STRAND'S NURSERY

TAYLORS FALLS MINN.

Everbearing Strawberries

Order Now

Nothing Gained
by Delay

YOU CAN HELP US GIVE YOU BETTER SERVICE BY ORDERING EARLY, as this insures early shipment as well as the best of stock. Kindly bear in mind that we have thousands of orders that must go forward at planting season. Hence during our rush we can not quote prices or reply to casual inquiries as business in hand demands all the available efforts that we can muster.

ORDERS ARE FILLED IN ROTATION as far as possible. Hence get your orders in early while assortments are at their best. Help us to give you better service by getting your order in before shipping season begins. Notification cards are sent upon receipt of order and also when shipment is forwarded. If stock has been shipped and you do not receive it in due season, advise your agent to trace same and notify us and we will have it traced also. We pack all shipments well, so they should stand considerable delay without injury.

We grow and offer only the hardest stock adapted to the Northwest. Our experience is always at your command free of charge. Our patrons' success is the basis of ours, and it is our sincere desire to please all who do business with us.

WE GUARANTEE STOCK

**TRUE TO NAME
UP TO GRADE
SAFE DELIVERY**

Should any prove otherwise we cheerfully rectify all just demands if reported promptly. All claims for replace must be filed prior to December 1st of the same season. In no case are we liable for more than the original purchase price.

Our Terms

CASH BEFORE SHIPMENT or satisfactory reference. We will be pleased to book orders at any time without deposit. C. O. D. by express is needless expense, but we will ship thus when one-fourth of price accompanies order. Prices quoted include boxing and packing and are free on board cars here or to Soo line points from St. Croix Falls, Wis. Five of a variety will be supplied at 10 rates; 50 at 100 rates and 500 at 1,000 rates. On large orders we will be pleased to quote special prices.

Direct from Grower to Planter

SAVES YOU 50 PER CENT

INSURES GETTING THE BEST OF STOCK IN THE BEST POSSIBLE CONDITION, at right prices. Your trees come in individual packages which remain undisturbed until you are home and ready to care for them. You buy and get what you want (not what some salesman is interested in, selling you through verbal promises his company does not back up.)

Parcels Post WILL BRING TO YOUR DOOR any package under 50 pounds if you reside within 150 miles, or 20 pounds beyond, if the combined length and girth is not over 72 inches. A very safe and economical way to get all small orders. Insurance 5c additional.

Our Nursery Is Inspected Annually By the State Entomologist

A copy of the certificate accompanies each shipment.

EARLY ORDERS Help us to give you better service, better stock, better prices. Get your order in before our packing season begins, if possible.

GET UP A CLUB—10% Discount on all such orders, when name and address of various parties are given.

SEND US THE NAMES of parties interested and we will see that you are amply compensated for the trouble.

FREE JOIN THE MINNESOTA STATE HORTICULTURAL SOCIETY and get their monthly magazine, "The Minnesota Horticulturist" and a bound volume of some 500 pages of the best literature on this subject, also valuable plant premiums. Membership fee \$1.00 per year. Free with a \$10.00 order when requested (except where special prices are quoted.)

Our Popular Collections

Have Pleased Our Patrons

So well for the past several years that we feel justified in renewing them. They cannot fail to please, for they are composed of our best hardy sorts, carefully selected with reference to the section of the country, and offer to the average planter a list which will meet his needs without selection from catalog lists.

THE FARM ORCHARD 25 APPLE AND CRABS, 3 to 4 feet. **\$5.00**
10 PLUM and CHERRY, 3 to 4 feet.

Same in 4 to 6 ft. trees for \$7.50; 5 to 7 ft. for \$10.00.

Sent for 25 apple trees and they are doing fine. Every one lived and sure are growing fine. H. R. W., Fairchild, Wis. 3-3-15.

THE FRUIT GARDEN 100 Strawberries 5 Currants
100 Asparagus 5 Grapes
50 Raspberries 5 Pie Plant **\$5.00**
25 Blackberries or Dewberries
5 Gooseberries
1 Improved Sand Cherry

A model assortment that will be a continued source of pleasure and profit to any purchaser.

Received plants in good condition and are well pleased with them. W. P. W., Lee, Mass. 11-15-15.

50 HARDY FLOWERS Consisting of many choice sorts of Peonies, Phlox, Iris, Hemerocallis, Daisies, Columbines, etc., which will come up year after year with added vigor and beauty to brighten your surroundings. Most of these will bloom the first season. **\$5.00**
THE ABOVE (25) FOR \$3.00.

Thank you for the splendid extras included. I anticipate much pleasure in watching them grow another year. Mrs. F. M., Duluth, Minn. 11-26-15.

50 ROSES These are thrifty two-year plants and just the assortment that will please anyone interested in "dressing up" the home grounds. **\$5.00**
Shrubs, Vines **HALF OF THE ABOVE (25) FOR \$3.00.**

Always have good success with your shrubbery, which speaks well for methods of handling and packing. A. B. L., Northwood, N. D. 2-1-15.

25 Ornamental Trees A choice assortment that will prove hardy and desirable in your location. Easily worth five times the price for improving the place. Let us know your needs and we can please better. **\$5.00**

Please send me * * * I cannot but admire the quality of your stock. W. H. L., Haigler, Neb. 4-20-15.

100 FOOT HEDGE We grow large quantities of hardy shrubs that are admirably adapted for this purpose, and will be pleased to quote prices or reply to inquiries regarding same. A hedge not only will add much to the attractiveness of property, but may be useful as a screen, windbreak or division. Many shrubs require little or no attention to keep them in the desired form, while others must be sheared. If you will tell us the length, height desired to keep same at, location or position and class (evergreen, foliage or flowering), we will cheerfully suggest what we think would please you best. Plant most sorts about two feet apart. **\$5.00**

The nursery stock received was fine and I am well pleased. C. A. B., Willard, Mont. 6-4-15.

100 EVER-GREENS Tell us what you would like to use them for—hedge, windbreak, grove or ornamentals—and we will forward an assortment or all of one variety which should do well in your section. These are all once transplanted and 3 to 4 years old, 6 to 12-inch, and well rooted. With reasonable care they are sure to grow. **\$7.00**
HALF THE ABOVE (50) FOR \$3.75.

100 12 to 18-inch (twice transplanted).....\$12.00
100 4 to 6-inch seedlings, postpaid..... 1.00

We Guarantee Stock True to Name
Up to Grade
Safely Delivered

How to Care for Nursery Stock

WHEN RECEIVED—Avoid any unnecessary exposure to sun or wind. Mud the roots thoroughly at once, and either place them in a rather damp cellar or else "heel" them in the ground in some cool, moist place until you are ready to plant. Do not wet the tops of evergreens and strawberries.

IF STOCK APPEARS RATHER DRY when received or if the weather or ground is unfavorable, it will generally be best not to plant at once, but let it remain heeled in or buried in moist ground for a few days. By this method of handling, a much better stand of all kinds of nursery stock will be obtained, especially strawberries, the bunches of which should be cut open and plants spread out.

FALL SHIPMENTS—When received in the fall, a trench should be dug in some well-drained place, deep enough, and sloping so that all trees can be entirely covered. The bundles should be cut open and all straw or moss removed. The earth should be made firm about the trees, and after the ground is frozen cover with enough straw or litter to prevent alternate freezing and thawing. It is a good plan to get stock in the fall if proper care is given to heeling it. Evergreens and strawberries should not be shipped in the fall.

FROZEN STOCK—Should any stock be received in a frozen condition, place in a cellar or some rather moist place, where it will thaw out gradually, and do not unpack until frost is out of the trees.

The Way We Pack Large Trees for Shipment. Guaranteed to Reach You Safely.

I wish to thank you for the replace stock sent, as I did not expect you to do that. You will lose nothing by it however for if anyone mentions nursery stock to me they will know that Strand's is right. A. S., Ellsworth, Wis. 5-23-15.

GERMAN PRUNING SHEARS

Postpaid, \$1.25; 7½ inches, \$1.50.

Many of our patrons ask us for same, and hence we are listing what we consider the best one on the market.

WHEN TO PLANT Throughout the Northwest it will be found far better and safer to plant almost everything as early in the spring as the ground is in good working condition. Bulbs such as tulips and lilies, also most of our hardy perennials, such as peonies and rhubarb, can be planted to good advantage in September or October if given a light mulch as soon as the ground freezes.

HOW TO PLANT Do not expose the roots unnecessarily. For seedlings, strawberries, ries, etc., make a thin mud in which to place them before planting. This is better than "puddling" where planted. Tramp the ground very firm about the roots, leaving only an inch or so of the surface soil loose. Leave it level or dished toward it.

PREPARE GROUND THOROUGHLY before planting. Keep grass out and do not plant in sod. When necessary to plant in sod, as in a lawn, remove all sod within a radius of three feet or so, keeping the ground well mulched or cultivated. If you must water, soak the ground thoroughly so that the water will reach the roots. Do not apply just a little frequently, for the soil then bakes and the tree or plant suffers more than if none had been applied. On most of our soils in

this section we would not advise plowing under manure in the spring or placing it in the holes dug, but rather apply it as a top dressing around the tree. The soil is usually rich enough for most of our fruit trees. After they begin to bear is the time to apply it; applying it late in the fall as a mulch for winter protection and working it into the soil the following season.

PRUNING

Before setting, remove broken roots and nip back the others. About one-half of the previous season's growth on all branches except the leader should be cut off. (See Fig. 2.) This gives a well-branched tree in top and roots. Should the season or trees be rather dry, better results will be

obtained if they are pruned closer as in Fig. 3. Large street trees do best when trimmed to a pole or only short spurs left at the top. After-pruning should consist in pinching back or cutting out interfering or damaged limbs—aiming to form a symmetrical tree. When large limbs must be removed, do it while the tree is dormant and wax over the wound. June is also a good time to prune, as wounds then heal over very soon. In this section all fruit trees should be branched low and pruned very little.

Perfection Sprayer

THIS NEW SPRAYED, put out by the Brandt Mfg. Co., is a high-pressure machine having an automatic shut-off nozzle, and is offered in full confidence that it is the

Best Hand Sprayer on the Market

The tank is 20 inches high and 7½ inches in diameter; tested to 60 pounds pressure; weighs 8 pounds; capacity 3¾ gallons. It will handle whitewash, Bordeaux mixture, water paints and for all ordinary spraying will not disappoint.

Galvanized Steel, \$5.00;
All Brass, \$6.75.

Special circular of other makes of hand sprayers sent on request.

THE ORCHARD

FOR COMMERCIAL PURPOSES the higher elevations and northern slopes have a decided advantage, and trees are usually set 16 by 20 or 20 by 20 feet apart, using only a few sorts. In exposed situations a windbreak to the south and west is a decided advantage, and in some cases a necessity. Red cedar should not be used for such purposes, for it seems to facilitate the spread of leaf rust, which has done much damage of late years, especially to crabs.

FOR THE HOME ORCHARD a plan that seems best is to plant the rows 35 feet or more apart and trees from 14 to 16 feet in the row, using a liberal assortment. Spreading growers should be set further apart than others. Between the trees in the same row may be planted currants, gooseberries, pie plant, etc. The plots between given a nice space for the small fruits, garden, corn or potatoes. When planted in this manner we have an opportunity of renewing the orchard by setting a row between later, and everything is more likely to receive its due proportion of care.

DEEP SETTING—Trees should be set a little deeper than they originally grew in the nursery, and on lighter soils they should be set deeper than on heavy soils. This is especially true of apples, plums and cherries, as they are often grafted on roots which are tender and unreliable in this section. This induces the tree to root from above the graft, and it soon becomes on its own roots, which are perfectly hardy. Trees not over three years of age root most readily. Some varieties root more readily than others, and hence the difference in hardiness. Apples especially will not thrive on wet, heavy soil. In such places and seasons they should be planted shallow and furrows plowed towards the trees, leaving a furrow between the rows for drainage. In severe winters, when there is little snow and the ground rather dry, a great many fruit trees are lost from root killing. We can prevent it to a great extent by thorough, continued cultivating, deep setting and by mulching around the trees late in the fall or moistening the soil.

THE KIND OF TREE that delights the average buyer is one with a fine looking, good sized top. If you desire straight, pretty ones, buy only those termed upright growers. Spreading growers are invariably crooked growers in the nursery and many of our hardiest varieties belong to this class. They have stronger crotches, are not liable to split down and also protect their own trunks better. Plant varieties that are recommended by your State Experiment Station or Horticultural Society. (List furnished on request.) Buy a northern-grown, Medium-sized, thrifty grade and you will get trees well-balanced in top and roots that will save you in every way. "The best is the cheapest," and especially is this true in the planting of trees.

ONE-YEAR-OLD TREES as commonly planted throughout the more favorable orchard districts of the West are really two-year-old trees. They are grown the same as our plum or cherry—by lining out the seedlings and grafting or budding after one season's growth. This gives a tree with one-year top and two-year-old root system. Where trees are subject to root killing this class of an apple tree is worthless, and we do not grow them. Our two-year-old piece-root grafted trees for our conditions will be found far more satisfactory.

Please send me * * * We have ordered some goods of you every year and were always well satisfied. H. J. M., Hamburg, Minn. 3-16-15.

I have about 100 trees which I ordered from you and I like them very much. They bear fine. O. A., Colfax, N. D. 4-5-15.

HOW APPLES ARE PROPAGATED

Scion

Root

All Northern nurserymen use the piece-root graft for propagating apples. These are made up during the winter by splicing a 6-inch twig (scion) onto a 3-inch piece of seedling apple root, as shown; waxed thread, paper or cloth being used to bind them together. We endeavor to use seedlings grown from our hardiest crabs and apples as far as possible, as they are unquestionably the best for this section. Plums and cherries are grown by lining out the seedlings in nursery rows and budding or grafting after one season's growth, hence they are more expensive than apples. Grafts should be planted as early as possible in the spring, and orders must be in before April 1st to insure.

Apple Seedlings, \$1.25 per 100, postpaid,
Scions 2c each; \$1.50 per 100, postpaid.

APPLE GRAFTS

\$1.50 per 100; \$10.00 per 1,000;
postpaid, 2c each; \$1.75 per 100.

HARDY FRUITS FLOWERS
AND ORNAMENTALS

TREE PROTECTORS A PRACTICAL NECESSITY

They should be placed around all orchard trees and also some shade trees, such as Basswood, Mountain Ash and Butternut.

They are cheap, neat, easily applied and last for about five years, serving as a protection from mice, rabbits, sunscald, extremes of heat and cold and also prevent trees from becoming hidebound or damaged by whiffletrees, as far up as they reach.

They are made of the very best quality of rock elm veneer and are about 12 inches wide by 20 inches long. One end is dipped in a coal tar composition to prevent decay where they come in con-

The Hawkeye
Tree Protectors

tact with the ground. If dry, they should be soaked in water before wrapping about the trees (to prevent cracking) and secured with two wires or strings.

Price, 2 cents each; \$1.25 per 100; \$8.00 per 1,000. Put up in crates of 100 each. Postpaid, 3 cents each.

COPPER TREE LABELS 2 cents each, \$1.50 per 100, postpaid.

AN INDESTRUCTIBLE LABEL to be written on with a very hard lead pencil or stylus, writing always distinct. Just the thing to keep track of the names and data of orchard trees, top-working experiments, etc. Give the wire one turn around the branch, securing the end in loop. Remove to smaller branches every few years to prevent cutting wood. We advise the use of an additional or heavy wire as they will wear away in time.

TOP-WORKED APPLE TREES

FROM 3 TO 10 KINDS GROWING ON THE SAME TREE

A Novelty of Merit, Sure to Please.

These are 4-year, 5 to 7-foot Hibernial Success and Dartt crabs, the principal limbs and leader of which have been budded

to from 3 to 10 varieties, covering the season, such as Yellow Transparent, Charlamoff, Wealthy, N. W. Greening, Delicious, McIntosh, King David, Tetotsky, Lowland Raspberry, Duchess, Scotts Winter, Sugar Loaf, Malinda. A veritable orchard in itself, which will come into bearing very early and give the best of satisfaction. As you will note by the illustration, a bud of each variety has been so inserted that when the por-

tion above same is cut away, the bud starts into growth, and thus the tree is transformed to produce fruit of the desired sort or sorts. The process of budding and grafting is very simple and many of our most successful orchardists prefer to plant hardy trees like the Hibernial crabs and top-work to winter sorts after one or two seasons growths.

PRICES

Trees Top-Worked to 2 or 3 varieties.....	\$.50 each
Trees Top-Worked to 4 or 5 varieties.....	.75 each
Trees Top-Worked to 6 or 7 varieties.....	1.00 each

NOTE—Several varieties can also be supplied (as long as stock lasts), in bearing size trees, 7 to 9 feet, 75c each; 2 to 3 inch caliper, \$1.50 each. Write for list.

