BUSINESS TERMS

IMPORTANT—All prices are subject to any advances over present prevailing freight rates, customs duties or war tax, and all deliveries are subject to delay, restrictions, embargoes, crop shortages and all conditions beyond our control. All quotations are made and all orders are booked subject to above conditions.

HENRY F. MICHELL CO.

We **Especially Invite Charge Accounts.** A charge account is more convenient than to remit for each order at the time it is sent us; you pay no more for your goods by reason of this accommodation. As to our responsibility we refer you to **Dun's** or **Bradstreet's Mercantile Agency.**

When sending your first charge order, refer, preferably, to someone with whom you have a charge account. This saves many a delay. When sending us your first order accompanied by remittance, we prefer bank cashier's check or money order, unless cash is sent; this frequently saves delays.

☞ Goods can be sent **C. O. D.**, with the exception of perishable items, which includes plants and cold-storage bulbs. These cannot be sent **C. O. D.** unless a partial remittance accompanies the order.

SHIPPING INSTRUCTIONS

Always state clearly by what method you want goods forwarded, otherwise we will ship according to our best judgment.

INVITATION

All customers and others interested in horticulture or agriculture are cordially invited to visit our plant establishment at **Andalusia Station** (N. Y. Division of P. R. R.) about 16 miles from Philadelphia. In the spring, summer and autumn we invariably have interesting displays of hardy flowers, etc. This invitation applies to our city establishment as well, at 518 Market Street, Philadelphia.

DELIVERY SERVICE

To points where baggage-master or package service is in operation we ship all orders, which can be packed in one parcel or piece, not exceeding 50 pounds in weight, free of transportation charges at prices quoted in this catalogue. Fertilizers in more than 25-lb. lots, or bulky package, are not accepted by baggage-master service. Our automobile delivery also covers many sections of Philadelphia.

SHIPPING FACILITIES OF PHILADELPHIA

Express—Wells-Fargo, Adams, American.

Freight—Baltimore & Ohio, Reading, Lehigh Valley and Pennsylvania.

Boat—Clyde Line, Merchants' & Miners' Steamship Company.

The above transportation companies, with their connecting lines, enable us to ship quickly and economically all over the world.

MICHELL'S POT-GROWN STRAWBERRY PLANTS

EXTRA SELECTED STOCK—Strong and Well Rooted. Will Yield a Full Crop of Berries Next Season. Ready About August 15th.

The time of shipment is from August 15th to October 1st. The advantages in planting pot-grown strawberry plants are realized by a full crop of berries the following year. Our plants are carefully grown in clay pots and prior to shipment are transferred with the original ball of earth at their roots to substantial paper pots in which they are forwarded, thus insuring the buyer getting them in first-class order and reducing the transportation charges about 25 per cent.

CULTURAL NOTE ON STRAWBERRIES

Strawberries delight in good rich soil that has had plenty of manure added to it. The plants should be set 12 to 15 inches apart in rows 2 feet apart. A row 100 feet long requires approximately 75 to 100 plants or about 14,500 per acre. If the weather is dry, when planting, water well at the time and for a few days thereafter, if it is possible. Press the soil well around the ball, when planting, and keep the soil well cultivated, cutting off all runners that may form. At the approach of permanent winter it pays to cover the entire bed to a depth of 2 inches with clean straw or salt hay. This protects the plants during severe weather. Do not use leaves, as they hold the moisture and cause damage to the plants in winter. At the approach of spring, rake the covering from the plants proper and leave it between the rows; thus will serve as a mulch during the summer, protect against drought, and also keeps the fruit more free from sand, at the same time to a large measure controls the growth of weeds.

EARLY VARIETIES

Early Jersey Giant (Perfect). Pre-eminently the finest of the early varieties. It is brilliant scarlet-crimson in color, and exceptionally firm, by far the firmest of all early sorts. Berries very large, conical with pointed tip; has delightful aroma and rich, mild strawberry flavor. A very heavy yielder.

Early Ozark (Perfect). Among the very first to ripen and the berries are of fairly good size, bright, crimson color, slightly conical, quite firm and of excellent quality. A strong grower and a heavy yielder.

Senator Dunlap (Perfect. Early). This grand Strawberry will please the most critical person. One of the first to yield and continues well into the height of the season. It cannot be recommended too highly.

