With Every Order Received Before May 15, Our Prize Rose, Red Dorothy Perkins. Awarded the Gold Medal by the American Rose Society for the Best American Rose introduced within the past five years.

1917

ANNUAL SPRING OFFERING OF OUR CHOICEST VARIETIES GLEN BROTHERS, Inc., Rochester, N. Y.

"The serious mistake is not made by the man who sets trees, but by the man who does not set them."

HOW LATE CAN YOU PLANT?

This is the question that comes up every spring, during the month of April, after the first few warm days have come and made the buds swell. The important rule to remember in transplanting trees, shrubs and plants of all sorts is that the stock should be dormant. Dormant stock can be planted with safety throughout the United States and Canada even late in the spring, although, of course, the later one plants the shorter the growing season, but as long as the results are successful each planter should remember that he is gaining a year's growth over waiting until fall. We keep our stock dormant by special methods, until late in May, and *as long as we accept orders, our customers may rely upon our making good any losses that arise in error of judgment on this point.* Last year our stock was dormant and we shipped until the 28th of May.

Hardy Northern-Grown English Walnuts for Universal Planting

HARDINESS—We are the farthest north growers of the English Walnuts, and naturally believe that our severe climatic conditions insure much hardier trees than can be grown farther south. In over 50,000 English Walnut trees grown at our nurseries at Fairport, N. Y., during the last ten years, we have not lost a single one through winter-killing.

RANGE—The English Walnut is one of the most adaptable of all nut trees, being hardy from California to Massachusetts, and even Ontario, Canada. Bearing trees are found in almost every state in the Union, and there are several large orchards in the vicinity of Rochester.

SOIL—The English Walnut grows best in a deep, rich soil, well cultivated, but they do not require this, and it has been proved through tests, that any good orchard soil, capable of producing other fruits, will be well adapted to Walnuts.

TYPES ESPECIALLY RECOMMENDED

From observation and years of experience, for real practical and commercial purposes, we prefer and recommend for severe climates, trees kept closely to the parent type, of the following strains, which reproduce fairly true to the original stock, and are reliable producers.

These are splendid trees for avenue or orchard planting. Sure to produce first-class nuts and are blight resistant.

Franquette—Very hardy, blooms late, thereby escaping the late frosts. Bears abundantly and regularly.

Mayette—The Grenoble nut of commerce. A dessert nut of highest quality, sweet and nutty in flavor.

Special early bearing trees: 6-8 ft., \$3.00 each; \$30.00 per doz.

Fairport—Originated in Rochester. Nut round, full-meated, fine quality, thin shell. We believe this variety will give complete satisfaction with no losses if given intelligent care.

Thomson—Origin, Avon, N. Y. A commercial nut for severe climates.

	Each	Per Doz.	Per 100
2-3 ft.	\$1.00	\$10.00	\$ 60.00
3-4 ft.	1.50	15.00	75.00
5-6 ft. specimen....	2.50	25.00	200.00

ENGLISH WALNUT ON BLACK WALNUT

The planting of grafted English Walnut trees in the eastern and northern states has been limited up to this time because of the difficulty in propagating by budding or grafting—such attempts being unsuccessful, until recently.

Although there are, as yet, no commercial orchards of grafted trees here in the east, many authorities claim and believe that the grafted trees are going to be sufficiently successful to warrant commercial planting.

WE RECOMMEND FOR SEVERE CONDITIONS THE FOLLOWING VARIETIES

FRANQUETTE MAYETTE

These trees are carefully grown, have withstood temperatures of ten to fifteen degrees below zero, without injury, and have proved their hardiness.

	Each	Per Doz.
Prices—2-3 ft. grafted....	\$2.00	\$18.00
3-4 ft. grafted....	2.50	25.00

Grafted trees bear early, often the second year, and are of very rapid growth.

Block of 30,000 hardy English Walnut trees growing in our own nurseries, under our personal supervision, at Fairport, N. Y.