FALL APPLES

(Given in Order of Ripening. *Varieties are Hardest.)

✓ **YELLOW TRANSPARENT**—A choice, very early yellow sort. Comes into bearing very soon after planting, and annually. Medium size, fine grained, juicy. Early August.

✓ ***TETOSKY**—Hardy, upright grower. Fruit medium size, striped with red, choice eating. August. Should be in every home orchard.

✓ ***LOWLAND RASPBERRY**—Upright grower; free from blight. Fruit medium size, splashed with red and of good quality. A very handsome apple. 5c per tree extra.

✓ ***DUCHESS**—Very hardy, free from blight, moderate grower, early and prolific bearer. Fruit large, handsomely striped with crimson; fine for cooking and eating. The standard early commercial sort. September.

✓ ***CHARLAMOFF**—Hardy, thrifty, spreading grower, early and regular bearer. Fruit similar to Duchess, better quality, longer, hangs to tree better. A choice dessert apple. September.

✓ ***YELLOW SWEET**—Best early sweet apple. Hardy, free from blight, very productive. Medium size, yellow. August.

✓ ***SUMMER PEAR**—Very hardy, rapid, upright grower; free from blight; early and heavy bearer, having a long ripening season. Yellow with red cheeks, very fine grained, mild flavor, as name indicates. Every orchard should have it. 5c extra.

LATE FALL AND EARLY WINTER

✓ ***OKABENA**—Very hardy and productive. Fruit of fine quality, size and color. Tree is good grower and very free from blight. Similar to Duchess, but later. Season, September.

✓ **IOWA BEAUTY**—Strong, upright grower, reasonably free from blight. Fruit very large, almost sweet, good quality. Handsome red. Deserves more generous planting.

✓ ***PEERLESS**—Vigorous, upright, hardy. Fairly productive on upland or not too rich soil; good quality, size and color. Season, October to December. A handsome tree and fruit.

✓ ***HIBERNAL**—Without doubt the hardest; spreading grower, early and regular bearer. Fruit large, striped, excellent for cooking, but rather tart for eating until fully ripe. Season, October to December. It is the best stock to plant for top working with more tender sorts.

✓ **McMAHON**—Strong grower, but blights somewhat. Quite productive and of good size and quality. Light yellow, nearly white, sometimes blushed. October to December.

✓ ***ANISIM**—Free from blight, very hardy and prolific. Upright grower, fruit dark red, medium size and of good quality. Its high color makes it a desirable commercial sort. Season, October to December.

✓ ***PATTEN'S GREENING**—Very hardy, free from blight, vigorous, spreading growers, bears early and abundantly. Fruit large, yellow. Good eating and cooking apple. One of the best all-around varieties. October to January.

✓ ***WOLF RIVER**—A strong and vigorous grower, producing fruit of the largest size and highly colored; fair quality. A great show and market apple. October to December.

✓ **WEALTHY or PETER**—This variety is without doubt the best quality and most popular apple grown in the state. Hardy, but somewhat subject to blight and sunscald. Upright grower, abundant and early bearer. Fruit large, red. Season, October to January. Keeps well in storage.

WINTER APPLES

(IN ORDER OF RIPENING. *VARIETIES ARE HARDEST.)

*MILWAUKEE—Spreading grower, comes into bearing early and is very prolific; ripens its wood well; free from blight. Fruit large, flattened, splashed bright red; juicy, acid. November to March. 5c per tree extra.

*JEWELL'S WINTER—Deserves a trial in every orchard. Very hardy, productive and an early bearer. Fruit good size, bright red and of fair quality; hangs to tree exceptionally well. December to March. 5c per tree extra.

NORTHWESTERN GREENING—Vigorous, spreading growth; fruit large, pale green, sub-acid, good quality. Very popular as a commercial winter variety. November to April.

✓ REPKA MALENKA—Hardy, upright grower, early and prolific bearer. Fruit medium size, red striped, mild, sub-acid. December to April.

✓ *MALINDA—Of crab-like growth, hardy, free from blight, very productive. Fruit yellow, "sheep-nose" shape, mild acid and the best of keepers. February to May.

OTHER WINTER VARIETIES

We can Supply In Some Sizes.

✓ Avista	✓ *Dudley	✓ Sugar Loaf
✓ *Dominion Winter	✓ Kaump	✓ Walbridge
✓ Jonathan	✓ *Phoenix	✓ Delicious
✓ Pewaukee	✓ Salome	✓ Golden Russet
✓ Stayman Winesap	✓ Burt	✓ Perfect
✓ Yahne	✓ Grimes Golden	✓ Scotts Winter
✓ Ben Davis	✓ McIntosh Red	✓ Windsor Chief

Other Fall and Early Winter Sorts

✓ Antonovka	✓ Hass	✓ *University
✓ *Christmas	✓ *Lords L	✓ *Blushed Calville
✓ Gideon	✓ Red Wine	✓ Fameuse
✓ Longfield	✓ Brett	✓ Gilbert
✓ *Red Warrior	✓ Evelyn	✓ Lyman Sweet
✓ *Borovinka	✓ Hutchings	✓ Superb
✓ Eastman	✓ Plum Cider	

*CRABS AND HYBRIDS

(IN ORDER OF RIPENING.)

✓ EARLY STRAWBERRY—Hardy, spreading grower; liable to blight. Earliest of all to ripen and very productive, but perishable. Season, August.

✓ FLORENCE—This is one of the best all-around crabs. Hardy, productive, moderate grower, medium size, acid and finely colored.

✓ WHITNEY — Hardy, thrifty, upright grower. Fruit large, handsome and of good quality for eating. September.

✓ SWEET RUSSET — Very hardy, spreading grower, early and prolific bearer. Fruit large, conical, russeted, yellowish. Highly prized by those liking a sweet apple and for pickling. Should be planted in every orchard.

✓ DARTT—Thrifty, upright grower. Very productive; good size, acid, well colored. An ideal tree and fine fruit.

✓ TRANSCENDENT—One of the best all-around varieties; productive and very thrifty, but subject to blight. Red, acid, juicy fruit. The standard commercial crab.

✓ VIRGINIA—Very hardy, strong and spreading grower; fruit large, acid, bright red. Valuable also as a tree for top-working.

Success A new, very thrifty, upright grower; fruit of good color and size, mild, acid; a very promising market sort. 5c extra.

✓ HYSLOP—A large, late, dark red crab. An old favorite, but blights somewhat.

✓ Alaska	✓ Brier Sweet	✓ Minnesota
✓ Greenwood	✓ Lyman's Prolific	✓ Gideons No. 6
✓ Shields	✓ Faribo	✓ Meadows Winter
✓ Red Silverian	✓ Yellow Silverian	✓ Jenkins

✓ Tonka, we can also supply in most sizes.

*ORNAMENTAL CRABS

✓ SOULARD—A large-fruited form of the wild crab. Its odd foliage and beautiful flowers make it a desirable ornamental. Fruit keeps all winter; of quince flavor. 3 to 4 feet, 20c; 4 to 5 feet, 25c; 5 to 6 feet, 35c.

✓ BECHTEL'S DOUBLE FLOWERING CRAB—A double dwarf form of our native crab. Makes a small tree of great beauty when covered with its large, very double, rose-like blossoms. A hardy, choice ornamental. 2 to 3 feet, 35c each; 3 to 4 feet, 50c each; 4 to 5 feet, 75c each.

✓ PYRUS BACCATA—This is the hardest form of the apple. Very desirable for ornamental planting because of their flowers and fruit. Apples are only about the size of a cherry and are borne in great profusion. 12-Inch seedlings 5c each; \$2.00 per 100; 1 to 2 feet, 15c; 2 to 3 feet, 20c; 3 to 4 feet, 25c.

✓ DWARF APPLE TREES. 3 to 4 ft. 50c; 4 to 5 ft. 75c.

YELLOW TRANSPARENT, WEALTHY AND McINTOSH RED

Especially adapted for city planting or where space is limited. They can also be grown in tubs or barrels and usually begin bearing the season after planting. As they are budded on Paradise or Doucine stocks (which dwarfs the tree), the soil should be well mulched about the trees in the fall to prevent winter injury. There is a growing demand for these dwarf trees for both ornament and fruit, inasmuch as they are being successfully fruited and grown by many experimenters throughout the state.

DWARF PEAR TREES

What we have said relative to Dwarf Apples applies equally to the Dwarf Pear. These are budded on quince stocks and begin bearing usually two years after planting. Trees are hardy in any favorable location but very liable to blight if growth is unduly stimulated. **DUCHESS** and **SECKEL** seem to give the best satisfaction as dwarfs. 3 to 4 ft. 35c; 4 to 5 ft. 50c.

STANDARD PEARS.

We cannot recommend except for trial in favorable locations. A few sorts are quite hardy but blight badly about the time they come into bearing. Spraying with Bordeaux Mixture, (it is claimed) will keep this in check. ✓ **FLEMISH BEAUTY** and **KEIFFER** 4 to 5 ft. 25c; 5 to 6 ft. 35c.

CHERRIES

Cherries delight in elevated or well-drained soils and gentle southern slopes. If not on their own roots, they should be planted deep and allowed to grow in bush form. Plant about the same distance apart as plums, spray to keep foliage healthy; that in turn will increase hardiness and productiveness. The varieties given below are giving the best satisfaction and deserve more extensive planting.

1-yr. whips (postpaid, 30c). 25c each; \$2.00 per 10; \$17.50 per 100
3 to 5 feet.....35c each; 3.00 per 10; 25.00 per 100
4 to 6 feet.....45c each; 4.00 per 10; 30.00 per 100

✓ **HOMER**—The only cherry grown and marketed in any quantity in the state. Very hardy and productive. An annual bearer, which ripens its dark red fruit very evenly. All offered are on their own roots, and we confidently believe will thrive and prove satisfactory and profitable in all favorable locations.

✓ **WRAGG**—Strong, rather spreading grower; early and prolific bearer of dark red, good sized, rather acid fruit. Very highly spoken of wherever planted. Trees of this variety growing on our grounds seldom miss a crop.

✓ **EARLY RICHMOND**—A very popular variety. Fruit is about the same size and color as the Wragg, but earlier and more acid. A vigorous grower, but not productive with us.

✓ **OSTHEIM**—One of the best Russian varieties that is proving hardy and productive. Very desirable. Fruit nearly black; juicy and of good size.

✓ **MORELLO, MONTMORENCY**, etc., we can supply at same prices.

NATIVE BLACK, RED and CHOKE CHERRY—See page 44.

HARDY FRUITS FLOWERS AND ORNAMENTALS

*CHERRY—PLUM HYBRIDS

2 to 3 feet.....	25c each;	\$2.00 per 10;	\$17.50 per 100
3 to 4 feet.....	35c each;	3.00 per 10;	25.00 per 100
4 to 5 feet.....	45c each;	4.00 per 10;	35.00 per 100
5 to 6 feet.....	60c each;	5.00 per 10;	45.00 per 100
6 to 7 feet.....	75c each;	6.50 per 10.

Compass Cherry

—This is a cross between the Miner plum and the Sand Cherry. It is perfectly hardy; an early and abundant bearer; 2-year trees bearing in nursey rows before being sent out. Fruit dark red, and of exceptional quality for canning. Well worthy of a place either as an ornamental or in orchard. This variety has proven such a success that it is seldom we have stock enough.

HANSKA—A cross of the American Plum and Chinese Apricot (P. Simoni). Rapid growers, entirely unlike any of our native plums. Fruit has very small pit, firm yellow flesh, good quality—of an apricot flavor when cooked; 1½ inches in diameter, flat and has a beautiful, heavy blue bloom. As a commercial fruit, the beauty, quality, firmness and productiveness of this variety will make it a leader when better known.

OPATA—Is a cross between a Sand Cherry and Burbank's Gold Plum, and is one of the most valuable and hardy of Prof. Hansen's hybrids. Like the Compass, it bears very heavy when 2 years old. Four-year-old trees having produced a bushel each. It blooms fully 10 days after the early plums and ripens early in August. Fruit is 1.3-1.6 inches in diameter, purple with bloom, very small pit, flesh green, sweet and pleasant.

Sapa —A cross between the Sand Cherry and the Sultan Plum. Like the Opata, it is hardy "as an oak" and very early and prolific fruiter. Makes a smaller, more bushy tree. Fruit is a little larger; 10 days later; dark purple and rich red flesh.

WACHAMPA is of the same pedigree as Sapa. Excellent quality, small pit, very heavy yielder; fruit smaller and tree of more vigorous, upright growth. These hybrids are very promising fruits for home use especially. All perfectly hardy and early producers.

Sansota, Cheresota, Kaga, Inkpa, Skuya, Toka, etc., we can also supply in limited quantities.

*SAND or ROCKY MOUNTAIN CHERRY

Perfectly hardy anywhere in the Northwest and valuable for variety in severe locations. As sure to grow as currant bush. It forms a very ornamental bush about five feet high; is a very early and prolific bearer. Fruit black, of a rather puckery sweet taste; nearly as large as standards. Those offered are seedlings grown from varieties improved by Prof. Hansen of the South Dakota Experiment Station, and should be vastly superior to the Sand Cherry commonly offered. 25c each; \$2.00 per 10; 3 years, 35c; 4 years (stocky), 50c each.

POSTPAID, 1 year 10c each; 50c per 10; \$2.50 per 100.

*PURPLE LEAF SAND CHERRY

50c each—
See page 34.

Is a cross between the above and the Purple Leaf Plum (P. Pissardio). Very attractive and perfectly hardy. Without question the best hardy purple leaf shrub, for foliage effect, for the northwest. Strong 3-year plants, 50c; 2-year, 35c.

*PLUM SEEDLINGS

We often have inquiries for plum seedlings for hedge or windbreak planting, or for scattering in grove and other mixed planting. These that we offer are grown from seed of our cultivated varieties and many of them may produce fully as good or better fruit.

2 to 3 feet.....	10c each;	\$0.70 per 10;	\$5.00 per 100
3 to 4 feet.....	15c each;	1.00 per 10;	8.00 per 100
4 to 5 feet.....	20c each;	1.50 per 10;	12.00 per 100
5 to 6 feet.....	25c each;	2.00 per 10.	

The nursery stock which I bought from you a year ago last spring proved exceptionally good. C. E. P., Minneapolis, Minn. 8-10-15.

The plants arrived in fine shape and everyone grew. W. H. C., Menomonee Falls, 8-6-15.

*PLUMS

There is no fruit that we can grow with greater assurance of success and derive more pleasure and profit from than our improved native plums. When on their own roots or worked on native roots (which all of ours are) they are perfectly hardy and thrive anywhere throughout the Northwest. They invariably produce fruit the second or third season after planting, are subject to but few diseases, and require but little care to produce bountifully.

Plums will stand closer planting than apples, and may be set in rows 12 to 16 feet apart. The rows may be from 16 to 24 feet apart. They do best in a reasonably moist and rich soil. Branch trees from 2 to 3 feet from the ground. Manure liberally. Thin fruit in most varieties if you desire to keep up size, as most trees set twice as much fruit as it is possible for them to mature properly. Very little pruning is necessary other than nipping back a top-heavy growth or such as to give form to tree when young.

Character of soil and the season has much to do with quality and quantity of fruit produced by certain varieties, and hence we cannot judge which will be the most profitable for your location. It is a good idea to plant several varieties, giving not only a succession of fruit, but the cross-pollination that seems essential to a good crop.

PRICES OF PLUMS

3 to 4 feet.....	30c each; \$2.50 per 10; \$20.00 per 100
4 to 5 feet, 2 years.....	40c each; 3.50 per 10; 30.00 per 100
5 to 6 feet.....	50c each; 4.50 per 10; 40.00 per 100
6 to 7 feet, stocky.....	60c each; 5.50 per 10; 50.00 per 100

NOTE—The 7 to 9 feet, or "bearing size." \$1.00 each. List on request.

VARIETIES—(In Order of Ripening.)

✓ ***CHENEY**—Upright grower, at its best on rather sandy soils. Fruit one of the largest and earliest, red, has a very thin skin, and hence not desirable for shipping.

✓ ***FOREST GARDEN**—Very vigorous grower and profuse bearer of good sized reddish-yellow fruit of good quality.

✓ ***WOLF**—Very thrifty grower. Fruit large, good quality, freestone and ripens the last of August. A good market variety. Also a larger clingstone Wolf and Paul Wolf (Bender) which ripens 10 days later.

✓ **Terry** OR **FREE SILVER**—A very choice newer sort, extra large fruit, bright red overcast with blue, very productive and of good quality. A variety that deserves a generous planting. 5c extra.

✓ ***STODDARD**—A very productive, fine quality, large red plum with bluish bloom. A great favorite for market or home use. Adapted to all soils.

