposed to the full force of the hot sun. Large Ferns should be used where an immediate effect is desired. We can furnish for this purpose either Boston or Pieroni Ferns, strong plants from four-inch pots, \$1.25 per half dozen; \$2.25 per dozen.

Caladium Esculentum

(Elephant's Ear.)

One of the most effective plants in cultivation for the flower border, or for planting out upon the lawn. Plants, under good culture, frequently attain eight to twelve feet in height. Price, from four and five-inch pots, 50 cents and \$1.00 each.

A WORD ABOUT EXPRESS CHARGES

Some florists are offering to prepay express charges on certain orders, but when so sent the soil is removed from the roots of the plants, and they are packed the same as for mail, the cost for sending being no more than it would be if the plants were sent by United States mail. All plants that we send by express, charges to be paid by purchaser, are packed with a ball of soil on the roots, thus insuring their uninterrupted growth when received. We pack as light as possible consistent with safety.

Information for Purchasers

We are leading growers of the newest and choicest Roses and other beautiful flowers. Our new Guide is our Store, where our patrons can shop at convenience. Prices are plainly marked, and everything suitable to go by mail is delivered free at the prices named. We give close personal attention to every part of our business, and are always glad to accommodate and assist our customers in every way we can.

WHEN YOU ORDER, please use the printed envelope and order sheet enclosed. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

LOST OR UNSIGNED ORDERS. Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent and sign the name and address the same as in the first order, so that it may have immediate attention.

HOW TO SEND MONEY. Our terms are cash. To avoid delay, please send money with order. Money may be sent at our risk if forwarded by P. O. Money Order, Express Money Order, Bank Draft or in Registered Letter, and cost of same may be deducted from amount forwarded; but we can not be responsible for any order or money that fails to reach us when not sent as above directed. CASH should be sent by Registered Letter, but coins should be carefully wrapped and care taken to seal letter securely. New postage stamps accepted for small amounts.

AGENTS. We employ no agents and are only responsible for orders sent direct to us.

OUR GUARANTEE. We guarantee all our plants to reach their destination in a good growing condition.

OUR RESPONSIBILITY. As stated above, we guarantee all goods to reach their destination in a live condition, but when we have done this, our responsibility ceases, because we know that if they receive proper treatment they will grow nicely. Many plants die from careless treatment and neglect; in such cases we can not and should not be expected to replace them.

ERRORS. As an evidence of our human failings we sometimes make mistakes. Careful as we are to protect ourselves and our patrons, preach as much as we will to our employees, yet they occur; when they do, notify us at once; we will correct them promptly.

SHOULD YOU RECEIVE two or more Catalogues alike, which sometimes occurs, have the kindness to present such as you do not need to others who will likely want plants. By doing so confer a double favor. We will also feel thankful for your recommendations of our establishment to your friends wanting plants. A copy of our Catalogue will be furnished to friends requiring plants on receipt of their address.

WHEN SENDING CLUB ORDERS, please give full name and address of each member of the club, so that we may enter their names on our books and forward them our Catalogues as issued.

BETTER THAN WE PROMISE. We always do better than we promise in the way of extra plants, so when the order will at all afford it we add to it some plant or plants gratis, often choice new kinds; several of the Roses now so eagerly sought after were first introduced to our customers in this way—presented with their order.

A GUARANTEE THAT MEANS SOMETHING. Do not be confused with senseless guarantees which mean nothing. The best guarantee is that given by a reputable house to deliver all goods to any postoffice or express office in the United States or Canada in first-class growing condition, and failing therein to replace them immediately. This is our Guarantee. Furthermore, we guarantee that when goods are received, if they are not thoroughly satisfactory, we will make them so or refund your money. When plants reach you in good condition and are planted with ordinary care, there is no difficulty in guaranteeing them to bloom at the time nature intended they should, which is sometimes termed "a seasonable time." It would be quite as sensible if we were to guarantee that they should bloom at any other time but at the time nature intended that they should, the so-called seasonable time. We are sure that a guarantee that states that plants are guaranteed to bloom under the above conditions, provided they are not winter killed or die from any other cause, will be taken for what it is worth. Vestal's plants are guaranteed to reach you in first-class condition, and if you give them any kind of care, we guarantee them to grow and bloom.

ORDERS BY EXPRESS. Two year old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller size plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is of course much better for our customers. Express charges must be paid by the purchaser, unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now twenty per cent less than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

Parcel Post

Heretofore the limit of weight of a package of mailable plants, bulbs and seeds has been four pounds. The newly established system of Parcel post simply gives the added privileges of transferring through the mails packages of mailable plants, bulbs, seeds, etc., of weight up to twenty pounds. Do not construe this to mean, however, that the increased size of packages allows carrying express size plants. It only permits of sending you larger orders of mailable plants. Don't request blooming plants with soil attached to roots sent by parcel post. It can't be done.

HOW TO GROW ROSES

"He who would have beautiful Roses in his garden must have beautiful Roses in his heart. He must love them well and always. He must have not only the glowing admiration, the enthusiasm and the passion, but the tenderness, the thoughtfulness, the reverence, the watchfulness of love." So wrote Dean Hole, the rosarian of beloved memory.