"The serious mistake is not made by the man who sets trees, but by the man who does not set them."

PECAN — The King of Nuts

Possessing as it does the desirable qualities of rapid growth, and enormous productiveness, producing paper shell nuts of excellent cracking qualities, full kernel, delicious flavor, it may well rank first among our native nuts in value and cultural importance.

HARDINESS—The Pecan tree is the most cosmopolitan that we have as regards its adaptability to various soils and climatic conditions. It is found growing naturally as far north as Davenport, Ia., where the tree is exposed to winter temperatures as low as forty degrees below zero occasionally.

SOIL—Its behavior on various soils and locations is no less striking. It is found growing from the lower river bottoms, where it is occasionally flooded for several weeks at a time, up to at least 1,500 feet elevation, and on all kinds of soil, from the clays and clay loams to the lightest and poorest sandy soils which grow the "scrub pine."

	Each	Per Doz.	Per 100
Prices—2-3 ft. budded.....	\$2.00	\$20.00	\$140.00
3-4 ft. budded.....	2.50	25.00	150.00
5-6 ft. budded.....	3.00	30.00	

Budded Pecans come into bearing early.

Indiana—A hardy variety, originating in Knox County, Indiana. The nuts are medium in size with full, plump kernel, light colored, which is fine-grained, sweet, nutty and of good quality.

Busseron—Originated in Knox County, Indiana. This is one of the best of the Indiana varieties. The nut is large, of good quality and fine appearance.

Butterick—Originated near Mt. Carmel, Ill., in the Wabash Valley. The Butterick combines large size, a real paper shell nut of high quality and a very vigorous and productive tree, making it highly desirable for market plantings.

Green River—Originated in Henderson County, Kentucky. Medium sized nut of deep golden color. The shell very thin, the kernel a rich cream color of highest quality.

PURE STRAIN FILBERTS — For Garden Culture

HARDINESS—It is perfectly hardy all through the north, withstanding at our nurseries, 15 degrees below zero without winterkilling or injuring the crop, so that ironclad hardiness, rapidity of growth, earliness of bearing and great adaptability are the four splendid qualities which mean a large and extensive planting all through the east.

RANGE—Native American Hazel is found in most northern states and Ontario, Canada, as well as both native and European varieties being found commercially on the Pacific Coast.

SOIL—Any good orchard soil, sandy and clay loams are very well adapted to Filbert culture. Good drainage is essential. Planting should be at a distance of twelve to fifteen feet. Pruning is of special importance, if grown in tree form, although they bear abundantly if permitted in the natural form, which is that of a many stemmed bush.

AMERICAN VARIETIES

Purple Leaved—Nut large, thin shelled, delicious quality; one of the best. Very ornamental.

Hazelnut—Bears excellent nuts and in great quantities. Also very ornamental.

	Each	Per Doz.	Per 100
Prices—2-3 ft.	\$.50	\$5.00	\$35.00
3-4 ft.	1.00	7.50	50.00

EUROPEAN VARIETIES (Layered Plants)

Kentish Cob. (English)—Nut large, oblong, somewhat compressed; kernel plump and of rich flavor. An excellent keeper. Considered the best variety grown in England where it has been known since 1812.

	Each	Per Doz.	Per 100
Prices—2-3 ft.	\$.75	\$7.50	\$40.00
3-4 ft.	1.00	10.00	50.00
5-6 ft.	2.00	20.00	

Cosford. Paper Shell—Layered plants, from imported parent plants. Nut oblong. Kernel plump and of the richest flavor. Highly prized in Europe because of its thin shell and high quality.

