CONTINUED ON OTHER SIDE

WOOD'S SEEDS FOR 1918

THE PATRIOTIC DUTY of farmers and gardeners everywhere is to increase food production, both for home consumption and for shipments of supplies abroad to supply our army and the sorely stricken people of our allies abroad.

The scarcity of labor makes intensive farming and gardening very desirable, and fertilizers should be used liberally, in order to make the largest production on acreage planted. While prices of fertilizers are higher than usual, they have not advanced in comparison with the high prices of farm and vegetable products, and farmers and gardeners can afford to use fertilizers freely, with the best assurance of profitable results.

Particular attention also should be paid by our farmers to proper rotation of crops, so as to increase and improve the fertility and productiveness of the land. Special attention should be paid to the sowing of forage and soil-improving crops, such as cow peas, soja beans and velvet beans, as these make not only large crops, but at the same time improve the fertility and productiveness of the soil.

On account of the high prices and scarcity of hay, our farmers should also pay special attention to the sowing of large acreages of grasses and clovers, and summer forage crops, such as millets, ensilage corn, sorghums and similar crops.

We give very full information in our catalog to enable farmers to determine intelligently as to the crops best adapted for their purposes. We also issue monthly WOOD'S CROP SPECIAL, which gives seasonable information in regard to crops that can be put in to advantage at different seasons throughout the year. Any of our customers who do not receive this publication regularly we will cheerfully, upon request, put their names on our mailing list to receive copies as issued.

We appreciate the continued and liberal patronage of our customers, which we shall always endeavor to merit by supplying the best seeds obtainable.

Yours very truly,

Richmond, Va., January 1, 1918.

T. W. WOOD & SONS.

General Information and Terms of Sale

How to Send Money Money can be safely sent by **BANK, CHECK, POSTOFFICE MONEY ORDER, EXPRESS MONEY ORDER OR REGISTERED LETTER.** Postage Stamps in small amounts are satisfactory. Customers who have no regular account with us will kindly remit the amount with their orders, or name business references, as customary, before opening new accounts.

SEEDS BY MAIL

AND EXPRESS

"POSTPAID" means that seeds so quoted in whatever quantity wanted, will be delivered at any post-office in the United States, Alaska, Cuba, Porto Rico, Canada, Mexico, Canal Zone, Philippine Islands, Hawaiian Islands, Guam, Samoan Islands and the U. S. Postal Agency at Shanghai, China. **At postpaid prices we will deliver by express if you prefer; it is safer.**

"BY EXPRESS" means that the purchaser pays the cost of transportation. To points beyond the third zone, it is cheaper to ship by express than by parcel post.

Lower Freight Rates and Quick Shipments

For large orders, shipments by freight are much cheaper than by express. Richmond is one of the best distributing points in this country, railroads radiating in every direction, giving prompt and efficient service and low freight rates. In these days of freight congestion it is very desirable to place freight orders as early as possible so as to have the seeds on hand when required for use.

Fluctuation in Prices

Conditions about all seeds are so unsettled that all quotations in this catalog are quoted subject to change without notice. Grass and Clover Seed, Seed Grain and all Field Seeds are constantly fluctuating. Fertilizers and Poultry Supplies are also quoted subject to change, but no change in prices will be made unless absolutely necessary.

We will take pleasure in quoting firm prices on any articles named in this catalog, at any time, upon request, or orders sent us will always be filled at lowest prevailing prices, whether prices are higher or lower than printed prices. When prices decline, we give our customers the benefit; while if prices are higher, we are, under present conditions, compelled to charge existing prices at the time the order is received.

About Warranting Seeds

While we use great care, both for our own and our customers' interest, to supply and furnish the best seeds that it is possible to obtain, there are so many conditions—weather and other causes—affecting the growth of seeds and the out-turn of crops, that it must be distinctly understood that all our seeds are sold under the conditions in regard to non-warranty of seeds, which have been generally adopted by the seed trade and which are as follows:

"We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned, and amount paid for them will be refunded."

Calendar of Monthly Operations—WHAT TO PLANT AND WHEN TO PLANT FOR EACH MONTH OF THE YEAR.

Applies to sections same climate as Middle Virginia. For other sections allowance must be made, according as they are earlier or later. For instance, Charleston, S. C., district, plans should be considered for two weeks earlier in the Spring and two weeks later in the Fall.

January. Prepare hot beds and sow early cabbage, lettuce, radish, beet, cauliflower and onion. Top dress asparagus beds with manure, also give an application of salt. Cut poles and stakes for pole beans and peas. Sow pansy and other flower seeds in hot-beds for later transplanting. Send in your order for seeds early, so as to have them on hand at the proper time for sowing.

For the Farm.—Top dress with manure, grass and clover fields or fall sown grain. If weather is open, use every opportunity to prepare land for spring crops.

February. Sow in hot-beds or cold frames early cabbage, cauliflower, beet, onion, lettuce, radish; and in hot-beds sow egg plant, tomato and pepper. The last of the month sow in open ground early peas, spring kale, rhubarb and horse radish roots, beets, spinach, carrot, celery, radish and parsley. Set out asparagus roots, onion sets, and hardy lettuce plants. Early plantings of potatoes can be made. Hardy flower seeds can be forwarded either by sowing in hot-beds or in pots and boxes in the house for later transplanting. Sow Wood's Evergreen Lawn Grass.

For the Farm.—Prepare plant beds and put in tobacco seed. Sow Canada field peas and oats, and towards end of month, grass and clover seeds can safely be put in. Sow rape for sheep and hogs.

March. This is the active month for sowing all kinds of hardy seeds, and the sooner most of them are sown the better. Sow garden peas, cauliflower, early cabbage seed, onion, celery, spinach, leek, parsley, lettuce, radish, beet, asparagus, carrot, parsnip, salsify, corn salad, collards, kale, rhubarb and early turnip, etc. Under glass, sow tomato, pepper, and egg-plant seed. Plant Irish potatoes, asparagus and rhubarb, horse radish roots, onion sets, etc. Set out cauliflower, cabbage, and lettuce plants, from hot-beds, after they have been hardened by leaving the glass open at night. Sow herbs in a warm border. Prepare melon, cucumber and squash hills for later planting. Sow the hardy kinds of flower seeds. Sow lawn grass.

For the Farm.—March is the best month for sowing grass and clover seeds in the spring. Sow Winter and Spring Oats, Canada Field Peas, Dwarf Essex Rape, and plant Artichokes for hogs and cattle.

April. Plant early potatoes, sow cabbage, lettuce and tomato in open ground for succession. Sow beets, celery, carrot, salsify, parsnip, onion, radish, spring kale, early turnip, kohlrabi, corn salad, collards, nasturtiums and rhubarb, asparagus, globe artichoke, parsley, mangel wurzels and herbs. Put out cabbage plants, onion sets and asparagus roots; bed sweet potatoes; plant early corn, garden peas, snap beans, and late in the month cucumber, squash, watermelon and cantaloupe can be planted. Vine seeds are tender, so should the weather be cold or wet, defer planting till May. Lawn grass can also be sown any time this month. Sow hardy flower seeds; after middle of the month, half hardy kinds can be sown, and dahlias, gladiolus and canna-bulbs set out.

For the Farm.—Sow spring oats, clover and grass seeds, but get them in early. Later in the month sow mangel wurzels for stock, plant corn, cotton, chufas, peanuts, etc.

May. Most of the tender seeds can be sown this month. Asparagus seed can yet be sown, likewise carrot, salsify, parsley, beet, pole and snap beans, sugar corn, and tomatoes, radish, brussel sprouts, broccoli, corn salad, collards and nasturtiums. Plant black-eye peas, lima beans, squash, cucumber, watermelon, cantaloupe, okra and pumpkin. Late cabbage and cauliflower can be sown to make plants for setting out for fall. Set out tomato, pepper and strawberry plants.

For the Farm.—Plant sugar beets and mangel wurzel for winter feeding. All the sorghums, millets and fodder plants can be sown; likewise cow peas, soja and navy beans. Chufas should be planted now, likewise corn, peanuts and cotton. Set out tobacco plants.

June. Set out cabbage, tomato, egg-plant, pepper and sweet potato plants. Sow tomato for late crop, late cabbage and cauliflower for winter use. Plant collards, okra, watermelon, cantaloupe, cucumber, squash and pumpkin for late use, and radish, pole, navy and snap beans and sweet corn for succession. Plant late potatoes.

For the Farm.—Sow the millets, cow peas, sorghum, soja beans, navy beans, and plant late corn. Plant corn for ensilage.

July. Plant snap beans for succession and sugar corn for late roasting ears. Set out late cabbage and celery plants for winter use. This is the best month to sow rutabagas, but they can also be sown in August. Sow collards, kohlrabi, lettuce, early turnips. Plant cucumbers for pickling and table, and late potatoes for winter use.

For the Farm.—Sow German and Hungarian millet for hay or fodder corn in drills for ensilage or fodder. Cow Peas for hay or as a soil improver. Buckwheat can be sown for bees, as an improver of the soil, and for grain. Plant navy beans. Sow crimson clover at last working of corn or other cultivated crops. Sow dwarf essex rape for sheep and cattle grazing.

August. Continue planting snap beans for the table and pickles. If any cabbage plants remain unplanted, put out at once; likewise celery plants. Sow Wood's Cabbage and Big Boston lettuce for fall heading, likewise endive. Wood's Lightning Excelsior Peas sown this month yield a good fall crop. Sow winter radish, endive, collards, parsley, spinach, kale, turnip, rutabaga and Spanish and Italian varieties of onions.

For the Farm.—Crimson clover is one of the best of fall sown soil-improving crops, and should be sown wherever possible. If it is not required for feed, it will improve the soil equal to manure when turned under. Rye and barley should be sown for fall and winter grazing and afterwards will make a crop of grain. Sow vetches and rape, and towards the end of the month grasses and clover seed and alfalfa can be safely put in.

For Beautiful Velvety Green Lawns Sow **WOOD'S LAWN GRASS SEED**

FULL INFORMATION WILL
BE FOUND ON PAGE 46 OF
THIS CATALOGUE :: ::

WOOD'S SPECIAL GRASS and CLOVER SEED MIXTURES

Best for permanent hay and pasturage
yields. See pages 76-77.

Our trade in these mixtures is steadily in-
creasing every year.

frames for spring plants. Plant strawberries.

For the Farm.—All kinds of grass and clover seeds can be sown this month, but the earlier clover seed is put in the better. Sow wheat, oats, rye, barley, vetches and rape. If you have not received a copy of our Fall Catalogue, giving full information in regard to these crops, write for a copy.

November. Sow lettuce and early varieties of cabbage in cold frames. Set out cabbage, lettuce and strawberry plants. Plant out asparagus, rhubarb and horse radish roots. Lawn grass can yet be sown, but the earlier it is put in the better. Flowering bulbs can be put in this month.

For the Farm.—Wheat, rye, barley, vetches, timothy and herds grass can yet be sown, but the earlier they are put in the better. Sow Canada field peas. Rye makes a fine soiling and cover crop. Sow it liberally on all vacant lands.

December. Cabbage and lettuce can be sown towards the end of the month in hot-beds or cold frames, and beets, radish and lettuce can be forced for winter use. The winter growing of lettuce in hot-beds usually proves very profitable and satisfactory. Plant Marrowfat Peas for market or garden use. Canada field peas can also be sown, but when seeded during the winter should be put in deeper than usual.

DESIRABLE SPECIALTIES IN WOOD'S SEEDS

New Honey Dew Melon

Introduced by us to our customers the first time the past season, the new Honey Dew has proved itself to be a distinct acquisition, as one of the most luscious and sweetest melons grown. It has been quite generally sold in hotels and first-class restaurants all over this country, and its sweetness and fine flavor make it one of the most popular melons. The flesh is rich cream, and very sweet, seed cavity small, making it a very thick-fleshed melon. The size runs six to seven inches in diameter from top to bottom, and about eight inches in length, making it slightly oblong in shape. The rind, light green to a dull white when ripe, and very tough, making it a remarkably good shipper.

It is rather late in maturity, and an excellent melon to plant to come

in after other varieties. While it is very generally grown in the West and in California, it has succeeded very well in some sections of the South, and we recommend its more extended use, as its distinct and luscious flavor makes it one of the most desirable table varieties in our list.

The following are extracts from customers' letters who grew this melon the past season.

I consider the Honey Dew muskmelon one of the finest melons I ever raised. It is sweet and luscious and a fine keeper. It retains its flavor several weeks after it is ripe.—A. T. FRENCH, Craven Co., N. C., Oct. 22, 1917.

Honey Dew muskmelon is splendid.—L. A. TANNERY, Pickens Co., S. C., October, 1917.

PRICE OF HONEY DEW MELON: Pkt. 10 cts.; ounce 25 cts.; $\frac{1}{4}$ lb. 75 cts.; (pound, \$2.60 postpaid). By express, lb. \$2.50.

New Excel Watermelon

Wherever planted, our customers are enthusiastic in the praise of this splendid new water melon, which we introduced two seasons ago. The following are extracts from customers' letters who planted this variety the past year. For full description of Excel Watermelon, see page 30.

PRICE: Pkt. 5 cts.; ounce 10 cts.; $\frac{1}{4}$ lb. 25 cts.; pound 80 cts. postpaid. By express, lb. 70 cts.; 5 lbs. and over, 65 cts. lb.

I am well pleased with the Excel Watermelon, and find it to be a good seller. The heavy rains of July made the season very unfavorable for melons in this section, but some of my Excel melons weighed as much as 60 lbs. each. I shall plant the Excel next season.—H. R. JONES, Wake Co., N. C., Oct. 10, 1916.

New Excel Watermelon Fine Flavor and Very Large.

The new Excel Melon seed I got from you last spring made the finest melons I ever saw. They were of fine flavor and very large, from 60 to 70 pounds.—E. M. ERVIN, Florence Co., S. C., November, 1916.

Excel Watermelon One of the Finest Melons Ever Raised.

The Excel is one of the finest melons I ever raised. I sold numbers this year weighing 50 and 60 pounds, while other melons failed. I raised a fine crop of this variety. I consider the Excel one of the finest watermelons on the market.—A. T. FRENCH, Craven Co., N. C., October 22, 1917.

Cream, or Rice Peas

While this is one of the good old Southern edible peas, it is very highly appreciated in sections where it has been grown. It is not as generally known as its merits entitle it to be, and should be much more generally planted throughout the South.

It is one of the earliest to mature, and yields enormously of shelled peas, which are valuable for use either green or as dried peas during the winter. They are superior in flavor to the blackeye peas, somewhat similar in appearance to the Gallivant or Lady Pea, but are larger in size.

Fuller information regarding this desirable pea and other edible cow peas will be found on page 87 of the catalog.

PRICE: Pkt. 10 cts.; quart 40 cts. (postpaid, per quart 55 cts.); peck \$2.00.

UNITED STATES FOOD ADMINISTRATION LICENSE NO. G-181.

Wood's Famous Brimmer Tomato

The Peer of All Tomatoes for Large Size and Extra Fine Quality of Fruit.

Both private and market gardeners should plant Brimmer. The famous Brimmer Tomato was introduced by us several years ago, but still continues its pre-eminence and popularity wherever it is planted, and we unhesitatingly recommend it as one of the largest, most solid and finest quality of all tomatoes. We give full description of this variety on page 41 of this catalog.

Price: Pkt. 15 cts.; $\frac{1}{4}$ oz. 35 cts.; $\frac{1}{2}$ oz. 60 cts.; ounce \$1.00.

BRIMMER TOMATO PLANTS (Ready in April and May).

Hot-Bed: Dozen 30 cts.; 50 for 65 cts.; \$1.00 per 100, postpaid. By express, dozen 25 cts.; 50 for 50 cts.; 85 cts. per 100.

Transplanted: Dozen 40 cts.; 50 for \$1.00; \$1.75 per 100, postpaid. By express, dozen 35 cts.; 50 for 90 cts.; \$1.60 per 100.

For prices on other Vegetable Plants, see page 44.

Brimmer Tomato Superior in Quality and Productiveness.

I have planted the Brimmer Tomato for the last three years, and do not know any superior quality or productiveness. My vines are still bearing, the 10th of October.—E. C. COKER, York Co., S. C., Oct. 10, 1917.

Brimmer Tomato Excellent; Could Not Be Improved.

I am pleased with your excellent Brimmer Tomato, as I have raised the largest and finest flavored tomatoes this season I have ever had; vines are still green and growing, and have tomatoes ripening every day. The Brimmer could not be improved, and I will plant it again next year.—J. A. GAITHER, Catawba Co., N. C., Oct. 8, 1917.

The Brimmer Tomato.

Six Brimmer Tomatoes Averaged Nearly Four Pounds Each.

I had six Brimmer Tomatoes this season that weighed 23½ pounds.—DAVIS TWYMAN, Fulton Co., Ga., Sept. 23, 1917.

Brimmer Tomato Larger and Better Every Year.

The Brimmer Tomatoes get larger and better every year. I have always found everything just as your catalog says it is.—G. L. WEBB, Rowan Co., N. C., Oct. 10, 1917.

Farming 50 Years—Never Saw Anything to Equal Our Brimmer Tomato.

I am eighty years old, farming fifty years. Have never seen anything to equal your Brimmer Tomato.—R. S. JETER, Amelia Co., Va., Feb. 28, 1917.

Pimento Pepper

One of our new introductions in seeds, which has proved very popular with our customers everywhere. Very sweet and delicious, and entirely free from pungency. The hull or meat is two or three times as thick as that of the old Bell type, yielding about one-half more edible product to the same measure. Can be eaten raw like an apple, stuffed with meats, rice, etc., and baked; can be served as a salad, made into Spanish omelets, and for canning is especially fine. When ripe it is a beautiful scarlet red, smooth and uniform in shape and size; an abundant bearer and continues in bearing till frost.

PRICE: Pkt. 10 cts.; ounce 40 cts.; $\frac{1}{4}$ lb. \$1.35; pound \$5.00 postpaid.

Sable, or Peking Soja Beans

A black-seeded variety of Soja Beans, somewhat similar in appearance to the Wilson. It gives, however, larger seed yields, and is superior as a forage variety to the Wilson. It is most excellent to grow, both for forage and for yield of seed, and has proved to be very popular in the districts in Maryland and Delaware where it has been largely grown for two or three seasons past. For full information and description of other Soja Beans see page 88 of the catalog.

PRICE: Pkt. 10 cts.; quart 30 cts. (postpaid, quart 45 cts.); peck \$1.50; bushel \$5.50.

Improved Facilities for Handling Our Business

During the past year we have moved our offices and store room from the old location, No. 12 South Fourteenth Street, across the street, and now occupy the four buildings, Nos. 11, 13, 15 and 17, for our offices, main store, mail order department and one of our shipping departments. This increase in our facilities, together with our other warehouses and branch retail store, corner Sixth and Marshall Streets and 1707 East Franklin Street, gives us an equipment for the handling of the seed business that is not surpassed anywhere.

Our seed farms, Williamson and Kenbrook, comprise an acreage of over 1,600 acres, which is largely devoted to seed growing, testing and seed trials, for the proper conduct of our business.

Altogether, our warehouse and seed farm equipment is not surpassed by any other seed house in this country.

VELVET BEANS

The Sensational Forage and Soil-Improving Crop—Cost Less to Seed Per Acre Than Any Other Crop.

Velvet Beans make an enormous growth of vines; greater, in fact, than any other known forage plant, in the same length of time, far surpassing the cow-pea in growth. Velvet Beans are usually planted in rows four to five feet apart, at the rate of about half a bushel per acre. As a soil improver they are considered superior to cow-peas, as they make so much larger growth and so much heavier amount of foliage. The proportion of nitrogen contained in the vines is about the same as in cow-peas, and as the yield is so much greater, the total amounts of nitrogen and humus added to the soil are correspondingly larger. A crop of three tons will add much nitrogen to the soil as will a ton of cotton-seed meal, while the amount of humus will be three times as great.

Also makes splendid, nutritious fall and winter grazing.—In the South, Velvet Beans are used very largely for winter grazing, and for that purpose it is one of the best crops that can be grown on the light soils and in the long season of the Gulf Coast and Florida. The crop should be allowed to grow until December or until killed by frost, after which it can be grazed through the winter, as the vines, leaves and pods decay very slowly, and remain palatable a long time. Early in the year, the crop remaining on the ground is usually plowed under as a soil improver, and adds very materially to the tons will add much nitrogen to the soil as will a ton of cotton-seed meal, while the amount of humus will be three times as great.

In the South these beans are very generally grown in with the corn. The corn is planted in rows five feet apart, and the corn about three feet apart in the row, and the beans planted in the drill between the corn. At the last working of the corn, beans are planted again in the middles between the rows of corn. When the corn is dry, it is pulled from the stalk and the cattle afterwards turned in to graze in the velvet bean and corn fields. It furnishes most nutritious and fattening food for cattle, and is considered the cheapest method of fattening cattle known, and at the same time the roots and what is left of the vines after the cattle are taken off, when turned under make a good soil-improver.

The crop grown in this way not only gives a grain crop, but a splendid fattening cattle crop, and also makes for decided improvement to the land. We strongly recommend to our cattle farmers all throughout the South to practice this method, feeling sure that they will get the most satisfactory and profitable results.

100-Day Velvet Beans—This new Velvet Bean is creating a sensation wherever it is planted. One of the quickest-growing and earliest maturing of the Velvet Beans, and is well adapted for growing in districts further north than Velvet Beans ordinarily have been grown. It will succeed and mature from Virginia southward, and will make a large growth in more northerly sections, even where it does not mature the seed.

It makes a wonderful soil-improver and forage crop, and the best of grazing for cattle, and is, in our opinion, destined to very largely take the place of other Velvet Beans all thru the East and Middle South. **Lb. 10 cts. (postpaid, lb. 13 cts.); 10 lbs. and over, 7 cts. per lb.; 50 lbs. and over, 5½ cts. per lb.; 100 lbs. and over, 5 cts. per lb. (\$3.00 bus., 60 lbs.).**

Plants 100-Day Velvet Beans with Corn.

I think the 100-Day Velvet Bean will meet the fullest expectation as to vines. Plant beans when you plant corn, either in rows between your corn rows or on the same row with the corn, one hill of corn and one hill of beans, in continuous succession. 100-Day Velvet Beans will make under most any condition provided the weeds and grass are kept down until the bean begins to vine.—R. L. WILLIAMS, Washington Co., N. C., April 21, 1917.

100-Day Velvet Beans Great for Both Hay and Soil Improvement.

The 100-Day Velvet Beans I bought of you I planted in last of June. I think they are fine. I never gathered more or better forage from a small place in my life. I think it great for either hay or soil improvement.—MISS M. C. HAYES, Dulpin Co., N. C., Oct. 17, 1916.

100-Day Velvet Beans Make Poor Land Rich and Poor Stock Fat.

The 100-Day Velvet Beans are what you claimed them to be so far as growth and planting are concerned. I did not plant mine until the first days of June, and they are not matured at present, but the beans and the foliage I have plenty of them, and if frost stays off for a few days longer I will have plenty of dry beans. I think they are the thing to make poor land rich and to make poor stock fat.—LINDSEY ENNIS, Harnett Co., N. C., Oct. 9, 1916.

Osceola Velvet Beans

Pronounced by some of our Southern correspondents as by far the greatest Velvet Bean. A hybrid of the 100-Day and the Yokohoma Beans; larger than the 100-Day, more productive and earlier. Produces as much foliage, but is free of the itching fuzz that makes other Velvet Beans so disagreeable to pick. Costs less to pick, and can be picked very much easier.

We recommend this new Velvet Bean as having many points of value over the older kinds, and believe it will come into general use wherever Velvet Beans are grown.

PRICE: Lb. 12 cts. (postpaid, lb. 20 cts.); 10 lbs. and over, 9 cts. per lb.; 50 lbs. and over, 7 cts. per lb.; 100 lbs. and over, 6¼ cts. per lb. (\$3.75 bus., 60 lbs.).

The Osceola is a hybrid introduced by the Florida Experiment Station. This bean is larger than Georgia Velvets—thin hulls, an excellent keeper and does not shatter out so badly like the Yokohoma. It is as early or earlier than the Hundred Day, produces as much vine and foliage, and is the best yielder of seed of any of the Velvet Bean family. Being arger, they are more easily gathered and DO NOT STING THE HANDS WHEN HANDLING.—R. H. & W. C. AGEE, Dallas Co., Ala., 1917.

The Osceola Bean is a cross between the Yokohoma and Early Speckled Bean. Is a very large speckled bean, matures nearly as early as the Early Speckled Bean, very prolific and much harder than most any other kind, which makes them better for crushing or grinding, and will stay in the field all the winter. In fact, I don't think you can recommend them too highly.—E. L. ALBREATH, Conecuh Co., Ala., Nov. 9, 1917.

Yokohoma Velvet Beans

—An early variety of Velvet Beans which is growing very popular throughout the South. Makes a large, quick growth, and is rapidly increasing in popularity wherever it is grown. **Lt. 12 cts. (postpaid 20 cts. lb.); In 10-lb. lots and over, 9 cts. lb.; 50 lbs. and over, 7 cts. lb.; 100 lbs. and over, 6¼ cts. lb. (\$3.75 bus., 60 lb.).**

Your seeds have given good satisfaction every time. The Yokohoma Velvet Beans made a heavy and vigorous growth. I consider them among the best. There is a sense of satisfaction when ordering seed from T. W. Wood & Sons, as they have always made good.—BENJ. SULLIVAN, Baldwin Co., Ala., Oct. 19, 1916.

Chinese Velvet Beans

—This new velvet bean is rapidly coming into great popularity wherever it is grown, on account of its earlier maturity than the regular velvet bean. It makes even a ranker and larger growth of vines and leaves than the regular Speckled Velvet Bean, and is of more value for soil-improvement. It grows off vigorously from the start, and is better adapted for planting in more northerly districts than other kinds. The use of Velvet Beans, both as forage and grazing and soil-improving crops, is increasing everywhere, and the quicker growth of this variety will make Velvet Beans more generally planted than heretofore. **Lb. 12 cts. (postpaid lb. 20 cts.). In 10-lb. lots and over 8 cts. lb.; 50 lbs. and over 7 cts. lb.; 100 lbs. and over 6 cts. lb. (\$3.60 bus. 60 lb.).**

I am eating the White Chinese Bean, and they are good when well cooked. So it will be a hard matter to starve out the Cracker if he raises beans. My method of cooking is: I first soak in hot water and take off the skin. Then I put in a pot and boil for 1½ hours; then change and water and pour on more hot water and boil until soft; then put in salt and slice of bacon. Put them in a pan with a tight-fitting cover and bake. I put in some pepper and butter or grease, as you wish. They will turn the water black like cow peas, and this takes the strong taste out of them. There are but few who can tell what beans they are eating.—I. L. HODGSON, Levy Co., Fla., May 1, 1917.

Reproduced from Actual Photograph of Ten Ears of the Bellwood Strain of **WOOD'S PRIZE-WINNING BOONE COUNTY CORN**.

Wood's Prize-Winning Boone County Corn ^(Bellwood Strain) Grown Specially for Us on the Famous Bellwood Farms

The following letter, by Mr. Albert R. Bellwood, gives the splendid record of this corn, together with the methods which have been used to make it one of the most highly bred and productive seed corns obtainable:

"The strain of **PRIZE WINNING BOONE COUNTY CORN** which I am supplying you has for the last five years been awarded first prize for the best ten ears white corn at the Virginia State Fair.

"At the 'Virginia Corn Growers' Association' show in 1917, which is the only year in which it competed, it won first for ten ears.

"At the Panama-Pacific International Exposition it was awarded a gold medal and pronounced by Prof. Holden, who is the greatest corn expert in America, as 'almost perfect.'

"The Southside Show, Petersburg, Va., has given it first for six years consecutively.

"This perfection has been brought about by maintaining a seed plot isolated from other corn in which each year we used about twenty of the very finest ears grown the previous year. The ears must be of good size and shape, and conform exactly to one type. If, on shelling an ear, the grain is not found to be of the right shape or with poor germs, it is discarded. The seed plot is given the very best attention, and weakly or badly shaped stalks are cut out.

"Prof. Holden says: 'The best show corn is the best seed corn. If the corn judge knows his business, the samples that he places the blue ribbons on will be the best for seed of all that is before him.'

"Hon. David Rankin, who has grown 6,000 acres of corn in one year on one of his farms in Missouri, says: 'Good seed corn is cheap at five times the price of ordinary market corn.'

"I once paid \$5.00 for a half bushel of corn, and got the price back many times the first year in premiums, besides having one of the best strains of a leading variety to go on with."—ALBERT R. BELLWOOD, Chesterfield Co., Va., Aug. 4, 1917.

We made an exhibit of this splendid strain of **WOOD'S PRIZE-WINNING BOONE COUNTY CORN** at the Virginia State Fair last year, and it attracted universal attention and admiration. The remarkable uniformity, large size and well-filled ears showed it to be one of the finest strains of **BOONE COUNTY CORN** in cultivation.

Farmers desiring to procure one of the most highly-bred and productive corns obtainable will do well to order our Bellwood strain of this famous **WOOD'S PRIZE-WINNING BOONE COUNTY CORN**.

PRICE: Pkt. 10 cts.; per quart, 30 cts. (postpaid, quart, 45 cts.); peck, \$1.50; bushel, \$4.00. Selected ears, \$5.00 per bushel crate.

WOOD'S SEED POTATOES

We do one of the largest businesses in seed potatoes in the South, our trade every year experiencing a constant and steady growth, resulting from the fact that our seed potatoes have acquired the very best reputation for quality, productiveness and satisfactory crop results.

Our Seed Potatoes are all specially grown for seed purposes, in the best potato districts in this country, and are very much superior to stocks ordinarily sold.

Our Maine-grown Seed Potatoes have achieved quite a reputation for the superiority of stocks which we supply, and for the uniformly satisfactory yields reported by our customers.

Our Early Ohio Potatoes are grown in the famous Red River Valley District, which is noted for producing the finest Early Ohio potatoes in this country.

Our Northern-grown Seed Potatoes are grown principally in New York State and Michigan.

Second Crop Seed Potatoes

We desire to call the special attention of our customers to our Second Crop Seed Potatoes. These potatoes have given the very best crop results wherever grown the past season, producing larger yields and better quality of potatoes even than Maine-grown seed, and we strongly recommend their more extensive planting everywhere.

These Second Crop Seed Potatoes are grown in the eastern part of our State, from selected Maine-grown stocks. These Maine-grown Potatoes are planted in July or early in August, and the crop dug late in the fall, which enables them to be furnished in the very best and most vigorous condition for spring planting. They average a little smaller in size than the Maine-grown and northern-grown potatoes, and consequently plant further, costing less to plant per acre than other kinds.

Your Second Crop Potatoes proved to be all right, well grown. I can grow larger potatoes from the Second Crop Cobblers than the Bliss, but the Bliss will sell for more on the market than the Cobblers.—O. C. PRICE, Lexington Co., S. C., Oct. 13, 1917.

The 1st of March this year I bought 2 bbls. Red Bliss Virginia-grown Second Crop Potatoes from you. The barrels opened up full measure 11 pecks each, and not a rotten potato. They gave the best stand I ever saw and a splendid yield. I will want more like them next February.—JOHN W. BRYAN, Wayne Co., Ga., Sept. 29, 1917.

SECOND CROP IRISH COBBLER. Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.75; 165-pound sack (11 pecks), about \$6.50; barrel, net weight 165 lbs., about \$6.75.

SECOND CROP RED BLISS TRIUMPH. Per 15 lbs. (peck), 90 cts.; per 60 lbs. (bushel), \$3.00; 165-pound sack (11 pecks), about \$7.25; barrel, net weight 165 lbs., about \$7.50.

Your Second Crop Irish Cobbler Potatoes did fine for me. I raised more from them than any other potatoes. I planted one bushel to themselves and made 35 bushels. I have recommended them to the neighbors. I can't praise them too much.—JAS. L. HAMMER, Alexander Co., N. C., November, 1917.

I think the Second Crop Irish Cobbler is the potato for me. The barrel I obtained from you last season gave very good results. I got a better stand and made a better crop than I got from other varieties, and I shall want them next season for my entire crop.—J. H. CARRAWAY, Carteret Co., N. C., Oct. 17, 1917.

PRICES OF POTATOES FLUCTUATE. The prices quoted here are about as we expect them to be, but we shall take pleasure in quoting prices at any time upon request, or will fill any order entrusted to us at lowest prices at the time the order is received.

We quote prices on seed potatoes based on the pound price instead of by measure, but are quoting them in the quantities usually purchased and ordered by our customers. Prices include cost of bags and barrels in the respective quantities quoted. While we quote potatoes in 165-pound sacks, still we recommend, where this quantity is ordered, that it is better to order shipment in barrels, as shipment in barrels prevents bruising and potatoes in barrels carry safer and better in transit.

Irish Cobbler Potatoes

Selected and Grown Specially for Seed Purposes, Superior Both in Quality and Productiveness.

We have never sold a variety of potatoes of which we have received more uniformly, satisfactory and enthusiastic reports from our customers, and we recommend it strongly as a most desirable and productive extra early variety of excellent table qualities; and it produces smooth, round, plump and handsome tubers, ready for market ten to twelve days earlier than Early Rose. The tubers are a beautiful creamy white, eyes strong, well developed and slightly indented. Flesh white, skin even and slightly netted, which in potatoes always proves a distinctive mark of fine quality. The Irish Cobblers are better adapted for planting in light loamy or sandy soils.

Wood's Maine-Grown Irish Cobbler Potatoes Finest We Have Had in Several Years.

Our Potatoes, Irish Cobblers, are the finest we had in several years, in spite of the adverse season. After planting we had six weeks of dry weather, then a long wet season in which the ground was continually under water and still the tubers were fine, so large, smooth and mealy.—MRS. T. GALT, Marion, Smyth Co., Va., Oct. 12, 1916.

More Than Pleased With Our Maine-Grown Irish Cobblers.

I am more than pleased to say the results from the Maine-grown Irish Cobbler Potatoes secured from you were far beyond my expectations. The yield was excellent and the quality, size and shape were superb. I would particularly recommend this potato for this section and its soil.—J. MORTIMER, JR., Darlington, Darlington Co., S. C., Oct. 14, 1916.

We can supply both the Maine-grown and Second Crop Irish Cobblers, all selected seed stocks.

MAINE - GROWN IRISH COBBLERS. Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.75; 165-lb. sack (11 pecks), about \$7.00; barrel, net weight 165 lbs., about \$7.25.

Took Prize on Our Cobblers at the Mississippi and Alabama Fair.

I was awarded the prize again at the Mississippi and Alabama Fair on the Cobbler and Triumph Potatoes. I planted after an oat crop. The seed potatoes were fine and in good condition when I got them home.—E. R. SNOWDEN, Lauderdale Co., Miss., Jan. 23, 1916.

SECOND CROP IRISH COBBLERS. Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.75; 165-lb. sack (11 pecks), about \$6.50; barrel, net weight 165 lbs., about \$6.75.

Our Irish Cobblers Yielded Abundantly.

I want to say that your Irish Cobblers I planted yielded abundantly, and every one of them were good potatoes.—MARY LEE JOHNSON, Jefferson Co., W. Va., March 20, 1917.

TRIUMPH, or RED BLISS

An extra early potato, round in shape, pink skin, white flesh, and of handsome appearance. This seems to be specially adapted to Southern soil and climate, and is a great favorite with Southern truckers. Is also largely grown for second crop, and sold in Northern markets for New Bermuda Potatoes during the late winter and early spring.

MAINE-GROWN RED BLISS. Per 15 lbs. (peck), 90 cts.; per 60 lbs. (bushel), \$3.00; 165-lb. sack (11 pecks), about \$7.50; per barrel, net weight 165 lbs., about \$7.75.

Maine-Grown Red Bliss Triumph Potatoes Give Most Satisfactory Results.

For the past several years I have planted Maine-grown Red Bliss Triumph Potatoes bought from you. In the meantime I have planted other varieties, but I have found the most satisfactory results, both as to yield and quality, from the Maine-grown Red Bliss Triumph.—B. F. McLEAN, Maxton, Robeson Co., N. C., Oct. 11, 1916.

The Red Bliss Irish Potatoes we got of you were certainly extra fine, in fact, your garden seed are all that could be desired.—WM. C. FOSTER, DeLeon Springs, Fla., Volusia Co., May 8, 1916.

SECOND CROP RED BLISS. Per 15 lbs. (peck), 90 cts.; per 60 lbs. (bushel), \$3.00; 165-lb. sack (11 pecks), about \$7.25; per barrel, net weight 165 lbs., about \$7.50.

The Red Bliss makes the finest and largest potatoes, but the Irish Cobblers made more potatoes to hill, but not as large as the Red Bliss, but both varieties were good, and best of all, they were free from scab and disease. All seeds I've bought of you were O. K.—NEILL J. GILLIS, Hoke Co., N. C., Oct. 10, 1916.

I had fine success with the potatoes I got from you last spring. I won a blue ribbon on all I got from you at the Southeast Arkansas Fair, and like them very much. I won premiums on all the seed I got from you.—J. S. McCLOY, Drew Co., Ark., Dec. 16, 1916.

EARLY OHIO POTATOES

Improved Early Ohio—The popularity of this variety to plant for an early and profitable crop is increasing every year, and customers who once plant our stock of this variety continue to do so in increasing quantities each successive year. The particular advantage of this over other early kinds are that it averages larger, making more large-sized potatoes, and is of decided superiority in table qualities, and truckers or gardeners who want to build up a name for superior quality should plant this variety. The tubers average large in size, are oval, oblong and round at the seed end. It makes an excellent keeper and shipper, and is very productive. From our customers' experience we believe this variety best adapted for planting in loamy or stiff soils. Irish Cobblers seem to do best in light or sandy soils.

IMPROVED EARLY OHIO. Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.75; 165-lb. sack (11 pecks), about \$6.50; barrel, net weight 165 lbs., about \$6.75.

The Early Ohio Potatoes gave perfect satisfaction. I made a good yield without any fertilizer and they are the best keeping potatoes that I ever had and there are no better eating potatoes.—T. B. TYLER, Morrison, Warwick Co., Va., Oct. 19, 1916.

I have planted your Early Ohio Potatoes for the past three years and consider them to be the best early potato on the market for our Piedmont section of N. C. Their quality is unsurpassed.—J. P. ROY, Winston-Salem, Forsyth Co., N. C., Oct. 24, 1916.

Extra Early Sunlight—A new potato which is proving to be a money-maker for truckers wherever planted. It is extra early in maturity, somewhat similar to the Rose in shape, and a white potato of most excellent cooking qualities. Makes a very attractive appearance when dug, and sells at the highest price in our markets, shippers obtaining much higher prices for the Sunlight than for ordinary kinds, on account of its appearance and quality. Wherever it is grown it speedily becomes very popular, and truckers and gardeners are planting it on the largest scale.

MAINE-GROWN EXTRA EARLY SUNLIGHT. Per 15 lbs. (peck), 90 cts.; per 60 lbs. (bushel), \$3.00; 165-lb. sack (11 pecks), about \$7.25; barrel, net weight 165 lbs., about \$7.50.

I have found the Extra Early Sunlight a fine all-round potato—a good keeper and fine quality.—A. W. ROBBINS, Franklin Co., Va., Feb. 20, '17.

The Extra Early Sunlight Potatoes I bought from you made a splendid crop.—C. M. THONESSEN, Lightfoot, James City Co., Va., Oct. 28, 1915.

Spalding's No. 4 Rose—A popular and large-yielding early variety, coming in a little later than the regular Early Rose, but ordinarily gives larger yields and better crop results. It has attained very great popularity in some of our trucking districts, particularly the Eastern Shore district of this State, and in Florida, where it is quite extensively grown. It makes a large-sized round potato of an attractive, pinkish skin, and is of good keeping and shipping qualities, and is excellently adapted for growing either for early or late crop. From the reports of our customers who have grown this, we have no hesitation in recommending it as a most satisfactory and profitable variety.

NORTHERN-GROWN SPALDING NO. 4 ROSE.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.60; 165-lb. sack (11 pecks), about \$6.25; barrel, net weight 165 lbs., about \$6.50.

Eureka Extra Early Potatoes

A new introduction in potatoes which has given very satisfactory results wherever it has been grown. It is earlier to mature than the Cobbler, and in some sections is reported to yield large crops. They need higher fertilizing, as they set more potatoes to the hill. This, of course, is a decided advantage when large crops and early maturity are desired.

It is also of superior table qualities, is roundish in shape, has white skin, flesh firm, white and of good flavor when cooked. As a first early potato we strongly recommend this new variety to our customers, believing that in a great many sections it will be found earlier and a better cropper than the famous Irish Cobbler.

EUREKA EXTRA EARLY. Per 15 lbs. (peck), 90 cts.; per 10 lbs. (bushel), \$3.00; 165-lb. sack (11 pecks), about \$7.25; barrel, net weight 165 lbs., about \$7.50.

The Eureka Extra Early Potato is as good as I have ever seen. The barrel I bought from you is turning out fine. Am having them dug out to-day.—J. T. THORNTON, Gloucester Co., Va., Aug. 3, 1917.

The Extra Early Eureka Potatoes I got from you did splendid and are the best keepers I have found in years, and are fine for Second Crop, as I have enough of first crop to do me for eating potatoes all winter, which is something unusual for this latitude. I would recommend them for early crop and also for second crop.—W. H. LAMBERSON, Pulaski Co., Ark., October, 1917.

Early Rose.

Early Rose—The Early Rose still continues one of the most popular varieties in our list. It is productive, of most excellent table qualities, and a most satisfactory all-round early variety. The Northern-grown and Maine-grown stocks which we offer are of extra quality and the best of these stocks that can be obtained of this variety.

NORTHERN-GROWN EARLY ROSE. Per 15 lbs. (peck) 75 cts.; per 60 lbs. (bushel), \$2.40; 165-lb. sack (11 pecks), about \$5.75; barrel, net weight 165 lbs., about \$6.00.

HOULTON, or MAINE-GROWN EARLY ROSE. Per 15 lbs. (peck), 90 cts.; per 60 lbs. (bushel), \$3.00; 165-lb. sack (11 pecks), about \$7.00; barrel, net weight 165 lbs., about \$7.25.

I have used your Maine-Grown Potatoes for three years, and like them fine.—GEO. BRISCO, Rutherford Co., N. C., Feb. 23, 1917.

Main Crop or Late Potatoes

Green Mountain

Green Mountain —A large, handsome, oval white potato. Medium late. One of the finest eating potatoes known to the trade. Shallow eyed, fine-textured, well flavored and a most prolific yielder. It is not susceptible to diseases, and is fast becoming the standard white potato for late planting in this country.

GREEN MOUNTAIN.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.60; 165-lb. sack (11 pecks), about \$6.50; barrel, net weight 165 lbs., about \$6.75.

The barrel of Green Mountain Potatoes which I bought from you made a really wonderful crop, especially as to size. No one in our county has seen potatoes of such size, and I believe but few have seen them so universally large in any locality. I believe I should sell them for seed potatoes, and if you would handle them that would do credit to your already established reputation, for I do not believe you can find nicer ones anywhere in the country. They are even nicer potatoes than you sold me.—R. O. MORRIS, Albemarle Co., Va., Nov. 15, 1917.

The Green Mountain Potatoes were planted July 6th, and had a fine stand within a week. They are now looking fine and have the prospects of making a nice crop of late potatoes.—S. T. GADDY, Catawba Co., N.C., August 4, 1917.

Money-Maker —A long, white potato, similar to the old Burbank, but superior to that variety, both in quality and yield. It makes a very attractive potato, either for market or table purposes, and has given entire satisfaction wherever grown.

NORTHERN-GROWN MONEY-MAKER.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.60; 165-lb. sack (11 pecks), about \$6.50; barrel, net weight 165 lbs., about \$6.75.

Peerless —A favorite general crop variety; specially adapted for light and medium soils. It is round in shape. One of the largest yielding kinds in cultivation, but for table qualities is not considered quite as good as some other kinds. Per 15 lbs. (peck), 75 cts.; per 60 lbs. (bushel), \$2.25; 165-lb. sack (11 pecks), about \$5.25; barrel, net weight 165 lbs., about \$5.50.

Hoosier —A new potato which has been grown in this section with very satisfactory results. It is distinctively a late potato, and should not be planted before June or July. It withstands adverse weather conditions to a remarkable extent, and will, under anything like favorable circumstances, make a splendid crop of potatoes for late fall and winter use. It is a good keeper and of good table qualities. Price: Per 15 lbs. (peck), 70 cts.; per 60 lbs. (bushel), \$2.00; 165-lb. sack (11 pecks), about \$4.75; barrel, net weight 165 lbs., about \$5.00.

Rural New Yorker No. 2 —One of the best-yielding late potatoes. Free from blight or rot; color white; form round or oval; smooth skin, shallow eyes, and an excellent market potato.

NORTHERN-GROWN RURAL NEW YORKER.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.25; 165-lb. sack (11 pecks), about \$5.25; barrel, net weight 165 lbs., about \$5.50.

White Peach Blow or **REHOBOTH.**—The skin of the White Peach Blow is whiter in color than the regular Peach Blow, having eyes slightly tinged with pink. It is probably more desirable, from a market and table standpoint, than the regular Peach Blow, but is not considered quite as weather-resistant as our Improved Peach Blow. It is, however, a very desirable cropping market and table potato. Per 15 lbs. (peck), 75 cts.; 60 lbs. (bushel), \$2.25; 165-lb. sack (11 pecks), about \$5.25; barrel, net weight 165 lbs., about \$5.50.

I never made as fine potatoes before in my life as from the Peach Blow Potatoes and all my customers I sold to said the same. I want the same kind again.—L. L. GUPTON, Louisburg, Franklin Co., N. C., July 5, 1916.

Improved Peach Blow —An old favorite for late planting. Color of skin, slightly tinged with pink. Of attractive appearance, and one of the best keepers. Our stock of these potatoes is superior to the old Peach Blow, being rounder in shape and of better quality. The Peach Blow Potato is one of the most dependable late-cropping varieties in our list, standing adverse conditions of drought and heat better than other kinds. Very popular all throughout the South. Per 15 lbs. (peck), 75 cts.; 60 lbs. (bushel), \$2.25; 165-lb. sack (11 pecks), about \$5.00; barrel, net weight 165 lbs., about \$5.25.

Improved Peach Blow Potato.

Carman No. 3 —A splendid second-early variety, of perfect form; grows to a large size, almost every potato being of uniform size and shape. It has but few eyes, and they are very shallow. The skin and flesh are white, no hollow or dark spots, and its cooking qualities are very fine; a remarkably handsome potato and very prolific. In many respects this potato resembles the Rural New Yorker No. 2, but is destined to supersede that well-known popular variety.

MAINE-GROWN CARMAN No. 3.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.50; 165-lb. sack (11 pecks), about \$6.25; barrel, net weight 165 lbs., about \$6.50.

Sir Walter Raleigh —The Sir Walter Raleigh is one of the best potatoes for main crop. It is an immense yielder, of fine quality; produces nearly all large potatoes and practically no small ones; the vines grow strong and upright, and are vigorous and thrifty. It comes in about the same time as the Rural New Yorker; the color of the skin is the same, but flesh is whiter and of better quality. In fact, it is claimed to be the whitest variety and the finest grained potato in cultivation. It was introduced by Mr. Carman, who has introduced several of our best and most popular varieties, and it is claimed to be by long odds the best of his introductions. We recommend it very strongly to our customers for late planting.

NORTHERN-GROWN SIR WALTER RALEIGH.—Per 15 lbs. (peck), 80 cts.; per 60 lbs. (bushel), \$2.50; 165-lb. sack (11 pecks), about \$6.25; barrel, net weight 165 lbs., about \$6.50.

Late Seed Potatoes for June and July Planting

We usually carry in specially arranged cold storage all the leading varieties of Potatoes, so as to be able to ship them in sound, vigorous condition in June and July. To customers who desire to purchase any special quantities of any varieties, we shall take pleasure in quoting prices at which we can reserve Potatoes for them shipping at that time. Our method of keeping Seed Potatoes for late planting has proved very satisfactory, and has caused the late planting of Potatoes to be a very profitable and satisfactory crop in recent years. Our sales have increased very rapidly each succeeding year, and we recommend very strongly to our customers the desirability and advantage of growing late Potatoes from the Seed supplied by us.

Wood's High-Grade Garden Seeds

"POSTPAID" and "BY EXPRESS"

"Postpaid" means that seeds so quoted in whatever quantity wanted, will be delivered postage paid at any post-office in the United States, Alaska, Cuba, Porto Rico, Canada, Mexico, Canal Zone, Panama, Philippine Islands, Hawaiian Islands, Guam, Samoan Islands and the U. S. Postal Agency at Shanghai, China. At postpaid prices we will deliver by express if you prefer; it is safer.

"By Express" means that the purchaser pays the cost of transportation. To points beyond the third zone, it is cheaper to ship by express than by parcel post.

Note that half-pounds can be ordered at pound rates. The Government Food Administration now requires that peas and beans be sold by weight instead of by measure as heretofore. You can order 50 lbs. at the 100-lb. rate.

Our Prices on Bulk Seeds by the pound and bushel are based on the requirements of market gardeners and other large growers, yet, when large quantities are required, we will quote special prices or allow discount when the quantity warrants it.

Wood Quality means a good deal to you. It means that every lot of seeds is thoroughly tested before it goes out and that in turn means satisfaction to both you and us.

ASPARAGUS

Culture. — Asparagus succeeds well in any good rich soil, but a light, warm soil which has been heavily manured for previous crops is best. To grow asparagus roots, soak the seeds in warm water for 24 hours; sow two inches deep in drills two feet apart. When the plants are well up, thin out 2 or 3 inches apart and give frequent and thorough cultivation keeping the plants clean from weeds. The roots can be transplanted, either at one or two years old, either in the fall or spring.

Giant Argenteuil

—A selection from imported French stock. For a number of years it has been grown by the most successful growers near Charleston, S. C., has become thoroughly acclimated, and in earliness, size and productiveness, is pronounced superior to all other kinds. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 70 cts. postpaid.** By express, lb. 60 cts.; 5-lb. lots 55 cts. lb.

See page 49 for description and prices of Asparagus Bunchers, Raffia, and Jute String. ::

Palmetto —A very early and prolific variety, producing an abundance of large, thick, very tender stalks. **Pkt. 5 cts.; oz. 8 cts.; ¼ lb. 20 cts.; lb. 55 cts. postpaid.** By express, lb. 45 cts.; 5-lb. lots, 40 cts. per lb.