✓ ***Surprise**—Upright, vigorous grower, dark red, very large and of finest quality for canning or eating. Has a long period of ripening; and when properly pollinated it fruits annually. We consider it the best all-around plum that we have today for the northwest.

✓ ***WYANT**—Spreading, thrifty grower, adapted to all soils. Fruit large, oblong, purplish-red, good quality and handles well; nearly a freestone. A very sure, heavy yielder.

✓ ***DE SOTO**—Spreading grower; does well on most all soils. Fruit good size and quality; yellow turning to red. Very liable to overbear and fruit must be thinned.

STRANDS HARDY FRUITS FLOWERS AND ORNAMENTALS

B. A. Q., Eureka, Hammer, Hawkeye, Omaha, Stella, Weaver, etc., we can supply in some sizes..

Double Flowering Plum (*Prunus Triloba*) — The choicest, early flowering, hardy shrub. Flowers very large, double, rosy pink and closely set on the branches, coming with the foliage. 8 feet. 2 to 3 feet, 35c; 3 to 4 feet, 50c; 4 to 5 feet, 75c.

GRAPES

A few of the hardiest varieties should at least be planted by every lover of a home. They can be trained alongside of a building or fence, occupying but little space, and be ornamental as well as useful. They do best in a warm, sunny location, where there is good drainage and circulation of air. Plant vines in a slanting position to facilitate covering. Plant in rows 8 feet apart each way. Prune in the fall and cover with earth. Erect trellis for them to run on after the second season, using four plain wires. Prune back the laterals to 2 or 3 buds each fall. This will give plenty of wood for the new fruiting growth to come from.

Hardy Varieties

ALPHA — This is a very hardy black grape of the Beta type, grown by Rev. Katzner, Collegeville, Minn., and introduced by us this season. Planted in a test vineyard alongside of all other hardy sorts it has proven to be the hardiest and most productive. A strong grower; matures early, bunches 7 inches long, compact and of good quality when mature. For the Northwest especially this variety will not disappoint.

POSTPAID — 2-year vines, 75c; 1-year, 50c.

Beta — A perfectly hardy, very early black grape, ripening about September 1st. Should be cut back the same as other varieties in order to keep up the size of the fruit. Its thrift, hardiness and productiveness make it especially valuable for general planting in the Northwest, also for covering arbors or porches. 25c each; \$2.00 per 10; \$15.00 per 100.

***DAKOTA** and ***SUELTER** — Similar to the Beta. Of more vigorous growth, very productive, maturing about a week later. Dakota is sweeter and more compact. 25c each; \$2.00 per 10.

Hungarian — An early ripening sort, without the foxy flavor of the wild grape. Good size, sweet to the taste, compact bunch and vigorous as well as perfectly hardy without covering. Not as thrifty grower as Beta, but more productive and of better quality. 50c each; \$4.00 per 10.

ALPHA

Everything ordered was received in excellent condition and they all were good plants. I thank you for your kind treatment and you shall hear from me again when I want anything in your line. M. I. D., Anoka, Minn. 10-20-15.

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

PRICE OF GRAPES—15c each; \$1.00 per 10; \$8.00 per 100.
Prepaid, 1-year vines at same price.

BLACK VARIETIES

CONCORD—Black. The most popular and common American grape, but rather late for this section.

JANESVILLE—Very hardy black grape; desirable for severe location. Bunch smaller and very compact, fair quality, colors early.

WORDEN—Similar to Concord. Larger and better berry. Ripens several days earlier, very hardy, vigorous, productive.

MOORE'S EARLY—Black, larger berry and better quality than Concord. Standard early grape. Hardy and free from disease.

CAMPBELL'S EARLY—A fine, very large, black grape, combining the good qualities of the Concord and Moore's Early; ripens before the latter and is superior. 20c each; \$1.50 per 10.

McPIKE—If you desire a very large, early, black grape, the McPike will not disappoint; thrifty and productive. 25c each; \$2.00 per 10.

WHITE VARIETIES

DIAMOND—Fine, white, very hardy, ripening a few days after Moore's Early; vigorous and productive, of fine quality.

NIAGARA—A vigorous and very productive white variety. Bunches very large and compact and of fine quality, ripens a few days before Concord.

POCKLINGTON—A late, very productive, large, compact, white sort, very healthy, hardy and of good quality.

RED VARIETIES

DELAWARE—Medium size, red, ripening early; very sweet. Best in quality and brings good price; hardy and productive; requires rich soil.

WYOMING RED—Similar to Delaware, but very early; sweet and spicy; more vigorous and larger; should be given more room and not pruned as close.

BRIGHTON—One of the best early dark red grapes. Good quality and size; vigorous, hardy and productive.

AGAWAM—Red, large berries having a rich aromatic flavor. Ripens with Concord and keeps well into winter. Strong grower and productive.

GOOSEBERRIES

Prepaid mail sizes (1-year plants) at same prices.

They are easily grown and should be more extensively planted. Plant in rows 6 feet and 4 feet in the row. Trim out some of the old wood occasionally and apply manure or mulch to keep in a healthy and vigorous condition.

***CHAMPION**—Hardy, healthy and reliable, red, mild acid, very productive sort. In great demand. Grows like the Houghton, but superior in every way. 20c each; \$1.50 per 10; \$12.50 per 100.

***HOUGHTON**—Light red when ripe. Very hardy, productive and reliable. 15c each; \$1.00 per 10; \$8.00 per 100.

DOWNING—Standard light green sort, larger than Houghton. Vigorous and productive. 20c each; \$1.50 per 10; \$10.00 per 100.

***PEARL**—Similar to the Downing, but generally reported as hardier, larger and free from mildew. Very productive and as a commercial fruit in great demand. 25c each; \$2.00 per 10; \$15.00 per 100.

RED JACKET—The best of all large red varieties. Perfectly hardy; healthy and quite a vigorous grower. Prolific and well worthy of general planting. 25c each; \$2.00 per 10.

***Carrie** IS NEARLY THORNLESS, and the best all around gooseberry introduced to date. Vigorous grower, free from disease, fabulous producer of good size mild-acid, light red berries. Pleases all who give it a trial. 25c each; \$2.00 per 10; \$17.50 per 100.

CURRANTS

Two and 3-year Plants 15c each; \$1.00 per 10; \$8.00 per 100.

One-Year Plants prepaid at same prices.

No fruit will better repay for generous treatment than currants. They do best in rich, cool soils. Mulching and cultivating between is a good plan. Currant worms can be destroyed by spraying with a solution of white hellebore one ounce, to three gallons of water. Spray as soon as they appear.

Perfection—This new variety has so many superior points that it is rightly named Perfection. A bright red, mild acid, very large berry. Prolific and healthy. 25c each; \$2.00 per 10.

DIPLOMA—Extra large, productive, bright red. Awarded gold medal as largest and best. 25c each, \$2.00 per 10.

POMONA—One of the best commercial sorts; very productive, good size and excellent quality. Bright red, ripens early. 20c each; \$1.50 per 10; \$10.00 per 100.

RED CROSS—A vigorous, productive new variety, long clusters of large, bright berries of best quality. 20c each; \$1.50 per 10.

WILDER—An upright, vigorous, early variety. Fruit very large and mild acid, bright red, productive. A choice sort for all purposes.

CHERRY—Very large, vigorous, productive sort, especially when given good culture or on rich soils.

LONDON MARKET—A dark red variety of great merit. Vigorous growth and very productive. Bunches short, but fruit of good size and quality. As good and all-around variety as one could wish for.

LONG BUNCH HOLLAND The best of late red varieties, vigorous and productive, fruit clusters long and of large size.

RED DUTCH—Standard red, vigorous and productive.

VICTORIA—Red, later than Red Dutch, productive, and not so acid.

WHITE GRAPE—Best white variety. Should be more extensively planted, as no variety is sweeter and better for table use.

BLACK NAPLES—The best of its kind, vigorous and productive, fruit good size and quality, fine for jelly; in great demand on some markets.

ALPINE, Improved Crandall and Golden Currants—See page 32

RHUBARB OR PIE PLANT

Deep, rich soil is necessary to secure large stalks; it cannot be too rich. Plant 4 feet apart and so that crowns are about 2 inches below the surface; apply manure in the fall as a mulch and fork it in early in the spring.

LINNAEUS—Early, large, productive and tender; the best of all; not so acid as others; strong roots, 15c each; \$1.00 per 10; \$5.00 per 100. Prepaid, 20c each.

HORSERADISH

Will thrive in any soil and is a useful condiment. Plant 12 inches apart in row alongside of the garden and about 2 inches below the surface. If in digging the crown or some of the smaller roots are left it readily renews itself.

MALINER KREN is much superior to the common variety, as they grow larger, whiter and are of better quality. Strong sets, 10c each; 50c per 10; \$3.00 per 100. Prepaid.

Everything came in fine shape. A. S., Ellsworth, Wis. 4-24-15.

Your stock has always given good satisfaction. Mrs. A. T., Big Lake, Minn. 5-13-15.

Plants received in good shape and all are growing fine. Mrs. A. C. R., August, Wis. 6-20-15.

ASPARAGUS

A bed or row planted along the outer edge of the garden where it will not be disturbed in plowing; will last almost indefinitely with proper care, and give an increasing crop each season. It responds readily to high cultivation, rich soil and good care, but is perfectly hardy and at home on almost any well-drained soil. A rich, sandy loam is best, as this warms up quickly and gives a much earlier crop. Rows should be three feet or more apart, and plants one to two feet in the row. Set them four to six inches deep, covering gradually as growth is made. Apply fertilizer in June and harrow in. An

occasional use of salt will help to keep down the weeds.

CONOVER'S COLOSSAL—A standard commercial variety of large size, tender and excellent quality.

PALMETTO—One of the best all-around varieties. Early, good size and quality.

1-yr. roots (prepaid \$1.00 per 100)...\$0.75 per 100; \$5.00 per 1000

2-yr. roots (prepaid 2c each)..... 1.50 per 100; 7.50 per 1000

3-yr. roots (prepaid 5c each)..... 3.00 per 100; 15.00 per 1000

BLACKBERRIES

PREPAID—1c each extra.

They do best on a sandy loam. When given a reasonable show, they yield very abundantly, and always find a ready sale at good prices. Plant in rows 3 by 8 feet, and give same care as for raspberries, pinching the canes back when two feet high. They should be covered in winter. Cover with earth, bending in the roots.

ANCIENT BRITON—A very popular variety for the North. Hardy, productive and of good size and quality. 30c per 10; \$2.00 per 100; \$17.00 per 1,000.

Eldorado A choice, very hardy variety that is a leader in all sections. Vigorous, prolific and earlier than Ancient Briton. Berries are large, very firm, sweet and have no hard core. 50c per 10; \$3.00 per 100; \$20.00 per 1,000.

MERSEREAU—A very hardy, early sort; strong, healthy grower. Fruit is exceptionally large, firm and of good quality. A new sort that promises well. 50c per 10; \$3.00 per 100.

SNYDER—A very hardy, early variety. Berries are of medium size and good quality. A leader in this section. 30c per 10; \$2.00 per 100; \$17.00 per 1,000.

STONE'S HARDY—An exceptionally hardy, early, vigorous sort. Prolific and of good quality, but fruit is somewhat smaller. 30c per 10; \$1.50 per 100; \$12.00 per 1,000.

LUCRETIA DEWBERRY

A low growing trailing form of the blackberry. Fruit of large size, soft, sweet and luscious; early and productive. Its habit of growth adapts it to the North and makes it easy to protect. During the early part of the season the new growth should be nipped back frequently or else "tipped." Does best on light soils that are not too rich. Too much of the dewberry goes to the growth of new vines, which, if unchecked, cover the fruiting vines so completely as to smother the crop. 30c per 10; \$2.00 per 100.

WE FURNISH 5 AT 10 RATES, 50 AT 100 RATES, AND 500 AT 1,000 RATES.

RASPBERRIES

Succeed well on any good soil. May be planted either in fall or spring; use two plants to the hill. Plant red varieties 3 feet apart in rows 6 feet apart. The blackcap and purple cap varieties should be planted in rows 3 by 8 feet apart. When blackcaps are about 18 inches they should be nipped back so as to cause them to branch. Covering is not usually necessary, but insures a better crop and will repay for the added labor. Our plants are all dug from new plantations, which is of great importance, and are free from root gall, which is becoming such a serious disease in some sections.

RED AND YELLOW VARIETIES

30c per 10; \$2.00 per 100; \$15.00 per 1,000.

PREPAID BY MAIL—1c each extra.

Sunbeam —Hardest raspberry yet introduced. Sent out by Prof. Hansen of the South Dakota Experiment Station, being a cross between the wild raspberry from North Dakota and a purple sort. Vigorous and very productive. Fruit of good size, dark red, rather acid, and of ever-bearing habit. Outyielding all other sorts the same season planted. 50c per 10; \$3.00 per 100; \$20.00 per 1,000.

St. Regis —The wonderful new ever-bearing Raspberry. Very productive same season planted and has a very long fruiting season. Berry firm, good size, brilliant crimson. A grand variety. 50c per 10; \$3.00 per 100; \$20.00 per 1,000.

King —Very hardy, thrifty and productive. Berries are large, bright red, firm and of good quality. The best early variety and one that is giving general satisfaction for home use or market.

***MINNETONKA IRON CLAD**—A very hardy late variety. Berries are large, firm, dark red and of good quality, very productive and thrifty.

MARLBOROUGH—Hardy and productive; early, firm, bright red, large, but not of the best quality. A good market berry.

MILLER—A very firm, bright red, early berry that is in favor in many sections as a commercial sort. Very hardy, thrifty and productive.

LOUDON—Berry firm, large, bright crimson; keeps up in size, hangs on well, and is of good quality; mid-season to late.

SHIPPERS' PRIDE—Very hardy, productive; medium size, late, very firm, of good quality; a fine sort.

Idaho —The largest red variety; of ever-bearing habit, as it has an exceptionally long fruiting season, a new variety of merit that deserves a trial. Canes are very hardy and vigorous. Also called Alton, Iowa and Crimson Beauty. 50c per 10; \$3.00 per 100.

Cuthbert —One of the best market varieties, but needs winter protection. Berry good size and quality; firm, deep red; season medium to late.

GOLDEN QUEEN—Very similar to the Cuthbert, only color is a beautiful yellow. Best of the yellow varieties. 50c per 10; \$3.00 per 100.

EWALD FOLDING BERRY BOXES

The Best Box Made.

Fig. 1

Fig. 2

Fig. 3

The Hallock Standard Dry Measure, holding 67 2-10 cubic inches, is the style offered, which is the legal quart box in Minnesota and Wisconsin. If wine quart (Michigan) box is desired, specify.

All orders for boxes, etc., should be placed as early as possible. Special prices quoted on large orders. Samples mailed free.

PRICES:

Boxes—Quart or Pint (crated).....500 for \$2.75; 1,000 for \$5.00
 Crates—24 quarts (not made up).....15c each; \$10.00 per 100
 Crates—16 quarts (not made up).....10c each; 8.50 per 100
 Crates—24 pints (not made up).....10c each; 8.50 per 100

"CAP" RASPBERRIES

These varieties should receive more attention for home use. They give a pleasing variety and are much preferred by many in flavor when canned. They do not sprout, but grow from the layered ends of branches (tips). The new growth comes from buds among the roots and they should be carefully handled; planted early, shallow and two in a hill for best results. Transplants are tips grown one year longer in the nursery, and where they can be had are superior in every way for planting.

Tips—50c per 10; \$3.00 per 100; \$20.00 per 1,000.

Prepaid, 1c each extra. Transplants, 75c per 10; \$5.00 per 100.

PURPLE

Columbian —A very hardy, purple cap variety; berries are very large, juicy and quite firm. Should be in every fruit garden, as they prolong the berry season often for a month after other varieties have disappeared. They are vigorous growers, hardy and very productive. Even if tops are severely killed they seldom fail a crop, as they will fruit on canes coming up from the base.

CARDINAL—Similar to Columbian in fruit, but canes are harder, more vigorous, not as thorny. Fruit adheres to stem until fully ripe.

Royal Purple —This new purple cap is almost an ideal. Of vigorous growth, very free from thorns; large, firm, good quality fruit which does not stick to the stem. Has a very long fruiting season.

BLACK

Cumberland —The largest black cap raspberry grown. Hardy, vigorous and very productive. A very firm and attractive berry, and is one of the best for commercial purposes.

***OLDER**—A very hardy, medium early and reliable bearer. Fruit large, having very small seeds and of fine quality.

BLACK DIAMOND—Strong, healthy grower; large jet black fruit with few seeds. A new variety of merit. Ripens its wood remarkably well.

***Strawberry-Raspberry** —A beautiful Japanese hardy perennial growing to a height of 18 inches. Suckers freely, and hence should only be planted in permanent locations. Its deep green foliage, with flowers and large bright scarlet berries make it an attractive ornamental. Fruits from July until October. Valuable for canning but not as a fresh fruit. 10c each, 50c per 10; \$3.00 per 100.

*BUFFALO BERRY

A very hardy, drouth-resisting shrub attaining a size of 12 to 15 feet. There are two sexes—the pistillate form only bearing when properly pollenized from the staminate variety, hence they should be mixed when planted. Fruit red, similar to currants, and valuable for jelly. Sets same close to branches and in great abundance. Hangs for a long time; very ornamental and desirable; valuable also for low windbreaks. 6 to 8 feet, \$1.00 each; 5 to 6 feet, 75c each; 4 to 5 feet, 50c each; \$4.50 per 10; 3 to 4 feet, 35c each; \$3.00 per 10; 2 to 3 feet, and prepaid mail size, 25c each; \$2.00 per 10.

*SIBERIAN SAND-THORN

(Hippophae) — A new ornamental, silvery-leaved, thorny hedge plant, closely allied to the Buffalo Berry, 12 feet. Hardy, drouth-resisting, bearing heavy crops of larger yellow berries, which hang on well into the winter. 4 to 5 feet, 50c; 5 to 6 feet, 75c; 6 to 7 feet, \$1.00.

Your nursery stock has always been satisfactory. C. W. H., Backus, Minn., 9-1-15.

"Amateur Fruit Growing"

By Prof. S. B. Green. Prepared for and used as a text-book at the Minnesota School of Agriculture. Just what you need as a guide to successful fruit-growing; 140 pages, well illustrated. Sent postpaid for 50 cents, or in paper covers, 25 cents.

Your raspberry plants were fine and are all growing nicely. J. K., Emerado, N. Dak., 5-17-15.

STRAWBERRIES

ORDER EARLY AND PLANT EARLY in the spring in thoroughly prepared ground in rows $3\frac{1}{2}$ to $4\frac{1}{2}$ feet apart and from $1\frac{1}{2}$ to 2 feet in the row. If shipped and planted early while they are dormant, they have more stored-up vitality. The

weather being cool favors safe transportation and rooting of the plant. Holes may be made with a spade or planting steel by pressing forward and back. It is best to trim plants back to one new leaf; also nip back the roots some. Insert the plant after giving the roots a shake so they will not be in a bunch and set very firmly.

Properly trimmed and planted. blossoms from the everbearing sorts and all from the others the first season, as it weakens the plants. Keep clean and when ground is frozen in fall, apply a light covering of clean straw, corn fodder or marsh hay. This will hold moisture, keep the berries clean, and prevent winter injury.

There are two classes of strawberries, and many fail to raise good crops on this account. The staminate or perfect flowering varieties will bear well by themselves, and as a rule our farmers and others will be better satisfied by planting only such, unless they will observe the difference. Pistillate or those of imperfect blossom, need at least one row of some staminate variety among them every third row as a pollinizer.

If plants appear rather dry when received, do not set at once unless weather is very favorable, but open the bunches and heel them in some shady damp place for a few days. Do not wet the tops and leave them in the bunches, or decay will set in. Plants should be sent by express or mail. We cannot assume the risk or guarantee their safe arrival by freight. Otherwise if we are in any way at fault we cheerfully rectify if reported at once.

A Perfect Flower

Our plants are fresh dug for each order and put up in bunches of 25. They are the best of plants, and with proper care will give the best of results. We guarantee them equal to any "Pedigree" plants on the market.

EVERBEARING STRAWBERRIES

These have leaped into popular favor so quickly that the supply of plants is always sold out early, and no doubt will be for some years to come. Their productiveness is almost beyond belief and one really has to see a bed in bearing to appreciate their virtues. They will yield three times as much the same season planted, (under right management) as the standard sorts do the second. A test patch of one square rod set May 1st (during 90 days from July 23d), produced $74\frac{3}{4}$ quarts. Shippers in the principal markets this season have received from 25c to 40c per quart, but valuing them at 20c would mean \$2,392 per acre. Everbearing strawberries have removed the "chance" entirely from the strawberry business, commercially, and for the home or city garden especially we can not recommend them too highly. For best results in fruiting they should be kept in "hill" system or practically all runners kept off. This is not a difficult task with these as they do not set many runners after they begin producing, and a bed can be kept in good condition for several seasons by working in a little fertilizer about them occasionally.

PRICES OF EVERBEARING STRAWBERRIES

Postpaid, \$1.00 per 25; \$1.75 per 50; \$3.00 per 100.

By express, 500 for \$10.00; \$17.50 per 1,000.

AMERICUS (Per.)—Very hardy, persistent yielder, of good size, finest quality fruit. A good plant maker; makes a great show of fruit, which is borne on upright stems above the foliage. Fruits on runners as well as old plant. At its best on retentive clay soils.

Progressive (Per.)—Fruit and plant resemble Senator Dunlap (it being a cross between Senator Dunlap and Pan American). A great plant maker and as it produces on runners it is an enormous yielder. An ideal, hardy plant and fruit that is generally considered the best of the ever-bearing sorts introduced to date.

Plants Set May 1st; Bearing Since July 25th; Photo Oct. 20th.

SUPERB (Per.)—Strong, healthy grower; seems to succeed everywhere. Berries are large, glossy, round, firm and of good quality. Produces a good crop on old plants the first season and if bloom is kept off in May will produce abundantly the second fall. For large berries plant this.

Autumn (Imp.), Francis (per), Iowa (Per), Productive (Imp) and Pan American (Imp), we can also supply at the same prices.

STANDARD STRAWBERRIES

25c per 25; 75c per 100; \$5.00 per 1,000; 5,000 or more, \$4.50 per 1,000. Postpaid, 25c per 100 extra.

***BEDERWOOD (Per.)**—One of the best for home use and as a pollenizer; early; light red, fine size and quality. A most reliable and productive early sort.

BRANDYWINE (Per.)—A large, late, firm, deep red berry, very popular for a late variety.

CARDINAL (Imp.)—Large, medium season, smooth, bright red, firm berry. Dark flesh and good quality. Ripens evenly and is a very promising new sort.

***CRESCENT (Imp.)**—Early, of medium size, bright red, very prolific, even under neglect. An old, reliable, very hardy variety.

GANDY (Per.)—The most popular and profitable late-market variety. Reliable fruiter, large, dark red, very firm; strong grower and good plant maker.

***LOVETT (Per.)**—A good grower and producer of fruit of good size, color and flavor. An all-around variety that does well on all soils.

NORWOOD (Per.)—Very large, regular, dark red, firm berry having an exceptionally long season. Strong, healthy plant that holds up in size of fruit. A very promising sort.

PRIDE OF MICHIGAN (Per.)—A productive, medium season, firm, glossy red, large berry, giving general satisfaction.

***Sen. Dunlap (Per.)**—One of the best all-around sorts, and without question is the most popular variety ever introduced. Berries medium size, firm dark colored, uniform and very productive. A great plant maker, and great commercial berry.

STEVENS' LATE CHAMPION (Per.)—One of the latest berries to ripen. Thirty, very productive and has good foliage. Fruit bright red, firm and of good uniform size.

***SPLENDID (Per.)**—Vigorous and very productive. Resists drouth well. Fruit firm, good color and quality. Seems to succeed well everywhere.

***SOUTH DAKOTA (Per.)**—A cross of our cultivated sorts with the wild strawberry of Manitoba. Where hardiness is desired, we especially recommend it. Fruit is dark red, medium size, excellent quality, very thrifty and productive.

UNCLE JIM (Per.)—Large, late, mild acid berry, of best quality. Productive and especially valuable for fancy home trade. Sometimes called Dornan.

WM. BELT (Per.)—A very large, bright red, wonderfully productive berry of excellent quality that is a great favorite under good culture.

Warfield (Imp.)—This and the Sen. Dunlap are without question the two most popular commercial berries, and make an excellent pair. Dark red, firm, medium size berries, producing great crops on rich, moist soil and under good culture.

Aroma (Per.), Black Beauty (Imp.), Johnson's Early (Per.), Fendall (Imp.), Glen Mary (Per.), Haverland (Imp.), etc., we can supply at same prices.

*HIGH BUSH CRANBERRY

Very similar in habit and appearance to the Snowball. Hardy, does well generally and is not subject to disease. A choice ornamental and is very beautiful in the fall when covered with its large clusters of red berries. They are acid, valuable for jelly.

1 to 2 feet (or prepaid mail size) 25c; \$2.00 per 10.
2 to 3 feet 35c; \$3.00 per 10; 3 to 4 feet 50c; 4 to 5 feet 75c.

*DWARF JUNE BERRY

Perfectly hardy, very ornamental and fruitful. Fruit resembles the blueberry; borne in attractive clusters, bluish black, blossoms white; fine for canning. Should be in every garden or grounds. 20c each; \$1.50 per 10.

***SUCCESS**—An improvement on the native Dwarf Juneberry. Bush is more upright and it produces regular crops of good sized fruit. Fine for ornamental purposes also. 25c each; \$2.00 per 10.

*BLUEBERRY, CRANBERRY AND WINTERGREEN

These are native low-growing vines or plants. The blueberry especially under cultivation is capable of vast improvement and those interested should get Bulletin No. 334, U. S. Department of Agriculture. We have many calls for them for experimental planting and can supply. Prepaid, 5c each; 30c per 10; \$2.00 per 100.

RUSSIAN MULBERRY

Hardy in this section, but liable to kill back in some places in severe winters, which damage it soon outgrows. Fruit resembles the blackberry, rather insipid. Valuable as bird food and for canning when mixed with other berries, makes good low windbreak and a desirable ornamental.

BULBS FOR FALL PLANTING

Tulips Plant in the fall about four inches below the surface and six inches apart. A covering of leaves and straw will be appreciated. They bloom early, and the great variety and brilliancy of colors make them a universal favorite. We offer an extra fine mixture of Early Single, Early Double, Late Single, Late Double and Parrot (single leaf). Prepaid, 30c per 10; \$2.00 per 100.

Crocus, Snowdrops, Chinodox and Scilla

These early blooming little favorites are hardy and give good satisfaction, even under neglect. Culture the same as tulips, only plant about 2 inches deep. 20c per 10; \$1.50 per 100, prepaid.

Narcissus or Daffodils — Culture is the same as tulips. All are very hardy except the Polyanthus, and are also well adapted to house culture. Some are very sweet scented; double and single; forming many charming combinations of white to pure yellow. Postpaid, 35c per 10; \$2.50 per 100.

Hyacinth — Among all the bulbs used for winter flowers the Hyacinth stands foremost. Plant in a glass filled with water or in pots or boxes in soil. They should be allowed about three weeks to root before forcing into bloom. Single and double blue, red, white, with various shades. Not hardy for outdoor planting in the Northwest. Choice bulbs, Postpaid, 15c each; \$1.00 per 10; \$8.00 per 100.

Enclosed find * * *. Goods arrived promptly and in perfect condition, and in spite of delay in planting all seem to be doing beautifully. I wish to thank you for the extra plants included and will be in the market for more. V. V. H., Duluth, Minn., 6-3-15.

GLADIOLUS

The most attractive and useful of our summer flowering bulbs. Wonderful improvement is being made in them each season and they stand without a peer as our best fall flower for cut flowers or general purposes. They may be planted in succession any time from May 1st up to June with the assurance of blossoming that season. They will do well anywhere except on wet, cold and very heavy soils. Dig in the fall before severe freezing weather and keep in a dry place.

The ease of culture, great variety of colors, succession of bloom and many other points in their favor make the Gladiolus a universal favorite. We list only a few of the best sorts of each color. Prices cheerfully quoted on others or quantity.

AMERICA—Beautiful, large, flesh pink.

PANAMA—Rich rose pink.

PRINCEPS—Immense, dazzling scarlet with white center.

EMPRESS OF INDIA—Rich velvety dark red.

BRENCHLEYENSIS — Best brilliant scarlet.

MRS. F. KING—The best light scarlet.

BARON HULOT or Blue Jay—Rich, violet blue.

PEACE—Immense, pure white with crimson blotch.

AUGUSTA—Pure white with blue anthers.

GOLDEN KING—Large deepyellow with crimson blotch.

70c per 10; \$5.00 per 100, postpaid. Choice mixed 35c per 10; \$2.50 per 100, postpaid.

CANNAS

These most useful and showy garden plants deserve more general planting. They grow very rapidly from dormant bulbs, which should be stored and handled much the same as Dahlias. Their luxuriant foliage and bright coloring give them first place among decorative and bedding plants. Green and bronze foliage; both dwarf and tall sorts, all standard named sorts, 20c each; \$1.50 per 10; postpaid. By express, \$1.25 per 10; \$10.00 per 100. Potted plants, (after May 15th) 20c; \$1.50 per 10; \$12.50 per 100.

DAHLIAS

This well-known fall-blooming plant is deservedly becoming very popular. They are single, double and cactus types, ranging from white to purple and

darkest red. Best results in blooms may be obtained if dormant roots are set out early in May in well-drained, sunny location, and not too rich soil. When plants are of blooming size apply fertilizer as a mulch or in liquid form. Take up in fall and store in cellar same as other root crops, leaving some of the earth adhering to roots. Separate in spring before planting, leaving one good bud with each clump. We can supply the best standard sorts. Mixed sorts, 15c each; \$1.00 for 10. Named sorts (or any color of the various types) 20c each; 10 Varieties, \$1.75; 20 Varieties, \$3.00.

STRANDS HARDY FRUITS FLOWERS AND ORNAMENTALS

PEONIES WE MAKE A SPECIALTY OVER 100 BEST SORTS.

Many of the newer sorts are marvels of beauty and fragrance. They are perfectly hardy even in the far North, and at the very low prices we are now offering them they should be liberally used in all decorative plantings. Plant early in the fall or spring in rich, well-prepared soil, so the crowns are about two inches below the surface.

PINK AND LIGHT ROSE PEONIES

ALEXANDER DUMAS—Brilliant pink, interspersed with white and salmon. Very early and free; fine for cutting.

ALICE—Very choice, full double, fragrant, light pink, falling almost white, very prolific. 20c extra.

Arsine Murat—Light pink, with stamens, very prolific and pretty.

CHARLEMAGNE—Large, full, clear shell pink, late.

Delicatissima—Large, clear, delicate pink, fragrant and very prolific. Most popular of its color.

DORCHESTER—Delicate flesh pink, very double, late and handsome. A gem. 20c extra.

EDULIS SUPERBA—Shell pink, large, fragrant, early.

FLORAL TREASURE—Clear, bright pink, large and fragrant.

HUMEI CARNEA—Large, late flesh pink; double and fragrant.

L'Esperence—Early, fragrant, light pink, strong, free bloomer; a general favorite; one of the best.

LUCIE MAILLARD—Soft violet pink, silvery border, full double, low, compact grower.

MADAM, LEBON—Tall very double, large, bright cherry, late, one of the choicest. 25c extra.

MME. CHAUMY—Bright, soft pink, late, large, free bloomer.

MODEL OF PERFECTION—Free bloomer, fragrant; rosy pink; center finely cut, somewhat variegated; turns to solid light pink.

MRS. DOUGLAS—Pale rose, becoming nearly white.

NE PLUS ULTRA—A bright, pretty pink, fragrant.

PALLAS—A choice large pink, edged white, with tufted center, showing stamens; free bloomer. 25c extra.

SINGLE PEONIES

There is a growing demand for single peonies, and justly so, for many of them are of marvelous beauty. As a cut-flower they do not have the lasting quality, but with the pronounced golden center of stamens and graceful form they are very attractive and deserve a place in every collection.

DEFIANCE—Brilliant crimson, tall, free bloomer, early.

GERTIE WEBSTER—Very large, tall, deep rose.

Miss Morris—The thriftiest, tallest and freest bloomer. Large, dark red. Has long blooming season.

NEPTUNE—A Japanese variety, bright red and of fine form and texture. Foliage of plant is very glossy. 25c extra.

MABLE—Purplish red.

MILLIE—Rosy pink. Free bloomer of good form.

LADY DARMOUTH—Light flesh pink, large, very showy.

QUEEN BESS—A very attractive light pink.

SOPHIE—White. 15c extra.

Mixed Singles—Mostly unnamed pink sorts. We can supply in strong divisions at 20c each; X size at 30c each; XX at 50c each.

WHITE AND YELLOW PEONIES

COURONNE D'OR—Immense, late, snow white with golden stamens and carmine markings in center. 25c extra.

DUCHESS DE NEMOURS—Sulphur white, full center, large outside petals, fragrant and very popular. 20c extra.

DUKE OF WELLINGTON—Creamy white fragrant and prolific.

FESTIVA ALBA—Center almost yellow, but falls white; a low, compact grower, and free bloomer.

Festiva Maxima—Finest early white, very large and fragrant, thrifty and very free bloomer; center petals tipped crimson. 15c extra.

Golden Harvest—Blush outside, yellow center, with tuft marked with red. Very prolific and fragrant; choice. 25c extra.

IRENE—Bright pink outside, fringed yellow center; falls white.

LA TULIP—Very choice, large, late delicate pink, fading to white, center and outside tipped with carmine. 25c extra.

MADAM CROUSSE—The best pure white. Very large, fragrant; tall, strong grower and free bloomer. 25c extra.

MADAM LEMOINE—An early, fragrant, solid, light pink fading to white. Very free bloomer. 15c extra.

MADAM DE VERNEVILLE—Guard petals sulphur white, center delicate rose white, one of the very best. 25c extra.

Queen Victoria—Standard florist sort. Very free bloomer, fragrant. Blush pink, creamy center, falls white.

SADA EVANS—Large, rosy pink, yellow fringed center; fades white. 15c extra.

WHITE FRINGE—Choice semi-double white, center fringed.

RED AND DARK ROSE PEONIES

BERTHA—Large, late, bright red, full double, fragrant, showing stamens. 20c extra.

CARNATION—Bright crimson, fragrant and free, center fringed, fine. 20c extra.

CRIMSON QUEEN—Brightest red, quilled center, fragrant, solid color, a choice sort. 20c extra.

DELACHII—Dark purplish crimson, large, very full, fragrant and free bloomer. One of the best of its color. 10c extra.

EXCELSIOR—Early, dark crimson, with loose tufted center. 10c extra.

Fragrans—Late, rosy red, free bloomer, fragrant, vigorous and prolific. A popular old variety.

FRANCOIS ORTEGAT—Rich purplish crimson, showing stamens. A fine sort. 10c extra.

Grandiflora Rubra—Late, very large, full, blood red; strong, tall grower.

Latipetla Rosa—Very good, large, rose, with creamy center, fragrant, free bloomer.

La Sublime—Very choice. Tall, fragrant, free bloomer, showing some stamens; the best; rich crimson, full double. 25c extra.

LOUIS VAN HOUTTE—Choice, brilliant crimson, free bloomer.

NIGRA—Darkest crimson, large, late, full double. 25c extra.

OFFICINALIS RUBRA—Early, deep crimson, an old favorite.

Potsii—Early dark crimson, with stamens. Semi-double, very free bloomer.

RUBRA SUPERBA—Very large, late, double and fragrant. Bright crimson and one of the very choicest. 25c extra.

RUBRA TRIUMPHANS—Early, very dark, velvety red.

TENUIFOLIA—A fringed leaf form, very early, semi-double; crimson. 25c extra.

HARDY PERENNIALS

20c Each, \$1.50 Per 10

The ease with which this class of plants may be grown and the great variety offered is making them more popular each year. They can be worked in here and there among other ornamentals and produce pleasing effects. Once planted they practically care for themselves and become "a joy forever." Plant all rather deep in fall or early spring. By picking off all blooms, as they fade, most varieties will be much thriftier. They delight in rich soils and appreciate a mulch of manure as soon as the ground freezes. Many sorts, such as phlox, achillea and daisies, should be transplanted or divided every third season to insure thrift.

ACHILLEA PEARL —

Produces a wonderful profusion of double white

flowers throughout entire summer; beautiful and useful particularly for borders or cemetery planting, 2 feet high.

HARDY ASTERS—Hybrids and improved varieties of the New England aster. The last flower of the season to bloom. Named sorts or white, red, and purple shades.

ANTHEMIS (Hardy Marguerite)—Succeed on any soil and produce a bountiful supply of white and yellow aster-like flowers all summer. 15 inches.

BLEEDING HEART (*Dielytra Spectabilis*)—Popular, hardy, ornamental, fine foliage and drooping racemes of heart-shaped flowers, two feet, blooms in May and June. 25c each.

EVER-BLOOMING BLEEDING HEART (*Dielytra Exima*)—A dwarf form of the above, having delicate fern-like foliage and blooming in great profusion the entire season. 25c each.

BOCCONIA (Plume Poppy)—Tall (5 to 6 feet), having odd tropical foliage and spikes of creamy white flowers during July and August. Choice for background, center or variety among shrubbery.

BOLTONIA—Very free blooming, aster-like plant, 4 to 5 feet tall; August to October. One of our showiest perennials. White and pink forms.

Butterfly Bush (*Buddleia*) —

This new shrubby plant blooms freely the same season planted from July until severe frost; attains a height of 4 or 5 ft.; flowers in long tapering panicles, fragrant and of beautiful lilac color, should be cut back in the fall and given a light mulch for best results. Special circular sent on request. They will please you. 25c each; \$2.00 per 10.

CAMPANULA (Bell-flower) *carpatia*—Very free bloomer from June until October. Clear blue, very hardy, compact grower, one foot.

COREOPSIS (*Lanceolata*) — Very popular hardy plant with rich golden yellow, daisy-like blooms from June until frost. Choice for cutting, three feet.

COLUMBINE (*Aquilegia*) — Prolific bloomers and very desirable. Colors range in all shades of white, blue, red and yellow. Season, June; double and single, three feet.

DELPHINUM, or Hardy Larkspur — One of the most attractive and satisfactory of hardy perennials. We have them in both tall and dwarf sorts of white, sky blue and dark blue. Their long spikes of flowers

appear from June until frost if not allowed to seed. 1 to 3 feet.

SWEET WILLIAM (*Dianthus Barbatus*)—This popular old-fashioned flower is one of the choicest of our biennials. They bloom in June, are single and double; in a great variety of colors; very fragrant, and their tall stems and large heads make them excellent for cutting; 3 feet.

HARDY GARDEN or GRASS PINKS (*Dianthus*)—Profuse bloomers of sweet, single and double, clove-scented flowers. May and June; one foot.

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

SHASTA DAISY—Requires some covering to insure wintering or must be transplanted every other season to keep up vitality. The blooms are very graceful, large, double and waxy white, having long stems. They will keep two weeks after being cut and have a long blooming season. One or two feet high.

PRINCESS HENRY DAISY (Chrys. Maximum)—Large white flowers similar to Shasta Daisy, but the plant is of a stockier growth. Season of bloom from June until frost, two or three feet high.

HARDY DAISY (Chrys. lacustrae, latifolium)—This is the hardiest daisy; very thrifty and free bloomer; not as coarse as the Princess Henry or as graceful as the Shasta, but a choice plant for the hardy border or for cut-flower purposes; three feet high.

FUNKIA VARIEGATA (Plantain Lily)—A very hardy form with green and white heart-shaped foliage, lavender, lily-like flowers in August.

F. GRANDIFLORA—A green foliage form having white flowers, sometimes used as a house plant; one foot.

HARDY WOOD FERN.

through, of minute pure white flowers; very graceful and dainty for cutting purposes.

HOLLYHOCKS—This well known biennial is always admired and in demand for its attractive spikes. For planting among shrubbery or as a background it is without an equal.

HIBISCUS, or Mallow—A hardy perennial, much like the latter. Blooms in September; 4 feet. Their immense flowers make them very attractive.

LATHYRUS (Perennial Peas)—While lacking the delicious fragrance of the Sweet Peas, they are equally as beautiful and much earlier. Perfectly hardy, growing 6 to 8 feet tall, white, pink, red and purple.

***Lily of the Valley** —A well known little favorite. Does best in partly shaded locations. Pips 50c per 10; \$3.00 per 100. Clumps 25c each.

LOBELIA (Cardinal Flower)—Very attractive bright red, blooming during August and September on spikes about 2 feet tall. A native plant along streams, but does well under cultivation.

LUPINE—A very attractive native plant (18 inches), having spikes of blue, pea-like flowers in May and June.

LYCHNIS CHALCEDONICA (Rose Campion)—A very hardy plant, free flowering, growing from 2 to 3 feet and having heads of bright scarlet; also a pink variety. July to September.

YELLOW LADY SLIPPER (Cypripedium Pubescens)—Minnesota State flower. These succeed best in partially shaded locations, moist, sandy loam preferable. 25c each.

MOCCASIN FLOWER, or Showy Lady Slipper (Cyp. Spectabile)—A rarer and very beautiful white and pink form of the above. 25c each.

MINT—We often have a call for this plant which is valued for its pleasant aroma. Dark green foliage and small blue flowers. 6 inches.

ORIENTAL POPPY — Brilliant and free bloomers. For gorgeous display no other flowers equal them. Flowers are very large, crimson and the most attractive of all. After blooming in June the plants die back and do not re-appear until September, at which time they transplant most safely. Care should be taken then that they are not cultivated out. They often bloom again in October.

Platycodon (Bell-Flower) — Very easy to grow in any well-drained soil and one of the best hardy flowers. Blue and white bell-shaped flowers from June to October.

Hardy Ferns — There is a growing demand for these native plants to use on the north and east (or shady side) of buildings, etc. We can supply the "Brake," Hardy "Wood" Fern, "Maiden Hair" Fern, and many other native sorts.

GAILLARDIA GRANDIFLORA (Blanket Flower) — A very showy, daisy-like flower that continues one mass of bloom the entire summer. Flower dark reddish-brown; petals vary from scarlet-orange to crimson; 1 to 2 feet.

GYPSOPHILA (Baby's Breath)—Blooms during August and September, forming a mass two feet or more

HARDY PERENNIALS

20c Each, \$1.50 Per 10

Our Collections Will Please You

TRY THEM

HARDY FLOWERS	10	VARIETIES	\$1.50
	25	VARIETIES	 3.00
SMALL PLANTS POSTPAID AT SAME PRICES	50	VARIETIES	 5.00

PYRETHRUM HYBRIDUM—Single and double daisy-like flowers that are very graceful and pretty. These are mixed shades of white, red and pink, and are splendid as cut flowers. Just in time for Decoration Day. 2 to 3 feet high.

PYRETHRUM ULIGNOSUM (Giant Daisy)—Grows 4 to 5 feet high and is a very free bloomer during August and September. Large, pure white flowers with yellow center.

RIBBON GRASS—Striped blades of green and cream color, 2 feet; fine for borders and variety. 15c each; \$1.00 per 10.

Rudbeckia (Golden Glow)—Well worthy of a place in every garden. Makes a plant about six feet tall. Flowers yellow, large, aster-like, produced in great profusion during August and September. Valuable for use in the background with other flowers or for a quick growing screen.

STRAWBERRY-RASPBERRY—See page 17.

SEDUM—A low-growing, mossy or pulpy-leaved plant, much in use in cemetery borders or rockery work. Called also Stone Crop and Golden Moss. We have three dwarf varieties—yellow, white and purple flowers; also three taller forms. One, the Brilliant (25c each), grows about 15 inches high and has very attractive heads of red flowers.

Spiraea Japonica (Goat's Beard)—Elegant border plants with feathery plumes of white flowers and neat, attractive foliage; well adapted to moist, half-shaded location.

YUCCA (Adam's Needle, or Spanish Bayonet)—Foliage remains green the year round, and it is of a cactus nature; four feet. Flowers during July on a tall spike. Very ornamental and desirable. There are two varieties. Glauca is somewhat harder than Filamentosa. 25c each.

PERENNIAL PHLOX

A general favorite because of the great range of colors, perfect hardiness and ease of culture. Gives a succession of bloom from July until severe frost, if some of the shoots are pinched back. Divide the clumps every third year and enrich the soil for best results. They like plenty of moisture and do well in partial shade. Very effective in shrubbery plantings. White, pink, red and variegated in both dwarf and tall. We have a large list of named sorts, following being the best all-round varieties of each color. 20c each; \$1.50 per 10; \$12.00 per 100. 7 varieties, postpaid, \$1.00.

MIXED OR UNNAMED SORTS—15c each; \$1.00 per 10; \$8.00 per 100.

WHITE

MISS LINGARD—Very early, free flowering, long spike.

FRAU A. BUCHNER—Dwarf, medium early, very large truss and flower.

VON LASSBURG—Vigorous, pure white and very large.

REDS.

SIEBOLD—Brilliant scarlet, strong grower, of good form and foliage.

G. A. STROHLEIN—Large, bright scarlet, with crimson eye.

PINK AND VARIEGATED.

ELIZABETH CAMPBELL—Bright, salmon pink. A very handsome, large, newer sort.

W. C. EGAN—Pleasing, soft pink, with carmine eye.

PANTHEON—Tall, bright, carmine-rose.

RICHARD WALLACE—Tall, white, with maroon eye.

VON HOCHBERG—A very rich crimson-purple.

DIVARICATA CANADENSIS—One of our native species. (the wild Sweet William), which is worthy of extensive planting, commencing to bloom early in May. Large, fragrant, lavender flowers, 10 inches high.

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

PHLOX SUBULATA OR MOSS PINKS

ALBA—A pure white form. These bloom in May and form a mossy carpet over the ground, appearing like a mass of snow when in bloom. A fine border or cemetery plant.

AMOENA—Similar to above, only foliage is darker and blooms are rosy pink.

IRIS

This is among the most desirable and easiest grown of our hardy plants, producing in May and June their showy flowers of exquisite coloring, combining the richest and most delicate tints. For best results plant in a well-drained, sunny position barely covering the roots. Avoid fresh manure in planting. We have a great variety in Siberian, Japanese, German, Pumila and Alpine. They range in height from 6 inches to over 3 feet, and have a blooming season of nearly two months. There are all shades of white, yellow, bronze, rose and blue. We have 50 other choice sorts besides the following:

15c each. Set of 10 for \$1.25; 20 for \$2.25, postpaid.

German Iris **ALCEST**—Golden yellow, veined bronze.

AUGUSTINE—Rich yellow, heavily veined with reddish brown.

BLUE BIRD—Early, indigo blue.

BRONZE—Light yellow, veined and tinged with red.

CELESTE—Pale lavender, fragrant, fine.

DONNA MARIA—Lavender and purple falls.

DELICATA—Canary yellow, veined purple, very fragrant.

FLORENTINE—Early white, fragrant, tinged lavender.

HONORABILIS, or **SANS SOUCI**—Orange yellow, lower petals brown.

IGNITA—Solid color, deep lavender, shaded lighter.

L'AVENIR—Pure light blue, very good.

LUCRETIUS—Royal purple veined white, white center.

MADAM CHEREAU—Choice, tall, white, edged lavender.

OTHELLO, or **SAPPHO**—Velvety purple, standards lighter. Very good.

PALCATA—Lavender, heavily veined red and edged lighter.

Siberian Blue—Tall, late, thrifty, purple, very hardy, free bloomer. Long, grassy foliage.

***SIBERIAN WHITE**—Pure white, of medium size, very free bloomer, on tall spikes. Foliage and growth less sturdy than the blue form.

***SNOW QUEEN**—Large, ivory-white flowers. Very thrifty and a rare variety of merit. 20c each.

Aurea—Large, pure golden yellow. A Himalayan species. Blooms late. 2 feet. 25c each. Postpaid.

Pumila and **ALPINE HYBRIDS**—These are dwarf (6 to 12 inches), early blooming Iris, having flowers about as large as the German type; especially desirable for border planting. Five varieties. Postpaid. 20c each.

Japanese Iris are tall, late bloomers, of immense size and the most gorgeous coloring. For best results they should receive some protection during the winter and transplanted every second season. Postpaid, 25c each.

HEMEROCALLIS

These are not true lilies, but have lily-like flowers and very ornamental, grassy foliage. Very hardy, free bloomers and fine for cut flowers. 20c each. Set of 6 for \$1.00.

Graminea—Choice early yellow dwarf variety. 18 inches. Usually in full bloom for Decoration Day.

Dumorteri—Dwarf and early blooming variety of rich yellow; exterior is a bronzy orange. Two feet.

Flava—Lemon Lily—A fragrant, profuse bloomer of a handsome lemon yellow. Three feet. Blooms during July.

Thunbergii—A new, sweet-scented yellow, late blooming variety. Blooms in July. Three feet.

Fulva—The tall, old-fashioned orange day lily. Blooms during July and August. Four feet.

Kwanso—A double flowering form of the above. Four feet.

STRANDS HARDY FRUITS FLOWERS AND ORNAMENTALS

LILIES

Prepaid, 20c each; set of 6 for \$1.00.

Plant deep from 6 to 8 inches, in well-drained soil, sandy loam preferred. Best to plant in October, but may be planted in early spring. Do very well when planted near shrubbery and give pleasing variety.

***ELEGANS**—Very hardy, blooms the last of June. Flowers are large and attractive; bright red; borne in upright clusters. Also an earlier, tawny form. (UMBEL).

***MEADOW LILY** (Canadense)—A native form which bears a profusion of drooping bell-shaped red flowers. Also a Siberian form (TENUIFOLIA or CORAL LILY).

***BLACKBERRY LILY** (Par Sinensis)—A hardy, odd form, having orange-colored flowers, followed by berries which resemble a blackberry. Foliage like the Iris.

AURATIUM—Mammoth, fragrant, pure white flowers, studded with crimson spots and having a golden band in center of each petal.

SPECIOSUM ROSEUM—White flowers shaded with deep rose color and red spots. Not fragrant, but quite hardy and very beautiful. Also a pure white form (ALBA).

***TIGER LILY** (Double and Single)—Bears large clusters of orange-red flowers, spotted with black; both are very desirable and succeed well everywhere. 15c each; \$1.00 per 10.

CANDIDUM, or Madonna Lily—Pure white, large, fragrant sort; is of easy culture, but should be planted in August or September for best results.

ROSES

do best in rich, well-drained soils and sunny location. The varieties offered are the hardest and most desirable of the various colors for the North. Most of them should be laid down and covered with earth before the ground freezes in the fall. Or, if too large for this, wrap with hay, etc., or bend to the ground as far as possible and cover with leaves, etc., placing boards over them to keep in place or an A-shaped trough. Always bend a plant in the roots as much as possible. By setting a plant in a slanting position when planted and removing the earth on that side when covering will make this much easier. Do not uncover too early in the spring. The perpetual bloomers will bloom finer if cut back to about a foot from the ground in the fall, covering by mounding with earth and manure. They should also be watered well occasionally during a dry spell. We aim to sell, as far as possible, only the hardest sorts on their own roots. Budded roses are often a great disappointment owing to the seedling crowding out the true variety. All roses should be cut back some when planted. The Hybrid Perpetual especially should be cut back to about 6 inches from the ground.

Strong 2 Yr. Plants, 35c each; \$3.00 per 100.

Postpaid, 5c each extra.

Baby Ramblers **CRIMSON**—Best all-round rose ever introduced. A dwarf Crimson Rambler. Blooms in clusters from June until frost. Valuable also as a pot plant.

PINK BABY RAMBLER, or Anna Muller—Similar to and a splendid companion for the above; bright pink; very free bloomer.

WHITE BABY RAMBLER, or Katherine Ziemet—A white, free blooming sort; very pretty with its golden stamens.

Whenever I want more goods in your line I will place my order with you, as I always appreciate a square deal. A. O. P., Litchfield, Minn., 3-18-15.

Enclosed find order. We like your trees and plants very well. Everything grows that comes from your nursery. L. K., Rustad, Minn., 5-10-15.

HYBRID PERPETUAL ROSES

Strong two-year plants, 35c each; \$3.00 per 10. Postpaid 5c each, extra.

FRAU KARL DRUSCHKI—The best pure white perpetual bloomer, a vigorous grower and bloomer.

MARGARET DICKSON—Creamy white, large, free bloomer, very thrifty.

PAUL NEYRON—Deep pink, very double, fragrant, blooms all summer; flowers are the largest of any variety.

MAGNA CHARTA—Pink, suffused carmine. A choice and vigorous growing variety.

CLIO—A very fine, large, flesh pink variety. Vigorous, healthy and free bloomer.

MRS. JOHN LAING—Clear, soft pink, very large, full and finely shaped; fragrant and a free bloomer.

BARON DE BONSTETTEN—Velvety blackish crimson; very large, double, fragrant flowers; a strong grower.

PRINCE CAMILLE DE ROHAN—A magnificent, free blooming, dark maroon-crimson.

MARSHALL P. WILDER—Dark red; large, perfect flowers. Very free bloomer. One of the best.

GENERAL JACQUEMINOT—Dark crimson, double, fragrant. Very popular and desirable.

GRUSS AN TEPLITZ—The best rich crimson; very persistent bloomer; strong grower and very fragrant.

ULRICH BRUNNER—A large, cherry-red variety of fine form and great substance. Vigorous and healthy.

CLIMBING ROSES

CRIMSON RAMBLER—Very vigorous grower. Produces its flowers in pyramidal clusters of large numbers. Remains in bloom for a long time. The profusion of bloom is marvelous, and the variety deserves the popularity and praise it receives.

BLUE RAMBLER—Violet blue, semi-double, prolific bloomer, good trusses that have an outstanding effect. Distinct and good.

DOROTHY PERKINS—A shell-pink variety of similar habit to the Crimson Rambler. Very vigorous, and a great bloomer. The best of its color.

Excelsa —A Red Dorothy Perkins, lovely crimson-scarlet. very vigorous, good foliage, large trusses of evenly formed flowers of great substance, resistant to mildew. The best hardy climbing rose sent out in years, and one that will supersede the Crimson Rambler. 40c each.

BALTIMORE BELLE—One of the best climbing roses. Very free bloomer; nearly white or pale blush.

QUEEN OF THE PRAIRIE—Bright red, vigorous grower and profuse bloomer. Very popular and hardy.

Tree Roses These are grafted on hardy rose stalks about 3 feet high and are very ornamental. They bloom freely the same season they are planted. By wrapping thoroughly they can be wintered where they stand or lifted with a ball of earth and placed in a cool cellar. We offer only the best blooming red, white and pink Hybrid Perpetuals and Baby or Crimson Rambler. \$1.00.

10 ROSES — Our Selection — \$2.50

MOSS AND JUNE ROSES

2-Year-Plants 35c each; \$3.00 per 10. Postpaid 5c each extra.

CRESTED MOSS—Deep pink, very hardy and a free bloomer. Buds are deeply mossed and very beautiful.

SALET MOSS—Light rose, profuse bloomer. One of hardiest and best of its class.

RED VELVET—The best hardy, dark red June rose; vigorous grower, fragrant and prolific.

BLACK DAMASK—A stronger grower than above; profuse bloomer, fragrant, velvety maroon.

CABBAGE—Large, full double, bright pink. Fragrant, free bloomer, vigorous and quite hardy.

MADAM PLANTIER—Pure white, very free bloomer. Nearly thornless, very hardy and vigorous. Sure to please.

PERSIAN YELLOW—Seldom injured if not covered. Flowers double and a free bloomer. Finest hardy yellow rose.

HARRISON'S YELLOW—A free bloomer than the Persian, but not as double. Light yellow.

SWEET BRIER (Eglantine)—Very strong grower, single pink flowers and very fragrant foliage. We also can supply several new hybrids that retain the same fragrance, in various colors.

***Japanese or Rugosa Rubra (Red)**—Perfectly hardy without covering.

Foliage is of a glossy, dark green, heavy and wrinkled; very odd and ornamental. Flowers are large, single, fragrant and produced in abundance until frost, followed by large scarlet fruits. A good hedge rose. (See cut above). 3-year, stocky, 50c each; 2-year 35c; \$3.00 per 10; \$20.00 per 100.

***RUGOSA ALBA (White)**—Same as above, only flowers are pure white.

AGNES EMILY CARMEN—Deep scarlet red, semi-double, extra good.

***ATROPURPUREA**—Deep blackish-crimson in the bud, opening to maroon-crimson, flowers produced in large bunches and in great profusion, extra fine, 50c each.

***BELLE POITEVINE**—Deep rose-pink with purplish cast, hardy and vigorous grower.

***BLANC DE COUBERT**—Pure white, semi-double, very pretty and one of the best and hardiest.

CHEDANE-GUINOISSEAU—Large flowers, very double and large, clear La France pink; an excellent rose. 50c.

CONRAD F. MEYER—An extra fine sort that has large, double, silvery pink blooms, which appear singly and freely throughout the season. Very vigorous and quite hardy.

***HANSA**—Double red, large flowers, very free bloomer; hardy.

***KAMCHATKA**—Perfectly hardy, very vigorous and a very free bloomer in June. Dark red and fragrant. Not a true Rugosa, as foliage is small like our native. For a hedge 5 or 6 feet high it is the best rose we offer. As it sprouts freely, it soon becomes impenetrable and makes a clean, beautiful, upright hedge.

MAGNIFICA—Dark blood red, very floriferous, extra good. 50c.

NEW CENTURY—Flowers are large, fragrant, double and bloom in clusters continuously through the summer. Deep red centers shading to pink outside.

NOVA ZEMBLA—Very vigorous grower and free bloomer. Large, ideal white flowers with pleasing blush of pink. 50c.

ROSERAI DE L'HAY—New, deep red, double, very sweet scented. Thrifty, profuse bloomer. A choice variety of merit. 50c.

SIR THOMAS LIPTON—A choice pure white, double, strong grower, quite hardy; producing large, fragrant blooms from June until frost.

CLIMBING VINES

25c each; \$2.00 per 10. Postpaid 5c extra.

3-year vines 35c; \$3.00 per 10.

***VIRGINIA CREEPER**, or American Ivy—Hardy native, vigorous grower; one of the best for covering porches, walls of unsightly spots; foliage colors very brilliantly in fall; purple berries.

***Ampelopsis Engelman** Similar to above, only clings to stone, etc., with great tenacity. A rapid grower and hardy. The best all-round hardy vine.

***BETA GRAPE**—(See page 12). Fine for porch or arbor.

***WILD GRAPE**—Desirable for screens, arbors, etc. They are rapid growers and very hardy in any location. Fruit valuable for wine or jelly.

***BITTER SWEET**—A strong-growing native vine of twining habit. Very attractive when covered with its orange colored seed pods, which open late in the fall, exposing the dark red berries.

CHINESE MATRIMONY VINE—A rapid-growing, trailing shrub, having small lavender flowers throughout the summer, followed by crimson berries.

***VIRGIN'S BOWER**—A beautiful native clematis; hardy and strong grower. Flowers white, small, followed by downy seed clusters.

CLEMATIS JACKMANII—A very popular and desirable variety. Flowers rich, royal purple; produced in great abundance; needs winter protection; best of the large flowered varieties. 40c each.

CLEMATIS PANICULTA—A very hardy, vigorous white clematis. The large clusters remain in bloom for a long time; fairly cover the entire plant and are very fragrant.

DUTCH PIPE (*Aristolochia Sipho*)—A hardy, strong growing vine, with large, peculiar heart-shaped leaves. Curious pipe-shaped flowers of yellowish brown. Large 3-year vines, 50c each; 2-year, 35c.

Honeysuckle Scarlet Trumpet—Produces a constant supply of red trumpet-shaped flowers throughout the entire summer; very desirable. A strong and rapid grower; quite hardy, but will do enough better to warrant winter protection.

LATHYRUS (Hardy Pea)—See page 25.

Bignonia, Clematis Cocinea, Henryii and Madam E. Andre, Golden and Hall's Honeysuckle and Wistaria we also carry in stock.

HARDY SHRUBS

25c each; \$2.00 per 10; \$17.00 per 100. One-year plants prepaid at same price. Three-year stocky plants, 35c; \$3.00 per 10; four-year, 50c.

Acacia or Moss Locust—A hardy bush form of the locust having bright pink flowers like clusters of sweet peas, 4 to 6 feet; fine.

AILANTHUS, or Tree of Heaven—A stocky, semi-hardy tree having very long fern-like leaves. Even if cut to the ground each season its tropical growth well repays for planting it. 3 to 5 feet, 35c each.

ARALIA, or Devil's Walking Stick—A moderately hardy, very attractive shrub with stocky, prickly stems and large sumach-like leaves, immense panicles of white flowers during August. 50c each.

***RUSSIAN ARTEMESIA**—A vigorous, aromatic, hardy shrub similar to the plant called the "Old Man." Desirable as an ornamental or for a quick growing low hedge. For best results should be cut back to the ground early in fall or spring. 6 feet. Cuttings 50c per 100; \$3.00 per 1,000. (Other sizes at above prices).

FLOWERING ALMOND—Double white or pink, rose-like flowers, borne in great profusion before the foliage. One of the best early-flowering shrubs. 4 feet.

Barberry (Japanese or Thunberg)—A dwarf variety, with fine foliage. Very pretty and useful for borders and in front of taller shrubs; one of the very best hardy dwarf hedge plants; 2 to 3 feet. For hedge planting we offer a grade of 12-in. transplants, 15c each; \$10.00 per 100; larger sizes at regular prices.

BARBERRY (Purple Leaf)—Very pretty purple foliage; desirable for massing with other shrubs for effect. Clusters of red fruit like currants, which remain on until along in the winter; yellow blossoms. 6 feet.

BARBERRY (Common)—Same as above, with green foliage. Desirable for hedges or otherwise.

***BUFFALO BERRY**—See page 17.

***BUCKHORN**—See page 43.

BUTTERFLY BUSH, or Buddleya—See page 24.

Caragana or Siberian Pea Tree—See page 44.

FLOWERING CRABS—See page 8.

***HIGH BUSH CRANBERRY**—See page 20.

Kentucky Coffee Tree See page 44.

CALYCANTHUS—Fragrant, moderately hardy shrub; unique, brown flowers.

***COTONEASTER ACUTIFOLA**—Hardy, very ornamental shrub, having thick, glossy foliage; small pink flowers and black fruit. A choice newer shrub for landscape or hedge planting. 6 feet.

***ALPINE CURRANT**—An ideal dwarf, compact, clean hedge or border plant. Takes on a fine form with very little shearing; very hardy and free from disease. 3 feet.

Golden Currant or Yellow Flowering Missouri Currant. A pleasing old favorite, blooming freely in May and June; very fragrant and a choice ornamental. 6 feet.

***CRANDALL CURRANT**—An improved or more fruitful form of the above. Large purple fruit, fine for jelly. 5 feet.

INDIAN CURRANT, Coralberry or Red-Fruited Snowberry—Hardy, graceful native that makes a good low hedge or ornamental; fruit red, hangs on all winter. 5 feet.

Dogwood Red Barked Siberian—The best red-barked shrub we have. Valuable for hedges, or to liven up groups of other ornamentals. White flowers. 8 feet. Cuttings, \$1.00 per 100; 1 to 2 feet, \$10.00 per 100. (Other sizes at above prices).

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

***Dogwood, Variegated Leaved Red**—This is a slow-growing form of the above and is the best silvery and green-leaved shrub we have. At its best in sunny locations. 4 feet.

DOGWOOD, Stoloniferae—Our native red-barked Dogwood; not as rapid a grower as the Siberian. 6 feet.

DEUTZIA—*Crenata* and *Gracilis* are the hardiest varieties. Pretty, small (3 feet) shrubs with racemes of white flowers; moderately hardy.

Golden Elder Our finest golden-leaved shrub. Very valuable for effect in groups. Best in sunny location. Flowers white, in July (followed by black berries, which are prized by many for pies, wine, etc. (Height 6 feet at maturity.)

***CUT-LEAF ELDER (American)**—A new, very graceful, cut-leaf variety that is perfectly hardy; very ornamental as shrub or hedge. 8 feet.

***RED ELDER**—A very hardy native; blooms earlier than the above sorts and very attractive later when covered with its loads of bright red berries. 8 feet.

Euonymus Burning Bush, or Strawberry Tree—Hardy, pretty shrubs. Flowers of reddish-brown followed by red fruits like the bitter sweet, which hang on all winter. 6 feet. We have both the native and European (*Mackii*) forms. The *Mackii* is more productive and showy, but not as hardy as our native form.

FORSYTHIA (Golden Bell)—A moderately hardy, graceful, very attractive, early-flowering shrub. Golden yellow flowers borne in great profusion before the foliage. 6 feet.

***FRINGE, WHITE**—A perfectly hardy, novel shrub having bunches of white, silky fringe, which hang very gracefully among the foliage during June.

FRINGE, PURPLE—Quite hardy when once established; glossy, round foliage. Flowers are purple maturing into large, mist-like plumes (hence the name Smoke Tree).

Hydrangea (Paniculata)—A perfectly hardy shrub, producing an abundance of immense clusters of bloom in August. Should have a place in all home grounds. Blossom same season they are planted. If they are cut back nearly to the ground each spring larger and finer clusters will be obtained. 4 to 6 feet. 3 to 4 feet size, 50c; 2 to 3 feet size, 35c; 1 to 2 feet size, 25c. **TREE FORM**, 75c each.

Snowball Hydrangea

or Every-blooming Hydrangea (*Arborescens*)—A new form of the above that is very hardy and one of the most popular of all. Blooms are large, snow white and resemble the snowball. Season July and August. A choice addition that we cannot commend too highly.

The trees received last fall came in good condition. H. S., South Bend, Wash., 4-2-15.

I admire your carefulness in the way you put up your trees. N. A. T., St. Paul, Minn., 4-20-15.

50 Hardy Shrubs and Vines, \$5.00

HARDY FRUITS FLOWERS AND ORNAMENTALS

HARDY SHRUBS

10 varieties	\$1.50
25 varieties	3.00
50 varieties	5.00

Our Selection.

25c each; \$2.00 per 10; \$17.00 per 100. Three-year stocky plants, 35c; Four-year, 50c each.

Honeysuckle Very hardy, strong growing and attractive shrubs which bear a profusion of bloom in early spring, followed by bright orange or red berries. Fine also as a hedge plant. One of our best hardy ornamentals. 6 to 8 feet.

TARTARIAN—White, pink or red.

MORROW—Japanese variety of drooping growth; creamy white flowers and very attractive bright red fruits.

SPLENDENS or **GOLDEN BERRY**—Strong, upright grower, bright striped pink flowers; golden yellow berries.

RUPRECHT—Tall, pink. Very fruitful and pretty during autumn months when covered with its crimson berries.

Double Flowering Plum (*Prunus Triloba*)—The best beautiful, large, double, rosy pink flowers, closely set on the branches, coming with the foliage. 8 feet. 2 to 3 feet, 35c; 3 to 4 feet, 50c; 4 to 5 feet, 75c.

PURPLE LEAF PLUM (*P. Pissardi*)—One of the most striking of foliage plants. Often kills back, but being a rapid grower its new growth is especially desirable and attractive. 3 to 4 feet, 40c each.

Purple Leaf Sand Cherry (See page 13). A hybrid of the above and western sand cherry. Has the same attractive color, is perfectly hardy, and the best colored foliage shrub for the northwest. 2-year, 35c; 3-year, 50c.

JAPAN QUINCE—A dwarf, quite hardy, very showy shrub, having bright red flowers early in May. A good hedge plant for favorable locations.

Snowball (*Vib. Sterilis*)—This well-known favorite is perfectly hardy. Filled with a mass of white balls of blooms during May. 8 to 10 feet.

***SNOWBERRY**—A hardy shrub, having small pink flowers, followed by waxy-white berries which remain for some time after leaves have fallen. 4 feet.

Cut-Leaf Sumach (*Glabra*)—dwarf form of the sumach that is very hardy and handsome especially in fall, when its fern-like foliage turns a vivid red. 5 feet.

***STAGHORN SUMACH**—A large, hardy shrub or small tree. Very pretty in fall and winter, as foliage colors highly, and its large panicles of red fruit hang on all winter. 15 feet. (Also a Cut-leaf form.)

***SIBERIAN SAND THORN** (*Hippophae*)—A new ornamental, silvery-leaved, thorny hedge plant, closely allied to the Buffalo Berry. 12 feet. Hardy, drought-resisting, bearing heavy crops of yellow berries, which hang on well into the winter. 4 to 5 feet, 50c; 5 to 6 feet, 75c; 6 to 7 feet, \$1.00.

TAMARIX AMURENSIS—A choice, graceful shrub; top often kills back but that does not injure its usefulness, as it is a very rapid grower and for best results should be cut back to ground each season; fine, cedar-like foliage, pink flowers. 7 feet.

Trees and plants arrived in good order. Everything seems in fine condition and I am much pleased with the size and vigorous appearance. E. B., Grand Rapids, Minn., 4-28-15.

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

***VIBURNUM LENTAGO**, Black-Haw or Sheepberry—A hardy and very desirable native shrub having blooms similar to the High Bush Cranberry. Fruit dark blue, sweet, edible; borne in large drooping clusters. Foliage colors brilliantly in autumn. 8 feet.

VIBURNUM DENTATUM, or Arrow-wood—A native shrub having clusters of white flowers in June, followed by flat, black berries. In demand for plantings in moist locations. 6 to 8 feet.

Viburnum Latana or Wayfaring Tree—Like the Haw it blooms in large, flat heads and is very showy at that time as well as later, when laden with its crop of red berries, turning to black when ripe. Foliage rough and silvery beneath. A fine ornamental. 8 to 10 feet.

Weigela, Eva Rathke The most desirable shrub of its season and class. Dark red, trumpet-shaped, thrifty, prolific bloomers. June and July. 4 feet.

WEIGELA, Rosea—Similar to above and very popular. Rosy pink.

***WINTER BERRY** (*Ilex Verticillatus*)—Foliage like the English holly; flowers in May and June, and in fall is covered with scarlet berries which remain after the foliage falls; a hardy native shrub; 6 feet.

SPIREA

***Van Houtti** One of the most attractive and graceful hardy shrubs we have; sure to please. Produces an abundance of drooping sprays of white flowers early in June. Sometimes called "Bridal Wreath." (Five feet at maturity.)

***ARGUTA**—Of more slender growth, earlier to bloom and clusters not as compact as the above. 4 to 5 feet.

REVESII—A newer double flowering form of the Van Houtti. Blooms about same time. 4 feet.

THUNBERG'S—The earliest to bloom. Similar to the Arguta. Its fine foliage makes it a very charming hedge plant or ornamental. 3 to 4 feet.

PRUNIFOLIA or **BRIDAL WREATH**—A choice double white sort. Blooms just before the Van Houtti. 4 feet.

***NINEBARK** or **OPULIFOLIA**—A strong growing native shrub. Blooms in clusters of white. June. 8 feet.

***Golden or Op. Aurea** A variety of the latter. One of our best golden foliage shrubs. At its best in sunny places. 8 feet.

***Anthony Waterer** A dwarf form, hardy and vigorous. Blooms throughout summer in flat terminal clusters of rose red color. Very popular for low borders. 2 feet.

CALLOSA ALBA—Similar to the latter, only very dwarf, compact grower and has white bloom, 1½ feet.

BILLARDI—Flowers in terminal, rose colored spikes from July until frost. Vigorous and hardy. 5 to 6 feet.

***MEADOW SWEET** or **BILLARDI ALBA**—Same as the above, only it has white blooms. 5 to 6 feet.

DOUGLAS—Similar to Billardi, but has very downy foliage and is not as vigorous. 4 to 5 feet.

***Ash-Leaved Sorbifolia** A very distinct variety, having light, fern-like foliage; handsome spikes of white flowers in July and August. Hardy and thrifty. 5 feet.

LILACS OR SYRINGA

One of the very best of our hardy ornamentals, in which a great improvement is being made each year. Most people know only the common white and purple sorts, which sprout badly (when neglected) and are shy bloomers. These newer sorts are mostly grafted on ash roots, and hence seldom sprout, and are perfectly hardy, even in severe locations. For best results the seed clusters should be removed immediately after blooming, in order to insure a good crop of flowers each season. Suckering sorts should be gone over occasionally with a sharp hoe and mowed off at the surface. We have 25 distinct varieties in stock in either bush or tree form.

1 to 2 feet.....35c each; \$3.00 per 10
2 to 3 feet.....50c each; 4.00 per 10
3 to 4 feet.....75c each; 6.00 per 10

TREE FORM—15c extra.

WHITE

COMMON WHITE—Well known favorite. 1 to 2 feet, 20c; 2 to 3 feet, 30c; 3 to 4 feet, 50c; 4 to 6 feet (stocky) \$1.00.

PERSIAN, ROUEN or SIBERIAN WHITE—Small foliage and lavender white flowers in great profusion. Thrifty grower and quite distinct from ordinary sorts.

PRINCESS ALEXANDRA—Finest single, pure white, immense panicles.

MADAM CASIMIR PERIER—Very large flowers and truss; fragrant. The best double white lilac.

JAPANESE TREE—Blooms in June (month later than most sorts), in very large, creamy white panicles; makes a tree much like a cherry.

PURPLE, BLUE AND RED

COMMON PURPLE—Very free blooming strain. Especially valuable for hedges, screens, etc. 1 to 2 feet, 20c; 2 to 3 feet, 30c; 3 to 4 feet, 50c.

PERSIAN PURPLE—Small foliage and bright purple flower. Blooms are very long, graceful and fragrant.

ROUEN or ROTHMAGENSIS—Similar to Persian only flowers are reddish purple.

CHAS. X.—Fine, reddish purple. Strong, stocky grower, single. Very free blooming.

CONGO—Very large, single, wine-red. Choice.

LUDWIG SPAETH—Single, deep purplish red. Choice.

MARC MICHAELI—Double, clear lilac-blue; enormous flowers and spikes.

LAMARCK—Very large, double, rosy-lilac.

EDWARD ANDRE—Clear, double rose.

PRES. LOUBET—The darkest, double purplish-red. Extra long, large blooms.

PRES'T GREVVY—Double, extra large, sky-blue.

SEN. VOLLAND—Double, rose red.

BELLE DE NANCY—Double, brilliant satin rose.

HUNGARIAN, or JOSIKEA—Very distinct class of lilacs, having dark, heavy foliage, of stocky growth. Blooms very late with the Japanese and in open purple panicles. A fine sort.

VILLOSA—Is similar to the above, only flowers are a light pink. Very choice.

10 LILACS OUR SELECTION 2 to 3 feet. \$3.50

HARDY SHRUBS

(Our Selection)

10 varieties	\$1.50
25 varieties	3.00
50 varieties	5.00

25c each; \$2.00 per 10; \$17.00 per 100. Three-year stocky plants, 35c. Four-year, 50c each.

Mock Orange—Philadelphus

***GARLAND (P. Coronarius)**—One of our best large shrubs, producing a profusion of pure white, sweetly scented flowers during June. 6 to 8 feet.

***COLUMBIAN** — Of stockier growth, very free bloomer, but not as fragrant as above. Hardy. 8 to 10 feet.

***GRANDIFLORA**—A robust form, having very large flowers; later and not so fragrant as the Garland. 8 to 10 feet.

***GOLDEN**—A dwarf variety, having rich, yellow foliage. The best dwarf, golden foliage shrub. 4 feet.

***LEMOIN** — Dwarf, sweet scented, free blooming form, having narrower leaves and slender branches. 4 feet.

***AVALANCHE**—A very graceful, hardy and desirable form of the Lemoin. Flowers white, very sweet and produced in such profusion that their weight bends the long, slender branches almost to the ground, producing a most wonderful effect, as if the branches were loaded with new-fallen snow. 5 feet.

***CANDELABRA**—A newer form, similar to Avalanche, but thriftier and very profuse bloomer of neat, upright growth. 5 feet.

If You Have a Garden of Any Size the Barker Weeder, Mulcher and Cultivator

will do more satisfactory work, with the least effort of any tool you can purchase. We have used them in the nursery for 3 or 4 years and offer them to our patrons, knowing that they will not disappoint. The machine has 3 shovels on one side (and leaf guards not shown in illustration), hence is reversible, using either hoe or shovels. The standard size cuts and pulverizes a row 8½ inches wide. Circulars cheerfully sent on request. Price \$6.00.

The Lang Weeder

is the best hand weeder for all purposes. Everyone owning a garden should have one. 25c each.

Trowbridge Grafting Wax

30c per Pound, Postpaid.

A standard preparation that comes put up in 1-lb. packages. Just the thing for parties desiring to do a moderate amount of grafting, top-working or pruning. Melt and apply with a tree but is generally regarded as hardier.

EVERGREENS

Postpaid, seedlings, 25c per 100; 6 to 12-in. 2c each extra.

Among all classes of nursery stock the evergreen is the most perishable, and hence special care must be exercised in transplanting them. If the following two rules are observed it can be as successfully accomplished as with any other class. Untransplanted evergreens or seedlings especially require the best of care. Transplanted evergreens grow readily, as they have a better root system. All of these offered except seedlings, have been transplanted one or more times and are fine, stocky trees. Sure to grow with reasonable care. We do not ship storage stock, as all of our evergreens come direct from the field for each order. They are carefully packed and guaranteed to reach you in good growing condition.

When received, wet the roots but not the tops, and heel in some moist, shady spot. When ready to plant make a thin mud in a pail or tub, dip roots in or keep in until planted. Absolutely prevent the drying of the roots. Firm ground well as planted, and keep well cultivated. Seedlings should be lined out about 6 inches apart in a row in the garden and given good culture for about three years before setting in their permanent place.

JACK PINE

BURLAPING WITH A BALL OF EARTH—When requested we will burlap each individual tree as dug with earth adhering. Such trees weight considerably more, but with expensive ornamentals is warranted caution. In planting, the burlap may be left on, as it soon rots. Merely soak the ball thoroughly and plant very firmly. Extra charge for 12 to 18-in., 10c each; 18 to 24-in., 15c; 2 to 3 feet, 20c; 3 to 4 feet, 25c; 4 to 6 feet, 30c; 6 feet up, 50c.

***Jack Pine** Hardy native, drouth-resisting; very easily transplanted; very rapid grower; especially valuable for windbreaks on dry, loose soils or severe location.

18 to 24 in.....	.40	3.50	30.00	
2 to 3 ft.....	.60	5.00		

Black Hills Spruce

Similar to White, only more compact and darker color. Very hardy, and especially valuable for hedge planting and general use on our western prairies.

(Prices and grades same as for White Spruce.)

Balsam Fir A conical, upright and rapid grower; retains its silvery green color very well. A great favorite in many places, especially on heavy, retentive soil, where it makes one of the choicest evergreens for general planting.

(Prices and grades same as for White Spruce.)

DOUGLAS SPRUCE—A rapid growing, hardy variety from the Rocky Mountains, similar to the Balsam, having pointed buds. Of graceful proportions and fine color.

	Each	Per 10	Per 100
6 to 8 in. seedlings			\$ 2.50
6 to 12 in. transplants	\$0.15	\$1.00	8.00
12 to 15 in.	.25	2.00	15.00

CONCOLOR SPRUCE, or Silver Fir—A rare evergreen, longer foliage, something like Balsam, but more open in growth. Very attractive and desirable.

	Each	Per 10
8 to 12 in.	\$0.25	\$2.00
12 to 18 in.	.50	4.00
18 to 24 in.	1.00	8.00
2 to 3 ft.	1.50	12.50

***ENGLEMAN'S SPRUCE**—Another Rocky Mountain evergreen, very similar in growth to the Colorado Blue, but does not take on quite as high coloring. The needles are shorter and more blunt. Hardy and very desirable.

(Prices and grades same as for Concolor).

Hemlock On retentive soils and favorable locations this is one of the most graceful and pretty evergreens. Sometimes called the weeping spruce because of its habit and light, loose sprays.

(Prices and grades same as for Concolor).

Colorado Blue Spruce A form of the spruce from Colorado; very hardy and symmetrical; foliage varies much in color from green to a deep blue. The very choicest of all ornamental evergreens.

	Each	Per 10

WEEPING RUSSIAN MULBERRY—A very graceful, medium sized, fairly hardy tree that deserves a place in ornamental planting.

1-year heads, each.....\$1.00 2-year heads, each.....\$1.25

Cut-Leaf Weeping Birch

The most erect, handsome and graceful tree for ornamental use. Its silvery bark, finely cut foliage and graceful habit makes it a universal favorite. They must be planted early to insure growth.

	Each	Per 10
4 to 5 ft.....	\$0.60	\$5.00
5 to 6 ft.....	.75	6.50
6 to 8 ft.....	1.00	8.00

"Forestry in Minnesota"

By Prof. Green, written for Northwestern planters and used as a text-book on forestry. A very practical, thorough and concise work on ornamental and windbreak planting. It will interest all. Four hundred pages, well illustrated. Cloth bound, postpaid, for \$1.00. Free with \$10.00 order when requested.

NUT TREES AND SHRUBS

One-foot size, prepaid, for 1c each extra.

Few investments would do more toward increasing the value

and adding more pleasure to our farm homes than the planting of a few nut trees. Nursery-grown trees that have been once transplanted are as easy to make live and fully as desirable as those of any other kind. Although we have but few hardy varieties, they should be freely planted.

Butternut A very rapid grower and early bearer. Does well as a grove tree. Nuts rich and sweet. Our finest hardy native nut-tree.

	Each	Per 10	Per 100	Per 1000
6 to 12 in. seedlings.....	\$0.05	\$0.30	\$ 2.00	\$15.00
1 to 2 ft. transplants.....	.10	.70	5.00	25.00

3 to 4 ft.....	.25	2.00	17.00	
4 to 5 ft.....	.35	3.00	25.00	
5 to 6 ft.....	.50	4.00		
6 to 8 ft.....	.75	6.50		

JAPAN WALNUT (Siebold and Cordiformis)—Resembles the butternut somewhat in appearance and nut. Rapid grower, moderately hardy; makes a fine ornamental; bears young and abundantly. 1 to 2 ft., 25c; 2 to 3 ft., 35c; 3 to 5 ft., 50c; 4 to 6 ft., 75c.

Black Walnut Valuable for nuts, timber and one of the choicest ornamentals. Hardy; does best in rich, rather moist soils, but stands drouth well; makes a handsome round-topped tree of medium height. (Prices same as for Butternut.) 8 to 10 ft., \$1.00 each; 2 to 3 in. caliper, \$3.00; 3 to 4 in., \$5.00.

Buckeye or Chestnut—A very hardy, desirable round-topped tree for ornamental planting. Fine foliage and yellow flowers. Much harder than the Horse Chestnut.

	Each	Per 10
1 to 2 ft.....	\$0.25	\$2.00
2 to 3 ft.....	.35	3.00
3 to 4 ft.....	.50	4.00
4 to 5 ft.....	.75	6.00

Chestnut (Am. Sweet)—Deserves a trial in all favorable locations. Not as hardy as the Buckeye, but valued for its delicious nuts. 4 to 5 ft., 35c; 5 to 6 ft., 50c.