	Each	Per Doz.	Per 100
Prices—Strong layered plants, 2-3 ft. ...	\$1.00	\$10.00	\$65.00
Strong layered plants, 3-4 ft. ...	1.50	15.00

JAPANESE WALNUTS (J. Cordiformis)

One of the greatest gems for northern nut culture. This, as the name indicates, is a heart-shaped nut. It differs from the Sieboldi in form of the nuts, which are broad, pointed, flattened, somewhat resembling the shell-bark Hickory. Meat large, of best quality and easily removed as the shell is thin, and parts easily at the sutures, enabling one to get the kernel out whole. Of interest to northern planters on account of the great hardiness. Withstands temperatures of 20 to 30 degrees below zero without injury. The flavor is something between that of an English Walnut and a Butternut. As a dessert nut it has few superiors; the meat being very sweet, is used extensively for candied nuts. We recommend it as one of the very best Japanese varieties. Comes into bearing at an early age, usually three to four years.

	Each	Per Doz.	Per 100
Prices—2-3 ft.	\$.75	\$7.00	\$50.00
4-5 ft.	1.00	9.00	65.00

AUTUMN HINTS

Trees, Plants and Shrubs for Successful Fall Planting

GLEN BROTHERS, Inc.

GLENWOOD NURSERY

1768 EAST MAIN STREET, ROCHESTER, NEW YORK

Fall Planting

READ THIS FIRST!!

Trees Completely Dormant. Hardy trees and plants are completely at rest in the fall and can therefore be handled easily and safely. No quick awakening threatens to handicap work at any time, as nearly always happens in the spring, when the sap begins to run very suddenly.

Soil in Ideal Condition. The soil is warm, mellow, easy to work and stored up with the heat and fertility of a long growing season. So often in early spring the soil is cold, wet and unyielding.

Autumn Root Growth. The stored up heat coming out of the soil stimulates active root growth, which continues until the

Plant Now and Gain Ten Months

ground freezes below the roots. As a result trees become established before winter, ready to start into vigorous growth with the first touch of spring. The advantage is apparent when we stop to think that trees and shrubs make more growth during the very early spring than all the rest of the season combined. Fall planted trees begin to grow long before others could be planted in the spring.

Quicker Service. We have ample time in the fall to dig, select and pack your order with unusual care. You get the choicest stock from the new blocks of trees, delivered promptly and in the best of order. In

the spring both nurserymen and railroads are crowded with the rush of orders and delay sometimes results.

More Time. You have plenty of time in the fall for thorough preparation and proper care. Fifty percent of the failures are due to improper planting. Spring work presses so hard that planting is often done too hurriedly and trees are neglected.

Trees Mature Better. Fall planted trees have a tendency to mature the foliage and stem early, going into winter in much better condition and suffering less from winter killing.

Plant Nut Trees

They Bear Earlier than Fruit Trees — are Longer Lived — Easier to Succeed

As a combined source of profit and pleasure few trees equal nut trees. Their beauty and shade-giving qualities are well known. Not so the fact that they are ideally adapted to turn soil of indifferent fertility into highly profitable acres. Their value increases in the exact ratio as hardwood becomes scarcer. Nuts as a wholesome food, are finding increased recognition each year. Sure and early bearing strains make initial returns a certainty within a few years. As an investment as secure as the country itself, nut trees claim the consideration of the "plan-ahead" gardener. Plant an orchard of nut trees — it's doing the country, yourself and posterity a big favor.

Our Pure-Strain English Walnuts, for sure and early bearing. Known to have borne crops four years after planting. Thomson and Fairport are as safe and reliable strains for zero climates as we have been able to derive. Rapid growers, late bloomers, sure crops. Ideal planted along driveways or as lawn trees. Nuts of thin shell, with finest quality kernel. Our stock of young, frequently transplanted trees is in ideal condition for fall planting. Start an orchard of English Walnut trees this fall.

FAIRPORT—Originated in Rochester. Nut round, full meated, fine quality, thin shell. We believe this variety will give complete satisfaction with no losses if given intelligent care.

THOMSON—Origin, Avon, N. Y. A commercial nut for severe climates.

PRICES—2-3 ft.	\$1.00 each;	\$10.00 per doz.;	\$ 60.00 per 100.
3-4 ft.	1.50 each;	15.00 per doz.;	70.00 per 100.
5-6 ft. Special	2.50 each;	25.00 per doz.;	200.00 per 100.
6-8 ft. (Early Bearing Trees)...	3.00 each;	30.00 per doz.

