WAYSIDE GARDENS

AQUILEGIA (Columbine)

As a cut flower the Long Spurred Aquilegias are the daintiest of our outdoor grown flowers.

They come in blues and whites and yellows and shades of pink and rose in strains reasonably true.

Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived.

DELPHINIUM (Larkspur)

The Delphiniums are wonderfully beautiful with their stately spikes of blue. They are our best blue flower, are perfectly hardy and established plants produce a number of spikes, in the tall growing hybrids attaining a height of six and seven feet.

They are in demand by every florist for decorating and making up, the light blue Belladonna combining especially well with other flowers.

Our strain of English hybrids comes from crosses of choice named varieties and contains some remarkably beautiful specimens.

IRIS

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Planted in late August or early September they flower very freely the first season.

For use as cut flowers they are rapidly gaining in popularity with Florists.

The following list is arranged in order of blooming:
