INTRODUCTION

Fish, Wildlife and Parks (FWP) owns, leases, or manages about 517 sites across the state and is responsible for noxious weed management on approximately 356,153 acres. Sites include 48 state parks, 320 fishing access sites, 109 wildlife management areas, and more than 40 administrative sites, fish hatcheries, etc.

FWP lands are widely sought for recreation, are varied, and are not always easily identifiable. As a result, the outdoor recreating public often assumes many non-Department recreational sites are property managed or owned by FWP. However, many of them are actually owned and managed by federal or other state agencies, and some are even privately owned.

The number of weed-infested acres, on FWP owned and managed lands, was estimated at 32,679 acres in 2004. Active integrated weed management activities took place on over 14,919 acres, and more than 220 insect releases occurred on FWP lands in 2004. Many properties currently owned and managed by FWP were acquired with weed infestations present. FWP personnel also assist counties with insect releases on lands surrounding FWP-owned or managed properties. Typically, long-term weed control success is neither a rapid nor a readily observable development, yet FWP strives for long-term success and uses available tools to manage noxious weeds.

Figure 1: A hawk moth caterpillar is observed feeding on leafy spurge along the Smith River bench during a 2004 cooperative beetle release on private land.

To facilitate long-term weed control, Six-Year Weed Management Plans have been completed for FWP properties in all seven administrative regions. Currently, two Regions are in the process of updating and revising their plans. Many of the larger

Wildlife Management Areas also have their own site-specific weed management plans in place. For the majority of sites, weed control is accomplished via contract with county weed districts or private contractors. To supplement contracted weed control efforts, FWP utilizes more than 38 employees licensed by the Department of Agriculture for herbicide application at FWP sites. FWP also has a staff member assigned statewide weed management coordination duties. This person assists managers with reporting weed management activities on FWP lands and acts as a liaison between FWP and other state agencies, county weed districts/boards, noxious weed control organizations, educators, and the general public.

County Weed Districts are excellent partners in the battle to control noxious weeds. FWP has found that contracting herbicide application with the counties is frequently the most cost-effective means of weed control. They have typically responded to Department special requests and regularly scheduled meetings and when there is a problem, they have been willing to work with FWP to address various situations. In some instances, however, due to busy schedules and multiple spraying obligations, spraying on FWP managed land by county contractors has not always been conducted at the optimum time for effective control. An issue that FWP has recently found the need to address is that due to time constraints and contract language, counties only spray roadsides and areas accessible via established roads, resulting in possible voids in weed control on larger acreages.

At times, spraying is subcontracted through the counties with private contractors. This can result in difficult tracking of effort, efficiency, and quality control. Some counties will not contract for weed spraying, so private contractors are sometimes used. Private contractors can apply weed treatment on the required schedule, but they can be expensive. For large FWP sites that need spraying, private contractors with sufficient resources can be difficult to find. Cooperative efforts such as the one negotiated between FWP and Avista in Region 1, and private contractors who maintain high standards of weed control results, such as TKO Invasive Weed Management in Region 3, have been quite effective, both in time and cost of spraying efforts, and in achieving significant weed control success.

Annual noxious weed control is not conducted at all FWP managed sites. Some sites are groomed, such as mowed lawns, and do not require chemical application. Decisions are influenced by such factors as aesthetics, proximity to neighbors, potential weed transfer, and weed efforts of adjacent landowners.

Because Fishing Access Sites are inherently associated with water, using chemical herbicides has significant potential environmental ramifications. Soil type, slope, riparian vegetation, water table, and proximity to surface water can limit the use of chemicals at these sites. When possible, herbicides labeled for use near water are used, but chemical applicators (regardless of employer) are often still unwilling to take on the environmental risk and associated liability. Additionally, some of these sites are remote, poorly developed, and have poor access which prohibits regularly accessing the areas with spray equipment. On these types of sites, FWP must rely heavily on biological

control, a treatment method that is not always successful, and when successful, slow to result in visible improvement.