A Pleasant Hobby

Growing Roses is not an expensive luxury, neither does it require a large amount of hard labor. A love and devotion that begets intelligent, diligent care when needed is the great requisite.

Having chosen the location for our Roses, let us make ready the bed. The simplest and easiest way is to spade the soil deeply and mix with it a good supply of well-decayed stable-manure. But to raise the best Roses it will pay to be more thorough.

Pleasure of Rose Growing

Rose growing (watching the growth, development and habits of the different varieties) is a most fascinating and interesting study. Start a small Rose garden by our method, and with our vigorous bushes you will soon insist on having a larger one. The work is so healthful and pleasing that it is rapidly becoming as much a "fad" as is amateur photography. Think of the joy of having beautiful Roses blossoming at your very door, sending their fragrance to meet you as you cross the threshold, and yielding enough flowers to fill every room in your house with their perfume. The first bouquet cut from the bushes in your yard will give more pleasure than any ten dollars worth of Roses you ever had from a florist.

Soil

If the soil is naturally well drained, it will be unnecessary to provide drainage. But nothing is more prejudicial to the health of Roses than poorly-drained soil, therefore, if needful, provide drainage. Dig a trench to the depth of 2½ feet, and in the bottom deposit a 4- or 5-inch layer of drainage material so that all surplus water will drain away quickly. It is a good idea to mix with the soil in the bottom of the trench a few broken bones, say a peck, for a bed holding a dozen Roses—they will furnish plant food for the Roses for three or four years to come. A rich, deep clay loam is the best soil. If it contains grass roots, or is made up of rooted sods, all the better; any ordinary soil will answer, providing it is well manured.

Manures

While manure from the cow-stable is probably best, you can draw upon the horse-stable or pig-sty with equal expectation of good results. Well-rotted leaves are fair, but too light except for heavy soils. Commercial fertilizers, such as bone or guano, may be used to advantage if handled with discretion. A rule to remember is never to let any "green" or "raw" manure come close to the roots of your Roses, but see that it is buried well beneath the root reach, or applied as a top-dressing.

The best time to apply manures is just as the ground begins to freeze in the autumn; let it serve as a protection over winter and dig it in next spring. Even with the

Too deep Too shallow and set wrong Just right Right and banked for winter

best care it may prove necessary at times say after six or eight years, to renew the Roses or move the bed, adopting the farmer's principle of rotation of crops.

Treatment on Arrival

When you receive the Roses, give them the greatest care; never expose the roots to the drying action of spring winds for a moment. A plant with bare roots exposed to the dry air is like a fish out of water. Should the plants, through delay in transit, come dried out, as occasionally happens, soak the balls of earth and roots in water; if the stems have dried out, after soaking the ball, bury the whole plant in damp earth for several days. This treatment may put them in good condition, while if they are planted when dried out there is danger of their dying.

Time to Plant

The proper time for planting in the various sections of the country largely depends, first upon the location, and, second, upon the character of the plant. In the warm climate, southern and southwestern states, in fact all sections where frosts are infrequent and the winters mild, pot-grown as well as dormant Roses may be planted in the late fall, as well as in the early spring. In the southern states fall planting of both these classes of Roses is considered desirable, but, if the conditions are such that it can not be accomplished, then in the early spring months they may be set out with entire safety.

As to where the preference lies between plants that are pot-grown under glass, and dormant, field-grown plants, it is not easy to discriminate. Our own experience has been that in the southern and southwestern states, the planting of the one-year-old Roses during the months of February, March and April, according to the location, may be accomplished with splendid satisfaction.

Mulching

The main object being to retain the moisture rather than to enrich the soil, cultivate the garden once a week up to the middle of July, to maintain a dust mulch; after that, a liberal covering of "long" cow or horse stable manure that will not heat will accomplish this purpose best.

Hardiness

Hardiness in a Rose is a matter of which no one can speak with positive certainty, because the condition of the weather as a rule prescribes the hardiness of a plant, as quite frequently plants that have been out year after year will be winter killed by unusual conditions. As stated elsewhere, the hardiness of the different varieties of plants can be depended upon to be as near accurate as it is possible for any one to determine.

Winter Protection

Where the temperature gets below freezing, the less hardy Roses will require protection, and all of them will be the better for it, at least about the roots. Soon after the first frost, having hilled up the soil around the stems, cover the Rose beds all over with a 3- or 4-inch layer of good heavy stable manure, and over this a 6-inch layer of leaves, held in place by the most slightly material available. A 12-inch fence of poultry wire will keep the leaves in bounds nicely. If the leaves are not available, straw, corn-fodder and even boxes put over the Roses to shed the rains, will protect from the cold, biting winds and the alternate freezing and thawing of early spring sunshine and cold nights; but do not smother the Roses, for if too tightly covered they will die. Remove the covering gradually in the spring when danger from frost is past.

How to Prune Your Roses

Pruning is the art of improving the productive power and the appearance of a plant. It consists of two distinct operations. 1. The removal of dead, weak, overcrowded, and otherwise useless shoots. Unripe wood which in the spring will usually be found to have discolored pith, caused by the winter frosts, should be cut clean away at the base of the shoot. 2. **Pruning Proper**, the shortening of those shoots which are allowed to remain after the thinning-out process has been completed.