Conover's Colossal —A standard variety of large size and splendid quality; very tender. **Pkt. 3 cts.; oz. 7 cts.; ¼ lb. 15 cts.; lb. 50 cts. postpaid.** By express, lb. 40 cts.; in 5-lb. lots, 35 cts. per lb.

ASPARAGUS ROOTS

CULTURE.—Dig or plow out a trench 15 to 18 inches deep, put in plenty of well-rotted manure, covering it with a few inches of soil, then set the roots 1½ to 2 feet apart and cover with 4 inches of soil. In the fall, cut off and burn the top growth, plow or throw down the earth and give a good application of stable manure. Early in the spring fork this in and apply ground animal bone or kainit, and as the asparagus begins to grow, earth up to blanch the stalks as they grow. Do not continue cutting so long, as this exhausts the plants.

FOR FIELD CULTURE the rows may be from 4 to 6 feet apart and the roots set further apart in the rows. A subsoil plow should be used to break the soil as deeply as possible.

CONOVER'S COLOSSAL.—Two-year-old roots. 75 cts. per 100; 500 for \$2.25; \$4.00 per 1,000. By mail, postpaid, \$1.00 per 100.

PALMETTO.—Two-year-old roots. 90 cts. per 100; 500 for \$2.50; \$4.50 per 1,000. By mail postpaid, \$1.25 per 100.

1,000 or more Asparagus Roots—write for special price. Asparagus Bunchers, Asparagus Knives, Raffia, Jute String, etc., see page 49.

ARTICHOKE

CULTURE.—The seed of Green Globe Artichoke can be sown in hot-beds in February and transplanted in May, or can be sown outside in April in rows 15 inches apart and 1 inch deep; thin out to 4 inches, and transplant the following spring 2 feet apart in rows 3 feet apart. Protect in winter with litter or manure.

GREEN or FRENCH GLOBE.—A favorite French vegetable, grown for the undeveloped flower-heads, which are cooked like Asparagus, and make a most tender and excellent vegetable. Can be eaten with butter sauce or French dressing. It is hardy in Virginia and farther South, and should be largely grown for shipping to Northern markets. Like Asparagus, when once planted it lasts for several years. **Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.50.**

JERUSALEM.—Grown from roots or tubers. Their greatest value is for feeding to stock, particularly for hogs, making an enormous yield of healthy and nutritious feed. They make a large growth of tops, which can be used for feed. Sometimes used as a vegetable and for pickling. Plant and cultivate like potatoes. For fuller information, see "Farm Seeds." **Qt. 20 cts. (by mail 30 cts.); peck 65 cts.; bushel \$2.00; in 10-bus. lots and over, \$1.90 per bushel.**

BROCCOLI

Very similar to cauliflower, the points of difference being that it is generally taller and the heads more divided. Broccoli stands greater extremes of temperature than cauliflower and is better adapted for late fall planting. Broccoli can be sown either in the spring or fall the same as cabbage. Give them the same culture as

Early White Cape Broccoli.

required for cauliflower. One ounce seed will produce about 2,000 plants.

EARLY WHITE CAPE.—The best variety. Heads white, compact and hardy; a hardy, vigorous and easily grown sort. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.50 postpaid.**

BRUSSELS SPROUTS

On the stalks are produced small cabbage-like heads that are as great a delicacy as cauliflower, and should be cooked in the same way. Sow in May, transplanting 1 to 1½ feet apart, and cultivate like late cabbage. In the fall break off the leaves to give the heads more room to grow. After being touched by hard frosts the flavor and delicacy are greatly improved. One ounce produces about 2000 plants.

PERFECTION.—A carefully grown strain, very hardy, giving large compact sprouts of good quality. **Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid.** By express, \$2.50 per lb.

Brussels Sprouts.

Bush or Snap Beans

CULTURE.—For the earliest crop, plant just as soon as the weather gets warm—in this section, about the 1st of April. To have a succession, plant every two weeks throughout the summer, until the middle of August, or, farther South, as late as September 20th. Late snaps make a very satisfactory crop and should be more generally grown. For field culture, plant in rows $2\frac{1}{2}$ to 3 feet apart, 3 inches between the beans, covering about 2 inches. In small gardens, the rows may be only 2 feet apart. Cultivate often until they blossom, not afterward, and never when the vines are wet. One pound will plant 60 feet; 100 lbs. will plant an acre.

Longfellow —A remarkably early, round, very prolific bean, bearing pods frequently over 6 inches long, and stringless, except when old. Matures very evenly. Pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.40 postpaid. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.15; 100 lbs. \$20.00.

Bountiful —As early as the Mohawk, very hard; remarkably prolific and bears continuously for several weeks. The pods are broad, long, uniform, solid and meaty; the best of the flat-podded varieties. Pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.40 postpaid. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.15; 100 lbs. \$20.00.

Black Valentine —The hardiest of all beans; will stand more frost than any other sort. On this account particularly recommended for market growers. The pods are long, straight, very handsome, are produced very profusely and present a very attractive appearance on the market. An ideal bean for the earliest market. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.45; 10 lbs. \$2.60 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.30; 10 lbs. \$2.35; 100 lbs. \$22.00.

Refugee, or 1,000 to 1 —One of the best for main crop and late or succession plantings; enormously productive. The snaps are round, tender and of excellent quality. Later than the early kinds, but bears much longer and is more productive. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.55; 10 lbs. \$2.90 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.40; 10 lbs. \$2.65; 100 lbs. \$25.00.

Wood's Earliest Red Valentine —Among green-podded beans there is nothing superior to our strain of Valentine, the true round-podded stock, grown with special reference to productiveness, shape and size of pods, uniformity of ripening and fine quality. Numerous complimentary reports from all sections of the South confirm us in the belief that we have as fine stock of Valentine as can be produced. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.00.

Giant Stringless Green Pod —An exceptionally fine bean for either home use or market; ranks among the earliest, yet in quality and productiveness has no superior. The vines are strong, the pods are long, $5\frac{1}{2}$ to 6 inches, round, very meaty, perfectly stringless and are borne continuously for weeks. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.45; 10 lbs. \$2.60 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.30; 10 lbs. \$2.35; 100 lbs. \$22.00.

Burpee's Stringless Green Pod —One of the most reliable and productive beans in our list. Very early, hardy and vigorous in growth; the pods are round, perfectly stringless, tender and brittle, and of the highest quality. We recommend it to both home and market gardener. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.00.

Extra Early Refugee —Extremely early; very productive; the fleshy round pods ripen well together and stand shipment well. An excellent bean for the early market. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.00.

Early Mohawk or Brown Six Weeks —An old popular and standard extra early variety. Hardy; long, green, flat pods, thick and tender. Pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.40 postpaid. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.15; 100 lbs. \$20.00.

Keeney's Stringless Refugee —A very prolific strain, bearing handsome, broad, nearly round light green pods, 5 to 6 inches long, that are fleshy, tender, brittle and absolutely stringless at all stages of growth. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.10 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.85.

Hodson Green Pod —A wonderful bearer—often 50 to 60 pods to the plant—one grower picked 135 bushels from a planting of 5 quarts. Stringless when young, an excellent shipper, and so vigorous that it withstands adverse weather conditions to a remarkable degree. A splendid main crop bean. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.10 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.85.

Full Measure —A new prolific stringless green pod variety, of excellent quality. Pods long, round, firm and tender, and remain fit for use many days after maturity. A most valuable and promising variety. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.10 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.85.

NAVY BEANS.—See page 69.

SOJA or SOY BEANS and VELVET BEANS.—See Field Seed pages.

BEANS BY WEIGHT

The Government Food Administration now requires that beans and peas be sold by the pound instead of pint, quart, peck and bushel, as formerly. This will be confusing at first, but will be easily understood if you will note the following:

1 lb.—a little more than a pint.	10 lbs.—about 5 quarts.
2 lbs.—slightly over a quart.	15 lbs.—One peck.
5 lbs.—about $2\frac{1}{2}$ quarts.	60 lbs.—One bushel.

Wood's Earliest Red Valentine Bean.

Stringless Green Pod

Longfellow Bean.

Bountiful Bean.

Refugee Bean.

Bush or Snap Beans Yellow or Wax Podded Varieties

1 lb.—a little more than a pint.
2 lbs.—slightly over a quart.
5 lbs.—about 2½ quarts.

10 lbs.—about 5 quarts.
15 lbs.—1 peck.
60 lbs.—1 bushel.

Dwarf Golden Wax —For over thirty years a great favorite for the home garden. The pods are long, semi-round, fleshy, brittle, golden yellow and of first rate quality. The ripe beans make a fine winter shell bean. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.70; 10 lbs. \$3.10 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.55; 10 lbs. \$2.85; 100 lbs. \$26.75.

Keeney's Rustless Golden Wax —A vigorous, wonderfully productive bean of excellent quality. Bears continuously for several weeks if picked as soon as ready. The pods are thick, meaty, entirely stringless and tender. The plants throw out long, pod-bearing tendrils, which appear at first like runners, but it is a true bush bean. We recommend it very strongly for its productiveness and fine quality. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.60; 10 lbs. \$3.00; 100 lbs. \$28.25.

Surecrop Stringless Wax —Resembles Currie's Rust Proof, but even hardier, more rust proof, and absolutely stringless at all stages of growth. The rich yellow pods measure 7 to 7½ inches long, more than half an inch wide and nearly as thick, and are produced in great abundance. Productiveness is one of its strongest points. Very early; the vines are strong and vigorous. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.60; 10 lbs. \$3.00; 100 lbs. \$28.25.

Currie's Rust Proof Wax —As nearly rust-proof as any wax bean can be. The pods are 5½ to 6 inches long, straight, of a beautiful golden color; come early and present a most attractive appearance—all qualities that go to make a first-class shipping bean. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.70; 10 lbs. \$3.10 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.55; 10 lbs. \$2.85; 100 lbs. \$26.75.

Crystal or Cabbage Wax —Where known this bean is very popular, as, being pure white, it makes a fine dry bean for winter. It is also very desirable for pickling. Very productive, bearing quantities of round, thick, fleshy pods, very brittle and of fine quality. **Pkt. 10 cts.; 1b. 65 cts.; 5 lbs. \$2.40; 10 lbs. \$4.50 postpaid.** By express, 1b. 55 cts.; 5 lbs. \$2.25; 10 lbs. \$4.25.

Golden Wax Beans.

Dwarf Black Wax —(German Wax). The reliable old Black Wax, but greatly improved in every respect. The vines are vigorous, hardy and productive; the pods are 4½ to 5 inches long, of a clear creamy white color, fleshy, strictly stringless, fine grained, of the best quality, and remain fresh a long time. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.70; 10 lbs. \$3.10 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.55; 10 lbs. \$2.85; 100 lbs. \$26.75.

Pencil Pod Black Wax —A fine bean for home garden and nearby markets. The pods are long, round and of a uniform color; tender, absolutely stringless and of the very best quality. They come in early, bear profusely and throughout a long season. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.60; 10 lbs. \$3.00; 100 lbs. \$28.25.

Davis Kidney Wax —A valuable bean for the market growers; very early and very productive. Peculiar for its even maturity and its uniformly large, straight, clear yellow, symmetrical and attractive pods. The beans are white and make excellent shell beans for winter use. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.60; 10 lbs. \$3.00; 100 lbs. \$28.25.

Wardwell's Kidney Wax —One of the most popular wax beans for shipping. Yields large crops of long, broad, nearly straight, bright yellow pods that present a handsome appearance on the market. It has proved very profitable with our Southern market growers. **Pkt. 10 cts.; 1b. 60 cts.; 5 lbs. \$1.95; 10 lbs. \$3.60 postpaid.** By express, 1b. 50 cts.; 5 lbs. \$1.80; 10 lbs. \$3.35.

Hodson Wax —A wonderful yielder, the vines being loaded with long, nearly straight, handsome, creamy-white pods. It is extremely vigorous, hardy, enormously productive, and thoroughly reliable. We recommend it particularly for shippers and market growers. **Pkt. 10 cts.; 1b. 50 cts.; 5 lbs. \$1.70; 10 lbs. \$3.10 postpaid.** By express, 1b. 40 cts.; 5 lbs. \$1.55; 10 lbs. \$2.85; 100 lbs. \$26.75.

Dwarf Black Wax Beans.

Pencil Pod Black Wax Beans.

EXTRACTS FROM OUR MAIL

The seeds came up and did fine, all of them. They are all good seeds.—W. F. SHEETS, Mecklenburg Co., N. C.

The seeds were very satisfactory, and we were very much pleased with the results. The Excel watermelons were beyond our expectation, as were also Pimento Peppers and tomatoes. Brimmer Tomatoes cannot be beat for quality and yield.—E. F. CARSON, Volusia Co., Fla.

Your seeds are very satisfactory indeed. The onion I bought of you four weeks ago is up nicely. I heartily recommend Wood's Seeds to every farmer in the South.—B. F. ROGERS, Lincoln Co., N. C.

I have been planting seeds from your firm for fifteen years, and I have had great success from them. I have planted Jackson, Florida Favorite and Alabama Sweets. All are fine melons. The Jackson is the greatest melon grown. I raised a Tom Watson last year that weighed 53 lbs.—W. A. CRAIG, Montgomery Co., Va.

I was much pleased with the seeds I purchased from you last year. All were good and satisfactory. The corn was delicious.—MRS. IDA S. DAVIS, Iredell Co., N. C.

The best garden I ever had came from your seeds.—MISS ROBERTA WEAVER, Pulaski Co., Va.

I raised a fine garden from your seeds last year. Parsnips were as solid and crisp as a new turnip. One specimen measured 6 inches in diameter and 26 inches long. Telephone peas grew 10 feet high, and were full of pods.—J. R. LEWIS, Athens Co., Ohio.

Currie's Rust-Proof Wax Beans.

Pole or Cornfield Beans.

CULTURE.—Pole beans are more sensitive to cold than the bush kinds, and should not be planted before the ground is warm—in this latitude, after May 1st. Set poles 6 to 8 feet long, 3 to 4 feet apart, in 4-foot rows and plant five or six beans 2 inches deep around each pole. They may also be planted in the cornfield and allowed to run up the stalk. One pound will plant 100 hills; 30 pounds to the acre.

Old Homestead, or Kentucky

Wonder —The most popular and most generally grown of all the pole beans. The long pods, often nine or ten inches long, are borne in large clusters from the top to the bottom of the pole. They are nearly round, crisp and tender. If gathered as they mature they continue bearing throughout the season. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.25.

White Kentucky Wonder

—(Burger's Stringless Green Pod). Very early, yet bears for a long season. The pods, 6 to 8 inches long, are borne in clusters, are of a rich dark-green color, very meaty, entirely stringless, tender and of excellent flavor and quality. The pearly white beans make splendid dry beans for winter use. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.00 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75; 100 lbs. \$25.75.

October, or Horticultural

—(Wrenn's Egg or Cranberry). A popular and productive variety for use as snaps or as shell beans. It is especially adapted to mountainous districts, or where the season is short. Pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.50 postpaid. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25; 100 lbs. \$20.75.

Cut Short, or Cornfield

—Very popular throughout the South for planting in corn. Pods fleshy and of good quality. A good and uniform yield and well liked wherever grown. Pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.50 postpaid. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25; 100 lbs. \$20.75.

Virginia Cornfield

—A very early and prolific green-podded pole bean, very popular for growing in corn. The pods grow in clusters, are from 5 to 6 inches long, perfectly round, very fleshy, entirely stringless and of fine quality. The beans are pure white and make a fine dry bean for winter. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.00 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75.

Fat Horse, or White Creaseback

—One of the earliest and at the same time one of the most productive pole beans, bearing round, fleshy pods in large clusters. The seeds are pure white, giving it additional value as a shell-bean for winter use. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$3.00 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75; 100 lbs. \$26.00.

Lazy Wife

—One of the best and most popular green-podded pole beans, either for snaps, shell beans, or dry beans for winter use. The pods (five to seven inches long) are borne in large clusters, long, broad, thick, fleshy and entirely stringless. The flavor is rich and buttery. Pkt. 10 cts.; lb. 55 cts.; 5 lbs. \$1.90; 10 lbs. \$3.50 postpaid. By express, lb. 45 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25; 100 lbs. \$31.00.

Golden Cluster Wax

—Very early and hardy and continues in bearing for a long season. Pods, 6 to 8 inches long, are borne in abundant clusters, are broad, thick and fleshy and remain in condition for a long time; tender and of the best flavor. The dry beans are large and white and make an excellent dry shell bean for winter. Pkt. 10 cts.; lb. 55 cts.; 5 lbs. \$1.90; 10 lbs. \$3.50 postpaid. By express, lb. 45 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25; 100 lbs. \$31.00.

Scarlet Runners

—Useful both a vegetable and for ornamental purposes, producing sprays of bright scarlet flowers. They are used like the lima bean in sections where the summers are short. Pkt. 10 cts.; lb. 55 cts.; 5 lbs. \$1.80 postpaid. By express, lb. 45 cts.; 5 lbs. \$1.65.

Pole or Cornfield Beans

Bush Lima Beans

CULTURE.—Lima beans are not as hardy as snap beans and should not be planted before the ground is warm and frost is over. Plant bush limas in 3-foot rows, dropping 3 beans 15 inches apart in the row. For the tall varieties, set 6 to 8-foot poles firmly in the center of the hills 3 feet apart in 4 foot rows before the seeds are planted. Cover the beans 1½ inches deep. One pound of Ford's, Burpee's, Carpinteria, Fordhook and Large Limas will plant 60 hills; 60 pounds to the acre. One pound of the smaller seeded varieties will plant 100 hills; 30 pounds to the acre.

Wood's Prolific Bush Lima — Since we introduced this fine bean several years ago, it has so rapidly grown to popular favor that our sales far exceed all other bush lima varieties. It is a distinct and valuable improvement over the original bush lima, makes a larger growth—so much so, that at first it seems as if it would put out runners. It is, however, of the true bush form. It is a larger yielder than other bush limas, being practically loaded down with pods, which are borne from early in the season continuously till frost. Also valuable as a shell bean for winter use. We do not hesitate to recommend it as in every way the best and most prolific of all the bush lima varieties. We are giving especial attention to the selection and growing of this bean, our seed stocks being carefully rogued so as to

secure the true bush form and at the same time special selections are made from plants which show largest yields. Our present stock is superior both in uniformity of growth and yield of beans to what it was when originally introduced. Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.60; 10 lbs. \$2.90 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.45; 10 lbs. \$2.75; 100 lbs. \$25.00.

Henderson's Bush Lima

—The original bush lima bean. Valuable for its extreme earliness, yet it continues to grow and set pods right up to frost. Of the true bush type, growing 18 to 20 inches high; very productive and a sure cropper. Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.50.

Wood's Prolific Bush Lima Beans.

Bush Lima Beans

Fordhook Bush Lima

—The dwarf form of the popular "potato lima" and a very decided improvement in large bush limas. The beans are of the large lima type, but are thicker, rounder and of superior flavor. The bush is of stiff, erect habit, holding the beans well off the ground, so that the pods do not become discolored or injured from being beaten to the ground by the wind or rain. Very prolific, the pods each containing four or five large, fat beans lying so closely together that they are flattened on the ends. The pods are so closely packed that they are very easily shelled. The green beans, even when full size, are tender, juicy and sweet. **Pkt. 10 cts.; lb. 60 cts.; 5 lbs. \$1.95; 10 lbs. \$3.60 postpaid. By express, lb. 50 cts.; 5 lbs. \$1.80; 10 lbs. \$3.35; 100 lbs. \$31.50.**

Burpee's Bush Lima

—The bush type of the well-known, large white pole lima and of equally good quality. The plants are uniformly dwarf and erect, branch vigorously, and is an immense yielder. The pods are well filled with very large beans identical in size and luscious flavor with the large white pole lima. **Pkt. 10 cts.; lb. 55 cts.; 5 lbs. \$1.80; 10 lbs. \$3.35 postpaid. By express, lb. 45 cts.; 5 lbs. \$1.65; 10 lbs. \$3.10.**

Fordhook Bush Lima Beans.

Pole Lima Beans

Small Lima, or Butter Beans —(Sieva or Carolina).—Earlier, harder and more prolific than the large lima kinds. For years the popular "butter bean" of the South, and more generally grown in that section than any other variety. **Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.55; 10 lbs. \$2.90 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.40; 10 lbs. \$2.65; 100 lbs. \$25.00.**

Wood's Improved Pole Lima —(Butter Bean).—This improved variety is of the same type as the small lima, but the beans are larger, and it is earlier than any of the other pole sorts. It is also remarkably prolific, a continuous bearer, easy to shell, and a money-maker for the market gardener. The pods are produced in clusters, and it is no uncommon thing to find clusters of pods ready to pull at one time. We strongly recommend it as a distinct and valuable improvement in pole lima beans. **Pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25 postpaid. By express, lb. 40 cts.; 5 lbs. \$1.60; 10 lbs. \$3.00.**

Ford's Mammoth Podded Pole Lima —A strong grower and uniformly large podded. It is one of the largest yielders among the pole limas, as well as one of the best flavored. The pods are unusually large, each containing 5 to 7 beans of the finest quality. The vines are vigorous, setting the pods early at the foot of the pole and continue bearing till frost. **Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.75 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.50; 100 lbs. \$23.00.**

Large White Pole Lima The old reliable and well-known variety. A favorite for both home and market. Pods and beans large, of superior quality.

Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.45; 10 lbs. \$2.60 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.30; 10 lbs. \$2.35; 100 lbs. \$22.00.

Ideal Pole Lima —Bears pods 7 to 8 inches long, borne in large clusters, and containing 4 to 6 big, fat butter beans of the finest lima flavor. The superb quality, tenderness and rich flavor with its unusual size and great productiveness render the Ideal the peer of any lima bean grown for use either green or dried. **Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.55; 10 lbs. \$2.85 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.40; 10 lbs. \$2.60; 100 lbs. \$24.00.**

Carpinteria Large Pole Lima —Has been called "The most perfect pole lima bean." A new variety that in productiveness excels all other pole lima varieties. The vine is strong, producing a great abundance of fine, large pods, closely filled with beans of the largest size, and much thicker and plumper than is usually found in pole limas. The color of the bean is distinctive, having a decided greenish tint, an indication of the finest quality. The beans are thin-skinned, extremely tender and of exceptionally fine flavor. No home garden should be without this remarkably fine lima, especially if you want the best type for canning. **Pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.55; 10 lbs. \$2.90 postpaid. By express, lb. 35 cts.; 5 lbs. \$1.40; 10 lbs. \$2.65; 100 lbs. \$25.00.**

Carpinteria Pole Lima Beans.

Ford's Mammoth Podded Pole Lima.

FROM OUR MAIL

I am pleased to inform you that I had splendid results this year in my garden by using your seeds.—J. E. HERNDON, Pittsylvania Co., Va.

Well pleased with your seeds, especially the Bush Limas.—S. W. CLARK, Northumberland Co., Virginia.

Your Wood's Prolific Bush Lima Beans made a fine crop. Only wish I had planted more of them. In fact, all the seeds I get from you I have better success with than others.—W. J. ADAMS, Madison Co., Ala.

For years mother has used your seeds. We think there are none better.—MISS GERTRUDE SEBRELL, Southampton Co., Va.

Order of several weeks ago received in perfect condition. Was highly pleased with the seeds sent, and wish to comment on the neat packages, also the Fordhook Bush Lima Beans. They are the most satisfactory bush beans I have ever bought, something I have been looking for for the past five years.—FRANK T. ROBERTS, Adams Co., Penn.

We think your Prolific Bush Lima Bean is a wonderful bean. We have planted other bush lima beans that were not satisfactory, but your Wood's Prolific Bush Lima that we bought last spring were simply wonderful. We had green beans until frost, and we will plant no other bush lima next spring.—C. C. HAMLET, Chatham Co., N. C.

Garden Beets

CULTURE.—For earliest use, sow in hotbeds and transplant, cutting off the outer leaves when setting out. For early outdoor crop, sow as soon as the ground can be worked, the main sowing in March or early April; successive plantings may be made till the end of July. Winter beets and mangels should be sown in April, May or June, soaking the seed before sowing. Beets thrive best in light loose, fresh, clean, deeply-worked soil that has been well manured for the previous crop; smooth roots cannot be grown if fresh manure is used. For field culture, sow in drills 2 to 2½ feet apart, and cover about one inch. Thin out to 4 inches apart. One ounce will sow 50 feet of drill; six to eight pounds one acre. For a small garden, the rows need not be more than 15 inches apart. Beets can also be sown in June and July for use during the fall and early winter.

Crosby's Improved Egyptian

—More largely planted for early market than any other kind, and has proved a most profitable and satisfactory crop, particularly with our truckers and large shippers. Of very handsome form, good size, small tops and small tap-root, and above all, of very quick growth. The shape is very desirable, being not quite so flat as the ordinary Egyptian, nor quite as round as Eclipse. It takes on its turnip shape even in very early stages of its growth, a decided advantage for forcing and early cropping. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid.** By express, \$1.75 per lb.; 5 lbs. and over, \$1.65 per lb.

Crosby's Improved Egyptian Beet.

Wood's Crimson Globe

—If asked to name the ideal beet for the home garden we would unhesitatingly name Crimson Globe. That it has made many fast friends is proved by the fact that fully three-fourths of our general orders call for Crimson Globe in varying quantities. The shape is nearly a perfect globe about 10 inches around with smooth skin free from rootlets; the flesh is a rich blood red, nicely ringed, never stringy, and always tender and sweet. Whether you grow for home use or market you will like our Crimson Globe. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid.** By express, \$1.75 per lb.; 5 lbs. and over, \$1.65 per lb.

Wood's Crimson Globe.

Extra Early Eclipse

—An especially desirable, very early beet, making handsome, smooth, round roots with small top and small tap-root and nearly as early as the Egyptian. Color bright red; flesh fine grained, sweet and tender. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

Extra Early Eclipse

Extra Early Bassano (Sugar Beet).

—Very early, sweet and tender. The roots are large, light red with pink flesh. The tops are adapted for use as greens. **Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

Bastian's Early Blood Turnip

—One of the largest beets, yet of quick growth and of high table value. Color bright red. Fine for home garden and market. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.

Edmand's Blood Turnip

Although quite early, the Edmands is generally grown for main crop and for putting away for winter use, for which purpose it is particularly good. The beets are nearly round, smooth and excellent keepers. Skin and flesh deep red; crisp and sweet. We can recommend Edmands for quality. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.

Long Smooth Blood

—Recommended for late sowing to make a crop to put away for winter. A fine keeper, remaining tender and sweet till spring. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.**

By express, \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

Detroit Dark Red

—Here is a beet you will like, whether you grow for home use or market. Almost globe shaped with small tops and tap-root, very smooth and of dark blood-red color. The quality is fine, and for canning purposes it has no superior. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.; 5 lbs. and over, \$1.90 per lb.

Improved Early Blood Turnip

Improved Early Blood Turnip

—If you are in doubt about what beet to plant you will not go wrong in planting Improved Early Blood Turnip. The consistent, steady demand shows that it has given unvarying satisfaction and has the endorsement of a large majority of our customers. Not as early as Extra Early Egyptian, but superior in quality. Of uniform size with smooth skin free from fibrous roots; color rich dark red; tender, sweet and crisp. Makes an ideal beet for planting in May, June and July to make beets for storing for winter. A fine keeper. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

Extra Early Egyptian

—Fine for forcing and first early outdoor crop; about ten days earlier than the Early Blood Turnip. Makes fine, smooth, almost flat, very dark-red beets, firm, crisp and tender. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

MANGEL WURZEL or STOCK BEET

For winter feeding to cattle, hogs and sheep. It is claimed that when fed in combination with grain they are worth, pound for pound, almost as much as the grain. They aid digestion and assimilation, keep the animals in healthy condition, and with milk cows greatly increase the milk flow. The immense yield per acre and the very little expense and labor necessary to make the crop should induce every farmer to plant them liberally. On page 69 you will find described the best varieties in cultivation. Select the variety best suited to your soil, and we are sure you will not be disappointed with the result.

Extra Early Egyptian.

Swiss Chard

or SPINACH BEET.—The stalks when cooked and served like Asparagus make a most delicious salad. The leaves should be prepared like spinach, kale or turnip salad. Sown early in the spring, it yields salad all summer. Grow a row and you will not be without it hereafter. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.

Edmand's Blood Turnip.

CARROTS

CULTURE.—Sow in a light, rich, deeply-worked soil as early as you can work the ground, in drills 12 inches apart and $\frac{1}{2}$ inch deep. For field culture, make the drills 18 to 24 inches apart, thin out to 3 to 4 inches apart; sowings should also be made up to August for a late crop to store for winter. In dry weather soak the seeds before sowing. To store for winter, pack in moderately dry earth or sand in the cellar or put them outside in a well-drained situation, covering with a few inches of straw and 6 to 8 inches of earth to protect from frost. One ounce will sow 100 feet of drill; 3 to 4 lbs. to the acre.

Insect Remedy.—If the parsley or carrot worm attacks the foliage, apply Slug Shot while the dew is on.

Oxheart, or Guerande —One of the heaviest yielders and the best for stiff and heavy soils where the long varieties would fail. Often 3 to 3½ inches thick at the top; nearly oval in shape; the flesh is bright orange, fine grained and sweet. Of the finest table quality, and equally good for stock. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid.** By express, \$1.75 per lb.

Half Long Danvers —One of the most productive, and suits all kinds of soils. The roots are smooth and handsome, deep orange color, medium length tapering to a blunt point. The flesh is sweet, crisp and tender. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.

Half Long Scarlet Stump Rooted

—Early, without core, smooth skin, bright orange-colored flesh; 5 to 6 inches long; easily pulled, and well adapted to shallow soils. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid.** By express, \$1.75 per lb.; 5 lbs. and over, \$1.70 per lb.

STOCK FEEDING CARROTS

Carrots make a healthy and desirable food for horses, and every horse owner should plant them liberally, so as to give his horse an occasional feed of carrots through the winter. They are also very desirable for feeding to hogs and cattle and make a tonic and alternative food which is of decided benefit. Plant in March, April or May—the earlier the better—in rows 2½ to 3 feet apart, at the rate of 3 to 4 lbs. per acre. Cultivate same as for Mangel beet.

Improved White

Belgian —A big yielder averaging one foot or more in length, but is easily pulled, as about a third of its length grows above ground. Holds its size well throughout its length, tapering gradually at base. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.; 5-lb. lots 95 cts. per lb.

Large Yellow Belgian

—A good keeper and large yielder. Makes long roots, yellow flesh and yellow skin except about one-third which grows above ground. Easily pulled and makes a most excellent stock food. **Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.; 5-lb. lots, \$1.20 lb.

FOR STOCK FEEDING, in addition to stock carrots, be sure to plant a liberal acreage in Mangel Wurzel or Stock Beets. There is nothing that can take the place of Belgian carrots and stock beets for feeding horses, cattle, sheep and hogs.

Early Scarlet Horn Carrot.

Early Scarlet Horn —The earliest variety in our list. Blunt-pointed, about 3 inches long, 1½ inches thick, very fine grained, sweet flavored; deep rich orange color. Excellent table carrot and fine for bunching. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.

Chantenay or Model One of the best carrots for all purposes. Medium early, about 6 inches long, blunt ended, smooth, fine grained, sweet and sugary. An excellent table carrot and a heavy yielder. There is no better for the home garden. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.; 5 lbs. and over, \$1.90 per lb.

Improved Long Orange

—Especially fine on light soils, making long, smooth, tapering roots of a deep orange color, free from side roots and superior in every respect. A fine winter sort for table, market and stock. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.75 postpaid.** By express, \$1.65 per lb.; 5 lbs. and over, \$1.60 per lb.

Wood's Scarlet Intermediate

—A fine and handsome carrot, in form midway between the Long Orange and Early Scarlet Horn. The roots are smooth and handsome, deep orange color, medium length, tapering to a blunt point. The flesh is sweet, crisp and tender. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid.** By express, \$2.00 per lb.; 5 lbs. and over, \$1.90 per lb.

Improved Long Orange Carrot.

Half Long Danvers Carrot.

Half Long Scarlet Stump-Rooted Carrot.

Wood's High Grade Cabbage

CULTURE.—For the earliest setting in the spring, set out in February or March plants which have been wintered over, either in cold frames or out of doors. For a succession sow the early varieties in hot-bed or cold-frame in January, February or early March. Later sow the early varieties out of doors in March or April. For winter cabbage sow in April, May or June, transplanting in July or August, to head up during the late fall and winter. Fall sowings, to make plants for setting out in the fall or early spring, should be made after September 20th; if sown earlier they will likely shoot to seed, especially the flatheaded kinds. Early varieties should be set 18 inches apart in 2½ to 3 foot rows; late varieties, being larger, should be set 2 feet apart in 3 foot rows. One ounce will produce about 2,000 plants; six ounces will make plants for an acre. Use good rich soil, plenty of manure and fertilizer; work frequently and deeply. Plant late crop in May.

Insect Remedies.—For flea-beetle in the seed-bed, apply Slug Shot while the dew is on. For the green cabbage worm apply Slug Shot, or mix one ounce of Paris green to six pounds of flour or land plaster, and apply after a rain or when the dew is on the plants. For the terrapin or spotted cabbage bug, hand-picking is the only remedy. Mustard plants in the rows will draw the bugs from the cabbage, and the mustard can be pulled up and burned and the bugs destroyed.

Wood's
Selected
Early
Jersey
Wakefield
Cabbage.

Wood's Selected Early Jersey Wakefield

Realizing the unusual importance of this universally grown variety our efforts have been unremitting to produce as thoroughbred a strain as it is possible to grow. Sureness to head and regularity in growth have placed our Wakefield at the top in popularity with our Southern growers. We have no fear of praising it too highly—it is indeed a thoroughbred strain. Makes a compact, solid head, with few outside leaves, permitting of close planting. Very hardy, resisting cold and unfavorable conditions, thus insuring the greatest likelihood of profitable and satisfactory results. Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.60 postpaid. By express, lb. \$4.50.

The Early Jersey Wakefield Cabbage I bought from you last year was all O.K. They proved satisfactory from start to finish.—IRA M. PERRY, Nash Co., N. C.

I have used Wood's Selected Early Jersey Wakefield and Wood's Charleston Wakefield Cabbage seeds for several years, and they have always given satisfaction. In my opinion, there are fewer to run to seed than any other cabbage I have ever used.—H. S. THOMAS, Northampton Co., Va.

Wood's Extra Early

The Earliest of
All Cabbages

The earliest cabbage in cultivation and in every way one of the most desirable extra early varieties. Larger than the Wakefield; not quite as solid, but fully a week earlier. The quality is good, has few loose leaves, and nearly every plant forms a head. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75.

Early Winnigstadt

One of the best medium early pointed cabbages, very hearty and heading. Heads of good size, very hard and of excellent quality. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.85 postpaid. By express, \$3.75 per lb.

Wood's Charleston Wakefield

All that we say about the purity and excellence of our Jersey Wakefield is equally true of our Charleston Wakefield—it is as pure and true a strain as careful selection can make it. It is a few days later than the Jersey Wakefield, but larger and more solid. Exceedingly hardy, and on account of its earliness and size, is deservedly popular, not only with large market growers, but with private gardeners. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.50; lb. \$5.00 postpaid.

Eureka Extra Early

As early as the Wakefield; heads of good size, with few outside leaves; very uniform in growth and remarkably solid for so early a cabbage. We recommend it for extensive cultivation. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.85 postpaid. By express, \$3.75 per lb.

Copenhagen Market Cabbage.

Copenhagen Market

A round-headed cabbage as early as Wakefield! A strong statement but proved true by seven years' test. Its chief features, besides earliness, are remarkable size, averaging ten pounds; compactness, its light green leaves are tightly folded, allowing close planting; even maturity, the field can be cleared at a single cutting. Fine grained, tender, hearts pure white and of exceptionally good quality. Our stock was grown by the originator in Denmark and imported direct. Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.60 postpaid. By express, \$4.50 per lb.

**Henderson's
Early Summer**

—Although introduced a number of years ago, it still holds its place as an ideal second early cabbage. Forms large, flat, round, solid heads weighing usually 8 to 10 pounds, and is a very sure and reliable header. Comes in about 10 days after Early Jersey Wakefield, but it is larger. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.

Henderson's Early Summer.

All Head Early.

a more spreading habit. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

Early Flat Dutch

—For a second early to follow Jersey Wakefield this is in every way satisfactory for it is one of the most reliable medium-early varieties. A sure header, makes large, flat, solid heads that in point of quality is the equal of any. Has comparatively few outside leaves. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.; 5-lb. lots and over, \$3.40 per lb.

Early Flat Dutch.

Early Drumhead.

Early Drumhead

—Very popular throughout the South and well deserves its popularity, for it makes a most excellent, sure-heading second early cabbage of as fine quality as anyone could wish. The heads are large, flattened on top, solid, crisp and tender. Especially adapted for the home garden. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.; 5-lb. lots and over, \$3.40 per lb.

**Henderson's
Succession**

—A splendid sort whether grown for medium early, mid-summer or the late crop, and keeps well for winter use. A little later than the Early Summer, but much larger. Heads deep and solid, of handsome color and of the finest quality. The heads become solid before they are fully matured. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, lb. \$4.00.

Henderson's Succession.

All Seasons

All Seasons —One of the very

best, either for early or late planting. Heads very large and round, often nearly spherical, but usually somewhat flattened. Very solid, and of the best quality, keeping as well as the winter sorts. The plant is very vigorous and sureheading. Remarkable for its ability to withstand hot sun and dry weather. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

I want to advise all gardeners to try All Seasons Cabbage. I have raised the finest cabbage in the community, and hope many may investigate this wonderful cabbage.—EVA BEARD, Campbell Co., Va.

Surehead

—As its name indicates, this is a sure header and one of the most reliable main crop and late cabbages. Heads are large, thick, somewhat flattened, very uniform in size and color, firm and solid, keeps well and makes a splendid shipper. Heads ordinarily weigh 10 to 12 pounds each, and of the finest quality. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.65 postpaid.** By express, \$3.75 per lb.

Surehead.

Solid South.

Solid South

—A magnificent cabbage, in which we take special pride and which we cannot recommend too highly. Resembles the Early Summer, but is earlier, larger, more uniform, has fewer outside leaves, and is less liable to run to seed when sown in the fall. Does well both for early and late crop, and equally well adapted for the family garden and market. You will be well pleased with Solid South. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

Wood's Prize Head
Late Flat Dutch.

Wood's Prize Head Late Flat Dutch

This is beyond question the finest strain of Late Flat Dutch to be had anywhere and at any price. We have taken great pains in selecting and breeding up our stock to maintain a high standard. It is a thoroughbred, and will meet every demand for a first-class hard-heading, long-keeping cabbage. No better late cabbage was ever offered to our Southern growers, nor one that would make more uniformly large satisfactory profits. Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.15; lb. \$4.10 postpaid. By express, \$4.00 per lb.; 5 lbs. and over, \$3.85 per lb.

Large Late Flat Dutch —A good strain of this popular winter cabbage. Makes good, large, solid, flat heads that keep well into the winter. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 90 cts.; lb. \$3.35 postpaid. By express, \$3.25 per lb.

Danish
Ballhead

Danish Ballhead

or **HOLLANDER**. —The heaviest cabbage for its size we have ever grown; exceedingly solid and hard; handsome, very hardy, a sure header, a good seller and one of the finest of keepers, making it particularly desirable for shipping long distances. Our stock is grown by the most careful and experienced grower in Denmark, where the finest Ballhead Cabbage in the world is grown, and is imported direct. Pkt. 10 cts.; oz. 40

cts.; ¼ lb. \$1.25; lb. \$4.85 postpaid. By express, \$4.75 per lb.; 5-lb. lots, \$4.65 per lb.

Perfection Drumhead Savoy

—Should be grown in every garden. No other fall and winter cabbage can compare with it in flavor, particularly after it has been touched by frost when it is equal to cauliflower. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

Red Mammoth

—The largest and surest heading red cabbage and the best for pickling. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

Perfection
Drumhead
Savoy.

Large Late Drumhead

A favorite winter cabbage; recommended for its fine, large, deep, heavy and solid, long-keeping heads. It has few outside leaves. They can be kept in good condition till late in the spring. We recommend it for the home garden. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 90 cts.; lb. \$3.35 postpaid. By express, \$3.25 per lb.

Autumn King

or **WORLD BEATER**. —A very fine strain, making extra large, solid heads, often weighing 20 to 30 lbs. each. It is classed among the best winter kinds; an excellent keeper; crisp, close, fine grained and white. Pkt. 5c; oz. 30c; ¼ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

North Carolina Buncombe —Preferred in some sections to all other winter sorts. The heads are large, firm and solid; remarkably sure and uniform header, a good shipper, and keeps well. A splendid cabbage for the private garden. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

Cabbage Plants —Early varieties, Wakefield, Early Flat Dutch and Early Summer, January till June. 40 cts. per 100, postpaid. By express, 30 cts. per 100; \$2.50 per 1000.

Late varieties, Late Flat Dutch and Late Drumhead, ready from June till October. 35 cts. per 100, postpaid. By express, 25 cts. per 100; \$2.00 per 1000.

The Wood's Prize Head Late Flat Dutch Cabbage seed I bought of you were the best I have ever seen. I think every seed came up and made the best stand of cabbage I have ever raised. I have had several disappointments with cabbage, but I will depend on Wood's seeds in the future. —A. L. FORD, Henrico Co., Va.

Chinese
Petsai.

Chinese Petsai or Celery Cabbage

A wonderful salad plant growing 15 or 16 inches high, somewhat resembling cos lettuce or probably more like swiss chard. It yields an unusual amount of most excellent salad. Cut up like cabbage and served with mayonnaise or French dressing it makes a splendid cole-slaw. Can be boiled like cabbage if cooked quickly and served with cream sauce, but is without the strong flavor and odor of cabbage. The hearts blanch to a crystalline white; whiter than lettuce and more beautiful than cabbage—every leaf, including the outside ones, is delicate and tender.

Petsai should be of special interest to poultrymen; it is an economical and prolific green food. It is easy to grow, but should be grown in a cool season, as it runs to seed in hot and dry weather. Sow early in the spring and again in July and August, transplanting 18 inches apart in 2½ foot rows. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 85 cts.; lb. \$3.10 postpaid. By express, \$3.00 per lb.

Cauliflower

We supply half ounces Cauliflower seed at the ounce rate.

CULTURE.—Cauliflower requires the same treatment and cultivation as cabbage and can be grown both early and late. Not as hardy as cabbage in resistance to either hot and dry or cold weather. They should have an abundance of water in the summer and protection during cold weather.

For early crop sow in hot-bed in January or February and transplant when proper size and when freezing weather is past. For late crop, sow in May or June and treat exactly like late cabbage. Set out the plants 15 to 18 inches apart in 3-foot rows. The soil in the seed-bed should not be richer than that to which they are transplanted. When the heads are about two inches across, tie up the outer leaves to blanch the heads and protect them from the sun and weather; this prevents them becoming

bitter and discolored. This may also be done by breaking the ribs of inside leaves and allowing them to cover the heads.

Be sure to transplant to a rich, well-fertilized moist soil or give plenty of water, good and frequent cultivation and cut when the head is hard and compact, as when the heads open the quality is impaired.

Insect Remedies.—The same insects attack both cauliflower and cabbage and the same remedies should be applied.

Wood's Earliest Snowball Cauliflower.

Our Snowball is absolutely the best strain we know of. It is the kind that has given many large Florida growers such excellent results.

Wood's Earliest Snowball —There is no better cauliflower strain is as fine as can be had at any price. It is not only the earliest to head, but a remarkably sure header, making large, solid, perfect, pure white heads of the finest quality. We recommend it also for the late summer and fall crop. As well adapted for forcing as for growing out of doors. **Pkt. 20 cts.; ¼ oz. 75 cts.; oz. \$2.50; ¼ lb. \$9.00.**

Extra Early Dwarf Erfurt —A first-class cauliflower, ranking next to our Snowball. Produces large, white, close, firm heads of fine quality. It is extra early and a sure header. **Pkt. 10 cts.; ¼ oz. 50 cts.; oz. \$1.75; ¼ lb. \$6.00; lb. \$22.00.**

Veitch's Autumn Giant —A valuable late variety, admirably adapted for growing in the fall. The heads are large and white and remain long fit for use. Plant in May and grow like late cabbage, but grow them on good land and do not let them suffer for water. **Pkt. 5 cts.; oz. 50 cts.; ¼ lb. \$1.50; lb. \$5.00 postpaid.**

CAULIFLOWER PLANTS.—Ready January, February, March, July and August. 85 cts. per 100 postpaid. By express, 75 cts. per 100; \$6.00 per 1,000.

Water Cress.

CRESS

WATER CRESS.—Sow in the spring along the edges of creeks or ponds. Only one sowing is necessary, as it increases rapidly. May also be sown in seed bed in a damp location, and the young plants transplanted to edges of streams or ponds. It not only makes a desirable and attractive plant, but purifies the water. Is developing into quite a profitable industry for shipment to our larger markets. **Pkt. 5 cts.; oz. 25 cts.; ¼ lb. \$1.25; lb. \$1.00 postpaid.** By express, \$1.50 per lb.

CURLED CRESS.—Can be sown either in the spring or fall. The plants are cut and tied in bunches in the same manner as water cress. Sow in drills one foot apart. One ounce will sow about 200 feet of drill. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.

North Carolina Short Stem Collard.

Collards

One of the most popular Southern vegetables; largely used in place of cabbage. It is hardier and easier to grow than cabbage, can be grown on poorer soil and withstands insect attacks better. Although often sown during the spring and summer, the principal sowings are made in June, July and August, transplanted a foot apart in the row and given frequent cultivation. They make a most excellent vegetable for the late fall, winter and early spring. The flavor is improved by frost. Cultivate like late cabbage.

NORTH CAROLINA SHORT STEM.—A decided improvement, and has proved very popular wherever grown. Has short stem, large spreading leaves, very hardy, withstanding drought in summer and cold in winter. Its flavor and cooking qualities are the very best. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.

IMPROVED GEORGIA WHITE, or CABBAGE COLLARD.—Called cabbage-collard because of its close bunching habit and general resemblance to a cabbage. Extremely hardy and grows on the poorest soils. As white and crisp as a cabbage. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid.** By express, \$1.40 per lb.

TRUE GEORGIA or SOUTHERN.—The well-known and popular collard that has been grown for generations in the South. **Pkt. 3 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

CORN SALAD or FETTICUS

A most desirable salad. Can be used like lettuce or cooked like spinach. August and September are the best months to sow for use during the fall, and fall seedlings give best results. Sow in shallow drills, about one foot apart. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.

Celery

CULTURE.—Sow in February, March or beginning of April, in drills 8 to 10 inches apart, in a bed of fine, rich soil, barely covering the seeds. If the soil is dry, press the earth after covering, and keep clear of weeds, or the young plants will be smothered. When four inches high cut off the tops to make the plants stocky. Transplant from July to October. August and September settings succeed excellently and require less labor than if set out earlier. To prepare a bed, throw out the earth to a depth of 6 inches, 4 or 5 inches wide, and put in 3 or 4 inches of well-rotted manure, dig in well, and cover with fine soil. Set the plants 6 to 8 inches apart, press the soil firmly, and earth up 2 or 3 inches when the plants are large enough, but do not let the earth get into the heart of the plant. When severe weather comes on, cover gradually with leaves, hay or straw, and place boards on top; waterproof felt paper is also used. In such a bed the stalks will blanch perfectly, and may be taken out when wanted. In field culture, plants are set 6 inches apart in 4-ft. rows. Celery requires frequent cultivation, and the earth drawn up to the plants as rapidly as they grow. To keep for winter, take up the plants with roots and pack closely, standing upright, on wet soil in a dark cellar. Celeriac, or Turnip-Rooted Celery, needs no earthing up, and may be planted in rows 18 inches apart. Celery seeds germinate slowly; soak for 24 to 36 hours before planting; cover very lightly and keep constantly moist.

Winter Celeries Of a firmer texture, more compact and solid than the self-blanching kinds, and consequently are better keepers. The varieties described below are not surpassed by any winter celery.

Giant Pascal In the South this is more generally grown than any other late celery. For fall and early winter it is certainly one of the best. Makes large, thick, solid stalks, with a beautiful creamy-yellow heart; blanches easily and quickly; very crisp and of a fine nutty flavor. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

Golden Heart —A thoroughly reliable half-dwarf celery. Make a solid stalk of fine, nutty flavor and free from stringiness. Later than the self-blanching varieties, but keep better. When blanched the hearts are creamy yellow; solid, crisp and of a superb nutty flavor. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, \$2.00 per lb.

Winter Queen —One of the most desirable of winter celeries of robust growth, requiring but little labor in earthing up for blanching, and makes heavy, broad and solid heart stalks, which blanch creamy white and tender. Hardy and a splendid keeper. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, \$2.00 per lb.

SEASONING CELERY.—Pkt. 5 cts.; ¼ lb. 20 cts.; lb. 50 cts. postpaid. By express, 40 cts. per lb.

Celery Plants —Giant Pascal, Golden Heart, Winter Queen and White Plume. Ready June, July and August. By mail postpaid, 50 cts. per 100. By express, 25 cts. per 100; \$3.00 per 1000; 3000 and over, \$2.75 per 1000. We will quote special prices on lots of five to ten thousand plants.

Celeriac, or Turnip Rooted Celery

Grown exclusively for its roots, which, when cooked, sliced and used with vinegar, make a fine salad.

GIANT SMOOTH PRAGUE.—The best variety; large and smooth roots; an excellent keeper. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid. By express, \$2.50 per lb.

I have some celery grown from your plants that is as fine as Michigan celery.—F. K. RICH, Ashe Co., North Carolina.

I made an excellent crop of cauliflower from the Wood's Earliest Snowball seed. I consider them O. K.—S. PRESSLEY COKER, Darlington So., S. C.

The Klondikes are fine cucumbers. They germinate well and bear fine. I think there are no better.—C. H. ROSS, Harnett Co., N. C.

The Delicious Cream Corn was wonderful. I'll never use any other.—MRS. W. F. RUFF, Fairfield Co., S. C.

Giant Pascal.

Self-Blanching Celeries

Grow quickly, blanch easily, and are especially adapted for fall and early winter use.

The ease with which they are grown should give them a place in every home garden. Plant the self-blanching kinds for earliest use, and the winter varieties for general use later in the season.

Improved White Plume

—A magnificent celery for early use, and being self-blanching requires but little working; naturally turns white upon reaching maturity. In succulence, it is all that can be desired. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid. By express, per lb. \$2.50.