Figure 2: Raynolds Pass Fishing Access Site, where FWP and TKO Invasive Weed Management teamed up to successfully control spotted knapweed. (Photo courtesy of Big Sky Fishing.Com)

2004 NOXIOUS WEED CONTROL

In calendar year 2004, FWP expended more than \$336,753 for on-the-ground weed control efforts. An additional \$261,456 was spent on weed education and outreach, grants, Capitol grounds maintenance, and other weed management activities. These figures do not include personnel time and effort spent on reporting, weed plan preparation, contracts, etc. The proposed on-the-ground noxious weed management biennial budget for Fiscal Years 2002 through 2003 was \$469,994 (\$234,997/year). Because of the highly invasive nature of noxious weeds, FWP's weed control expenditures have been increasing and have exceeded proposed budgets yearly. Expenditures exceeded proposed budgets in 2004, and 2005 expenditures are expected to do the same.

In addition to FWP's direct on-the-ground control efforts, the Department has historically participated in the following weed management roles:

- Prior to 2002, FWP managed a general fund account that was used for the Noxious Weed Trust Fund. Since 2002, in accordance with House Bill No. 2 (as amended), these general funds go to the Department of Agriculture general fund account for use in the Noxious Weed Trust Fund. In 2002, \$101,341, and in 2003 \$101,337, was redirected to the Department of Agriculture general fund for use in the Noxious Weed Trust Fund. Recipients of these funds are those deemed by the

Trust Fund Council to have experienced increased weed infestations on their property as a result of outdoor recreation activities and/or wildlife.

Figure 3: FWP statewide noxious weed control expenditures, 1999 - 2004.
Data was not available for 2000.

- The Block Management Program pays approximately \$4 million annually to cooperating landowners. These payments are intended to offset hunter impacts on enrolled lands, including impacts associated with noxious weed control. Through the Block Management Program, FWP influences potential weed control on nearly nine million acres of private land in Montana.
- Senate Bill 326, Section 26, authorized FWP to offer up to 5% in additional incentive payments to Block Management cooperators who agree to use those payments for specific weed management activities on lands under their control. For the 2004 hunting season Block Management cooperators received weed incentive payments totaling \$171,389.05.
- Off-Highway Vehicle Grant funds totaling \$300,000 are available through FWP for 2004-2005. Historically, most of the grants have included funding for weed education and control. For 2004, the portion of off-highway vehicle and recreational vehicle trail grants awarded by FWP that was used for weed control and/or weed education and awareness totaled \$64,500.
- \$1.6 million in federal funding is available through FWP for 2004-2005 trails projects for the creation, completion, maintenance or renovation of recreational trails in Montana. All applications require weed management plans to be in place, and many of the projects include a weed control component.
- FWP education and outreach efforts reached untold numbers of Montana citizens. Notably, in 2004, 80 sixth grade students from Four Georgians Elementary School in Helena and more than 20 adults participated in a spotted knapweed identification and weed pulling field trip near Rimini, Montana.

- During the 2004 hunting season, FWP and the Custer Rod and Gun Club in Miles City, cooperatively sponsored a “Weed Wash.” The weed wash took place in Miles City on opening weekend of the antelope-hunting season. On October 9 and 10, 2004, two local car wash vendors, Big Sky Car Wash and the Lube Center, accepted vouchers for car washes and KATL Radio provided live on-site coverage at no cost. Hunters and fishermen were required to display a valid 2004 conservation license to be eligible. Participants were especially encouraged to wash the undercarriage of their vehicle. The 229 sportsmen and women who participated in the wash also received a vehicle decal (shown below) to illustrate that they are concerned about noxious weeds and willing to help prevent their spread.
- In addition to the efforts seen in eastern Montana, many Block Management cooperators in southwest Montana requested weed identification and informational brochures to distribute to hunters. Several thousand brochures produced by the Greater Yellowstone Coordinating Committee and the Montana State University Extension Service were provided to cooperating landowners prior to the opening of the general big game season.