Modern English Walnut orchard in New York State—showing cultivation and tillage. This particular orchard produces heavy crops—withstanding 15 to 20 degrees below zero.

Grafted and Budded English Walnut

Having been very successful with our grafting of English Walnut on Black Walnut, we have an exceptionally fine lot of trees for this fall's planting. The grafted trees usually begin bearing the second year and are of very rapid growth.

LADY EDITH—The most delicious of all the English Walnuts—original or parent tree was found in Le Roy, N. Y., where winter conditions are very severe. The nut is of more than medium size, with smooth, handsome paper-shell thickness, full meated and of remarkably fine flavor. We can offer but a limited number this season.

2-3 ft. Grafted on Native Black Walnut,
\$3.00 each; \$25.00 per doz.

KENTISH COB

Filberts

Strains that Defy Zero Climates

Filberts raised under the rigorous climatic conditions prevailing in our nurseries, thrive under a wide variety of soil and sections. With us they prove as hardy as Elms and Maples. Amply fortified with strong root systems, with wood of the toughest fibre Glenwood Nurseries' hardy nut trees have that strength and constitutional vigor essential to success in zero climates.

COSFORD (PAPER SHELL)

AMERICAN VARIETIES

Purple Leaved (Avellana Atro-purpurea)—Nut large, thin-shelled, delicious quality, one of the best. The leaves and husk are of deep purple color, which is retained until frost. Very ornamental.

Hazlenut (American Filbert)—Bears excellent nuts and in great quantities; also very ornamental.

	Each	Per Doz.	Per 100
Prices—2-3 ft.	\$.50	\$5.00	\$35.00
3-4 ft.	.75	7.50	50.00

EUROPEAN VARIETIES (Layered Plants)

Kentish Cob (English)—Nut large, oblong, somewhat compressed; kernel plump and of rich flavor. An excellent keeper. Considered the best variety grown in England where it has been known since 1812.

COSFORD, PAPER-SHELL, LAYERED PLANTS—From Imported Parent Plants—Nut oblong, kernel plump and of the richest flavor. This variety is very productive and highly prized in Europe because of its thin shell and high quality. Rarely seen in American markets.

	Each	Per Doz.	Per 100
Prices—2-3 ft.	\$ 1.00	\$10.00	\$65.00
3-4 ft.	1.50	15.00	100.00
4-6 ft.	2.00	20.00	140.00

Almonds

Everyone enjoys the Almond—salted, glazed and candied—one of the most delicious of all nuts. The retail market for nuts in the east is the best in the world, yet while individual trees are often seen bearing profusely throughout the peach area, commercial plantings are very scarce. Yet we raise the trees with no difficulty whatsoever at our nurseries, with our cold Northern New York temperature. As hardy as the peach, as easy to grow—bears the second year—and best of all non-perishable. Plant an orchard.

Specimen Budded Trees, Hard Shell, 3-4 ft., \$.50 each; \$5.00 per doz.; \$25.00 per 100.

American Black Walnuts

The American Black Walnut is one of the most valuable among our timber trees, also a magnificent shade tree, producing a rich, meaty nut, well known to us all in an abstract way, perhaps, but not in a real personal way that comes from picking up these delicious nuts from your own lawn.

The Black Walnut is hardy everywhere, a rapid grower, coming into bearing five or six years after planting. Our own strain of Black Walnuts, propagated from selected thin shell nuts, produce for the planter a crop as valuable per acre as fruits, with the advantage of being an unperishable product.

Prices—3-4 ft. \$.50 each; \$ 5.00 per doz.; \$25.00 per 100
6-8 ft. Special 1.00 each; 10.00 per doz.; 65.00 per 100

FAIRPORT BLACK WALNUT

BUTTERNUT

MEATS OF
BLACK WALNUT

Butternut or White Walnut

The White Walnut with its massive, straight trunk, its beautiful crown of heavy, green foliage and its rich crop of Butternuts each fall is an asset to any home, and when given space and careful attention will product extraordinary large nuts of excellent cracking qualities, filled with the richest meat. The nut possesses a most delicious flavor and is very nutritious.

