KELSEY'S HARDY AMERICAN PLANTS

PRICES ARE AT BOXFORD NURSERY

Rhododendrons, detail of edging. Ferns, Violets, etc.

NEW INTRODUCTIONS

New or little-known plants we have introduced to general cultivation include the following: *Azalea vaseyi*, *Tsuga caroliniana* (Carolina Hemlock), *Rhododendron carolinianum*, *Shortia galacifolia*, *Stewartia pentagyna* (American Camellia), *Sarracenia catesbæi*, *Galax aphylla*, *Vaccinium erythrocarpum*, *Rhododendron catawbiense*, *Lilium grayi*, *L. carolinianum*, *Azalea arborescens*, *Saxifraga leucanthemifolia*, *Leucothoe catesbæi*, *Abies fraseri*, *Azalea lutea* (Flame-colored Azalea), *Asarum macranthum*, *Robinia kelseyi*, *Leiophyllum prostratum*, and dozens of others.

WHY KELSEY'S NATIVE PLANTS ARE SO SUCCESSFUL

No small part of our success is due to the fact that these wild plants have been carefully transplanted and **made ready for safe planting by the buyer**, and the use of cheap "collected stock," lately so freely exploited by imitators, discouraged. The best and not the cheapest has been my persistent aim, and thousands of the finest estates and public grounds owe their charm and beauty to this fact. Besides this, nowhere else in America is found such a wealth of beautiful, wild, flowering shrubs and plants as in the Carolina mountains, and here soil and climate combine to make ideal conditions for growing not realized elsewhere on the continent.

PHONES, 6380 AND 6381 CORTLANDT

April 30th, 1917.

Dear Sir:-

HARDY HYBRID RHODODENDRONS have been at a premium this season due to war conditions, and the non-arrival of shipments of nursery stock from Europe.

Of our first class Domestic Stock, we have now for prompt shipment 500 very fine plants, several times transplanted with ball, bushy and budded plants, suitable for immediate effect, and of the finest varieties, mainly, Reds and Crimsons, such as Atrosanguineum, Caractacus, Abraham Lincoln, Kottledrum, Lady Clermont, Mrs. Milner, F. D. Godman, Edward S. Rand, H. W. Sargent, and others, Everestianum, Gloriosum, Grandiflorum, etc.

We now offer you these superior Hybrid Rhododendrons, viz.

250 of the 18 to 24 in. plants at \$148.50 per 100
250 of the 2 to 2½ ft. plants at \$180.00 per 100

- a ten per cent reduction from our Wholesale Price List enclosed, or the complete collection of 250 of each grade, the full 500 plants for \$740.00. Or the 250 each grade for \$340.00 and \$420, respectively.

We are making this special offer to only a few of our present and prospective patrons to further extend the use of these beautiful Rhododendrons, which have everywhere given such excellent satisfaction in the many country estates we have for years furnished with these plants.

This is also an excellent time to plant the following stock on which we make you special terms as follows:-

RHODODENDRON MAXIMUM and KALMIA LARIFOLIA, fine plants, \$90.00 per car load.
HEMLOCKS, transplanted, 2 to 3 ft., \$55.00 per 100; 3 to 4 ft. \$90.00 per 100
HEMLOCKS, Native, 6 to 12 in., \$16.00 per 1000; 1 to 2 ft. \$27.50 per 1000
BERBERIS THUNBERGII, Bushy, 1½ to 2 ft. \$7.50 per 100, \$70.00 per 1000
2 to 3 ft. 12.00 per 100, 98.50 per 1000
3 to 4 ft. 20.00 per 100, 185.00 per 1000

We suggest you telephone or wire at our expense on receipt of this your requirements, this offer being made subject to the stock remaining unsold.

Very truly yours,

W/M

F. W. KELSEY NURSERY COMPANY.

Thousands of plant-lovers would make a **Rhododendron** bed or planting if they felt assured of successful results

SUCCESSFUL RHODODENDRON BORDERS

SIMPLE RULES WHICH WILL BRING PLEASING AND LASTING RESULTS

Many, discouraged by imagined or heard-of difficulties, never even make the attempt to grow Rhododendrons; yet, under average conditions, success is as simple and sure as with ordinary shrubs. It is a question of doing the right thing before, during, and after planting.

Nature Knows Best. Rhododendrons—and I include under this term, Azaleas, Kalmias, Leucothoës, and other ericaceous genera and similar native (and exotic) plants—grow naturally in shady, damp situations, being surface feeders, with fine, hair-like rootlets. Plainly, therefore, dry, hard ground or drought checks growth or kills outright. Nature provides against this by supplying a mulch of leaves the year round; very few gardeners have learned this lesson.

First Excavate the Bed, unless conditions are already favorable. A deep, porous soil prevents drought; excavate 2 to 3 feet or more, and see that in clay soils good drainage is provided, so that water will not stagnate in the bottom and make "sour ground."

Material for the Bed. Rhododendrons live largely on vegetable mold and humus, presumably through the medium of a mycelium, which increases rapidly under suitable conditions; therefore fill in the excavation with woods' or leaf-mold, good loam, rotted field sods and a third in bulk of swamp muck or pulverized peat; while filling in this mixture one-tenth of sharp sand, or even more, should be added; if any manure is used, it must in every case be well rotted and practically reduced to humus. The center of the bed or plantation may be raised 6 to 12 inches above surrounding ground, after allowing for natural settling.

Planting. Plant the same depth as before (shown by earth line, or "collar" on stem) and firmly press soil around roots with the foot, but don't pack the earth too solid—Rhododendrons are not telegraph poles. "Fillers," including Lilies and other bulbs and smaller ground-covering species, should be planted after the larger plants are all in and properly spaced.

Water. Soak all plantings with all the water they will take, for there is no other satisfactory way to settle the earth firmly and bring it into physical contact with the roots.

The Great Secret. Mulch, and yet mulch again, all the year round. As soon as planted, cover the entire surface of the ground with a vegetable mulching—preferably hardwood leaves—to the depth of several inches when reasonably well settled. Never remove this mulching, but let it remain the year round, and every fall add a new layer of similar depth. A foot of leaves in the fall means but a half-inch or so of humus the coming season—the future food of the Rhododendrons or Azaleas. A thin dressing of loam and well-rotted manure may be used to hold down the fresh leaves till they begin to decay. The leaves keep the surface cool in summer and warm in winter. This is the great secret of Rhododendron-growing.

Winter Protection. If convenient, protect them with pine or other evergreen boughs, particularly where exposed to the sun and wind; yet Rhododendrons rarely suffer in the latitude of Boston or Buffalo, if properly planted and mulched.

KELSEY'S HARDY AMERICAN RHODODENDRONS

PRICES ARE AT BOXFORD NURSERY

In the latitude of Ottawa and Quebec, Canada, a board fencing may be placed around the edge of the bed and much heavier temporary mulching of straw, etc., filled in almost or quite to the tops of the plants. It is rarely necessary to build a board cover, except on southern exposures to prevent sunburn, or with tender varieties not suitable for general planting, and even then evergreen boughs are preferable. Good ventilation must be provided.

Selecting the Location. For the Rhododendron bed, select a northern exposure, where possible, especially in low elevations in the South, or elsewhere where freezing and thawing is quite continual. A direct winter sun on the frozen leaves of any broad-leaved evergreen often kills outright or spoils the foliage. The north side of the building, wall, woods, or hill is always preferable, and wind-swept locations should be avoided, unless proper measures are taken to check the heavy winds.

Limestone Soils Mean Death. Most ericaceous plants, and particularly Rhododendrons, Kalmias, Azaleas, Leucothoës, Vacciniums, Andromedas, Galax, Epigæa and similar species, and some Lilies and Ferns will not endure large quantities of lime in any form. Permanent satisfactory results cannot be had, therefore, in soils impregnated with lime, and, where such conditions exist, excavation and filling in with proper materials must be resorted to. Sulfate of magnesia in considerable quantities is said to be a specific for limestone conditions, but conclusive experiments are yet to be made. An acid-soil condition must be maintained.

ENEMIES OF THE RHODODENDRON

Rhododendrons, Kalmias and similar plants have very few enemies. The only serious one is the Lace-wing Fly, which is native from New England throughout the Alleghanies, and is found on *Kalmia angustifolia*, *Rhododendron maximum*, and *Kalmia latifolia*. This pest appears in early spring on the under side of the leaves and gets its sustenance by sucking the sap. The leaves turn brown, giving the plant a ragged, unkempt appearance. It is easily disposed of by spraying the under side of the leaves, using a very fine nozzle, with an emulsion of ten gallons of whale-oil soap to one hundred gallons of water. While the Lace-wing Fly is more at home on *Rhododendron maximum*, it does not hesitate to attack all other species to a greater or less extent. Plants in the shade are rarely infested to any great degree.