Figure 4: Several hundred sportsmen's vehicles sported this decal during the 2004 big game hunting season.

FWP hopes to see more future cooperative efforts that include local departments of commerce, county weed districts/boards, agriculture and livestock associations, the Montana Outfitters and Guides Association, other land management agencies, and additional groups of hunters, anglers, and other recreationists.

THE SIKES ACT

The Sikes Act of 1974 (Public Law 92-452) is federal legislation that allows for memoranda of understanding between state fish and wildlife agencies and federal natural resource agencies to develop a funding source and partner in projects for the restoration and enhancement of fish and wildlife habitat on public lands. In about 1993, FWP developed agreements with the U.S. Forest Service and U.S. Bureau of Land Management to cost-share, on a 50:50 basis, for habitat restoration and improvements on public lands. On occasion, projects are funded that have a strong weed control component, which in turn improves fish and wildlife habitat.

In 2004, \$1,000 was granted from the Sikes Act for weed control on Ninepipe Wildlife Management Area. Other projects funded through the Sikes Act have ranged from \$2,000 for weed control on Gallatin National Forest in 2003 to \$17,500 granted in 2002 for weed control on Beaverhead/Deerlodge National Forest (Table 1). Since 2000, weed control totaling \$52,891 has been funded on five Montana National Forests and one FWP Wildlife Management Area.

Sikes Act dollars have also been used to give a funding boost to long-term cooperative efforts such as those undertaken by FWP and the Rocky Mountain Elk Foundation (RMEF). Since 1989, \$250,000 has been spent on weed control on the Blackfoot-Clearwater Wildlife Management Area. The funding for this ongoing weed management endeavor has originated from FWP's Wildlife Division operating budget, RMEF, and Sikes Act grants.

Table 1: Sikes Act dollars spent on noxious weed control projects. 2000 – 2004. *No Sikes Act funding was used for noxious weed control in 2001.

Year*	Beaverhead/Deerlodge National Forest	Custer National Forest	Gallatin National Forest	Helena National Forest	Lolo National Forest	Ninepipe WMA	Total Sikes Act Dollars 2000- 2004
2000	\$8,591	\$6,000			\$5,000		\$19,591
2002	\$17,500			\$5,000	\$4,800		\$27,300
2003		\$3,000	\$2,000				\$5,000
2004						\$1,000	\$1,000
							\$52,891

Additional information on the Sikes Act Program can be found in the *Report to the 59th Montana Legislature, Sikes Act Program 2003/2004, Habitat Enhancement on Public Lands for Wildlife Species that are Fished, Hunted and Trapped*.

Figure 5: Big game winter range on the Blackfoot-Clearwater WMA (16,354 acres) has benefited from many years of cooperative weed control effort and funding.

A NEW COOPERATIVE VENTURE

During the spring and summer of 2004, the Montana Department of Agriculture (MDA), in cooperation with FWP, initiated an innovative project. MDA personnel conducted an evaluation of weed control effort and success on FWP owned and managed properties.

The evaluation conducted by MDA personnel included 123 fishing access sites and two state parks. The site evaluations indicated that FWP is achieving noxious weed control successes statewide. Of the sites visited during 2004 by MDA, FWP staff had determined in 2003 that 85% of these sites had stable or decreasing noxious weed infestations.

Other valuable information and outcomes resulting from the 2004 evaluation include the following:

- 67.2% of the sites visited exhibited low (or non-existing) weed densities, 18.4% moderate weed densities, and only 14.4% were deemed by the Department of Agriculture to have high weed densities. Noxious weeds were not found or identified on ten percent of all sites visited. Many of the FWP owned and managed sites have seen considerable improvement since FWP acquired ownership and initiated management of the properties.
- Of the FWP sites deemed as having high weed densities, 94% received treatment in 2003.