The most frequent errors made in pruning are: (1) leaving too many shoots when thinning out. (2) pruning severely the shoots of varieties which require little, if any, shortening; (3) pruning lightly the varieties which require severe pruning; (4) leaving Rose plants crowded with shoots and cutting these to a uniform length all over the plant in a similar way that a hedge is clipped.

In thinning out a shoot, it should be either cut clean away to the base of the plant, or to its starting point on the elder shoot from which it springs, as the case may be. When the plant has been pruned, the shoots should be left as nearly as possible equidistant from each other, and regularly arranged around it so that it presents a well-balanced appearance on all sides.—National Rose Society's Handbook on Pruning.

Diseases and Insects

MILDEW—This disease very frequently attacks the foliage of Roses, especially the Crimson Rambler. It is shown by a grayish crinkling appearance of the leaves and usually occurs after a change in the temperature. It can be checked to a certain extent by sprinkling the leaves with powdered sulphur immediately after its appearance. If, however, this does not check it, dissolve one ounce of potassium sulphuret in two gallons of cold water and apply a fine spray.

Showing where to prune

GREEN FLY OR APHIS—A green suckling insect which usually gathers in great numbers upon the tips of the new growth. A solution of tobacco made from tobacco insecticide soap, which you will find offered elsewhere in this book, will exterminate them.

RED SPIDER—Is also a small insect indiscernible to the naked eye, and a frequent spraying with a strong hose is all that is necessary.

LEAF ROLLER—Is an insect of yellowish-white color, resembling the butterfly, and lays eggs on the underside of the leaf, which soon form a cocoon, rolling around itself the leaf, hence the name, leaf-roller.

ROSE BUG—A familiar insect, appears in the earliest summer, sometimes in great quantities, and is very troublesome. It is a very destructive insect and usually feeds upon the white petals, but is easily destroyed, especially in the early morning, when they will readily fall into a vessel containing kerosene. They can be poisoned, but it is not a very desirable way to get rid of them. This is to spray with wood alcohol, which will kill any insect by contact, operates quickly and does not injure the flower if applied in a mist-like spray. Care should be exercised by the operator not to inhale any of the fumes.

BLACK SPOT—A fungous disease, appearing as its name indicates as a black spot upon the leaf, eventually turning yellow and falling. It rarely occurs in the early part of the season, and the Teas are almost but not quite, exempt from its ravages. The best preventative if your bushes have been troubled by it in the past is spraying in April before the foliage has developed and not while the flowers are in bloom, because of the discoloration of the foliage. The disease usually appears at the base of the plant and works upwards, so a watch should be kept and as soon as any leaves appear affected with this disease they should be pulled off and taken entirely away from the balance of the plants. If this is thoroughly done it will usually hold the disease in check.

Our Roses

Are grown in **THREE-INCH** pots.

They are superior to the young

Roses from two-inch pots usually sent out because the larger pot gives ample room for root action and allows the plant to grow naturally. They are sturdy and compact and when sent by express with the soil on the roots, transplanting scarcely checks their growth. The cut shows a fair sample of the two-inch pot plants as usually sent out by the mail trade, and a fair sample taken from our stock, growing in three-inch pots.

Dwarf Polyanthus Roses

Plant Baby Ramblers for Bright Edging

They Bloom Unceasingly

These are entirely distinct from the larger flowered Roses and there is a place for both in every garden, being so hardy and adapted to so many uses. Masses of 25 or more together will be found to make a very effective planting.

Crimson Baby Rambler

Still a favorite. The flowers are borne in clusters of 30 to 40, and the foliage is dark, glossy and profuse. A large bed in our grounds was constantly in bloom until November, even in the hottest weather. Price, 15 cents each; two-year old plants, 35 cents each.

Pink Baby Rambler

Orleans Rose

The showiest and prettiest of the pink "Baby" Roses; this charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom, deep cerise, with showy center of pure white, florets not crowded, but of beautiful arrangement. The color is irresistible, the plant grows like a weed, and the flowers are nearly "immortelle" in their lasting quality; we believe that they will outlast almost any other Rose in existence, with their stiff, paper-like texture. Price, 15 cents each; two-year-old plants, 35 cents each.

Baby Thousand Beauties

An exact counterpart of the grand climber, Thousand Beauties, except in habit of growth. The plants are sturdy and bear immense trusses of flowers of a large size, which keep remarkably well after opening. We have found this to be a continuous and profuse bloomer and this "Baby" undoubtedly has a great future. Price, 15 cents each; two-year-old plants, 30 cents each.

Vestal's White Baby Rambler

This is surely a beauty. It grows to a height of 15 to 20 inches, and produces double, pure white flowers in wonderful abundance. It has a fragrance similar to Hyacinths. Of free, compact growth and very attractive, a sheet of white and always in bloom. Price, 15 cents each; two-year-old plants, 35 cents each.

Erna Teschendorff

The color of the flowers is the brightest red, being superior to the Crimson Baby Rambler, Jessie, and others. The flowers are large and very double and are produced in constant succession throughout the whole season. It is free from mildew. A great advantage over the Crimson Baby Rambler is that the color does not bleach out under the hot sun. Price, 15 cents each; two-year-old plants, 35 cents each.