This is the **hadiest** of the great Walnut family, being as **hardy or hardier** than the American Black. Extra heavy specimens:

	Each	Per Doz.	Per 100
Prices—3-4 ft.	\$.50	\$5.00	\$20.00
5-7 ft.	1.00	9.00	65.00

American Persimmon or Date Plum

The Persimmon may be planted any place where peaches will grow. This variety comes into bearing about the second year, the date of ripening being September and October, the fruit being delicious in the fall.

	Each	Per Doz.	Per 100
Prices—3-4 ft.	\$ 50	\$5.00	\$25.00

AMERICAN PERSIMMON

DWARF EVERBEARING APPLE COLLECTION

Six Choice Varieties of Apples, on Your Table from August Until the Following June

\$3.00 — Planted in a Garden Plot 12 x 12 Bears the Second Year — \$3.00

Six choice varieties of Apples on your table from August until the following June. An entire Everbearing Apple Collection can be raised in your own yard and by anyone who has space 12 x 12. The following six trees, planted six feet apart will take the place of an Everbearing Apple tree, which will probably never be produced, and yield a most delicious combination any place where fruit trees may be grown and soil and locality need not be taken into consideration:

1 Red Astrachan,	Season for table use	August.
1 Duchess,	" " " "	September.
1 Wealthy,	" " " "	October, November.
1 McIntosh,	" " " "	December to February.
1 Northern Spy,	" " " "	January to April.
1 Winesap,	" " " "	January to June.

Dwarf Apples with ordinary care generally come into bearing the second year.

ALL-SEASON \$2 Dwarf Pear Collection \$2 BEARING TREES

You get trees that are actually bearing fruit in the nursery now *this* season

A few square yards of ground, a few spare hours of work in planting and you may gather next summer and fall all the pears you want from trees set this fall. A small investment in this collection will allow you to pick an assortment of delicious pears from July to November, besides having a surplus to keep through February.

Koonce,	season	July.
Wilder Early,	"	Early August.
Clapp's Fav.	"	Late August.
Bartlett,	"	September.
Anjouleme,	"	October-November.
Anjou,	"	October to January.

The above three-year, extra heavy trees, in bearing, \$2.00.

DWARF APPLE TREE—SECOND YEAR

DUCHESS D'ANGOULEME

Home Orchard Collection

True Conservation for Year Around Supply of Fresh Fruit

Everyone who possesses a plot of ground seventy-five feet square can and should plant one of these complete Orchard Collections. It means the YEAR AROUND supply of the finest home-grown fruit, beginning with sweet cherries in early June to juicy winter apples the next June.

These trees are of the finest that could be supplied or procured—grown especially for this purpose—to give you the earliest possible results, the highest quality fruit and the largest yield. Each variety has been chosen with this purpose in mind; the best, the hardiest and the most universally satisfactory.

- 1 Red Astrachan Apple
- 2 Duchess Apple
- 3 Wealthy Apple
- 4 McIntosh Apple
- 5 Delicious Apple
- 6 Winesap Apple
- 7 Wilder, Dwarf Pear
- 8 Clapp's Favorite Pear
- 9 Bartlett Pear
- 10 Kieffer Pear
- 11 Worden Seckel Pear

- 12 Anjou Pear
- 13 Imperial Gage Plum
- 14 Mayflower Peach
- 15 Rochester Peach
- 16 Niagara Peach
- 17 Early Crawford Peach
- 18 Elberta Peach
- 19 Late Crawford Peach
- 20 Smock Peach
- 21 Moorepark Apricot
- 22 Large Montmorency Cherry