MID-SEASON VARIETIES

Big Joe (Perfect). The merits of this splendid variety are great vigor of plant, splendid root system, exceptional productiveness, large size of fruit, excellent flavor, and length of bearing season. The berries are perfect beauties, of very uniform conical shape, rich and red in color. In size the berries are not surpassed by those of any other variety grown, while the flavor is superior to that of most large fruited sorts. The plants root very deep, the roots going 10 to 12 inches in the ground, that they are but little influenced by droughts.

Brandywine (Perfect). The finest of all mid-season sorts; it has not a single defect. The plants of extra strong constitution and growth, doing well everywhere. Fruit extra large, heart-shaped; color, bright, rich red.

A husky developed specimen like this can't fail but give you satisfaction

MID-SEASON VARIETIES (Continued)

Glen Mary (Perfect. Midseason). One of the best of the older varieties, as it still keeps its place among the prominent strawberries. The fruit is very large but rather irregular, somewhat like Sharpless. It is a great drought resister, ripening a full crop of luscious berries in the driest weather.

Heritage (Perfect). This is truly a giant strawberry, it being almost impossible to put a whole berry at a time in one's mouth. It is rather irregularly shaped but of a beautiful crimson color. The plants and foliage are entirely distinct which makes it stand out above all other sorts.

Nick Ohmer (Perfect). A superb variety for the home table, as it is a good grower, free from rust and bears heavy crops of large, dark, glossy red berries, highly colored all the way through, and of superior flavor.

Price of Pot-grown Strawberries on this page, \$1.00 per doz.; per 100, \$6.00; per 1000, \$50.00.

Success (Perfect). This wonderful berry is all that its name implies; it is a success from start to finish. Very vigorous grower; large fruit of high color and firmness, regular shape and a wonder in productiveness. Begins to ripen early and continues several weeks, retaining its large size all season.

NOTE—About October 1st we can furnish layer plants of any of the above varieties at 25c. per doz.; 100, \$1.50; \$10.00 per 1000. If wanted by Parcel Post add 10c. per doz. or 20c. per 100 for postage. Larger quantities travel best by express.

3

LATE SEASON VARIETIES

See Special Cultural
Note on Page 2

✓ **Gandy** (Perfect. Late). This variety is known to most every berry grower as one of the best late sorts. It is very solid and large, and of a beautiful crimson color; especially good for family garden planting.

✓ **Late Jersey Giant**. (Perfect.) A large and very late variety and the most beautiful strawberry ever seen. It is a sport of the Gandy, but is superior to that grand old variety, the berries being larger, superior in quality, more brilliant in color, beautiful and produced in far greater number. The berries are heart-shaped and exceptionally uniform in shape and size; surface smooth and glossy; quality mild, rich and sweet. They are held from the earth on remarkably large, strong fruit stalks.

✓ **Stevens' Late Champion** (Perfect). "Very large, fine flavored, bright color, good shipper, heavy yielder, good fruit stem." This berry has averaged 7,556 quarts per acre, netting \$666.96 per acre. It has been tested on all kinds of soils and will grow successfully where any strawberry will grow. It will stand a drought better than any other berry ever grown in this section. It has never shown any sign of rust.

✓ **Wm. Belt** (Perfect). A grand sort. This variety was introduced some ten years ago, and at that time was lauded very highly and many plants were sold. The superb quality, the equal of which has not yet been attained in any other medium late variety, makes it very popular for the home garden and local market.

Price of Pot-grown Late Season Varieties Strawberries.
\$1.00 per doz.; per 100, \$6.00; \$50.00 per 1000.

Steven's Late Champion

NOTE—About October 1st we can furnish layer plants of any of the above varieties (except as noted) at 35c. per doz.; per 100, \$1.50; \$10.00 per 1000. If wanted by Parcels Post add 10c. per doz. or 20c. per 100 for postage.

MICHELL'S SPECIAL GRADE BONE MEAL

An excellent fertilizer to use when planting strawberries; about a teaspoonful to a plant. 25 lbs., \$1.25; \$2.00 per 50 lbs.; 100 lbs., \$3.50; \$6.75 per 200 lbs.