New Rose Prince de Arenberg

This is one of the newer Roses that has been brought prominently before the public this season and we have not seen a Rose that has met with such universal appreciation by both amateur and professional growers. To those who prefer a Rose with full color we can recommend none more highly than this gorgeous crimson scarlet rose. It is hardy in practically all localities and as an out-door garden Rose it has no superior. Of strong, vigorous, healthy growth, branching freely; it produces its wonderful blooms profusely from April until December. Every shoot carries a well-formed flower of exquisite fragrance and splendid lasting qualities. The illustration gives but a faint idea of the richness of this magnificent Rose. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Prince de Arenberg

LAURENT CARLE

An extremely vigorous grower of erect branching habit and fine dark green foliage; long buds borne on long stems, opening into large flowers of perfect form, just full enough to open freely; color, brilliant velvety carmine; a very promising variety. A most charming and decidedly beautiful Rose, which attracted the attention of all visitors to our Rose gardens during the past summer because of its marvelous free-blooming qualities. The blooms are of good size; the color is an intense, pure, deep saffron-yellow, with primrose edges; a delightful color harmony. A Rose of the highest merits. Lady Hillingdon

Laurent Carle

LADY HILLINGDON

It has long willowy stems that are in no sense weak, as the buds are held upright; has a long slender pointed bud of brilliant deep golden-yellow, and a striking peculiarity of this Rose was that each day the golden-yellow color became deeper yellow and more intense, unlike all other yellow Roses of which we are familiar, as invariably the tendency after being cut is to get lighter in color. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Eugene Boulet

This will become a standard variety. It has all the earmarks of a good Rose. Vigorous grower; free bloomer. The blooms are of the largest size; the color a rich ruby-red, and of delicious fragrance. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Madame P. Euler

Vermilion-pink, changing to silvery-pink; very large, very full and possessing great lasting properties, perfect form; fragrant. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Grus an Teplitz and Edward Mawley

Two of Our Best Red Roses

EDWARD MAWLEY

We have no hesitation in stating that this is the finest of all dark crimson Roses, a true perpetual flowering Hybrid Tea, and the most beautiful variety the Rose world has yet seen. The grand novelty has been very aptly named Edward Mawley, in honor of one of the best loved of British rosarians. It is an enormous, big-petaled Rose, much larger than Malanie Soupert; a Rose it resembles in form, but of the beautiful rich color of a Louis Van Houtte, only with a more velvety shading upon the inside of its petals. Price, 15 cents each; two-year-old plants, 35 cents each.

Rose Gubert

Color, canary yellow, deepening at the center; but long, producing a large flower. Extremely free in growth and bloom. Price, 15 cents each; two-year-old plants, 35 cents each.

Rosemary

A beautiful Rose of shining, silvery pink, recommended for bedding. Very large and very double; a sturdy grower with stiff stems and large foliage; flowers freely produced. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Queen's Scarlet

Very best of all red Roses for bedding. Entirely hardy. The flowers are of large size and of a fiery scarlet. A bed of these Roses produces a mass of red equal to a bed of Geraniums. It is planted everywhere on account of its color and freedom of bloom. Price, 10 cents each; large size, 30 cents each.

Edward Mawley

Admiral Dewey

A delicate daybreak blush, clear and distinct and very captivating—nothing weak or washy in color. The flowers are very perfect in form, a little lacking in fullness when fully expanded. Price, 15 cents each; large two-year-old plants, 40 cents each.

Mme. Cecile Berthod

Deep golden yellow Rose. Most beautiful, both in bud and flower, which is deep golden yellow. In fact, the deepest yellow in color of any Rose we grow. The foliage is very bright. This is a Rose of magnificent size and color. Price, 15 cents each; two-year-old plants, 35 cents each.

Antoine Rivoire

Will grow in almost any situation; strong and healthy. Always blooming. Flowers exquisite in form, large, double and fragrant; rosy flesh with yellow ground, shaded with border of carmine. The plant forms a big, vigorous bush, and is perfectly hardy in all climates. Good garden Rose. Price, one-year-old plants, 10 cents each; two-year-old plants, 30 cents each.

GRUS AN TEPLITZ

Fiery crimson, shaded with a dark velvety sheen, totally unlike any other color. Large, handsome, moderately double flowers. Produced in most wonderful profusion throughout the whole growing season, in fact it is always in bloom. The flowers are produced singly, sometimes in clusters, producing a gorgeous effect on the lawn or in the garden all summer through. For fragrance there is no other Rose to compare with it. Price, 10 cents each; two-year-old plants, 35 cents each.

Grus An Teplitz

MISS MILDRED VESTAL

This superb new Rose is a result of a cross fertilization between "Rhea Reid," that grand red bedding Rose, and "Richmond," the greatest of all red forcing Rose, which insures in their offspring every point of excellence. It has magnificent large foliage, free from disease of all kinds, and is a tremendous grower—one of the best in all our list. The glory of the plant, however, is in the immense deep double flower of a new and clear shade of crimson scarlet. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Marie Lambert

A lovely white Rose; pure Tea, but a foreign seedling; the freest flowering white Rose we have seen. It will be especially useful in set designs. For a pot plant it cannot be excelled, as it possesses every quality of a pot Rose. We counted on one plant 143 buds and flowers in a single day. Nice young plants, 10 cents each; large plants, 30 cents each.