- Of the sites deemed as having medium weed densities, 86% received treatment in 2003.
- Noxious weeds were not present on 16% of the low-density sites. Of the sites deemed as having low weed densities, 72.4% received treatment in 2004.
- Of the visited sites that had weeds present, 24% had weed densities of one percent or less. Of these very low-density sites, FWP staff determined that 81.5% had weed densities that were stable or decreasing in 2003.
- In 2003, weed control efforts occurred on nearly 93% of all the sites visited that had weeds.
- In 2002, weed control efforts occurred on nearly 85% of all the sites visited that had weeds.

Fish, Wildlife and Parks and the Department of Agriculture have determined that this evaluation, initiated during the spring and summer of 2004, will be a very valuable tool to determine weed control successes and weaknesses and aid noxious weed control efforts statewide. FWP hopes that through consistent methodology and scope, this and future evaluations can be used to positively impact control efforts by helping weed control personnel focus on areas that might require additional attention. Additionally, FWP is pleased to be offering assistance for a cost-sharing effort to see that this mission is continued into the future. This cooperative endeavor has established a new precedent in noxious weed control with the desired outcome of improved weed control efficiency and effectiveness for public and private land managers statewide.

In addition to data gathered during 2004, future cooperative assessments will include weed infestation and control assessments of public and private lands adjacent to FWP sites. The measure of weed densities and control effort on these adjacent lands will provide valuable insight into FWP weed control successes and weaknesses on these sites and will also provide a gauge of the outlying seed source hindering FWP efforts.

CONCLUSION

FWP owns and manages less than one-half of one percent of all lands in Montana, yet spends over half of a million dollars annually on weed control and related activities on FWP owned and managed land and more than an additional \$171,389 in Block Management Weed Incentive Payments for private land weed control. A total of nearly four million in sportsmen's dollars are provided annually to private landowners through the Block Management Program, for use in farm and ranch operations, which may include weed management activities. In addition to FWP funding sources, nearly one million dollars in federal trails project grant funding were provided through FWP in 2004. Federal trails projects require weed management plans to be in place and frequently include a weed control component.

FWP takes great pride in its accomplishments, yet recognizes that there is always room for improvement, especially in noxious weed control. Continuation of current levels of effort and expenditures, along with new cooperative evaluation programs such as the one initiated by Montana Department of Agriculture and Montana Fish, Wildlife and Parks, will help ensure that past and present advances in weed control are not lost. No single private, state, or federal entity will achieve large-scale noxious weed control success on its own. Only through cooperation and collaboration will we continue to gain ground, statewide, in the battle against noxious weeds.

* Approximate total number of insects released.

¹County Agreement Status = Current(C), or Pending(P)

²Infestation Status = Increasing(>), Decreasing(<), or Stable(-)

³Weed Species Key

1 = Spotted Knapweed	7 = Sulfur Cinquefoil	13 = Ox-eye Daisy	19 = Tall Buttercup	25 = Yellow-Flag Iris
2 = Leafy Spurge	8 = Diffuse Knapweed	14 = Dyers Woad	20 = Tamarisk (Saltcedar)	26 = Eurasian Milfoil
3 = Dalmation Toadflax	9 = Russian Knapweed	15 = Purple Loosetrife	21 = Yellow Starthistle	27 = Perennial Pepperweed
4 = Canada Thistle	10 = Whitetop	16 = Tansy Ragwort	22 = Common Crupina	28 =
5 = Field Bindweed	11 = St. Johnswort	17 = Meadow Hawkweed	23 = Rush Skeletonweed	29 =
6 = Houndstongue	12 = Common Tansy	18 = Orange Hawkweed	24 = Yellow Toadflax	30 =

⁴Priority Rating Key

- 1= High Priority: new or small infestations that can be reduced/eradicated, or is a new invader.
- 2= Medium Priority: established infestations that may be reduced with continued efforts.
- 3= Low priority: large, established infestations where control efforts are limited to containment, suppression, and prevention of new infestations.