MICHELL'S AUTUMN FRUITING OR EVERBEARING STRAWBERRY PLANTS (Pot Grown)

This type, while producing its main crop of berries with the general sorts, continues uninterruptedly to mature its fruit, until checked by hard frosts; it has actually been known to bear strawberries until Christmas, when the weather is open and mild. In order to get the greatest crop of berries late, the blossoms should be kept cut off until August 1st, so as to conserve the energies of the plants for the fall crop. The plants must not be allowed to suffer for water in the fruiting season and a mulch of well rotted cow manure will be found of great advantage.

✓ **Progressive**. The largest in size and of extreme producing qualities. The plant is of medium size and very resistant to heat. Both blossoms and fruit are well protected by the strong healthy foliage. The fruit is rich and sweet, a deep red inside and out, of good medium size and very firm. **Pot grown plants**, \$1.00 per doz.; per 100, \$6.00; per 1000, \$50.00. **Layer plants**, ready about October 1st, 40c. per doz.; per 100, \$2.50; \$22.50 per 1000.

MICHELL'S SEASONABLE VEGETABLE PLANTS

Extra Strong Celery Plants

(READY ABOUT JULY 10)

These plants are grown from our own seed at our Nurseries at Andalusia, Pa. We have immense quantities and can fill orders for any number.

A WORD ON CELERY CULTURE.—Celery delights in a good, rich, moist soil. Locations where the soil may become dry should be avoided. Nothing is more beneficial or so little work as the watering of celery during periods of drought. After it has been transplanted and made some growth, the plants should be set in permanent rows 6 to 8 inches apart in the row. Many private gardeners prefer to use the two-row system of trenches; it will be found very advantageous to work. If the idea of the market gardener is carried out, the celery is planted in single rows about 2 feet apart, 6 or 8 inches apart in the row. By the former method the celery is usually banked up to blanch until almost entirely covered with soil; the top is then covered with leaves or other litter as winter approaches. In the single-row system the celery is banked up gradually to blanch, and after this process is over, at the approach of winter it is dug up and laid in shallow trenches after being cleaned. Storing for winter is done by covering it with waterproof celery paper and topping off with soil or leaves. The celery may thus be gotten out for market during the severest weather. Good cultivation is highly necessary during the growing period.

French Golden Self-Blanching. An early sort. The heart is a rich golden-yellow, with light yellowish-green outer leaves. 75c. per 100; 500 for \$3.00; \$5.50 per 1000.

Giant Pascal. One of the largest stalked kinds. It is in its prime for use during February and March, and can be used well up into spring.

White Plume. The White Plume is unsurpassed for fall and early winter use, requiring very little earthing to blanch it.

Winter Queen. This variety grows a very thick, solid and heavy stalk, and has a large heart. It is a close, compact grower, and when blanched is a creamy-white color.

Michell's Golden Self-Blanching Celery

Prices: (Except where noted), 60c. per 100; 500 for \$2.75; \$5.00 per 1000.

We cannot supply less than 50 celery plants of any one variety.

If wanted by Parcel Post add 15c. per 100 for postage.

Brussels Sprouts

BRUSSELS SPROUTS PLANTS

(Ready from July 1st to August 15th)

Matchless Improved. The plants should be well cultivated and kept free from insects. When heads begin to crowd, the lower leaves should be broken from the stem of the plant to give them plenty of room. 25 for 20c.; 60c. per 100; per 1000, \$5.00.

If wanted by Parcel Post add 10c. per 100 for postage.

CABBAGE PLANTS

Late Flat Dutch. A short stemmed, large, flat-head variety; very solid; keeps the entire winter when buried in cellars or pits.

Perfection Drumhead Savoy. A very curly, dark-green sort; well-flavored.

Red Dutch Drumhead. This cabbage is very sweet and should be used more largely. It is an excellent winter keeper.

CABBAGE PLANTS (Continued)

Danish Ballhead. Unequalled for keeping qualities, massiveness and weight of heads.

Price of any of the above cabbage plants 25 for 20c.; 50c. per 100; per 1000, \$4.00.

We cannot supply less than 25 cabbage plants of a variety.

If wanted by Parcel Post add 10c. per 100 for postage.

