FALL OF 1918

Wholesale
Trade Catalogue

FOR NURSERYMEN
and FLORISTS ONLY

L. A. BERCKMANS, Receiver for

P. J. Berckmans Company

INCORPORATED

ESTABLISHED IN 1856

FRUITLAND NURSERIES

AUGUSTA, GEORGIA

Platanus occidentalis (American Sycamore)

A Word of Explanation to Our Customers

In all probability this price-list will be the last to be published by the old firm of P. J. Berckmans Company.

In March of this year, announcement was made of the expiration, by legal limitation, of the charter held by the company, and the desire of the stockholders to close the affairs of the corporation.

To conform to the Georgia laws governing corporations, Mr. L. A. Berckmans was appointed the receiver, and has been disposing of the stock, machinery, and fixtures through the regular channels of trade.

It must be understood that this receivership in no wise grew out of financial embarrassment. The company is entirely solvent, and its integrity has never been questioned. The reason for the receivership was that the business might be closed according to law.

The business of the company will be discontinued after January 1, 1919, in accordance with a decision of a majority of the stockholders, including Messrs. L. A. Berckmans, R. C. Berckmans, and P. J. A. Berckmans, Jr. After that date the business is likely to be carried on by other persons; proper announcement of this will be made in due time.

During the past season we have made every effort to keep the stock up to the high standard which has characterized all the Berckmans products, and the entire nursery has been cared for in our usual efficient fashion. We do not hesitate to say that customers who make up their orders from this price-list will not be disappointed in the quality of the stock which will be furnished.

You are likely to find some good bargains in the list. Particularly do we call your attention to the deciduous trees, the broad-leaved evergreens, and the conifers. In the shrub section you will find many good things, including deutzias, hydrangeas and viburnums, that are of distinct value. The range of sizes shows specimens large enough to give immediate results in landscape work, as well as smaller plants that can be used profitably for "growing on."

We are in a position to make prompt shipments, and have every reason to believe that goods will travel rapidly after being transferred to the express or railroad carriers.

With these words of explanation we feel perfectly justified in asking for your patronage this year, and assure you that both stock and service will be on the same high plane as heretofore.

L. A. BERCKMANS, Receiver for
P. J. BERCKMANS COMPANY
AUGUSTA, GEORGIA

September 1, 1918

TERMS OF SALE

Our responsibility extends only to persons purchasing direct from us. Dealers purchasing from us sell upon their own responsibility.

If any nursery stock, etc., proves untrue to description under which it is sold, seller shall be liable to the purchaser only and to no greater extent or amount than the purchase price of such nursery stock, etc., and the seller, except for the aforesaid agreed liability and in respect to such purchased nursery stock, etc., gives no warranty, express or implied, as to description, quality, productiveness, or any other matter.

P. J. BERCKMANS CO.

PRICES.— This list cancels previous offers, and the prices quoted are net and not subject to discount.

We reserve the right to advance the prices without notice.

Orders for less than 400 trees or plants of a class will be billed at 100 rate; when 400 are ordered, prices will be at rate per 1,000; 40 at 100 rate; 5 at 10 rate.

Packing Charges.—Boxes will be charged at actual cost of materials. Bales, 25 cents to \$2, according to size.

Terms of Payment.—Cash with order, or satisfactory reference before shipment; or, if preferred, will ship goods with bill of lading attached to sight draft, through express or bank. On all C. O. D. orders we require 25 per cent of the bill remitted before shipment.

All quotations are for immediate acceptance, subject to stock being sold. No liability to attach to us where frost, drought, or other casualties beyond our control prevent delivery of stock that may be contracted for.

Claims and Liabilities.—We are not liable for delays in transit. Our responsibility ends upon delivery in good order to transportation company. Claims for loss lie between the buyer and the carrier. We will, however, gladly render all aid we can in adjusting these claims.

Shipments.—Please give plain and explicit directions as to route, and manner in which goods are to be forwarded. Give name of express or railroad which you prefer. When no instructions are given, we will ship as we think best for our customers' interests, but without assuming any responsibility.

The Risk and Transportation Charges Are to Be Borne by Purchaser.

The prices in this list are intended for Nurserymen and Florists only. If this catalogue reaches anyone not entitled to these prices, we would appreciate being advised of the fact so that we can correct our mailing-list. We do not employ agents.