PARAGON or SOBER (Chestnut)—Dwarf, early fruiting form. Grafted 4 to 5 ft. \$1.25 each.

SHELLBARK HICKORY—A hardy, slow-growing, very ornamental tree; bears an abundance of choice nuts, and should be freely planted. Our trees are grown from Wisconsin seed and will be found very hardy.

	Each	Per 10
1-year seedlings, post-paid.....	\$0.10	\$0.75
6 to 12 in. transplants, postpaid.....	.20	1.50
1 to 2 ft. transplants...	.50	4.00
2 to 3 ft.....	1.00	8.00

***BITTERNUT HICKORY**—A very hardy and ornamental native. One of our most valuable timber trees. 6 to 8 ft., 50c; 8 to 10 ft., 75c.

***SCARLET OAK**—A beautiful ornamental tree of quite rapid growth. The easiest of all oaks to transplant. Foliage colors brilliantly after frost. Also **RED OAK**, at same prices.

	Each	Per 10	Per 100
6 to 12 in. seedlings.....	\$0.50	\$3.00	
5 to 7 ft.....	.50	4.00	
6 to 8 ft.....	.75	6.00	
8 to 10 ft.....	1.00	8.00	

***BURR, or Mossy Cup Oak**—A very hardy, long-lived variety, but rather slow grower. Resists drouth and adverse conditions the best of any tree and well worthy of a place in any planting.

(Prices and grades the same as for Scarlet Oak.)

***WHITE OAK**—Makes a handsome, round-topped tree of compact and more rapid growth than the latter. All oaks are slow growers, but make choice ornamentals.

***HAZEL NUT**—A hardy, native shrub that produces an abundance of fine flavored nuts. Valuable as an undergrowth in or near groves in sections where not found naturally.

1 to 2 ft., 15c each; \$1.00 per 10; \$8.00 per 100.

Street trees should be planted 40 feet apart. For windbreak or grove planting set 4 by 4 or 2 by 8, aiming to get the ground shaded as soon as possible. Cut out the least desirable varieties, as they crowd too much. Before planting cuttings, soak them for about two days.

POST PAID Cuttings and 6 to 12 inch seedlings, 20c per 100 extra. 1 to 2 feet, 1c each, extra.

Ash (Green or White)—One of our most valuable trees for ornamental or timber planting. Resists drouth well. Rapid, upright grower. The green Ash does not make as large a tree but is generally regarded as hardier.

	Each	Per 10	Per 100	Per 1000
6 to 12 in. seedlings.....		\$0.50	\$ 3.00	
1 to 2 ft. seedlings.....		1.00	6.00

8 to 10 ft.....	1.00	8.00	
1½ to 2 in. caliper.....	1.50	12.00	
2 to 3 in. caliper.....	2.00		

EUROPEAN LINDEN—Is similar to the above, having twigs of a reddish color, smaller leaves; not as rapid in growth, but hardy and desirable. (Prices and grades same as above.)

Hardy Catalpa

A rapid growing tree of tropical nature, and desirable as an ornament. Leaves heart-shaped and very large. Flowers in large clusters sweet-scented, ripening into long, bean-like pods. In great demand farther south for fence posts and grove planting. Our trees are grown from seed raised 50 miles north of St. Paul and will prove the best available.

	Each	Per 10	Per 100	Per 1000
6 to 12 in. seedlings.....			\$ 1.00	\$ 6.00
1 to 2 ft. transplants.....	\$0.10	\$0.50	2.00	15.00

6 to 8 ft. XX.....	1.00	8.00	

***WILD BLACK CHERRY**—A pretty, medium-sized tree, very hardy, rapid grower and valuable as an ornamental or to mix with timber plantings.

(Prices and grades same as for Catalpa.)

CHOKE CHERRY—Small, spreading, native tree that makes a very satisfactory ornamental; white flowers, black fruit. 3 to 5 ft., 25c; 4 to 6 ft., 35c; 5 to 7 ft., 50c; 6 to 8 ft., 75c.

NATIVE RED CHERRY—A very hardy, small tree that deserves more attention in ornamental plantings. White, flat clusters of flowers in May. (Prices and grades the same as for choke cherry.)

Kentucky Coffee Tree—A handsome native tree of medium size, with upright, blunt branches and beautiful feathery foliage. A very desirable ornamental. Called Coffee Tree because the seed matures in pods and has some resemblance to the coffee bean.

	Each	Per 10
4 to 5 ft.....	\$0.35	\$3.00
5 to 7 ft.....	.50	4.00

STRAND'S NURSERY

TAYLORS FALLS, MINNESOTA

White Elm One of the best and most popular of trees for any purpose; especially desirable as a street tree; hardy, rapid grower; resists drouth well and is long lived. (Prices and grades the same as for Ash.)

RED ELM, or Slippery Elm—Has large, rougher foliage than the white Elm; wood straight grained, hence more valuable for fuel. A rapid-growing, good ornamental. 5 to 6 ft., 35c; 6 to 8 ft., 60c; 8 to 10 ft., 75c.

***HACKBERRY**—Similar to White Elm. Roots very deep and its twigs and leaves are of a lighter color; not as rapid a grower. Very valuable for timber or ornamental. Stands drought and dry winds exceedingly well. 6 to 12-in. seedlings, \$1.50 per 100; 1 to 2 ft. seedlings, \$2.50 per 100. 5 to 7 ft., 50c.

***HAWTHORN**, or Thorn Apple—A hardy native that is useful for hedges or as an ornamental. Very attractive when covered with its flat heads or clusters of white and pink flowers, maturing into red fruits.

	Each	Per 10		Each	Per 10
1 to 2 ft.....	\$0.20	\$1.50	4 to 6 ft.....	\$0.50	\$4.00
2 to 3 ft.....	.25	2.00	5 to 7 ft.....	.75	6.00
3 to 5 ft.....	.35	3.00	6 to 8 ft.....	1.00	7.50

IRONWOOD, or Hop-Hornbean—A pretty, medium-sized native tree that is very attractive when covered with its hop-like bloom and fruits. Very hardy, but prefers sheltered locations.

	Each	Per 10
5 to 7 ft.....	\$0.35	\$3.00
6 to 8 ft.....	.50	4.00
8 to 10 ft.....	.75	6.00

European Larch or Tamarack Hardy, graceful, rapid grower; desirable ornamental or timber tree; similar in appearance to an evergreen, but is deciduous. Should be planted early in the spring before buds start much, to insure growth.

	Each	Per 10	Per 100	Per 1000
6 to 12 in. seedlings.....			\$1.50	\$10.00
2 to 3 ft.....	.25	2.00		
3 to 4 ft.....	.35	3.00		
4 to 5 ft.....	.50	4.00		
5 to 6 ft.....	.75	6.50		
6 to 8 ft.....	1.00	8.00		
8 to 10 ft.....	1.50	12.00		

Black Locust A rapid-growing, thorny tree that is desirable on account of its pretty foliage and fragrant flowers. As a grove tree, for fuel and fence posts it is one of the very best; grows more rapidly than the willow and wood is very hard and durable.

(Prices and grades same as for Catalpa.)

Honey Locust Similar to the above, but has longer thorns (some are thornless) and does not sucker. The foliage is also finer. A hardy, vigorous, rapid grower that makes a choice ornamental. Thornless variety, 20c each extra.

(Prices and grades same as Russian Olive.)

MAY DAY TREE (Prunus Mackii)—A hardy, stocky European variety that starts into growth and blooms very early. Flowers resemble the Choke Cherry, but are larger and more beautiful. 3 to 5 ft., 35c; 4 to 6 ft., 50c; 5 to 7 ft., 75c each.

WIER'S CUT-LEAF MAPLE—See page 41.

HARD or SUGAR MAPLE—A very ornamental and desirable tree for heavy, retentive soils. Its fine form and foliage make it a favorite where it succeeds.

	Each	Per 10	Per 100	Per 1000
6 to 12 in. seedlings.....			\$0.75	\$ 5.00

STRANDS HARDY FRUITS FLOWERS AND ORNAMENTALS

**We Furnish 5 at 10 Rates, 50 at 100 Rates
and 500 at 1000 Rates**

NORWAY MAPLE—Similar to our hard or sugar maple, but is a more symmetrical, round-topped tree and has dense, dark green foliage which hangs very late. Hardy and should be more generally used in all plantings.

	Each	Per 10	Per 100
3 to 5 ft.....	\$0.25	\$2.00	\$15.00
4 to 6 ft.....	.30	2.50	20.00
5 to 7 ft.....	.40	3.50	30.00
6 to 8 ft.....	.75	6.50	
8 to 10 ft.....	1.00	8.00	
1½ to 2 in. caliper.....	1.50	12.00	

SCHWEDLER MAPLE—A variety of the Norway, having leaves and bark of the newer growth, of a bright purplish red, changing to purplish green. Hardy and a choice ornamental tree. 4 to 6 ft., 75c; 5 to 7 ft., \$1.00; 6 to 8 ft., \$1.25 each.

Tartarian Maple (Ginnala)—A very hardy and beautiful low-growing form. Foliage is dense, small and finely cut, turning to the most attractive colors in the fall. Very desirable in ornamental planting.

	Each	Per 10	Per 100
6 to 12 in seedlings.....			\$ 2.00
1 to 2 ft seedlings.....		\$0.50	3.00
2 to 3 ft. seedlings.....		.75	5.00
3 to 4 ft. transplants.....	.35	3.00	25.00
4 to 5 ft.....	.50	4.50	40.00
5 to 7 ft.....	.75	6.50	
6 to 8 ft.....	1.00	8.00	

MOUNTAIN MAPLE (Spicatum)—A native low-growing form which makes a very desirable shrubby ornamental. New twigs and seeds are tinged with red and foliage downy and deeply veined. 3 to 4 feet, 35c; 4 to 5 ft., 50c; 5 to 7 ft., 75c.

White Soft Maple Rapid grower and is largely used in street and grove plantings. The trees should be watched while young, so they do not form bad crotches. One of the best shade trees for general planting. (Prices and grades the same as for Ash.)

Russian Mulberry Hardy, but liable to kill back in some places in severe winters, which damage it soon outgrows. Fruit resembles the blackberry, rather insipid. Valuable as bird food and for canning when mixed with other berries, makes good low windbreak and a desirable ornamental. (Prices on page 20.)

Russian Olive Belongs to the same family as the Buffalo Berry; makes a medium-sized, very hardy and beautiful tree; foliage and newer growth is silvery white; fruit of same color, not edible, but hangs on the tree till late in winter. Flowers small, yellow, but very fragrant. Very desirable for ornamental or hedge purposes. A rapid grower that pleases all who give it a trial.

	Each	Per 10	Per 100
6 to 12 in. seedlings.....			\$ 1.50
2 to 3 ft.....	\$0.20	\$1.50	10.00
3 to 5 ft.....	.25	2.00	15.00

5 to 7 ft.....	.50	4.00	35.00
6 to 8 ft.....	.75	6.50	50.00
8 to 10 ft (bushy).....	1.00	8.00	
1½ to 2 in. caliper.....	1.50	12.50	
2 to 3 in. caliper.....	2.50	20.00	

"Forestry in Minnesota" Will Tell You All About Trees. Postpaid, 75 cents. FREE (when requested) with \$10.00 order, 400 pages; well illustrated; cloth bound.

Carolina Poplar Similar to Cottonwood, but has large leaves and is more symmetrical. Used considerably in park planting, as it is free from cotton and also stands smoke and gas. A rapid-growing sort popular as a grove and timber tree.

	Each	Per 10	Per 100	Per 1000
Cuttings			\$ 0.50	\$ 2.50
1 to 2 ft.			2.00	15.00
2 to 3 ft.		\$0.50	3.00	20.00
5 to 7 ft.	\$0.25	2.00	15.00	
6 to 8 ft.	.35	3.00	25.00	
8 to 10 ft.	.50	4.00	35.00	
1½ to 2 in. caliper	.75	6.50	50.00	
2 to 3 in. caliper	1.50	12.50		
3 to 4 in. caliper	2.50	20.00

Norway Poplar

A sturdy form of the Carolina Poplar adapted especially as a timber tree. Very rapid grower: has larger leaves, and darker bark. A new variety that is in great demand. Ours may be relied on as the genuine. Experiments would indicate that they resist drouth better than either the Cottonwood or Carolina Poplar, owing to a stronger root system. In 14 years trees 17 inches in diameter and 55 feet tall have been grown, which, valuing timber at \$12.00 per 1,000 feet, would make the product per acre average over \$100.00 for each year. What better farm crop can you grow than this?

	Each	Per 10	Per 100	Per 1000
Cuttings			\$ 0.75	\$ 5.00
1 to 2 ft.		\$ 0.50	3.00	20.00
2 to 3 ft.		1.00	5.00	30.00
5 to 7 ft.	\$0.35	3.00	25.00	
6 to 8 ft.	.50	4.00	30.00	
8 to 10 ft.	.75	6.50	50.00	
1½ to 2 in. caliper	1.00	8.00		
2 to 3 in.	1.50	12.50		
3 to 4 in. caliper	2.50	20.00		

VAN GERT'S GOLDEN POPLAR—A desirable form having light yellow foliage. In demand for ornamental and park planting. Cuttings, \$1.00 per 100; 3 to 5 ft., 25c; 4 to 6 ft., 35c; 6 to 8 ft., 50c each; 8 to 10 ft., 75c; 10 to 12 ft., \$1.00; 2-inch caliper, \$1.50 each; 2 to 3-inch caliper, \$2.00 each.

Volga Poplar A thrifty, upright-growing form, more desirable than the old Lombardy. Bark is a bright green. A newer sort of great promise. Prices and grades the same as for Norway Poplar.

BOLLEANA POPLAR—A very desirable silver-leaved variety of upright growth. Valuable in ornamental planting. Prices and grades the same as for Golden Poplar.

Giant Silver Poplar Vigorous, very hardy, spreading grower and desirable ornament.

al. Foliage is larger than the Bolleana and a better tree generally than (Populous Alba) the common silver poplar. Prices and grades the same as for Golden Poplar.

BALM OF GIL-EAD—A rapid growing form of the Poplar, having large leaves and balsamy buds. Seems to be especially at home in the North. Valuable in timber or grove plantings. Prices and grades the same as for Golden Poplar.

Our trees are guaranteed to please well packed and well-rooted.

HARDY FRUITS FLOWERS AND ORNAMENTALS

Russian Golden Willow A very hardy and beautiful variety. A very rapid grower, making a fine medium-sized, round-top tree. Bark is of a rich golden color in winter and spring. Desirable for windbreak planting, as a lawn tree or for variety in ornamental planting.

	Each	Per 10	Per 100	Per 1000
Cuttings			\$ 0.50	\$ 2.50
1 to 2 ft.			2.00	15.00
2 to 3 ft.		\$0.50	3.00	20.00
3 to 5 ft.	\$0.15	1.00	7.00	
4 to 6 ft.	.20	1.50	10.00	
5 to 7 ft.	.35	3.00	25.00	
6 to 8 ft.	.50	4.00	35.00	

Laurel Leaf Willow Hardy, rapid grower, having thick, glossy leaves, which are very beautiful. Valuable as an ornamental and also for windbreaks. Together with the Golden Willow, they are without question the most popular trees for starting a windbreak or grove. (Prices and grades the same as for Golden Willow.)

WHITE WILLOW—Well-known tree; valuable as a pioneer for windbreaks, except on high, dry land. (Prices and grades the same as for Golden Willow.)

Diamond Willow This is the variety that is largely planted for post timber and claimed by some to be most durable. If treated with creosote any of the willows make very good posts. (Prices and grades same as for Golden Willow.)

URAL WILLOW—A purple-branched basket willow that is valuable for a low snowbreak or especially for tying purposes. (Prices and grades same as for Golden Willow.)

ROYAL, or Regal Willow—A form of the white willow, but does not make a large tree. Foliage very downy. Valuable for variety in ornamental plantings or low windbreak. (Prices and grades same as for Golden Willow.)

BEDDING PLANTS

For the convenience of patrons, who often inquire for this class of stock, we list same. We do not grow most of these but if unable to supply from here will have them sent by parcels post or express from the nearest available source at planting time. 2¼-inch Potted Plants unless otherwise specified.

	Each	Per 10	Per 100
ASTER—Double blue, lavender, pink; red and white; Transplanted Seedlings.....	\$0.05	\$0.30	\$2.50
CANNAS—Potted plants after May 15th; standard sorts	.20	1.50	12.00
CALADIUM or Elephant's Ear—Dormant bulbs	.25	2.00	15.00
CASTOR BEAN PLANTS—Tall desirable ornamental	.25	2.00	15.00
