THE SEED SITUATION

The war is over. The boys are returning. The drift of affairs is "back to the land." The farmer is the Capitalist of this day. Prices of farm products have enriched him. The effect of this is to stimulate farm products. The land must yield to the utmost. To do this the soil must be kept in the finest condition.

Clover enriches the soil. By rotating with this plant greater crops of cereals are produced.

Values of **Red Clover** are firm, with an upward tendency. **Alsike** is away behind the Red in value. As a friendly tip, it is a good buy for today. This wide gap of difference in price is gradually closing.

Alfalfa is the greatest soil enricher of them all. Superfine quality of this seed is limited and prices are very reasonable as compared.

Sweet Clover as a crop proposition was comparatively unknown until recently. It is now regarded as one of the most valuable forage and land renovating plants we have. The demand is increasing each year. We look for a greater trade the coming season than ever. Compare the value of Sweet Clover with Red and you will notice that this difference is going to increase the demand for Sweet.

Timothy is a great hay crop. It is much used in foreign countries. If the embargo is lifted on freight over the seas, and it moves easily in that direction, we look for higher prices yet to follow.

Wishing you a Merry Christmas,

Very respectfully,

SIoux CITY SEED CO.

SEED CORN

WE MAKE A SPECIALTY OF GROWING SEED CORN

Prices Seed Corn as well as Cane Seed, Millet and other Cereal Grains
Will Follow in Season

We are buyers of Timothy Seed, Millet, Cane and other
Field Seed. Mail samples of anything you have to offer