¹County Agreement Status = Current(C), or Pending(P)

²Infestation Status = Increasing(>), Decreasing(<), or Stable(-)

³Weed Species Key

1 = Spotted Knapweed	7 = Sulfur Cinquefoil	13 = Ox-eye Daisy
2 = Leafy Spurge	8 = Diffuse Knapweed	14 = Dyers Woad
3 = Dalmatian Toadflax	9 = Russian Knapweed	15 = Purple Loosetrife
4 = Canada Thistle	10 = Whitetop	16 = Tansy Ragwort
5 = Field Bindweed	11 = St. Johnswort	17 = Meadow Hawkweed
6 = Houndstongue	12 = Common Tansy	18 = Orange Hawkweed

⁴Priority Rating Key

- 1= High Priority: new or small infestations that can be reduced/eradicated, or a new invader.
 2= Medium Priority: established infestations that can be reduced with continued efforts.
 3= Low priority: large, established infestations where control efforts are limited to containment, suppression, and prevention of new infestations.

APPENDIX J

2002 – 2003 Biennial Report Prepared for the Montana
Department of Agriculture

STATE AGENCY BIENNIAL NOXIOUS WEED MANAGEMENT SUMMARY REPORT FORM (FY 02-03)

REPORTING AGENCY: Montana Fish, Wildlife & Parks

COUNTY	MANAGEMENT PLAN STATUS	MAJOR GOALS	FY 02-03 BIENNIUM EXPENDITURES	PROPOSED FY 04-05 BIENNIUM BUDGET
BEAVERHEAD	On track-- Annual plans discussed with supervisor/board; signed agreements for 02 & 03; six year plan revision adopted.	Continue contracting w/ county for chemical control at various FAS's and State Parks. Continue participation in watershed weed project. Continue mowing, bio-insect work and chemical spraying. Participate in weed days; comply w/ HB 395 requirements; increase funding of weed program.	\$9,484.00	\$11,000.00
BIG HORN	Current. Will be updated in 2004. Weed map for Chief Plenty Coups SP and Grand Marsh FAS have been completed.	Continue to monitor and control knapweed infestation at State Parks and FAS's. Continue to work with contractor on Chief Plenty Coups State Park weed control. Develop site management plan for Grant Marsh FAS.	\$18892.00	\$21,694.00
BLAINE	Current	FAS: Continue to survey for noxious weeds and spray when found,. FWP and County will do spray work.	\$0.00	\$150.00
BROADWATER	On track-- Annual plans discussed with supervisor/board; signed agreements for 02&03; six-year plan revision in place.	Continue arrangement w/ county for chemical application at York's Island and Toston FAS; continue FWP staff involvement w/ mowing, pulling and bio-insect releases; implement revised six year weed mgt plan; comply w/ HB 395 requirements.	\$240.00	\$320.00
CARBON	Current – Will be updated in 2004	Continue work at Cooney State park, FASs and Silver Run WMA	\$17,306.00	\$18,904.00
CARTER	Current	Monitor treatment for Canada Thistle at Medicine Rocks SP.	\$710.00	\$300.00