- 23 Dikeman Cherry
- 24 Governor Wood Cherry
- 25 Napoleon Cherry
- 26 Yellow Spanish Cherry
- 27 Whitney Crab Apple
- 28 Red June Plum
- 29 Shropshire Damson Plum
- 30 Yellow Gage Plum
- 31 Orange Quince
- 32 French Prune

HOME ORCHARD COLLECTION

2 Everbearing Apple Collections,	12 trees, July to June
1 All-season Peach Collection,	7 trees, July to Oct.
1 All-season Dwarf Pear Collection,	6 trees, July to Feb.
(Bearing Trees)	
2 Whitney Crab Apple,	2 trees, Aug., Sept.
1 Moorepark Apricot,	1 tree, August
2 Large Montmorency Cherry,	2 trees, July
(For Canning, Sour)	
1 Dikeman Cherry, black,	1 tree, July
1 Gov. Wood Cherry, red, sweet,	1 tree, Late June
1 Napoleon Cherry, white,	1 tree, Early June
1 Spanish Cherry, yellow,	1 tree, Mid June
1 Red June Plum,	1 tree, Early Sept.
1 French Prune,	1 tree, Late Sept.
1 Shropshire Damson Plum,	1 tree, October
1 Yellow Egg Plum,	1 tree, Early Aug.
1 Imperial Gage Plum,	1 tree, Late Aug.
1 Orange Quince,	1 tree, Sept., Oct.

The above collection of forty standard and dwarf trees, each one a specimen, \$15.00.

IMPORTANT—A complete plan of the above collection placed in a square plot to the very best advantage, and in smallest possible space will be sent with each order. This plan will aid you materially in planting, since every tree is marked definitely and is placed accurately.

EVERY CAN OF FRUIT SAVED

HELPS THE
WORLD
TO VICTORY

HOME GARDEN COLLECTION OF \$12 FOOD PLANTS \$12

All Your Own Fresh Cleanly Handled

Carefully selected by our garden expert to provide A FAMILY OF FOUR with an abundance of good things to eat. Appetizing Asparagus, delicious Rhubarb and then quantities of berries, bearing in perfect succession, fruit of a quality rarely obtainable on market. Here is the collection we recommend:

100 Strawberries, Superb Everbearing
24 Raspberries, Red Everbearing Ranere
12 Raspberries, Golden Queen, yellow
12 Raspberries, Black, Cumberland
12 Blackberries, Blowers
24 Currants, Perfection
12 Gooseberries, Downing

100 Asparagus, Palmetto
6 Rhubarb, Champagne
12 Grapes, as follows:
2 Niagara
2 Diamond
2 Wyoming
2 Lucile
2 Green Mt.
2 Moore Ea.

The above collection of 320 strong, healthy plants, together with directions how to plant and cultivate for \$12.00.

WILL BEAR FROM APRIL TO NOVEMBER, 1918.

A life time's experience of varieties; over half a century's experience in the nursery business, stand back of every plant in the collection. Definite results are assured in return for a reasonable amount of care, while the cost of the plants is negligible when compared with the value of the crops gathered. Join the great army of food producers NOW!

\$5.00 ROYAL PAEONY COLLECTION \$5.00

Twelve Rare Varieties

For this collection we have selected twelve of the choicest varieties, each one of superb beauty. For those who desire an exquisite display this collection surpasses anything heretofore offered, the varieties being among those selected by the International Gardeners for planting in the Royal Gardens at Corinth.

WHITE—Festiva Maxima,
Duchess de Nemours

PINK—L'Indispensable
Mme. Calet

RED—Louis Van Houtte
Reubens
L'Eelants

YELLOW—Canari

CREAMY—Duc of Wellington

LILAC—Pink Berlioz
Charlemagne
Delachei

NOTE—Autumn planting of Paeonies is absolutely essential if bloom is to be had the following season. Only vigorous root-power can bring about this result and this root growth must be made before the ground freezes to winter depth.

