QUALITY AND SERVICE

Hill's Evergreens Grow

D. HILL
The Evergreen Specialist

FOR over sixty years I have featured the growing of hardy Evergreens. The varieties offered herein are time tested, selected sorts, approved by the best tree authorities and used by the most extensive planters in America. They are produced by the Hill scientific method and are acknowledged as the best—therefore the cheapest—trees that can be grown by skilled labor, fertile soil and modern nursery science.

To obtain beautiful effects with Evergreens does not require any great outlay of money or any special knowledge of horticulture. Trees of any size to suit the pocketbook can be selected and the only requisite for success is that they be planted in good, rich soil and given reasonable attention, same as the rose garden or vegetable patch. Permanency and beauty are two attributes attained by Evergreens not found in the flower family, which thrive a few weeks and then are gone forever. A small investment in Evergreens will prove a source of satisfaction for a lifetime and the trees grow more beautiful each year.

My Guarantee of Satisfaction

Hill Evergreens will never disappoint you. I know that each variety is true to name. I know that each tree has been diligently cultivated, frequently root pruned and transplanted so that it will be hardy, strong and healthy—grow where it is planted and develop rapidly its individual characteristics and beauty. I know that it has been dug by careful experts and the shipment securely packed in a properly ventilated wooden box, so that each tree will reach its destination in good condition as full of life and vitality as the day it was dug.

Hill's Specimen Evergreens

BALLED AND BURLAPPED

These trees can be planted with absolute safety as they are hand dug with a solid ball of earth and burlapped. This prevents their roots being exposed. All are grown in wide rows and are fully developed. Each alternate year they are transplanted, which makes heavy, fibrous roots—so necessary to their success.

The variety of foliage borne by the different varieties of Evergreens will surprise you; silver, pea-green, gold, blue and a myriad of other shades for your approval. Evergreens grouped together will give wonderful effects. Group the different varieties together (such as Junipers, Firs, Pines, etc.) or use trees of the same variety.

An Evergreen conifer bed will also be a source of constant pleasure and beauty. Small trees are usually preferred, placing the taller growing species in the center. Evergreens for borders are indispensable to any well kept lawn. The trees grow more beautiful each year.

Variety—		Ball and Burlap	Size, Feet	Each	10
Hemlock (Tall, Dark Green).....	Extra Heavy Sheared Specimens Splendid Stock	B&B 1	to 1½	\$1.50	\$10.00