'FILLERS'—PLANTS TO BE USED WITH RHODODENDRONS

For the best landscape effects, as well as providing a continual succession of bloom throughout the season, and actually protecting the Rhododendrons and supplying a "feathered" edge to the ground, a large variety of shrubs and plants may be employed with the finest results. In fact, the clear planting of Rhododendrons without the use of "filler" or "edging" plants gives harsh, formal effects, which are neither desirable nor natural in any way. In the use of "fillers" great care must be taken as to time of blooming and color effects, so they do not clash. It is surprising how many "filler" plants can be used without detracting from the broad evergreen effect, and yet supplying an amazing amount of interesting detail and a continuous show of blossoms against a beautiful Rhododendron leaf background.

SOME OF THE BEST "FILLERS" AND "EDGING PLANTS"

Andromeda polifolia, *Chamædaphne calyculata*, *Leiophyllum buxifolium*, *L. prostratum*, *Ilex glabra*, *Leucothoe catesbæi*, *Pieris floribunda*, *Ericas*, *Callunas*, *Taxus canadensis*, *Galax aphylla*, *Gaultheria procumbens*, *Houstonia missillifolia*, *Mitchella repens*, *Shortia galacifolia*, *Vinca minor*, *V. minor alba*, *Zanthorhiza apiifolia*, Lilies, Trilliums, Erythroniums, Violets, Ferns in great variety, *Dicentra eximia*, Iris, Azaleas, *Ilex verticillata*, *Aronia arbutifolia*, and many other berry-bearing shrubs.

SAMPLE LIST OF MATERIALS USED IN A SMALL BUT SUCCESSFUL RHODODENDRON BED

Garden of Mr. George W. Meith, Hubbard Woods, Ill.

This planting was made from suggestions and stock furnished by Harlan P. Kelsey, but an edging of violets was supplied from customer's own grounds. The planting proved a successful typical grouping at a minimum cost, of broad-leaved evergreens and "filler plants," which might be varied indefinitely at the will of the planter.

1 Rhododendron maximum, 2 to 3 ft., clump.	25 Dryopteris, in variety.
3 Rhododendron maximum, 1½ to 2 ft.	10 Eupatorium ageratoides.
10 Rhododendron maximum, 1 to 1½ ft., clumps.	3 Azalea arboreas, 1 to 1½ ft., clumps.
1 Rhododendron carolinianum, 1 to 1½ ft., clump.	10 Azalea nudiflora, 6 to 12 in., clumps.
2 Rhododendron catawbiense, 2 to 3 ft., clumps.	5 Azalea vaseyi, 6 to 12 in., clumps.
10 Rhododendron catawbiense, 9 to 18 in., clps.	2 Pieris (Andromeda) floribunda, 6 to 12 in., clumps.
5 Kalmia latifolia, 1 to 1½ ft. clumps.	10 Aronia nigra, 1 to 2 ft.
10 Kalmia latifolia, 6 to 9 in., clumps.	5 Clethra alnifolia, 1 to 2 ft.
10 Leucothoe catesbæi, 6 to 12 in., clumps.	1 Chionanthus virginica, 3 to 4 ft.
10 Aronia arbutifolia, 2 to 3 ft.	5 Azalea viscosa, 1½ to 2 ft.
30 Zanthorhiza apiifolia, 6 to 12 in., clumps.	20 Lilium superbum, first size.
5 Eonymus radicans.	20 Lilium canadense, first size.
1 Ampelopsis engelmanni.	

Total cost, \$65.90.

HARLAN P. KELSEY, Owner, SALEM, MASS.

Follow nature in grouping **Rhododendrons, Mountain Laurel** and other native plants

KELSEY'S HARDY AMERICAN RHODODENDRONS, KALMIAS, ANDROMEDAS AND OTHER EVERGREEN SHRUBS

At Boxford Nursery, Boxford, Massachusetts

Given proper soil conditions and exposure or location, all these native species are perfectly hardy in the latitude of Quebec

The desirable hybrids are not strictly hardy—many are really tender—and so for general planting and for successful results we must turn to our hardy native species, using the hybrids sparingly or where specially protected by mass planting of the indigenous sorts. Our Highlands Nursery is situated in the home of the American Rhododendron. Not even in Asia do Rhododendrons grow so luxuriantly as in our own southern Alleghany Mountains, where they attain a height of 30 feet and more, assuming tree-like proportions. They must be seen in their native lavishness of growth and bloom, on the mountain sides or hanging over the dashing, ice-cold streams and waterfalls, to be properly appreciated, and a trip to the high Carolina mountains in spring and early summer is a never-to-be-forgotten series of joys to the lover of nature.

With proper knowledge and experience, this beauty and wildness may be transferred to our gardens and lawns. Our long experience is at the service of customers at all times.

Thousands of the finest specimens in clumps filled with flower buds are at Boxford Nursery. These are transplanted many times and will produce an immediate effect.

Prices are for heavy, nursery-grown stock, f.o.b. cars at Boxford Nursery, Boxford, Mass.

All plants, except rarely the smallest sizes under 1 foot, are balled and burlaped separately.

Use hardy American Lilies, Trilliums, and other bulbs as "fillers" and "edging" for the Rhododendron bed. A special bulb list is ready, and will be freely sent.

KELSEY'S HARDY AMERICAN RHODODENDRONS

PRICES ARE AT BOXFORD NURSERY

Rhododendron carolinianum. The beautiful new pink dwarf species introduced by Harlan P. Kelsey. Absolutely hardy

RHODODENDRON CAROLINIANUM

A NEW AMERICAN SPECIES. CLEAR PINK. ABSOLUTELY HARDY

This is one of our finest introductions and fills a long-felt want for a hardy dwarf Rhododendron with flowers free from any hint of magenta. It was described and named by Alfred Rehder, of the Arnold Arboretum, Jamaica Plain, Massachusetts.

It is the smallest Alleghanian species, attaining a height of 6 to 8 feet in cultivation. Leaves dark green, usually blunt and narrow, covered with rusty dots below, much smaller than either maximum or catawbiense. Flower-clusters appear in greatest profusion in June, covering the plant with a rose-colored mantle. Fine for rocky slopes or hillsides, standing exposure unusually well, and invaluable as a single specimen or for massing with the other species.

RHODODENDRON CATAWBIENSE of the Carolina Mountains

THE HADIEST OF ALL RHODODENDRONS

It was this magnificent *Rhododendron* that over a hundred years ago was introduced into Europe, supplying, together with *Rhododendron maximum*, color and hardy blood to the cultivated "hybrids," but with a consequent loss of hardiness; and so today, for American gardens, where iron-clad hardiness is essential, we must turn to the true original species, found on the loftiest, coldest peaks of the southern Alleghanies, where it attains a height of 20 to 30 feet.

Considering the extreme hardiness, color of flower, compact growth, and remarkable texture of foliage, which is a deep, shining green, and far superior to the better-known *Rhododendron maximum*, we can recommend the true native *catawbiense* as the finest for general use, withstanding exposure and extremes of temperature where other *Rhododendrons* fail.

Do not confuse this true species, which is absolutely hardy, with the common so-called cataw-

KELSEY'S HARDY AMERICAN RHODODENDRONS

PRICES ARE AT BOXFORD NURSERY

RHODODENDRON CATAWBIENSE, continued

biense hybrid seedling so freely imported from Europe, which is at best half-hardy, and even when branched above is a single stem, showing bareness underneath for years.

Unlike *Rhododendron maximum*, it is a very free bloomer, with foliage of a dark, rich, lasting green, **which never rusts**. The trusses are a bright red-purple (in marked contrast to the muddy purple of the semi-hardy half-breed imported variety noted above), and as sent out by Highlands Nursery **is always on its own roots**.

For massing to produce a broad-leaved evergreen landscape effect, there is no plant equal to it in the latitude of the northern United States and Canada, where strictly hardy plants must be employed. As a rich, finished border to plantations of the commoner *Rhododendron maximum*, the value of *Rhododendron catawbiense* cannot be over-estimated.

The clumps offered of this beautiful *Rhododendron* are perfect and mostly feathered from the ground and a mass of buds. It is a much freer bloomer than *Rhododendron maximum*. A compact type from the highest mountains will be sent in sizes up to 3-foot clumps if desired.

maximum cataw-
 biense carolinianum

Types of *Rhododendron* leaves showing comparative sizes.

pink flowers appear in large trusses in July, the latest of all the *Rhododendrons*, greatly enhancing its ornamental value as a broad-leaved evergreen for finished landscape effect.

This, with *Rhododendron catawbiense* and *Kalmia latifolia*, are the three best broad-leaved evergreens for large plantations in woodlands, in the border, and on the banks of streams and ponds. We have supplied 35 carloads of *Rhododendron maximum* for a single planting.