Golden Self Blanching

—FRENCH GROWN.—Our stock is grown expressly for us by the originator in France and imported direct. It must not be confused with cheap American-grown seeds, which we do not handle at any price. Our strain makes beautiful, stocky, heavy, perfectly solid stalks 18 to 20 inches high, of the most delicate flavor and good keeping quality. Nearly as early as White Plume; heart large, solid, crisp and brittle; excels all others in tenderness and nutty flavor. Crop very short. Pkt. 10 cts.; oz. 85 cts.; ¼ lb. \$2.75; lb. \$10.00 postpaid.

Golden Heart.

Winter Queen.

Golden Self-Blanching.

Improved White Plume.

CUCUMBER

CULTURE.—To have the earliest cucumbers, start in pots, small paper boxes, berry boxes or on pieces of sod, grass side down, so that they can be readily transplanted without checking the growth. For the general crop plant in the open ground as soon as the weather becomes settled warm, about the end of April or during May, not over an inch deep, in hills about four feet apart each way. The hills should be previously prepared by mixing well-rotted manure with the soil. Put about ten seeds in each hill, and when all danger of insects is past thin out to four plants, and give frequent but shallow cultivation. The fruit should be gathered when large enough, whether wanted or not, for if left to ripen on the vine it destroys its productiveness. For pickling plant in June or July. One ounce will plant 50 hills; two pounds one acre.

Spray cucumber vines with **Bordeaux Mixture** to prevent disease and improve the yield.

Wood's Ideal White Spine

—This cucumber meets every requirement of the trucker and shipper. It is not only very early, hardy, productive, uniform in color, shape and size, but it holds its deep rich green color remarkably well. It is the finest type of white spine cucumber and is affected by the hot sun less than any we have ever grown. While we recommend the Ideal particularly for shippers and market-growers, it is equally good for the home garden. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.; 5 lbs. and over, \$1.15 per lb.

Wood's Ideal White Spine.

Early Green Cluster —Very early, bearing in clusters of two and three. If kept gathered the vines will continue to set fruit through a long season. Fine for pickles. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.

Siberian or EARLY RUSSIAN.—One of the earliest; very prolific, good size, of splendid quality and shape. **Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 25 cts.; lb. 85 cts. postpaid.** By express, 75 cts. per lb.

Improved Early White Spine Cucumber.

Improved Early White Spine —The most widely grown of all cucumbers, especially for shipping, although it is grown in nearly every private garden. The fruits are 5 to 7 inches long, smooth, slightly pointed at the ends, of a deep rich color; very prolific and excellent for both table and pickling. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Arlington White Spine Cucumber.

Arlington White Spine —When you see this cucumber in your garden you will agree with us that it is as near perfect as one could wish. The fruits are of good shape, uniformly about 7 inches long, straight and of a rich dark green color. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Thorburn's Everbearing —If the fruits are kept gathered the vines will continue bearing in great quantities right up to frost. Four to five inches long and of a rich dark green color. Makes fine small pickles as well as slicing cucumbers. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

Improved Long Green —We have a greatly improved strain that grows 10 to 12 inches long, but makes the best of pickles when young; the full-sized fruits are best for sweet pickles and slicing. Dark green in color; firm and crisp; quality excellent. The vines are vigorous and produce fruits in great abundance. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.; 5 lbs. and over, \$1.15 per lb.

Klondike.

Klondike —Originated in the famous Rocky Ford district, and is one of the best shipping varieties grown in that section which has become famous for both melons and cucumbers. Very early, of desirable shape and keeps its color remarkably well. We recommend it very strongly to our Southern growers as a most profitable variety, particularly for shipping to distant markets. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Davis Perfect —The originator claims that the Davis, when grown outside, will make fruits as near perfect as the finest greenhouse-grown cucumber. It is extra early, makes long, symmetrical fruits of ideal shape and of an intense deep green color, which it retains till almost dead ripe. Has but few seeds and these are so tender as to be almost unnoticeable. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.; 5 lbs. and over, 95 cts. per lb.

Green Prolific or EARLY SHORT GREEN.—An early and very prolific cucumber grown principally for pickling. Fruits 4 to 5 inches long when in table condition, dark green and of fine quality. Will bear through a long season if kept gathered. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Early Fortune.

Early Fortune —A prime favorite with market-growers because of its extra earliness and the fine deep green color which it holds long after picking. The shape is uniform and the quality all that could be desired. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid.** By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Japanese Climbing —Ideal for growing on poles or trellis, taking but little room in the garden; bears quickly and sets its fruit constantly throughout the season. Of extra fine quality; dark green color. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

Chicago Pickling —Preferred to all others by many for pickles because of its fine pickling qualities and dark green color. The fruits set quite early and continue throughout a long season. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.25 postpaid.** By express, \$1.15 per lb.; 5 lbs. and over, \$1.10 per lb.

Gherkin or PICKER.—Grown exclusively for pickling. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 50 cts.; lb. \$1.25 postpaid.** By express, \$1.75 per lb.

GARDEN CORN

1 qt. is about 2 lbs.
2½ qts. is about 5 lbs.
10 lbs. is about 2-3 peck.
18 lbs. is about 1 peck.
Order 50 lbs. at 100-lb. rates.

The varieties described on this page are not sugar corns. They are hardier and can be planted earlier than any of the sugar corns and make excellent roasting ears before the sugar corns are ready.

CULTURE.—Corn prefers a rich, warm, well-manured soil, but excellent garden corn may be raised on any good soil that has been deeply and thoroughly worked before planting. Plant the early varieties the last of March or early in April; sweet corns are tender and should not be planted till the ground is thoroughly warm. Give frequent and thorough but shallow cultivation and continue plantings at intervals of about two weeks for a succession of roasting ears. The early kinds can be planted during July or early in August for late roasting ears. One pound will plant 100 hills; 10 to 12 lbs. plants an acre.

Bland's Extra Early —The Earliest Garden Corn in cultivation, ready a week earlier than Extra Early Adams.

Although we introduced it only eight years ago, so popular has it become that in no season have we been able to fill all our orders. We hope to have a large enough stock this spring, but we urge you to order early, so as to be sure not to miss it. It presents an attractive appearance and is of excellent table quality. Most gardeners take a pride in having the earliest garden in his section, so you will certainly want to plant Bland's. Its greatest value is, of course, its extreme earliness, and in this respect it should prove a money-maker for truckers and market-gardeners. Pkt. 15 cts. Our supply this season is so limited that we cannot offer except in packets. Note: No order for Bland's Corn will be filled unless it is included in an order for \$1.00 worth or more garden seeds.

GARDEN CORN CROP IS SHORT

At date this catalog goes to press we cannot tell how short crop will prove, so all prices are subject to change. Necessary changes will be noted in "Wood's Crop Special."

Delicious Cream Corn.

—In maturity a little later than Early Adams, but makes much longer ears. A strong grower, so strong and vigorous that the worm and sweet corn weevil do not bother it anything like as much as other early garden corns, and it will produce a larger percentage of usable and marketable ears than any other variety. Bears two to three ears to the stalk, of a most desirable size, either for market or table use. The ears have eight to ten rows of bright, attractive grains, well filled out to the tip. Makes beautiful creamy white roasting ears, while its flavor is sweet, tender and delicious. We believe the Delicious Cream Corn will prove to be one of the leading and most popular varieties. By mail postpaid, pkt. 10 cts.; 1b. 35 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.60. By express, 1b. 25 cts.; 5 lbs. 75 cts.; 10 lbs. \$1.35; 100 lbs. \$11.50.

Extra Early Adams —The earliest white corn in cultivation with the exception of Bland's Extra

Early; makes a small ear and stalk, and can be planted close together. By mail postpaid, pkt. 10 cts.; 1b. 30 cts.; 5 lbs. 85 cts.; 10 lbs. \$1.45; dozen ears, 60 cts. By express, 1b. 20 cts.; 5 lbs. 70 cts.; 10 lbs. \$1.20; 100 lbs. \$10.50; dozen ears, 50 cts.; 100 ears, \$3.75.

Trucker's Favorite Corn.

—One of our customers writes: "I planted May 10th, had roasting ears July 15th, and on August 30th was making meal from the corn." For a second early to

Bland's Extra Early Corn.

Ideal, or Big Early Adams Corn.

Ideal or Big Early Adams —A selection and improvement over the old Early Adams. Makes larger and handsomer ears and deeper grains. Ears measure from 10 to 14 inches in length, with 12 or more rows to the ear. Of excellent table quality, and a decided acquisition. By mail postpaid, pkt. 10 cts.; 1b. 35 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.55; dozen ears, 65 cts. By express, 1b. 25 cts.; 5 lbs. 75 cts.; 10 lbs. \$1.30; 100 lbs. \$11.00; dozen ears, 55 cts.; 100 ears, \$4.00.

Early Adams, or Burlington Corn.

Early Adams or BURLINGTON. —Similar to Extra Early Adams, but a little later, and makes larger ears. Earlier and harder than the sugar corns, and, as it makes a small stalk, can be planted close together. By mail postpaid, pkt. 10 cts.; 1b. 30 cts.; 5 lbs. 85 cts.; 10 lbs. \$1.45; dozen ears, 60 cts. By express, 1b. 20 cts.; 5 lbs. 70 cts.; 10 lbs. \$1.20; 100 lbs. \$10.50; dozen ears, 50 cts.; 100 ears, \$3.75.

follow Early Adams, this is unquestionably one of the best; or for planting late to mature quickly it is equally valuable. It is a white corn, with good depth of grain, tender and sweet, and makes a most desirable size for roasting ears. Besides being a fine garden corn, it makes a splendid field corn to follow potatoes and other early crops. The fine, large, well-filled ears present a splendid appearance and find a ready sale. By mail postpaid, pkt. 10 cts.; 1b. 35 cts.; 5 lbs. 95 cts.; 10 lbs. \$1.65; dozen ears, 65 cts. By express, 1b. 25 cts.; 5 lbs. 80 cts.; 10 lbs. \$1.40; 100 lbs. \$12.00; doz. ears, 55c; 100 ears, \$4.25.

Trucker's Favorite is a fine early variety with large ears, fine for table roasting ears, and makes a fine white meal and, best of all, it matures earlier than most of the early corns. — S. M. CATHCART, Wilcox Co., Ala.

I have been planting Trucker's Favorite Corn for the last 15 years, and I am free to say it is the best early corn I have ever planted. — J. H. MOORE, Burlington Co., N. J.

Sweet or Sugar Corns

1 qt. is about 1½ lbs.
5 lbs. is about ½ peck

Extra Early Cory.

\$4.00. By express, lb. 50 cts.; 5 lbs. \$2.00; 10 lbs. \$3.75.

Early Mammoth —A nice combination of size and quality; very much resembles Late Mammoth and, while not as large, is about two weeks earlier. Grains are very white, tender and sugary. By mail postpaid, pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.45. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.20; 100 lbs. \$20.00.

Late Mammoth —The latest but the largest of all sweet corns. The ears are of mammoth size, covered from tip to butt with large, broad grains of the most delicious flavor; sweet and tender. By mail postpaid, pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.45. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.20; 100 lbs. \$20.00.

White Evergreen —A pure white strain of the popular Stowell's Evergreen. The ears are very large and well filled from butt to tip with long, slender, pure white grains of the most delicious sweetness. It yields two or more ears to the stalk, and they remain in roasting ear state as long as any corn grown. By mail postpaid, pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$2.95. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.70; 100 lbs. \$25.00.

Stowell's Evergreen —Has long been a great favorite late corn for home use, market and canning. Aside from the size of the ears, which are very large and well filled, its strong point is that it remains in the green state for such a long season. Grains are deep and sugary. By mail postpaid, pkt. 10 cts.; lb. 50 cts.; 5 lbs. \$1.65; 10 lbs. \$2.95. By express, lb. 40 cts.; 5 lbs. \$1.50; 10 lbs. \$2.70; 100 lbs. \$25.00.

Stowell's Evergreen

Extra Early Cory —Next to Premo, the Cory is the earliest of the sweet corns. The ears, while not as large as the later sorts, are handsome, the grains large, broad and white and of remarkably good quality. By mail postpaid, pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.45. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.20; 100 lbs. \$20.00.

Kendel's Early Giant —The ears are about 8 inches long, remarkably large for so early a corn. They are well filled with pure white grains, very sweet, tender and delicious. Fine for home and market use. By mail postpaid, pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.50. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25; 100 lbs. \$21.00.

Black Mexican —Although the ripe grains are bluish-black, they are remarkably white when in roasting ear state. In tenderness and fine quality, none can surpass it. For family use we recommend it highly to follow the first early varieties. By mail postpaid, pkt. 10 cts.; lb. 40 cts.; 5 lbs. \$1.40; 10 lbs. \$2.50. By express, lb. 30 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25; 100 lbs. \$21.00.

Premo Extra Early —The Earliest of all Sweet Corns; from 5 to 7 days earlier than Extra Early Adams. Remarkably hardy for a sweet corn, and can be planted earlier than most other sweet varieties. Considering its extreme earliness the ears are remarkably large and usually

White Evergreen.

Golden Cream Corn.

Golden Cream —The originator says: "It is good enough to eat raw." It is a cross between Country Gentleman and Golden Bantam; has the color of the latter and the fine quality of the former. It is really a very early yellow Country Gentleman—that means earliness, good size and first-class roasting ears. By mail postpaid, pkt. 10 cts.; lb. 55 cts.; 5 lbs. \$1.90; 10 lbs. \$3.50. By express, lb. 45 cts.; 5 lbs. \$1.75; 10 lbs. \$3.25; 100 lbs. \$30.00.

Golden Bantam —The earliest and sweetest yellow grained sugar corn. Although the ears are not large, this is more than made up by its deliciously sweet flavor and tenderness. The ears are about 6 inches long and at least two ears are borne on each stalk. Can be planted earlier than any other sugar corn. By mail postpaid, pkt. 10 cts.; lb. 60 cts.; 5 lbs. \$1.95; 10 lbs. \$3.55. By express, lb. 50 cts.; 5 lbs. \$1.80; 10 lbs. \$3.40; 100 lbs. \$32.00.

Golden Bantam.

By mail postpaid, pkt. 5 cts.; lb. 35 cts.; 5 lbs. \$1.10; 10 lbs. \$2.00. By express, lb. 25 cts.; 5 lbs. 95 cts.; 10 lbs. \$1.75; 100 lbs. \$16.00.

RICE —Probably the most popular of all pop corns. It pops pure white; the quality is excellent. By mail postpaid, pkt. 5 cts.; lb. 35 cts.; 5 lbs. \$1.05; 10 lbs. \$1.90. By express, lb. 25 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.65; 100 lbs. \$15.00.

QUEEN'S GOLDEN —A large-eared and handsome yellow pop corn; grains large, pop perfectly white and are exceedingly tender. About 6 feet high, and yield 3 or 4 ears to the stalk. By mail postpaid, pkt. 5 cts.; lb. 35 cts.; 5 lbs. \$1.10; 10 lbs. \$2.00. By express, lb. 25 cts.; 5 lbs. 95 cts.; 10 lbs. \$1.75; 100 lbs. \$16.00.

POP CORN FOR POPPING —By mail postpaid, lb. 30 cts.; 5 lbs. 90 cts.; 10 lbs. \$1.60. By express, lb. 20 cts.; 5 lbs. 75 cts.; 10 lbs. \$1.35; 100 lbs. \$12.00.

Hiawatha Sugar —This is the most desirable second early sugar corn for the South. It makes a vigorous and healthy growth and a large-sized ear, nearly always making two perfect ears to the stalk, the ears being 9 to 12 inches long, and completely filled from end to end. The grains are large, tender and deliciously sweet. A most desirable sort to follow the early kinds; there is no better mid-season variety. By mail postpaid, pkt. 10 cts.; lb. 45 cts.; 5 lbs. \$1.50; 10 lbs. \$2.70. By express, lb. 35 cts.; 5 lbs. \$1.35; 10 lbs. \$2.45; 100 lbs. \$22.50.

Country Gentleman or **SHOE PEG** —One of the richest flavored and most popular late sweet corns. Makes a good-sized ear, with a small cob, densely covered with irregular rows of very long, slender, pearly-white grains of the best quality. The ears are 8 to 9 inches long, are borne two or more to the stalk, and will keep tender and fit for use for a long season. You will make no mistake in planting Country Gentleman. By mail postpaid, pkt. 10 cts.; lb. 60 cts.; 5 lbs. \$1.95; 10 lbs. \$3.55. By express, lb. 50 cts.; 5 lbs. \$1.80; 10 lbs. \$3.30; 100 lbs. \$31.00.

POP CORN

MAPLEDALE PROLIFIC.

—Very prolific, bearing large ears; the grains are very white. When popped it is pure white and extremely tender.

Country Gentleman

EGG PLANT

CULTURE.—Sow in hot-bed in February or March and keep well protected so that the growth be rapid and not checked. When 2 inches high, transplant to pots, in boxes or in the beds 3 to 4 inches apart, and when frost is past, set out 3 feet apart in a deep, rich loamy soil. Dust lightly with Slug Shot to protect from bugs. Seeds germinate slowly. One ounce will produce about 1,000 plants.

Insect Remedies.—For cut worm use poisoned bran or poisoned cotton-seed meal, or wrap paper around the stem when setting out. For potato-bug, see under potatoes.

Florida High Bush Egg Plant

New York Improved Purple —The most popular variety; vigorous and productive. Fruits of large size, with smooth, glossy, deep purple skin. Our stock is specially selected for size, shape and yielding qualities. Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.50; lb. \$5.60 postpaid. By express, \$5.50 per lb.

EGG PLANTS.—Ready May 1st till July. 25 cts. per dozen; \$1.15 per 100 postpaid. By express 20 cts. per dozen; \$1.00 per 100.

WHITE CURLED.—Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

GOURDS

Plant in hills after frost is past and cultivate like squash. Leave 3 or 4 plants to the hill.

DISH-CLOTH.—The lining makes splendid dish-cloths and bath sponges. Pkt. 5 cts.; oz. 20 cts.

DIPPER.—Useful for making dippers. Pkt. 5 cts.; oz. 20 cts.

NEST EGG.—A good nest-egg; lasts for years. Pkt. 5c; oz. 20c.

MIXED GOURDS.—Pkt. 5 cts.; oz. 15 cts.

HORSE RADISH ROOTS

25 cts. per doz.; 50 for 50 cts.; 75 cts. per 100, postpaid. By express, 20 cts per doz.; 60 cts per 100; 500 for \$2.25; \$4.00 per 1,000.

Black Beauty — Nearly two weeks earlier than any other variety, producing large, thick, lustrous, purplish-black fruits of the finest quality. The fruits set freely and develop quickly. It holds its color exceptionally well. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75; lb. \$6.60 postpaid. By express, \$6.50 per lb.

Florida High Bush

—Resists drought and wet weather to a wonderful degree on account of its strong upright growth, the fruits being held well off the ground. Very vigorous and productive, bearing very profusely its large purple fruits of fine shape and quality. An excellent shipper; commission men report they reach market in the best condition and command high prices. Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.60 postpaid. By express, \$4.50 per lb.

ENDIVE

An Attractive and Appetizing Salad For the Fall and Winter.

CULTURE.—Sow in August in drills 18 inches apart, and thin out to one foot apart. When nearly grown, tie up the outer leaves to blanch the heart. In dry seasons give plenty of water.

GREEN CURLED. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per pound.

KALE or BORECOLE

CULTURE.—Spring or Smooth Kale may be sown either in the spring or fall, making greens earlier than the winter sorts. Make spring sowings in February and March. The Siberian and Scotch are the popular sorts for fall sowing; a limited quantity is also sown in the spring. Sow from August 15th to October 15th, either broadcast or in drills 18 inches apart, and give some cultivation, and they will yield greens throughout the winter. Sow 8 lbs. per acre broadcast, 4 to 5 lbs. in drills.

Early Curled Siberian Kale.

Early Curled Siberian BLUE KALE or DWARF GERMAN GREENS.—A hardy, vigorous spreading green kale, with a distinctive bluish tinge. So hardy that it will stand the winter without protection and make rapid growth in the spring. The leaves are beautifully curled all around the edges and retain their crisp, fresh appearance long after cutting. Slow to run to seed. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

Green Curled Scotch or Norfolk —The dwarf spreading kale largely grown in the trucking sections of Eastern Virginia and the Carolinas. The leaves are deep green, beautifully curled and crimped. Very hardy and remains crisp long after cutting. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, \$2.00 per lb.; 5 lbs. and over, \$1.90 per lb.

Spring Kale —A hardy, quick-growing, smooth-leaved variety. Sow at intervals of ten days, so as always to have it young and tender. Pkt. 5 cts.; ¼ lb. 10 cts.; lb. 35 cts. postpaid. By express, lb. 25 cts.; 10 lbs. \$2.00.

KOHL RABI

The edible part is the turnip-shaped bulb that grows above ground. Combines the flavor of the cabbage and turnip and makes a splendid dish if used when 2 to 3 inches thick. Sow in drills as early as the ground can be worked, thinning out to stand 5 to 6 inches in the row. For a succession, sow every two weeks till end of April. For fall use, sow in June and July. Makes a fine stock food, yielding 300 to 400 bushels to the acre.

Kohl Rabi

EARLY WHITE VIENNA.—The best and earliest small top variety; flesh white and very tender. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 65 cts.; lb. \$2.35 postpaid. By express, \$2.25 per lb.

LEEK

CULTURE.—Superior to onions for soup flavoring, etc. Sow early in the spring in a light, rich, moist soil in drills half an inch deep. When 6 or 8 inches high, trim off the tops and roots and transplant 4 to 6 inches apart in one-foot rows, setting the plants in the ground up to their center leaves, and earth up to blanch the necks. May also be sown in September and transplanted outside in fall or early spring. One ounce will sow about 100 feet of drill.

LARGE FLAG.—The standard variety. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid. By express, \$2.50 per lb.

Large Flag Leek.

LETTUCE

CULTURE.—Lettuce is easy to grow, but requires rich, moist soil, clean and thorough cultivation and plenty of water to give it that quick-growth on which depends its tenderness and flavor. They may be had at all seasons of the year. The earliest sowings should be made in a hot-bed or in boxes indoors, hardened off and set out 8 to 12 inches apart in 18-inch rows. For a succession sow every three weeks. Sowings may be made in open ground early in the spring and the plants thinned out. For fall use, sow in July and August. Fall sowings of hardy kinds should be made in September; protect with straw or litter and they will head up in the spring, or transplant 9 inches apart under glass or canvas to head up in the winter. One ounce will produce about 1,500 plants; 2 pounds will make plants enough for an acre.

Wood's Cabbage Lettuce

There is no better lettuce than Wood's Cabbage, whether for forcing in frames or hot-beds, for early spring sowing outside,

for summer growing, for late fall or to stand outdoors all winter. Under all conditions it makes fine, large, solid heads with beautifully blanch-ed hearts. It does not run to seed as quickly as other kinds, and the quality is all that could be desired. Has stood the test for thirty years, and is still our most popular and best selling variety. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.50 postpaid. By ex-

press, \$1.40 per lb.; 5 lbs. and over, \$1.30 per lb.

I like Wood's Cabbage Lettuce so well that I rarely try any other kind. They make such large, delightful heads.—MRS. J. L. PHILLIPS, Orangeburg Co., S. C.

Mammoth Black

Seeded Butter—A sure header and reliable. Makes large cabbage-like heads, creamy white inside; very tender and of rich, buttery flavor. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

May King—Extra fine for growing in cold-frames. Makes large solid heads, 6 to 7 inches in diameter, with broad, light green outer leaves firmly folded. If grown outdoors, it is extremely early; for forcing, it is in every way desirable. The center blanches to a rich yellow. A remarkably good all-round first quality early lettuce. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

Crisp-as-Ice—A very superior family and home market summer lettuce, so crisp, tender and brittle as to fully justify the name. The heads are hard, with very rich, creamy-yellow hearts. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, \$1.40 per lb.

Improved Hanson

—One of the best summer lettuces. It makes a large, solid, compact head, exceedingly crisp and very tender and sweet; blanches well; extremely slow to shoot to seed. Pkt. 3 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

Wood's Improved Big Boston—Too much praise cannot be given our grand strain. It has steadily gained in popularity until now, throughout the large trucking sections of the South, it is more extensively grown than all other varieties, except our Wood's Cabbage Lettuce. It may be grown in the open ground for summer and fall use, or in frames under canvas, and always makes large, fine, buttery heads with thoroughly blanch-ed hearts, crisp, tender, white and sweet. We cannot recommend too highly our splendid strain of this most excellent variety. It gives the best of satisfaction under all conditions. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.; 5-lb. lots and over, 95 cts. per lb.

Wood's Improved Big Boston

Grand Rapids—Among the curled leaved lettuces there is no better for forcing, and it does splendidly outdoors if sown in the fall or early in spring. It does not form heads, but makes a large compact cluster crimped around the edges; crisp and tender. One of the easiest lettuces to grow under glass. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.; lb. \$1.25 postpaid. By express, \$1.15 per lb.

Early Prizehead

—One of the best for home-garden, forming a large, loose head; exceedingly tender, crisp and sweet. Fine for home use, but will not stand shipment. Pkt. 3 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

Deacon—A fine summer cabbage lettuce for home use; sure heading and reliable; quality excellent; slow to run to seed. Pkt. 3 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

California Cream Butter—Does well everywhere and in all seasons. A good shipper, very

hardy and especially recommended for outdoor growing. Particularly well suited for growing during the summer. One of the most buttery flavored and best in quality. Pkt. 3 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, per lb. \$1.00.

Early Curled Simpson—A sure cropper even under adverse conditions. Makes a well blanch-ed, curly, loose head; early, crisp and tender. Pkt. 3 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

Cos, Romaine or Celery

Lettuce—Has no equal for quality. Forms long, conical heads, which, if tied up, blanch pure white and make heads as crisp as celery stalks. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50 postpaid. By express, \$1.40 per lb.

Cos, or Romaine Lettuce.

LOOK ON PAGE 44 You will there find a complete list of VEGETABLE PLANTS AND ROOTS. We grow them in immense quantities and, weather permitting, can fill your order promptly.

Lettuce Plants—Wood's Cabbage and Big Boston. Ready February, March, April, September and October. 35c per 100 postpaid. By express, 25c per 100; \$2 per 1000.

Cantaloupe or Muskmelon

CULTURE.—Prepare hills, 4 to 6 feet apart, in a rich, moderately dry sandy soil, using well-rotted manure. When danger of frost is over, plant 10 to 12 seeds in each hill and when well up, thin out, leaving 4 strong plants to the hill. To have more and better fruit, pinch off the ends of the vines, especially if the growth is rank. Give frequent but shallow cultivation till the vines cover the ground. Dust with sifted ashes, air-slacked lime, or road-dust, to keep off insects; spray with Bordeaux Mixture to prevent disease and improve the yield. Do not grow near cucumbers, squashes, etc. One ounce will plant 50 hills; two pounds to one acre.

Extra Early Hanover

—The earliest cantaloupe in cultivation, ripening fully ten days ahead of the Rocky Ford. Notwithstanding its extreme earliness, it makes a large-sized melon. It is round, slightly flattened at the ends and well netted—see above illustration photographed from nature. The flesh is green, thick and can be eaten to the very thin skin. This is one of our exclusive introductions and has attained an immense popularity, particularly among market growers. **Pkt. 5 cts.; oz. 15 cts.;**

Extra Early Hanover Cantaloupe.

¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.; 5 lbs. and over, \$1.15 per lb.

Extra Early Hackensack —Similar to the Large Hackensack; smaller, but 10 days earlier, of equally fine quality, well netted and makes a splendid shipping and market melon. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. per lb.

Rocky Ford Netted Gem

—No other cantaloupe finds such ready sale in the large markets; it is always in demand at good prices. Very uniform in size and quality, thickly netted, distinctly ribbed and firm fleshed. We grow our seeds in the famous Rocky Ford Valley, and from the very best type of the genuine Rocky Ford Cantaloupe. **Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 25 cts.; lb. 80 cts. postpaid.** By express, lb. 70 cts.; in 10-lb. lots and over, 65 cts. per lb.

Rocky Ford Cantaloupe.

Baltimore or Acme —A fine melon that always pleases. Fruits are of good size, oval shaped, well ribbed, heavily netted and thick flesh of the best quality. Its attractive appearance makes it a ready seller. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 85 cts. postpaid.** By express, 75 cts. per lb.; 5 lbs. and over, 70 cts. per lb.

Knight.

Knight —An ideal shipping melon; about a week earlier than Rocky Ford, just the right size for crating, uniform in shape and size, well netted, thick green flesh of splendid appearance. One of our customers writes: "Nearly all my Knight melons sold in New York for \$2.50 to \$4.50 per crate." **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.25 postpaid.** By express, \$1.15 per lb.; 5 lbs. and over, \$1.10 per lb.

Wood's Netted Gem

—A thoroughbred strain of Netted Gem selected by ourselves. In selecting, our aim has been to produce the most perfect type combined with the finest quality to be had in cantaloupes. The fruits are uniformly larger than the Rocky Ford Netted Gem, and has thicker flesh that is as rich and sugary as possible. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.25 postpaid.** By express, per lb. \$1.15; 5 lbs. and over, \$1.10 per lb.

Wood's Netted Gem Cantaloupe.

Jenny Lind —Not a large melon, but very early and very sweet. Round, flattened at the ends; heavily netted. **Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 25 cts.; lb. 80 cts. postpaid.** By express, 70 cts. per lb.; 5 lbs. or more, 65 cts. per lb.

New Early Rocky Ford Cantaloupe.

New Early Rocky Ford —A fine new strain of the Rocky Ford, a week to ten days earlier than the old strain, a little larger, and of superior quality. Its earliness is a distinct advantage to market growers. In shape and characteristics it is similar to the regular Rocky Ford. Its netting is close and deep. In quality it is deliciously sweet and spicy. The seed cavity is small; flesh thick and firm, and of attractive green color. One of our customers grew 1,800 ½-bushel baskets on a single acre. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.60 postpaid.** By express \$1.50 per lb.; 5 lbs. and over, \$1.40 per lb.

Gold Lined Rocky Ford

—Whether you grow for home use or market you will like this melon. It is ideal in shape, densely covered over its entire surface with a thick gray netting; the meat is thick, fine grained, and deliciously sweet and juicy. Flesh is green with a gold margin next to the seed cavity. Vines are highly rust-resistant. You will not be disappointed in Gold Lined. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

Gold Lined Rocky Ford Cantaloupe.

Spicy Pink.

Spicy Pink The most exacting will be pleased with Spicy Pink. It is the best of its class. Has particularly thick, luscious meat that "melts in the mouth." Green near the rind, merging into a rich salmon; the netting is closely laced and interlaced with but slightly defined ribs, giving it an even surface and adding to its attractiveness. **Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.35 postpaid.** By express \$1.25 per lb.

Ohio Sugar —Claimed to be absolutely the sweetest and most luscious green-fleshed cantaloupe now on the market. It is of that desirable size in demand in all markets; round, inclined to oval in shape, heavy in proportion to size because the flesh is so deep and seed cavity small. Distinctly ribbed and thickly netted; color of skin grey-green. Because of its firm flesh and solidity, it makes an excellent shipper. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 35 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

Large Hackensack or TURK'S CAP.—An excellent extra large green-fleshed melon. Fruits round, somewhat flattened, ribs large and densely netted. Flesh is green, thick, juicy and sweet. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.

Wood's Perfection

The best large cantaloupe for main crop. It is the type of melon always in demand in our markets, and for home use there is no better. Flesh is thick, of beautiful deep rich green color; of excellent flavor. It is well ribbed and thickly netted; a splendid cantaloupe, either for home use, market or shipping.

Wood's Perfection.

Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.; 5 lbs. and over, \$1.15 per lb.

Netted Rock or Eden Gem —One of the meatiest of the Rocky Ford type melons; of uniform standard size, covered with a beautiful gray lace-like netting, which, with the small seed cavity, are the most essential points in shipping and keeping qualities. The flesh is green tinged with a delicious salmon pink around the seed cavity. The flesh is firm, but not tough or stringy; sweet, luscious, melting and superb flavor. A heavy yielder, very uniform; few run too large and still fewer are too small. For shippers, also for home growers, we recommend it highly. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. per lb.

Bush Cantaloupe

The melon for the small garden, as it can be grown as close as 3 feet apart. Makes a vigorous growth, bears a large number of fruits about the size, shape and fine flavor of the Jenny Lind. Allow only about half the fruits to ripen, as it is apt to bear too many. **Pkt. 10 cts.; oz. 25 cts.; 1/4 lb. 75 cts. postpaid.**

Emerald Gem

—Has few equals for the home garden, and no melon is more delicious. Of good size, of a deep emerald-green color; the salmon-colored flesh is unusually thick. Don't fail to grow a few. Not a good shipper. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 30 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

Emerald Gem Cantaloupe.

Fordhook —The introducer pronounces it the equal of Emerald Gem in delicious flavor and equal to the Rocky Ford in shipping qualities. The rind, though thin, is unusually firm and well netted; the thick salmon-flesh is solid and sweet to the rind—these characteristics make the finest market melons. It is equally good for home use. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 30 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. per lb.

Fordhook Cantaloupe.

Montreal Nutmeg —The largest nutmeg melon. The flesh is nearly two inches thick; very sweet and luscious. **Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

Mixed Cantaloupes

—All kinds, shapes and sizes, green and salmon fleshed mixed. Will give a succession of fruits throughout the season. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts. postpaid.**

Tip-Top Rightly named, for it is one of the most delicious melons in existence. The fruits are large, have thick orange flesh, sweet, juicy and of the finest flavor even close to the rind. Every melon, big or little, is a good one, and eatable to the rind. Fine for home use and nearby market. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 30 cts.; lb. \$1.00 postpaid.** By express lb. 90c.

Osage or MILLER CREAM.—A perfectly delicious melon with a fine spicy flavor. The skin is dark green, slightly netted; flesh salmon color. Very productive, a long keeper, a good shipper and fine for home use. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 30 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

Tip-Top Cantaloupe.

Netted Nutmeg —The true Nutmeg cantaloupe, medium size, thickly netted, quite early and always sweet and luscious. **Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 90 cts. postpaid.** By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. lb.

Hollybrook Luscious —For flavor and size combined, this is the king of all melons. Too large to be profitable for market—they often weight 15 to 20 lbs. They are ideal for home use. One melon is enough for a large family. Continues bearing till cold weather and holds its splendid quality up to the very last. **Pkt. 10 cts.; oz. 20 cts.; 1/4 lb. 50 cts.; lb. \$1.50 postpaid.** By express, \$1.40 per lb.

Hollybrook Luscious.

Banana—Grows 18 to 24 inches long; flesh thick and of the most delicious flavor. **Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

Glass Melon or MANGO.—For preserving, sweet pickles, mangoes stuffed like sweet peppers, pies, and may be sliced and fried like egg-plant. **Pkt. 5 cts.; oz. 15 cts.; 1/4 lb. 40 cts.; lb. \$1.35 postpaid.** By express \$1.25 per lb.

Wood's SOUTHERN GROWN Water Melon Seeds

CULTURE.—Prepare hills 8 or 10 feet apart each way by working in thoroughly rotted manure, or poultry droppings—rich ground gives the plants a good start before insects attack them. When the ground is warm plant 6 or 8 seeds to the hill, covering an inch deep and, when well up, thin out, leaving three strong plants to each hill. Do not grow near pumpkins and gourds. Use the same insect remedies as recommended for cantaloupes. One ounce will plant 30 hills; 3 lbs. one acre.

BE SURE TO SPRAY your melons with Bordeaux Mixture (see page 47). It will both improve the yield and prevent diseases that are becoming prevalent in Southern melon fields.

NOTE: Do not confuse our splendid Southern grown melon seeds with those grown in the North and West. There is no comparison between them. Southern grown seeds produce the sweetest and best melons it is possible to grow.

Kleckley's Sweets, or Monte Cristo Water Melon.

Kleckley's Sweets —One of the most popular watermelons grown. Dark green skin, thin rind, bright scarlet meat, and solid heart. Flesh very sweet, crisp, sugary and melting, free from stringiness; early to mature and uniform in growth. One of the best in our list for home use and near-by markets. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 90 cts. postpaid. By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. per lb.

Excel —Many growers claim that for shipping it is even better than Tom Watson. In appearance it strongly resembles the Watson, has a very thin tough rind, is uniformly large, averaging from 40 to 60 lbs., single melons frequently weighing 75 to 80 lbs. On the table it is as attractive and enticing as any melon can be, and its quality is fully equal to its attractiveness. It is an unusual melon in that although a grand shipper it is also one that we can highly recommend for the private garden, the beautiful red meat being decidedly crisp, sweet and luscious, and solid to the center. Seeds are both black and white. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts. postpaid. By express, 70 cts. per lb.; 5-lb. lots, 65 cts. per lb.

The Excel Melon seeds I bought from you made the finest melons I ever saw. They were of fine flavor and very large, from 60 to 70 lbs.—E. M. ERVIN, Florence Co., S. C.

Jackson Water Melon
The Sweetest of all Melons.

Jackson —If asked to name the sweetest melon for home use, we would name the Jackson. Other kinds may be larger, but none can compare with it in delicious sweetness. It is a long melon with mottled green skin, firm, red meat, and ripens close to the rind. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 30 cts.; lb. \$1.00 postpaid. By express 90 cts. per lb.

Tom Watson Water Melon.

Tom Watson —The most popular shipping melon grown. The melons are large, long and dark-green like the Kleckley's Sweets, but larger and has a tougher rind, giving it exceptionally fine shipping qualities. The flesh is rich red, solid, sweet and luscious and ripens close up to the rind. Although a shipping melon, its fine quality commends it to the private grower. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts. postpaid. By express, 70 cts. per lb.; 5 lbs. and over, 65 cts. per lb. Special prices in large lots. The Tom Watson Watermelon produced fine melons, 35 to 40 pounds.—M. M. PRESCOTT, Wicomico Co., Md.

Halbert Honey Water Melon.

Halbert Honey —The introducer describes this as equal in flavor and as handsome as the Kleckley's Sweets and much more productive. A long early melon, with a dark, rich, glossy green rind, crimson flesh and sweetness that is unsurpassed. Fine for home use and home market, but is too thin and brittle to stand shipment. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 80 cts. postpaid. By express, lb. 70 cts.

Sweet Heart Water Melon.

Sweet Heart —Large and heavy, oval shape, pale green color with distinct netted lines of a darker shade. The solid flesh is deep rich red; crisp and luscious. Extra fine for home use, but bears shipping well. Pkt. 5 cts.; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; lb. 75 cts. postpaid. By express, 65 cts. per lb.

Jordan's Gray Monarch or **LONG LIGHT ICING**.—One of the largest melons, and a fine keeper. It is long with skin of mottled gray color and bright crimson flesh. The flavor is sweet and delicious. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 75 cts. postpaid. By express, 65 cts. per lb.

Mountain Sweet —A fine old melon that for home use is hard to beat. Fruits are oblong, rind thin, flesh bright red, very sweet and solid. Especially good on heavy soil. **Pkt. 3 cts.**; oz. 8 cts.; $\frac{1}{4}$ lb. 20 cts.; 1b. 70 cts. postpaid. By express, 60 cts. per lb.

Duke Jones, or Jumbo —Although a shipping melon, it is of such good quality and fine flavor that it is equally well recommended for home use. Extra large and of attractive color and appearance. **Pkt. 3 cts.**; oz. 8 cts.; $\frac{1}{4}$ lb. 20 cts.; 1b. 70 cts. postpaid. By express, 60 cts. per lb.

Florida Favorite Water Melon

Florida Favorite —A splendid, large long melon; comes early, ships well, is a fine home melon, and its solid, juicy, bright-crimson meat is deliciously sweet to the thin rind. **Pkt. 3 cts.**; oz. 8 cts.; $\frac{1}{4}$ lb. 20 cts.; 1b. 70 cts. postpaid. By express, 60 cts. per lb.; 5-lb. lots, 55 cts. per lb.

Dark Icing —An extra early and extra good melon for home use and nearby market. One of the most delicious of melons; rich red and sugary to the very thin rind. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 90 cts. postpaid. By express, 80 cts. per lb.; 5 lbs. and over, 75 cts. per lb.

Improved Georgia or **AUGUSTA RATTLESNAKE**.—The old Rattlesnake has always been regarded as a fine melon. Our strain is the result of careful selection by an experienced melon grower through many years of careful and watchful work. The rind is thin and tough, the flesh deep scarlet, the flavor unsurpassed by any other sort. We strongly recommend it both for shipping and home use. Our improved stock is very much superior to the ordinary Georgia Rattlesnake. **Pkt. 5 cts.**; oz. 15 cts.; $\frac{1}{4}$ lb. 35 cts.; 1b. \$1.10 postpaid. By express, \$1.00 per lb.; 5 lbs. and over, 90 cts. per lb.

Harris Earliest —The earliest variety grown and exceptionally large for so early a melon; handsome, uniformly of long oval shape and of first-class quality. Not only desirable for home use, but fine for shipping. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 90 cts. postpaid. By express, 80 cts. per lb.

Alabama Sweets Water Melon

Alabama Sweets —A very large and attractive oblong melon of the type now in demand. The tough skin is very dark green, with still darker stripes; the flesh is bright red, solid, very sweet and entirely free of stringiness. Under high cultivation they will weigh forty to fifty pounds. **Pkt. 3 cts.**; oz. 8 cts.; $\frac{1}{4}$ lb. 20 cts.; 1b. 70 cts. postpaid. By express, 60 cts. per lb.

Pride of Georgia Water Melon.

Pride of Georgia —One of the largest melons in our list. Dark-green rind; oval shape; meat bright red. A desirable variety for home use or market. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 80 cts. postpaid. By express, 70 cts. per lb.; 5 lbs. and over, 65 cts. per lb.

Peerless or Ice Cream —A fine, early melon for home and market. Oval shaped, bright green, finely veined skin, flesh bright-scarlet, solid to the center; very sweet and delicious. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 80 cts. postpaid. By express, 70 cts. per lb.

New Favorite —Exactly like Florida Favorite, but larger. Equally good in every respect. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 75 cts. postpaid. By express, 65 cts. per lb.

Carolina Bradford Water Melon.

Carolina Bradford —The Bradford is one of the best melons for home use and nearby market, but we do not recommend it for shipping long distances. It is a favorite above all others in sections where it has been grown. Makes a strong healthy vine and very productive. The melons are large, elongated; rind dark green, with darker stripe; flesh red, remarkably tender and sweet. An excellent melon for home use. **Pkt. 3 cts.**; oz. 8 cts.; $\frac{1}{4}$ lb. 20 cts.; 1b. 70 cts. postpaid. By express, 60 cts. per lb.

Preserving Citron —Makes excellent preserves and sweet-meats. Also used for stock feeding. Keeps for a long time. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts.; 1b. 80 cts. postpaid. By express, 70 cts. per lb.

MIXED WATERMELONS —A mixture of all the varieties most highly recommended for home use; both early and late, round and long kinds are in our mixture. **Pkt. 5 cts.**; oz. 10 cts.; $\frac{1}{4}$ lb. 25 cts. postpaid.

Medicinal Watermelon Seeds For making watermelon seed tea which is much used for kidney and bladder troubles. $\frac{1}{4}$ lb. 15 cts.; 1b. 55 cts. postpaid. By express, 45 cts. per lb.

MUSHROOM SPAWN

Mushrooms may be grown in cellars, in sheds, in hot-beds, or under greenhouse benches, or wherever a uniform degree of temperature and sufficient moisture can be maintained. We issue a special circular giving full cultural directions. If requested, a copy will be sent with all orders for spawn.

BEST IMPORTED SPAWN.—The best made, the bricks being inoculated from the pure test tube culture. **Per brick** (about 1 1-3 lbs.) 35 cts. each; 5 for \$1.50 postpaid. By express, 25 cts. per brick; 10 bricks for \$2.00.

MUSTARD

CULTURE.—Sow in February, March or April, or in September or October, either broadcast or in rows six inches apart. One ounce sows 80 feet of drill; 5 to 6 lbs. broadcast an acre.

Chinese Broad Leaved—The leaves are twice as large as the White, and the stems more succulent. Ready in six weeks from sowing, and continues till frost. Pleasantly sweet and pungent. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid. By express, 90 cts. per lb.

Southern Giant Curled—The most popular mustard with Southern growers. It forms a great mass of leaves beautifully ruffled and finely curled and crimped around the edges; succulent, pungent and of sweet flavor. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid. By express, 90 cts. per lb.

Ostrich Plume—The most beautiful of all mustards. The leaves are long, ruffled and curled as gracefully as an ostrich plume. Stands summer heat splendidly. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

WHITE.—The dark-green, smooth-leaved mustard. Mild and tender when young; grows quickly. Pkt. 3 cts.; oz. 5 cts.; ¼ lb. 15 cts.; lb. 40 cts. postpaid. By express, 30 cts. per lb.

BLACK.—Stronger and more pungent than the white. Pkt. 3 cts.; oz. 5 cts.; ¼ lb. 15 cts.; lb. 40 cts. postpaid. By express, 30 cts. per lb.

OKRA or GUMBO

CULTURE.—When the ground has become warm, sow thickly in drills 3 feet apart, and when large enough, thin out to a foot apart in the rows. To keep for winter use, slice the pods into narrow rings when young and tender, string them and hang in the shade to dry; or they may be pickled like cucumbers or may be canned. One ounce will sow 30 feet of drill.

Wood's Brunswick—Big pods, 6 to 7 inches long, 4 to 5 inches round, are produced at every joint. They are so full of meat as to practically eliminate the ridge so common to most kinds; nor do they harden up as quickly as do other okras. Free from sharp-pointed pods, the thickness being carried well out to the end of the pod. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.

Kleckley's Favorite—Produces thick, fleshy pods of exceptional tenderness and flavor. The plants grow 2½ to 3 feet high, close jointed, bearing pods at each leaf-joint; the pods average 6 inches in length by 1¼ inches in diameter at the bottom, and carrying the thickness well throughout the entire length; a most productive and desirable variety. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 60 cts. postpaid. By express, 50 cts. per lb.

White Velvet—Bears round, white, smooth pods, unlike other varieties, which are ridged or square-edged. The pods are extra large and are produced in great abundance. Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 15 cts.; lb. 50 cts. postpaid. By express, 40 cts. per lb.

Improved Dwarf Green Prolific

—Of dwarf growth, but immensely productive. The pods are tender, of the best quality, and are borne throughout the season. Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 15 cts.; lb. 50 cts. postpaid. By express, 40 cts. per lb.

Perkin's Mammoth Podded

—A distinct and valuable okra. Its productiveness is something wonderful. The pods shoot out from the stalk within 3 inches of the ground, and the whole plant is covered with them to its extreme height. The pods are of an intense green color, of unusual length, 8 to 9 inches. Very superior for canning. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 55 cts. postpaid. By express, 45 cts. per lb.; 5 lbs. and over, lb. 40 cts.

Long Green—Produces in great abundance dark green pods of the best quality. Pkt. 3 cts.; oz. 8 cts.; ¼ lb. 15 cts.; lb. 50 cts. postpaid. By express, 40 cts. per lb.

NASTURTIUM or INDIAN CRESS

Serves a triple purpose, the flowers for decoration, the leaves for garnishing and salads, and the green seed-pods for pickles. Plant in rows one inch deep in April. One ounce will sow 25 feet.

TALL MIXED.—Plant against fences, trellis or stakes. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.40 postpaid. By express, \$1.30 per lb.

DWARF MIXED.—Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

ONION SETS

Bushel Prices Quoted on Request

CULTURE.—Plant 4 inches apart, in rows half an inch deep and 1 foot between the rows, but do not cover the sets entirely, except the Potato Onion, which should be planted in rows 2 feet apart and 10 inches apart in the row, and covered about one inch. All varieties can be set out in the fall as well as in spring.

YELLOW DANVERS.—The most popular yellow onion for spring planting. Qt. 35 cts. postpaid. By express, qt. 25 cts.; peck \$1.00.

RED WETHERSFIELD.—A large cropper and favorite market variety. Qt. 35 cts. postpaid. By express, qt. 25 cts.; peck \$1.00.

SILVER SKIN.—The best white onions for growing from sets in the spring. Mild flavor, good keepers, and large yielding. Qt. 35 cts. postpaid. By express, qt. 25 cts.; peck \$1.25.

YELLOW POTATO, MULTIPLIER, or HILL ONION.—Make large reddish-brown onions of mild flavor and excellent cooking qualities. Never makes seed, but divides from the root; the smallest sets produce one to two large onions; medium-sized sets produce as many as twelve medium to small sets, the larger sets make as many as twenty sets in a hill. This is the most popular onion among Southern growers for both home use and market. Small sets (about the size of a hulled walnut). Qt. 40 cts. postpaid. By express, qt. 30 cts.; peck \$1.60.

WHITE MULTIPLIER.—Differs from the Yellow Potato Onion in color, being pure white, and does not grow large, but is very productive, of finest flavor, and a better keeper than the Yellow. Qt. 40 cts. postpaid. By express, qt. 30 cts.; peck \$1.50.

EXTRA EARLY WHITE PEARL.—For fall planting only. Sow seeds in the spring to make sets to be put out next fall. See page 33.

PARSLEY

CULTURE.—Sow in February, March or early in April, half an inch deep, in rows a foot apart, pressing the soil after sowing.

Slow to germinate, sometimes two or three weeks in coming up. Germination may be hastened by soaking 24 to 36 hours before sowing, or by covering the rows with boards to retain the moisture. A few radish seeds should be sown in the row with parsley to mark the row and allow early cultivation. The radishes can be pulled early and will not interfere with the parsley.

Plain or Single—Hardier than the curled, stronger flavored; color very dark green; fine for flavoring soups, stews and for drying. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 75 cts. postpaid. By express, 65 cts. per lb.

Champion Moss Curled

—The best and most improved strain. It is beautifully curled and crimped, and is the best for garnishing and flavoring. If cut when about 3 inches high, it starts a new growth that will be better curled and a brighter color. Makes an ornamental plant for edging walks. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 80 cts. postpaid. By express, 70 cts. per lb.

Champion Moss-Curled Parsley.

See pages 47 and 48 for a complete line of Spray Pumps and Insecticides.

ONION

CULTURE.—Large Onions from Seed.—To grow large onions from seed the first year, sow in January or February in hot-bed or in the open ground later, and when the weather opens and the plants are the size of a goose quill, transplant 4 or 5 inches apart in 12 to 18 inch rows. **Transplanting always increases the yield**, some times doubles the yield. Five to six pounds will plant an acre.