All orders are accepted upon the above conditions.

CHIONANTHUS virginica.

75	18 to 24 in., well-branched.....	2 50	
----	----------------------------------	------	--

Deciduous Shrubs, continued

CERCIS SILIQUASTRUM

A new form which originated in our Nursery. A large-growing shrub or small tree; leaves heart-shaped, and, like those of the other *Cercis*, assume a yellow tone in autumn. This Judas Tree is the most profuse bloomer we have ever seen, bearing deep lavender flowers four times as large as those of our native Judas Tree. They are produced in large bunches, and, when in full bloom, the tree is a mass of color.

Quantity		10	100	1,000

BROAD-LEAVED EVERGREEN TREES AND SHRUBS

All of our Broad-leaved Evergreens are grown most carefully. Those which are grown in open ground have been several times transplanted, and when shipped are lifted with a ball of earth about the roots, which is wrapped in burlap.

All plants which are grown in pots have been several times repotted and plunged in open frames where they are given ample space. Our plants are, therefore, stocky and well-rooted.

Unless otherwise noted, all plants are from open ground. In this locality we are particularly fortunate in being able to grow such a large number of desirable broad-leaved evergreen trees and shrubs. We grow many kinds that are not hardy in the far North, also bring to perfection a large proportion of the hardy northern evergreens. The great variety of soils in our nursery permits us to grow this extensive collection.

ABELIA grandiflora.

	AZALEA INDICA. Home-grown.			
	All of the Indian Azaleas offered are home-grown, vigorous, and healthy. We offer about fifty fine varieties. The colors are in all shades of crimson, scarlet, purple, pink, and with exquisitely variegated mottlings, stripes, and blotches. We offer single varieties only. All of our plants are grown in summer in open ground, under partial shade, and lifted in October, when they are thoroughly matured. All plants, therefore, have a fine ball of earth about the roots and are shipped without losing a bud or leaf.

CONIFEROUS EVERGREENS

It is an undisputed fact that we grow the largest and most varied stock of coniferous evergreens in the southern states, and especially do we give attention to such varieties as are best adapted to this warmer climate. We also grow large quantities of hardy varieties of *Chamaecyparis*, *Cupressus*, *Juniperus*, *Pines*, and *Thuyas* adapted to the northern parts of the country. All of our conifers have been several times transplanted. All plants are shipped with a ball of earth about the roots which is wrapped in burlap.

orientalis pyramidalis.

50	5 to 6 ft., compact specimens.....	30 00	
250	4 to 5 ft., compact specimens.....	22 50	200 00
215	3 to 4 ft., compact.....	15 00	125 00

This is a very beautiful compact form.

Has stood 25° below zero. Retains green color during winter.

Specimen Conifers

We have some very handsome conifers, such as *Chamæcyparis pisifera plumosa*, *Chamæcyparis pisifera plumosa aurea*, *Thuya orientalis aurea conspicua*, *Thuya orientalis aurea pyramidalis*, *Thuya orientalis Sieboldii*, *Thuya occidentalis Reidii*, etc. Many of these specimens are over twenty-five years of age. As the plants have been several times transplanted they lift readily with a large ball of earth about the roots. Prices and specifications upon application.

ROSES

Strong Field-Grown

For many years our Roses have been noted for their sturdiness and unusual vigor. Roses grown at Augusta are giving splendid results as far north as Canada.

The soil here is especially adapted to developing the Rose properly. Our one-year, field-grown plants equal the average two-year field-grown plants of the North and West.

NOTE.—The letter following the name of the rose denotes the class to which it belongs, viz: (T.) Tea, (H.T.) Hybrid Tea, (C.) China, (H. P.) Hybrid Perpetual, (N.) Noisette, (Poly.) Polyantha, (R.) Rugosa, (W.) Wichuraiana, (B.) Bourbon, (H.W.) Hybrid Wichuraiana.

NO SCALE OR DISEASE

Our nurseries are inspected annually by the State Entomologist. A certificate of inspection is attached to every package that leaves our establishment.

FUMIGATION

We fumigate our stock with hydrocyanic acid gas before shipping, as required by state law, which assures freedom from insects or disease of any kind.

Quercus palustris (Pin Oak)