RHODODENDRON MAXIMUM

The Great American Rosebay

PERFECTLY HARDY IN THE LATITUDE OF QUEBEC

Rhododendron maximum is without doubt the noblest of American broad-leaved shrubs. It is found growing sparingly in New England and New York, more abundantly in the Pennsylvania mountains, but reaching perfection only in the southern Alleghany Mountains, where it grows in such luxuriance as to form a striking feature in the mountain landscape. Its large, waxy white or delicately

THE BEST HARDY EXOTIC RHODODENDRONS

RHODODENDRON arbutifolium (wilsoni).

A hardy, hybrid, dwarf *Rhododendron* of garden origin, probably a cross between *R. punctatum* and *R. ferrugineum*. Compact growth, bears a profusion of deep rose-colored flowers.

	Each	10
9 to 12 in.	\$1 00	\$8 50
1 to 1½ ft.	2 00	18 00
1½ to 2 ft.	3 00	

hirsutum. Another similar species from the Swiss Alps, but with flowers of lighter shade, and the whole plant hairy.

	Each	10
12 to 15 in.	\$1 50	\$12 50

ferrugineum. Alpine Rose. Dwarf species from the Swiss Alps. Rarely over 2 feet high. Very handsome shrub, suitable for rockery. Small pink or carmine flowers.

	Each	10
12 to 15 in.	\$1 50	\$12 50

Rhododendron ferrugineum album. White Alpine Rose. Same as preceding, with white flowers.

	Each	10
12 to 15 in.	\$1 75	\$15 00

myrtifolium. A fine, hardy hybrid between *R. punctatum* and *R. hirsutum*. This variety is very useful for the rockery and the borders of the *Rhododendron* bed. Covered with clusters of deep rosy pink flowers.

	Each	10
12 to 15 in.	\$1 50	

catawbiense hybrids. Hardest varieties, including the following: *Album elegans*, *Anna Parsons*, *caractacus*, *catawbiense alba*, *everestianum*, *General Grant*, *Mrs. Milner*, *President Lincoln*, *Parsons' Gloriosa*, *purpureum elegans*, *roseum elegans*, and others, according to size and selection, \$1 to \$4 each.

KALMIA LATIFOLIA (The Mountain Laurel)

One of the grandest of our native, broad-leaved, evergreen shrubs, attaining tree-like proportions in our southern mountains. In cultivation it is a broad, thick shrub, and, when in full bloom, of surpassing beauty. The wheel-shaped flowers in close terminal corymbs, pure white to pink, appear in May or June in such profusion as almost to smother the foliage. Its thick, shiny leaves, conspicuous the year round, make it a shrub of greatest value for massing. The hardness of *Kalmia latifolia* is beyond doubt, it being found sparingly in Nova Scotia and increasingly in abundance through New England and the middle Atlantic states (particularly in the higher altitudes), till the crest of the southern Alleghanies is reached. Here the true American home of the broad-leaved ericaceæ and perfect conditions of soil and climate are found, producing such a luxuriance of growth as to form veritable jungles of gorgeous beauty, miles in extent. It is found throughout South Carolina, Georgia, and northern Florida, along the banks of streams and cypress swamps. This proves it to be a plant that will stand almost semi-tropical conditions as well as extreme cold. It is therefore extremely valuable for the southern states, taking its place with the magnificent Indian Azaleas, which are not hardy in the North.

FOR PRICES AND OTHER INFORMATION SEE PAGE 58 OF THIS CATALOG

SPRING, SUMMER, FALL, and WINTER PLANTING. Plant any time!

Rhododendrons, Kalmias, Leucothoës, Andromedas, and practically all broad-leaved evergreens and all conifers may be planted any time of the year with perfect safety **if properly done**. The requirements are to use specimens grown so they will lift with an adequate **ball**, and then use **plenty of water** in planting. In this way we plant with perfect safety **any month in the year**.

This opens up wide possibilities and should be an encouragement to many who find it impossible always to get everything planted during the conventional months. The extra care needed at certain times may make the cost greater, but the results are sure and worth while. It is the "new American horticulture" gained from painstaking experiment and expert knowledge. **We do not recommend** transplanting deciduous trees and shrubs during their growing season, though under proper conditions this too may be done.

KELSEY'S HARDY AMERICAN EVERGREENS

PRICES ARE AT BOXFORD NURSERY

Specimen Evergreens at Boxford Nursery

OTHER HARDY BROAD-LEAVED EVERGREENS AND CONIFEROUS TREES AND SHRUBS AT BOXFORD NURSERY

NOTE: All plants are transplanted and nursery-grown unless plainly marked otherwise.

Abies fraseri. Fraser's Fir as a specimen (see page 11)

The larger sizes are always shipped with balls and are burlaped, which means they will **grow**.

Special selection is always charged at special price. The prices in this catalog cover the average good grade as they run in the nursery row. Where specimens are picked, a price will be made to fit the specimen.

Our Native American Evergreens possess unrivaled characteristics of gracefulness, color, and often grandeur. The Alleghany region is rich in beautiful forms, while the western and Pacific states swell the list with a large number of fine species. The rare Carolina Hemlock (*Tsuga caroliniana*), offered below, we introduced to cultivation.

The sizes following the names indicate the variation in height attained by the shrubs in their wild state. Under cultivation they usually reach the lesser height given.

ABIES arizonica. Silver Cork Fir. 50 to 90 ft. Silver-green foliage of remarkable beauty; cream-colored bark of corky nature. Each 4 to 5 ft.\$5 00

concolor. White Fir. 60 to 250 ft. A western American species of majestic growth and most dependable under eastern conditions. Very hardy, rapid growth. Soft silvery foliage; gray, purple, or canary-yellow cones. Highest recommendation. Each 10 to 1 1/2 ft.\$1 00 \$8 00

10 to 16 ft., specimens, \$15 to 50 00

Abies fraseri as a windbreak or shelter. We have 100,000 from seedlings to 12-foot specimens

ABIES FRASERI. Fraser's Fir. The northern species, *Abies balsamea*, is almost worthless in any but the latitude of middle and northern Maine, as it becomes "leggy," thin, and is short-lived. Fraser's Fir, however, a distinct species from the highest peaks of the Carolina mountains, makes a perfect specimen lawn and screen tree, with dark green, thick-set foliage (blue underneath) and compact, pyramidal habit. It is one of the choicest of all American conifers of the Fir section.

An unusually fine lot of this splendid Fir. The attention of nurserymen is particularly called to *Abies fraseri* as the best Fir of this type that is grown in this country. The sizes listed below are especially bushy and well-rooted. Each

ANDROMEDA floribunda.
See *Pieris floribunda*.

ARCTOSTAPHYLOS uva-ursi. Bearberry. Hardy trailing shrub, very valuable for covering rocky slopes and sandy banks. Bright scarlet fruit.

1-yr. pots, 60 cts. each, \$5 for 10, \$40 per 100.

BUXUS sempervirens arborescens. Tree Box. 10 to 25 ft. The hardiest variety. Old, well-grown specimens are very picturesque, but heavy clipping should be avoided.

6 to 8 in., 20 cts. each, \$1.50 for 10, \$12 per 100.

sempervirens suffruticosa. Dwarf Box. 6 in. to 2 ft. Quite hardy in Salem, where it has been used for many decades as an edging in formal gardens.

4 to 7 in., 15 cts. each, \$1 for 10, \$7 per 100, \$60 per 1,000.

CALLUNAS and ERICA. Heather. 6 in. to 3 ft. The hardy varieties offered are most useful in rockwork and for sandy hillsides and borders. They are ericaceous plants and require a Rhododendron or acid soil for best development. Very choice.

Calluna vulgaris alba (white) var. **humosa**, var. **hammondi**, var. **superba**, and **alporti** (crimson).

Strong plants, 75 cts. each, \$6 for 10, \$50 per 100.

Erica cinerea (rosy violet), **ciliaris** (purple), **herbacea carnea** (pink), and **stewartii**.

Strong plants, 75 cts. each, \$6 for 10, \$50 per 100.

CEDRUS deodara. 50 to 150 ft. Pyramidal habit, very showy, bluish green foliage; barely hardy at Salem, but one of the choicest conifers for use in the South.

6 to 10 in., 35 cts. each, \$3 for 10, \$20 per 100.

libani. Cedar of Lebanon. 50 to 150 ft. Distinctive tree; wide-spreading horizontal branches. An entirely hardy form at Arnold Arboretum, is not yet on the market.

Each 10
6 to 12 in.....\$0 35 \$3 00

CHAMÆDAPHNE calyculata. Leather Leaf. 2 to 3 ft. A fine hardy border plant for the Rhododendron bed or very moist locations. White, nodding flowers in leafy racemes in early spring.

3 to 4 ft.....	3 00	25 00

Juniperus communis depressa at Boxford Nursery. The finest of ground-covers

JUNIPERUS COMMUNIS DEPRESSA. Prostrate Juniper. Without doubt this is the best prostrate form of Juniper for ground-cover. It is at home on sandy or gravelly hillsides, fully exposed to the sun, where single plants often reach a diameter of 15 feet or more. In shade it does well where other shrubs or grass will not thrive, forming a looser covering, however, than in the open. It varies in form from the completely prostrate type to the ascending type. 2 to 4 feet high. We have several thousand transplanted specimens to select from, up to 8 feet in diameter.