Growing Onion Sets.—To grow onion sets, sow in broad, wide rows in March or early in April, 40 to 50 pounds per acre, and keep clean of weeds. In late summer, or whenever the tops die, remove the sets to a dry place, spreading them out thinly on trays made of laths, piling the trays one on top of another, separated by blocks, so that the air can circulate freely between them. The larger sets should be sold for pickling, and only the smallest retained for planting.

Prize Taker, or Spanish King —Large and of particularly fine flavor like nearly all Spanish onions. The outside skin is a rich yellow straw color; the flesh pure white, sweet, mild and tender. Ripens up fine and hard, and makes a very attractive and handsome onion. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.60 postpaid.** By express, \$4.50 per lb.; 5-lb. lots, \$4.40 per lb.

Copper King —Attains an enormous size, single onions having been grown weighing four pounds. The skin is a reddish color, flesh white, very sweet, mild and tender. Enormous crops may be grown by following the transplanting method described above. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

Extra Early White Pearl —The quickest of the white sorts; makes large pearly white onions, tender, mild and of excellent flavor. Sown in the spring thickly, and the sets put out in the fall, large onions may be had before any other sorts are ready. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.15; lb. \$4.10 postpaid.** By express, \$4.00 per lb.; in 5-lb. lots and over, \$3.90 per lb.

Mammoth Silver King —One of the earliest and largest of the Italian onions, often growing 6 to 7 inches in diameter. The bulbs are of an attractive shape, flattened but thick. The skin is a clear silvery white, the flesh pure white, mild, sweet and tender. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.15; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

White Queen or BARTLETTA.—An extremely early, pure white onion, making bulbs about 1½ inches thick. Mild flavor; fine for pickling. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.10; lb. \$4.10 postpaid.** By express, \$4.00 per lb.

Large Red Wethersfield —The most generally grown and best known red variety. The bulbs are large, somewhat flattened, but thick; skin purplish red; flesh purplish white; very hard and solid; an excellent keeper and a heavy cropper. A good onion for poor and dry soils. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.35 postpaid.** By express, \$3.25 per lb.

Mammoth Silver King.

Yellow Globe Danvers —The best known and most largely grown yellow onion for spring planting. The bulbs are medium to large size, uniformly globe shaped, have small necks and ripen evenly. The skin is light yellow; the flesh is creamy white, crisp and mild in flavor. A fine keeper, matures early and is universally recommended for general crop. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.15; lb. \$4.35 postpaid.** By express, \$4.25 per lb.

Silver Skin or WHITE PORTUGAL.—Grows to a good size; ripens early and evenly. Flesh and skin pure white; very mild and sweet; a good keeper. Besides making a fine market onion, it is largely grown for bunching, for sets and pickling. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.25; lb. \$4.60 postpaid.** By express, \$4.50 per lb.

Southport Globe Onions

On account of their beautiful shape, these onions always command a good price on Northern markets. They are heavy yielders, and as they make hard, firm bulbs, they are good keepers. Our stock is grown from a very superior strain.

SOUTHPORT WHITE GLOBE.—Skin and flesh silvery white. **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.45; lb. \$5.50 postpaid.**

SOUTHPORT YELLOW GLOBE.—Fine shape; rich yellow color and a good keeper. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.30; lb. \$4.85 postpaid.** By express, \$4.75 per lb.

SOUTHPORT RED GLOBE.—A most attractive variety; beautiful shape and of a deep, rich red color. **Pkt. 5 cts.; oz. 35 cts.; ¼ lb. \$1.20; lb. \$4.60 postpaid.** By express, \$4.50 per lb.

BERMUDA ONIONS Genuine Teneriffe Grown Seed

CRYSTAL WHITE WAX.—A beautiful crystal white with a decided waxy appearance. It is the earliest of the Bermuda varieties, and makes large, flat onions, so mild and sweet that they can be eaten like an apple. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.

WHITE BERMUDA.—Though called white, it is really a light straw color. Makes onions 3 to 4 inches in diameter; flattened in shape, but thick; very mild and sweet. **Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.85 postpaid.** By express, lb. \$2.75.

RED BERMUDA.—In shape, size and flavor exactly like White Bermuda, differing only in color, which is pale red. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 65 cts.; lb. \$2.35 postpaid.** By express \$2.25 per lb.

Bermuda Onion.

Prize Taker, or Spanish King.

Government regulations require quotations by the pound, instead of by the quart, peck and bushel.

Culture.—Peas do best in a light, rich loamy soil that has been liberally manured the previous season. Plant the smooth varieties as early as the ground can be worked. The wrinkled peas are not as hardy as the smooth kinds, and should be planted later; they are, however, sweeter and better flavored. For a succession, plant every two weeks—as late as August for a late crop. The Marrowfat planted in November, December or January will come in just after the extra early. When grown for market, peas are rarely staked; in small gardens grow in double rows, 6 to 8 inches apart, and stake with brush. They should be kept clean and the earth worked toward them two or three times during growth. One quart will plant 100 feet of drill; 1½ bushels for an acre.

Wood's Pedigree Extra Early

—This is all that its name implies, a thoroughbred pea. The pods are well shaped and well filled, containing usually 6 to 8 peas of a beautiful green color, both peas and pods retaining their fresh green color long after being picked, a point of particular value when grown for shipping. We strongly recommend this pea, believing that it will bring increased profits on account of its extreme earliness, well-filled pods, and great productiveness; 2 to 2½ feet high. Pkt. 10c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid. By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.80; 100 lbs. \$17.00.

Wood's Lightning Excelsior

Wood's
Lightning
Excelsior.

long, and are full of large peas of unusually sweet flavor. Grows one foot high, of vigorous constitution and great yielding power. Pkt. 10c; 5 lbs. \$1.25; 10 lbs. \$2.25 postpaid. By express, lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.00; 100 lbs. \$18.00.

Eclipse, or Surprise

—The Eclipse is a rare combination of earliness, productiveness and fine table qualities. Repeated tests have proved conclusively it is the very earliest of all the wrinkled peas, almost as early as the smooth, extra early kinds, and of far better quality, though not quite as hardy. The vines grow 2 feet high, require no stakes, and are thickly set with well-filled pods. Pkt. 10 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25 postpaid. By express, lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.00; 100 lbs. \$18.00.

Eclipse or Surprise.

Nott's Excelsior

—A particularly good extra early dwarf wrinkled pea, coming in only a few days after the extra early, smooth kinds. Pods average 3 inches

long, and are full of large peas of unusually sweet flavor. Grows one foot high, of vigorous constitution and great yielding power. Pkt. 10c; 5 lbs. \$1.25; 10 lbs. \$2.25 postpaid. By express, lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.00; 100 lbs. \$18.00.

Thomas Laxton

—Rivals the Gradus in its many fine qualities. A heavy and reliable cropper, bearing uniform, long, straight, square-ended, dark green pods, containing 7 to 8 large, rich-flavored peas of a deep-green color, adding to their attractiveness when served. Almost as early as the extra early smooth peas; 3 ft. high. Pkt. 10c; 5 lbs. \$1.45; 10 lbs. \$2.60 postpaid. By express, lb. 35c; 5 lbs. \$1.30; 10 lbs. \$2.35; 100 lbs. \$22.00.

GARDEN PEAS

Wood's Pedigree
Extra Early.

grow 2½ ft. high, strong, vigorous and hardy, standing cold weather better than any other extra early pea we have ever known. It ripens uniformly and is one of the most popular and productive of extra early peas, both for shipping, the home market and home use. Pkt. 10 cts.; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid. By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.50.

Nott's
Excelsior

American Wonder

—One of the most popular early varieties and the equal of any in flavor and quality. Strictly a pea for the private garden; it grows 10 to 12 inches high; very early and a prolific bearer. Pkt. 10c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid. By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.85; 100 lbs. \$17.25.

McLean's Little Gem

—A favorite early wrinkled variety, maturing a little later than the American Wonder. Dwarf habit, bears abundantly and of excellent quality, being sweet and tender. Height 18 inches. Pkt. 10c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid. By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.85; 100 lbs. \$17.25.

Ameer

—Resembles Alaska in general habit. Has little longer vine (about 3 feet), and not quite so early, but with larger pods, handsomely shaped. Ripens uniformly; quality excellent. Pkt. 10c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid. By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.50.

American Wonder.

Little Marvel

—Particularly well suited to small home gardens as well as for market gardening. It is first early, about 15 inches high, heavily set with large dark pod usually in pairs, that are closely crowded with 6 to 8 green peas of extra fine flavor. As early as American Wonder. Pkt. 10c; 5 lbs. \$1.40; 10 lbs. \$2.40 postpaid. By express, lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.15; 100 lbs. \$20.00.

Extra Early Alaska

—Deservedly popular with growers for early market because of its earliness, uniform maturity and abundance of pods which retain their fresh green color long after picking. These qualities make it particularly valuable for shipping. For canning it ranks among the best. Pkt. 10c; 5 lbs. \$1.25; 10 lbs. \$2.25 postpaid. By express, lb. 30c; 5 lbs. \$1.10; 10 lbs. \$2.00; 100 lbs. \$18.25.

McLean's Little Gem.

Large Podded Alaska

—A valuable strain of the popular Alaska pea, but makes much larger pods and is more prolific. Vines grow about the same height; but the superiority in size of pods and yield makes it a most valuable acquisition. Pkt. 10c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid. By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.50.

Large Podded Alaska.

First and Best

An excellent first early pea, largely planted by market growers. Height 2 to 2½ ft. Pkt. 10c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid. By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.00.

Extra Early
Alaska

Petit Pois or French Peas

The real French Pea as imported. The long, slim pods contain 8 to 10 small peas, of tender, delicate quality; vines vigorous; medium early and prolific; 3 to 4 ft. high. Pkt. 10c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid. By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.00.

Gradus, or Prosperity

—Only a few days later than the Eclipse and remarkable for the large size and fullness of its shapely pods. The vines grow 3 feet high, have heavy stems and produce uniformly large pods 4 inches or more in length. The peas remain tender and sweet for a long time after they are large enough to use. We regard the Gradus as one of the best peas introduced in recent years, and recommend it highly for earliness, size and fine quality. **Pkt. 10c; lb. 45c; 5 lbs. \$1.45; 10 lbs. \$2.60 postpaid.** By express, lb. 35c; 5 lbs. \$1.30; 10 lbs. \$2.35; 100 lbs. \$22.00.

Tom Thumb Peas. **Gradus or Prosperity Pea.**

Tom Thumb —A very hardy and prolific early pea, growing 10 to 12 inches high, allowing very close planting. Of most excellent quality and considered by many as the best dwarf pea. **Pkt. 10c; lb. 35c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid.** By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.00.

Second Early and Late Peas

Bliss Everbearing —Matures soon after McLean's Gem and continues for a long time in bearing. As the pods are gathered, others mature in succession. The peas are good size, tender and of fine flavor. The vines are closely jointed and frequently form many stalks from a single root stock. Pods 3 inches long, broad, of good size, and well filled. Height 2 feet. **Pkt. 10c; lb. 35c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid.** By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.85; 100 lbs. \$17.25.

Bliss Everbearing Peas.**Horsford's Market Garden**

—Claimed to be the largest yielding second early pea in cultivation, a single plant bearing 150 pods, 2 feet high. A fine market pea, and equally good for home use. **Pkt. 10c; lb. 35c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid.** By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.85; 100 lbs. \$17.25.

Horsford's Market Garden.**McLean's Advancer**

—A particularly good bearer, the pods being long and broad and well filled to the ends. The vines grow about 2½ ft. high, are vigorous and upright, hardy and very productive; the peas are of most excellent quality. We recommend it highly. **Pkt. 10c; lb. 35c; 5 lbs. \$1.15; 10 lbs. \$2.10 postpaid.** By express, lb. 25c; 5 lbs. \$1.00; 10 lbs. \$1.85; 100 lbs. \$17.25.

Dwarf Gray Sugar

Produces an abundance of good sized pods on vines about 2 feet high. Prepare for the table just as you would snap beans. **Pkt. 10c; lb. 40c; 5 lbs. \$1.35 postpaid.** By express, lb. 30c; 5 lbs. \$1.15.

McLean's Advancer. **Dwarf Champion of England.****Dwarf Champion of England**

or **JUNO**.—The dwarf type of the old reliable Champion of England, retaining all its excellence, but requires no stakes. A robust and vigorous grower, a great producer of handsome dark-green pods well filled with peas of unsurpassed flavor. The pods are broad and straight, 3 inches long, and frequently borne in pairs. Fine for private use and the home market. Height 2 ft. **Pkt. 10c; lb. 40c; 5 lbs. \$1.30; 10 lbs. \$2.40 postpaid.** By express, lb. 30c; 5 lbs. \$1.15; 10 lbs. \$2.15; 100 lbs. \$20.50.

Champion of England

—Universally admitted to be one of the best late peas grown. Highly prized by those who are fond of a large, tender and luscious pea. Hardy and vigorous in growth; pods 3 inches long, broad, nearly straight; medium dark green color. Of delicious flavor, and a very pro-use bearer. Especially recommended for the home garden. Height 4 to 5 feet. **Pkt. 10c; lb. 40c; 5 lbs. \$1.30; 10 lbs. \$2.40 postpaid.** By express, lb. 30c; 5 lbs. \$1.15; 10 lbs. \$2.15; 100 lbs. \$20.50.

Dwarf Telephone

—A dwarf variety of the famous Telephone, bearing large, handsome pods of

peas of the finest quality, similar to the tall Telephone without the long vines of that kind. An abundant bearer of long, broad, straight pods about 4½ inches long, well filled, frequently containing 9 and 10 peas; 18 to 20 inches high. **Pkt. 10c; lb. 50c; 5 lbs. \$1.65; 10 lbs. \$3.00 postpaid.** By express, lb. 40c; 5 lbs. \$1.50; 10 lbs. \$2.75.

Telephone —One of the most productive of the large podded wrinkled sorts. Of excellent sugary flavor; pods large, generally 5 to 5½ inches long, broad, straight and pointed, and well filled with large peas of delicious flavor. The pods usually contain 6 or 7 peas. Rather late in maturing, but one of the best for main crop. Height 4 ft. **Pkt. 10c; lb. 40c; 5 lbs. \$1.30; 10 lbs. \$2.40 postpaid.** By express, lb. 30c; 5 lbs. \$1.15; 10 lbs. \$2.15; 100 lbs. \$20.50.

Large White Marrowfat

—A big yielder for mid-summer and late crop. Hardy, strong and vigorous. **Pkt. 10c; lb. 35c; 5 lbs. \$1.05; 10 lbs. \$1.90 postpaid.** By express, lb. 25c; 5 lbs. 90c; 10 lbs. \$1.65; 100 lbs. \$15.00.

Marrowfat.**Black Eye Marrowfat**

—Largely grown for late crop for home use and market; 3 to 5 feet high; very hardy and productive. **Pkt. 10c; lb. 35c; 5 lbs. \$1.10; 10 lbs. \$2.00 postpaid.** By express, lb. 25c; 5 lbs. 95c; 10 lbs. \$1.75; 100 lbs. \$16.

Wood's Mammoth**Luscious Sugar**

—Without an equal for sweetness, succulence and tenderness. Sliced, boiled and served with butter or sauce, they make a most tempting and delicious dish. Grows 5 to 6 ft. high, requiring support; pods 6 to 7 inches long, 1½ inches broad, produced continuously. Peas, when shelled, equal to the sweetest wrinkled variety. **Pkt. 10c; lb. 40c; 5 lbs. \$1.35; 10 lbs. \$2.50 postpaid.** By express, lb. 30c; 5 lbs. \$1.20; 10 lbs. \$2.25.

Wood's Mammoth Luscious Sugar.

TO PREPARE SUGAR or SALAD PEAS—gather when they have reached about half their full size or when the peas begin to develop in the pod. Our Mammoth Luscious, on account of their large size, are sometimes sliced, but with the Dwarf Gray Sugar this is not necessary. Cook them just as you would string or snap beans and serve with butter or white sauce. The young pods require only about ten minutes cooking, but the older pods take a little longer—even when quite old they are good.

Pepper

CULTURE.—Sow in hot-bed in February or March and transplant outside in May, 18 inches apart, in 2 or 3 foot rows. When the ground becomes warm, sow outside and transplant as above. Cultivate well and keep free of weeds. Hen manure, liquid manure, or a good garden fertilizer, if worked into the soil when the plants are six inches high, will materially increase the yield. One ounce will produce about 1,200 plants.

Chinese Giant

—An enormous pepper, measuring 12 to 15 ins. in circumference and 4 to 5 inches long. Notwithstanding its large size, it is very early and very prolific. The plants grow about 2 ft. high and carry an enormous load of fruit, often having the appearance of being bunched together, frequently half a dozen fruits will appear in a bunch. Flesh is thick, tender, mild and sweet. They may be sliced and eaten like tomatoes, or stuffed as mangoes. When ripe they are a rich glossy scarlet. **Pkt. 10 cts.; oz. 60 cts.; ¼ lb. \$2.00; 1 lb. \$7.50 postpaid.**

Chinese Giant

Early Neapolitan

—Ten days earlier than any large, sweet, mild pepper, and a wonderful bearer; single plants often yield 30 to 40 peppers, and continue loaded with fruits right up to frost. Bright red, thick meated, very sweet and mild as an apple; 4 inches long by 5 to 6 inches round; keeps for a long time in nice condition. **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.35; 1 lb. \$5.10 postpaid. By express, 1 lb. \$5.00.**

Spanish Mammoth

or **SWEET MOUNTAIN.**—A late variety, bearing large, thick fruits often 4 to 5 inches long and 2 to 3 inches across. When ripe, it is a deep, glossy red; the flavor is mild and sweet; fine for mangoes. **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.40; 1 lb. \$5.35 postpaid. By express, \$5.25 per lb.**

Ruby Giant

a beautiful pepper, being a cross between the Chinese Giant and Ruby King. It combines the large size and productiveness of the Chinese Giant and the attractive shape and color of the Ruby King. The flesh is mild and sweet, and may be used for stuffing or sliced and served with tomatoes. **Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75; 1 lb. \$6.50 postpaid.**

Ruby King

—One of the most popular of the large varieties. The peppers are a beautiful bright ruby red color, 4 to 6 inches long by 3 to 4 inches across. Flesh very thick, sweet and so mild that it may be sliced and served with vinegar, or they may be stuffed as mangoes. **Pkt. 10 cts.; oz. 45 cts.; ¼ lb. \$1.65; 1 lb. \$6.35 postpaid. By express \$6.25 per lb.**

Long Red Cayenne

A strong hot pepper, having long, slender and bright red pods about 4 inches long. Both the green and ripe peppers are used for pickling. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. 90 cts.; 1 lb. \$3.35 postpaid. By express, \$3.25 per lb.**

Crimson Giant

—Among the extremely large, sweet peppers this is one of the earliest to ripen and none surpass it in uniformity of size and shape. The fruits, being exceptionally thick fleshed, average, heavier than most large sorts. When young the peppers are deep green, changing when ripe to a beautiful deep crimson. The flavor is so sweet and mild that it may be eaten like an apple. **Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75.**

Mammoth Golden Queen

—Fruits 6 inches long by 9 to 10 inches in circumference, and are borne 12 to 15 to each plant. Mild and sweet. Used as described for Ruby King. **Pkt. 10 cts.; oz. 50 cts.**

Large Bell or Bull Nose

—A large pepper that ripens its fruits early and uniformly. The plants are vigorous and productive, yielding fine crops of large fruits, with thick, mild flesh of excellent quality for use in salads or for stuffing. The ripe fruits are bright crimson. **Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.50; 1 lb. \$5.60 postpaid. By express, \$5.50 per lb.**

Giant Sweet Bull Nose

—An extra large and particularly sweet and mild type of Bull Nose. The earliest of the large, sweet mango peppers, uniform in size and shape, and has exceptionally thick flesh; color deep green when young, deep crimson when ripe. Particularly good for stuffing and for salad. **Pkt. 10 cts. oz. 50 cts.; ¼ lb. \$1.75.**

Giant Sweet Bullnose

Pimento Pepper

Pimento

—Can be eaten raw like an apple, stuffed with meats, rice, etc. and baked; can be served as a salad, made into Spanish omelets, and for canning especially fine. When ripe is a beautiful scarlet red, smooth and uniform in shape and size; an abundant bearer and continues in bearing till frost. **Pkt. 10 cts.; oz. 40 cts. ¼ lb. \$1.35; 1 lb. \$5.00 postpaid.**

Red Cluster (CHILI).

Splendid hot pepper for making pepper sauce and pepper vinegar. The brilliant scarlet pepper an inch or less in length, borne in clusters at the top of the branches. **Pkt. 10 cts. oz. 50 cts.**

Tabasco

—The hottest pepper grown. Bear immense quantities of bright scarlet pods about an inch long. **Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75.**

PEPPER PLANTS.—Ruby King, Bull Nose and Cayenne. Read May and June. 20 cts. per doz.; 90 cts. per 100 postpaid. By express, 15 cts. per doz.; 75 cts. per 100; \$6.00 per 1,000.

PARSNIP

CULTURE.—Parsnips may be planted from as early in the spring as the weather will permit till the middle of June. Plant in rich, deeply worked, sandy loam. Make the rows 18 inches apart, cover lightly, and when 2 inches high thin out to 4 to 6 inches apart. Parsnips germinate slowly, especially when the ground is dry; a few radish seeds should be planted with them to mark the row to allow early cultivation. Parsnips are improved by frost so they can be dug as wanted, or a portion can be stored for use during severe weather. One ounce sows 200 feet of drill; 5 lbs. sows an acre.

Wood's Improved

—A very fine and greatly improved strain both in shape of the roots and the flavor. Smooth, not as long as the Hollow Crown, but finer grained, thicker and more easily pulled. **Pkt. 5 cts.; oz. 20 cts. ¼ lb. 60 cts.; 1 lb. \$2.10 postpaid. By express, \$2.00 per lb.**

Sugar or Hollow Crown

—A standard variety, making long, smooth, white roots, uniform in shape, tender and well flavored. Fine for both table and stock. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; 1 lb. \$1.85 postpaid. By express, \$1.75 per lb.**

PUMPKIN

CULTURE.—Pumpkins do not require as rich soil as squashes, cucumbers and melons, but on good land the pumpkins will be much larger. Plant in May, in hills 8 to 10 feet apart, mixing well-rotted manure in each hill. Put 8 to 10 seeds in each hill, and cultivate till the vines get strong, when they should be thinned out, leaving two or three of the strongest in each hill. When planted in corn plant at the same time as the corn, in very fourth row, 10 to 12 feet apart in the rows, letting the hill of pumpkins take the place of a hill of corn. Do not grow ear squashes or melons. Keep off bugs by dusting with Bug Beath, Paris Green, or land plaster. One ounce will plant 20 hills; three pounds, one acre.

A Big Yielder and Fine Keeper.

Virginia Mammoth Pumpkin.

Virginia Mammoth —We have never grown a pumpkin that combined so many good qualities as the Virginia Mammoth. It not only grows to an immense size, but its keeping quality is most remarkable—we have kept them in fine condition for a whole year after they were taken from the field. It is undoubtedly the best and most productive pumpkin for Southern growers. Oval shaped, the flesh thick, of fine flavor; makes as delicious pumpkin pie as anyone could wish, and is equally good for stock feeding. It is adapted to our climate and our seed is Southern grown, both of which are necessary to raise a fine crop of pumpkins. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50 postpaid.** By express, \$1.40 per lb.

I planted Virginia Mammoth Pumpkins the Fourth of July and raised them weighing 50 and 60 lbs apiece. They are the finest pumpkins I ever saw.—A. C. Guthrie, Lincoln Co., W. Va.

Tennessee Sweet Potato —For making pumpkin pies we can recommend the Tennessee Sweet Potato as highly as any pumpkin grown. The flesh is thick, fine grained, sweet and delicious. A big yielder, and the pumpkins are of good size. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid.** By express, \$1.25 per lb.

King of the Mammoths or POT IRON.—An immense variety which has taken numerous prizes offered for the largest and best pumpkin grown; single pumpkins sometimes weigh over 100 pounds. Flesh is a rich golden-yellow, a splendid keeper. **Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

King of the Mammoths Pumpkin.

I can't make a crop without getting my seeds from Wood's, especially garden seeds. W. H. Springfellow, Dickson Co., Tenn. I am much pleased with the garden seeds you sent me, Miss Luisa H. Randolph, Nelson Co., Va.

Sugar or Pie

—Not a large pumpkin—averaging 10 inches in diameter—but one of the sweetest and best for pies. It is fine-grained, deliciously sweet and a good keeper; flesh rich, deep orange-yellow in color. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid.** By express, \$1.00 per lb.

Cashaw or Crookneck —A fine table pumpkin and equally good for stock. Large and very productive; meat is rich yellow, tender and of the best flavor. **Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.** By express, \$1.50 per lb.

Large Cheese —A fine pumpkin for both table and stock, nearly 2 feet in diameter; flesh yellow, extra thick, sweet, and of the finest quality. An excellent keeper. **Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. 90 cts postpaid.** By express, 80 cts. per lb.

Corn Field Pumpkin —Grown for stock feeding; usually planted in cornfields, making enormous crops. Makes good pies. **Oz. 8 cts.; ¼ lb. 25 cts.; lb. 85 cts. postpaid.** By express, 75 cts. per lb.; 5 lbs. and over, 70 cts. per lb.

Medicinal Pumpkin Seed

—For making pumpkin seed tea, etc. **¼ lb. 25 cts.; lb. 80 cts. postpaid.** By express, 70 cts. per lb.

We have gotten our garden seeds from Wood's for four years. Each year we do better than the year before. This year our garden was beautiful and bountiful. We grew all we could use and canned enough for all winter in our garden. 200 by 200. Mrs. D. M. Pollock, Guilford Co., N. C.

Mammoth Sandwich Island Salsify.

Cashaw or Crookneck Pumpkin.

RHUBARB

Culture.—Rhubarb will not stand extreme heat, so it should be grown in a moist or shaded situation. Sow in March or April, and when a few inches high, thin out to 12 inches apart, and in the fall, or following spring, transplant 2½ to 3 ft. apart in 6-ft. rows. Fall-set roots should be protected with well rotted manure. The best stems are produced the second year, but it continues to produce for several years. Always give it plenty of manure.

LINNAEUS.—Makes large, fleshy stalks of the best quality and flavor. **Pkt. 5c; oz. 15c; ¼ lb. 45c; lb. \$1.60 postpaid.** By express, \$1.50 per lb.

Rhubarb Roots —15c each; \$1.50 per doz. postpaid. By express, 10c each; \$1.00 doz.; 100, \$6.00.

SALSIFY or OYSTER PLANT

Culture.—Sow in March or April in rich, light, deeply-worked soil, in rows 18 inches apart, and thin out to 4 to 6 inches. Do not use coarse or fresh manure, it will make the roots ill-shaped and uneven. Cultivate often to keep down weeds. Perfectly hardy and may remain out all winter. Can also be sown in May and June, provided we get seasonable weather or boards be used to get the seeds up and shade the young sprouts until they get well established. One ounce will sow 50 feet of drill; eight pounds, one acre.

Mammoth Sandwich Island

—The most popular salsify in cultivation, and far superior to the old varieties in size, weight and productiveness. A strong grower, with large, long, white tapering roots, without tendency to branch. We have taken great care in the selection of our seed stock so as to produce not only good size, but the smoothest roots possible, qualities that will be appreciated both by market and private growers. **Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid.** By express, \$2.50 per lb.

RADISH

CULTURE.—To be tender and crisp, radishes must be grown quickly, and this requires rich soil and plenty of moisture. Commencing with the first mild spell in the spring, sow at intervals of ten days, in a light, rich, deeply-worked soil. May also be sown as a catch-crop between rows of beets, lettuce, onions, etc., or sown in the same drill with slow-growing vegetables like carrots and parsnips. When forced in hot-beds, they must have plenty of ventilation and moisture. For fall and winter use, sow the winter varieties in August or September. One ounce will sow 50 feet; 8 to 10 pounds one acre.

Extra Early Scarlet Globe

(Non Plus Ultra).—One of the earliest radishes and one of the best for forcing. Makes a very small top, of bright red color, and is very attractive, both in color and shape, making it a good seller. Mild, crisp, juicy and tender. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.85 postpaid. By express, \$1.75 per lb.

Extra Early Scarlet Globe.

Early Red or Scarlet Turnip —No radish is more popular for the home garden. A quick growing, round red radish, with small tops; rich red color; crisp and tender. Fine for early outdoor planting. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Early White Turnip —Similar to the Early Red or Scarlet Turnip, except that the skin and flesh are pure white. Particularly good for growing in the summer. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Crimson Giant Radish.

Fine for forcing in frames and for the open ground. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Early White Tipped Scarlet Turnip (Rosy Gem).—A fine forcing radish. Very early; makes beautiful, deep scarlet roots, with white tip; crisp, tender and mild. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.75 postpaid. By express, \$1.65 per lb.

Extra Early Scarlet

Olive Shaped —A fine early radish, very popular with truckers and for the family garden. Oblong, of a deep scarlet color; quick growing, crisp, and of excellent quality. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Extra Early Scarlet Olive Shaped

Mixed Turnip Radishes —All of the early turnip radishes mixed; just the thing for the home garden. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Long White Icicle or LADY FINGER.—The finest early, pure white, long radish. On good soil they are ready in 20 to 25 days, and will remain crisp and tender longer than any first early variety. Splendidly adapted for forcing and for outdoor growing. Pkt. 5 cts.; oz. 20 cts.; $\frac{1}{4}$ lb. 50 cts.; lb. \$1.85 postpaid. By express, \$1.75.

Woolf's Early Frame —One of the earliest radishes grown, its small top making it very fine for forcing; shorter and thicker than Long Scarlet, and earlier. Tender, crisp and fine flavored. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Chartier Long Scarlet —A beautiful long radish, of a deep crimson, shading to white at the tip. Splendid for outdoor culture. Will keep tender longer than any other variety. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Brightest Long Scarlet.

WINTER RADISHES

Sow during August or September, and when freezing weather comes on pack in sandy soil, either buried outdoors, or in a damp, cool cellar, where they will keep all winter.

Chinese or Celestial —A quick-growing radish for sowing either in the fall or spring; keeps in prime condition a long time; mild, crisp and never woody. Flesh and skin white. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Rose China Winter —Roots cylindrical; color bright rose; flesh white and of superior quality. One of the best. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Long Black Spanish —One of the latest and hardest of radishes. Oblong in shape; of large size. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Long White Spanish —Flesh is white, firm and pungent. Grow 6 to 8 inches long. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Brightest Long Scarlet

A decided improvement in earliness and color over other varieties of its class. Fit for use in about 25 days when planted out. Long White Icicle doors; has a small top and no neck; bright scarlet color. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.; 5 lbs. and over, \$1.20 per lb.

White Strasburg —An excellent summer radish, withstands severe heat and grows quickly. Handsome, long, tapering; skin and flesh pure white; firm, crisp and tender. Can be pulled five weeks from sowing, but may be allowed to grow, retaining crispness even when the roots are old and large. Pkt. 5 cts.; oz. 12 cts.; $\frac{1}{4}$ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Mixed Long Radishes

—All varieties mixed. Pkt. 5 cts.; oz. 15 cts.; $\frac{1}{4}$ lb. 45 cts.; lb. \$1.50 postpaid. By express, \$1.40 per lb.

Chinese, or Celestial Radish.

SQUASH or CYMLING

Culture.—After danger of frost is past, plant in a warm well-pulverized, rich soil, mixing well-rotted manure in each hill. Plant eight or ten seeds to the hill, the summer varieties 4 to 6 feet apart, the winter sorts 8 to 10 feet. When well grown, thin out, leaving three of the strongest plants in each hill. Do not bruise or break the stems of the winter squashes when gathering. Apply Bug Death, land plaster, air-slaked lime or Paris Green to keep off bugs; for the large squash bug, use kerosene emulsion. Plant summer sorts, one ounce to 25 hills; 3 to 4 pounds to an acre; winter sorts, ounce to 10 hills; 3 to 4 pounds to an acre.

Wood's Earliest Prolific

—One of our own distinctive introductions and one that has proved

of the greatest value to our market-gardeners and truckers. Florida truckers, who grow for the earliest market, grow every season hundreds of acres for shipment to the large Northern markets. Being earlier than any other squash, it readily commands high prices, and has proved quite a profitable variety. It is ten days earlier than the Early White Bush, is of the same bush growth and about the same

Wood's Earliest Prolific Squash.

shaped fruits, except that the scallops are not so pronounced, the squashes being better filled out and contain more flesh. The vines are of the true bush form, two feet high, of vigorous growth, giving the plant great producing power. If you want the earliest squashes in your garden, you must grow Wood's Earliest Prolific. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.; 5 lbs. and over, \$1.15 per lb.

Mammoth White Bush

—Quite similar to the Early White Bush from which it was originally selected. It differs in being larger and more uniform in shape; color a beautiful waxy white. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.; 5 lbs. and over, 95 cts. per lb.

Mammoth White Bush.

Early White Bush

or **PATTY-PAN CYMLING.**—For many years the most popular squash for shipping, for near-by markets and home use. It is early, very prolific, an excellent shipper; light cream color. In every way a good yielding and satisfactory squash. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid. By express, 90 cts. per lb.; 5 lbs. and over, 85 cts. per lb.

Golden Summer

Crookneck —A standard variety, early and productive. The squashes are about a foot long, with crooked neck and densely warted surface. Color, bright yellow, quality fine. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.10 postpaid. By exp., \$1.00 per lb.; 5 lbs. and over, 95 cts. per lb.

Giant Summer Crookneck.

Giant Summer Crookneck —The largest and earliest of the crookneck squashes, often 1½ to 2 feet long. Of dwarf, bushy habit; very productive; bears early and continues through the summer; rich golden yellow color, thickly warted and of excellent quality. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

WINTER SQUASHES

Hubbard —One of the best and most widely grown winter squashes. They are large and heavy, with bright orange flesh; fine grained, very dry, sweet and richly flavored; a fine keeper; none better for squash pies. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Hubbard Squash.

Delicious —We recommend this as one of the most desirable fall and winter squashes for the South. It is somewhat similar

to the Hubbard, having a dark olive green, hard shell, but is superior in flavor and table qualities; a more reliable cropper, and makes a most desirable winter vegetable. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

In the spring I bought a few seeds from you, among them Delicious Squash. They are grand. Mrs. W. T. Hunt, Wake County, N. C.

I could not ask for anything better in the squash line than Wood's Earliest Prolific. C. H. Craig, Pender County, N. C.

SPINACH

Culture.—For early summer use, sow early in spring in a good, well-fertilized soil, in drills 1 inch deep, 1½ to 2 feet between the rows. For winter and spring use, sow from September to December 15th. Requires but little cultivation. One ounce will sow 100 feet of drill, 12 to 15 pounds one acre. The above applies to all varieties except New Zealand.

New Zealand —Thrives during the hottest summer weather and in any soil, rich or poor. After cutting the plant puts out new growth and continues till frost. Soak for twenty-four hours and plant four seeds in hills two feet apart each way. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 65 cts.; lb. \$2.35 postpaid. By express, lb. \$2.25.

Round Thick-Leaved —Excellent for spring seeding; makes thick, dark green crimped leaves of finest quality. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid. By express, \$1.75 per lb.; 10 lbs. and over, \$1.70 per lb.

Norfolk Savoy or Bloomsdale —Very early, hardy, and grows rapidly; leaves curled like a Savoy Cabbage. Best for fall sowing. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid. By express, \$1.75 per lb.; 10 lbs. and over, \$1.70 per lb.

Long Standing —Fine for both fall and spring sowing. Leaves thick and fleshy; will stand long without running to seed. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid. By express, \$1.75 per lb.; 10 lbs. and over, \$1.70 per lb.

Long Season —Similar to the Norfolk Savoy, but has a larger and broader leaf and stands longer without running to seed. Makes a dense rosette of thick, tender and succulent, dark green leaves. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, \$2.00 per lb.

Wood's High-Grade Tomatoes

CULTURE.—Six or eight weeks before frost is over sow in hot-beds, in pots or shallow boxes in the house and when they have made four leaves transplant in the beds to promote root growth. Expose as much as possible to harden them so that, when set out on the open ground, they will be strong and stocky, but do not allow the growth to be checked. Transplant 3 to 4 feet apart in a light, warm soil, and cultivate as long as possible. When transplanted, puddle the plants and shade them a few days until they are well rooted. The earliest fruits may be had by growing in pots, shifting to larger pots as they become filled with roots. Earliness may also be promoted by pinching off all the branches except the one most thrifty and tying this and the main stem to stakes. If all useless growth is removed by pinching out the side branches, the plants may be set closer and will produce more perfect fruits and a more abundant crop. One ounce makes about 1,500 plants; 4 ounces will make plants enough for an acre.

Spark's Earliana (Bright Red).—The Earliana is probably more largely grown for the earliest market than any other

tomato. The originators claim that it is the earliest of all the large, smooth, bright red varieties. In the tomato growing section of New Jersey, which practically controls the Eastern markets, it is grown almost exclusively. It is of very handsome shape, quite solid, of fine quality. Fruiting season only lasts about four weeks, so that if marketed ear-

Spark's Earliana.

ly the crop may be sold before the markets are glutted with the later kinds. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.

Bonnie Best (Scarlet).—Prof. Watts, in the Market-Growers Journal, says "Bonnie Best grows in favor as one has more experience with it." As early as Earliana—certainly not more than a day or two later—a vigorous grower, enormously prolific, with splendid foliage which protects the fruits from the hot sun. The color is an intense velvety glowing scarlet; ripens evenly up to the stem. It is round, slightly flattened at stem end, but thicker through than most tomatoes. Its greatest characteristic is its remarkable uniformity of size and smoothness; no rough fruits. **Pkt. 5c; oz. 30c; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express \$3.50 per lb.

Bonnie Best.

June Pink —Except in color, the June Pink is identical with Spark's Earliana. It is of special value to truckers who grow for markets where the pink tomatoes are preferred. Is fully as early as the Earliana, but has the further advantage of having a longer fruiting season, the vines continuing to bear and ripen its fruit until frost. The fruit is medium in size, uniform, smooth and attractive, without cracks and green core. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.; 5 lbs. and over, \$3.40.

June Pink.

Tomato Blight. In many sections the tomato crop has failed when, with proper attention, an abundant crop might have been had. Bordeaux Mixture will prevent many tomato diseases if you will spray thoroughly throughout the season. See pages 46 and 47 for price of Bordeaux Mixture and spray pumps for applying it.

Wood's First Early (Purplish Red.)—Where extreme earliness is desired, plant Wood's First Early. Although not as large as the later kinds, it makes an ideal extra early tomato for the earliest market, and, in addition, is remarkably prolific. The fruits are round, smooth, purplish red, and in every way most desirable. **Pkt. 10c; oz. 50c.**

Chalk's Jewel.

Chalk's Jewel (Bright Scarlet.)

—Extra early in maturity, coming in very shortly after Spark's Earliana, but a heavier cropper, with fruits of larger size and sweeter flavor. It is bright red or scarlet; in quality and handsome appearance like the Matchless, but distinctly earlier. A particular advantage is its hardy, vigorous and robust growth, admitting of earlier setting in the field, as it is claimed that it withstands cool weather and blight where more tender sorts would be injured. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.

Early Acme.

Early Acme (Purple.)—

Through all the years that Acme has been grown, none of the newer varieties have supplanted it in popular favor, and it is still one of the best sellers. Early and bears till cut off by frost. The tomatoes are always round, smooth, solid, of good size, and free from cracks; borne in clusters of four or five; the quality and flavor are beyond criticism. **Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 85 cts.; lb. \$3.10 postpaid.** By express, \$3.00 per lb.

Livingston's Globe

(Purplish Pink).—An extra good, all-round tomato of a distinct globe shape.

permitting a greater number of slices from a single fruit than from other sorts except Coreless. In Florida and sections where blight is prevalent, it has proved very blight resistant. Always smooth, firm-fleshed and has but few seeds, especially the early fruits. Very productive—the plants usually have many short joints at which large clusters of 3 to 7 fruits are almost invariably formed, so that it can be truthfully said that the vines are literally loaded with fruit. A remarkably good keeper, a special advantage to growers for distant markets. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00; lb. \$3.60 postpaid.** By express, \$3.50 per lb.; 5 lb. lots, \$3.40 per lb.

Livingston's Globe

Wood's Improved Trophy.

Wood's Improved Trophy (Bright Red.)—

A fine old favorite which we have greatly improved by careful breeding, and which now ranks among the very best, free from the roughness which is characteristic of the Trophy generally sold. The large smooth, solid, fine-flavored, rich red fruits will satisfy the most exacting. **Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 85 cts.; lb. \$3.10 postpaid.** By express, \$3.00.

Golden Queen or YELLOW TROPHY.—Makes large, handsome, smooth tomatoes of fine quality. One of the best yellow sorts. **Pkt. 5 cts.; oz. 30 cts.; ¼ lb. 90 cts.; lb. \$3.10 postpaid.** By express, \$3.00 per lb.

Wood's Famous Brimmer Tomato

The Greatest Tomato in the World

These Three Brimmers Weighed 5 lbs. 6 ozs.

What the Growers Think of Brimmer

I had six Brimmer tomatoes that weighed 23½ pounds.—DAVIS TWYMAN, Fulton Co., Ga.

We are delighted with the Brimmer—the finest we have ever had, solid, free from acidity, and cuts like beautiful mellow fruit and of great size.—C. L. EVERIT, Kings Co., N. Y.

I am sending a picture of a Brimmer tomato bearing 42 tomatoes weighing over a pound apiece.—C. H. HESS, Kanawha Co., W. Va.

I am 80 years old, farming 50 years—have never seen anything to equal your Brimmer tomato.—R. S. JETER, Amelia Co., Va.

Don't forget the Brimmer tomato—we can't get along without them.—Mrs. JONES BARNETT, Henderson Co., N. C.

The Brimmers are so fine I must have them.—S. D. KNOWLTON, Bolivar Co., Miss.

The Brimmer is the finest tomato we ever raised. Best for slicing raw, best cooked, best for canning, and the green ones make the best sweet pickle.—Mrs. B. A. HORNE, Union Co., N. C.

The Brimmer is hard to beat; very fine flavor both fresh and canned.—Mrs. W. R. MOFFETT, Augusta Co., Va.

The Brimmer produced the largest, smoothest, best flavored and with fewest seed of any tomato I ever raised, many weighing over two pounds each.—F. W. KING, Stokes Co., N. C.

I would not be without your Brimmer tomato.—A. B. METCALFE, Coosa Co., Ala.

The Brimmer tomato could not possibly be any better. I had some to weigh as much as 3 lbs.—W. H. Davis, Norfolk county, Va.

The Brimmer gets larger and better every year. I have always found everything just as your catalog says it is.—G. L. Webb, Rowan county, N. C.

This photo shows the Brimmer's wonderful bearing quality.

We found this grand tomato at the Jamestown Exposition, where it was awarded the **Grand Prize for size and quality**. We were immediately struck with its splendid appearance and secured a supply of the seeds to test in our trial grounds. Our tests proved conclusively that its merits had not been exaggerated in any particular. We had never grown a tomato that could compare with it in size, weight, solidity, meatiness and splendid flavor.

CULTURE.—To make the biggest tomatoes and the largest yield, train to a single stem, tie the vines up to strong 5-foot stakes; this gives ample room for development, plenty of sunlight, holds them off the ground and enables the vines to continue to yield a constant supply of massive luscious fruits right up to frost.

Size and Weight

Some idea of the size and weight to which this splendid tomato grows may be had from reading the few letters below. These letters are samples of hundreds we have received telling of single fruits grown weighing from 12 ounces to 3 pounds and from 15 to 18 inches in circumference.

Solid and Meaty

We had supposed that in our specially selected strain of Ponderosa the limit in solidity and meatiness had been reached. The Brimmer is practically all meat, has fewer seeds than any tomato we have ever grown, and it is one of the very few tomatoes that is **absolutely without a core**. The flavor is mild, delicate and free from the acidity found in many other tomatoes.

Productiveness

The Brimmer is not an early tomato, but the enormous size and remarkable yield more than make up for any want of earliness. The vines are vigorous, luxuriant and healthy and bear a tremendous load of fruit right up to frost, the fruits holding their size till the end of the season. On October 1st, after picking since July 5th, a crop near Richmond still had 6 to 8 quarts of large fruits to the vine.

Quality

This is the point we wish to emphasize particularly, the Brimmer's strongest points being its delicious quality and flavor. The well shaped, perfectly formed, solid, bright red fruits make a most tempting dish when sliced, but they must be eaten to be fully appreciated. Many who have never been able to enjoy tomatoes because of their acidity can eat the Brimmer with impunity.

For Canning

There is only one single objection that can be raised—they are too large for the cans generally used. However, there are always enough smaller fruits to supply what is to be canned for home use.

Price: Pkt. 15 cts.; ¼ oz. 35 cts.; ½ oz. 60 cts.; oz. \$1.00.

BRIMMER PLANTS

—Ready April, May, June, and July. **Hot-bed** plants, 30 cts. per doz.; 50 for 65 cts.; \$1.00 per 100 postpaid. By express, 25 cts. per doz.; 50 for 50 cts.; 85 cts. per 100. Transplanted plants, 40 cts. per doz.; 50 for \$1.00; \$1.75 per 100 postpaid. By express, 35 cts. per doz.; 50 for 90 cts.; \$1.60 per 100.

Wood's Improved Ponderosa

(Deep Purple.)

Wood's Improved Ponderosa Tomato.

In selecting our improved strain of Ponderosa we have aimed to eliminate its tendency toward roughness and yet retain the many fine qualities that made this variety famous. We have improved it wonderfully, and the stock we offer is much smoother and better than is generally sold. With the exception of our famous Brimmer, it is undoubtedly the largest, meatiest and finest flavored tomato in cultivation. The plants are healthy and luxuriant, free from blight, and prodigious and continuous bearers. They seem independent of droughts—during an unprecedented dry spell a few years ago, without once watering the plants, we had tomatoes weighing a pound and over, almost all solid meat, of the most delicious flavor. Pkt. 10 cts. ¼ oz. 25 cts.; oz. 40 cts.; ¼ lb. \$1.25; lb. \$4.10 postpaid. By express, \$4.00 per lb.

Fordhook First (Deep Purple).—A favorite with many growers. Quite early and makes smooth, handsome, deep-purple fruits, with firm flesh, and but few seed. Ripens evenly to stem, of fine flavor; an excellent kind for the market and the home garden. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.35 postpaid. By express, \$3.25 per lb.

Wood's Improved Beauty (Purple).

—If in doubt about what tomato to grow, you will make no mistake in planting our improved strain of Beauty. It comes early and always pleases. Always smooth and large, of perfect form and quality. Borne in clusters of 4 to 6 large fruits, retaining its splendid size to the end of the season. Ripens early; flesh very firm; and seldom cracks after a rain. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.10 postpaid. By express, \$3.00 per lb.

Livingston's Coreless.

Livingston's Coreless

(Bright Red).—Almost round, the depression at the stem being almost eliminated. It is immensely productive, clusters of 4 to 7 fruits are produced 6 to 8 inches apart along the stem. All the fruits are of good size, many of them large—12 to 15 ounces—and all free of core. It makes a fine slicing tomato, the bright red, meaty slices presenting a most attractive dish. Solid and very firm; ripens all over and right up to the stem at the same time. Pkt. 5 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

Success (Scarlet).—A variety of very decided merit, producing beautiful fruits of the finest quality, handsome appearance, and large size. Vines strong and vigorous, with abundant foliage; fruits smooth and free from cracks; unusually meaty and ripens evenly throughout. Makes uniformly large-sized tomatoes of handsome color and great solidity. It is very well adapted both for private use and for market. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.60 postpaid. By express, \$3.50 per lb.

Dwarf Champion.

Dwarf Champion (Purplish Pink).—Sometimes called the Tree Tomato. Especially desirable for small gardens, as they may be grown as close as three feet. The vines are stiff and upright, holding the fruits well off the ground. Smooth and attractive, firm, solid, with thick flesh and meaty center. Bears in clusters of 3 to 5 good-sized fruits

Stone.

and continues in bearing till frost. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.60 postpaid. By express, per lb. \$3.50.

Stone (Bright Scarlet).—One of the heaviest and most solid of the large tomatoes of good quality. Fine for main crop and deservedly one of the most popular tomatoes for home use, canning and the market. Is of large size, bright scarlet color, and withstands rot and blight. It makes most attractive and salable fruits, firm and uniform. Pkt.

5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.10 postpaid. By express, lb. \$3.00; 5 lbs. and over, \$2.90.

Yellow Plum—A fine preserving tomato; makes small, uniform sized fruits of delicate flavor as a preserve. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.10 postpaid. By express, \$3.00 per lb.

Tomato Plants Ready after April 15th. Bonnie Best, Earli-ana, June Pink, Beauty, Acme, Stone and Ponderosa. As it is not possible always to have all varieties at the right size, we reserve the right to send another variety. We will of course send a variety as near as possible to the kind ordered.

Hot-bed plants, 15 cts. per doz.; 50 for 40 cts.; 65 cts. per 100 postpaid. By express 10 cts. per doz.; 50 for 30 cts.; 50 cts. per 100; \$2.00 per 1,000.

Transplanted plants, 20 cts. per doz.; 50 for 65 cts.; \$1.15 per 100 postpaid. By express, 15 cts. per doz.; 50 for 60 cts.; \$1.00 per 100; \$3.00 per 1,000.

Brimmer Tomato Plants—See page 41 for prices.

Perfection.

Perfection

(Bright Red).—A handsome early, perfectly smooth tomato of excellent quality. The skin is tough, the fruits solid; fine for market and home use, also a good canner. It ripens ten days earlier than Stone and holds its good size till the end of the season. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.10 postpaid. By express, \$3.00 lb.

Favorite (Dark Red).—Very prolific, solid and ripens early and evenly; smooth, free from cracks; holds its size till end of season and of first-class quality. Fine canner. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.10 postpaid. By express, \$3.00 per lb.

Favorite.

Paragon (Bright Red).—Smooth as an apple; good size, solid and a good bearer. Fine for family use, market or canning. Pkt. 5 cts.; oz. 25 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.10 postpaid. By express, \$3.00 per lb.

