BENJAMIN BARRETT & SON**Dealers and Growers of Small Fruits****Plants of all the Leading Varieties for Sale****BLUE ANCHOR, N. J.****1917 SPRING AND FALL 1917**LIBRARY
RECEIVED
★ JUN 23 1920 ★
U. S. Department of Agriculture

We would say to those whom we may do business with, that we have been growing small fruits exclusively for the last twenty-eight years, and keep nothing in the plant line only what is profitable; and the varieties we offer are of the best to give general satisfaction almost anywhere.

Every order will have our personal attention. If any error is made we stand ready to correct same.

Our shipping facilities are of the best.

Our terms are CASH from unknown parties.

STRAWBERRIES

Success and Campbell's are two of the very best early ones.

Mascot, Chesapeake, Doras, Big Joe, Heritage, Stephen's and Late Champion, all the above are utility strawberries—best of money makers on the market.

Superb, the fall bearing variety is the best of all the second croppers.

All varieties of strawberries \$3.00 per 1000, excepting Campbell's Early \$4.00 per 1000, and Superb, \$6.00 per 1000.

RASPBERRIES

The St. Regis is what we call the everbearing and is one of the best varieties ever introduced. It was found and propagated within three miles of our farm and we are in a position to furnish plants true to name of this fine variety. Welch Raspberry is away ahead of any late raspberry, price per 1000 \$7.00, per 500 \$4.00.

BLACKBERRIES

The following blackberries are all growing on our place:

The Ward is a good, fine berry where it gets good treatment, and will do its best in light sandy soil; on heavy soil it is inclined to rust.

The Mercereau is our best, and has given us better results for labor and capital invested than any blackberry that we ever had. In fact, we cannot say too much in its favor. We have a fine lot of plants of this variety that we offer at prices within the reach of all.

The Blower is another good one, and on our farm does well. We can recommend it to any one who desires a good profitable blackberry.

Prices for Blackberries

\$8.00 per 1000; \$5.00 per 500; \$1.50 for 100, 50c for 12.

THE BLACK DIAMOND BLACKBERRIES

The Black Diamond Blackberry was originated some years ago by George H. Leipe from the seed of the old Evergreen, a variety of the cut leaf class of Blackberries. The plants are very vigorous and stocky, thus enabling them to carry to

maturity their immense loads of perfect fruit. The foliage remains remarkably green till late in autumn. It is also free from rust and is not troubled with borers or rose scale.

	Per 100	Per 1000
Black Diamond Root Cutting.....	\$ 1.75	\$ 13.50
Black Diamond Tips.....	1.50	12.00

JOY BLACKBERRY

The canes are of stocky, vigorous habit, with abundant large leaves; yields very heavy *every year* and *all* the canes are loaded with fruit; has never been known to be affected with orange rust or other disease. The berries are large and almost as thick through as they are long and are coal black. In rich luscious flavor it surpasses all other blackberries.

SWEET POTATO SEED AND PLANTS

Take Notice—I can not furnish any Vineland Bush Sweet Potato Seed this Spring. I can supply plants.

Jersey Yellow.—This seems to be the preferred name for the Sweet Potato grown mainly in New Jersey. Our Vineland Fancy Strain has for years been carefully selected from the best Jersey Yellow seed, having a smooth skin, good form, color and general appearance as well as productiveness and keeping qualities, and we feel confident there can be no better seed Sweet Potatoes obtained anywhere. No. 1 will run from 1 to 1 $\frac{1}{2}$ inches in diameter.

Jersey Red.—Has the general characteristic of the Jersey Yellow. Is of a much better quality and superior for table use. Our stock is smooth and chunky.

Vineland Bush.—It is a true bush from the Jersey Yellow, resembling it in leaf. It forms a thick, bushy top of dark green leaves and presents a most luxuriant appearance. It is as easy to cultivate and care for as a bush bean, there are no vines to bother in digging.

Big Stem Jersey.—Most rapid grower and heaviest yielder of the Jersey Yellow type, and therefore growing to marketable size much earlier in the season.

PRICES OF VARIETIES

	Peck	Bus.	Bbl.		Peck	Bus.	Bbl.
Jersey Yellow.....	\$0.75	\$2.00	\$4.00	Jersey Red.....	\$0.75	\$2.00	\$4.00

Fifty plants at 100 rates, and 500 at 1000 rates, of any kind.

GRAPE VINES

Ives Seedling.—This is one of the best grapes because it does not rot. It is a fine grape for market, also for wine. Grape juice companies will leave all others when they can get the Ives. It is very sweet when good and ripe. All growers should plant it for money making.

Mills.—Black. Originated in Canada. Vines vigorous, hearty and healthy; supposed to be a cross between a native and a foreign variety; bunch very large, long and shouldered; berry medium to large; adheres firm to stem; flesh firm, meaty rich and sprightly.

Green Mountain.—The earliest White Grape. Bunch small to medium size, often shouldered, berries rather small, greenish white, thin skinned, tender, sweet, juicy and vigorous, with delightful, sprightly and refined flavor. Ripens very early.

Worden.—A black grape that resembles Concord closely, but with more tender pulp, higher quality and ripens a week to ten days earlier. It is also a little larger in both bunch and berry than the Concord.

Campbell's Early.—Black. Cluster large and shouldered, moderately compact very early and productive. This is claimed to be the finest Grape that has been produced in a long time. It makes a strong growth, with abundant thin, healthy foliage. Quality about the same as Concord.

Early Ohio.—The earliest black grape known; ripens ten days to two weeks before Moore's Early. Bunch large, compact and shouldered; berry medium, covered with a heavy bloom, leaves vary and perfectly healthy. Fully as hardy or more so than the Concord. A vigorous grower, very productive and of good quality. Berry adheres firmly to the stem. One of the best shippers.

Concord.—Bunch and berry very large; blue-black with bloom; thin, skin crack easily; flesh sweet, pulpy, tender, good quality. Very prolific and a vigorous grower. One of the most reliable and profitable varieties for general cultivation.

PRICES OF GRAPE VINES

	Each	12	50	100	1000
Green Mountain, 1 year old.....	\$0.50	\$5.00	\$9.00	\$15.00