	Each	10	100
6- to 12-in. spread.....	\$0 50	\$4 00	\$30 00

1- to 1½-ft. spread.....	\$1 75	\$15 00
1½- to 2-ft. spread.....	2 50	20 00

JUNIPERUS VIRGINIANA. Red Cedar. 15 to 60 feet. Pyramidal habit; dark green to bluish foliage, with many variable forms. This is one of the most useful and characteristic trees of our native landscapes. It rivals the Italian Cypress in beauty, is absolutely

Juniperus virginiana, continued

hardy, and stands sea exposure well. Fruit dark blue and conspicuous, hanging until midwinter. For many effects it is the most useful evergreen for northern latitudes.

This is a specialty at Boxford Nursery and I can supply almost any size trees that are sure to live. We have made some notable plantings of large Cedars in the vicinity of Boston recently and with uniform success.

	Each	10	100

	\$0 30	\$2 50	

rostratum. Mountain Heath. 6 to 12 inches. The Carolina mountains prostrate form of this beautiful genus. Rockwork evergreen, closely covering the surface with a bed of green. In full bloom May or June; produces a striking effect. The delicate flowers are tinged with pink. One of our choicest alpine plants.

3- to 6-in. spread.....	Each	10	100
6- to 9-in. spread.....	\$0 50	\$4 00	\$35 00
		75	6 00

LEUCOTHOE CATESBÆI. 3 to 8 ft. Few shrub evergreens of the broad-leaved sort have the grace of this one. The thick, shining green leaves are evenly disposed on long, recurved branches, with dense racemes of beautiful, white, bell-shaped flowers. As an undershrub or for banks and the borders of streams it is without a rival. The sprays make beautiful winter decorations indoors, turning a rich bronze in the fall where exposed to the sun. My stock of this broad-leaved border plant is the best I have ever had and the larger sizes will give immediate effect. All the heavy clumps come balled, and where the large sizes are used in quantity it is preferable to forward in car shipments. See illustration, page 15.

Leucothoe catesbaei (see page 14)

The most graceful and useful evergreen border plant for Rhododendron beds, along paths and streams, etc.

KELSEY'S HARDY AMERICAN EVERGREENS

PRICES ARE AT BOXFORD NURSERY

Pieris (Andromeda) floribunda. Thousands of specimens. Strictly American grown

PIERIS (Andromeda) floribunda. 2 to 4 ft. One of the finest of all broad-leaved American shrubs. Compact growth, with shining evergreen leaves and abundant racemes of showy white flowers in May. The next season's buds appear after the flowering season and give the plant the appearance of being in bloom the year round. My stock is all strictly American grown and of finest quality. The imported Andromeda is very often difficult to establish.

These plants are feathered to the ground and a mass of buds. It is doubtful if there has been such a stock as these plants ever offered before in this country. It is strictly American-grown stock and is not troubled with the peculiar wilting off which affects Dutch-grown stock.

	Each	10	100

8 to 10 ft.....	10 00		

TSUGA CAROLINIANA. Carolina Hemlock. 40 to 80 feet. This grand new Hemlock, introduced by me, possesses a distinct pyramidal growth, and attains a height of 40 to 80 feet. Its dense, dark foliage and graceful habit are approached only by the finer Japanese Hemlocks. Some fine specimens are to be seen in the Arnold Arboretum, and are the first plants of this Hemlock ever sent out, being supplied by me to Prof. C. S. Sargent in 1884.

The only stock of large *T. caroliniana* in existence that we know of. Specimens from 4 feet up are feathered to the ground and compact and dense. They have been transplanted until they have very large solid balls which are lifted with the plants. The particular attention of nurserymen is called to the fine young stock of transplanted plants which I can offer in 1,000 and 10,000 lots. It is the coming American evergreen for the finest plantings.

	Each	10	100	1,000

	Each	10
3 to 4 ft.....	\$0 30	\$2 50

PRICES ARE AT BOXFORD NURSERY

Azalea (Rhododendron) vaseyi. Southern Azalea. Introduced by Highlands Nursery. See colored illustration on front cover.

Azaleas can be successfully grown almost anywhere, following same instructions given for Rhododendrons. The complete hardiness of all the species we offer is unquestionable. No American shrubs equal the native Azaleas, particularly *A. lutea*, for woodland and hillside plantings.

Our cold Carolina mountains have added no more beautiful plants to gardens than these American Azaleas, not even excepting the magnificent broad-leaved evergreen Rhododendrons of world-wide fame.

AZALEA arborescens. Fragrant White Azalea. 5 to 15 ft. In June the delightfully spicy fragrant white flowers, with pink stamens, appear in profusion, lasting for weeks. Becomes a spreading clump 3 to 6 feet broad in cultivation; easy culture. The foliage of this variety often colors striking shades of red in late autumn, and is the best of all the genus.

The clumps offered have from twenty-five to one hundred stems and are heavily budded with enormous balls.

	Each	10	100
1 to 1½ ft.....	\$0 60	\$5 00	\$45 00
1 to 1½ ft., clumps.....	1 50	12 50	100 00

4 to 5 ft.....	1 00	8 00	

HARDY AMERICAN AZALEAS

The American Azaleas are among the choicest of all ornamentals, whether exotic or native, and were but rarely seen in cultivation before being disseminated by Highlands Nursery.

They are seen at their best when planted in large masses and in properly prepared beds, and they richly repay any unusual care given them. Like most ericaceous plants, they love deep, moist, well-drained soil, and these showy native species are particularly adapted to planting in shrub borders and with Rhododendrons, their brilliant blossoms being set off by a background of dark foliage.

Azalea lutea, continued

expressive of the appearance of its flowers, which are in general of the color of the finest red lead, orange, and bright gold as well as yellow and cream-color. This is certainly the most gay and brilliant-flowering shrub yet known." No more striking landscape effect can be produced than a hillside of *A. lutea* in full bloom. Nearly all quoted above 18 in. are budded. See color illustration on back cover.

These *A. lutea* are splendid clumps with a mass of buds and range in color from light sulphur-yellow to deep red. Where the colors are picked, a special charge will be made.

	Each	10	100

KELSEY'S HARDY AMERICAN TREES AND SHRUBS

PRICES ARE AT BOXFORD NURSERY

AZALEA VASEYI. Southern Azalea. 6 to 15 ft. This showy Azalea was discovered only as late as 1878, and introduced by Highlands Nursery very soon after. It is of easy culture, and is perhaps the most profuse bloomer of all the native species, and the more conspicuous, as its white, pink, or deep rose-colored flowers appear in early April or May before the foliage. Of erect, slender habit naturally, in cultivation it becomes more spreading, while retaining the charming light stem growth. Autumn usually turns the leaves a deep dark crimson, greatly enhancing its beauty and value. See color illustration on front cover.

	Each	10	100

4 to 5 ft.....	\$0 75	\$6 00

prunifolia. Fruit green, yellow, or red.

	Each	10
9 to 12 in.....	\$0 40	\$3 00

prunifolia rinki (ringo). Chinese Apple. 15 to 18 ft. Pink flowers; large fruit; edible.

	Each	10
9 to 12 in.....	\$0 30	\$2 00

sargentii. Low bush; pure white flowers an inch across.

	Each	10
9 to 15 in.....	\$0 40	\$3 00

Malus spectabilis. Small tree with brilliant flowers, the opening buds coral-red.

	Each	10	100
4 to 5 ft.....	\$0 75	\$6 00	\$50 00

spectabilis riversi fl.-pl. Double variety of the last.

	Each	10
9 to 12 in.....	\$0 50	\$4 00

toringo (sieboldi). Shrub form, bluish flowers and small fruit.

	Each	10
1½ to 2 ft.....	\$0 40	\$3 00
2 to 3 ft.....	60	4 00

MENZIESIA pilosa. 3 to 8 ft. Very fine ericaceous plant, with pink bells and bright red bark.

	Each	10
1 to 2 ft.....	\$0 40	\$3 50

MYRICA carolinensis (cerifera). Northern Bayberry. 2 to 8 ft. The finest of ground-covers; dark glossy foliage and conspicuous white fruit in profusion, hanging till into spring.

	Each	10	100	1,000
4 to 6 in.....	\$0 15	\$1 00	\$8 00	\$60 00

gale. Sweet Gale. 3 to 6 ft. Clean shrub; fine foliage

	Each	10	100	1,000
6 to 12 in. S.....	\$0 10	\$0 50	\$4 00	\$30 00
12 to 15 in.....	40	3 50	25 00	

NYSSA sylvatica (multiflora). Black Gum. 30 to 60 ft. Splendid small tree; leaves coloring crimsons and scarlets; perhaps the best of all autumn-colored foliage.