CASCADE	Current cooperative agreement in place with the county.	Continued biological-chemical and mechanical control utilized. Continued monitoring of new invaders and existing infestations. All State Parks and FAS's in Cascade County.	\$9286.67	\$11,500.00
CHOUTEAU	Current cooperative agreement in place with Craig Ferris and the county.	Continued biological-chemical and mechanical control of noxious weeds. Continued monitoring for new invaders.	\$302.20	\$450.00
CUSTER	Current	Continue to monitor and treat purple loosestrife at Kinsey Bridge FAS. Continue containment and reduction of leafy spurge at Priogue Island using chemical and bio-control methods.	\$2,450.00	\$6,016.00
DANIELS	Current	FAS: Chemical and mechanical control. Chemical control by County and FWP	\$313.00	\$350.00
DAWSON	Current	Continue co-op partnership on spurge grazing project at Makoshika SP. Expand and diversify bio-control insect populations at Yellowstone River WMA.	\$9,163.00	\$7,740.00
DEER LODGE	Current, up-dated and approved through 2007	Roadside chemical treatment continued west of Divide on Mount Haggin WMA, knapweed and leafy spurge biologic agents distributed to inaccessible areas. Known infestations sprayed east of Divide on Mount Haggin WMA Helicopter spraying completed in October 2002. Newly acquired Garrity Mountain WMA; continue county co-op on WMA's and state parks.	\$26,734.50	\$20,000.00
FALLON	Current	Monitor Canada thistle efforts at South Sandstone FAS	\$420.00	\$240.00
FERGUS	Current – Cooperative agreement in place with County. Currently chemical and mechanical control by contract sprayer (Helena Weed Control). Have contacted Joe Foran with Fergus County and we will be working on an agreement for spraying on FAS's.	Continued chemical and mechanical control of weeds. Includes bio-control and continued monitoring for new invaders.	\$4,137.34	\$4,750
FLATHEAD	Updated Plan in place 02-08 County Agreement Current.	Continue to control existing weeds and survey for new invaders.	\$8,000.00	\$9,000.00

GALLATIN	On track- Annual plans discussed with supervisor/board; signed agreement for 02&03; six-year plan revision in place.	Continue chemical application agreement w/ county; use private contractor for chemical work at Cameron, Kirk, Erwin and Gallatin Forks FAS's and Headwaters and Buffalo Jump SP's; continue mowing Cherry River FAS; continue bio-insectary work at Erwin, Drouillard and Greycliff; continue bio contract for field work and evaluation; follow revised weed mgt plan; comply w/ HB 395 requirements through annual plans	\$9,799.00	\$11,000.00
GARFIELD	Current	Monitor Canada Thistle control work at Hell Creek SP; monitor adjacent lands for salt cedar infestation	\$9,192.00	\$320.00
GLACIER	No FWP Sites in this county		\$0.00	\$0.00
GOLDEN VALLEY	No FWP Sites in this county		\$0.00	\$0.00
GRANITE HILL	Current	Co-op with County on FAS's	\$100.00	\$100.00
	Current	FAS/WMA: Biological Control and chemical control (County does all chemical and biological control. FAS: Mechanical control (Mowing by FWP)	\$6,616.26	\$7,500.00
JEFFERSON	Weed control activities are on- going, mainly at Lewis & Clark Caverns; weed agreement signed for 02 & 03; six year mgt. plan revisions in place	Continue major weed control program at Lewis and Clark Caverns SP using chemical contractor and FWP staff applicators, also bio-insect and mechanical work will continue here; the six FAS's will be monitored and chemical control and/or insect releases will be used; revised weed mgt plan will continue to be followed; HB 395 requirements will be addressed biennially.	\$7,340.00	\$8,000.00
JUDITH BASIN	Current cooperative agreement with county. Chemical and mechanical control by contract sprayer (Helena Weed Control). Contacted Robert Montgomery, Judith Basin County Weed Supervisor; Judith Basin will be contracting with FWP for weed control services next year.	1 Wildlife Management Area – 4 treatments. Continued chemical and mechanical control of weeds. Includes bio-control and continued monitoring for new invaders.	\$3,168.25	\$4,250.00

