Buy Frame transplanted Evergreens for lining out in open field rows. They are stronger than seedlings and you will find them very economical.

Hill's Evergreen Seedlings

Our Leading Specialty. Grown on Immense Scale. Patronize Headquarters.

The propagation of Evergreen Seedlings has been one of our specialties for a great many years. Our soil and climate is especially adapted to their culture. Great care is exercised in seed selection so that only hardy, dependable types are produced.

We recommend bedding out Evergreen Seedlings in frames where they can be shaded and watered for a year or two before planting out in open field rows. Plant in rows about one inch apart and rows four inches apart in the frame, so the soil can be kept loose with a hand weeder. Frequent cultivation is just as important as watering.

Koster's Blue Spruce

Described by an eminent horticulturist as a "marvel of beauty." It grows to perfection in all parts of the country and is absolutely hardy.

Hardy, long-lived, sure to grow, rich, gorgeous silvery steel-blue foliage.

Truly a sensational triumph in Evergreen growing. It excites the wonder and admiration of all.

Dwarf Mountain Pine. One of the best low-growing Pines. Good, bright green foliage. Easy to handle and transplant. See pages 6 and 17
for prices and sizes.

Blocks of Specimen Evergreens, principally Junipers, Hemlocks and Pines.

Hill's Specimen Evergreens and Conifers

Hill's Specimen Evergreens are all perfect specimens, having good roots and symmetrical tops, owing to frequent transplanting, constant cultivation, root pruning, shearing and staking. Hill's Specimen Evergreens will please your most exacting customers.

In comparing our prices with those of other growers, remember that height alone cannot by any means establish value. An Evergreen tree grown close and crowded in the row, may be exactly the same height as a Hill Specimen Evergreen, but will not be as heavy, compact, symmetrical, or have as good roots. Hill's Specimen Evergreens are all grown in wide rows, with ample room for development of both root and top.

Constant transplanting and root pruning gives Hill's Specimen Evergreens masses of fine, fibrous feeding roots, which together with constant shearing, results in heavy, bushy, symmetrical tops and insures the success of Hill's stock in the hands of the planter.

Every Hill Specimen Evergreen is separately dug by hand with a solid ball of earth about the roots. In some localities it is impossible to dig Evergreens with a solid ball of earth on account of loose, sandy, rocky soil, which will not adhere to the roots. Our rich, black, prairie loam contains just enough clay to give it good texture and when interwoven with masses of fine, fibrous feeding roots, easily holds in place. As additional protection each earth ball is securely tied in burlap.

Hill Specimen Evergreens are always worth the price you pay for them; will never disappoint you and will be found the most economical in the long run.

All Hill Specimen Evergreens are hand dug, leaving a solid ball of our rich, prairie loam about the roots. Evergreens handled in this manner scarcely know they have been moved. They put on a good, healthy growth the first season.

We grow a complete stock of specimen Evergreens for high-class trade in a wide range of sizes. Let us handle your specimen Evergreen orders.

Hill's Dwarf Evergreens

In New, Rare and Choice Varieties, Especially Adapted for Rockeries, Terraces,
Foundation Planting, Japanese Gardens, Etc.

Our collection of Dwarf Evergreens is by far the most complete and extensive to be found anywhere. The stock is bushy, thrifty, well grown, and owing to frequent transplanting, can be depended upon to give complete satisfaction. This stock is all dug and packed with extreme care so as not to break or bruise the branches or deform the natural shape of the trees. Like all Hill specimens, these trees are carefully hand dug with large solid balls of earth, so that the masses of fine, fibrous feeding roots are not disturbed in any way.

Dear Sirs:—

Evergreens received in fine shape—the finest lot of stock we have ever received
HENRY KOHANKIE & SONS.

Gentlemen:—

Dansville, N. Y.
Received the shipment of Evergreens promptly and in fine condition.
J. B. MOREY NURSERIES.

One of the many uses of Hill's Hardy Evergreens.

Hill's Choice Decorative Stock

Hill's Complete Assortment of Hardy Evergreens and Boxwoods for Window Boxes, Urns, Etc.

Very tasty boxes can be made up with various arrangements of Evergreens. There are a number of ways of filling boxes, almost any idea your customers have can be carried out. Placed closely together, all of the same height, give a hedge-like appearance; high at the ends and low in the center, affords with a little clipping, a graceful curved effect. Tall trimmed plants at the ends with a lower compact line straight across presents a good appearance. Each tree planted so as to show its individuality, is another plan, while a box filled with a number of varieties gives a shaded color effect that is very attractive. The outside decoration of business houses, hotels, restaurants, city and suburban dwellings with hardy ornamental Evergreens is rapidly becoming the custom in all the large towns and cities.

Hardy Evergreens for Window-Boxes

(Especially grown bushy stock)

		Each	Doz.	100
Assorted Varieties (Our Selection).....	(\$8.50 per 50)			\$15.00

Hill's Hardy Evergreens for Tubbing

Clipped Specimens, Well Grown, Bushy, Compact Stock

Owing to the scarcity of Boxwoods, individual specimens of Hardy Evergreens stand at the head of the list for outside or inside decoration both Summer and Winter. Hotels, Clubs, Restaurants, Business Blocks, Apartments, Residences, etc., now consider these an important part of their Winter decoration. An additional advantage of Hardy Evergreens is their ability to withstand continued freezing without injury.

The various types of Evergreens, including the Globe, Pyramidal and Ball Shaped Species, in different shades of green, may be worked into any decorative scheme, and prove very attractive. We have given this line special attention for several years, and have worked up an extensive stock, in the best varieties, suitable for florists trade.

Variety—	Color	Description	Size, Feet	Each Pair	Matched Pairs
Abies Tsuga Canadensis (Hemlock)	Light Green	Globular	2	\$ 2.50	\$ 4.50

BOXWOOD (*Buxus Sempervirens*)

There is always plenty of cheap or inferior stock on the market to be had almost for the asking, but quality Boxwood, grown properly and handled right always command a fair price. Hill Boxwoods are the Business Building kind. You will not be disappointed. They are the cream of especially selected stocks, grown for high class trade. Satisfaction guaranteed.

NOTICE.—Orders for Boxwood will be accepted conditionally subject to arrivals. We expect to be able to make deliveries as usual this spring. Order early. Boxwoods will be very scarce this season.

JAPANESE GARDENS AND ROCKERIES

For the construction of Japanese Gardens, Rockeries, etc., we offer the services of Mr. T. R. Otsuka, Landscape Architect to those of our trade customers desiring his assistance. Mr. T. R. Otsuka has had plenty of experience along this line, having built some of the most notable Japanese Gardens in this country and Europe. Arrange with us for an interview or write for complete information.

SCENES IN HILL'S NURSERY

HOW TO REACH OUR NURSERIES

☞ Visitors are always welcome. We are conveniently located only 38 miles northwest of Chicago.

☞ When coming by the way of Chicago, you are directed to the C. & N. W. depot on Madison street, from where there is an interesting ride through the famous Fox River valley dairy district, of one hour and thirty minutes, direct to the nursery.

☞ For an hourly service from Chicago's shopping district, take the A., E. & C. electric line at Fifth avenue and Jackson boulevard direct to Elgin, transferring to the Carpentersville car, getting off at stop No. 4, Dundee, from where it is but a 2 minute walk direct to our office, which is located right on the nursery grounds.