	Each	10
6 to 12 in.....	\$0 50	\$4 00

OSTRYA virginiana. Ironwood. 15 to 40 ft. Clean-growing tree, and fine for hedges.

	Each	10
2 to 3 ft.....	\$0 35	\$3 00
3 to 4 ft.....	50	4 00

OXYDENDRUM arboreum. Tree Andromeda.

15 to 60 ft. This cannot be recommended too highly. New twigs are bright red and foliage colors brilliantly in autumn. Profusion of flowers resembling lilies-of-the-valley in drooping racemes. Should be planted very freely.

	Each	10	100	1,000
1 to 2 ft.....	\$0 40	\$3 50	\$30 00	\$250 00
2 to 3 ft.....	60	5 00	40 00	
3 to 4 ft.....	80	7 00	60 00	
4 to 5 ft.....	1 25	10 00		

PAULOWNIA tomentosa (imperialis). 20 to 40 ft. Remarkable purple flowers in enormous terminal racemes; subtropical in appearance.

	Each	10
6 to 8 ft.....	\$1 50	

PAVIA. See *Æsculus*.

PHELLLODENDRON amurense. Amoor Cork Tree. 30 to 50 ft. Annual branchlets orange-yellow or yellowish gray. A new tree of great value.

	Each	10	100
9 to 12 in.....	\$0 25	\$2 00	\$18 00

sachalinense. 40 to 50 ft. The hardest species and a splendid tree; showy black fruit in broad panicles.

	Each	10	100	1,000
1 to 2 ft.....	\$0 30	\$2 50	\$20 00	\$160 00

POPULUS deltoides. Carolina Poplar. 50 to 100 ft. Quick-growing, soft-wooded tree.

	Each	10	100
6 to 8 ft.....	\$0 60	\$5 00	\$40 00
8 to 10 ft.....	1 25	10 00	
10 to 12 ft.....	1 50	12 50	

nigra italica (fastigiata). Lombardy Poplar. 40 to 60 ft. Of great value for places where a columnar tree is needed; not long lived.

	Each	10	100
5 to 6 ft.....	\$0 50	\$4 00	\$30 00
6 to 7 ft.....	75	6 00	50 00
8 to 10 ft.....	1 25	10 00	80 00
10 to 12 ft.....	1 50	12 50	110 00

PRUNUS americana. Wild Plum. 10 to 20 ft.
A fine species for thickets and borders.

	Each	10	100	1,000
6 to 9 in. S.....	\$0 10	\$0 75	\$5 00	\$30 00
1 to 1½ ft.....	25	2 00	18 00	

besseyi. Western Sand Cherry. Prostrate habit and good for edgings and low plantings; showy fruit and flowers.

	Each	10	100
1 to 2 ft.....	\$0 40	\$3 50	\$25 00
2 to 3 ft.....	60	5 00	40 00
3 to 4 ft.....	75	6 00	50 00

maritima. Beach Plum. Low bush, splendid for shore planting and sandy locations; a shower of white flowers in early spring; showy purple fruit which makes fine jelly.

	Each	10	100
1 to 2 ft. "Collected"....	\$0 40	\$3 00	\$20 00

pumila. Sand Cherry. 4 to 8 ft., becoming decumbent; showy flowers; purple-black fruit.

	Each	10	100
2 to 3 ft.....	\$0 40	\$3 50	\$30 00
3 to 4 ft.....	65	5 50	45 00

tomentosa. Small tree or dense bush; flowers white, but with bright red calyx.

	Each	10
4 to 5 ft.....	\$0 75	\$6 00

QUERCUS bicolor (platanoides). Swamp White Oak. 70 to 100 ft. Very fine symmetrical tree, with light-colored bark.

	Each	10
2 to 3 ft.....	\$0 75	\$6 00

cerris. Turkey Oak. 60 to 120 ft. Forms a broad pyramidal head. Handsome Oak, with dark green foliage.

	Each	10
4 to 5 ft.....	\$1 00	\$2 00
6 to 7 ft.....		2 00

coccinea. Scarlet Oak. 40 to 80 ft. Round-topped head; leaves brilliant scarlet in fall.

	Each	10
5 to 6 ft.....	\$1 00	\$9 00

ilicifolia (banisteri). Scrub Oak. 3 to 10 ft. A splendid undershrub for rocky soils or as a hedge plant.

	Each	10
4 to 6 ft.....	\$1 50	

Quercus macrocarpa. Mossy-cup Oak. 80 to 160 ft. Spreading branches, forming a broad round head.

	Each	10
5 to 6 ft.....	\$1 25	
7 to 8 ft.....		2 00

palustris. Pin Oak. 80 to 120 ft. Handsome tree, much used for street planting; branches often pendulous; leaves color brilliantly in autumn.

	Each	10
6 to 7 ft.....	\$1 00	\$8 00
7 to 8 ft.....	1 50	12 00
10 to 12 ft.....	3 00	25 00

prinus. Chestnut Oak. 60 to 100 ft. Grows well on dry ground; leaves like those of the chestnut tree.

	Each	10
6 to 8 ft.....	\$1 00	\$8 00
8 to 10 ft.....	2 50	

rubra. Red Oak. 80 to 150 ft. One of the best for street planting or for the lawn; rapid growth, making a broad round-topped head; fine fall coloring.

	Each	10
5 to 6 ft.....	\$0 50	\$4 00
6 to 8 ft.....	75	6 00
8 to 10 ft.....	1 50	

RHAMNUS dahurica. Buckthorn. 20 to 30 ft. Usually a large thorny shrub, with abundant black fruit.

	Each	10
3 to 4 ft.....	\$0 40	\$3 00

RHODOTYPOS kerrioides. White Kerria.

	Each	10
3 to 5 ft. Large flowers.....	\$0 40	\$3 50
2 to 3 ft.....	60	5 00
3 to 4 ft.....		\$40 00

RHUS canadensis (aromatica). Sweet-scented Sumac. 1 to 4 ft. Splendid ground-cover; does well on sandy soil.

	Each	10
6 to 12 in.....	\$0 15	\$1 00
1½ to 2 ft.....	25	2 00

copallina. Shining Sumac. 5 to 20 ft. One of the finest foliated plants of the genus and colors brilliantly in the fall. Does well in dry soil.

	Each	10
1 to 2 ft.....	\$0 20	\$1 50
2 to 3 ft.....	30	2 00
3 to 4 ft.....	45	4 00
5 to 6 ft.....	75	6 00

glabra. Smooth Sumac. 4 to 15 ft. Fine sort, with showy fruit.

	Each	10
1 to 1½ ft.....	\$0 20	\$1 50

ROBINIA kelseyi. Kelsey's Flowering Locust. 4 to 8 ft. A new species, discovered by us in the Carolina mountains. Bright pink or rose-colored flowers, resembling the sweet pea. Does well in dry or moist situations.

	Each	10
Very graceful.....		
6 to 12 in.....	\$0 75	\$6 00

pseudacacia. Yellow Locust. 40 to 80 ft.

	Each	10
Long racemes of fragrant white flowers; finely cut foliage.....		
4 to 6 ft.....	\$0 60	\$5 00

ROSA. The Wild Roses. All have beautiful single flowers and showy hips, which, together with their low growth, make them our most desirable edging and border shrubs for most plantings. All through the winter their showy fruit makes most species very conspicuous.

blanda. Meadow Rose. 3 to 5 ft. Large pink flowers; red fruit.

	Each	10
1 to 1½ ft.....	\$0 25	\$2 00
2 to 3 ft.....	40	3 50

carolina. Carolina Rose. 3 to 6 ft. Light pink; very free fruited.

	Each	10
2 to 3 ft.....	\$0 25	\$2 00
3 to 4 ft.....	35	3 00

Rosa lucida (see page 30)

RUBUS deliciosus. Rocky Mountain Flowering Raspberry. 3 to 5 ft. The finest of native Flowering Raspberries, with large pure white flowers, 1 to 2 inches across, in great profusion; large wine-colored fruit.

	Each	10	
1 to 2 ft.	\$0 60	\$5 00	

odoratus. 3 to 6 ft. Large rose-purple flowers and red fruit; very large showy leaves. A fine undershrub and suitable for damp woods.	Each	10	100
1 to 2 ft.	\$0 20	\$1 75	
2 to 3 ft.	35	3 00	\$20 00

Rosa spinosissima

SALIX. Our collection of Willows covers almost all the species that are planted in the Arnold Arboretum, and we have others in smaller quantities that have lately been discovered in China and elsewhere. Many of the Willows are charming dwarf and semi-prostrate shrubs, notably beautiful, with bright yellow, brown, and green branchlets, or sometimes covered with a white bloom. The catkins are extremely showy and range from tiny balls of down to golden yellow spikes. Most of them thrive both in dry soils or in very moist locations.

acutifolia. 15 to 25 ft. Branchlets dark colored, covered with bloom; long narrow leaves.

