Price list

Dear Sir:-

If you are intending to plant Pecan trees this season we would like to supply you.

We have a fine lot of Budded Paper-shell Pecans of the best varieties for the Coastal, as well as the entire Cotton-belt Region.

Our Pecan Nursery is located in Harris County, Texas, and our trees are budded from our own bearing trees.

Our prices this season are as follows:

1 to 2 ft. in height, per Doz.	\$5.00;	per 100	\$40.00.
2 " 3 " " " " "	6.50;	" "	50.00.
3 " 4 " " " " "	8.00;	" "	60.00.
4 " 5 " " " " "	9.00;	" "	70.00.
5 " 6 " " " " "	10.00;	" "	85.00.
6 " 7 " " " " "	12.00.		

We have two varieties, VIZ: Stuart and Van Deman, both very hardy, and bear large paper-shell nuts.

The above prices are F.O.B. Spring, Texas, cash to accompany the order. Full directions for planting will be mailed with each order.

Pecan trees should be planted as early as convenient after the leaves fall, 50 feet apart each way (17 trees to the acre), in good well drained soil. Trees should be thoroughly watered the first year and kept well cultivated up to ten years old. Low growing crops can be raised between the rows to advantage. With good care a few nuts may be expected the 4th year after planting.

Any good farmer having good cotton land, either sandy or black, can plant his field to Budded Pecans, and grow his crops between the rows with little loss of land or expense, and at the end of eight or nine years be a rich man.

We believe that a Budded Pecan Orchard well cared for will increase in value \$100.00, per acre each year.

We advise you to place your orders now, for what you need this season.

Yours truly,