LAKE	Updated 6-yr plan in place 02-08. Current County Agreement	Continue to control existing weeds and expand treatment to new areas.	\$55,900	\$57,400.00
LEWIS AND CLARK	Current cooperative agreement with county. Currently chemical and mechanical control by contract sprayer (Helena Weed Control). Expect to continue with contract weed control after discussion with county weed supervisor. On Track – Annual plans discussed with supervisor/board; signed agreement for 02/03 in place; six year plan revision adopted.	1 Wildlife Management Area – 6 treatments. Continue chemical, mechanical, and biological control of weeds. Also continue monitoring for new invaders. Continue private contracting for mechanical control at SPs and FASs; continue in-house minor cutting and pulling; pursue increase in funding for FAS weed control; continue to follow revised six year weed management plan; comply w/HB 395 requirements	\$28,822.98	\$30,880.00
LIBERTY	No FWP land in this county.		\$0.00	\$0.00
LINCOLN	Update 6-yr plan in place	Continue monitoring for weeds and using chemical, biological/mechanical control methods as needed on all sites.	\$4,900.00	\$9,050.00
McCONE	Current	FAS: Chemical and mechanical (mowing) control by FWP.	\$120.00	\$150.00
MADISON	On track-- Annual plans discussed with supervisor/board; signed agreement for 02&03 in place; six year plan revision adopted.	Continue chemical work by county a various FAS's; focus on knapweed problem at Raynold's Pass; continue to participate in the South Madison Pilot Project (financially and in committee); continue to participate in Upper Ruby Weed Project; continue w/ other IWM methods by FWP staff; work on increasing FAS weed budgets; continue to implement revised six year weed mgt plan; comply w/ HB 395 requirements.	\$52,536.00	\$49,000.00
MEAGHER	Current cooperative agreement with county. Chemical and mechanical control by contract sprayer (Helena Weed Control). Have contacted Otto Olsen, Meagher County Weed Supervisor; FWP proposes contracting with Meagher County for weed control on FAS's.	1 Wildlife Management Area – 4 treatments. Continued biological-chemical and mechanical control of noxious weeds. Continued monitoring for new invaders.	\$4,381.24	\$4,746.00
MINERAL	Current	FAS's – Dalmation Toadflax, Spurge, continue county co-op.	\$2,378.79	\$3,000.00

MISSOULA	Current	Contain/eradicate leafy spurge spots and maintain knapweed treatments on Blackfoot-Clearwater WMA; State Parks; FASs; and continue with county co-op. Spurge project on Blackfoot.	\$47,915.58	\$46,000.00
MUSSELSHELL	No FWP lands in this county.		\$0.00	\$0.00
PARK	On track-- Annual plans discussed with supervisor/board; agreement signed for 02&03; six -year plan revision in place.	Continue w/ private contract chemical work at various FAS's; focus on Mallard's Rest and Greyowl FAS; continue bio-insect work and evaluations; work on FAS weed budget increase; continue to implement revised six year weed mgt plan; comply w/ HB 395 requirements; meet with county regarding their special concerns.	\$15,943.00	\$17,000.00
PETROLEUM	No FWP lands in this county.		\$0.00	\$0.00
PHILLIPS	Current	FAS: Mechanical (mowing) control by FWP	\$50.00	\$250.00 (chemical spray for leafy spurge)
PONDERA	No FWP sites in this county.		\$0.00	\$0.00
POWDER RIVER	Current	Expand and diversify bio-control insects for leafy spurge at Broadus Bridge FAS.	\$300.00	\$300.00
POWELL	Current	Contain/eradicate leafy spurge spots and maintain knapweed treatments on Black-Clearwater WMA, FAS's Spurge	\$16,107.68	\$21,900.00
PRAIRIE	Current	Expand and diversify bio-control insect populations for leafy spurge at Powder River Depot FAS; monitor and eradicate spotted knapweed at Fallon Bridge FAS.	\$1,282.00	\$1,000.00
RAVALLI	Current	Continue knapweed treatments in Threemile and Calf Creek WMAs; partner with new Threemile Weed Group; FASs & State Parks – Spurge	\$12,943.21	\$14,800
RICHLAND	Current	Expand and diversify bio-control inset populations for leafy spurge at Yellowstone River FAS and WMA. FAS: Chemical and mechanical control. Chemical control was done by County and FWP.	\$7,638.00	\$7,705.00
ROOSEVELT	Current	FAS: Mechanical control by FWP. (Mowing)	\$110.00	\$200.00