	Each	10	100
1 to 2 ft.	\$0 25	\$2 00	\$18 00
2 to 3 ft.	35	3 00	

alba calva (cærulea).	Each	10	
1 to 2 ft.	\$0 25	\$2 00	
4 to 5 ft.		50	

alba splendens (regalis). Royal Willow. 30 to 60 ft. Very rich silvery foliage; fine as a single specimen or in groups.

ambigua. 2 to 3 ft. With creeping stems; smooth branchlets; fine sort.	Each	10	
9 to 12 in.	\$0 25	\$2 00	
2 to 3 ft.		40	3 00

astriata (appendiculata × purpurea).			
12 to 15 in.		25	2 00
3 to 4 ft.		40	4 00

babylonica. Variety from China. 40 to 60 ft. Wavy bright green foliage; very pendulous branches.	Each	10	
6 to 12 in.	\$0 25	\$2 00

Salix blanda (babylonica dolorosa). Wisconsin Weeping. Glaucous foliage. Each 10			
4 to 5 ft.	\$0 35	\$3 00	
6 to 7 ft.	50	4 00	
8 to 10 ft.	1 00	8 00	
caprea × purpurea. Each 10			
3 to 4 ft.	\$0 35	\$3 00	
cinerea. 15 to 25 ft. Tomentose branchlets; leaves downy on both sides. Each 10			
12 to 15 in.	\$0 25	\$2 00	\$18 00
3 to 4 ft.	35	3 00	
cinerea (amygdalina discolor). 10 to 25 ft. Branchlets tomentose; flowers before leaves. Each 10			
1½ to 2 ft.	\$0 25	\$2 00	
4 to 5 ft.	35	3 00	
cinerea angustifolia. Each 10			
1 to 1½ ft.	40		
cordata. Each 10			
6 to 12 in.	25	2 00	
3 to 4 ft.	35	3 00	
elegantissima. Thurlo's Weeping Willow. 40 to 60 ft. Rapid growth; one of the best of the pendulous forms. Each 10			
1 to 2 ft.	\$0 25	\$2 00	\$16 00
erdingeri cremensis. Tall shrub; broad leaves, pubescent. Each 10			
3 to 4 ft.	\$0 50	\$4 00	
fragilis bullata. Each 10			
9 to 12 in.	25	2 00	
fragilis var. (saerementiana). Each 10			
1 to 2 ft.	25	2 00	
4 to 5 ft.	35	3 00	
glaucophylla. Shrubby; striking thick foliage; one of the best. Each 10			
12 to 15 in.	\$0 25	\$2 00	
2 to 3 ft.	35	3 00	

Salix gracilistyla. Fine. Shrub; young branchlets tomentose, older reddish brown; acute leaves. Each 10			
1 to 2 ft.	\$0 40	\$3 50	\$30 00
grandifolia (appendiculata), male. Each 10			
3 to 4 ft.	\$0 35	\$3 00	
hastata, female. Shrub to 6 feet. Young branchlets pubescent, older brown; serrate leaves. Each 10			
1 to 2 ft.	\$0 25	\$2 00	
humilis, female. Prairie Willow. 2 to 3 ft. Showy procumbent species. Each 10			
6 to 12 in.	\$0 25	\$2 00	
incana (rosmarinifolia). Dwarf species; long thin branches; narrow leaves, 5 to 6 inches long, with silvery hairs underneath. Each 10			
1 to 2 ft.	\$0 30	\$2 50	\$20 00
laestadinia (cinerea × lapponica). Low shrub; pubescent branchlets; flowers before the leaves. Each 10			
6 to 12 in.	\$0 35	\$3 00	
latifolia (caprea × nigricans). Each 10			
1½ to 2 ft.	25	2 00	
lucida. Each 10			
1 to 1½ ft.	25	2 00	
3 to 4 ft.	35	3 00	
ludificans (aurita × phyllicifolia). Shrubby smooth leaves, glaucous beneath. Each 10			
1 to 1½ ft.	\$0 25	\$2 00	
2½ to 3 ft.	35	3 00	
myrsinifolia, in variety. Shrubs up to 12 feet. Broad acute leaves, glabrous above and woolly underneath. Each 10			
6 to 12 in.	\$0 25	\$2 00	
1 to 2 ft.	35	3 00	
2 to 3 ft.	45	4 00	
myrtoides, female. 2 to 3 ft. Shrub or tree; very showy foliage. Each 10			
9 to 12 in.	\$0 25	\$2 00	
3 to 4 ft.	40	3 50	
neriifolia (purpurea × grandiflora). 3 to 6 ft. Shrub; young branchlets pubescent, later smooth green or brown. Each 10			
1 to 2 ft.	\$0 25	\$2 00	
3 to 4 ft.	40		
niobe. Weeping. Each 10			
3 to 4 ft.	\$0 40	\$3 00	
pentandra. Laurel-leaved Willow. 40 to 60 ft. Shiny foliage; rapid grower. Each 10			
8 to 10 ft.	\$0 60	\$5 00	\$35 00
petiolaris. Each 10			
12 to 15 in.	\$0 25	\$2 00	
3 to 4 ft.	40	3 50	
phyllicifolia (bicolor). 3 to 5 ft. Branchlets smooth; polished glossy foliage. Each 10			
1 to 2 ft.	\$0 25	\$2 00	\$18 00
phyllicifolia crowiana (bicolor laweana). Fine. Each 10			
9 to 12 in.	\$0 25	\$2 00	
piperi. Shrub to 20 feet; dark brown branchlets; large leaves. Each 10			
1 to 2 ft.	\$0 25	\$2 00	
3 to 4 ft.	35	3 00	
purpurea, female. Each 10			
3 to 4 ft.	25	2 00	
purpurea amplexicaulis, male. Each 10			
3 to 4 ft.	35	3 00	
purpurea kerksi. Each 10

LILACS ON THEIR OWN ROOTS

Fine collection of some of the best and newest
hybrids in specimen stock. It is only recently
that **Lilacs on their own roots** were ob-
tainable.

Ordinary stock is **grafted on Privet**, which
"suckers" badly, often crowding out and killing
the grafted top and leaving a Privet instead of
a Lilac. The Lilac is the queen of spring-flower-
ing shrubs, and the new hybrids mark an epoch
in horticulture. For a tall hedge or screen there

Schizophragma hydrangeoides (Climbing Hydrangea)

VITIS · GRAPE

All the Grapes are indispensable vines of many uses. Their large, handsome cut leaves and showy fruit, as well as very fragrant flowers which come early, combine to give them a place filled by no other vines. Of great hardiness and usually high climbers, they can be used for arbors, walls, and trellises, and particularly for covering dead or growing trees, where they produce a beautiful effect by their graceful festooned growth. They stand the smoke and soot of cities well.

HARDY AMERICAN HERBACEOUS PERENNIALS

INCLUDING LILIES, TRILLIUMS, SARRACENIAS, FERNS, BOG AND WATER PLANTS, HARDY CACTI

Orders for most American bulbs should be in by August and not later than October 10. Where possible, all do best planted in the fall, yet many lilies and other bulbs do well if planted early in spring. Most bulbous plants make the best effect planted in masses, or at least considerable quantities of a single species or variety. Send for special bulb list, to be published in summer. In this list will be found a variety of Hardy Herbaceous plants that will give a showy succession of bloom from early spring to late autumn. Nearly all are of easiest culture.

Any herbaceous plant grown in American nurseries can be supplied, usually at from \$10 to \$12 per 100

The sizes following the names indicate the variation in heights usually attained by the plants in their wild state. Each

Cypripedium reginae. The rarest and most beautiful of our Hardy Orchids. White, with pink throat.

CYPRIPEDIUMS AND OTHER HARDY NATIVE TERRESTRIAL ORCHIDS

A most charming group of showy and curious plants, and easy to grow if given proper conditions of soil and location. But they are shy wildlings and many of them are rare and local. A rich, peaty soil, rather moist, with shade, best favors the growth of most species, and some even love the bog, such as the delightful **Cypripedium reginae**, the dainty **Pogonias**, **Calopogon**, and **Habenarias**, though all these thrive well in the rich shady garden.

CYPRIPEDIUM acaule. Moccasin Flower.

15 cts. each, \$1.25 for 10, \$10 per 100.

reginae. Showy Lady's Slipper. 1 to 2 ft.

The handsomest and one of the

rarest of hardy orchids. The broadly ovate sepals and petals are pure white, while the

large, inflated pouch is a beautiful soft red rose-color. A strong grower, preferring peat

soils. Succeeds well in the Rhododendron bed or in the bog. June and early July.