Royal Red (Deed Red).—First class main crop tomato, each year becoming more and more popular, especially among canners. Fruits are large, nearly round, deep red, ripen up evenly to the stem, and are produced very abundantly. Very desirable for canning, market and home use. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.35 postpaid. By express, \$3.25 per lb.; 5 lbs. and over \$3.15 per lb.

Matchless.

Matchless (Bright Red).—One of the best main-crop tomatoes. The solidity, absence of core, size and color of fruit, together with its freedom from rot, all unite in making this well worthy of the name of "Matchless." Always large, even at the end of the season. Fine both for private and market-garden and canning. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 90 cts.; lb. \$3.35 postpaid. By express, \$3.25 per lb.

Turnip and Rutabaga

CULTURE.—Spring sowings should be made as early as possible, so that the turnips may make their size before hot weather, otherwise they will become tough and bitter. For spring sowings there is nothing equal to the Milans, the Purple Top Globes, Purple Top Strapleaved, Early Strapleaved White Globe and White Flat Dutch. For the regular crop, sow the early kinds in July and August, the later sorts during August, and the salad varieties during August or September. Sow either broadcast or in drills 2 feet apart, and when well up, thin out to prevent overcrowding. Rutabagas should be sown in July or early in August and earthed up as they grow.

To Keep for Winter: Store the roots in a cool cellar and cover with sand, or they may be put into pits or kilns outside. Select a well-drained situation on which to pile the turnips, cover them with a few inches of straw and then sufficient earth to keep out frost. Thus protected, they will keep far into the winter.

One ounce sows 100 feet of drill; 1½ lbs. sows one acre in drills; 2 lbs. one acre broadcast; sow salad varieties 3 lbs. to acre.

WHITE FLESHED VARIETIES

Extra
Early
Milan
Turnip.

Milan Turnips—The Milans are, without exception, the best for spring sowing; they leave nothing to be desired in the way of an extra early garden turnip. They are the earliest varieties grown, at least a week earlier than any other; have small tops, so that the rows can be planted close together. The flesh is clear ivory white; the skin is perfectly smooth. They are without an equal for the table, being of the most delicate flavor. Medium size, flat shape.

EXTRA EARLY PURPLE-TOP MILAN.

—The earliest of all turnips.

The roots are clean, smooth, flat and handsome. The flesh is pure white, tender and sweet. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

EXTRA EARLY WHITE MILAN.—Similar to the above, except that it is white all over. Pkt. 5 cts.; oz. 25 cts. postpaid.

Wood's Improved Red Top White Globe—An improved strain grown from roots selected for size, shape, quality and small tops. Very popular for market and home use, also for stock. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 55 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

Mammoth Red Top White Globe—Makes large globe-shaped roots, white with purple tops. A big yielder; fine for table, market and stock feeding. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid. By express, lb. \$1.75.

Early Strapleaved White Globe

—The earliest white globe variety. Similar to Red Top White Globe, except that it is pure white. Quality and flavor excellent. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.35 postpaid. By express, lb. \$1.25.

EARLY RED, or PURPLE-TOP (Strapleaved).—Flat; white with purple top; fine-grained and tender. The most popular of all varieties and the best seller. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

EARLY WHITE FLAT DUTCH.—Exactly like Early Red or Purple Top, except that it is pure white. One of the best for the family garden; sweet and tender. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

WHITE SWEET GERMAN.—Fine for table and stock; flesh hard, firm and sweet; a good keeper. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

Early
Strapleaved
White Globe.

LONG WHITE COWHORN.—A very productive quick-growing turnip of excellent quality, fine-grained and very sweet. Often used as a soil improver. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts. postpaid.

WHITE EGG.—A quick-growing, egg-shaped, smooth, pure white variety with small tops. Flesh sweet, firm and mild. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.85 postpaid. By express, lb. \$1.75.

LARGE WHITE NORFOLK GLOBE.—Makes large, round white roots, excellent for table or stock; also quite largely used for winter salad. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, lb. \$1.50.

POMERANIAN WHITE GLOBE.—Extra large, round, white; fine for table and stock; a big yielder. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, lb. \$1.50.

LARGE WHITE GLOBE.—One of the biggest yielders; solid and firm. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, lb. \$1.50.

SOUTHERN SNOW WHITE GLOBE.—A very superior large white, round turnip. Flesh firm and solid. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

MIXED TURNIPS.—Early varieties for spring sowing mixed. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

YELLOW FLESHED VARIETIES

LARGE AMBER, or YELLOW GLOBE.—Of large size, globe-shaped, solid yellow flesh. Fine for table and stock; a fine keeper. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

Large Amber, or
Yellow Globe.

PURPLE-TOP YELLOW ABERDEEN.

—A splendid keeper. Flesh is yellow, very solid, tender, sweet. Hardy and a good yielder; fine stock turnip. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

GOLDEN BALL, or CRANGE JELLY.

One of the sweetest and best yellow turnips; hardy; flesh is firm

and of most excellent flavor. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

SALAD VARIETIES

SOUTHERN PRIZE, or DIXIE.—Makes white turnips in addition to salad; hardy and needs no protection; the most popular turnip grown for winter and spring salad. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 55 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

SEVEN TOP.—A very hardy variety, grown exclusively for salad. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 55 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

RUTABAGA or SWEDE

Culture.—Sow in July, or early in August, in drills; thin out and keep clear of weeds. See under head of turnip culture for directions for storing for winter.

Wood's Improved Purple-Top Yellow—An improved strain of the finest yellow-fleshed rutabaga grown from roots selected for large size, uniformity in shape and fine quality. Hardy, sweet, a good keeper and the best shaped and most productive. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 65 cts.; lb. \$2.35 postpaid. By express, lb. \$2.25.

PURPLE-TOP YELLOW.—The old standard variety; largely grown for table and stock. A large yielder; good keeper; hardy, sweet and solid. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 55 cts.; lb. \$2.10 postpaid. By express, lb. \$2.00.

LARGE WHITE, or RUSSIAN.—The flesh is white, firm and sweet, grows large; fine for table and stock. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

BREADSTONE, or BUDLONG.—Makes handsome medium-sized roots of superior table quality. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid. By express, lb. \$1.40.

HERBS

Culture.—Soll for herbs should be carefully prepared and well cultivated, as the plants are, for the most part, delicate and easily choked out by weeds. Sow early in the spring, in drills 16 to 18 inches apart and transplant as soon as the plants are large enough.

TO PRESERVE HERBS, the plants should be cut when in bloom and wilted in the sun and thoroughly dried in the shade, and then kept in jars or bottles in order to preserve their seasoning and medicinal qualities.

ANISE.—An annual, cultivated principally for its seeds, which have a pleasant taste and smell. The leaves are also used for seasoning, garnishing and medicinal purposes. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.

BALM.—A perennial, easily propagated by division of the roots or from seed. The leaf has a fragrant odor, somewhat similar to lemons, and is used for making balm tea for use in fevers, and a pleasant beverage called "balm wine." Pkt. 5 cts.; oz. 35 cts.

SWEET BASIL.—A hardy annual from East Indies. The stems have a flavor somewhat similar to that of cloves, and it is used for flavoring soups and stews. Pkt. 5 cts.; oz. 20 cts.

BENE.—The leaves put into a tumbler of water makes a drink beneficial in case of diarrhoea. Pkt. 5 cts.; oz. 15 cts.

BORAGE.—A hardy annual, used as a pot herb, also for bee pasturage. The bruised leaves immersed in water give an agreeable flavor. Pkt. 5 cts.; oz. 20 cts.

CARAWAY.—Cultivated for its seeds, which are used in confectionery, cakes, etc. The leaves are sometimes used in soups. Can be sown either in the spring or fall, but fall is the best, as the plants will give a large yield of seed the following season. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.

CATNIP, or CATMINT.—A hardy perennial, well known as a valuable mild nerve for infants. Can be sown either in the fall or spring, in drills 10 inches apart. Pkt. 10 cts.; oz. 50 cts.

CORIANDER.—A hardy annual, cultivated for its seed, which has an agreeable taste and is used in confectionery and to disguise the taste of medicine. Gather on a dry day, bruising the stems and leaves as little as possible, for when injured they have a disagreeable odor which they impart to the seed. Pkt. 5 cts.; oz. 10 cts.

DILL.—An annual, cultivated for its seed, which has an aromatic odor and a warm pungent taste. It is used for flavoring soups, stews and pickles, being particularly desirable for use in cucumber pickles, as it heightens the flavor. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.10 postpaid. By express, \$2.00 per lb.

SWEET FENNEL.—A hardy perennial. Leaves are used in soups, fish sauces, garnishes and salads. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40 cts.

HOREHOUND.—A perennial herb used in making cough syrups and lozenges. Pkt. 5 cts.; oz. 30 cts.

LAVENDER.—A hardy perennial, used to make lavender water or dried and used as a perfume for linen, etc. Should be picked before it comes dry. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.

SWEET MARJORAM.—A perennial, the tender tops of which are used green for flavoring, but they may be cut and dried for winter use. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. 90 cts.

ROSEMARY.—A hardy perennial for flavoring meats and soups and for medicinal purposes. Pkt. 10 cts.; oz. 50 cts.

RUE.—A hardy perennial, thriving on poor soil. Used medicinally and for roup in fowls. Pkt. 5 cts.; oz. 30 cts.

SAGE.—One of the most popular perennial herbs, possessing some medicinal properties, but used principally for flavoring and stuffing. Cut the leaves and tender shoots just before the plant is coming into flower, and dry quickly in the shade. The plants will survive the winter and may be divided, when they will grow off and produce a second crop of superior quality. Pkt. 5 cts.; oz. 25 cts.; ¼ lb. 75 cts.; lb. \$2.60 postpaid. By express, \$2.50 per lb.

SUMMER SAVORY.—A hardy annual. The dried stems, leaves and flowers are fine for flavoring dressings and soups. Pkt. 5 cts.; oz. 30 cts.; ¼ lb. \$1.00.

TANSY.—For making bitters. Pkt. 10 cts.; oz. 60 cts.

THYME.—A perennial, used both medicinally and for culinary purposes. The young leaves and tips are used for soups, stuffing and sauce, and a tea for nervous headache is made from the leaves. Sow early in the spring. Pkt. 10 cts.; oz. 50 cts.; ¼ lb. \$1.75.

WORMWOOD.—Tops and leaves, gathered and dried in July and August, when the plant is in flower, are used for aromatic and tonic purposes, and as a worm medicine; also kept in vinegar to apply to ulcers, sprains and bruises. Pkt. 5 cts.; oz. 30 cts.

When you entrust your order with us you get the **BEST SEEDS THAT GROW**, not only because you are entitled to them, but because we want to do business with you next season and for many seasons.

Vegetable Plants and Roots

In their proper seasons, we shall have large quantities of all the plants listed below, well grown and stocky and all grown from the very best seeds. Purchasers may rely upon having their orders filled the day after received, the weather permitting. They will be carefully packed and will carry long distances. **Plants by mail at purchaser's risk.** No charge for packing, etc. To avoid lying over in express or post office on Sunday, no plants will be shipped late in the week unless specially ordered. Should we be sold out of the variety of plant ordered, we will send a nearly similar kind instead. **Special prices on 5,000 or more plants.**

EARLY CABBAGE PLANTS.—Wakefield, Early Flat Dutch and Early Summer. Ready January, February, March and April. 40 cts. per 100 postpaid. By express, 30 cts. per 100; \$2.50 per 1,000.

EARLY CABBAGE PLANTS for Fall Setting.—Jersey and Charleston Wakefield. Ready in October and November. 35 cts. per 100, postpaid. By express, 25 cts. per 100; \$2.00 per 1,000.

LATE CABBAGE PLANTS.—Late Flat Dutch and Late Drumhead. Ready June, July, August and September. 35 cts. per 100, postpaid. By express, 25 cts. per 100; \$2.00 per 1,000.

BRIMMER TOMATO PLANTS.—See page 41 for prices.

HOT-BED TOMATO PLANTS.—Bonnie Best, Earliana, June Pink, Beauty, Acme, Stone and Ponderosa. Ready April, May, June and July. 15 cts. per doz.; 50 for 40 cts.; 65 cts. per 100, postpaid. By express, 10 cts. per doz.; 50 for 30 cts.; 50 cts. per 100; \$4.00 per 1,000.

TRANSPLANTED TOMATO PLANTS.—See Hot-Bed Plants for varieties. 20 cts. per doz.; 50 for 65 cts.; \$1.15 cts. per 100, postpaid. By express, 15 cts. per doz.; 50 for 60 cts.; \$1.00 per 100; \$3.00 per 1,000.

CAULIFLOWER PLANTS.—Ready January, February, March, July and August. 85 cts. per 100, postpaid. By express 75 cts. per 100; \$6.00 per 1,000.

LETTUCE PLANTS.—Wood's Cabbage and Big Boston. Ready February, March, April, September, October and November. 35 cts. per 100, postpaid. By express, 25 cts. per 100; \$2.00 per 1,000.

CELERY PLANTS.—Pascal, Golden Heart, Winter Queen and White Plume. Ready June, July and August. 50 cts. per 100, postpaid. By express, 35 cts. per 100; \$3.00 per 1,000.

EGG PLANTS.—Ready May, June and July. 25 cts. per doz.; \$1.15 per 100, postpaid. By express, 20 cts. per doz.; \$1.00 per 100; \$3.00 per 1,000.

PEPPER PLANTS.—Ruby King, Bull Nose and Cayenne. Ready May and June. 20 cts. per doz.; 90 cts. per 100, postpaid. By express, 15 cts. per doz.; 75 cts. per 100; \$6.00 per 1,000.

SWEET POTATO PLANTS.—Ready May and June. 35 cts. per 100, postpaid. By express 25 cts. per 100; \$2.00 per 1,000.

ASPARAGUS ROOTS (2 years old).—Palmetto, \$1.25 per 100, postpaid. By express, 90 cts. per 100; \$4.50 per 1,000. Conover's Colossal, \$1.10 per 100, postpaid. By express, 75 cts. per 100; \$4.00 per 1,000.

RHUBARB ROOTS.—Ready November 1st, till May. 15 cts. each; \$1.50 per dozen, postpaid. By express 10 cts. each; \$1.00 per dozen; \$6.00 per 100.

HORSE RADISH ROOTS.—Ready November 1st, till May. 25 cts. per doz.; 50 for 50 cts.; 75 cts. for 100, postpaid. By express, 20 cts. per doz.; 60 cts. per 100; 500 for \$2.25; \$4.00 per 1,000.

SAGE ROOTS.—20 cts. each, postpaid. By express 15 cts. each; \$1.00 per dozen.

THYME ROOTS.—20 cts. each, postpaid. By express 15 cts. each; \$1.00 per dozen.

BIRD SEEDS

Safeguard the health of your birds by feeding only well cleaned seeds. We use only the highest grade seeds in our "Songster's Food," such as will keep your birds in perfect condition.

WOOD'S SONGSTERS FOOD.—The highest grade of mixed bird seeds in the proper proportions. Each package contains a piece of cuttle fish bone. Lb. 18 cts.; 5 lbs. for 70 cts.; 10 lbs. for \$1.25 postpaid. By express lb. 12 cts.; 10 lbs. for \$1.00.

CANARY SEED.—Lb. 20 cts.; 5 lbs. for 70 cts. postpaid. By express, lb. 12 cts.; 10 lbs. for \$1.00.

HEMP SEED.—Lb. 18 cts.; 5 lbs. for 65 cts. postpaid. By express, lb. 10 cts.; 10 lbs. for 90 cts.

RAPE.—Lb. 30 cts.; 5 lbs. for \$1.00 postpaid. By express, lb. 20 cts.; 5 lbs. for 90 cts.; 10 lbs. for \$1.60.

IMPORTED MULLET.—Lb. 18 cts.; 5 lbs. for 55 cts. postpaid. By express, lb. 10 cts.; 5 lbs. for 40 cts.; \$6.00 per 100 lbs.

SUNFLOWER.—Lb. 20 cts.; 5 lbs. for 65 cts.; 10 lbs. for \$1.15 postpaid. By express, lb. 12 cts.; 5 lbs. for 50 cts.; 10 lbs. for 90 cts.; \$3.00 per 100 lbs.

PARROT MIXTURE.—Lb. 18 cts.; 5 lbs. for 60 cts. postpaid. By express, lb. 10 cts.; 10 lbs. for 85 cts.

CUTTLE FISH BONE.—Lb. 75 cts. postpaid. By express, lb. 65c.

HIGH-GRADE TOBACCO SEED

ONE OUNCE WILL SOW 50 SQUARE YARDS

CULTURE.—A very clean piece of land is best for the tobacco plant beds, hence it is customary to burn a piece of land in the woods for same. This destroys grass, weeds and insects, adds fertility through the action of the wood ashes, and leaves the ground in good order. The seeds are sown about February and protected by plant-bed cloth to keep off tobacco flies. When large enough and weather is settled (about June), set the plants out in highly manured or fertilized soil in $3\frac{1}{2}$ foot rows, 3 feet between the plants. Constant care must be given, cultivating, suckering, worming, etc. Methods of curing differ according to the variety and color, whether to be sun or flue-cured, etc.

For Cigarettes the following are preferred: Narrow Leaf Oronoko, Improved Gold Leaf, Adcock, Conqueror, Warne, Improved White Stem Oronoko, Improved Long Leaf Gooch, Improved Yellow Oronoko, Granville County Yellow, Improved Hester, Hyco and Bradley Broad Leaf.

A Field of Tobacco Grown from Wood's Seeds

Select Varieties

Each Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50 postpaid.

Narrow Leaf Oronoko or **Caroline Sun-Cured.** Especially adapted for sun-cured wrappers and plug fillers, for which purposes it cures a light even brown color. When flue-cured it makes a fine bright plug wrapper and cigarette cutter. Grown on strong land and topped low, it makes a fine heavy export leaf. The leaf is long and of medium width. Adapted to a wide range of soils from light sandy to heavy clay.

Adcock —One of the best tobaccos for poor land. The leaf, though not long, is broad for its length; they are set well apart on the stalk, exposing a greater surface to the sun, resulting in a more uniform ripening and more even crop. Best adapted to light gray or sandy soils; makes fine cigarette cutters and smokers; cures bright.

Improved Gold Leaf —A splendid combination of size, weight and quality. The leaf is long, broad, very similar to Warne, but of finer texture and less inclined to have green shoulders. It has been thoroughly tried out by both growers and manufacturers and has stood every test and proved one of the best of the bright tobaccos.

Warne —Has no superior for bright wrappers. The leaf is large, of good breadth, tough and silky.

White Burley.—The best filler tobacco known, on account of its absorbing qualities. Has long, wide leaf, very porous, makes bright reds; fine for plug fillers and wrappers. Best adapted to limestone soils.

Improved Yellow Oronoko.—For yellow wrappers, cutters and smokers. Cures easily a bright color, or can be cured for dark filler. It has good width and fine length of leaf. Does best on light gray overlying yellow clay.

Improved White Stem Oronoko.—Fine for wrappers, cutters and smokers. Makes a bright leaf of good width and length. Best adapted to light gray or sandy soils.

Improved Hester.—For wrappers, cutters, fillers or cigars. It has a fairly long leaf of medium width, and cures bright. Adapts itself over a wider range of soils and climates than any other variety. Best adapted to gray or sandy soils overlying yellow clay, or to chocolate soils.

Improved Long-Leaf Gooch.—For cutters and wrappers. Has a long, tapering leaf of fine texture, and makes fine bright tobacco. Succeeds on light or sandy soils.

Kentucky Yellow.—A fine, large, broad-leaved tobacco for strips, dark wrappers and fillers. Best suited to chocolate, alluvial and rich red clay soils, producing heavier than any other sorts.

Conqueror.—One of the best bright tobaccos for wrappers and cutters. Of a beautiful oval shape. Best suited to gray or sandy soils overlying yellow clay.

Cigar Varieties

Imported Havana.—We import this direct from Cuba, where the finest cigar tobacco in the world is grown. Pkt. 10c; oz. 60c.

Vuelta De Abajo.—The finest, silkiest and highest flavored Havana tobacco grown. To produce it to perfection the land must be rich and comparatively fresh. Pkt. 10 cts.; oz. 60 cts.

Choice Havana.—An Americanized Havana, used for cigar purposes, although sometimes used as a manufacturing sort. Has a very large, long, fine quality leaf; very early, making two crops a season in some sections. Best adapted to chocolate or rich gray soils. Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50.

Connecticut Seed Leaf.—Our seed is Connecticut grown; a stocky plant; leaves not very long, but of good width; suitable for cigar fillers. Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.00.

Sumatra.—Makes the highest grade cigar wrapper. Our seed is a most superior type. Pkt. 10 cts.; oz. 60 cts.

We can also supply the following well-known varieties:

Hyco, Flanagan, Virginia Sun-Cured, Bradley Broad-Leaf, Lizard Tail, Willow Leaf, Famous, Deer Tongue, Tuckahoe, Tilley, Hickory Pryor and Missouri Broad-Leaf. Prices: Pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.00.

Persion Rose, Granville County Yellow, Cuban Seed-Leaf and Yellow-Mammoth. Prices: Pkt. 10 cts.; oz. 35 cts.; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50.

Little Giant Duster

—An ideal appliance for the tobacco grower. By turning the handle a fan is rapidly revolved, distributing insecticides uniformly over two rows at once, to all parts of the plant, and on both sides of the leaf. Distributes any dry powder like Paris Green, Dry Arsenate of Lead and Slug Shot to perfection and as fast as you walk. Keeps the poison at a safe distance from the operator. Price, \$7.50.

Standard Varieties

Each pkt. 5 cts.; oz. 30 cts.; $\frac{1}{4}$ lb. 85 cts.; lb. \$3.00 postpaid.

One Sucker.—A dark manufacturing sort, of good breadth, long leaf, and rich quality. Best suited to alluvial, chocolate and rich red clay soils.

Big Oronoko.—A very large and heavy variety for fillers and strips. Makes a wide, long leaf of dark color. Cures well and has unusual weight and body. Best adapted to rich alluvial and red clay soils.

Sweet, or Little Oronoko.—Makes the finest fillers and the best natural chewing leaf. Cures a rich red; long and narrow leaf; tough and waxy. Best adapted to rich red and gray soils. Fine for sun-curing.

Blue Pryor.—A large, long and broad leaf. Makes a rich, waxy tobacco for black wrappers, strips and fillers, and a rich export tobacco; best adapted for rich alluvial soils.

Yellow Pryor.—Makes a fine wrapper, cutter, filler or smoker, and on rich red land will make a mahogany of the finest quality and almost as dark and heavy as Blue Pryor. Adapted to gray land with red subsoil.

Medley Pryor.—A very rich, heavy tobacco, and suitable for the same soils and purposes as Blue Pryor.

Beat All, or Lacks.—A heavy, dark type and makes a splendid mahogany. Large, long and of good texture for dark wrappers and fillers. Best suited to gray soil with red subsoil, or to red clay lands.

Broad Leaf Gooch.—A heavier sort than Long Leaf Gooch. Makes good mahogany wrappers, as well as bright grades. Best suited to gray or sandy soils.

Wood's Lawn Grass Seeds

FOR SPRING SOWING, Lawn Grass should be sown as early as possible, although with seasonable weather conditions it can be sown as late as the end of March or early in April. The earlier the seed is sown, the better.

WOOD'S LAWN GRASS SEEDS are combinations of grasses best adapted to give a succession of green verdure throughout the year. They are put up from the highest grade new crop seeds, of tested germination, and under favorable seeding and weather conditions the very best results can be anticipated. We have received the most enthusiastic reports from our customers of their experience with our Lawn Grass Seed.

For a beautiful velvety lawn, where proper care and attention can be given during the year, WOOD'S EVERGREEN LAWN GRASS is the best that can be used.

For parks and large lawns, where it is desired to use the grass for permanent pasturage also, WOOD'S PERMANENT LAWN GRASS will give excellent results.

Preparation of Soil for Lawns

Thorough preparation is very necessary in order to secure a successful lawn. The ground must be rich, or must be made so, to start with, and it should have a liberal application of Wood's Lawn Enricher which should be well mixed with the soil. The ground should be deeply dug, and all roots, stones, etc., removed and the soil raked as smooth and level as possible.

Sowing the Seeds

Thick seeding always gives best results. Lawn grass seed should be sown after the soil is raked fine, at the rate of 60 to 75 lbs. to the acre, or for small yards, one quart for every three hundred square feet (12x25). The seed should be carefully and evenly sown, and lightly raked in, and afterwards, provided the soil is not wet, rolled or made firm by batting down with the back of a spade.

Wood's Evergreen Lawn Grass makes a beautiful velvety green lawn.

WOOD'S EVERGREEN LAWN GRASS

There is no question that our Evergreen Lawn Grass is the best, most satisfactory of lawn grasses, where proper care and attention can be given. We have made careful experiments as to the combinations for best results, and the many letters that we get from our customers, telling of the satisfactory results from the use of our Lawn Grass Seed, is the best evidence as to its desirability and value for sowing for lawn purposes.

Wood's Evergreen Lawn Grass will form a rich, deep green, velvety lawn in a few weeks' time. It is composed of various grasses that grow and flourish during different months of the year, so that with proper care and attention, a beautiful green lawn can be had all the year round.

Sow at the rate of 60 to 75 pounds per acre, or for small yards one quart to 300 square feet.

Prices, qt. 40 cts.; 2 qts. 75 cts.; 5 lbs. \$1.65 postpaid. By express, qt. 30 cts. 5 lbs. \$1.50; bushel (20 lbs.) \$5.00.

Wood's Drought-Resisting Lawn Mixture

This mixture is specially put up to resist extremes of heat and drought, which are so often experienced in the Southern States. It will also succeed and do well on light or sandy soils, where other lawn mixtures do not succeed. Careful experimenting has convinced us that this mixture will give most satisfactory results, both as a summer and a winter lawn grass, but especially to stand the hot dry spells in summer, which usually cause lawns to become brown and bare. In addition to other grasses this mixture contains Bermuda or Wire Grass, which is one of the best of summer lawn grasses. Our other lawn mixtures, however, do not contain this grass, unless it is especially ordered. Sow at the rate of 1 lb. to 400 square feet, or 35 to 40 lbs. per acre. 1 lb. 40 cts. (1 lb. postpaid 50 cts.); 10 lb. lots and over 35 cts. per lb.; 100 lb. lots and over, 30 cts. per lb.

Shady Park Lawn Grass

A special mixture of grasses adapted for shady situations. Per lb. 40 cts. (1 lb. postpaid 50 cts.); 10-lb. lots and over, 35 cts. lb. 100-lb. lots and over, 32 cts. lb.

WOOD'S PERMANENT LAWN GRASS

This mixture is composed of robust-growing grasses, and is designed to supply a satisfactory mixture for parks or large places where lawn and grazing are to be combined, or where special care and attention cannot be given to the lawn. This mixture will stand more adverse conditions of dry or hot weather than the finer lawn grasses. Sow at the rate of 40 to 50 pounds per acre. By mail, postpaid, 40 cts. per lb. By express, per lb., 30 cts.; 5 lbs. for \$1.25 (if by mail \$1.50); per bushel of 20 lbs., \$4.50.

Wood's Lawn Enricher

A splendid fertilizer to keep lawns vigorous and in a green, growing condition all through the year. One of the principal drawbacks in obtaining and keeping satisfactory lawns is the fact that the nutriment gets exhausted from the surface soil, thus impoverishing the roots of the grass and causing it to die. An application of Lawn Enricher in the spring and fall will help the grass wonderfully. It is also a good plan to apply it during rainy spells in the summer. The Lawn Enricher is practically odorless, and composed of fertilizing ingredients which, from practical experience, have given the very best results, not only to invigorate the lawn, but to conserve the moisture in the soil, so as to make the grass stand hot, dry weather better. The Lawn Enricher is a complete lawn and grass fertilizer, and the best that can be used both for top dressing and when putting down new lawns.

Directions for Using.—In applying this fertilizer scatter as evenly as possible over the surface. It can be applied to lawns at any time except during droughts, but the best results can be obtained by using it during the early spring and months of September and October. For making new lawns it should be applied at the rate of 25 lbs. for 1,200 square feet, or at the rate of 800 lbs. per acre. As a top-dressing for old lawns, use from 400 to 500 lbs. per acre, or for small yards, 6 lbs. to each 300 square feet. Price, 5-lb. bag, 40 cts.; 10-lb. bag, 60 cts.; 25-lb. bag, 90 cts.; 100-lb. bag, \$3.00; ton, \$50.00. Half ton at ton rate.

Insecticides, Sprayers and Tools

Poisons cannot
be sent by mail

Lime-Sulphur (For San Jose Scale.)—The most effective remedy for San Jose Scale, oyster shell scale and kindred insects that are killing valuable fruit and shade trees. You can make it yourself if you have the proper appliances, but it is a thoroughly disagreeable task. The home-made mixture requires the boiling of a great quantity of water and it must be applied hot—ours is simply diluted and applied cold. Our mixture retains its strength indefinitely and does not crystallize if kept from air and freezing; is far easier to handle, and is always ready. It gives the fruit and foliage added color and smooth skin. **For Fall and Spring Spraying:** after the leaves have fallen and before freezing weather comes on and just before the buds begin to swell, use 1 gallon concentrated Lime-Sulphur to 8 gallons of water. **For Summer Spraying:** use 1½ gallons Lime-Sulphur, 2 lbs. Arsenate of Lead and 50 gallons water. Apply this mixture after the blossoms have fallen and again when the second brood of codling moth appears. The above mixtures are for apple, pear and similar hardy fruits. **For peach, plum, cherry and less hardy fruits,** use the strength recommended for fall and spring spraying, except that after the bud and leaf clusters have reached a good size, when a mixture of ½ gallon Lime-Sulphur, 2 lbs. Arsenate of Lead and 50 gallons of water should be applied at intervals up to a month of ripening, when the Arsenate of Lead should be omitted. **Qt. 30 cts.; 2 qts. 50 cts.; gallon 80 cts.; 5 gallons \$2.25; 10 gallons \$3.50; barrel \$12.00.**

Soluble Oil—Severe cases of scale, leaf-roller and peach lecanium that resist the action of lime-sulphur can easily be controlled by soluble oil. It is particularly good for hedges and trees on the lawn, as it does not stain. Add one gallon soluble oil to 15 gallons of water, stir thoroughly and apply with spray pump while the trees are dormant. **Qt. 35 cts.; 2 qts. 60 cts.; gallon \$1.00; 5 gals. \$4.00.**

Bordeaux Mixture—This mixture not only prevents blight, scab, rust, mildew, black-rot and all fungus diseases of plants and fruits, but improves the quality and largely increases the yield. It should be used on all vine-crops, grapes, cucumbers, melons, tomatoes, etc. Potatoes especially respond generously to thorough spraying. To make a combined fungicide and insecticide, add a pound of Paris Green, or two pounds of Arsenate of Lead, to 150 gallons of the diluted mixture. Our mixture is ready to use by simply adding water, and works freely in the sprayer without clogging. **One gallon makes 50 gallons of spray mixture. Quart 35 cts.; gallon \$1.00; 5 gallons \$4.50; 10 gallons \$8.25. Barrel lots, write for quotations.**

Copper Sulphate—Blue Stone or Blue Vitriol.—Used for early spraying and in making Bordeaux Mixture. Will keep indefinitely. Special prices quoted on large quantities. **By mail postpaid, lb. 25 cts.; 5 lbs. 95 cts.; 10 lbs. \$1.75. By express, lb. 19 cts.; 10 lb. lots, 16 cts. per lb.; 50 lb. lots, 15 cts. per lb.**

Sulphur—For making Lime-Sulphur Spray, for mildew and plant mites. **By mail postpaid, lb. 18 cts.; 10 lbs. \$1.00. By express, lb. 10 cts.; 10 lbs. 75 cts.; 25 lbs. \$1.65.**

Arsenate of Lead—For Leaf-eating Insects. Sticks to the leaf better than Paris Green and remains longer in suspension; requires fewer applications; does not burn the leaf, thus allowing stronger solutions. White in color and shows just where it has been applied. These advantages make it preferable to Paris Green for destroying leaf-eating insects. Use 1 to 2 lbs. to 50 gallons of water for general spraying. Because the paste form is harder to handle, requires double the strength, does not keep well and is 50 per cent. water, we handle only the **Dry Powdered form**, which has proved in every way far superior and more economical. **½ lb. 30 cts.; 1 lb. 50 cts.; 5-lb. pkg. \$2.25; 25-lb. pkg. \$10.00.**

Paris Green—For Leaf-eating Insects. It is a strong poison and should be used with care. Mix one pound of Paris Green to 50 pounds of plaster, or with water to 150 gallons. On vines and tender vegetables use a larger proportion of plaster or water. **¼ lb. 20 cts.; ½ lb. 35 cts.; 1 lb. 60 cts.; 5 lbs. for \$3.75. Special price on large lots.**

erosene Emulsion—For Sucking Insects. A safe and sure remedy for squash-bugs, plant and bark-lice, San Jose Scale, caterpillars, rose-bugs, green-fly, melon and pea louse, and all sucking insects. Ours is a perfect emulsion and will not separate. It is in concentrated form—add 25 to 50 gallons of water to one gallon of emulsion and it is ready for use. Spray before the blossom buds open and again after the blossoms fall. The second spraying should have Paris Green mixed with it to kill leaf-lice, aphides and insects. **Qt. 40 cts.; 2 qts. 65 cts.; gallon \$1.00; 5 gallons \$4.50.**

Hellebore—For worms, caterpillars, etc. Less poisonous than Paris Green and Arsenate of Lead, and safer to use when vegetables and fruits are nearly ripe. Dissolve 1 oz. to 2 gallons of water. **Lb. 70 cts.**

Slug Shot—Destroys insects and worms on garden and house plants, potatoes, cabbage, shrubs, trees, vegetables and fruits, and kills lice on poultry. Positively not poisonous, and will not injure the foliage. May be applied dry or in water. By mail postpaid, **5 lb. pkg. 56 cts. By express or freight, 40 cts. per 5-lb. pkg.; 50 lbs. \$3.75; 100 lbs. \$7.00. Small dusters for applying, 10 cts.; large dusters, 50 cts.**

Fish Oil Soap (Generally called **Whale Oil Soap**)—Effectually destroys the mealy-bug and nearly all lice on indoor plants and scale on palms. Recommended for San Jose Scale and insects that infest the bark of trees. It has been used with good results against the pea louse. **By mail postpaid, lb. 23 cts.; 5 lbs. 85 cts. By express, lb. 15 cts.; 5 lbs. 65 cts.**

Bug Death—Kills potato, squash and cucumber bugs, tomato, currant and gooseberry worms, and all pests that eat the leaves of vines and plants. May be applied dry, in water or in Bordeaux Mixture. Trials have proved that where used, the yield and quality are greatly improved. **By mail postpaid, lb. 28 cts.; 3-lb. pkg. 57 cts.; 5-lb. pkg. 76 cts.; 12½-lb. pkg. \$1.59. By express or freight, lb. 20 cts.; 3-lb. pkg. 45 cts.; 5-lb. pkg. 60 cts.; 12½-lb. pkg. \$1.25. Use 12½ to 25 pounds per application to the acre. Write for circulars.**

Lemon Oil Insecticide—The best remedy for insects on the roots and leaves of house-plants, destroying green-fly, red spider, scale, mealy bug, mildew, rust, aphids, caterpillar, etc., on palms, roses, rubber plants, ferns, etc. Non-poisonous and odorless. Destroys lice and insects on poultry and animals; recommended for mange. Directions on each can. **By mail postpaid, ½ pt. 37 cts.; pint 60 cts.; qt. \$1.10. By express, ½ pt. 30 cts.; pint 50 cts.; qt. 90 cts.; ½ gal. \$1.50; gallon \$2.50.**

Black Leaf 40 For Sucking Insects.—Kills plant lice on roses, shrubbery, fruits and vegetables. A concentrated solution of nicotine sulphate, guaranteed to contain not less than 40 per cent of nicotine. A solution in the proportion of a teaspoonful to a gallon of water, to which add 4 lbs. soap to each 100 gallons of solution, will kill the garden pea louse and not injure the vine. Mix with 800 times its bulk of water. **1 oz. bottle 25 cts.; ½ lb. 75 cts.; 2 lbs. \$2.50. Cannot be mailed.**

Thy-Cresol—A cold water dip, insecticide, disinfectant, deodorizer, antiseptic and detergent. Rapidly fatal to all insect pests which infest domestic animals, but positively harmless to the skin. Heals eruptions and cuts, and promotes new growth of fine hair and wool. A perfect sheep dip and splendid disinfectant. Invaluable for dog kennels, poultry houses, etc. **Small bottles, 25 cts. postpaid. By express, 20 cts. Large bottles, 45 cts. postpaid. By express, 35 cts. Quart 65 cts.; 2 qts. for \$1.00; gallon \$1.75.**

Sulpho-Tobacco Soap A wonderful insecticide and fertilizer for both flowers and vegetables. Never fails to quickly exterminate all insects. Excellent for preventing mildew and lice on roses; helps to grow healthy plants and beautiful flowers. Absolutely safe to handle. Sure death to all plant insects in and out of doors. Full directions with each cake. **3-oz. cake, 10 cts.; 8-oz. cake 25 cts. postpaid. A 3-oz. cake makes 1½ gals. of solution; an 8-oz. cake makes 4 gals.**

Sterlingworth Fly Driver—A real cattle comfort. A cow that is tormented by insects is never a good milker. Improve the comfort, temper and disposition of your cows, and you will improve the quality of the milk. Sterlingworth Fly Driver is a scientific combination of vegetable oils, which mixes readily with water, does not gum the animal's coat, and may be used on both horses and cattle. Highly concentrated—one quart making two gallons by adding water, bringing the cost to 30 cts. per gallon, as compared with 50 and 60 cts. for other mixtures not nearly so effective. **Per qt. 60 cts.; 2 qts. \$1.00.**

DRUGS AND BLIGHT
HAMMOND'S SLUG SHOT
INSECTICIDE & FUNGICIDE

Compressed Air Sprayer—A self-operating, strong, durable, high-pressure sprayer; easy to carry and easy to work. It will handle water-paint, white-wash, Bordeaux Mixture, Paris Green, Arsenate of Lead and other spraying materials. May be charged by a few strokes of the plunger and two pumpings will usually discharge the entire contents of the tank. Capacity, 3½ gallons; automatic shut off nozzle; valves all metal. Do not use galvanized tank for Bordeaux Mixture and lime-sulphur. **Galvanized Steel Tank, \$5.50; Brass Tank, \$8.00.** 4-foot extension pipe, 60 cts.

Compressed Air Sprayer

ting out fires and various other services. By mail postpaid, \$3.50. By express, \$3.25.
4-foot extension pipe, for reaching into trees and inaccessible places, 50 cts. postpaid. By express, 40 cts.

Hand Sprayer

—Very useful in small gardens, greenhouses, for spraying house plants, poultry houses, etc., applying liquids in a fine mist, with no waste. Distributes Slug Shot, Paris Green and similar dry powders perfectly. By mail, postpaid, 75 cts. By express, 60 cts.

Hand Sprayer.

Continuous Sprayer

Gives a uniform, continuous spray on both up and down stroke of plunger. Will spray fly oils, insecticides and disinfectants as well as regular spraying materials. Spray tube, nozzle, and siphon tube are removable for draining. By mail, postpaid, \$1.15. By express, \$1.00.

Continuous.

Wheelbarrow Spray Pump

—An ideal outfit for large gardens, small orchards, poultry plants, white-washing, applying cold water paint, etc. The pump has 1½ inch brass plunger, brass ball valves, mechanical agitator, lever shut-off, Vermorel nozzle, 8 ft. of hose and 8-ft. extension pipe. The galvanized steel tank holds 12 gals. **Complete, \$18.50.**

Wheelbarrow Spray Pump.

from very fine mist to a solid stream. The pump is brass, practically indestructible and will generate 150 lbs. pressure. By detaching hose from tank and attaching the strainer you have a first-class bucket pump. Fine for applying white-wash, water paint, insecticides and disinfectants.

Knapsack Outfit.—Pump, tank, 3½ ft. of hose, extension pipe and strainer. **\$8.50.**

Bucket Outfit.—Same as the above, but without tank. **\$6.00.**

Auto Spray No. 5

Bucket Spray Pump

—Excepting the foot rest and handle, all parts are made of brass, preventing damage from spraying solutions. The air chamber space is large, insuring an even pressure; the valves are of ample size. Excellent for white-washing and disinfecting stables and poultry houses; for washing windows and buggies; putting out fires and various other services. By mail postpaid, \$3.50. By express, \$3.25.

Bucket Spray Pump

Barrel Spray Pump

—Has bronze ball valve and brass seats; the plunger is brass with hemp packing the cylinder and discharge pipes are brass—these metals are not affected by spray chemicals. The air chamber is 32 inches long insuring a uniform, constant spray. Has good leverage, is powerful and easily operated. It is built so that the entire pump set inside the barrel, the working parts are submerged in the spraying liquid and do not lose priming. It is only necessary to make an 8 x opening in the head of the barrel, bolt in the pump and it is ready for work.

Outfit A.—Pump with mechanical agitator, 15 feet of ½-inch hose, 8-foot extension pipe and nozzle **\$12.50.**

Outfit B.—Pump with mechanical agitator, 2 lead of ½-inch hose (15 feet each), Y connection, 2 8 foot extension pipes and 2 nozzles, **\$15.00.**

Nozzles, Hose, &c.

BORDEAUX NOZZLE.—Throws a solid stream of a fine mist, or may be shut off entirely. 85 cts. each by mail, postpaid, 90 cts.

PAT JET-AGITATOR
Barrel Spray Pump

VERMOREL NOZZLE.—Made with spring degorger for removing obstructions. 85 cts. each; by mail, postpaid, 90 cts.

RUBBER HOSE.—¾-inch (for bucket pump) 15 cts. per foot ½-inch (for barrel, Auto Spray No. 5, compressed air and wheelbarrow sprayers), 18 cts. per foot.

CLAMPS for attaching hose, ¾ and ½ inch sizes, 6 cts. each.

COUPLINGS, male and female, 20 cts. each; by mail, 22 cts.

Little Giant Duster

—Distributes any dry powder, like Dry Arsenate of Lead, Slug Shot and Paris Green, to perfection. Keeps the poison at a safe distance from the operator, and will dust potato vines as fast as the operator can walk.

two rows at a time. The best appliance for tobacco growers by turning a handle a fan is rapidly revolved, distributing the insecticides uniformly on two rows at once, and to all parts of the plant and on both sides of the leaf.

Price, \$7.50.

Asparagus Buncher

—Adjustable to size of bunch and length of stalk. Makes bunches 4 to 5½ inches in diameter, 8 to 12 inches long. By mail postpaid, \$2.45. By express, \$2.25.

Asparagus Knife 15 inches long; the blade 1½ inches wide. By mail, postpaid, 35 cts.; \$3.11 per doz. By express, 30 cts. each; dozen, \$3.00.

Raffia—For tying up vegetable bunches, tomato plants, grape vines, etc. By mail postpaid, 45 cts. per lb. By express, 35 cts. per lb.; 5 lbs. for \$1.65.

Jute String Used for the same purposes as Raffia. By mail postpaid, 35 cts. per lb. By express, 25 cts. per lb.; 10-lb. lots 23 cts. per lb.

RICHMOND**GEM**Cultivator,
Hoe and Plow

With the exception of the wooden handle and cast iron wheel, the entire tool is made of steel and is so sturdy and well built that it should last for years. The outfit of attachments consists of an opening plow or row marker, a turning plow, five cultivator teeth, and a hoe for weeding—these attachments can be used separately or in combination. It works easily and will become indispensable and a real comfort to those who have heretofore depended on the ordinary hoe when working the garden. Compared with the hoe method it will do a day's work in a few hours. Try it. \$3.25.

PLANET JR. GARDEN TOOLS

We have used these tools ourselves for years, and can personally recommend them in the strongest terms. No matter whether your garden is small or large, you should have a Planet Jr. tool. They will do nearly all the work in the garden, from breaking the ground and sowing the seed, to the last working. Write for complete catalog.

- No. 31 Drill and Cultivator.**—Ideal for the small garden. Will sow even the smallest quantity of any garden seed with the greatest precision. Cultivating outfit consists of a plow, cultivator, two sweeps and a special hoe. 11.00
- No. 3 Drill.**—Sows at any desired depth in continuous rows or plants in hills 4, 6, 8, 12, or 24 inches apart, covers, rolls, and marks the next row all at a single operation. 15.50
- No. 4 Drill.**—Like No. 3 Drill, but has, in addition, attachments for hoeing, cultivating, furrowing, weeding, and plowing. Accurate, simple, durable, reliable and easy running. 16.50
- No. 12 Double Wheel Hoe.**—Works both sides of the row at once. Has a pair of plows, 4 cultivator teeth and a pair of 6-inch hoes. 10.50
- No. 38 Single Wheel Disc Hoe.**—Has 2 sets of 3 discs, a pair of 3-prong cultivator teeth and a plow. 9.50
- No. 16 Single Wheel Hoe.**—Outfit consists of a plow, 2 rakes, 3 cultivator teeth and 2 hoes. An outfit sufficient for most garden work. 8.50
- No. 17 Single Wheel Hoe.**—Exactly like No. 16, except that it has no rakes. By changing the wheel to the opposite side of the wheel support it will work both sides of the row at once. 7.00
- No. 19 Single Wheel Hoe.**—Equipped with a 2-inch cultivating tooth, a 4-inch cultivating tooth, a 6-inch sweep, a 10-inch sweep and a plow. Has a high wheel. 5.00
- Firefly Plow.**—Throws a furrow 4 to 6 inches wide, 3 to 4 inches deep. Strong and well made. 3.00

If It has occurred to every one who sows: night came on, a rain caught us or something happened to prevent us from finishing sowing a field which "IF" we had had a good seed sower the work would have been finished in half the time it took us to sow half the field. Look on page 93 and read what we say about Cahoon and Cyclone Seed sowers. One is more stoutly built than the other but both are good and will not only do the work better and quicker than you can but will save you many regrets.

Weeders

Lang's Hand Weeder

—A real labor saver; fits the hand nicely; lasts for years. By mail postpaid, 25 cts.; by express, 20 cts.

Mole Trap —Self-Setting.

The spears are made of spring steel and will pierce the mole easily; thoroughly tinned to prevent rusting. By mail postpaid, \$1.00; by express, 90 cts.

Three Tine**Spading Forks** 3 Tine.

Convenient, strong and well made; tines polished; hardwood handle; length, 11 inches. By mail postpaid, 35c; by express, 30c.

4 TINE.—A good and serviceable fork, but not the equal of the 3 tine. By mail postpaid, 25c; by express, 20c.

Four Tine **GARDEN TROWELS** **English.**

English—Extra strong and well made; blued steel blade 6 inches long, 3 1/2 ins. wide. There

is no better trowel made. By mail postpaid, 25 cts.; by express, 20 cts.

American—Blade and shank made of cold rolled steel; blade 6 inches long by 2 1/4 inches wide. A good serviceable trowel, but not as sturdy as our English trowel. By mail postpaid, 18c; by express, 12c.

Steel.

PRUNING SHEARS For the care of fruit and ornamental trees, shrubs, roses, hedges, etc., pruning shears are as indispensable as a hoe or rake.

Universal—A well made and satisfactory shear; 9 inches long; polished, tempered blade; strong volute spring. By mail postpaid, 70 cts.; by express, 60 cts.

Richmond—We recommend this shear without hesitation. The blades are high-grade tool steel of extra quality, highly polished and tempered; longitudinal double brass spring, 9 inches long. By mail postpaid, \$1.10; by express, \$1.00.

Hedge Shears

—Made of the finest grade tool steel; 9-inch blade with notch at crotch of blades for cutting small branches. Blades polished; handles of hardwood. By express, \$2.00.

Scollay Plant Sprinkler —Fine for watering house plants and for applying insecticides and liquid fertilizer. By mail postpaid, \$1.10; by express, \$1.00.

MOSS For florists and for shipping plants. By mail postpaid, lb. 18 cts.; 5 lbs. 65 cts.; 10 lbs. \$1.25. By freight or express, lb. 12c; 5 lbs. for 50c; bale, \$3.50.

Wood's High Grade Flower Seeds

NEW AND DESIRABLE VARIETIES

Chinese Woolflower.

Chinese Woolflower —The introducer says of Woolflower that after three years' cultivation he can truly say that it is the showiest, as well as the most odd and novel, flower of any garden. It is a new form of plumed Celosia or Cockscomb, growing 2 to 3 feet high, the bloom starting early with a central head, round and globular, which often reaches the immense size of 2 feet in circumference. Scores of branches are thrown out, each bearing a ball of scarlet wool, but not as large as the central bloom. All these branches support lateral stems, each of which bears a still smaller head of bloom, so that the plant looks like an immense bouquet splendidly arranged and set in the garden. None of the blooms fade in any way till hit by frost, but continue to expand and glow with a deepening richness of color, a deep crimson scarlet. Its blooming season extends from June till frost. It is very easy to grow. If convenient start the seeds under glass or in boxes indoors about 4 weeks before the last frost and transplant outside when the ground is settled warm, but as soon as possible, so that they may not bloom before transplanting. Seeds may also be planted outside when the ground becomes warm. **Pkt. 15 cts.**

Variegated Leaved Cockscomb.

Giant Sweet Sultan —This represents the best that has been produced in these beautiful summer blooming flowers. The plants are fairly covered with beautiful, scented blooms that if cut when about to open will keep fresh for more than a week. If sown every two or three weeks until the middle of July a constant succession of blooms may be had throughout the whole summer and fall. No annual is easier to grow, and none will yield a greater abundance of magnificent flowers. Our mixture contains a wide range of colors. **Pkt. 10 cts.**

Cardinal Climber.

Cardinal Climber —There is no annual climber that for beauty, brilliance and rapidity of growth can compare with Cardinal Climber. It grows 30 feet or more, has beautiful fern-like foliage that is literally covered with round fiery cardinal red flowers from mid-summer till frost. The blooms are 1½ inches in diameter, and are borne in clusters of 5 to 7 blossoms each. Plant in a warm sunny place in good soil, and be sure to file or cut a small notch in each seed to insure germination. We believe we are safe in saying it will attract more attention and favorable comment than any plant in the garden. **Pkt. 15 cts.**

Variegated Leaved Cockscomb

—The wonderfully variegated leaves mark this as entirely distinct from any other variety. On its dark purple-red leaves are beautiful markings of crimson, orange, green, etc., of the most brilliant hues, contrasting in a most peculiar way with the nearly black-red velvety combs. A dwarf compact grower making an elegant bedding and border plant. Easily grown from seed and is one of the most brilliant and effective summer and fall bloomers especially when grown with pyrethrum and dusty miller. Don't fail to include this in your flower seed order. **Pkt. 15 cts.**

Don't overlook the fine assortment of Canna, Dahlia and Gladiolas we offer on page 63. The list covers every type of flower and a wide range of color.

