The Joy of Seclusion

You want it in your garden. You want it in your lawn, and the garden or lawn without it has not reached its highest development. Nothing better than evergreens. They keep out every disquieting element all the year. You really enjoy the feeling of being away or apart from people and things. As one customer exulted, "We cannot see a single porch from our place." Your grounds can be private even with dwellings all around. No cost for us to come and show you how.

A vintage advertisement with a light green background. On the left, a young girl with dark, curly hair and a white bow in her hair is smiling. She is wearing a light-colored, short-sleeved dress. Behind her and extending across the middle of the image is a dense row of leafy green trees. In the upper right corner, the word "Shade" is written in a large, elegant, black serif font. At the bottom of the image, there is a white rectangular box with a thin black border containing text. The overall tone is nostalgic and peaceful.