FESTIVA MAXIMA

YOUR ROSE GARDEN

The desire for beautiful things growing near us is natural. What flower in all the world competes with the Rose in beauty, in fragrance and in real charm? We are Rose Experts, and have bred a wonderful new race of Roses, both in beauty of the plant form and beauty of color. Our home-grown roses have likewise been bred for health, hardiness and freedom of bloom, and as a result our hybridizers have produced some beautiful specimens, through all the beautiful shades of red, yellow, pink, crimson and pure white.

All Are Two-Year-Old, Field Grown, and Have Bloomed the Past Summer

HYBRID PERPETUALS

50c each

\$5.00 per dozen

Following varieties are superb in color and fragrance:

Anne de Diesbach, carmine
Clio, flesh color with rosy pink center
Frau Karl Druschki, fine white
General Jack, brilliant crimson
Marshal P. Wilder, cherry-carmine

Mrs. Jno. Laing, delicate pink
Paul Neyron, deep rose
Persian Yellow, deep yellow
Ulrich Brunner, rich crimson

HYBRID TEAS

75c each

\$7.50 per dozen

Caroline Testout, bright rose
Etoile de France, velvety crimson
Gruss an Teplitz, dark, rich scarlet
LaFrance, silvery rose, shaded pink

Kaiserine Aug. Victoria, white, creamy
Killarney, flesh, pink
Pink Cochet, pink
White Cochet, white

CLIMBERS

\$5.00 per dozen

\$25.00 per 100

American Pillar, pink, large white eye
Dorothy Perkins, clear, shell pink

Excelsa, crimson maroon
Flower of Fairfield, brilliant crimson

SPECIALS

\$1.00 each

\$9.00 per dozen

Madame Edw. Harriott, H.P., coral red, shaded yellow and bright scarlet
J. L. Mock, H.T., clear, imperial pink

Radiance, H.T., brilliant rosy carmine
Climbing American Beauty, climbing, deep pink, shaded with carmine

"RADIANCE ROSE"
(in bud and bloom)

GLEN BROTHERS, Inc., GLENWOOD NURSERY, ROCHESTER, NEW YORK

"The serious mistake is not made by the man who sets trees, but by the man who does not set them."

The New Rochester Peach

Brought \$1.00 per basket in Summer of 1915 on the Rochester Market when other varieties were being given away.

Large, yellow and red free-stone; flesh yellow, very highly flavored; stone very small. To eat out of the hand or canned it cannot be equalled as a table delicacy. Will ship as well as an Elberta. The peach comes into ripening about the middle of August when there is no other yellow and red free-stone peach on the market. You can readily see that it will command the highest price. The tree is a strong, upright grower, has stood 16 degrees below zero and produced a splendid crop, while Elberta or Crawford under the same conditions in the same orchard produced no blossoms, consequently no fruit. It is seldom known to fruit-growers for young trees planted a little over a year to bear fruit. The new Rochester Peach solves the problem for you.

\$1.00 each; \$9.00 per dozen. Special prices on lots of 50 or more.

The illustration on the left shows
1-Year Tree—Planted in 1914; bearing 17 peaches in 1915

Dwarf Everbearing Apple Collection

\$3.00 Planted in a garden plot 12 x 12. Bears the second year. **\$3.00**

By now everyone has heard of the Everbearing Raspberry and Everbearing Strawberry and the wonderful advance this has meant to the small fruit grower. Did you ever hear of an Everbearing Apple? Neither have we, but we have something even better to offer our customers this fall. Six choice varieties of apples on your table from August until the following June. An entire Everbearing Apple Collection can be raised in your own yard, and by anyone who has a space 12 x 12. The following six trees, planted six feet apart, will take the place of an Everbearing apple tree, which will probably never be produced, and yield a most delicious combination any place where fruit trees may be grown, and soil and locality need not be taken into consideration.

1 Yellow Transparent,	season for table use,	August.
1 Duchess,	" " "	September.
1 Fameuse,	" " "	October, November.
1 Rome Beauty,	" " "	December to February.
1 Northern Spy,	" " "	January to April.
1 Winesap,	" " "	January to June.