Giant Flowering Mallow Marvel.

Giant Flowering Mallow Marvel

Marshmallow, or Hibiscus. —A wonderfully improved form of our greatly admired native Marshmallow, in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. The colorings have also been greatly intensified, comprising rich dark red, soft mallow-pink and pure white; grows 5 to 8 feet high, very floriferous, blooming from early July until late autumn; recommended for plantings of all kinds, and perfectly hardy. If sown early will flower the first year. **Pkt. 10 cts.; ¼ oz. 20 cts.**

Savoy Zinnia

—Entirely distinct from all other zinnias in that the petals of the large, double globular flowers are turned upward at the sides forming little channels, often so pronounced as to form quills like the petals of a quilled aster. The color is a singular mixture of yellow and red, the outer petals being a splendid dark red melting gradually to golden yellow at the center. **Pkt. 10 cts.**

Savoy Zinnia.

Goliath Balsam.

Goliath Balsam —A real giant among Balsams, often growing 4 feet high and forming symmetrical, well branched, candelabra-like plants that either as single plants or in large flower groups present a striking appearance. The colors of this new balsam as yet are confined to white, rosy-buff, scarlet and violet. It surpasses the older types in the lasting quality of the blooms as well as in the greater proportion of perfectly double flowers. After the ground becomes warm plant outside where they are to bloom, as they will not stand transplanting. **Pkt. 10 cts.**

Coleus Ornatus —Such diversity and richness of color combinations are not found in any other coleus. If you grow a thousand, no two would be alike. The foliage is large and strikingly handsome, irregularly spotted, mottled, striped and marbled with blackish purple, blood-red, carmine and rose, and sprinkled with white, yellow, green and brown in endless variety. Sow outside when frost is over or start earlier in boxes and transplant when the ground is warm. **Pkt. 15 cts.**

Red Sunflower

Summer Fir —Forms grand pyramidal bushes three to five feet high, like a well shaped Christmas tree, that are particularly effective in groups and borders, but makes a very pretty pot plant as well. The color of the finely pinnated, feathery foliage is a dark rich green. The branches when cut last a long time, making it very useful for house decoration and wreaths. It attains its full growth the same season the seeds are sown. **Pkt. 10 cts.**

Early Flowering Double

Chrysanthemum —The increasing demand for an early flowering autumn chrysanthemum has been well met by this double variety, which, although a perennial, blooms the first season if sown early indoors. Grows about 1½ feet high, well branched, producing about 80 per cent of double flowers in the most charming variety of color. Will produce the finest blooms if sown in a sheltered situation, and will continue to bloom each year. **Pkt. 15 cts.**

Coleus Metallicus.

Coleus Metallicus —Thoroughly distinct from the better known varieties. The leaves are very large, covered with blisters and present a curious metallic appearance. The ground color is a deep golden yellow, overlaid with shades of rich red, bronze and copper color and frequently intersected by veins of various colors. Plant in a shaded situation. See Coleus Ornatus for cultural directions. **Pkt. 15 cts.**

Red Sunflower —Red Sunflower has been so favorably received and well liked that we are again calling attention to it among our desirable varieties. Although it has not been possible to eliminate all the yellow blood from this very unique new sunflower, it is sufficiently pure to merit a place in every flower garden. The bees carry the pollen from the yellow plants and make it very difficult to grow an absolutely true red sunflower. Some plants will be tipped with yellow, others will be red with yellow margins of varying width. Some will be yellow with a ring of red around the dark center, and others still will be yellow streaked with red and other interesting combinations. Plants bearing yellow flowers will have no purple in the stems and leaves and can be removed when young. The plants vary in height and throw out many side branches. The flowers are very numerous, of good form, usually having large long petals and small centers. They vary in size from 2 to 3 ins. to a foot or more across. Easy to grow, thriving in a sunny place in almost any soil. Plant when the ground is warm, or earlier in the house. **Pkt. 10 cts.**

African Daisy.

African Daisy —Although it originated in South Africa, this annual suits our climate perfectly. The bushy plants grow about 12 inches high, are of neat branching habit and bear in great profusion single daisy shaped flowers, 2½ or more inches across. These are a rich yellow glossy gold, the brilliant coloring being rendered even more striking by the dark centers surrounded by a black zone. It is splendidly adapted for groups and borders, stands the heat finely and produces its pretty flowers very early in sunny situations, and will continue to flower well into the fall. A bed in full bloom is a magnificent sight. Grow in a dry sunny situation. **Pkt. 10 cts.**

Fra Diavolo Ornamental Pepper

—At Christmas time the florists sell thousands of ornamental peppers that could easily have been grown at home. As a pot plant for house decoration during the winter it is most effective and is as easily grown as garden peppers. The blooms are followed by innumerable bright scarlet berry-like fruits in the most wonderful profusion. The berries remain on the plant for a long time without losing any of their beauty and attractiveness. **Pkt. 10 cts.**

Fra Diavolo Ornamental Pepper.

Wood's High Grade Flower Seeds

The Soil best suited to flowers is a light rich loam, made as fine and smooth as possible. If heavy, mix with sand to lighten and make it friable. Many seeds are very small and require a fine seed-bed. A good plan is to cover the place where the seeds are to be sown with pine-tags, coarse manure, leaves and other litter, and allow it to remain for a few weeks. The soil will then be finely pulverized and in a splendid condition to start the seeds.

Sow the Seeds either broadcast or in rows, and cover lightly—a good general rule is to cover two or three times the size of the seed—and press the soil firmly. Small seeds cannot come up if covered too deep. Very fine seed should be sown on the surface and pressed into the soil. To have the earliest blooms, flowers that stand transplanting should be sown early in boxes indoors. After sowing, water with a fine spray, do not let the soil dry out, but be sure not to keep the young plants saturated as they may damp off. When three or four leaves have formed transplant one inch apart in boxes or in the open ground if warm enough.

FLOWERS FOR SPECIAL PURPOSES

To aid those not familiar with the uses to which flowers may be put, we have classified them below. Where a variety is suitable for two uses, we have entered it in both lists. Note carefully the heights of the plants so that a proper selection may be made.

FOR CUT FLOWERS.—Antirrhinum or Snapdragon, Alyssum, Aster, Calliopsis, Candytuft, Carnation, Flowering Centaureas, Chrysanthemum, Cosmos, Dahlia, Shasta Daisy, Dianthus or Pinks, Bush Escholtzia, Gaillardia, Heliotrope, Marigold, Mignonette, Nasturtium, Nemophila, Salpiglossis, Scabiosa, Stokesia, Stocks, Miniature Sunflower, Sweet William, Sweet Peas, Violet and Zinnia.

FOR BASKETS AND VASES.—Alyssum, Abronia, Centranthus, Dusty Miller Centaureas, Clarkia, Ice Plant, Kenilworth Ivy, Lobelia, Dwarf Morning Glory, Tall Nasturtium, Oxalis, Petunia, Thunbergia, Torenia and Virginian Stocks.

FOR BORDERS AND BEDDING.—6 to 12 inches high. Acroclium, Alyssum, Brachycome, Candytuft, Dusty Miller Centaureas, Dwarf Cockscomb, Daisy, Dianthus, Forget-Me-Not, Lobelia, Mignonette, Nemophila, Oxalis, Pansy, Bedding Petunia, Dwarf Phlox, Iceland Poppy, Pyrethrum, Portulaca, Cupid Sweet Peas, Verbena, Violet, Virginian Stocks and Miniature and Tom Thumb Zinnias.

FOR TALL BEDS, GROUPS AND BACK-GROUNDS.—Abutilon, Amaranthus, Calendula, Calliopsis, Canna, Canterbury Bells, Tall and Plumed Cockscomb, Cosmos, Dahlia, Shasta Daisy, Digitalis, Ornamental Grasses, Hollyhock, Kochia or Burning Bush, Perennial Larkspur, Lychnis, African Marigold, Nicotiana, Pentstemon, Perennial Phlox, Oriental Poppy, Evening Primrose, Ricinus, Salvia, Salpiglossis, Scabiosa, Stokesia, Sunflower, Wallflower and Zinnia.

FOR EDGING AND LOW BORDERS.—Alyssum, Brachycome, Candytuft, Dusty Miller Centaureas, Daisy, Forget-Me-Not, Ice Plant, Lobelia, Portulaca, Pyrethrum and Virginian Stocks.

PLANT IN BOXES AND TRANSPLANT.—Ageratum, Alyssum, Aster, Calendula, Canterbury Bells, Calliopsis, Chrysanthemum, Cockscomb, Cosmos, Godetia, Marigold, Marvel of Peru, Petunia, Ricinus, Salvia, Sweet William and Verbena. These may also be planted where they are to grow.

FOR BORDERS AND BEDDING.—1 to 2 feet high. Ageratum, Amaranthus, Antirrhinum or Snapdragon, Aquilegia or Columbine, Asters, Balsam, Begonia, Veronica, Calacia, Calendula, Calliopsis, Candytuft, Carnation, Catchfly, Clarkia, Chrysanthemum, Coleus, Centaurea, Centranthus, Dwarf Cockscomb, Shasta Daisy, Dianthus or Pinks, Escholtzia, Feverfew, Forget-Me-Not, Geranium, Gaillardia, Gilia, Godetia, Heliotrope, Dwarf Larkspur, Linum, Lychnis, Marigold, Marvel of Peru, Mignonette, Bush Morning Glory, Dwarf Nasturtium, Nigella, Pentstemon, Petunia, Phlox, Pyrethrum, Poppy, Rose Camion, Salpiglossis, Salvia, Scabiosa, Stokesia, Stocks, Sweet William, Verbena, Virginian Stocks, Vinca, Wallflower, and Zinnia.

FOR MOUNDS AND ROCKERIES.—Abronia, Alyssum, Candytuft, Catchfly, Centranthus, Gilia, Ice Plant, Kenilworth Ivy, Lobelia, Mimulus, Dwarf Morning Glory, Nemophila, Oxalis, Portulaca, Thunbergia, Torenia, and Verbena.

ANNUALS attain full growth from seed, bloom and die in one season. Sow Hardy Annuals in March or April, or earlier indoors for transplanting outside. Hardy Annuals may be sown in the fall for earlier spring blooming. They make larger flowers and more brilliant colors than spring sowings.

PERENNIALS usually bloom the second year after sowing and continue to bloom for many years. Fall sowings or early sowings indoors usually produce blooms the next season.

BIENNIALS bloom the second year after sowing and then die. Like perennials, they may be sown early indoors or in the fall.

HALF HARDY and TENDER FLOWERS should not be sown or transplanted outside until the weather is settled and warm. Calceolarias, Cinerarias, Cyclamen, Gloxinias, Primulas, and Smilax are tender and should be kept in pots, shifting to larger pots as the growth requires.

HORN SHELLED SEEDS like Canna, Evening Glory, Brazilian and Japanese Morning Glory should have a hole filed through the outer shell, or soaked in warm water 36 hours before planting.

Explanation of Abbreviations

H. A.—Hardy Annuals
H. H. A.—Half Hardy Annuals
T. A.—Tender Annuals

H. B.—Hardy Biennials
H. H. B.—Half Hardy Biennials
T. B.—Tender Biennials

H. P.—Hardy Perennials
H. H. P.—Half Hardy Perennials
T. P.—Tender Perennials

Abronia umbellata.—A verbena-like trailing plant, bearing rose colored fragrant flowers. Splendid for rock work. H.A. Pkt. 5 cts.; ¼ oz. 20 cts.

Abutilon (Bell Flower or Flowering Maple).—Beautiful shrub, bearing bell-like flowers of many colors; suitable for the garden in summer and house in winter. T. P. Height, 2 to 4 ft. Pkt. 10 cts.

Acroclium—Everlasting, with rose and white daisy-like flowers. Fine for winter bouquets; very effective in borders. H.A. Height, 1 ft. Mixed colors. Pkt. 3 cts.; ¼ oz. 15 cts.

Adlumia (Allegheny Vine).—An attractive climber, with delicate fern-like leaves and flesh-colored blossoms. Hardy, and continues to improve year by year. A shady situation suits it best. H.B. Height, 15 ft. Pkt. 10 cts.

AGROSTEMMA.—See Rose Camion.
ALLEGHENY VINE.—See Adlumia.

Sterlingworth Plant Tablets

—A powerful, and odorless plant invigorator; promotes a luxuriant, vigorous growth. By mail postpaid, large size 50 cts.; medium size 25 cts.; trial size 10 cts.

Sweet Alyssum.

Ageratum Mexicanum.—Profuse bloomer, bearing clusters of feathery blooms the whole summer. Excellent for large beds and window-boxes in summer and as pot-plants in winter. H.A. Height, 18 inches. Pkt. 3 cts.; ½ oz. 20c.

Alyssum—One of our finest hardy plants for beds, borders, baskets, pots and for cutting. Sow early for a continuous bloom through the summer; cut away the faded blooms and others will come.

Sweet.—Hardy annual; covered with pure white fragrant blooms. The most popular of all border plants. Pkt. 3 cts.; ½ oz. 15 cts.; oz. 25 cts.

Saxatile.—Brilliant golden yellow; showy for permanent borders and beds; resists the most extreme weather. Height 9 inches. H.P. Pkt. 8 cts.; ½ oz. 30 cts.

Little Gem (Carpet of Snow).—There is no better border plant. Very dwarf; covers a circle of about 5 inches. H. A. Pkt. 5 cts.; ½ oz. 25 cts.; oz. 40 cts.

LITTLE DORRIT.—A gem for beds, borders, porch and window boxes, baskets and rockeries. Forms a perfect little bush, smothered with white blooms through summer till fall. Pkt. 7 cts.; ¼ oz. 20 cts.

Try Sulpho-Tobacco Soap on your plants. It kills insects and promotes growth. 3 oz. cake 10 cts.; 8 oz. cake, 25 cts.

Wood's Superb Asters

For late summer and fall blooming few flowers can compare with the Aster for bedding, borders, pot culture and cutting. Should you not be familiar with the various strains, we recommend our 'Superb Aster Mixture'. It contains all colors of the best and most desirable sorts. Early in the spring, sow indoors in pots or boxes, and transplant to rich soil, or sow later in the open ground, covering one-quarter inch deep with fine earth. H.A.

PEONY FLOWERED PERFECTION.

—Large, perfectly formed, brilliantly colored, with petals curving upward and inward. Very double; 3 to 4 inches across.

Pure White.—Pkt. 8 cts.; ¼ oz. 40 cts.

Pink.—Pkt. 8 cts.; ¼ oz. 40 cts.

Light Blue.—Pkt. 8 cts.; ¼ oz. 40 cts.

Crimson.—Pkt. 8 cts.; ¼ oz. 40 cts.

All Colors Mixed.—Pkt. 8 cts.; ¼ oz. 35 cts.

Victoria Aster.

geous shades. 15 to 18 inches high.

Pure White.—Pkt. 10 cts.; ¼ oz. 50 cts.

Pink.—Pkt. 10 cts.; ¼ oz. 50 cts.

Light Blue.—Pkt. 10 cts.; ¼ oz. 50 cts.

Dark Scarlet.—Pkt. 10 cts.; ¼ oz. 50 cts.

All Colors Mixed.—Pkt. 8 cts.; ¼ oz. 40 cts.

Amaranthus —Highly ornamental. We offer a splendid mixture of all varieties; some have handsome foliage, others beautiful clusters of brilliant flowers. Transplant 2 feet apart. H.H.A. Pkt. 3 cts.; ½ oz. 15 cts.

Ampelopsis Veitchii (Boston or Japanese Ivy).—A rapid creeper with lovely green foliage which turns red in fall. Excellent for covering walls, out-houses, etc. H.P. Height 50 feet. Pkt. 5 cts.; oz. 30 cts.

Aquilegia (Columbine).—Charming, hardy perennials, lasting for years and bearing numberless exquisite blooms. Easily grown; sow either in fall or spring.

Double and Single Mixed.—All colors. Pkt. 5 cts.; ¼ oz. 20 cts.; oz. 50 cts.

Antirrhinum (Snapdragon).—Showy and useful border plants, producing a great variety of brilliant flowers. Very effective in beds, succeeding in any good soil. Blooms the first season. H. P. Height 2 to 3 feet. Mixed colors. Pkt. 5 cts.; ½ oz. 30 cts.; oz. 50 cts.

Balloon Vine (Love-in-a-Puff).—Very pretty, rapid climbers, with inflated balloon-shaped seed-pods. H.H.A. Height 10 ft. Pkt. 5c; oz. 30c.

Wood's Superb Asters.

Wood's Superb Aster Mixture

We have spared nothing to make this mixture perfect, incorporating in it the best productions of aster specialists of this country and Europe. It includes not only all the splendid kinds offered on this page, but many others which we purchased especially for this mixture, all beautiful, striking and distinct, giving it a range of color and variety not to be found in any other aster mixture. Pkt. 10 cts.; ½ oz. 40 cts.; ¼ oz. 70 cts.; oz. \$2.25.

Ostrich Plume Aster.

All colors mixed. Pkt. 10 cts.; ½ oz. 25 cts.; ¼ oz. 40 cts.

OSTRICH PLUME.

Each plant bears 25 to 40 magnificent, double flowers, 5 ins. across, with long loosely curled, feathery petals suggestive of an ostrich feather. Exceptionally handsome as cut flowers.

COMET ASTER.

The flowers are of immense size, often 5 inches across. The long wavy twisted petals give it the appearance of the finest Japanese chrysanthemums.

Light Blue.—Pkt. 8c; ¼ oz. 35c.

Crimson.—Pkt. 8c; ¼ oz. 35c.

Pink.—Pkt. 8 cts.; ¼ oz. 35 cts.

Pure White.—Pkt. 8 cts.; ¼ oz. 35 cts.

All Colors Mixed.—Pkt. 8 cts.; ¼ oz. 35 cts.

GIANT COMET.—Each plant bears 20 to 30 magnificent large blooms which are of the finest Japanese chrysanthemum type. One of the best asters in cultivation. All colors mixed. Pkt. 10 cts.; ¼ oz. 40 cts.

Comet Aster.

Simple's BRANCHING.

—A beautiful strain of late-flowering Asters, which bear on long stems perfectly formed double flowers, 4 inches in diameter, 1½ to 2 feet high.

Simple's Branching Aster.

Pure White.—Pkt. 8 cts.; ¼ oz. 35 cts.

Pink.—Pkt. 8 cts.; ¼ oz. 35 cts.

Blue.—Pkt. 8 cts.; ¼ oz. 35 cts.

Dark Scarlet.—Pkt. 8 cts.; ¼ oz. 35 cts.

All Colors Mixed.—Pkt. 8 cts.; ¼ oz. 35 cts.

GERMAN QUILLED or CHINA ASTER.—

General favorites on account of their fine blooming qualities. Flowers large, brilliant and of many beautiful colors. Height 18 inches. Pkt. 5 cts.; ½ oz. 30 cts.; oz. 50 cts.

CORNFLOWER ASTER.—See Stokesia Cyanea.

Antirrhinum, or Snapdragon.

Balsam

(Touch-Me-Not or Lady's Slipper).—Our greatly improved camellia-flowered

strain produces the finest double blooms; the colors range from pure white to dark purple, some spotted and striped. Sow in rich soil for the finest blooms. H.H.A.

Double Perfection White.—Pkt. 10 cts.; ¼ oz. 20 cts.; oz. 60 cts.

Double Mixed Colors.—Pkt. 5 cts.; oz. 40 cts.

Balsam Apple—Ornamental climber, affording an excellent shade; grows quickly. Fruit changes from yellow to bright red. Plant end of April. H.H.A. Height 15 ft. Pkt. 5 cts.; ½ oz. 20c; oz. 35 cts.

Balsam Pear—Climber; the large, prickly pear-shaped fruit, when kept in whiskey or alcohol, makes an effective painkiller and healer of cuts, bruises, etc. H.H.A. Height 15 feet. Pkt. 5 cts.; ½ oz. 20 cts.; oz. 35 cts.

BACHELOR'S BUTTONS.—See Globe Amaranth.

BELLIS.—See Daisy.

BLACK-EYED SUSAN.—See Thunbergia.

BLUE BOTTLE.—See Centaurea cyanus.

BOSTON IVY.—See Ampelopsis.

Begonia *Vernon*.—Fine for bedding and window boxes, bearing immense quantities of brilliant scarlet blooms; foliage ornamental, first green, changing to red. T. P. Pkt. 10 cts.

Brachycome (*Swan River Daisy*).—Free-flowering dwarf plants for edgings and small beds; bears pretty blue and white daisy-like flowers. H.H.A. Height 6 inches. Mixed colors. Pkt. 5 cts.

Bryonopsis.—A climbing annual, with ivy-like pale-green foliage and showy scarlet-striped fruit. Very beautiful. H.H.A. Height 10 ft. Pkt. 5 cts.

BURNING BUSH.—See *Kochia*.

Cacalia (*Tassel Flower*).—Pretty annual, bearing tassel-shaped blossoms on long, graceful stems. H.A. Height 2 feet. Mixed colors. Pkt. 3c; ¼ oz. 15c.

Calceolaria.—Gorgeous greenhouse plants. Colors yellow and maroon, crimson, etc., spotted and blotched. T. P. 1½ ft. Mixed colors. Pkt. 35 cts.

Calendula.

Calendula.—Showy, free-flowering annuals of the marigold family. Succeed well in any good soil, producing a fine effect in beds or mixed borders, and blooms until frost. H. A. Height 1 foot. **Mixed Varieties**.—A fine mixture of all the best varieties; all colors. Pkt. 3 cts.; ½ oz. 15 cts.; oz. 25 cts.

CALIFORNIA POPPY.—See *Escholtzia*.

CAMPANULA.—See *Canterbury Bells*.

Calliopsis (*Coreopsis*).—Beautiful annuals; large bright golden yellow flowers, varied with rich brown. Excellent for cutting and decoration. Height 2 ft.

Tiger Flower.—Covered throughout the summer with large blooms with a vivid dark brown background, the points of the petals tinged with golden yellow and twisted like a cactus dahlia. Pkt. 7 cts.

Lanceolata.—Beautiful golden yellow perennial; unexcelled for borders; excellent for cutting. H.P. Pkt. 5 cts.; ¼ oz. 15c.

Golden Wave.—Large, rich golden yellow flowers with brown centers; very free-flowering. H.A. Pkt. 5 cts.; ¼ oz. 10 cts.

All Colors Mixed.—Very rich and showy. H.A. Pkt. 3 cts.; ½ oz. 10 cts.

Canna (*Indian Shot*).—Stately, ornamental plants, producing large varied and brilliant flowers. Soak for 36 hours and plant in pots or hot-beds in January, transplanting outside in May, and they will bloom till cold weather. For pots and beds use the dwarf sorts; for centers of beds and backgrounds the tall kinds.

Crozy's Large Flowering.—A fine mixture of the best dwarf French varieties. Pkt. 5 cts.; oz. 30 cts.

Tall Varieties Mixed.—All colors. Pkt. 5 cts.; oz. 20 cts.

Canna Roots.—See *Bulbs*.

Catchfly (*Silene*).—Compact, round plants 6 inches high, densely covered with white, pink and red double flowers. H.A. Pkt. 3 cts.; oz. 20 cts.

CASTOR BEAN.—See *Ricinus*.

CELOSIA.—See *Cockscomb*.

Canary Flower.—A desirable rapid-growing climber. Yellow fringed flowers. H.A. Height 10 feet. Pkt. 5 cts.; ½ oz. 15 cts.; oz. 25 cts.

Candytuft.

Candytuft.—Indispensable for cutting, very effective in beds, masses and borders, being fairly covered with blooms throughout the summer. Fall sowings bloom earlier. Height 1 foot.

Empress.—Large pure white flowers resembling hyacinths. Fine for cutting and bedding. Pkt. 5 cts.; ½ oz. 15 cts.

White Rocket.—Large trusses. Pkt. 5 cts.; oz. 20 cts.

White Perennial.—An early and profuse bloomer; hardy. Pkt. 10 cts.

All Colors Mixed.—Pkt. 3 cts.; oz. 20 cts.

Canterbury Bells.—Beautiful hardy biennials, bearing a profusion of bell-shaped flowers of exquisite colors. Does best in a rich, light soil. Height 2½ feet.

Single.—Mixed Colors. Pkt. 3c; ¼ oz. 15c.

Double.—Mixed Colors. Pkt. 5c; ¼ oz. 25c.

Calycanthema (*Cup-and-Saucer*).—Mixed colors. Pkt. 5 cts.; ½ oz. 20c.

Carnation

Carnation.—General favorites for their delicious fragrance and diversity of color. Excellent bloomers and indispensable for winter-flowering. H.H.P.

Marguerite.—Blooms in four months. Fine for bedding or pots. Dwarf, flowers very profusely; blooms double. All colors. Pkt. 8 cts.; ¼ oz. 40 cts.

Chabaud's Perpetual.—Blooms in seven months, and continues in greatest profusion indefinitely. Early, robust and hardy. Many colors mixed. Pkt. 10 cts.

Finest German Double Mixed.—A splendid strain for bedding or pots. Pkt. 15 cts.

Carnations Mixed.—A splendid mixture. Pkt. 5 cts.; ¼ oz. 45 cts.; oz. \$1.50.

Centaurea.

Centaurea.—The Dusty Miller or white leaved sorts are fine for bedding, borders and hanging baskets. The flowering varieties are universal favorites for cut flowers; deliciously scented, long stemmed; will last for days.

DUSTY MILLER VARIETIES. H.H.P. **Candidissima**.—Foliage deeply cut; silvery white. Pkt. 10 cts.; ½ oz. 30 cts. **Gymnocarpa**.—Delicately cut, gracefully drooping, silver foliage. Pkt. 5 cts.; ½ oz. 25 cts.; oz. 40 cts.

FLOWERING VARIETIES.

Margarita.—Pure white flower 2½ inches across; delightfully fragrant. H.P. Pkt. 5 cts.; ¼ oz. 25 cts.

Cyanus (*Ragged Robin or Cornflower*).—All colors mixed. Pkt. 3 cts.; ½ oz. 15 cts.

Centranthus.—Pretty compact plants, bearing clusters of pink or white flowers. Suitable for rockeries or vases. H.A. Height 1 foot. Pkt. 3 cts.

CHINESE BELL FLOWER.—See *Abutilon*.

Annual Chrysanthemums.

Chrysanthemums Showy and effective summer-blooming annuals for borders and cut-flowers; thrifty growers and free bloomers. Height 1 to 1½ feet.

Evening Star.—Pure golden yellow, 3 to 4 inches across; blooms in ten weeks; fine cut-flower. Pkt. 10 cts.

Morning Star.—3 to 4 inches across; deep yellow, shading to a pale sulphur; blooms from early summer till late fall. Splendid for cutting. H.A. Height 10 inches. Pkt. 10 cts.

Japanese.—Perennial; bears fantastic incurved double flowers of the finest types. All colors mixed. Pkt. 15 cts.

Mixed Varieties.—Annual varieties, single and double. Pkt. 3 cts.; ½ oz. 15 cts.

Clarkia.

Clarkia A hardy free-blooming, handsome plant of easy culture. Blooms throughout the season. H.A. Height 1 foot. Double and single mixed. Pkt. 3 cts.; oz. 25 cts.

Clematis.

Clematis Hardy climbers bearing clusters of beautiful vari-colored flowers. Soak for 24 hours before sowing. Large Flowering.—Lovely flowers of all colors; hardy. Pkt. 10 cts.

Flammula—Pure white, sweet-scented. Pkt. 5 cts.

Paniculata—Grows 20 to 25 feet a season; covered with a dense sheet of bloom; lasts for years. Pkt. 10 cts.; ½ oz. 30 cts.

Cobea Scandens.—One of the best climbers, with fine foliage and large, bell-shaped purple flowers. Grows rapidly, 20 to 30 feet. Plant in the house, edgewise, cover lightly, and transplant in May. H.H.P. Pkt. 5 cts.; ¼ oz. 15 cts.

Cockscomb.

Cockscomb Easily grown annuals, fine for summer flower beds, pot plants and for drying for winter bouquets. Sow in light soil, not too rich. Celosia or Plumed Varieties.—Mixed colors. Pkt. 5 cts.; ½ oz. 20 cts.

COMB VARIETIES.

Tall Mixed Colors—Pkt. 5 cts.; ¼ oz. 15c.

Dwarf Mixed Colors—Pkt. 5c; ¼ oz. 40c.

Coleus One of the finest foliage plants grown from seed. Indispensable for borders and bedding. Sow early indoors and transplant. Our seed will produce an endless variety of colors and markings. Pkt. 5 cts.; ½ oz. 60 cts.

COLEUS ORNATUS—See New Varieties.
COLEUS METALLICUS—New Varieties.

COLUMBINE—See Aquilegia.

CONVOLVULUS—See Morning Glory.

COROPHOSIS—See Calliopsis.

CORNFLOWER—See Centaurea Cyanus.

Cosmos A grand fall flowering, hardy annual, producing thousands of beautiful blooms when other flowers are scarce. To have earliest blooms, start indoors and transplant after frost; topping the plants when a foot high induces earlier blooming and a more bushy growth. They prefer a sandy soil, not too rich.

Wood's Superb Mixture—A truly superb mixture characterized by the grace, daintiness and brilliance of the flower, which often measures 3 to 4 inches across. Fine for table decoration, remaining fresh for days. Pkt. 10 cts.; ½ oz. 30 cts.; oz. 50 cts.

Lady Lenox Giant Cosmos—Of extraordinary size and beauty; without exception the handsomest cosmos we have ever grown. Blooms are 4 to 5 inches across, of a beautiful shell-pink color; the petals are oval, forming a perfectly circular flower, 6 to 7 feet high, vigorous, and yields a wealth of magnificent blooms. Keep a week without wilting. Pkt. 8 cts.; ½ oz. 25 cts.; oz. 40 cts.

Early Flowering—Begins blooming in August and continues a mass of flower till frost. Blooms are not quite as large as our Superb Cosmos, and the plant is dwarfier. We offer a fine mixture of colors, ranging from pure white to deep-red. Pkt. 5 cts.; ¼ oz. 15 cts.; oz. 40 cts.

Pure White Cosmos—Pkt. 5 cts.; oz. 25 cts.

Pink Cosmos—Pkt. 5 cts.; oz. 25 cts.

Deep Crimson—Pkt. 5 cts.; oz. 25 cts.

Mixed Cosmos—A fine mixture of all colors. Pkt. 3 cts.; oz. 20 cts.

Wood's Superb Cosmos

Wild Cucumber Vine Rapid climbers, growing 30 feet a season. Fragrant, pretty white flowers, followed by ornamental, prickly seed-pods. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 40c.

Cypress Vine A splendid climber, with every foliage and an abundance of bright star-shaped white and scarlet blossoms. Sow thickly after the middle of April. Height 15 feet.

White—Pkt. 5 cts.; ½ oz. 20 cts.; oz. 35 cts.

Scarlet—Pkt. 5c; ½ oz. 20c; oz. 35c.

Mixed Colors—Pkt. 5 cts.; oz. 30 cts.

Cyclamen Persicum—Beautiful plants for window or greenhouse. Foliage highly ornamental, flowers of striking beauty; blooms for months. Sow in boxes in February or March, transplant to pots, and they will flower the following winter or spring. T.P. Height 9 inches. Mixed colors. Pkt. 15 cts.

Cucumis (Snake Cucumber)—Ornamental climber, bearing curious fruit. Growth luxuriant. H.H.A. Pkt. 5 cts.

CUP AND SAUCER—See Canterbury Bells

Dahlia.

Dahlia If started indoors and transplanted outside when frost is gone, splendid success may be had with dahlias, giving a profusion of bloom throughout the fall from spring-sown seeds.

Peony Flowered—Bears enormous blooms of many colors, generally semi-double, resembling peonies. The petals are curled and twisted. Blooms the first season if planted early. Pkt. 10 cts.

Cactus-Flowered—One of the most beautiful types; unequalled for rich and varied colors. Pkt. 10 cts.; ¼ oz. 40 cts.

Double Pompon—Flowers very compact and perfectly double; mixed colors. Pkt. 10 cts.; ¼ oz. 40 cts.

Double Mixed Colors—All types of double dahlias mixed; includes large flowering, show and fancy varieties. Pkt. 5 cts.; ¼ oz. 35 cts.

Single Mixed Colors—A fine mixture of both solid and variegated colors. Pkt. 5 cts.; ¼ oz. 25 cts.

Dahlia Bulbs—See Bulbs.

Daisy If sown in the fall or early spring, will bloom the first summer, from April to June, and continue for years. Particularly adapted for beds, borders and pots. They bloom profusely, especially in cool weather. Prefers a shady location. Height 6 inches. H.P.

Double Pure White—Pkt. 5c; ½ oz. 40c.

Double Mixed Colors—Pkt. 5c; ½ oz. 35c.

Shasta Daisy Perfectly hardy perennials, bearing flowers 4 inches in diameter. Blooms for months and more freely each season; flowers remain fresh for two weeks after cutting. Pkt. 10 cts.; ½ oz. 35 cts.

SWAN RIVER DAISY—See Brachycome.

DELPHINIUM—See Larkspur

DEVIL IN THE BUSH—See Nigella.

Sterlingworth Plant Tablets—A powerful, odorless plant invigorator. Their use promotes a luxuriant, vigorous growth. Dissolve in water, and water the soil with the solution. By mail postpaid, large size 50 cts.; medium size 25 cts.; trial size 10 cts.

Wood's Superb Dianthus.

Dianthus or Pink

—One of our most beautiful and highly prized flowers, both for bedding and cut flowers. Sow early indoors or in a sheltered location, and they will bloom the first season, and if lightly protected, continue flowering the next year. The flowers are large, the colors brilliant, varying from pure white to richest crimson. H.H.B.

WOOD'S SUPERB DIANTHUS MIXTURE.

—A magnificent mixture, containing all the best varieties, both double and single, and producing unusually large and brilliant flowers in the greatest variety of color and of delicious fragrance. This mixture has met with unstinted praise wherever grown, both when flowering in beds and for house decoration. Pkt. 10 cts.; ¼ oz. 20 cts.; oz. 60 cts.

Wood's Mixture of Double Pinks.—A splendid collection of the very choicest double varieties. Colors range from the purest white to the deepest crimson. Pkt. 5 cts.; ¼ oz. 15 cts.; oz. 50 cts.

Wood's Mixture of Single Pinks.—A mixture of the choicest single varieties in cultivation. The flowers are handsome extra large and in great variety of color. Pkt. 5 cts.; ¼ oz. 15 cts.; oz. 40 cts.

Double Fringed.—Called the Marvellous Pink, because of its large wonderfully fringed double flowers, often 3 to 4 inches across. Bears constantly till frost. Pkt. 10 cts.; ¼ oz. 25 cts.

Snowdrift.—These extremely large flowers often 3 inches across, resemble a white carnation. A fine cut-flower, lasts for days after cutting. Pkt. 10 cts.

Fireball.—Intense, brilliant scarlet double flower. Splendid for bedding and cut-flowers. Pkt. 8 cts.; ¼ oz. 40 cts.

Double China Pink.—Finest colors mixed. Pkt. 5 cts.; ¼ oz. 20 cts.

Double Japan Pink.—Flowers large. Brightest colors mixed. Pkt. 5c; ¼ oz. 20c.

Digitalis (Foxglove).—Handsome, statelily plants, with ornamental green leaves and pendulous flowers, white, pink, blue, purple, etc., beautifully spotted. H.P. Height 2 feet. Mixed colors. Pkt. 5 cts.; ¼ oz. 15 cts.

Dolichos (Hyacinth Bean).—Rapid climbers, bearing large clusters of purple and white flowers, followed by bright ornamental pods. Pkt. 5c; oz. 20c.

DUSTY MILLER.—See Centaurea.

EVERLASTING GLOBE.—See Moonflower.

EVERLASTINGS.—See Acroclinium, Globe Amaranth, Grasses (ornamental), Helichrysum and Job's Tears.

Escholtzia (California Poppy).—Easily grown annuals, producing bright, poppy-shaped flowers from spring till frost. In large beds, sow broadcast, either in early spring or fall, and rake in lightly. A bed in full bloom makes a most brilliant effect. All colors mixed. Pkt. 3 cts.; oz. 20 cts.

Bush Escholtzia, or Hunnemannia (Perennial California Poppy).—Bears large cup-shaped yellow flowers, 3 inches across, on 12-inch stems; the petals are crinkled like crushed satin; will keep for two weeks. Sown early, they bloom for months, beginning in early July. Pkt. 5c; ¼ oz. 20c.

Ferns.—Beautiful decorative plants; thrive best in peaty, sandy soil. Sow in boxes or pots, barely covering, and keep moist. T. P. Mixed varieties. Pkt. 20 cts.

Feverfew.—Free flowering hardy annuals succeeding in any garden soil, blooming till frost. Splendid for bedding and cut flowers. Double pure white flowers. See also Pyrethrum. Pkt. 5 cts.; ½ oz. 25 cts.; oz. 40 cts.

Escholtzia, or California Poppy.

Forget-Me-Not (Myosotis). Charming little flowers, highly prized for their modest beauty. If sown early in sunny border, will bloom the first season. Height 6 to 9 inches. H.P.

Eliza Fonrobert.—Large, bright blue; fine and distinct; makes a good cut-flower. Pkt. 8 cts.; ¼ oz. 20 cts.

Mixed Colors.—The finest varieties mixed. Pkt. 5 cts.; ¼ oz. 25 cts.

SCARLET FLAX.—See Linum.

FOUNTAIN PLANT.—See Amaranthus.

FOUR O'CLOCK.—See Marvel of Peru.

FOXGLOVE.—See Digitalis.

Gaillardia—Showy and free-blooming; remarkable for the brilliancy, profusion and size of flowers, continuing in bloom all summer. Fine for bedding, borders and cutting.

Grandiflora.—Hardy perennial; gorgeous flowers, 2½ to 3 inches across. Splendid for permanent beds and cutting. Pkt. 5 cts.; ¼ oz. 25 cts.

Mixed Colors.—The most varied colors. Pkt. 3 cts.; ¼ oz. 15 cts.

Geranium—There is no pot and bedding plant more popular. They yield a succession of bloom till frost, and then make a splendid house plant. The flowers are of brilliant colors, the leaves exquisitely marked and sweet-scented.

Zonale.—A mixture of the finest sorts. Pkt. 10 cts.; ¼ oz. 60 cts.

Gilia—Annuals of easiest culture suited to any good soil. Fine for flower beds, edgings and rockeries. Mixed colors. Pkt. 3 cts.; ½ oz. 10 cts.

GILLIFLOWER.—See Stocks.

Globe Amaranth (Bachelor's Button).—Fine everlasting, bearing hundreds of clover-shaped flowers, which if cut when ripe and hung heads downward to dry, will retain their beauty throughout the winter. Mixed colors. Pkt. 5 cts.; ½ oz. 15 cts.

Godetia.

Godetia—Splendid hardy early-flowering; blossoms resembling satin. Easily grown in any soil. All colors and varieties mixed. Pkt. 5 cts.; ½ oz. 20 cts.

GOMPHRENA.—See Globe Amaranth.

GOURDS.—See vegetable pages.

Grasses—Ornamental.—For large groups or beds on lawns or in fence corners nothing gives a finer effect. If cut before fully ripe, the heads make splendid winter bouquets. Mixed varieties. Pkt. 5 cts.; oz. 25 cts.

Gypsophila (Baby's Breath).—Yields graceful sprays of pure white flowers; fine cut flower. Blooms first season if sown early. H.P. Pkt. 5c; ¼ oz. 25c.

HELIANTHUS.—See Sunflower.

Helichrysum (Eternal Flower).—Everlasting; cut when about to open and dry for winter bouquets; large, double, and of many colors. H.A. 2 feet high. Pkt. 3 cts.; ½ oz. 20 cts.

Heliotrope

Heliotrope—Easily grown from seed, flowering the first season. To have the longest blooming season, sow early indoors. T. P. Height 2 feet.

Lemoine's Giant.—Flowers double the size of older sorts. Pkt. 10 cts.; ½ oz. 40 cts. **Blue.**—The deepest blue. Pkt. 8c; ¼ oz. 60c. **White.**—Spotless white. Pkt. 8c; ¼ oz. 60c. **Mixed Colors.**—Many varieties and colors. Pkt. 5 cts.; ¼ oz. 40 cts.

Hibiscus —Showy and ornamental annual of easiest culture, bearing handsome single flowers 3 to 4 inches across; hardy. Pkt. 3 cts.; ½ oz. 15 cts.

Hollyhock

Hollyhock —In long rows against shrubbery, as a background for smaller plants and in clumps, hollyhocks give a striking effect. Hardy, blooming year after year, young plants giving the best flowers. Sow in April or May. Double, ranging from white to almost black.

Allegheny Hollyhock.—Blossoms the year round in the South. The nearly transparent, chrysanthemum-shaped, fringed flowers resemble crushed satin; seldom less than 5 inches across; semi-double to double. Pkt. 3 cts.; ¼ oz. 30 cts.

Double Hollyhocks.—All colors mixed. A choice mixture. Pkt. 5 cts.; ¼ oz. 25 cts.

EVERBLOOMING ANNUAL HOLLYHOCKS.—If sown outside in May, will bloom in August; if sown early indoors and transplanted in May, will bloom in June, producing flowers till frost in wonderful variety of colors. Pick out center spike to encourage growth of side branches.

Double Everblooming.—Pkt. 10 cts.; ½ oz. 20 cts.; ¼ oz. 35 cts.

Single Everblooming.—Pkt. 5c.; ¼ oz. 15c.

Humulus Japonicus (Japanese Hop).—An easily grown hardy annual climber, growing 15 to 20 feet. Fine for covering porches, trellises and unsightly places. Pkt. 5 cts.; ¼ oz. 15 cts.

Ice Plant—A curious plant, the leaves apparently covered with ice crystals. Especially fine for hanging-baskets and rockeries. Pkt. 5 cts.; ¼ oz. 15 cts.

HUNNEMANIA.—See Bush Escholtzia.

HYACINTH, or JACK BEAN.—See Dolichos.

INDIAN SHOT.—See Canna.

IPOMEA GRANDIFLORA.—See Moon-flower.

IPOMEA QUAMOCLIT.—See Cypress Vine.

IPOMEA SETOSA.—See Brazilian Morning.

Job's Tears Ornamental grass with broad, corn-like leaves; the seeds are used for beads. A fine everlasting for winter bouquets. Plant early in hills, 3 feet apart, 4 or 5 seeds to the hill. H. A. Height 3 feet. Pkt. 3 cts.; oz. 15 cts.; ¼ lb. 30 cts.

Kenilworth Ivy—A neat and charming hardy perennial trailing plant for boxes, baskets and rockeries. Lavender and purple flower. Pkt. 5 cts.

Kochia or Burning Bush —(Mexican Fire Plant).

A rapid growing, highly ornamental annual forming perfect pyramids 2½ to 3 feet high, covered with feathery green branches which, in the fall are thickly set with innumerable bright scarlet flowers. Sow indoors and transplant 2 feet apart in April. Pkt. 7 cts.; ½ oz. 10 cts.

Kudzu Vine—Jack and the Bean Stalk. A fine shade vine of wonderful growth. Pkt. 5 cts.; ½ oz. 45 cts.; oz. 75 cts.

Larkspur —Popular annual and perennial plants of the easiest culture, bearing on long spikes quantities of beautiful, graceful flowers of many colors.

Larkspur.

LOVE-IN-A-PUFF.—See Balloon Vine.

LOVE LIES BLEEDING.—See Amaranthus.

Lychnis Chalcedonica.—Easily grown, handsome plants, bearing clusters of brilliant flowers of many colors; continues fresh a long time. 2 feet high. H.P. Blossoms first season if sown early. Pkt. 3 cts.; ½ oz. 15 cts.

Marigold.

Marigold —Easily grown, free-flowering and extremely effective annuals, bearing their brilliant flowers till frost. Use the African for large beds or borders, the French for small beds, pots or as a foreground for larger plants.

Miniature Marigold.—Splendid for bedding, borders and pots. Neat, compact plants only 4 to 6 inches high, 6 inches across, covered with perfectly double variegated flowers. Pkt. 10 cts.

French Mixed.—A splendid mixture of the finest sorts. Pkt. 5 cts.; oz. 30 cts.

African Mixed.—All the best and newest varieties. Pkt. 5 cts.; oz. 30 cts.

Marvel of Peru (Four O'clock).—Open only in the afternoon or on cloudy days. Flowers showy and in great profusion. Blossoms first season. H.A. Height 2 feet. Mixed colors. Pkt. 3 cts.; oz. 15 cts.

FLOWERING MAPLE.—See Abutilon.
MARGUERITES.—See Carnation.
POT MARIGOLD.—See Calendula.
MARSHMALLOW.—See Hibiscus.
MEXICAN FIRE PLANT.—See Kochia.
MIMOSA.—See Sensitive Plant.
MOMORDICA.—See Balsam Apple and Pear.

Mignonette

In February or March, sow in boxes and thin out to make strong plants. Beginning in March, sow at intervals outside for a succession; in late summer sow in pots or boxes for winter blooming. Fall sowings bloom early the next spring. Prefers a cool temperature. H.A. One foot high.

Mignonette

Wood's Superb Mixture

—Made up of the newest and the best sorts. It includes all shades of color and varieties which produce the largest flower-spikes, some 12 to 15 inches long; deliciously fragrant. Pkt. 10 cts.; ½ oz. 30 cts.; oz. 50 cts.

Defiance.—Deliciously fragrant; fine for cutting, keeping fresh for days; flower spikes remarkably large. Pkt. 5 cts.; ½ oz. 20 cts.

Machet.—A splendid sort of bushy, vigorous and symmetrical growth; bears massive spikes of very fragrant red flowers. Fine for pot or garden culture. Pkt. 5 cts.; oz. 40 cts.

Sweet Mignonette.—Fragrant; large flowering. Pkt. 3 cts.; oz. 15 cts.

Mimulus or Musk Plant.—An attractive trailing plant for hanging baskets, window-boxes, etc.; bright green musk-scented foliage; numerous yellow flowers. Pkt. 5 cts.; ½ oz. 25 cts.

Moonflower (Evening Glory).—Grows 30 to 40 feet; covered every evening and cloudy day with large white flowers, 4 to 6 inches across. Cut the hard shell, soak for 24 hours, and plant an inch deep in moist soil in a box indoors, transplanting outside in a sunny position when frost is past. If kept moist will start in about two weeks. Pkt. 10 cts.; ½ oz. 30 cts.; oz. 50 cts.

JAPANESE MORNING GLORIES

One of the grandest climbers, the flowers measuring 4 to 6 inches across in limit; variety of colors and markings. The foliage is ornamental, some mottled and checkered; some rich, vivid green, others silvery white, others yellow. Sow in a warm, sunny situation, in rich soil, giving plenty of water in dry weather.

Double.—Bears a wealth of bloom nearly all double. Pkt. 10 cts.; oz. 50 cts.

Fancy Fringed.—The flowers are as big as saucers, ruffled from stem to margin like crumpled velvet. Pkt. 10 cts.; oz. 40 cts.

Single.—The original variety. The wonderful colorings of both flowers and foliage are beyond description. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 35 cts.

Morning Glories

Brazilian (*Ipomea setosa*).—A vigorous and luxuriant annual, growing 30 to 40 feet, and makes a thick shade. The flowers are 3 to 4 inches across, and of a beautiful rose color. Excellent for porches or arbors, covering an enormous space in a short time. Pkt. 5 cts.; oz. 25 cts.

Morning Glory (*Convolvulus Major*).—All colors mixed. Pkt. 3 cts.; oz. 10 cts.; ¼ lb. 30 cts.

Bush Morning Glory.—Bushy plants, 12 inches high, peculiarly adapted for bedding, pot and window culture. Blooms profusely, varying from white to deep violet. Pkt. 5 cts.; oz. 15 cts.

MOURNING BRIDE.—See Scabiosa.

MYOSOTIS.—See Forget-Me-Not.

Nemophila (Love Grove).—Singularly attractive hardy annuals, 6 inches high, bearing its bright flowers in great profusion. Pkt. 3 cts.; ½ oz. 15 cts.

Nigella (Love-in-a-mist, or Devil-in-a-Bush).—Handsome flower, requiring but little care. Flowers bright and showy. H.A. Height, 1 foot. Mixed colors. Pkt. 5 cts.; ½ oz. 15 cts.

Morning Glory.

Nicotiana Sanderae.—About 2 feet high and literally covered with bloom all summer and fall. Easily grown, flowering a few weeks after sowing. Mixed colors. Pkt. 5 cts.

OENOTHERA.—See Primrose (Evening).

Oxalis.—Splendid little plants, with brightly colored flowers, for hanging-baskets, rockwork or edgings. H.H.P. Mixed colors. Pkt. 5 cts.; ½ oz. 20 cts.

Passion Flower.—Splendid climbing, bearing hardy attractive fringed flowers; derives its name from its resemblance to a cross. Mixed colors. H.H.A. Height 10 feet. Pkt. 5 cts.

Pentstemon.—Excellent perennial plants for borders, bearing gorgeous blooms of purple, scarlet, rose and white, beautifully marked and spotted. H.P. Pkt. 5 cts.; ½ oz. 25 cts.

PALMA CHRISTI.—See Ricinus.

PELARGONIUM.—See Geranium.

PERIWINKLE.—See Vinca.

Insects on Flowers.—See Lemon Oil Insecticide and Sulpho-Tobacco Soap, page 47.

Wood's Peerless Nasturtiums

For the time and labor required no other annual will produce such a lavish profusion of bloom for so long a time as nasturtiums, and for brilliance and variety of color they are unexcelled. They bloom best in thin, well-drained soil; the richer the soil the fewer blooms and more leaf-growth. Dwarf Nasturtiums make fine bedding and border plants; the tall sorts are well adapted for covering trellises, unsightly places, etc. H. A.

Wood's Peerless Mixtures We have put into these mixtures the cream of all the standard and new varieties. All the brightest colors, the blotched kinds and all the newest varieties of distinct merit are in these mixtures. The colors vary from pearly white to almost black; every intermediate color is represented, giving the most varied and richest combination of colors ever offered in nasturtiums.