	Each	10	100	1,000

KELSEY'S HARDY GARDEN LILIES

PRICES ARE AT BOXFORD NURSERY

Lilium superbum. Tens of thousands annually

Lilium grayi

HARDY AMERICAN LILIES

This group of plants is one of the most indispensable for showy effects. They thrive in the more open places and produce most gorgeous results in summer when planted in masses. Lilies require rich soil, with plenty of moisture, but well drained, and make a grand show planted among Rhododendrons or other shrub evergreens or in a deciduous shrub border.

	IO	100	1,000
Lilium auratum. Gold-banded Lily. 2 to 4 ft. Large flowers; Each white, more or less marked yellow and purple. Of easy culture, but dies out in time and must be replaced. 8 to 9 in.	\$0 25	\$1 50	\$12 00
9 to 11 in.	30	2 00	18 00
batemanniae. 2 to 4 ft. Orange-red. July, August.	40	3 50	25 00
bolanderi. 1 to 3 ft. Very rare. Bell-shaped deep crimson-red flowers, dotted purple. Give rich sandy soil and good drainage	5 00	40 00	
canadense. Wild Yellow Lily. 2 to 5 ft. Yellow or orange, usually spotted with brown. July. Loves deep rich soil and shade, but stands open sun well. 2nd size.		60	5 00
1st size.	1 00	7 00	\$36 00
candidum. Madonna Lily. 2 to 4 ft. Many flowers in a raceme, white and fragrant. Ornamental, though subject to disease	1 25	10 00	80 00
carolinianum. Carolina Lily. 1 to 3 ft. Rare species of recurved type. Flowers orange, very fragrant, one to three on a stem. Stands dry conditions well. 2nd size.	1 00	7 00	60 00
1st size.	1 25	10 00	
columbianum. 2½ to 3 ft. Small flowers, resembling <i>L. humboldti</i> ; bright golden yellow, spotted with maroon. 2nd size	2 00	16 00	
1st size.	3 50	25 00	
croceum. 2 to 3 ft. Orange, spotted black. July. each, 40c..	3 00	20 00	
giganteum. 4 to 12 ft. White, tinged purple. July. each, \$1.50..			
grayi. 1½ to 3 ft. Introduced by me in 1888, it has proved the leader in the bell-shaped type of hardy Lilies. Dark red-brown petals, beautifully spotted. Bulbs are never large. 2nd size.	1 00	6 00	50 00
1st size.	1 25	10 00	80 00
hansonii (maculatum). 3 to 4 ft. Japanese species; very hardy. Flowers in loose racemes, bright orange strongly marked with purple spots on lower half.	7 00	60 00	
humboldtii (puberulum). 4 to 6 ft. Stout stems; large, orange-red flowers, finely spotted. Should have rich soil. 7 to 8 in.	3 00	18 00	140 00
8 to 9 in.	3 50	25 00	180 00
9 to 11 in.	6 50	40 00	
kelloggi. Slender stem, 3 to 4 feet high, with three to fifteen pink flowers; revolute type; very fragrant.	6 00	40 00

SARRACENIAS

A conspicuous and highly interesting class of insectivorous plants, of great value in landscape work and for bog-gardens. As pot-plants, they are easily grown, and are so striking in color and structure of leaf and flower, and curious in their habit of catching insects, as to fill the observer with wonder. They thrive in bogs or planted in sphagnum moss and peat. We have seen acres of the beautiful *S. flava* growing in its native habitat, the erect golden leaves 2 to 3 feet high, making a unique and brilliant landscape effect, heightened in time of flowering by the large drooping blossoms. The leaves of all the species are so conspicuous as to be taken for flowers.

LANDSCAPE DEPARTMENT

Planning and Planting, and the Use of Hardy Native Plants

SEE ILLUSTRATIONS, PAGES 48 AND 49

The successful carrying out of any landscape improvement depends to so great an extent upon the knowledge, skill, and good taste of the one to whom this work is intrusted, that it is supremely important to start right, no matter whether the work be large or small.

By the employment of a trained landscape architect expensive experiments may be avoided and successful results insured. This applies to questions both of design and of practical planting.

There are so many well-trained landscape architects today that there is little excuse for anyone not having the joys that come from finely executed work that **properly fits each case.**

The undersigned takes charge of the proper laying out and planting of large and small grounds, extensive estates, parks, cemeteries, and other public or private landscape improvements. Particular attention is given to the use of hardy American plants, which are unquestionably the basis of all the best permanent plantings in this country and particularly where naturalistic effects are desired. If this fact is ignored, the most finished and lasting results cannot be secured. The formal garden, where in the past exotics have been used almost exclusively, has wonderful possibilities, not yet fully realized, for the employment of many native plants, and especially our magnificent Rhododendrons, Kalmias, and other broad-leaved evergreens. These plants are not only absolutely hardy and unusually free from foreign diseases and pests, but show splendid summer and winter effects that can be produced in no other way. There are, in fact, no foreign plants which can possibly take their place.

Horticultural knowledge, including soil requirements and an intimate acquaintance with plant material, is quite as essential as and coördinate with proper designing, and these things are too often overlooked. Moreover, water-color sketches do not constitute landscape gardening. It is an art to be practised only after years of study and experience and, like painting and sculpture, must be born in one and cannot be altogether acquired.

We are not committed to the use of Native Plants exclusively, and where useful and advisable, always introduce the best exotics to produce desired results.

The undersigned is prepared to make professional visits for consultation and advice, to make surveys, plans, and designs, and to undertake the entire construction, planting, and carrying out of landscape work of all descriptions.

The wild garden, the rockery, and the bog and water garden offer possibilities in the way of interest, distinctiveness, and variety that are either almost wholly overlooked or but meagerly taken advantage of.

The mountain or seashore bungalow, the modest town home, and the pretentious estate must each have a treatment suitable to particular needs, though in every case a development should prevail that makes the most of striking natural features or topography, giving to each a character of its own.

Lack of time, distance, and other conditions may sometimes lead customers to desire a local landscape architect. I know the leading members of the profession, and at any time on request will gladly recommend landscape architects who may be safely trusted with any commission, large or small.

Correspondence with those having new grounds to lay out and plant, or unsatisfactory old grounds to make over, is solicited. Charges are reasonable, yet sufficient to warrant the best results, in fairness to my clients and myself.

KELSEY'S HARDY AMERICAN PLANTS

HIGHLANDS NURSERY PRICE-LIST

Young Rhododendrons at Highlands Nursery

CATALOG OF HIGHLANDS NURSERY PART II

At my Highlands Nursery, Pineola, North Carolina, 3,800 foot elevation, on the crest of the Alleghany Mountains, one may see Rhododendrons, Azaleas, Leucothoës, Kalmias, and Andromedas growing in all sizes by tens of thousands in single species, and nowhere else can be found such a collection of rare American plants of unquestionable hardiness—the best for American gardens.

The Carolina Mountains is the native home of the most beautiful Broad-leaved Evergreens and Ericaceous Shrubs. Highlands Nursery not only ships direct to customers, but is a great propagating plant, supplying material for my Boxford Nursery.

DECIDUOUS AND EVERGREEN TREES, SHRUBS, WOODY VINES

FOR DESCRIPTIONS SEE BOXFORD NURSERY CATALOG ON PREVIOUS PAGES

NOTE.—All plants are transplanted and nursery-grown, unless plainly marked otherwise.

This is a catalog of nursery-grown plants growing at my Highlands Nursery, Pineola, North Carolina.

Evergreens are marked with a star (*)

KELSEY'S HARDY AMERICAN PLANTS

HIGHLANDS NURSERY PRICE-LIST

RHODODENDRONS AND MOUNTAIN LAUREL

"COLLECTED" CLUMPS BY THE CARLOAD

Delivered at your station. To be shipped from point determined by me

For the area covered and effect produced, a carload of Rhododendrons or Kalmias, offered herein, is the cheapest landscape proposition offered. I ship an unusual grade of splendid clumps, each plant a specimen and burlaped separately. Don't accept cheap stock, thrown into cars without burlaping, and with the fine, hair-like rootlets inevitably exposed. You will be disappointed and find it expensive in the end. While fine results may be had from "collected" Rhododendrons, particularly if purchased from a reliable source, where greatest care is used in digging and handling, results are never so sure as when nursery-grown stock is used.

RHODODENDRON CATAWBIENSE "Collected" Clumps

Each plant collected from the open. Prices, delivered f. o. b. your station, if east of the Mississippi River. These prices are net and subject to no discount. Burlaping is not charged extra on these special car offers.

Car containing 200 clumps, 1 to 3½ ft., for.....	\$280 00
Car containing 300 clumps, 1 to 3½ ft., for.....	380 00
Car containing 400 clumps, 1 to 3½ ft., for.....	480 00
Car containing 600 clumps, 1 to 3½ ft., for.....	600 00

Other combinations and sizes quoted on request.

RHODODENDRON MAXIMUM "Collected" Clumps

Prices in carload lots, delivered f. o. b. your station, if east of the Mississippi River. Collected from open ground. These prices are net and subject to no discount. Burlaping is not charged extra on these special car offers.