Perfection Drumhead Savoy Cabbage

Our Vegetable Plants are extra strong and thrifty

MICHELL'S SUPERB BULBS for Summer and Early Autumn Planting

EASTER IN 1919 COMES ON APRIL 20th

ALLIUM Neapolitanum (Ready in August)

Used exclusively for indoor culture in pots and pans. It is especially adapted to forcing and makes an excellent cut flower; color pure white. Height, 12 inches. It is not hardy, so cannot be planted outdoors. Dozen and 100 lots mailed free. Each, 2c.; 20c. per doz.; per 100, \$1.25; \$10.00 per 1000.

CALLA LILY BULBS

(Ready in September)

Callas require good, rich soil and plenty of warmth and water to make them thrive. Plant Callas indoors only.

GODFREY DWARF EVERBLOOMING CALLA (New)

This comparatively new calla has proven an excellent one, its character is exactly like the Æthiopica or regular variety, except it is of much dwarfer habit and freer bloomer; very desirable as a pot plant. Large blooming size bulbs, 20c each; doz., \$2.00; \$12.50 per 100.

Michell's Monster White Roman Hyacinths

FREESIA "MICHELL'S RAINBOW"

Light Pink, Dark Pink, Yellow and Orange, Light Blue, Lavender, Mauve, Yellow and Purple; All colors mixed. On account of the war we are unable to furnish these this season.

FRENCH ROMAN HYACINTHS

(Ready in August)

French Roman Hyacinths afford a continuous supply of bloom from early winter until late in spring if planted in succession (two weeks apart). They are very fragrant.

They are easily grown in pots or pans. The bulbs, if potted in August or September, the pots plunged in the open ground for a month, until the bulbs are well rooted, and then brought in the house, they can be had in flower in November or December, and a continuous supply of these delightful flowers may be had, by bringing in a few pots or pans of the rooted bulbs at intervals of about 2 weeks. The bulbs should be planted quite close together, a 6-inch pot or pan will be sufficiently large enough for six bulbs. They are not hardy and are not suitable for outdoor planting.

Michell's Putting Greens Mixture

A quick-growing mixture of short, thin-bladed grasses, over which the ball can roll without resistance. We do not recommend less than 1 bu. of 25 lbs. to a green 75 feet square. Prices: 1 qt., 30c.; 4 qts., \$1.15; 1 peck, \$2.25; 1 bu. (25 lbs.), \$9.00; 100 lb. lots and over, 35c. per lb.

Teeing Grounds Mixture. Used on golf courses or in places where a tough, resisting turf is wanted (20 lbs. per bu.). 25c. per qt.; 4 qts., 65c.; \$1.00 per peck; per bu., \$4.00.

Lawn Tennis Grass Seed. Tennis courts need grasses of a hardy nature, of fine leaf and close, compact growth. Our mixture will be found particularly adapted for the purpose (20 lbs. per bu.). Prices: 1 qt., 25c.; 75c. for 4 qts.; per peck, \$1.25; \$4.50 per bu.; 100 lb. lots and over, 21¼c. per lb.

MIXTURES FOR MISCELLANEOUS PURPOSES

Michell's Permanent Pasture Grass Seed. In the past few years ideas of what was the best way to establish a permanent grazing sod have undergone many changes. The old prevalent method of sowing timothy and clover has been found not only costly, but too short-lived to answer the purpose. The old custom has given way to the new, which is the sowing of a mixture of permanent grasses. Michell's Permanent Pasture Grass Seed is composed of about 10 of the best growing and most nutritious grasses and clovers for stock feeding or grazing. One sowing will last many years, although we advise additional sowing each autumn, just previous to which a light harrowing is recommended to give the grass a quick hold. Sow 3 to 4 bu. per acre on new land or 2 bu. on established pastures (15 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 60c.; per peck, \$1.00; per bu. (15 lbs.), \$3.50; 100 lb. lots and over, 16c. per lb.

Michell's Permanent Hayfield Grass Seed. While timothy is still extensively sown for this purpose, this mixture is gradually being adopted by the progressive farmer. Its main advantages are that certain grasses in this mixture will grow better in varying conditions of soil, thus giving a full crop of hay on land that otherwise might produce but a half crop of timothy and clover. Our formula is the outcome of thorough trials in every kind of soil. Sow 3 to 4 bu. per acre on new lands or 2 bu. on established fields (15 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 60c.; per peck, \$1.00; per bu. (15 lbs.), \$3.50; 100 lb. lots and over, 16½c. per lb.