Cornelia Cook

The buds are most beautiful, of immense size, and are borne up high on massive stems, and with their round, full, heavy form, carry an air of grace and dignity quite unusual. The flowers are are clearest, snowiest white, and are arranged in the most faultless and symmetrical manner. Cornelia Cook has the largest bud of any white Rose. Price, 10 cents each; large two-year-old plants, 40 cents each.

Frieherr Von Marschall

A magnificent new Rose, with the most beautiful foliage we have ever seen. Flowers are large, beautifully shaped, double and full. Bright red. This is one of the brightest, if not the very best Tea Rose in existence. Fine, long, well shaped buds. As an outdoor Rose it has no superior. Price, 15 cents each; two-year-old plants, 35 cents each.

Mrs. E. Duranth

This Rose is very beautiful, its strong branching habit being admirable; each side shoot brings a perfect flower on a stiff stem; never shows a weak neck. The upper surface of each petal is shell pink, the reverse, soft rose; very free and fragrant. Price, 10 cents each; two-year-old plants, 30 cents each.

William Shean

A fine grower, throwing up long, stiff canes, crowned with large pointed flowers of purest Killarney pink, full, free, and a perpetual bloomer. Immense size, perfect form and substance. Altogether a glorious Rose. Price, one-year-old plants, 20 cents; two-year-old plants, 50 cents each.

Mlle. Jean Dupuy

Long pointed bud, nicely rounded flower, large and full; color golden yellow passing to reddish orange; petals bordered with rose; very large, full bloom and fragrant. A magnificent grower with excellent foliage. Price, 15 cents each; two-year-old plants, 35 cents each.

White Bougere

Free bloomer; clean, healthy grower; blooms of great substance; pure white; good stiff stem; as pure a white as Niphetos and will produce 50 per cent more blooms than Bride. Price, 10 cents each; large plants, 25 cents each.

MARY COUNTESS OF ILCHESTER

In the opinion of many expert rosarians this must be classed as one of the finest novelties. Mr. Roger Murphy, who has worked with Roses for the past forty years, says: "This Rose has come to stay. After trying out all the novelties of the past five years, I place the Countess Mary first." The color is unique and distinct, being a warm crimson-carmine, a shade difficult to describe; of great size, with large, smooth, circular petals, deliciously scented. Simply grand. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Mary Countess of Ilchester

The Famous Cochet Roses

Six Superb New Hardy Everblooming Varieties

Price of Cochet Roses, one-year-old plants, 15 cents each; set of six for 75 cents; two-year-old plants, 35 cents each; set of six for \$1.75.

White Maman Cochet

A splendid Rose; has all the good qualities of Maman Cochet. Like some other white Roses, this variety, especially in the autumn, shows pink markings on the outside petals when the flower is in bud. When open the blooms are pure white and entrancingly lovely, large, fragrant, hardy and freely produced.

Crimson Maman Cochet

(Etoile de France.)

This well known Rose we have named descriptively Crimson Maman Cochet, because of its vigor of growth, stiffness of stem, heaviness of foliage, freedom of bloom, and hardness. Bears masses of full, deep-formed flowers singly, on long, substantial stems. The color is a new and clear shade of red or crimson-velvet, brightening in center; of exquisite fragrance. One of the best and sweetest Hardy Hybrid Tea Roses of its color.

Red Maman Cochet

(Helen Gould.)

This is a Rose that will grow and give satisfaction in almost any soil or situation. It produces its splendid flowers in amazing profusion, on long, strong shoots. For vigor and freedom of bloom, thousands of growers regard this Rose as better than American Beauty, and without a peer. The flowers are very full, perfectly double; buds long and pointed.

Special Offer

One each of Pink, White, Red, Yellow, Blush and Crimson Cochet, strong plants, for 75 cents; two of each, 12 in all, \$1.25. Two-year-old plants, one of each, 6 in all, \$1.75, by express.

Color is a warm, rosy crimson, hardy everywhere. The exquisite fragrance, beauty of form and hardness of nature make it ever popular.

Pink Maman Cochet

This superb Rose is well known as a queen among Roses, one of the best and most beautiful varieties ever grown, and quite hardy. The flowers are of enormous size, very full and of great depth and substance. Color, rich coral-pink, elegantly shaded with rosy crimson; has broad, thick, shell-like petals and makes superb long-pointed buds; immense bloomer, and flowers the whole season. Deliciously sweet and a hardy, vigorous grower. It ranks among the very finest hardy everblooming Roses.

Yellow Maman Cochet

We continue to regard this grand kind as absolutely the best, everblooming yellow Rose. It is ideal for open ground culture—a typical Cochet Rose, with gracefully molded buds, flowers magnificent when open, on stiff, strong stems. This kind is identical in every way with Pink and White Cochet, except the color of the flower, which is deep sulphur-yellow.

Blush Maman Cochet

(Wm. R. Smith.)

This magnificent variety is an American-raised, pedigree seedling. It inherits hardiness, constitution, fine habit, grand foliage and superb flowers. Where there are so many good qualities it is difficult to emphasize the leading one, but in this variety we would name its ability to resist disease. The color is a deep ivory-white overlaid with a good, bright shade of pink. As a summer Rose it ranks with the best.