Dwarf Peerless Mixture.—Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.00 postpaid.

Tall Peerless Mixture.—Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.00 postpaid.

Dwarf or Tom Thumb Nasturtiums

All Varieties, unless otherwise quoted, pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.; lb. \$1.75 postpaid.

Variegated Leaved.—Strikingly beautiful even when not in bloom; each leaf is variegated with yellow, white and green. The flowers are of many colors and show to splendid advantage among the richly variegated foliage. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

Ivy Leaved.—Different from all other kinds in both flower and foliage. The flowers are star shaped, leaves are rich, deep green, veined with silvery white and resemble English Ivy. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 60 cts.

Aurora.—Terra cotta, veined with purplish carmine.

Beauty.—Canary yellow with scarlet markings.

Chameleon.—Flowers of several distinct colors are all borne on the same plant—some clear deep crimson, others blotched on light background, others beautifully mottled.

Crystal Palace Gem.—Sulphur yellow, blotched with carmine.

Empress of India.—Brilliant dark scarlet; dark leaved.

Golden King.—Rich, glowing, golden yellow; dark foliage.

Golden Leaved.—A fine mixture of all the golden leaved varieties; flowers all colors.

King of Tom Thumbs.—Deep scarlet flowers; rich dark foliage.

King Theodore.—Dark foliage; rich scarlet maroon.

Lady Bird.—Orange yellow; bright red blotch at base of petals.

Pearl.—(Moonlight).—Creamy yellow.

Rose.—Deep bright rose, tinted salmon.

Ruby King.—Ruby-red, with salmon tint.

Spotted.—An extra fine mixture of all spotted varieties.

Dwarf Varieties Mixed.—Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid. By express, \$1.50 per lb.

Lobb's Nasturtiums.—Flowers and foliage smaller than tall nasturtiums but more free-flowering and more intensely brilliant and varied.

Hybrids of Madam Gunther.—A French strain distinguished for its richness and variety of colors. Foliage especially handsome. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.60 postpaid.

Fancy Fringed.—The flowers are fringed or deeply cut around the entire bloom, particularly the three lower petals; colors range from yellow to scarlet. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50c.

Lobb's Nasturtiums Mixed.—A splendid mixture of the most brilliant colors. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50.

Wood's Peerless Nasturtium.

Tall or Giant Nasturtiums

All Varieties, unless otherwise quoted, pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid.

Variegated Leaved.—Leaves and flowers like the dwarf variety. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.

Ivy Leaved.—Similar to the dwarf variety, except in habit of growth. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 50 cts.

Chameleon.—Similar to Dwarf Chameleon.

Dark Crimson.—Rich and velvety.

Golden Leaved.—Foliage golden yellow; flowers all colors; striking.

Jupiter.—Giant flowered and giant leaved; the blooms measure 3 inches across, are bright golden yellow overlaid with orange.

Moonlight.—Creamy white.

Prince Henry.—Light yellow, marbled with scarlet.

Rose.—Bright soft pink; very choice.

Scarlet.—Brilliant shade of vermillion.

Spotted.—Clear yellow, marked with maroon blotches.

Sunlight.—Deep orange, blotched with crimson.

Twilight.—Chamois yellow, shaded with salmon rose.

Venus.—Rich velvety salmon; dark green leaves.

Tall Varieties Mixed.—Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.40 postpaid. By express, \$1.30 per lb.

WOOD'S ROYAL PANSIES

Saved from plants selected for the beauty and size of their blooms, our aim being variety and brilliancy of colorings, strong marking, abundance of bloom and long keeping qualities. Fall sowings produce earlier, larger and more brilliant blooms than spring sowings. They will stand the severest winter without protection. Grow them in a shady position in a rich, moist soil.

Pansies in Separate Colors

Each, pkt. 5 cts.; $\frac{1}{4}$ oz. 50 cts.; oz. \$1.50.

Cardinal.—Brilliant brownish red; very striking.

Emperor Frederick.—Dark red, with orange scarlet border.

Emperor William.—Ultramarine blue, with violet eye.

Fairy Queen.—Sky blue, with pure white border.

Faust, or King of the Blacks.—Almost black.

Fire King.—Golden yellow, the upper petals reddish brown, margined yellow; very showy.

Gold Margined.—Mahogany brown; gold border.

Lord Beaconsfield.—Violet, shading to white on upper petals.

Light Blue.—Lovely sky-blue, with dark eye.

Meteor.—Yellow, spotted with brown, margined with gold.

Silver Edged.—Dark purple, with a distinct white edging.

Snow Queen.—Beautiful, large, pure white.

Striped and Blotched.—Very brilliant.

White, Black Center.—Very fine and distinct.

Yellow.—Bright golden yellow, with dark center.

Wood's Royal Pansy.

Pansy Mixtures

Wood's Royal Pansy Mixture.—A magnificent mixture, excelling in an endless variety of the richest colors, which, with the large size and perfect form, make it indeed a "royal mixture." Pkt. 10 cts.; $\frac{1}{8}$ oz. 60 cts.; oz. \$3.50.

Wood's Exhibition Pansy Mixture.—The richest and handsomest pansy mixture in existence. It contains seeds saved from the finest specimen plants grown by eminent pansy specialists, making a mixture as near perfect as it is possible to obtain. The blooms average 2 to 3 inches across, of every imaginable pansy color and combination of colors, some five-spotted, others margined, veined, blotched and mottled in endless variety. Pkt. 25 cts.; 3 pkts. for 65 cts.

Wood's Superb Frilled.—Each petal is frilled or curled, giving the appearance of a double pansy. This unusual formation adds greatly to its keeping quality. Our mixture contains all the newest introductions and is very fine. Pkt. 15 cts.; 2 pkts. for 25 cts.; $\frac{1}{8}$ oz. 65 cts.

Giant Trimardeau.—A distinct strain with remarkably large blooms, generally marked with large blotches; colors rich and varied. Pkt. 8 cts.; $\frac{1}{4}$ oz. 50 cts.; oz. \$1.50.

Mixed Pansies.—Large Flowering.—A very superior mixture of all colors, shades and markings; rich and beautiful. Pkt. 5 cts.; $\frac{1}{4}$ oz. 40 cts.; oz. \$1.25.

PETUNIA

The richness of color, duration of bloom and ease of culture will always make petunias popular, especially for massing in beds. Flowers large and borne profusely. For early flowers sow in boxes and transplant when weather is warm, or later sow outside in a sunny place. H.H.A. Height, 1 to 2 feet.

Wood's Superb Fringed Petunias.—For size, beauty and luxuriance of flowers this strain is without an equal. The blooms are often 4 to 6 inches across, and nearly all exquisitely fringed or ruffled at the edges. But their greatest merit lies in the most beautiful and unusual colors, markings, blotches, stripings and veinings in the most beautiful and unusual combinations. Pkt. 25c; 3 pkts. for 65 cts.

Wood's Bedding Petunias.—A splendid strain bred especially for bedding. The dense, bushy plants grow only eight inches high, blooming so profusely as to fairly hide the plants. Pkt. 10 cts.; $\frac{1}{8}$ oz. 40 cts.

Rosy Morn.—Bears hundreds of rich, lasting blooms; brilliant rose color with white throats and white centers. Fine for beds and pots. Pkt. 8c; $\frac{1}{8}$ oz. 35c.

Snowball.—For an ever-blooming white flower for beds and borders this has few equals. Of dwarf habit and bears profusely; good size, sweet-scented and lasting. Pkt. 10 cts.; $\frac{1}{8}$ oz. 40 cts.

Double Petunias.—A splendid strain, producing a large percentage of double flowers of the largest fringed varieties in bright colors, beautifully marked. Pkt. 35 cts.

Single Petunias.—A choice mixture of all colors. Pkt. 5 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 75 cts.

PHLOX

Nothing can surpass these beautiful annuals in the magnificent display of their many and brilliantly colored flowers. Sown in the open ground in the early spring or fall, they come into flower in June, and are literally covered with bloom till frost.

Perennial or Hardy Phlox.—Fine for permanent beds and borders. Flowers are bright and of a great variety of colors. Plant as early as possible. Germinates slowly; 2 to 3 feet high. Pkt. 10 cts.; $\frac{1}{4}$ oz. 60 cts.

Large Flowering Dwarf.—Fine for pots, bedding and borders. Brilliant in color and profuse in bloom. Height, 6 inches. Mixed colors. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Star Phlox.—Extremely beautiful and of the most varied colors, distinctly bordered with white. Pkt. 8 cts.; $\frac{1}{8}$ oz. 25 cts.

MIXED PHLOX.—A mixture of all colors to be found in phlox. Pkt. 5 cts.; $\frac{1}{4}$ oz. 25 cts.; oz. 75 cts.

Grandiflora Phlox LARGE FLOWERING.—Remarkable not only for the brilliancy and variety of colors, but for the perfection and size of the flowers, which are nearly double as large as the ordinary phlox. Our large-flowering strain is extra fine, the flowers remarkably large, perfectly round, with overlapping petals.

Separate Colors.—Pure White, Rose Pink, Scarlet, Yellow, and Dark Purple, each, pkt. 10 cts.; $\frac{1}{4}$ oz. 35 cts.; oz. \$1.25.

MIXED.—A splendid mixture of all the best and most brilliant large-flowering varieties. Pkt. 8 cts.; $\frac{1}{4}$ oz. 30 cts.; oz. \$1.00.

Admiral Poppy.

Poppies

Hardy annuals and perennials of quick growth and easy culture, yielding a wealth of gorgeous blooms. For beds and borders nothing is better. Sow annual varieties where they are to bloom, perennial sorts may be transplanted. Barely cover the seed and press the soil firmly. Sow in the fall and at intervals during the spring for a succession. Cut the flowers regularly to insure a long blooming season.

Wood's Superb Poppy Mixture

—A grand mixture of all the newest and best double and single annual poppies, all varieties and every color. The wonderful variety and brilliant coloring make an effective display. Pkt. 10 cts.; ½ oz. 25 cts.; oz. 40 cts.

ANNUAL POPPIES

Special Mixed Single Poppies.—Contains only select varieties that will give a dazzling display of colors. Pkt. 7 cts.; ½ oz. 15 cts.; oz. 25 cts.

Special Mixed Double Poppies.—An elegant collection into which we have put only those that will produce flowers of the largest size and most gorgeous colors. Pkt. 7 cts.; ½ oz. 15 cts.; oz. 25 cts.

Double Scarlet Poppies.—A splendid mixture of many varieties. Pkt. 5 cts.; ½ oz. 15 cts.; oz. 25 cts.

Double Featherball.—A very beautiful snowy-white fringed poppy; resembles a ball of feathers. Pkt. 10 cts.

Admiral.—Large glistening pure white single flowers with broad band of brilliant scarlet at the top. Pkt. 5 cts.; ¼ oz. 20c.

Tulip.—Large single bright scarlet flowers; as dazzling as scarlet tulips. Pkt. 5 cts.; ¼ oz. 15 cts.

King Edward.—Deep scarlet, each petal marked with a dark blotch. Pkt. 5 cts.; ½ oz. 20 cts.; oz. 30 cts.

Shirley.—Remarkably brilliant and free-flowering. Range from pale rose to deep crimson, delicately edged and fringed. Mixed colors. Pkt. 3 cts.; ½ oz. 15 cts.

Double Carnation-Flowered.—A magnificent fringed poppy of dazzling richness and variety of colors. Pkt. 3 cts.; oz. 15 cts.

Double Peony-Flowered.—Splendid large flowers, resembling peonies. Mixed colors. Pkt. 3 cts.; oz. 15 cts.

California Poppy.—See Escholtzia.

PERENNIAL POPPIES

Oriental.—Often six inches across; the colors range from soft pink to dazzling scarlet and richest purple maroon; perfectly hardy, increasing in size and beauty each season. Pkt. 10c; ¼ oz. 50c.

Iceland.—Resembles crushed satin; blooms continually from June to October, blooming the first season and for 3 to 4 years following. All colors mixed. Pkt. 8 cts.; ¼ oz. 35 cts.; oz. \$1.00.

Portulaca

(MOSS FLOWER).—Succeeds in a sunny situation, and produces flowers of almost every color in great profusion. The double is especially beautiful. Sow when weather is settled warm. T.A. Height 6 inches.

Single Mixed Colors.—Pkt. 5 cts.; ½ oz. 35 cts.; oz. 60 cts.

Double Mixed Colors.—Pkt. 10c; ¼ oz. 60c.

Primrose—Chinese Primroses are among the finest winter and spring flowering window and greenhouse plants. The Evening Primrose is a splendid summer and fall flower for mixed borders.

Primula Sinensis (Chinese Primrose).—Large flower, beautifully fringed and borne in great profusion. Sow in May or June, transplanting to pots. Mixed colors. Pkt. 25 cts.

Evening Primrose.—The well-known English Primrose. Flowers large, showy and fragrant. Pkt. 3 cts.; ½ oz. 20 cts.

Pyrethrum—Few plants are more popular for borders. The bright yellow foliage makes it especially effective. Pkt. 3 cts.; ¼ oz. 15 cts.

RAGGED ROBIN.—See Centaurea Cyanus.

Ricinus (Caster Bean).—Tall majestic plants with palm-like leaves. Fine for backgrounds and centers for beds of foliage plants. All the best sorts, including the bronze, copper-brown, green and purple leaved kinds mixed. Pkt. 3 cts.; oz. 10 cts.; ¼ lb. 30 cts.

Rose Campion (Agrostemma).—Resemble single pinks. Foliage soft, silvery white. Splendid for dry situations and for massing in beds. H.P. Height 1 foot. Blooms first season. Mixed colors. Pkt. 3 cts.; ½ oz. 15 cts.

Rudbeckia (Coneflower).—A rich free-flowering annual bearing single, semi-double and double flowers of many forms; some have broad petals, others twisted. The dominant color is yellow surrounding a velvety brown cone-shaped centre. Pkt. 8c; ¼ oz. 25c.

Salpiglossis—Beautiful bedding and border plants with richly colored, funnel-shaped flowers—scarlet, crimson, yellow, buff, purple and blue-black, many, beautifully veined and marbled. Sow indoors in February or March or outside later. H.H.A. Pkt. 5 cts.; ¼ oz. 20 cts.

Scabiosa, or Mourning Bride.

Scabiosa

—The Mourning Bride or Sweet Scabious of the old time gardener but in every way improved. The blooms are perfectly double, fragrant, handsome and elegant, the colors ranging from pure white to nearly black. Makes a grand cut-flower. H.A. 2 feet high. Pkt. 5 cts.; ½ oz. 25 cts.

Sensitive Plant (Mimosa).—Curious plants with graceful and elegant foliage. The branches and leaves when touched, droop in a most interesting manner. Easily grown. T.A. Height 1 foot. Pkt. 5 cts.

Salvia or Scarlet Sage

A standard bedding and border plant, keeping the garden bright with dazzling scarlet flowers during the summer and fall, also makes a fine pot plant. Start early indoors or in frames, and transplant in May; or sow outdoors later in a light, rich soil.

Fireball.—Larger flowered and more free flowering than any other salvia, 20 inches high and covered with flower spikes, each bearing 20 to 30 intense scarlet flowers. Pkt. 15 cts.; ¼ oz. \$1.00.

Splendens (Scarlet Sage).—The scarlet variety. Pkt. 10 cts.; ¼ oz. 45 cts.; oz. \$1.50.

SILENE.—See Catchfly.

Smilax—A splendid window vine. Will keep for days without wilting. Soak for a day and sow in a box in March and keep moist. Slow to germinate. Pkt. 5 cts.; ½ oz. 25 cts.; oz. 40 cts.

Stocks

(Gilliflower).—Useful annuals for bedding, borders, cut-flowers and pot culture. Sow in February or March in the house, transplant to pots or boxes when an inch high, and set out the end of April, when sowings should be made outside. Bear immense amount of fragrant blooms, each plant forming a perfect bouquet. H.H.A.

Cut - and - Come - Again, or Princess Alice.—Extra fine for cutting; a foot high, throwing outside branches, each bearing fine, rosette shaped double flowers. The oftener they are cut the better they like it. Mixed colors. Pkt. 7c; ½ oz. 30c.

Dwarf German Mixed.—A fine large-flowering strain of many colors. Pkt. 5 cts.; ¼ oz. 30 cts.; oz. \$1.00.

SNAKE CUCUMBER.—See Cucumis.

SNAPDRAGON.—See Antirrhinum.

Bon Arbor—A complete, odorless, condensed plant fertilizer soluble in water; contains plant food in the necessary proportions to sustain a strong, healthy growth. One pound makes 30 gallons. By mail postpaid, ½ lb. pkgs. 33 cts.; lb. pkgs. 60 cts.; 5 lb. pkgs. \$1.90. By express, ½ lb. pkgs. 25 cts.; 1 lb. pkgs. 50 cts.; 5 lb. pkgs. \$1.75.

Sulpho-Tobacco Soap—A wonderful insecticide and fertilizer for flowers; excellent for preventing mildew and lice on roses; helps to grow healthy plants and beautiful flowers. Absolutely safe to handle. 3-oz. cake 10 cts.; 8-oz. cake 25 cts. postpaid. A 3-oz. cake makes 1½ gallons of solution; an 8-oz. cake makes 4 gallons.

Stocks or Gilliflower.

Woods Giant Sweet Peas

AN OUNCE WILL PLANT 25 FEET OF ROW

Out of more than two hundred varieties of sweet peas now in cultivation, we have selected those offered below as representing the choicest of each color. They are the cream of all the most improved large-flowering varieties, all small-flowered, inferior, weakly kinds and duplicates being discarded. This will be quite a convenience to our friends who have been confused by a long and cumbersome list. Our selection covers a complete range of color from the purest white to deepest maroon, every sort of distinct merit, and all will bear three or four blooms to the stem.

CULTURE.—Some time before planting dig out a trench a foot deep, put in several inches of well-rotted manure and cover with six inches of earth. Early in February open the row three to four inches deep, drop the seeds (about four seeds) every three inches, cover about two inches, and two or three times during the season bank the soil against the roots. The white-seeded kinds are tenderer than the black-seeded, and should not be planted too early. They may also be planted in October, November and December, planting four to six inches deep; give slight protection and they will become well rooted and grow off at the first opening of spring and produce an abundance of bloom earlier and for a longer season than spring plantings.

Don't gather the blooms grudgingly—the more you cut them the better and longer they bloom.

Sweet Peas in Mixtures

Wood's Special Mixture —A peerless mixture and absolutely the finest that can be made. It is a blend of the best sweet peas in cultivation, no dull colors, all choice giant flowering varieties of every color and type, the colors being evenly distributed throughout. No matter at what price or under what high-sounding name it may be offered, for diversity of color, size and beauty of flowers, no other sweet pea mixture can surpass our "Special Mixture." Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50 postpaid.

Wood's Superb Spencer Mixture —The newest introduction in sweet peas, differing from the old type in having waved or fluted standards. The flower stems are 12 to 14 inches long, very strong, and usually bear four blooms, which, under favorable growing conditions, measure two inches across. Pkt. 10 cts.; oz. 20 cts.; ¼ lb. 60 cts.; lb. \$2.00 postpaid.

Large Flowering Mixed —A very good mixture of all the old varieties; will give a good display throughout the season. Pkt. 3 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00.

Bush Sweet Peas —Forms a perfect bush 15 to 18 inches high and produces a mass of bloom at the top of the plant. Requires no support when grown in rows, but single plants should be staked. Mixed colors. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50 postpaid.

Perennial or EVERLASTING SWEET PEAS.—Once planted, these live year after year, bearing magnificent clusters of flowers early in the spring before the annual kinds begin to flower. Perfectly hardy; 8 to 10 feet high. Mixed colors. Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.

Cupid Sweet Peas —Distinct from other sorts; 6 to 9 inches high, spreading out and forming a mass 1¼ feet across. Very neat, compact, bushy, with flowers as large and fragrant as the tall kinds. Fine for pots, borders and masses. Pkt. 5 cts.; oz. 15 cts.; ¼ lb. 45 cts.; lb. \$1.50 postpaid.

Grandiflora Varieties

ALL VARIETIES—Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 40 cts.; lb. \$1.50 postpaid.

Apple Blossom (Deep Pink).—Standard crimson pink, shading lighter at edges; wings white shaded with pink.

Black Knight. Very deep maroon, almost black; large size; open form; the finest dark variety.

Bolton's Pink (Orange Pink).—Orange or salmon pink, veined with rose; large flower, bright and extremely showy.

Coccinea (Red).—Bright cherry red or cerise. A distinct shade; a very pleasing and effective flower of great size.

Dainty (White).—Large pure white; edges tinted with pink; long stems; usually bears four blossoms to the stem.

Dorothy Eckford (Pure White).—Beautiful shell shaped pure white flower of extra large size, borne three on a stem.

Flora Norton (Blue). A clear bright blue, with faint tint of purple. The clearest and most pronounced of all the blues.

Helen Pierce.—Bright blue marbled or mottled on ivory white like a fine gloxinia; very attractive.

Hon. Mrs. E. Kenyon (Primrose).—Deep primrose yellow; a beautiful extra large flower.

Henry Eckford (Orange Scarlet).—A distinct orange scarlet of the finest form and largest size; as beautiful under artificial light as in daylight.

King Edward VII (Crimson Scarlet).—A fine extra large flower; nearly always borne three on a stem.

Lady Grisell Hamilton (Lavender).—Best of all the lavender varieties; extra large; an exceptionally fine flower.

Lord Nelson or Brilliant Blue (Navy Blue).—A fine deep, dark, rich navy blue; very attractive.

Lovely (Shell Pink). A soft and pleasing flower of large size; nearly always bears four blossoms on a stem.

Miss Willmott (Orange Pink). A fine shade; unusually large; stems long; a vigorous grower.

Mrs. Geo. Higginson (Blue).—Clear delicate lilac blue; might be called light lavender; usually three blossoms on a stem.

Mrs. Walter Wright (Rosy Purple).—Changes to rich bluish purple; extra large shell-shaped flower.

Prima Donna (Pink). A clear and soft shade; bears 3 to 4 flowers to the stem.

Queen Alexandra (Scarlet).—The nearest scarlet in sweet peas; magnificent large flower.

Queen Victoria (Light Primrose).—Pink when newly opened, but soon turns to a clear, soft primrose.

Wood's Superb Spencer Sweet Peas

Sweet Pea Inoculating Culture.

To guard against failure with sweet peas, to improve the growth, to have more, larger and better blooms, inoculate with Mulford's Sweet Pea Inoculating Culture. By mail postpaid 60 cts; by express 50 cts.

Spencer Varieties

ALL VARIETIES—Pkt. 10 cts.; oz. 35 cts.; ¼ lb. \$1.00.

1 Pkt Each 10 Varieties for 85 cts.

Afterglow. Standard violet blue shading to rosy amethyst; wings electric blue.

Bertrand Deal (Rosy Lilac).—Makes a fine cut flower; an exquisite variety.

Captain of the Blues (Pure Purple).—The margin of the petals is marbled; large and distinct.

Countess Spencer.—Soft rose-pink, shading deeper at the edges.

Etta Dyke.—Pure white; nearly two inches across; yields four blossoms to the stem.

Gladys Unwin.—Large bold bright pink. The grandest of all pink varieties.

Helen Lewis.—Large and fine orange salmon pink with bright orange standard. One of the finest Spencers.

King Edward Spencer.—The best pure red Spencer; nearly two inches across. Often bears four blossoms to the stem.

Margaret Atlee. Apricot pink on cream ground. A strong grower and large flower.

Masterpiece.—Lavender; flowers extra large and wavy. Stems nearly always yield four blossoms each.

Nubian.—Beautiful rich deep chocolate; finely waved flower of unusual size.

Stokesia cyanea (Cornflower Aster).—A beautiful hardy perennial for the permanent border or beds. Easy to grow; blooms the first season, producing its handsome lavender-blue cornflower blossoms from June till frost. **Pkt. 10 cts.**

Sunflower.

Sunflower—The tall kinds make excellent centers of beds and backgrounds for other plants, also for growing in fence corners, etc. The dwarf are fine for cut-flowers and general decoration. Sow in April. H.A.

Double Chrysanthemum Flowered or Japanese.—The most beautiful of all double sunflowers. Perfectly double; bright golden yellow. **Pkt. 5 cts.; oz. 20 cts.**

Plumed Sunflower.—Very unique; the center is like a tuft of small feathers; this is surrounded by a circle of downward turned petals varying from light to deep yellow. **Pkt. 7 cts.; ¼ oz. 20 cts.**

Miniature Varieties Mixed.—All the newest and best varieties, some a single color, others black centered, with golden yellow petals, others resembling cactus dahlias; many with curiously twisted petals, but all beautiful. **Pkt. 7 cts.; oz. 35 cts.**

Double California.—Double yellow variety, 3 to 5 feet high. **Pkt. 3 cts.; oz. 15 cts.**

Perennial Sunflower.—Fine for permanent hardy border and cutting. A fine mixture of the best varieties. Sown early will flower the first season. **Pkt. 10 cts.; ¼ oz. 60 cts.**

Mammoth Russian.—The giant flowered sunflower; 5 to 8 feet high. **Pkt. 3 cts.; oz. 5 cts.; ¼ lb. 15 cts.**

Sweet William

Sweet William—Makes an elegant display, producing a succession of flower clusters for several weeks, the colors varied, ranging through all shades from pure white to nearly black. If sown early, will bloom the following fall and spring; fall sowings bloom the next summer. H.P. Height 1½ feet. **Single.**—Many bright colors mixed. **Pkt. 5 cts.; ¼ oz. 15 cts.; oz. 35 cts.** **Double.**—All colors mixed. **Pkt. 5 cts.; ¼ oz. 25 cts.; oz. 75 cts.**

SWEET ALYSSUM.—See Alyssum.

SWEET PEAS.—See next page.

SWEET SULTAN.—See New Varieties.

TROPÆOLUM.—See Nasturtium.

TOUCH-ME-NOT.—See Balsam.

TASSEL FLOWER.—See Caccalia.

Thunbergia—A rapid climber growing 4 to 6 feet high. Splendid for trellises, fences, etc., bearing beautiful flowers—white, yellow and buff, with black eye, in profusion. H.H.A. **Pkt. 5c.**

Torenia Fournieri.—Extremely handsome grown in pots or outside in a shady place. A fine annual with trumpet-shaped, sky-blue flowers with spots of dark indigo and yellow throats. T.A. Height 1 foot. **Pkt. 10 cts.**

Verbena.

Verbena—Annual for beds, borders, massing, window-gardens, covering mounds, etc. Flowers of most brilliant colors, blooming from early summer till late fall. Soak a few hours and sow in boxes indoors, transplanting when an inch high, or sow outside in April. Plants grown from seeds do not rust.

Defiance.—Intense rich brilliant scarlet. **Pkt. 5 cts.; ¼ oz. 30 cts.; oz. \$1.00.**

Mammoth White.—A splendid strain of large pure white. **Pkt. 10 cts.; ¼ oz. 30 cts.; oz. \$1.00.**

Mammoth Mixed.—Blooms of largest size and most brilliant colors. **Pkt. 8 cts.; ¼ oz. 30 cts.; oz. \$1.00.**

MIXED VERBENAS.—All colors in a fine mixture; flowers large. **Pkt. 5 cts.; ¼ oz. 25 cts.; oz. 75 cts.**

Vinca (Periwinkle).—Splendid bedding plants, also useful for window-gardens, house plants and borders. Bears large pink and white single flowers in greatest abundance. If sown early indoors and transplanted to a warm place, will bloom the same summer and fall, and taken inside for winter flowering. T.P. Height 2 feet.

Rosea.—Pink, with crimson eye. **Pkt. 5 cts.; ¼ oz. 25 cts.**

Alba.—White; rose eye. **Pkt. 5c; ¼ oz. 25c.**

Mixed Colors.—**Pkt. 5 cts.; ¼ oz. 25 cts.**

Violet—Yields delightfully fragrant flowers, popular with every one. Sow in beds and transplant. Germinates slowly.

Blue.—Very large, deep blue. **Pkt. 10 cts.**

White.—Large flowering. **Pkt. 10 cts.**

Mixed Colors.—**Pkt. 8 cts.; ¼ oz. 60 cts.**

VIRGIN'S BOWER.—See Clematis.

Virginian Stock—Beautiful, free-flowing annual for beds and edgings; succeeds well in any soil. Mixed colors. H.A. **Pkt. 3 cts.; oz. 25 cts.**

Wallflower—A favorite garden flower, producing large spikes of deliciously fragrant blooms of many colors. Useful for beds, borders and winter house plants. Sow early and transplant while small. As cold weather approaches, put into pots for winter blooming. T.P. Height 1½ feet.

Annual Wallflowers.—If sown outside in April, bloom from July till frost; bloom even earlier if started in boxes and transplanted in May. **Pkt. 10 cts.; ¼ oz. 25 cts.**

Single.—A fine mixture of all shades. **Pkt. 3 cts.; ¼ oz. 20 cts.**

Double.—Very large and fragrant. **Pkt. 10 cts.; ½ oz. 50 cts.**

Zinnia—Few flowers are more easily grown, bloom more abundantly or give a more gorgeous summer and fall display. Perfectly double, and when fully expanded resemble dahlias, and are almost every shade of color. Fine for bedding and massing. H.A.

Crisp and Curly.—Entirely distinct, having loose, curly petals like a Japanese chrysanthemum. Silvery white, carmine, light scarlet, cream white and light yellow are the predominating colors. **Pkt. 10 cts.; ¼ oz. 30 cts.**

Curled and Crested.—A strain of fantastically shaped flowers, with twisted petals. **Pkt. 5 cts.; ¼ oz. 25 cts.**

Miniature.—The dwarfest zinnia in existence, only 9 inches high, and a perfection of bloom not usually found among zinnias. Of special value for small groups, beds and borders. **Pkt. 10 cts.; ¼ oz. 25 cts.**

Tom Thumb.—Very dwarf, excellent for beds and borders. Double and of very bright colors. **Pkt. 7 cts.; ½ oz. 25 cts.**

Double Striped, or Zebra.—Profuse bearer of fine double flowers in many colors. **Pkt. 5 cts.; ¼ oz. 25 cts.**

Grandiflora Zinnias.

Grandiflora Zinnias.—Giant zinnias; perfectly double. The most brilliant colors mixed. **Pkt. 10 cts.; ½ oz. 35 cts.; oz. 60 cts.**

Double Mixed Zinnias.—A fine mixture of the best tall zinnias. All colors mixed. **Pkt. 3 cts.; ½ oz. 20 cts.; oz. 35 cts.**

MIXED FLOWER SEEDS

Sow broadcast amongst shrubbery or in unsightly corners, and you will be surprised at the pleasing effect. Our mixture contains hundreds of easily grown, bright colored summer blooming flowers. **Pkt. 3c; oz. 10c; ¼ lb. 30c; lb. \$1.00 postpaid.**

Bulbs for Spring Planting

Should Our Stock of Any Variety Be Sold Out, We Will Send the One Most Closely Resembling the Sort Ordered

Cannas —Gorgeous and effective bedding plants. They grow well in any soil, but respond quickly to liberal treatment. In groups or as backgrounds for smaller plants they present a brilliant and continuous display till frost.

SUPERB NEW CANNAS

Price, 25 cts. each; \$2.25 per doz. postpaid. By express, 20 cts. each; \$2.00 per doz.

City of Portland —4 feet. The most beautiful pink; a fine bedding and profuse bloomer.

Meteor —4 feet. A magnificent bedding canna and unqualifiedly the best deep red.

Mrs. Alfred F. Conard —4 feet. Exquisite salmon pink flowers of the largest size, becoming more brilliant as it matures.

Panama —3½ feet. A particularly noteworthy canna; orange red with a well defined edging of bright yellow.

Rosea Gigantea —4 feet. A giant in size and a wonderful bloomer. Soft rose, shading to carmine-pink.

Wabash —4 feet. Like Rosea Gigantea, but has bronze leaves. Unique and exceedingly attractive.

Wintzer's Colossal —4 feet. The largest of all cannas, often over 8 inches across; bright scarlet.

STANDARD CANNAS

Price, 15 cts. each; \$1.10 per doz. postpaid. By express, 10 cts. each; 90 cts. per doz.

Austria —5 feet. Pure canary yellow with red spots in center of the two inside petals.

Florence Vaughan —5 feet. Rich golden yellow, thickly dotted with bright red.

Italia —5 feet. Bright orange scarlet with broad yellow border; orchid flowered.

King of Bronzes —6 feet. A superb foliage canna; and bright red flower.

King Humbert —4 feet. Brilliant orange scarlet with bright red markings.

Louisiana —6 feet. Vivid scarlet; often 6 inches across; orchid flowered.

Maros —4 feet. The best white canna; very free bloomer.

Pennsylvania —5 feet. Intense vermilion scarlet overlaid with orange.

Richard Wallace —4½ feet. Canary yellow; an exceptionally large flower.

Uncle Sam —6 ft. Brilliant orange scarlet; borne in large clusters.

Wyoming —6 feet. A beautiful shade of orange with purplish bronze foliage.

Mixed Cannas —By mail, postpaid, 10 cts. each; 3 for 25 cts.; 95 cts. per dozen. By express, 70 cts. per dozen; 50 for \$2.75; \$5.00 per 100.

Dahlias —We offer below a well selected list of these grand fall flowers. Each variety represents the finest flower of its color and style of bloom. The words "show," "decorative," "fancy" and "cactus" after the names of the varieties indicate the type of flower.

SPLENDID NEW DAHLIAS

30 cts. each; 3 for 75 cts.; \$2.50 per dozen postpaid. By express, 25 cts. each; \$2.25 per dozen.

Golden Gate (Cactus) —A charming pure golden yellow, shading to old gold. Very large, a remarkable bloomer and fine cut flower.

Jean Charmet (Decorative) —7 inches or more across with long wide petals; bright pink with crimson edges; stems long; extra fine.

Mrs. F. Grinstead (Cactus) —A deep rich crimson, lightly shaded with purple. The petals are beautifully incurved; extra large.

STANDARD DAHLIAS

All varieties 20 cts. each; 3 for 50 cts.; \$1.50 per doz. postpaid. By express, 15 cts. each; \$1.25 per dozen.

Black Beauty (Decorative) —Large dark velvety maroon; distinct form.

Chas. Lanier (Show) —The largest yellow show dahlia; amber shaded.

Clifford W. Bruton (Decorative) —Rich clear yellow; perfectly double.

Crimson Beauty (Cactus) —Clear, brilliant, glowing crimson; dainty and exquisite.

Cuban Giant (Show) —Immense ball-shaped blooms; rich velvety purple, shaded maroon.

Flora (Decorative) —Pure white, extra large, early; profuse and continuous bloomer.

Jack Rose (Decorative) —Velvety crimson, like the Gen'l Jacqueminot rose.

Judah (Decorative) —Pink or cream, striped with crimson.

Kriemhilde (Cactus) —An exquisite shade of pink; a constant bloomer.

Libella (Cactus) —Beautiful dark purple of good size and with full center.

Mrs. Charles Turner (Decorative) —Clear canary yellow. Flowers of immense size; free bloomer.

Orator (Show) —Salmon buff; an extra large, very fine flower.

Rheinkonig (Cactus) —Snow-white flower 5 inches and over in diameter; a grand cut flower.

Susan (Show) —Beautiful delicate soft shell pink; very fine.

Sylvia (Decorative) —Mauve pink, changing to white in the center.

Mixed Dahlias —A fine mixture of many colors; decorative, show cactus and fancy varieties. 15 cts. each; 5 for 60 cts.; \$1.25 per doz. postpaid. By express, 10 cts. each; dozen 90 cts.

Gladiolas —For a succession plant at intervals from April till June. Plant 6 inches apart and 4 inches deep.

America —A grand pink; flower spikes 2 to 3 feet long. 5 cts. each; 40 cts. per doz. postpaid. By express, 35 cts. per doz.; \$2.50 per 100.

Augusta —Lovely pure white; often has 2 or 3 branches. 5 cts. each; 40 cts. per doz. postpaid. By express, 35 cts. per doz.; \$2.50 per 100.

Empress of India —Rich dark velvety red; white throat. 7 cts. each; 75 cts. per doz. postpaid. By express, 70 cts. per dozen; \$5.00 per 100.

Europa —Pure glistening white; nearly all open at once. The best white. 12 cts. each; \$1.25 per dozen postpaid.

Klondike —Clear yellow, with maroon blotch in the throat. 5 cts. each; 50 cts. per doz. postpaid. By express, 45 cts. per doz.; \$3.50 per 100.

Kunderi Glory —The "ruffled" gladiola. Creamy white, shading to delicate lavender; petals fluted. 8 cts. each; 80 cts. per doz. postpaid.

Mrs. Francis King —Brilliant flamingo pink blazed with vermilion red; blooms 4 inches across. 5 cts. each; 40 cts. per doz. postpaid. By express, 35 cts. per doz.; \$2.50 per 100.

Niagara —Creamy yellow; throat lightly marked with rosy-carmine; fine cut flower. 8 cts. each; 80 cts. per doz. postpaid. By express, 75 cts. per doz.

Panama —A grand deep pink; flowers large and handsome; the finest pink variety. 7 cts. each; 75 cts. per doz. postpaid. By express, 70 cts. per doz.

Peace —Immense pure white with a touch of carmine in the lower petals. 10 cts. each; \$1.00 per dozen postpaid.

Pink Perfection —Delicate apple blossom pink suffused with chamois; exceedingly lovely. 10 cts. each; \$1.00 per dozen postpaid.

Princeps —Rich dazzling scarlet, the lower portion marked with white; large open flower. 6 cts. each; 60 cts. per dozen postpaid. By express, doz. 55 cts.

Schwaben —Clear canary yellow; blotch of deep garret in the throat. 10 cts. each; \$1.00 per dozen postpaid.

War —A magnificent rich ox-blood red shaded with dark crimson. 15 cts. each; \$1.50 per dozen postpaid.

CALADIUMS

(ELEPHANT'S EAR) —A very effective plant for beds or groups, especially in lawns. To have the best results they must have an abundance of water and plenty of rich manure. When full grown, they stand 6 to 8 feet high, and bear immense light-green leaves 3 to 4 feet long by 2 to 2½ feet wide.

First Size Bulbs —Over 12 inches in circumference. 20 cts. each; \$2.00 per doz. Postage 12 cts. each.

Second Size Bulbs —9 to 12 inches in circumference. 15 cts. each; \$1.50 per doz. Postage 10 cts. each.

Third Size Bulbs —6 to 9 inches in circumference. 12 cts. each; \$1.00 per doz. Postage 8 cts. each.

Fourth Size Bulbs —Under 6 inches in circumference. 8 cts. each; 75 cts. per doz. Postage 6 cts. each.

Fancy Leaved Caladiums

Superb foliage plants for window and porch boxes and shaded places outdoors. Beautiful designs and gorgeous colorings. 20 cts. each; 3 for 50 cts.

Madeira Roots —One of the most popular climbers. Makes a thick shade, grows rapidly. 5 cts. each; 4 for 15 cts.; 45 cts. per dozen postpaid. By express, 40 cts. per doz.

TUBEROSES

Delightfully fragrant; fine for bouquets. Plant when the ground gets warm or start in pots or in hot beds and set outside in May. Give plenty of water.

EXCELSIOR PEARL —Mammoth Bulb. 6 cts. each; 4 for 20 cts.; dozen 50 cts. postpaid. By express, 5 cts. each; dozen 35 cts.; 100, \$2.50. Large Bulb, 5 cts. each; 4 for 15 cts.; dozen 35 cts. postpaid. By express, dozen 25 cts.; 100, \$1.50.

ALBINO —A branching single variety, blooming twenty days earlier than other sorts. 5 cts. each; 6 for 25 cts.; dozen 45 cts. postpaid. By express, dozen 35 cts.; 100, \$2.50.

VARIEGATED LEAVED —The leaves are bordered with creamy white. Blooms earlier than Excelsior Pearl. Has large single flowers. 5 cts. each; 6 for 25 cts.; dozen 45 cts. postpaid. By express, dozen 35 cts.; 100, \$2.50.

Hardy Flowering and Ornamental Shrubs

The planting of flowering and ornamental shrubs is increasing to a wonderful extent, as they give more real lasting satisfaction than any other form of decorative plants. After they are once planted they increase in growth, size and beauty each year, and require very little attention.

The earlier in the spring these shrubs are set out, the better, although they can be safely transplanted up to the first of April. In planting out they should be set out a little deeper than the marks show they were originally set in the nursery rows. Thoroughly well rotted manure should be incorporated with the soil at the time of planting, or in the absence of well rotted manure, an application of good ground bone should be given for the best growth and results.

Orders for NURSERY STOCK are shipped direct from our KENBROOK FARM, and cannot be shipped with orders for seeds.

HYDRANGEA PANICULATA GRANDIFLORA.—Produces in July immense panicles of pure white flowers, which last for several weeks; a most valuable shrub. A large bed of this plant makes a most striking appearance. This shrub should be grown in rich ground and cut back severely during winter. It will then produce magnificent flower-heads. 2 to 2½ ft. 30 cts. each; \$3.00 per doz.

DESMODIUM PENDULIFLORUM —A Shrub which dies to the ground in winter, but comes up vigorously in spring, throwing up shoots 3 to 4 feet high, which bear during September, when few Shrubs are in bloom, attractive sprays of bright rose-colored pea-shaped flowers. 25 cts. each.

EUROPEAN BURNING BUSH (Euonymus Europeans). height. The seeds of this, light yellow in color, are quite ornamental. 30 cts. each; \$3.00 per dozen.

CRAPE MYRTLE (Lagetroemia).—A handsome free flowering shrub, which blooms throughout the summer, producing great masses of beautifully fringed flowers. In Northern States the plants should be lifted in the fall and kept in a cellar.

INDICA.—Delicate soft pink. 50 cts. each.

CALYCANTHUS FLORIDUS (Sweet or Strawberry Shrub).—An old favorite. Double chocolate-colored, strawberry-scented flowers. 25c each.

SPIRAEA THUNBERGII.—Of dwarf habit; branches slender and drooping; foliage very narrow light green, changing to bright orange, and red in fall; flowers small and white, and appear early in March, lasting three weeks. A beautiful variety for dwarf or low-growing hedge. 25 cts. each; \$2.50 per dozen.

VAN HOUTTEI.—Grows to a height of 3 to 4 feet. One of the very finest Spiraeas. In May, before the leaves appear, all the branches are clustered to their full extent with single flowers, which produce a charming effect. 30 cts. each; \$3.00 per dozen.

ANTHONY WATERER.—The finest of the dwarf Spiraeas, and a grand acquisition. It excels all other Spiraeas in brilliancy of color, a purple-crimson, and is the most profuse and persistent bloomer of them all, bearing continuously large, flat clusters of bloom throughout the summer and autumn. 30 cts. each; \$3.00 per dozen.

REEVES SINGLE (Reevesiana).—Produces large clusters of single white flowers, which cover the entire plant. A desirable early spring bloomer. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

REEVES DOUBLE (Reevesiana flore pleno).—With large, round clusters of double white flowers, which cover the entire plant. A most desirable early spring bloomer. Commences to bloom latter part of March and continues for several weeks. One of the best. 30 cts. each; \$3.00 dozen.

WAYFARING TREE (Viburnum lantana).—Large shrub, 10 to 15 feet tall. Flowers white, produced in large cymes in April. Berries bright red, changing to black. 2 to 3 feet. 35 cts. each; \$3.50 per dozen.

PRIVET CALIFORNIA.—A rapid grower, and thrives on all soils and makes a magnificent hedge or screen. Foliage is dark, glossy green, and is evergreen until late in winter. It has an erect habit of growth. One year, 10 to 18 inches, at \$2.75 per 100; \$22.50 per 1,000. Two years old, 18 to 24 inches, \$3.50 per 100; \$30.00 per 1,000.

IBOTA (Japanese).—A handsome evergreen shrub of dense and symmetrical outline. Native of Japan. Leaves thick, dark lustrous green, often with a reddish margin and midrib. Flowers creamy white, disposed in loose panicles. The berries are bluish black with a bloom. Specimen plant 3 to 4 feet, 35 cts.

BARBERRY COMMON or EUROPEAN (Berberis vulgaris). —A handsome deciduous shrub, with yellow flowers in terminal drooping racemes in May and June, followed with orange-scarlet fruit. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

PURPLE LEAVED (Berberis var Purpurea).—An interesting shrub, growing 3 to 5 feet high, with violet-purple foliage and fruit; blossoms and fruit beautiful, very effective in groups and masses or planted by itself. 2½ to 3 feet, 30 cts. each; \$3.00 per dozen.

JAPANESE (Berberis Thunbergii).—Where a good dwarf, bushy hedge is desired, there is no shrub to compare with this. The attractive foliage, which takes on such a bright red fall coloring, and during the winter the scarlet berries, all help to make it very ornamental. 2½ to 3 feet, 30 cts. each; \$3.00 per dozen.

HONEYSUCKLE RED BUSH (Chamaecerasus rubra grandiflora).—Graceful shrub with dark green foliage. Red flowers in May and June, followed by blood-red fruit. 30 cts. each.

PINK BUSH (Chamaecerasus rosea grandiflora).—Same as the rubra grandiflora except that the flowers are large and pink with the lobes bordered with lighter pink. 30 cts. each.

LILAC or SYRINGA PURPLE LILAC (Syringa vulgaris). —The standard common purple lilac; very fragrant and one of the best. 2½ feet. 30 cts. each.

MOCK ORANGE SYRINGA (Philadelphus grandiflorus). —The flowers of this are much larger than the others, and showy. Develops into a bushy specimen. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

SWEET MOCK ORANGE (Philadelphus coronarius). —Grows 5 to 6 feet in height. The real old-fashioned form, with its pretty white blossoms and yellow stamens. 2 to 3 feet. 30 cts. each; \$3.00 per doz.

OLIVE TREE or JAPAN OLEASTER (Elaeagnus edulis).—Gumi fruit of the Japanese. A low growing ornamental shrub, which produces in early May enormous quantities of fruit, which is one-third of an inch in length, oblong, bright red, and covered with minute white dots. This plant should be more extensively cultivated, as the fruit is very ornamental and makes an excellent jelly or marmalade. Foliage light green, silvery beneath. Produces very fragrant flower April 1st. Plant perfectly hardy, and grows in almost any situation. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

DEUTZIA DOUBLE WHITE (*D. Crenata* fl. pl. Alba).—Flowers pure white, double; produced in great abundance middle of April. A tall growing variety. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

DOUBLE PINK.—30 cts. each; \$3.00 per dozen.

DWARF WHITE (*Gracilis*).—Flowers pure white; bell-shaped; quite dwarf. Blooms early in April. 1 to 1½ feet. 30 cts. each; \$3.00 per dozen.

PRIDE OF ROCHESTER.—Double white, back of petals pink, large panicles; blooms middle of April. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

FALSE INDIGO (*Amorpha fruticosa*).—A strong-growing shrub, 3 to 4 feet high, with finger-like spikes of indigo-colored flowers, three or more spikes to a cluster. Blooms early in June. 35 cts. each.

FORSYTHIA GOLDEN BELL, FORTUNE'S (*Forsythia fortunei*).—Tall, but the branches bend, making a most graceful effect, especially in early spring, when full of yellow blossoms. 3 to 4 feet. 30 cts. each; \$3.00 per doz.

DARK GREEN (*Forsythia viridissima*).—More shrub-like in growth than other Forsythias. Dark rich foliage, and a very profuse bloomer. 2 to 2½ feet. 30 cts. each; \$3.00 per dozen.

GOLD FLOWER (*Hypericum moserianum*).—Beautiful golden yellow flowers, with crimson stamens. Dwarf habit. One of the best, strong, bushy plants. 30 cts. each; \$3.00 per dozen.

ST. PETER'S WORT, or WAXBERRY (*Symphoricarpos alba*).—A well-known shrub with small pink flowers and large white berries that hang on the plant through part of the winter. 30 cts. each.

EVERGREEN TREES AND SHRUBS

PYRAMIDAL ARBORVITAE (*Thuja orientalis pyramidalis*).—Compact, pyramidal form. 2 to 2½ feet. \$1.00 each.

PICEA PUNGENS GLAUCA KOSTERI (*Colorado Blue Spruce*).—The attractive silver-blue color stands out strongly against all other evergreens. 2 to 2½ feet. \$1.50 each.

AMERICAN, or MOUNTAIN LAUREL (*Kalmia latifolia*).—Sometimes called Calico Bush. A beautiful native evergreen shrub with shining foliage and dense clusters of pink or nearly white flowers in Spring. Requires same treatment as the Rhododendron. 2½ to 3 feet. \$1.50 each.

OREGON BARBERRY (*Mahonia Aquifolia*).—Medium size, with purplish, shining, prickly leaves and showy, bright yellow flowers in May succeeded by bluish berries. 30 cts. each; \$3.00 per dozen.

WHITE SPRUCE (*Abies Alba*).—A native tree of medium size, of pyramidal form. Foliage silver gray, bark light colored. Very hardy and valuable. 1½ to 2 feet, 75 cts. each; 2 to 2½ feet, \$1.00 each.

HEMLOCK (*Abies Canadensis*).—One of the most graceful and beautiful, and withal one of the hardiest of evergreen trees. 2½ to 3 feet, \$1.00 each; 3 to 4 feet, \$1.50 each; 4 to 5 feet, \$3.00 each.

RED-HOT POKER, FLAME FLOWER, or

TORCH LILY (*Tritoma Uvaria Grandiflora*).—The old-fashioned late flowering sort; spikes 3 to 5 feet high; flowers rich ochre-red. 15 cts. each; \$1.50 per dozen.

GYPSOPHILA PANICULATA (*Baby's Breath*).—A beautiful old-fashioned plant. 25c each; doz. \$2.00.

STOKESIA (Cornflower Aster) CYANEA.—A beautiful native plant growing 18 inches high, bearing freely from early in June until September its handsome lavender-blue Cornflower-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in masses or beds of any size. 15 cts. each; \$1.50 per dozen.

NEW GIANT-FLOWERING MARSHMALLOWS

(*Hibiscus*).—A wonderfully improved form of our greatly admired native Marshmallow or Rosemallow, in which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. These plants can be highly recommended for all kinds of plantings. They appear to be equally at home in all positions, having the same vigor in dry and wet ground and are perfectly hardy. They grow from 5 to 8 feet high, and are very floriferous, blooming from early in July until late in Autumn. We offer three distinct colors—Red, Pink and White—in strong two-year-old roots, 35 cts. each; \$3.50 per doz.; \$25.00 per 100. One each of the three colors for \$1.00.