Michell's Poultry Yard Grass Seed. Chickens love grass and should be placed where they can get it as much as possible. We put plenty of clover seed in this mixture, as it is very nutritious, and the fowls relish it (15 lbs. per bu.). 20c. per qt.; 4 qts., 60c.; 85c. per peck; bu., \$3.00.

WHITE CLOVER

Choice recleaned for sowing on lawns, pastures, etc. Sow 10 to 12 lbs. per acre (60 lbs. per bu.). Per ¼ lb., 20c.; 60c. per lb.; 5 lbs., \$2.80; \$5.50 for 10 lbs.; per bu., \$32.40; per 100 lbs., \$54.00.

THE AUTO-SPRAY

Auto Spray in Operation

It operates there were with compressed air. Safe and efficient. Liquid capacity, 4 gallons; pressure capacity, 40 lbs. The Brown Auto-Spray is probably the first real successful compressed air sprayer ever put on the market. Previous to its introduction other makes, some of them still being offered for sale. We have had a wide and varied experience with the different ones, and after personal tests and noting the experiences of our customers, perhaps they are as our stand-

ard compressed air sprayer this make. No sprayer is sold under broader guarantee for efficiency and durability. The Auto-Spray must please and will accomplish all that any first-class sprayer will, or the purchase price will be refunded. They will successfully spray bushes, shrubbery and trees, the latter with the use of extension pipes. The brass tank sprayer is the best, as corrosive solutions can be used in it without injuring the same.

A Weed Killer for Use on Lawns

THE NEW WAY

CLIMAX LAWN SAND

Showing method of applying CLIMAX LAWN SAND for destroying weeds in lawns.

"Climax Lawn Sand" is a unique combination of finely ground chemicals, which, when sprinkled over the grass, possess the remarkable property of destroying Moss, Chickweed, Plantains, Dandelion, and all other weeds on Lawns, Tennis Courts, Golf Greens, etc., at the same time promoting the growth of the finer grasses.

"Climax Lawn Sand" may be applied any time during the growing season of the year, namely, from beginning of April to the end of October.

The lawn must be absolutely dry; by that is meant that no rain or dew must be visible on the grass.

Ten to twelve a. m. during the months of April, May and October, nine to twelve a. m. during June, July, August and September.

Only apply in fine weather when the temperature is fairly high and when no rain appears likely for a day or two. This is most important.

After applying, the weeds blacken and die; the grass usually also becomes blackened and may remain so for a few days, but it quickly recovers its color, and young growths appear on the bare spots previously occupied by the weeds.

Should the weather be very hot and dry, the lawn should be thoroughly watered at the expiration of 48 hours after the application.

It acts as one of the most powerful fertilizers for grasses if applied as a top-dressing in the early spring. For top dressing as a fertilizer apply $\frac{1}{4}$ ton per acre.

MICHELLS' LIQUID WEED KILLER

Liquid Weed Killer can effectually be distributed with a watering can or in a sprinkling wagon.

An effective combination of high-grade chemicals which, diluted in water at 1 to 40, destroys the roots as well as the tops of all weeds and vegetation to which it is applied.

One gallon diluted is sufficient to cover 100 to 150 square yards; and one or two applications are sufficient for an entire season. Does not injure marble, cement or fencing. The best time for applying is just after a rain.

Erado Weed Gun

Don't Continue Pulling Weeds. Destroy the Roots and the Top Cannot Re-appear

By the use of the apparatus "Herbicide" may be used safely and effectively on lawns for removing dandelions, burdock, and other weeds that ruin a lawn.

This device is as handy as a cane, which it resembles; a reservoir, which holds about 2 quarts of liquid, is filled with Herbicide diluted and used for destroying weeds of all kinds in lawns without hurting the grass. It is 33 inches long and can

be used very conveniently. The idea being to fill the reservoir and press the sharp point of the gun into the heart of the weed until the flat stay pieces touch the ground, when a quantity sufficient to kill the weed is discharged into the heart of the weed which is destroyed for all time. The use of this apparatus provides healthy pastime for the suburbanite, who otherwise does not care for garden work. Price, \$1.50. All brass. Parcel Post Weight, 2 lbs.