Madame Second Weber

One of the grandest novelties of recent years; everybody is talking about it, and the more one knows of this wonderful Rose the more he will talk about it, and, what is of real value, every bit of talk about Mme. Second Weber is in praise of her. Rosy-salmon or flesh pink in color, of the general type and color of "My Maryland." The bud is long and pointed, opening into enormous blooms, which deepen its color until fully expanded, when it is as impressive as an "American Beauty." The texture of the Rose is very thick and heavy and the form of the petals peculiarly beautiful. A great garden Rose. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

Rena Robbins

A very strong grower, with splendid stems and immense globular flowers; color, white or lemon, with orange heart. We had hoped that this would prove a forcing variety, but it has developed, instead, fine bedding qualities, for which purpose we strongly recommend it. The bloom is of splendid size, and lovely, rounded form. Price, one-year-old plants, 20 cents each; two-year-old plants, 40 cents each.

Etoile de France

Vestal's Three Incomparable Garden Roses

Shown on Opposite Page

Helen Gould

It has proven itself to be the strongest growing, freest blooming, largest flowering and hardiest Rose in existence. It is a better Rose for general planting than American Beauty—the dream and hope of every Rose grower for years past. A strong, dwarf, compact grower, absolutely free from disease of all kinds, young plants blooming continuously throughout the year. The flowers are as large as the American Beauty, are full and perfectly double; the buds are beautifully made, long and pointed, produced on long, stiff, erect stems. The color is a warm rosy crimson, the color of a ripe watermelon. Price, 15 cents each; large plants, 40 cents each.

President Carnot

It is a Rose of the largest size, beautiful both in bud and open flower. The buds come on long, stiff stems, in clusters of from six to twelve. Each individual flower stands out distinct on its stem. No crowding as in the case of so many Roses that bloom in clusters. The color is distinct and novel, a lovely fawn, shading to pearl. It often measures five to six inches in diameter. We have no hesitation in saying that this charming Rose will become as popular as La France, as it has all the good qualities of that Rose, and at the same time is so distinct that it attracts immediate attention. It is, indeed, a wonderful Rose—one that everybody can grow and bloom. Price, fine young, strong plants, 15 cents each; fine two-year-old plants, 40 cents each.

Etoile de France

Gorgeous, rich, velvety crimson; full, very large, double and cup-shaped Rose, with fragrance that is deliciously exquisite. Plants form strong, upright bushes, with splendid deep green foliage, and in the open ground it is particularly good, growing hardy and vigorous. As the weather grows cold toward fall the color becomes darker, until the flower is almost black, so deep and velvety are its crimson petals. It is pre-eminently the Rose for the masses. It is always in bloom from the earliest days of summer until November. There is no deep red Rose in our list we can recommend more highly. Price, one-year-old plants, 15 cents each; two-year-old plants, 40 cents each.

We will supply one each of the Three Incomparable Garden Roses in one-year-old plants, for 40 cents; one each of these fine Roses in two-year-old plants for \$1.00; or they can be purchased separately at prices named.

AMERICAN BEAUTY

The World Famous Rose

If any Rose has earned the title of the "National Rose," it is the American Beauty. Wherever this Rose is known, it is the queen, and it surely deserves the name. Beautiful, fragrant, enduring, it is and always shall be, the Queen of Roses. In size, color and form it has no equal. This Rose has become as famous as the Marechal Niel. The flowers of this grand Rose are so eagerly sought that they sell in the flower stores of the larger cities during the holiday season at the extravagant price of from \$1.50 to \$2.00 for a single bud or flower. Indeed, the market is never fully supplied with them at this high price. It is because of its large size, rich color and delicious fragrance. It is a hardy Rose of the largest size, having the everblooming qualities of the Tea Rose with the delicious odor of the Damask or Moss Rose. It is the sweetest of all roses. In color it is a deep brilliant red, shading to a rich, carmine crimson. American Beauty is, like Marechal Niel, difficult to start from small plants, therefore we advise our customers to buy strong plants of it. This Rose will never be sold cheaply, for the reason that it is hard to propagate. Price, one-year-old plants, 15 cents each; large two-year-old plants, 50 cents each; extra large three-year-old plants, \$1.00 each.

Lady Battersea

This variety has long oval buds, sharply pointed, very striking in form; the color is bright cherry crimson; the stems are stiff and extremely long for a red Rose; a vigorous grower; not very full, but an unusually showy variety; the only red Rose approaching Niphetos in form; color, brilliant and unusual. Price, 10 cents each; large two-year-old plants, 35 cents each.

Sunburst.

American Beauty.

This magnificent giant yellow Rose is a fine forcer; it stands head and shoulders above all others of its color. It has long, pointed buds, which can be cut tight for market. The color is orange-copper or golden-orange and golden-yellow; edge of petals lighter; all intense shades, extremely brilliant in effect. Belongs to the class of big Roses; has created a sensation wherever shown. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

Wellesley

This grand, hardy Everblooming Rose, a seedling of "Liberty" crossed with "Bridesmaid," retains the form of "Liberty" with the fullness of "Bridesmaid," and in color is a beautiful shade of pink, the outside of the petals being bright and clear, with a silvery reverse. It is a vigorous, healthy grower, carrying the flowers on long, stiff stems. Remarkably free flowering and fine keeping qualities. Price, 15 cents each; two-year-old plants, 40 cents each.

