We have some nice 2-year-old Sioux Blackcap Raspberries that have proven to be the hardiest of all Blackcaps, that we will sell in limited amounts at 50c a plant. They are selected from plants growing wild on the Sioux Indian Reservation.

We have a raspberry which we think is a seedling that came among a bunch of common raspberries which grew for us until winter came on. This one appeared different. In the spring it was the only one that lived and showed to be hardy. Very fine large berries. We have only a limited amount of plants and can only furnish them for experimental purposes at \$2.50 each, 2-year plants.

Favorite Trailing Blackberry

The Berry that is hardy and yields large crops of very fine flavored Berries with us at the Nursery and here are a few letters from others.

McNeely, S. D., June 27, 1916.

Rosebud Nursery,
Winner, South Dakota.

Gents:-I have raised the Favorite Trailing Blackberry for many years. They certainly are great producers and the fruit is fine.

Yours respectfully,
J. N. MARTIN.

Colome, S. D., November 17, 1916.

Rosebud Nursery,
Winner, South Dakota.

Gents:-My father was a Blackberry raiser in Iowa and I spent my boyhooh helping to raise each year wagon loads of Blackberries, we had all the leading varities and some novelties. I must say that the Kaspar Favorite Trailing Blackberry is the best flavored, nicest and largest Blackberry I ever saw.

Yours respectfully,
FRANK DAUGHTERS

Ideal, S. D., April 18, 1916.

Rosebud Nursery,
Winner, South Dakota.

Gents:-The Kaspar Favorite Trailing Blackberry has done well and bore a fairly good crop last year, the second year after planted.

Yours respectfully,
MARTIN F. JORGONSEN,

P. S. This is not an ordinary Blackberry and will produce where others fail and will bear for you as well as for others, and what a flavor! See description in price list.

BLACKBERRIES

Each Doz. 100
Snider, Stone's Hardy, Blower and Ancient Briton.... 15c 75c \$5.00
Favorite Trailing Blackberry. This variety has proven itself to be the hardiest and most productive berry on the Rosebud. It blooms a month later than an apple or cherry tree and when slightly covered is perfectly hardy, and if not covered some of the plants may freeze back, but they will put out new shoots and have blooms and fruit on them that year. Fruit is beautiful, large and good flavored. It is very productive. Mr. Jos. Pelc, of Winner, S. D., on the 4th of January, 1916, says: "I had a chance to observe the Favorite Trailing Blackberry five years, growing side of Snider, Stone's Hardy, Ancient Briton, Blower and others, also Lencretia and Premo Dewberry. I found that they bore fruit when others failed. I found them extremely hardy, and if any plant froze back it bloomed and had fruit on new wood. They bloom thirty days later than apple trees. The fruit is beautiful and of excellent flavor." We have many other testimonials.

Two-year plants, 25c each, \$2.50 a dozen, 25 for \$5.00, \$18.00 a 100.