ROSEBUD	Current	Continue to monitor/eradicate knapweed at West Rosebud FAS.	\$1,170.00	\$700.00
SANDERS	Current updated 6-yr plan in place	Continue to control weeds using chemical, biological, mechanical control methods as needed on all sites.	\$3,360.00	\$3,500.00
SHERIDAN	Current	Nothing was done during this biennium	\$0.00	\$0.00
SILVER BOW	Current-per regional weed management plan. Annual plans discussed with supervisor/board; signed agreement for in place for 02/03; six year plan revision adopted	Spot infestations sprayed throughout Fleecer WMA. Helicopter spraying completed in October 2002. 2003 helicopter spraying postponed due to dry conditions. Biologic agents put on remote infestations throughout Fleecer and Mount Haggin WMA's. Continue chemical application agreement w/county at Powerhouse and Browne's Bridge FAS; continue minor IWM activities by FWP staff; continue to implement revised six-year weed management; comply w/HC395 requirements.	\$12,396.00	\$14,700.00
STILLWATER	Current – Will be updated in 2004.	Continue work at FASs and Big Lake WMA	\$7,336.00	\$8,008.00
SWEETGRASS	Current. Will be updated in 2004. Updated weed mps completed for Pelican, Bratten and FAS's and Greycliff Prairie Dogtown State Park.	Continue work and sheep grazing at FASs. Complete site plans for Pelican, Boulder Forks, and Bratten FAS's and Greycliff Prairie Dogtown State Park.	\$9,649.00	\$9,740.00
TETON	Current cooperative agreement with county. Current weed management agreement in place with Paul Wick, Weed Supervisor Teton County Weed District.	3 Wildlife Management Area – 22 treatments. Continued biological-chemical and mechanical control of noxious weeds. Continued monitoring for new invaders.	\$8,215.43	\$9,875.00
TOOLE	No FWP sites in this County.		\$0.00	\$0.00
TREASURE	Current	Continue to monitor/eradicate knapweed at Myers Bride FAS; monitor salt cedar infestation.	\$4,170.00	\$2,220.00
VALLEY	Current	FAS: Chemical control by FWP	\$831.56	\$1,000.00
WHEATLAND	Current. Will be updated in 2004	Continue co-op with Lower Musselshell Conservation District and Deadman's Basin on Salt Cedar projects.	\$2,741.00	\$1,400.00
WIBAUX	No FWP sites in this County	No FWP land in Wibaux County	\$0.00	\$0.00
YELLOWSTONE	Current. Will be updated in 2004.	Continue work at FASs and Lake Elmo SP.	\$7,985.00	\$11,886.00
		Total Budgets	\$452,836.69	\$469,994.00

Additional Comments:

- For 2002-2003, the portion of off-highway vehicle and recreational vehicle trail grants awarded by FWP that was used for weed control and/or weed education and awareness was in excess of \$99,000.
- \$1.6 million in federal funding is available through FWP for 2004-2005 trails projects for the creation, completion, maintenance or renovation of recreational trails in Montana. All applications require weed management plans to be in place and many of the projects include a weed control component.
- \$300,000 in off-highway vehicle grant funds are available through FWP for 2004-2005. Historically, most of the grants awarded have included funding for weed education and control.
- In accordance with House Bill 2 (as amended), \$101,341 in 2002 and \$101,337 in 2003 was subtracted from the FWP general fund and added to the Department of Agriculture general fund for use by the Noxious Weed Trust Fund.
- Landowners who participate in Block Management are eligible, by statute, for an additional 5% incentive payment to be used specifically for weed management activities. Participating landowners received \$80,338 in FY02, and \$142,757 in FY03 in weed management incentives payment. Additionally, many landowners apply some or all of the standard Block Management incentive payment to weed management activities. More than \$3.5 million in standard Block Management incentives payments is paid annually to landowners who participate in the program.
- In 2002, FWP costs for weed-related activities around the Capitol Complex in Helena totaled \$8,509.
- Currently, FWP has more than 25 employees licensed by the Department of Agriculture for herbicide application on FWP sites.