Bride and Bridesmaid Standard White and Pink Roses

THE BRIDE

A Standard White Rose of Exquisite Form and Color

When planted in the open ground the flowers are sometimes found to be delicately tinted with pink, making it exceedingly attractive. Of strong and healthy growth; a profuse bloomer. Its blooms are of the most suitable form and quality for cut flowers. Price, one-year-old plants, 10 cents each; two-year-old plants, 35 cents each.

Bridesmaid

The Favorite Pink Tea Rose

More plants of this are cultivated by the amateur, and more cut bloom is sold by the flower dealer, than any pink Rose. The buds are of exquisite shape, solid and firm, and the stems are so long and stiff that no other Rose will compare with it in keeping qualities, after being cut. Price, one-year-old plants, 10 cents each; two-year-old plants, 35 cents each.

Bride Roses

SENATEUR MASCURAND

An amber yellow Hybrid Tea Rose, the center of the bloom resembling the color of the yolk of an egg, toning to high sulphur yellow. Large, full, globular blooms. Mad. Jules Grolez is an exceedingly free-blooming variety, with very large, finely formed flowers. The color is a distinct and charming shade of cherry-red. The fine form and attractive shape of the flowers makes them excellent for cutting. Like Kaiserin Augusta Victoria, Mad. Jules Grolez is a Rose of great value for open-ground culture. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Four Famous Rambler Roses

Four Colors---Pink, Red, White and Blush

Dorothy Perkins (Pink)

This beautiful new Rambler Rose is becoming even more popular than the original Crimson Rambler. And well it may, for it is indeed a finer pillar Rose than that famous variety. The growth of a single season is wonderful, its handsome, glossy green foliage being one of its strong points. The flowers, however, are its crowning beauty, being borne in immense clusters of fifteen to thirty, and possess great lasting qualities. Flowers a beautiful shell-pink, very double, with petals artistically crinkled. Remarkably pretty pointed buds. This Rose is extremely hardy and will withstand the coldest weather. We advise our friends to plant this variety where it can be allowed plenty of room, and it will give an account of itself. Price, one-year-old plants, 10 cents each; two-year-old plants, 35 cents each.

New Fiery-Red Rambler Rose **EXCELSA**

A splendid new Climbing Rose, remarkable in many ways, but particularly in the brilliant fiery-red or intense crimson-scarlet of the flowers. The intensely brilliant color is accentuated by the great masses of giant trusses produced on the plants, and furthermore by the contrast with the deep green glossy foliage. The flowers are very double; they are larger than any of the Rambler Roses and borne in trusses of thirty to forty on each; the body of the flower is brilliant in color, but toward the edges of the petals they light up with a wonderful scarlet-crimson. Price, one-year-old plants, 20 cents each; two-year-old plants, 50 cents each.

White Dorothy

A White Climbing Rose of Indescribable Charm and Vigorous Growth

This wonderful Climbing Rose is so exquisitely beautiful that it is well worth all the prominence it can be given. It is a rampant grower and in a remarkably short time will cover a large trellis with its long, sturdy canes clothed with brilliant green, shining foliage of splendid texture and free from mildew or attacks of insects. The flowers are of a brilliant, glistening white and are borne in great trusses, completely covering the plant, until it resembles a snow drift. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

Excelsa, New Fiery Red Rambler Rose.

Dorothy Dennison, The Blush Dorothy Perkins

Flowers of a delicate cherry pink color, which fades to a soft white; deep green foliage. Vigorous grower, perfectly hardy. Will cover a large porch or trellis in an incredibly short time. One of the most charming of all climbers. Price, one-year-old plants, 15 cents each; two-year-old plants, 35 cents each.

It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. CLIMBING WOOTTON

To our mind this great Rose is to be classed with Mrs. Robert Peary and other great climbing varieties for these reasons: It is perfectly hardy, has no weak spots, grows with wonderful vigor, blooms continuously throughout the growing season, produces flowers that are nothing less than superb, both in beauty and in fragrance. If there is such a thing as having one Rose more beautiful than another, we think this variety may be entitled to this distinction. It is a strong, rampant climber, growing in one season to a height of from ten to fifteen feet, with large, heavy, insect-proof foliage. It produces in most wonderful profusion its superbly-formed flowers, which are bright magenta-red, passing to violet crimson, richly shaded. The flowers are large, full and regular, with thick, leathery petals, and deliciously scented. Make beautiful buds. Price, 15 cents each; large size, 40 cents each.

Climbing Malmaison

This Rose is an exact counterpart of Malmaison in foliage and flower, but is a rampant climber. You cannot tell the flower or foliage from that old-time, tried and true variety, Malmaison. Flowers of graceful form, unsurpassed beauty, and deliciously fragrant. Price, 15 cents each; large size plants, 30 cents each.

Climbing Killarney

Climbing Killarney is a sport of the now popular cut flower Rose Killarney, and excels any variety of its class and color ever introduced. Proved immensely popular last year. Nephrolepis Whitmani

Ornamental Ferns

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10 cents each; larger plants, 25 and 50 cents each.

THE NEWPORT PARLOR FERN. (Scotti.) It is a condensed form of the Boston Fern with characteristics not evident in the parent, an average plant in an 8-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents each.