Car containing 300 clumps, 1½ to 4 ft., for.....	\$300 00
Car containing 400 clumps, 1½ to 4 ft., for.....	375 00
Car containing 600 clumps, 1½ to 4 ft., for.....	500 00

Other sizes or combinations will be made up to suit customers.

It is far cheaper to buy my kind at slightly increased price, and have plants that will grow.

Rhododendron catawbiense as grown in "clumps" at Highlands Nursery

GROWN IN THE CAROLINA MOUNTAINS

HIGHLANDS NURSERY PRICE-LIST

RHODODENDRON MAXIMUM AND R. CATAWBIENSE

"Collected" Clumps by the carload

Mixed cars, delivered free at any station east of the Mississippi River. These prices are net and subject to no discount. Burlaping is not charged extra on these special car offers.

Car containing 150 maximum and 150 catawbiense, collected as above, 1½ to 4 ft., clumps—total of 300—for \$400. Car containing 250 maximum and 250 catawbiense, 1½ to 4 ft., clumps—total of 500—for \$550.

KALMIA LATIFOLIA (MOUNTAIN LAUREL)

"Collected" Clumps by the carload

Highest-class clumps collected from the open, delivered free at your station, if east of the Mississippi River. These prices are net and subject to no discount. Burlaping is not charged extra on these special car offers.

Car containing 400 clumps, 1 to 3½ ft., for \$375. Kalmia may be added to help fill any Rhododendron car at 90 cts. per clump, not less than 100 clumps in shipment.

The above "carload" offers are made with a view of furnishing a variety of sizes that will permit of naturalistic grouping.

Have your clumps burlaped. It is the only proper way to handle specimen plants. See below for cost

"COLLECTED" RHODODENDRONS AND KALMIA BY THE 100 AND 1,000 AND FREIGHT INFORMATION

The number that may be shipped in a car varies largely, depending on sizes. The minimum weight allowed per car is 16,000 pounds, with a freight rate from my Highlands Nursery to Baltimore of \$84, New York \$88, and Boston \$96.

A car may easily be loaded much heavier, with proportionate increased freight charge, but not increasing the cost per plant.

A full car travels with greater safety than one with a small load.

All "clumps" offered below are collected with a good ball and are burlaped separately.

Burlaping is charged at cost, as below. We always burlap clumps unless expressly ordered otherwise

PRICES OF "COLLECTED" CLUMPS OF RHODODENDRONS AND KALMIAS

2 to 3 ft., "collected" clumps.....		12 50	100 00	850 00
3 to 4 ft., "collected" clumps.....		17 50	150 00	1,300 00

BURLAPING

It always pays to burlap the larger sizes of trees and shrubs, especially evergreens, even if planted the same day. No charge is made for burlaping single plants as quoted. Otherwise burlaping is charged as follows:

2 to 3 ft., clumps and trees,	5 cents each
3 to 4 ft., clumps and trees,	7 cents each
4 to 6 ft., clumps and trees,	8 cents each
6 to 8 ft., clumps and trees,	10 cents each

and larger sizes in proportion. **Unless instructed to the contrary,** I assume customers desire proper burlaping, which will be added to the invoice.

Always address,

A TRIP TO HIGHLANDS NURSERY AND THE HIGH CAROLINA MOUNTAINS

To the botanist or the lover of wild landscape beauty there is perhaps no spot in the eastern United States that appeals more strongly than the high Carolina mountain region, with its wealth of rare flora and sublime mountain peaks and ranges, reaching an extreme elevation of 6,600 feet. Right in the heart of these high mountains, at 3,800 feet elevation, is located the Highlands Nursery, a unique establishment started over 20 years ago to grow the hardiest of our choice native Rhododendrons, Azaleas, and other beautiful native trees, shrubs, and flowers that grow here in a variety and profusion entirely unknown elsewhere in America. Many visitors come from all parts of the United States just to see our Nursery, but we want many more, and can assure you that a ride to the top of Grandfather Mountain is alone worth the trip.

HOW TO COME

Highlands Nursery is not inaccessible. The best way is to buy an excursion ticket from any large city to Cranberry, N. C., via Johnson City, Tenn. At Johnson City you leave the "broad-gauge" Southern Railway and take a "narrow-gauge" train up through the wild "Doe Gorge" to Cranberry, where after dinner you board the Linville River Railway train, hauled by a "Shay" locomotive, for the terminus, **Pineola, N. C.**, arriving perhaps an hour and a half later. We have pictured a very few of the interesting scenes along the route, not forgetting a bit or two of our Nursery, for, after all, that is our main reason for wanting you to come. At **Pineola Station** our Superintendent will meet you with a carriage if notified in advance, and aid in mapping out any trip you may wish to take through the mountains. There are good inns at Pineola and Linville, but a short distance from Highlands Nursery. Fuller information will gladly be given to those interested. Please write direct to

HARLAN P. KELSEY, Owner

SALEM, MASSACHUSETTS

WHEN ORDERING PLEASE NOTE

USE PRINTED ORDER FORM; it aids in filling your order accurately and promptly

BOXFORD NURSERY } State from which Nursery you wish order sent, and use
HIGHLANDS NURSERY } corresponding price-list.

HIGHLANDS NURSERY SHIPMENTS are made from Pineola, N. C., freight station. Freight and express rates gladly quoted. Via Norfolk steamship lines, deliveries to northern and eastern points are quick and rates are low.

BOXFORD NURSERY SHIPMENTS are made from Boxford, Mass., station, or by truck delivery to nearby points. Trucking charged for at cost.

PACKING CHARGES free at prices quoted in this catalog for freight and express shipments.

FALL SHIPPING BEGINS IN AUGUST, when I send out large Rhododendrons, Kalmias, and other evergreens, and bulbs and herbaceous plants, general stock going out in October and November. In **spring** shipments are made from about **March 1 to May 15**. Give shipping instructions, unless you wish to leave it to me, when I use my best judgment, but **assume no risk**.

SHIPMENTS OF "COLLECTED" RHODODENDRON MAXIMUM and KALMIAS are from my special fields in Pennsylvania and the South, depending on destination and quality of stock desired. The best clumps come from the South, from high altitudes. "**Collected**" **Rhododendron catawbiense** comes only from the South.

PRICES are made to fit the quality of stock sent out. Few realize that the real value of nursery stock is largely underground. Frequent transplanting, and handling specimens with adequate, burlaped balls means success and quick results. It costs more, but it is the fixed policy of the Boxford Nursery; and "cheap" stock will not be handled or sent out. **The best is always the cheapest.**

AN EXTRA PRICE is always charged for special selection on the grounds.

Prices quoted in this catalog are net. I offer no premiums, discounts, or gratuities to private gardeners, superintendents, or other employees.

Nurserymen, landscape architects, and superintendents of parks, cemeteries, and other public works are requested to apply for special rates.

TERMS

TERMS cash, or satisfactory references from unknown parties. Accounts due the first of each month, unless by special arrangement. Five plants are sold at 10 rate, 50 at 100 rate, 500 at 1,000 rate.

PRICES QUOTED are for grades as specified. For extra selection an extra charge is made to fit the value of the plants.

SEND FOREIGN REMITTANCES BY POSTAL MONEY ORDER, drawn on Salem, Mass., post office, or by New York or Boston exchange. An American dollar equals four shillings, four marks, or five francs.

PACKING CHARGES, EXCEPT BURLAPING, FREE, at prices in this catalog for shipment by freight or express. Team and auto delivery to North Shore or Boston points at reasonable cost.

GUARANTEE

No guarantee, expressed or implied, is made that stock will grow whether planted by me or not.

Having no control over after-treatment of plantings, or over weather conditions, it is obvious that purchaser must assume all responsibility after delivery in good condition.

All shipments travel at consignee's risk, and transportation companies must be held liable for damage in transit.

Claims for errors must be made on receipt of goods. If there is any mistake or fault on my part, it will gladly be rectified.

Kelsey's Hardy American Rhododendrons, Azaleas and Carolina Mountain Flowers

Ferns, Cacti, Insectivorous Plants, Ground Covers and Plants for Rock, Water and Bog Gardens, Woodlands and Borders, and all *Permanent Plantings*

Azalea lutea (calendulacea)

GREAT FLAME AZALEA

The most regal of all the species, native or exotic, and a noble representative of our rich Carolina mountain flora. The great botanist Bartram, speaking of it in his "Travels," calls it the "fiery Azalea," and says: "This epithet fiery I annex to this most celebrated species of Azalea as being expressive of the appearance of its flowers, which are in general of the color of the finest red lead, orange and bright gold as well as yellow and cream-color. This is certainly the most gay and brilliant-flowering shrub yet known." No more striking landscape effect can be produced than a hillside of *A. lutea* in full bloom. Nearly all quoted above 18 in. are budded. See color illustration on front cover.