The above are all budded on Dwarf stock, so that the room taken by each tree is very small. It makes it available for all of the family to pick from the ground, and without the use of ladders, nor do you have to wait long for results. Dwarf apple trees with ordinary care generally come into bearing the second year.

Send your order today for the Everbearing Apple Collection, as the assortment is very choice and the supply limited.

The New Dikeman Sweet Cherry

Rich Sweet Productive Hardy

The Dikeman is the gem among cherries, and because of its hardiness, dependability, productiveness and quality, is indispensable.

The fruit is of beautiful, lustrous, purplish black when ripe, of the largest size. The flesh is firm, crisp, sweet and meaty; none better.

It is the latest ripening of all the cherries, thus prolonging the season of our first summer fruits. It can be shipped longer distances to market than any other cherry and is wonderfully profitable.

Mr. F. S. Woodward, a New York State Fair judge, writes of this cherry as follows:

"Editor of Garden and Forest:

"Sir:—Referring to your note about the Dikeman Cherry, which I saw as one of the judges of the New York State Fair, this new variety seems to meet all the requirements of a good late cherry that will bear shipping and does not decay. The cherries at the State Fair had been picked on Friday, August 20th, in Michigan, and shipped nearly 500 miles by express, then sent to Syracuse and put on exhibition. They were in sound and fresh condition and I may add that on Saturday, August 28th, I brought some of the fruit home with me that had been on the plants during the whole week and is now, August 30th, on my table, perfectly sound after all this exposure."

Strong, two-year-old trees, budded on three-year-old roots: 50c each; \$5.00 per dozen; \$40.00 per hundred.

"The serious mistake is not made by the man who sets trees, but by the man who does not set them."

RED BUD, OR JUDAS TREE

WICHMOSS CLIMBING BABY MOSS

This is a wonderful break in new roses, being a cross between the "Wichuriana" and "Moss Rose." It has retained the scandent habit of the Wichuriana making long growths five to eight feet in length with the glazed, resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the moss family. The flowers are borne in clusters that are a day-break-pink in color, opening into bloom that is a good semi-double in fullness. A climbing moss is a wonder and "Wichmoss" is the forerunner of an entirely new family of roses; hardy.

Strong, two-year, field grown, \$1.50 each.

WICHMOSS

RED BUD, or Judas Tree

In the early spring the branches of these beautiful diminutive trees are literally covered with a smother of clusters of delicate rose pink bloom, consisting of mists of buds in clusters of from four to eight. The leaves are heart shape, deep rich green color, fading to tones of bright clear yellow. The Red Bud is hardy from Canada to the Gulf and will thrive in any fairly good soil.

They are most effective when planted in small groups or colonies, with an underplanting of shrubs, although as single specimens on the lawn they give charming effect.

Handsome, stocky trees, 5-6 ft.	\$1.00	\$10.00

PRUNUS TRILOBA

PRUNUS TRILOBA Double Rose Flowering Plum

A handsome, strong-growing little tree that has both branches and stems covered in early spring with delicate pink flowers which are double. This variety is very hardy and will thrive in almost any soil. It is extremely desirable as a specimen tree for garden or lawn, charming either alone or in groups, in borders or boundary planting. For effective garden planting they are unsurpassed.

Extra fine specimens:

LILAC GARDEN COLLECTION

Lilac Garden Collection 24 Varieties, \$10.00

Lilacs, the theme of song and story, bring the atmosphere of the "Old Homestead" to your estate.

Over wide areas their delicate scent perfumes the air, and their profuse, graceful blossoms with gorgeous changing tints are matchless for floral decorative effect.

All our varieties thrive in any fertile soil and can be used singly, massed or in groups to produce the effect desired.

We are offering this spring for special selection, twenty-four vigorous plants (ten different varieties, choicest in cultivation) in all colors, early and late flowering. Everyone will want one of these charming collections for planting about the home, which will add beauty and fragrance in the spring as no other flowering shrubs will.