COMPACT SWORD FERN. Fitting companion for the Boston; dwarfer, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 15 cents each; larger, 30 cents each.

WHITMANII. We think this the most popular Fern. Rather dwarf in growth, but graceful, very compact, dense and feathery. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib, and so thick they seem almost crowded. It is a healthy, vigorous grower, constantly unfolding fresh fronds of light green that contrast exquisitely with the deep green of the older fronds. It is somewhat like Barrowsii, but decidedly more fluffy, more

delicate and beautiful. Fine young plants, 15 cents, 25 cents and 35 cents.

PLUMED SCOTTI FERN. (*Nephrolepis Scholzei*.) The ideal plumed Fern, holding the same position to all other plumed varieties that Scotti holds to the old Boston. It is a sport from Scotti, possessing all the merits of that most popular variety, but with the pinnate sub-divided, giving it an airy, feathery appearance. Price, nicely shaped plants, 15 cents; larger sizes, 30 and 75 cents.

"TEDDY JUNIOR." This magnificent Fern has never before been offered for sale by any florist or catalogue firm. It is a sport from the now famous Roosevelt Fern, and while its habits of growth is to produce a shorter frond, it retains all the valuable characteristics of the parent plant. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. Price, 15 cents each; larger, 30 cents each.

THE "ROOSEVELT" FERN. It is our good fortune and great pleasure to offer this wonderful new Fern. In general characteristics it resembles the world-famous Boston Fern, but it produces many more fronds than the Boston, thus making a bushier, handsomer plant. The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Price, 15 cents each; larger, 30 cents each.

Hardy Chrysanthemums for Permanent Planting

Pompon Chrysanthemum Minta

Pompon Chrysanthemums

These beautiful small flowered varieties are again coming to the front, and are certain to become popular for outdoor bedding purposes. They are absolutely hardy, and produce an abundant, almost lavish, profusion of blooms, and the plants lend a coloration to the garden just at a time when other plants have been destroyed by frost. Frost does not materially effect the flowering. The collection embraces all the leading colors, and, with but a slight covering of leaves or coarse stable litter during the winter, will take care of themselves after once planted.

Pelargoniums (Lady Washington Geraniums)

The New Everblooming Pelargonium, Easter Greeting

Pelargoniums or "Lady Washington Geraniums," as they are commonly called, are among the most beautiful of our summer and fall flowering plants; they offer a rich and varied assortment of colors, and do not resemble the common Geranium in any particular, neither in foliage nor flower; more beautiful in every way and the ease with which they may be grown should recommend them to everyone.

The flowers of Easter Greeting have the large size and the gorgeously rich coloring of the "Lady Washington Geranium." To this is added, in Easter Greeting, the habit of continuous blooming, which has made the ordinary bedding Geranium so highly valued. Easter Greeting is the first of a new race and one of the most valuable introductions in recent years. As an Easter plant it rivals the Azalea; but unlike the Azalea, Easter Greeting will remain in full bloom all summer. Each, 25 cents.

New Marguerite

MRS. F. SANDER. Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures five inches across; the center of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray-petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. These are produced on long stems with a freedom not known in other varieties of the Marguerite. Price, young plants, 15 cents each; 4 for 50 cents.

Feverfew, Little Gem

This variety surpasses the old variety in every respect. It is very dwarf, growing only from eight to twelve inches high. The flowers are larger and of more perfect form, and of the purest white and of free flowering habit, the plant being perfectly loaded with blooms. Price, 5 cents each; 50 cents per dozen.

If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well rotted manure and soil. Price, 5 cents each; 50 cents for fifteen; \$2.50 per 100.

PEACH-APRICOT

One branch of the peach-growing business has been sadly neglected—the little home markets that dot this great country of ours by the tens of thousands. Everyone loves a luscious peach, and nearly all who own land can grow them if they will. And while we would be glad to see from one to a dozen peach trees in every family garden, we fully realize that that happy day is yet a long way off, and therefore there is a great money-making opening for commercial peach-growing in a small way in and around every center of population. The little home market orchard may have fifty, a hundred, two hundred or five hundred trees, depending on surrounding population, and should be planted with varieties suitable to climate, and covering the season from earliest to latest ripening kinds. One has little idea how many peaches can be sold to neighbors until they try. We know of many peach orchardists who annually sell \$500 to \$1,000 worth of peaches to the farmers within easy driving distance of the orchards, and this direct sale is nearly all profit; no freight or express charges to pay, no commissions on sales and no waste of any kind.

Price, 25 cents each; \$2.50 per dozen.

We have seen them make a second crop, six weeks or two months after all other fruit was gone, continuing to fruit for six weeks at a time, and this the second crop. You will need at least a hundred of them if you like late berries. Try them and see how they will do with you.

Fall Bearing Strawberries

Fall-bearing Strawberries seem to be no longer an experiment, as they are becoming essential all over the country, and are making good every place they have been tested. The two varieties we offer we consider the best.

Sow as follows: 1 lb. for 350 square ft.; 5 lbs. for 1,750 square ft.; 10 lbs. for 3,500 square ft.; 25 lbs. for one-fourth acre. Price, 25 cts. per quart. If sent by mail, 35 cts. per quart.