ROSA RUGOSA.—Japanese roses. How beautiful are the single roses of this grand species, often 3 inches in diameter, and the large scarlet rose hips which follow late. The thick glossy-green foliage always looks well. Red variety and white variety, 30 cts. each; \$3.00 per dozen.

RED-FRUITED, or INDIAN CURRANT (*Symphoricarpos vulgaris*).—Sometimes called "Coral Berry." A shrub of very pretty habit. Foliage, fruit and flowers, small; fruit purple; hangs all winter. 30 cts. each.

YELLOW-FLOWERED, or MISSOURI CURRANT (*Ribes aureum*).—Bright green foliage, beautifully tinted in Autumn; fragrant yellow flowers in May followed by dark brown fruit. 2 to 3 feet. 30 cts. each.

WEIGELA ROSEA.—Large and rather coarse deep pink or magenta flowers in great masses during June. 2½ to 3 feet. 30 cts. each; \$3.00 per dozen.

CANDIDA.—Pure white flowers of large size. Blooms all summer and autumn. 2 to 3 feet. 30 cts. each; \$3.00 dozen.

ALTHEA ROSE OF SHARON.—The Altheas are among the most valuable of our tall hardy shrubs on account of their late season of blooming, which is from August to October, a period when few shrubs are in flower. We offer the following, viz.:

DUCHESS DE BRABANT.—Double dark red.

COELETIS.—Simple blue.

JEANNE D'ARC.—Double white.

All of the above, 35 cts. each.

HARDY FLOWERING VINES

BITTER-SWEET (*Celastrus scandens*).—A native climbing plant of great growth with attractive light-green foliage and yellow flowers during June, which are followed in the autumn with bright orange fruit. 30 cts. each.

BOSTON IVY, JAPANESE CREEPER (*Ampelopsis veitchii*).—A rapid growing, deciduous vine. Handsome green foliage, assuming charming, sun-tints in the fall. Perfectly hardy and the most popular of all vines. 15 cts. each; \$1.50 per dozen.

ENGLISH or IRISH IVY (*Hedera Hibernica*).—This well known favorite is useful for covering walls and in rock gardening. Owing to its handsome, evergreen, glossy foliage, it is much used for covering graves, particularly in shaded situations, where grass will not grow. Field-grown plants. 15 cts. each; \$1.50 per dozen.

HONEYSUCKLE, HALLEANA (*Hall's Monthly*).—Flowers are pure white, turning to yellow. Fragrant, hardy and almost evergreen. Blooms free. 30 cts. each.

AMPELOPSIS (*Quincefolia*).—American Ivy, or Virginia Creeper. Rich crimson in autumn; a very rapid grower. One of the finest vines for covering walls, verandas or trunks of trees; affords shade quickly. 30 cts. each; 10 for \$2.50; 100 for \$15.00.

NAKED-FLOWERED JESSAMINE (*Jessamine nudiflora*).—A graceful, healthy climbing shrub, with dark green leaves. Flowers bright yellow, which are produced very early in the year. 25 cts. each; 10 for \$2.00.

WISTARIA CHINESE, BLUE (*Wistaria Sinesis*).—A flowering vine of extremely vigorous growth, which attains a great height if given support. The beautiful flowers of soft, dainty lavender-blue color are produced in pendulous racemes a foot or more long, in May, before the leaves expand. They are produced in such great numbers as to form a bank of bloom. 30 cts. each; \$3.00 per dozen.

Wistaria Sinensis fl. alba Of similar habit to *Sinensis* with pure white flowers. 40 cts. each.

HARDY PHLOX

Miss Lingard A grand white phlox; lilac eye; large individual florets. Blooms earlier and stays in bloom longer than other sorts. 15 cts. each; \$1.50 per dozen.

Coquelicot A fine pure scarlet phlox with a crimson eye. 15 cts. each; \$1.50 per dozen.

Jeanne d'Arc Pure white, late flowering. 15 cts. each; \$1.50 per dozen.

Professor Schliemann Rose, with carmine eye. 15 cts. each; \$1.50 per dozen.

Hardy Phlox Assorted colors. 15 cts. each; \$1.25 per dozen.

HARDY ROSES

Outdoor-Grown Roses are strong, healthy, vigorous plants, giving the best results and satisfaction to those who plant them. We can ship these roses any time during open weather in January, February or March. Earlier they are set out the better. A light protection of litter or coarse manure for the roots after setting out is advisable, not so much for protection as to encourage best root growth and development.

Price of All Varieties (customer's selection) 33 cents each; \$1.40 per half-dozen; \$2.80 per dozen postpaid. \$2.50 per dozen, by express, not prepaid. Not less than half-dozen sent by express.

Rambler and Climbing Roses

CRIMSON RAMBLER.—Vivid, crimson mass of blooms that are beautiful till late in the season; a rapid producer, growing from ten to twenty feet in one season. Perfectly hardy.

LADY GAY.—Cherry-pink, fading to soft white; the flowers, in large, loose trusses, together with the buds and foliage, form a mass of beauty from base of vine to tips of branches; a perfectly hardy climber. In both foliage and bloom, this is one of the most beautiful of all the climbing roses.

FLOWER OF FAIR-FIELD (Everblooming Crimson Rambler).—A brilliant crimson, base of petals white; flowers perpetually and profusely in brilliant clusters from early summer until frost.

MARY WASHINGTON.—Pure white flowers of medium size, blooming profusely in large clusters throughout the summer, a strong grower; slight musk fragrance.

PHILADELPHIA CRIMSON RAMBLER. Deep rich crimson, brighter than Crimson Rambler; large, full and lasting flowers in panicles; very vigorous and productive; entirely free of mildew.

SOLFATARE. Clear, sulphur-yellow; full and double, blooming in clusters; a vigorous climber.

VEILCHENBLAU.—Opens reddish lilac, changing to amethyst and steel blue; immense panicles of blooms; very nearly a blue rose. A recent introduction.

WHITE RAMBLER.—Pure white flowers in great clusters.

AVIATEUR BLERIOT.—Saffron-yellow with golden-yellow center; full, medium size, flowering in clusters. Very vigorous and the finest yellow shading of its class as well as the first of its color we have been able to offer in Wichuraiana section.

SILVER MOON.—Clear silvery-white with a mass of bright yellow stamens; petals of splendid substance and beautifully cupped; exceedingly large and fragrant flowers; growth vigorous and very free blooming.

DOROTHY PERKINS.—Beautiful shell-pink color, which holds for a long time, fading finally to a lovely deep red; very sweet-scented; fully equal to Crimson Rambler in foliage, hardiness, habit of growth and blooming qualities.

EMPEROR OF CHINA.—The Apple Blossom Rose. Pretty, bright pink flowers in clusters; free blooming, strong growing and hardy.

PINK RAMBLER.—A vigorous climber, producing large trusses of delightful fragrant flowers of deep pink.

Baby Ramblers

MAMAN LEVASSEUR.—A prolific producer of pure pink flowers, with all the good qualities of Crimson Baby Rambler.

MADAME NORBERT LEVASSEUR.—The Crimson Rambler in dwarf form, with the same clear, brilliant, ruby-red color. Hardy and healthy everywhere, attaining a height of twenty inches, and blooming in profuse clusters until frost, and throughout winter if taken indoors.

CATHERINE ZEIMET, or White Baby Rambler.—This is surely a beauty and a great addition to the Baby Ramblers. Grows to a height of 20 inches and produces double pure white flowers in abundance. Very fragrant.

STRONG, VIGOROUS, OUTDOOR-GROWN PLANTS

Orders for ROSES and NURSERY STOCK are shipped direct from our Kenbrook Farm, and cannot be shipped with orders for Seeds

Hybrid Perpetual Roses

ALF COLOMB.—Cherry-crimson; large globular flowers; erect growers; free bloomer.

GEN'L JACQUEMINOT.—Bright, shining crimson; rich, velvety and fragrant.

GIANT OF BATTLES.—Rich red; very large, good form and substance.

PRINCE CAMILLE DE ROHAN.—Deep velvety-crimson color; passing to intense maroon, and shaded black; large, handsome and fragrant.

MAGNA CHARTA.—Extra large, full flowers of unusual depth; sweet and of fine form; bright rosy-pink in color; one of the hardest and best bloomers.

ANNA DE DIESBACH.—(Glory of Paris).—A lovely shell-pink; long-pointed buds, very large petals and large, finely formed, compact flowers, very full and double; sweetly fragrant. A vigorous grower and bloomer.

PAUL NEYRON.—The largest of all Rose blooms; bright shining pink, clear and beautiful; very double and full; finely scented; blooms first season and all summer. Grows to a great height in a single season and stems are almost thornless.

GLOIRE LYONNAISE.—Creamy-white; the nearest yellow Hybrid Perpetual Rose, and a grand one.

MADAME PLANTIER.—A June Rose, well worthy of its long and continued popularity. Pure white, large and double; hardy as a forest tree; a free and continuous bloomer. One of the best white Hybrid Perpetuals, used extensively for cemetery planting.

Everblooming Tea Roses

MARIE VAN HOUTTE.—Rich creamy-white, full, sweetly scented.

MAMAN COCHET.—Rich rosy-pink; exquisite in color and graceful in form from bud to bloom and very fragrant; long stems.

WHITE MAMAN COCHET.—Pure white and waxy, taking on a pink flush; large and beautiful in bud and bloom.

MARIE LAMBERT.—(Snowflake).—Pure white, fine grower and bloomer; excellent for nursery.

MADAM LOMBARD.—Buds of deep rose, passing to salmon-pink; very fragrant and free.

MRS. BENJ. R. CANT.—Bright, clear rose-pink; a good bedding rose; very free grower and bloomer.

SAFRANO.—Bright saffron yellow, the best of its color; good buds and fine-shaped flowers; vigorous and fragrant.

PAPA GONTIER.—Dark crimson, passing to a glowing crimson; large buds, deep, open, semi-full flowers; constant bloomer.

WILLIAM R. SMITH.—Creamy-white with shadings of pink; beautiful in form and colors; glossy foliage; long, stiff stems; vigorous in growth; a superb summer bedder.

DUCHESSE DE BRABANT.—Large, full, beautiful in bud and bloom; highly fragrant; soft, light rose, with heavy shading of amber-salmon.

ANTOINE RIVOIRE.—Creamy-white, delicately tinted with pink; extra large petals, making a bloom of decidedly distinct and beautiful form; full and double.

MADemoiselle FRANZISCA KRUEGER.—A vigorous grower and constant bloomer for out of doors; large blooms of deep, coppery-yellow, tinged with pink.

CLOTHILDE SOUPERT.—A remarkably free-blooming Rose for bedding; very double; white, shading to deep pink at center, deliciously fragrant.

BESSIE BROWN.—Of a distinct type in shape and color. Erect stems; full, deep blooms with enormous petals; white, flushed with pink.

MADAME JENNY GUILLEMOT.—Deep saffron-yellow, opening canary with dark golden shadings; buds long and pointed; petals and blooms immense. A very beautiful upright grower and free brancher.

Bourbon Roses

BURBANT.—Bright rose-pink, a shade darker than Hermosa, and as free a grower.

EUGENE L. MARLITT.—Rich, glowing carmine with scarlet tones; non-fading; fragrant; free blooming, vigorous, healthy and hardy.

STRAWBERRY PLANTS

STRAWBERRY PLANTS can be set out in the spring any time during March or April. Make the rows three feet apart, setting the plants fifteen inches apart in the row. Keep well worked and free from weeds and in the fall apply well-rotted manure along the rows as a top dressing, working it in early in the spring. A slight mulch of pine tops or straw applied after cultivation in the spring will improve the quality and cleanness of the fruit to a considerable extent.

Special leaflet giving information about Strawberry culture mailed on request.

Varieties marked "S" are staminate and will produce fruits without other sorts planted with them; those marked "P" are pistillate and will not produce fruit unless some "S" sort is planted with them. We suggest two rows of "P" variety to one of "S."

Shipments of Strawberry Plants are made direct from our Kenbrook Farm.

Joe Johnson (S).—This new berry originated in the southern part of Wicomico County, Maryland, about four years ago, and has been well tested. It ripens about the same time as the Gandy. The Joe Johnson is very productive of very large berries. It is a beautiful red berry with a bright green calyx, which adds greatly to its beauty and market value. Flavor is one of the best; a perfect table and canning berry, and one of the best shipping varieties. Has a perfect flowered blossom, and is a strong fertilizer. You will make no mistake in planting the Joe Johnson. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Senator Dunlap (S).—A favorite with most growers, and is well known wherever strawberries are grown. It is a variety that will take care of itself on any soil and with any kind of treatment. It is a great plant maker and for best results should be planted a good distance apart or kept thinned. It is very productive and usually matures every berry, which are of medium size, bright glossy red, a good shipper and of excellent quality. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, doz. 25c; 100, 75c; 500, \$2.25; 1,000, \$4.00.

Missionary (S).—A new variety which is proving very popular all through the trucking districts. It is a strong grower, making plants freely; early to mature, coming in directly after Excelsior, and very productive. The berries are well colored, firm, large, and hold their size well throughout the season. It is of good shipping qualities, and is being planted on quite an extensive scale by berry growers through the trucking districts. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Red Bird (P).—A new strawberry of Southern origin, extra early in maturity and remarkably productive. Berries medium in size, firm, of bright red color and attractive appearance, and stand shipping well. The Red Bird is a pistillate variety, and consequently requires rows of other varieties to be planted through it in order to fertilize it properly. For this purpose early blooming varieties like the Excelsior or Improved Lady Thompson should be used. As is well known, the pistillate varieties are usually considered healthier and more resistant to the strawberry weevil, which sometimes affects the productiveness of this crop. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Virginia (P).—A new variety which originated in this State. Very early, being within a day or two of the Excelsior. Productive and of uniform size for an extra early variety. Bright red color, makes an attractive appearance, both on vines and after it is picked. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Excelsior (S).—Extra early, ripening several days ahead of any other kind on our list. The fruit is of excellent quality, very firm; color perfect, making an excellent shipping berry, attractive and salable. So far as tested, it has done well everywhere. In addition to its value as a market or shipping berry, it is also valuable for the home garden, both on account of its extreme earliness, attractive deep red color and excellent table and preserving qualities. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Improved Lady Thompson (S).—For shipping and home market this is really one of the best and most profitable berries, and it seems to improve year by year. It is early to ripen, commencing to ripen directly after Excelsior. Makes a large sized berry and is very productive. Is robust and vigorous-growing, and will stand adverse conditions both of weather and cultivation better than any other kind. At the same time it gives the very best returns from high manuring and good cultivation. It has, beyond all question, proven itself entitled to the name of "The Standard Early Market Berry." Postpaid, doz. 30c; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.50.

Tip Top (P).—Similar to the Bubach, but superior to that variety in plant growth and fruit, and very much more productive. Imperfect bloomer, and must be planted near staminate variety. Postpaid, doz. 30c; 100, \$1.00. By express, doz. 25c; 100, 75c; 500, \$2.25; 1,000, \$4.50.

Bethel (S).—Large, sweet, dark-colored berry, in shape similar to the Gandy. This berry comes about midseason, is an unusually good table berry. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, doz. 25c; 100, 75c; 500, \$2.25; 1,000, \$4.00.

Brandywine (S).—This is pronounced by one of the largest strawberry growers in the South to be the great middle-crop, all-purpose berry. It succeeds on all soils, and withstands adverse conditions of weather remarkably well. The plant is of vigorous growth, a profuse bloomer, producing berries of large size and of a brilliant and handsome color. It is a good shipper and a fine-flavored berry, equally well adapted for shipping, the home market or private garden. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Aroma (S).—This is an excellent midseason and late berry. It grows to a large size, is of splendid flavor and very productive. Adapted for either home use or market. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Bubach (P).—One of the best and most productive kinds in our list. In vigor of plant, productiveness, large size and profitability, it has no superior. It is planted almost as generally as the Concord grape, as it succeeds in every State in the Union. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Sharpless (S).—An old and popular variety. Berries of excellent table quality, and grow to a large size. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Klondyke (S).—The true Klondyke Strawberry, which we offer, originated in Louisiana, and has proven to be one of the most valuable Southern berries in cultivation. When fully ripe it is of excellent table quality, having a decided flavor, aroma and character of its own. The Klondyke berry grows on a long stem, or rather the heavy-laden bunches of them do. This keeps the berry clear of the ground, causing them to require less mulching than most other kinds. This is also a safeguard against frost. It is a plant of remarkably vigorous growth and of enormous productiveness. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.50.

Haverland (P).—This is more generally grown than any other variety of berries in cultivation. The plant is healthy, large, vigorous, makes ample beds, and is very productive. It produces large-sized berries of fine quality and is an excellent midseason berry for near market or home use. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Gandy (S).—A splendid late berry, well adapted for either market, home use or shipping. The fruit is large and firm, regular in size and shape, handsome and showy. Succeeds well wherever grown. Price postpaid, dozen 30 cts.; 100, \$1.00. By express, dozen 25 cts.; 100, 75 cts.; 500, \$2.25; 1,000, \$4.00.

Wood's High-Grade Clover Seed

Prices of Clover seed look rather high this season, compared to previous years, but considering the short crop, and the prices of grain and fertilizers, they are reasonable. The sowing of Clover seed is absolutely essential to a proper rotation of crops and to keep up the fertility of the land. Farmers should continue to sow Clover seed liberally, in order to keep up the productiveness of the land for other crops. The high prices of cattle, too, is an additional incentive to sow plenty of grasses and clovers in order to supply necessary feed and pasturage for all kinds of live stock.

WOOD'S TRADE MARK BRAND Clover and Grass Seeds are best qualities obtainable, and our customers can always rely on these seeds, not only as being of highest germination, but free from injurious or objectionable weed seeds.

BEST TIME AND METHOD FOR SEEDING

All of the clovers can be sown with equal chances of success either in the spring or fall, excepting Crimson, Burr and Japan Clovers. A great many farmers sow the Red, Mammoth, Alsike and Alfalfa Clovers on their wheat or other fall-sown grain during the month of March, running a light harrow over the grain crop so as to roughen the soil, then sowing the seed, and then hunning the harrow again across the field, so as to give the clover a light covering. This harrowing does not injure the grain crop, but really benefits it, almost acting like a cultivation to these crops. It is also an excellent plan to give an application of Wood's Pure Animal Bone, Lister's Standard Bone Superphosphate, or our Grain and Grass Fertilizer. The application of 200 to 300 pounds of fertilizer per acre at this time will not only increase the yield of grain, but will also benefit and help the stand of grass to a considerable extent. After the wheat or other grain is cut off, if too many weeds spring up they should be cut off with the mower, so as not to smother out the clover.

Clovers and Grasses are also quite often sown with oats or other grain crops in the spring, and the grain crops used as a nurse or protecting crop. When sown with oats or other grain in the spring, the grain should not be sown as thickly as ordinarily, so as not to make too thick a growth of grain, to smother out the grasses and clovers; and it is also much better to cut the grain in the milk state for feed, rather than leave it to mature. This will tend to give much better stands of grasses and clover than if the grain crop is fully matured.

The best fertilizer to use, either as seeding down or as a top-dressing, is either our Grain and Grass Fertilizer or Wood's Pure Animal Bone or fertilizer made from a bone basis, such as Lister's Standard Bone Superphosphate.

The presence of lime in the soil is very necessary for best success with clover, and where lime is deficient, an application of from one to two thousand pounds per acre is decidedly advantageous, in order to secure good stands and good crops of clover.

Japan Clover is adapted only for spring seeding, and is best sown in the month of March or April.

The best months for seeding Alfalfa or Lucern are March or early in April, and in the fall, the latter part of August or during September.

The Crimson Clovers are only recommended for late summer and fall seeding, in this section. They are quite generally sown at the last working of corn, with very good results.

For full information in regard to preparing land for grasses and clovers, see information under the heading of "Wood's High Grade Grass Seeds," on pages 9 and 10.

MAMMOTH, or SAPLING CLOVER

This is similar to Red Clover, both in the appearance of the seed and its habits of growth, the difference being that it usually grows larger and is later in maturing. It is considered superior as an improver on account of the extra growth. It is a good variety for thin soils, or to seed with Timothy or Herd's Grass or Red Top, as it matures about the same time as these grasses. The appearance of the seed of this is identical with the Red Clover, and on this account it is impossible to distinguish any difference between the two by the appearance of the seed. We always obtain our supplies from reliable sources, but in this, as in all other seeds, we give no warranty in any way, always using, however, every reasonable care to supply Mammoth or Sapling Clover as ordered. Sow ten to twelve pounds per acre by itself or with Timothy. Six pounds of Clover and eight pounds of Timothy will give a liberal seeding. The addition of 5 lbs. Herd's Grass or Red Top per acre will increase the crop of hay and add considerably to the grazing value.

Present price Trade Mark Brand Sapling Clover Seed, 35 cts. per lb. (postpaid, 1b. 42 cts.); 10 lbs. and over, 30 cts. per lb.; 100 lbs. and over, 29 cts. per lb. (bushel 60 lbs., \$17.40). Price fluctuates. Will quote prices or fill orders at lowest prevailing prices at time order is received.

Sapling Clover does not last as long as Red Clover, but has a much greater growth, therefore I prefer it as a soil builder. I use no other.—G. P. DEYTON, Mitchell Co., N. C., October 10, 1917.

I have the finest field of Mammoth Clover I ever saw. There is not a farmer in all this section that can come up with my clover. The season was awfully dry last summer, most clover and grasses burned out. My clover and orchard grass fields are green at this time.—THOMAS LAWS, Yancey Co., N. C.

We received clover seed all right. Would say we are well pleased with it. We had it tested over here and it tested 99.75 per cent. pure.—GEO. H. BRIGGS & SON, Cheshire Co., Ohio, April, 1916.

RED CLOVER,
The Standard
Forage and Soil
Improving Crop

RED CLOVER (*Trifolium pratense*)

Red Clover not only furnishes most excellent pasturage and fine hay crops, but its growth improves the land and adds humus to the soil wherever it is grown. It is the standard hay, pasturage and soil-improving crop wherever general farming is practiced.

Red Clover will yield crops two or three years from one seeding, and on good land will yield two cuttings per year. The first crop makes rich feed, and is the most valuable for hay. The second crop does not make so good a quality of feed. Red Clover should be cut for hay when in full bloom. For hay it is particularly well adapted for sowing with Orchard and Tall Meadow Oat Grass, as it ripens at the same time, and sowing these three grasses together will give larger yields and of better quality hay than sowing either alone.

One bushel of Orchard Grass, one bushel Tall Meadow Oat Grass and eight pounds of Clover will give excellent results, and if it is desired to use the land for pasturage also, the addition of six pounds of Herd's Grass or Red Top will increase the pasturage and the second cutting of hay considerably. When sown by itself, sow 10 to 12 lbs. per acre, either in the fall or spring, or at the last working of corn.

Present price Trade Mark Brand Red Clover Seed, 1b. 32 cts. (postpaid 40 cts.); 10-lb. lots and over, 30 cts. per lb.; 100 lbs. and over, 28 3/4 cts. per lb. (bushel 60 lbs., \$17.25).

Price fluctuates. Will quote price at any time or fill orders sent us at lowest prevailing price.

The Clover I bought from you was the best clover I ever made.—B. J. LICKS, Greenville Co., Va., June 18, 1917.

FIELD OF ALFALFA HARVESTED FOR HAY

ALFALFA, the Profitable Hay Crop

The high price of Red Clover seed is likely to make a much larger use of Alfalfa. The experience of farmers in this section for the past two or three years is that alfalfa gives very good results sown on wheat or other grain crops in the spring, the end of February or during March. Farmers who have practiced this report that they obtained very good stands indeed, sown in this way, and the seeding in this way is likely to increase.

In some sections alfalfa is sown in the spring with a nurse crop, such as oats or barley, but it is likely to give better results sown on top of fall-sown wheat, oats or other grain crops. It is of course desirable to run a harrow over the field at the time of seeding, and this harrowing really benefits the grain crops, rather than injuring them, as it acts as a cultivation for the crop.

Some of our farmers also sow alsike clover mixed with alfalfa, particularly where they desire to use the crop at all for grazing purposes. Two or three pounds of alsike clover, together with 15 or 20 pounds of alfalfa, should give a good seeding to the acre.

After the wheat or grain crops are cut off, in case the weeds make any considerable growth, it is desirable to run the mower over the fields, in order to clip off the weeds, so that the alfalfa and alsike clover can thrive to best advantage.

When sown by itself, Alfalfa can be sown any time from the end of February, or during March or April. Further south, earlier seedings are advisable. A satisfactory stand secured from spring seeding will furnish one or two good cuttings this year, and full cuttings the following year.

Where Alfalfa has not been sown before, it is advisable to give inoculation. Inoculation can be given either with the use of the Inoculation Cultures, which we offer, or with soil from a field where Alfalfa was previously grown. The soil is usually taken from the surface of an old alfalfa field and applied as a top dressing, the same as you would fertilizer, at the time the seed is sown.

After Alfalfa is once established it lasts for years, yielding as much as four or five cuttings per season of most excellent and nutritious hay, which is readily salable at top prices. Lands in the Western States that are well set in Alfalfa sell readily at from \$100 to \$500 per acre, so that a crop of this kind pays well for extra preparation to secure good land and good crops. It is better to have five acres well set in Alfalfa with thorough preparation than to attempt to put in ten acres without first-class preparation. Alfalfa will do well on any good loam soil, but the land must be well and thoroughly prepared. A heavy application of lime is usually considered of decided benefit, the most successful raisers of Alfalfa using from 2,000 to 5,000 pounds per acre.

A firm, well-prepared seed bed is of first importance. For full information in regard to preparation in this connection we would call attention to the information under the heading of "Clover Seed," on page 4. Alfalfa is usually sown broadcast at the rate of 20 to 30 lbs. per acre.

Alfalfa should always be cut before coming into full bloom, and from seed sown either in the fall or spring the first cutting should be made even before it reaches this stage of development. Cutting thickens Alfalfa, provided it is done before the plant attains its full growth, and it not only makes a better quality hay, but causes it to stool out better, thus thickening the root growth and improving the stooling-out properties.

Our Trade-Mark Brand Alfalfa Seed is all American-grown, and of best qualities obtainable, testing high percentages, both of germination and purity, and it is also entirely free from dodder. We do not sell or recommend the cheap imported Turkistan Alfalfa at any price.

PRICE TRADE MARK BRAND ALFALFA SEED—Best American-Grown Seed.—Lb. 25 cts. (postpaid, lb. 33 cts.); 10 lbs. and over, 22 cts. per lb.; 100 lbs. and over, 21 cts. per lb. (\$12.60 bus. of 60 lbs.). Price fluctuates. Will quote prices at any time upon request.

For information regarding inoculating culture for Alfalfa, see Inoculating Culture page.

JAPAN CLOVER (*Lespedeza striata*)

One of the Most Valuable of Grazing and Soil-Improving Crops; Also Makes a Splendid Nutritious Hay Crop Further South

Japan Clover is one of the most valuable crops for the entire South, and is rapidly increasing in popularity wherever it is grown. It is also giving most excellent and satisfactory results in Maryland, Delaware and New Jersey. In this section its greatest value is as a soil-improving and grazing crop. Further South it is very largely grown as a hay crop, producing large yields of the best hay, superior in nutritive value to timothy hay.

Japan Clover

and wire grass. For sowing in woods that are used for grazing, or anywhere under the shades of trees, where other grasses do not succeed well, Japan Clover is to be strongly recommended, as it succeeds and does better under dense shade than any other grass or clover. All throughout the summer it makes a dense green carpet, which is very attractive and desirable.

It is best not to graze Japan Clover too early the first season, so as to give the seed time to mature and fall, which it is constantly doing all summer from the axil of the leaves. After the first season it can be grazed at any time. We do not recommend this clover for land that can be successfully grown in other grasses or clover in this section, but on waste land or poor, worn-out soils, it will furnish excellent, nutritious pasturage,

Once started, it soon spreads and takes possession of the land, making a steady growth of the finest and most nutritious pasturage, greatly relished by horses and all farm stock. It succeeds everywhere throughout the Southern and Middle States, taking possession even of stony hillsides and barren or waste lands. It also does well on low or wet lands, and a combination of Red Top (Herd's Grass) with Japan Clover on this class of soil furnishes excellent grazing. In places where it was sown several years ago it was found spreading all over the neighborhood, along the roadsides, ditch banks, and over neglected fields; at the same time it is easily subdued by cultivation, and does not in any way prove a pest to cultivated crops.

It will succeed if sown broadcast on old pastures, broom-sedges, etc., without any special preparation, and will soon spread and grow thickly all over the fields where put in, even taking the place of and driving out broom-sedges

and at the same time improve the condition and productiveness of these poor lands to a considerable extent.

Sow at the rate of 10 to 15 lbs. per acre in March or April. It does not make much showing the first year the seed is sown. When sown in connection with Red Top or Herds Grass, which is very desirable, and particularly in this section, sow at the rate of 10 lbs. Japan Clover and 8 lbs. Fancy Red Top or Herds Grass to the acre. The combination of these two is an excellent combination.

Pkt. 10 cts.; lb. 35 cts. (postpaid, lb. 43 cts.); 10 lbs. and over, 32 cts. per lb. (bushel 25 lbs. \$3.00); 100 lbs. and over, 31 cts. per lb.

Japan Clover makes fine growth on land too thin to sow other grasses.

I am well pleased with the Japan Clover I bought from you last spring. It was sown on land that was too thin to grow other grasses, and made a fine growth this fall. I think it is the thing to sow on land that has galled places, as it seems to take root and grow anywhere.—R. L. SPOON, Burlington, Alamance Co., N. C., Nov. 17, 1915.

Japan Clover fine for pasture and for timbered land.

The Japan Clover seed which I purchased from you did fine for pasture in August and September. Think it is fine clover for timbered land.—H. P. DAVIS, Cassatt, Kershaw Co., S. C., Oct. 26, 1915.

Japan Clover stands dry summers fine for grazing.

On Feb. 16, 1916, I bought 2½ bushels of Japan Clover seed from your firm, simply scattered the seed over my grazing land, have a fine stand. It has grown through the driest summers we have had for years. If it will stand the winter as well as it has the dry weather, you can expect a large order from me next spring. The cattle seem very fond of it. If I can get a stand as good as I saw in the eastern part of the State a few years since, I can handle at least 50 per cent more cattle on my grazing farm.—D. G. KIRBY, Forestville, Shenandoah Co., Va., Oct. 27, 1916.

ALSIKE CLOVER (*Trifolium Hybridum*)

Less to Seed Per Acre Than Any of the Clovers.

Alsike Clover grows thicker and is finer in growth than Red Clover, making better hay and probably more and better grazing. It is also hardier, resisting extremes of heat and drought and also severely cold weather to a remarkable extent. It succeeds on a variety of soils, light upland loamy lands, as well as stiff bottom lands. The good qualities of Alsike are being appreciated everywhere. It is surer to give a good stand and make good crops than either the Red or Mammoth Clover, and in sections where these clovers have been uncertain, Alsike is superseding them almost altogether. Particularly is this so in the State of Tennessee, where Alsike is being very extensively and generally used. In this section the use of Alsike is growing rapidly, not only for sowing by itself, but also in mixture with Red Clover.

The seed of Alsike Clover, being much smaller than the Red or the Mammoth Clover, does not have to be sown too thickly, and consequently it costs less to seed an acre than of either the Red or Mammoth clover. The quantity of seed per acre when sown alone is 6 to 8 lbs. When sown in mixture with Red Clover, which is very desirable wherever Red Clover is sown, sow 3 lbs. Alsike and 8 lbs. Red Clover per acre.

Pkt. 10 cts.; lb. 30 cts. (postpaid, 38 cts. per lb.); 10 lbs. and over, 28 cts. per lb.; 100 lbs. and over, 26 cts. per lb.

My Alsike Clover, 2½ acres, sown for grazing my milk cows, is beautiful, and in all respects satisfactory.—N. B. WESCOTT, Accomac Co., Va., June 29, 1916.

The seeds did fine and I am more than pleased with them all, especially the slAlke Clover, which has never been grown in this section before. You may be sure you will get some orders for Alsike next year from this section.—C. W. ASBURY, Dunlow, Wayne Co., Sept. 4, 1916.

All the Alsike Clover seeds bought of you from time to time have been clean and of high germination, and therefore very satisfactorily productive. Alsike is my favorite clover since experience has taught its worth. Alsike stands drought and cold and other adverse conditions much better than other clovers.—W. H. HAIRE, Russell Co., Va., July 20, 1917.

Alsike Clover.

WHITE CLOVER

This is very largely used in lawn and pasturage mixtures, and is indigenous to the soils throughout this section. It makes a small, close, compact growth, covering the ground like a carpet. Does well all through the South. Sow either in the spring or fall. When sown by itself, sow 5 to 6 lbs. per acre; it is better, however, sown in mixture with other grasses. See our Special Mixtures, pages 78 and 79. By mail postpaid, lb. 70 cts. By express, lb. 60 cts.; 5-lb. lots and over, 53 cts. per lb.

Dwarf Essex Rape.

DWARF ESSEX RAPE

Makes Splendid Pasture for Cattle, Sheep, Hogs and Poultry

This crop is very highly recommended for pasture for cattle, sheep and hogs, furnishing most rich and nutritious pasture within six to eight weeks from the time of sowing. The fattening properties of Rape are said to be very much better than those of clover. It also makes splendid green feed for poultry. In this section Rape can be successfully sown both in the spring and fall.

One of our customers reports excellent results from using Rape for soil-improving purposes. It makes a quick and rapid growth of vegetable matter, which, turned under, should act as a decided soil improver. We have not made experiments along this line ourselves, but suggest it to our customers, especially in view of the high prices of cow peas and soja beans this year. We shall also be glad to hear from any of our customers who sow Dwarf Essex Rape as a soil improver, as to their opinion of the soil-improving qualities of this crop.

Where no kind is specified on orders, we will always fill orders with the English-grown seed.

For spring sowing, sow as early as you can conveniently get in, the earlier the better, although it can be successfully seeded any time during March or April. Rape is best sown in hills, at the rate of 3 to 5 lbs. per acre, or it can be sown broadcast, when 6 to 8 lbs. per acre should be used.

DWARF ESSEX RAPE.—Pound 20 cts. (postpaid, lb. 23 cts.); 10-lb. lots and over, 17 cts. per lb.; in 50-lb. lots and over, 15 cts. per lb.

Can't Praise Our Rape Seed Too Highly

Your Rape seed are the best I have ever used. I think it the best of any forage. I can't praise it too highly.—O. T. MAY, Orange Co., Va., Oct. 12, 1916.

Hogs and Fowls Very Fond of Rape

The Dwarf Essex Rape seed I bought from you this fall did fine. Only wish that I had more of it, as the hogs and fowls are so fond of it.—T. COGHILL, Caroline Co., Va., Oct. 21, 1916.

The Best of Green Foods for Hogs and Poultry

I sowed the Dwarf Essex Rape seed bought of you in garden lots with a little mixture of oats for green feed. I had the rape cut and fed it to my hogs and let my chickens run in the lots, thus feeding both hogs and chickens from the same lot. I consider this about the best green feed person can sow for hogs, poultry, etc.—H. BYRNE, Bedford Co., Va., Oct., 1916.

Finds Rape an Excellent Soil Improver

Rape is the best seed anyone can put on his land to improve it. In 1915 I sowed about one acre, and I did not take all of it off the land. I left it on the land, and I planted it in, and in 1916 I made over two tons of cotton on that acre, and the land near it did not make over a ton.—CLAUDE V. HARRIS, Edgecombe Co., N. C., April 9, 1917.

Dwarf Essex Rape Hard to Beat for Hogs.

I have been planting your Dwarf Essex Rape for several years, and I think it is hard to beat for hogs. It grows quick and makes a good grazing crop.—W. H. ANDREWS, Edgecombe Co., N. C., July 22, 1917.

White Bokhara or Sweet Clover

(*Mcililotus Alba*)

This has been very largely and generally sown in some of the Western States the past few years. We have never regarded it as of much value for this section, and would not recommend its being sown on any except limestone lands or land containing plenty of lime. Where it succeeds, it makes a large growth, but care should be used to cut it while quite young, for feed or forage, as when it gets old, cattle do not relish it, and it is not of very high nutritive value. It furnishes good inoculation as a crop to precede alfalfa, and is also adapted for sowing on hillsides that are liable to wash or gully; but it will not succeed well on lands that do not contain some lime content. It is also largely used for sowing for bees.

White Bokhara can be sown either in the spring or fall. Should be sown at the rate of about 15 lbs. per acre. It is rather slow to germinate, and does not come as quickly as the red or the mammoth clover, owing to the fact that the seed always contain a certain percentage of hard seeds, and on this account it has been found that very much better stands are obtained by scarifying the seed, and we offer the seed both in its natural condition and also scarified. The scarified seed will furnish a larger percentage of germinating seeds and come up quicker.

Prices of WHITE BOKHARA or SWEET CLOVER.	In 10-lb. lots and over,	
	Per Lb.	Per Lb.
Hulled and recleaned	.35	.40
Scarified	.33	.42

I sowed an acre in White Bokhara this spring. In July cut better than a ton of splendid hay from it, many of the stalks being from 42 to 48 inches high. A second cutting was made early in October. I am positive that with the proper treatment it will do as well, if not better, than other clovers, in addition to inoculating for alfalfa. My stock is ravenously fond of it, and there have been no ill effects from it as claimed by some.—W. R. MEHAFFEY, Amelia Co., Va., Oct. 26, 1915.

The Hulled and Recleaned Sweet Clover came up to my entire satisfaction. I inoculated it, and the crop is fine. I can recommend it to the public.—W. B. REEVES, Alleghany Co., N. C., Oct. 13, 1916.

The Sweet Clover did not germinate very well, but it is coming now thick this year.—WM. A. PRICKITT, Monmouth Co., N. J., May, 1916.

I bought a few White Sweet Clover seed of you two years ago, and I think it one of the most profitable crops I ever raised. My stock of all kinds eat it without any trouble whatever, and some of my neighbors here who raise alfalfa say they think it is its equal, and so much easier to raise. Of course it has to be cut at the right time, but I think you undervalue it.—S. C. THORN, Fairfax Co., Va., Jan. 6, 1917.

Burr Clover

Adapted for fall and summer seeding only. For the South it is a most valuable winter-grazing crop, growing luxuriantly all through the winter and until summer comes fully on. After once being seeded, it reseeds and improves in growth and appearance each succeeding year. It is admirably adapted for use with Bermuda Grass, and the combination of the two makes a splendid all-the-year-round pasture. Fuller information in our Fall catalogue, issued in August.

CALIFORNIA BURR CLOVER CLEAN SEED, lb. 25 cts. (postpaid, lb. 33 cts.); 10 lbs. and over, 22 cts. per lb.; 100 lbs. and over, 20 cts. per lb.

SOUTHERN BURR CLOVER in burrs, lb. 25 cts. (postpaid, lb. 33 cts.); in 10-lb. lots and over, 22 cts. per lb.; in 100-lb. lots and over, 20 cts. per lb.

Crimson Clover

ADAPTED ONLY FOR LATE SUMMER AND FALL SEEDING

Farmers should take every available means of sowing all their vacant lands in Crimson Clover, as it makes a fine winter cover crop—an excellent grazing crop during the winter and early spring—the earliest green feed—an excellent hay crop and a splendid soil-improving crop to plow under early, to be followed by corn, cotton or other crops of the same year.

A crop of Crimson Clover plowed under is equal to an application of stable manure. It makes land rich and mellow, fills it with humus or vegetable matter, and increases the yield of corn, cotton or other crops which follow it, to a wonderful extent. Sow at the rate of 15 pounds per acre, broadcast, in July, August or September. Crimson Clover is very successfully sown at the last working of corn, cotton or similar crops.

TRADE-MARK BRAND CRIMSON CLOVER SEED—the best quality obtainable—lb. 25 cts. (postpaid, lb. 32 cts.). In 10-lb. lots and over, per lb. 22 cts. In 100-lb. lots or over, 21 cts. per lb.

Wood's High-Grade Grass Seed

WOOD'S GRASS and CLOVER SEEDS are high-grade, new crop seeds, carefully selected so as to be sure of supplying seeds only of first-class germination and of the best qualities that it is possible to obtain. The satisfaction which our seeds have given has caused our business in these seeds to become one of the largest in this country. Handling grass and clover seeds in the large quantities we do, enables us to supply them at the lowest possible prices for the best quality seeds.

Seeding Grasses and Clover Seeds

The Best Time

In the spring is from the middle of February to the middle of April. A good, firm seed-bed is of prime importance, and, to secure this, the ground should be well and deeply plowed some time previous to seeding if possible. It should then be harrowed and reharrowed several times, so as to put it in first-class condition. After the ground is in good tilth, seed should be carefully sown, either by hand or using the Cahoon or Cyclone Broadcast Seed Sowers, and then cover by rolling, or, if a roller is not available, by a light or brush-drawn harrow. Rolling is, however, preferable, as it firms the soils and does not cover the seed too deep. Care should be taken not to cover the seed more than about an average of half an inch deep. Wood's Pure Animal Bone and our Standard Bone Meal are the best fertilizers you can apply for grass and clover, as they are immediate and also lasting in their effect. Our Grain and Grass Fertilizer also give excellent results.

Grass and clover seeds can be satisfactorily sown with spring oats or other grain crops in the spring, but when sown in this way, the oats or other grain should not be sown as thickly as ordinarily, and it is better to cut the grain crops before they are fully matured, in order to give grass crops full chance for development.

Sowing Grass and Clover Seeds in the Spring on Grain Which Was Sown Last Fall.

Grass and clover seeds can be satisfactorily sown in the spring on fall-sown grain crops, and the grain crops are materially benefited by the preparation necessary for covering the grass seed. The best method is to run a harrow over the wheat, oats or other grain crop, then sow the seed, and then run the harrow crosswise over the field, so as to give slight covering. This harrowing and cross-harrowing does not injure the grain crops, but really benefits them, acting as a cultivation for these crops. A good firm seed-bed is also secured for the grass and clover seeds; our experience with grass and clover sown in this way has been very satisfactory, both as regards increased grain crops and a good stand of the grass. A top dressing of 200 to 300 lbs. of our Grain and Grass fertilizer to the acre can be applied at the same time the grass is sown, very beneficially. The application of fertilizer in this way will increase the yield of the grain crop and help the grass very materially.

Fall Seeding of Grass and Clover Seeds

September is the best month for seeding grasses and clover in the fall, although they can be safely put in up to the middle of October. If sown after that time, it is better to defer sowing clover until the spring, although Orchard Grass, Tall Meadow Oat Grass, Red Top or Herds Grass, Timothy and similar grasses, can be satisfactorily put in up to the first of November in the eastern part of the Carolinas and further South.

The Descriptions

that we give in this catalog are especially full and complete. The description of the varieties, the suggestive combinations with other kinds, the adaptability for various soils and conditions, with other information, will be found of especial use and value in arriving at correct conclusions as to the best varieties of grasses to use for the purposes which are desired to be obtained.

Prices on Grass and Clover Seeds Fluctuate

The prices named are those ruling at the time this catalog is printed. We will quote prices at any time, or will fill all orders entrusted to us at ruling prices at the time order is received.

I sowed five bushels of your Tall Meadow Oat Grass, and I am sure it is the finest grass I have ever tried. I have been sowing Tall Meadow Oat Grass for several years, and I find it will grow on any grade of land, just so it is well drained. I can honestly say your grass and clover has brought up my farm 50 per cent for the past five or six years, and I am going to use ten bushels of Tall Meadow Oat Grass this fall, and 2½ bushels of your Trade Mark Brand Clover seed. I am glad to recommend your grass and clover to the farmers here.—D. M. PICKLER, Stanley Co., N. C., July 22, 1917.

ORCHARD GRASS

(*Dactylis glomerata*)

Orchard Grass is a very vigorous grower, and yields large crops of excellent and most nutritious hay, and will last for years in increasing value with proper treatment. It is succulent and nutritious, and when mowed requires only a few days of seasonable weather to start it growing again, and usually two good crops of hay can be cut in a season. Orchard Grass is also excellently adapted as a pasture grass, and also succeeds in shady situations, such as orchards, parks, etc., better than most other grasses. Orchard Grass succeeds and grows upon nearly all soils that are not saturated with water. It does best, however, on loamy uplands or moderately stiff soils, although it will succeed very well even on soils that are inclined to be of a sandy texture. It matures early, and is excellently adapted for sowing with Tall Meadow Oat Grass and Red Clover, and this mixture is very highly recommended. Orchard Grass fields can be kept in a continuous state of productiveness, provided a light seeding is made early each spring; should any bare spots appear in the field, and top-dressing of stable manure during the winter will fully maintain its productiveness. Fertilizer also gives very satisfactory results, applied as a top dressing, both for Orchard and other grasses, applied at the rate of 300 to 400 lbs. to the acre, during the month of March. Our Standard Grain and Grass Fertilizer and Wood's Pure Animal Bone are the best fertilizers to apply for top-dressing grass in the spring.

Orchard Grass can be sown either in the spring or fall, although it is best sown in the spring. Sow at the rate of two bushels per acre, or if sown with Red Clover, 1½ bushels of Orchard Grass and 8 lbs. of clover are the quantities usually sown. Also see under "Tall Meadow Oat Grass" for suggested combination with that grass.

Present price of our Trade-Mark Brand Orchard Grass, lb. 28 cts. (postpaid, 35 cts. lb.); 5 lbs. and over, 26 cts. lb.; bushel of 14 lbs. \$3.40; choice quality seed, bushel \$3.25. Price fluctuates.

The Orchard Grass seed I bought of you was the very best. I sowed them the first of April and the grass is now looking fine.—A. W. HUFF, Dugspur, Carroll Co., Va., Oct. 16, 1916.

The Orchard Grass, Clover, etc., which I got this spring came up finely and made a good stand.—T. P. SOMERVILLE, Gordonsville, Orange Co., Va., May 12, 1916.

TALL MEADOW OAT GRASS

(Also called EVERGREEN GRASS)

One of the Most Valuable Hay and Pasture Grasses for the South. Early Maturing, Large Yielding, and Especially Valuable in Combination With Orchard Grass, Both For Hay and Grazing.

This grass is increasing in popularity wherever it is grown. It seems to make more leafage and grazing and a larger yield of hay, and to keep green longer, both during the winter and summer, than other grasses. It is especially desirable and adaptable to the South. It withstands the heat and drought of mid-summer and cold of winter, starts very early in the spring, and continues to give good grazing until late in the fall. For hay it can be cut twice in a season. Its nutritive qualities are first-class. It ripens at the same time as Orchard Grass, and gives the very best results sown with it and Red Clover. For hay it should be cut while in bloom. Tall Meadow Oat Grass is best adapted for good loamy uplands, but gives excellent results on nearly all soils, and better results than any other grass on light, medium or sandy soils. Farmers who have been sowing this grass for years are especially well pleased with the returns from it, and are sowing constantly increasing acreage each year. When sown by itself, sow at the rate of two to three bushels per acre, either in the spring or fall. Sown with Orchard Grass and Red Clover, the quantities usually sown are one bushel (11 lbs.) Tall Meadow Oat Grass, one bushel (14 lbs.) Orchard Grass, and 8 lbs. Red Clover. The addition of 6 or 7 pounds Fancy Clean Red Top or Herd's Grass seed to the acre in this mixture increases the aftermath and the yield of grazing. This combination is excellent and one that has given the most satisfactory results. Price, lb. 27 cts. (postpaid, lb. 35 cts.); 10 lbs. and over, 24 cts. lb.; 100 lbs. and over, 23 cts. per lb. Price fluctuates.

RED TOP, or HERD'S GRASS

The Blue Grass of the Atlantic Coast.

Red Top or Herd's Grass is one of the best and most satisfactory grasses all throughout the South. It is well adapted to all soils and situations, succeeding well on light, sandy soils, as well as stiff upland and low ground, and it really succeeds better in moist situations than almost any other grass. After once being established, it thickens and improves year by year, taking possession of the land and increasing in yield and quantity each successive year. Red Top or Herd's Grass is really one of the most valuable of all grasses for the South, and it should be a large constituent part of all mixtures intended for permanent hay or pasture. It seems indigenous to all our Southern soils and while it lasts a long time and spreads rapidly, it is easily eradicated in case it is desired to put the land in cultivated crops. It makes excellent pasturage and good crops of fine quality hay. It is rather late in starting in the spring and matures its crops at the same time as timothy. Is excellently adapted for seeding with timothy for hay, and furnishes excellent pasturage afterwards. When it gets well established it spreads and will gradually supplant other grasses. Red Top or Herd's Grass is also one of the best grasses for hillsides or lands likely to wash. Our Trade-Mark Brand of the Fancy Clean Red Top is of extra fine quality, and carefully cleaned for impurities. It requires from 8 to 10 pounds to seed an acre of the Fancy Cleaned seed. When sowing with timothy, sow 6 pounds of the Fancy Cleaned seed and 8 pounds of timothy per acre. It can be sown either in the spring or fall. Red Top or Herd's Grass has again turned out a plentiful crop the past season, enabling the seed to be sold at reasonable prices. This is a great boon to our farmers, as we really regard Red Top or Herd's Grass as one of the best of all grasses for use throughout the South. Price, per lb. 13 cts. (postpaid, lb. 25 cts.); 10 lbs. and over, 16 cts. per lb.; 100 lbs. and over, 15 cts. per lb. Price fluctuates.

The Red Top seed I bought of you has proven entirely satisfactory to me. I sow my Red Top and Timothy mixed. The Timothy will not stick only two years and by that time the Red Top has the ground all matted and then I rely entirely on the Red Top for hay or grazing purposes.—W. M. PARRISH, Macon Co., N. C., Oct. 14, 1916.

I always sow Herd's Grass, which when cut before it gets too ripe has always made very satisfactory hay. It seems to be a native grass in East Virginia and I don't think there is any other grass that will take its place on the greater portion of these lands.—J. N. HANGER, Louisa Co., Va.

KENTUCKY BLUE GRASS

The Grass That Made Old Kentucky Famous for Its Fine Horses and Cattle and Prosperous Farming Country

Kentucky Blue Grass is one of the richest and most nutritious of pasturage grasses, and should be largely used in all pasturage mixtures, except on very light or sandy soils. For fall, winter and spring it makes the very best of pasturage, and, mixed with other grasses like Herd's Grass, or Red Top, and Meadow Fescue or Randall Grass, will give an excellent all-the-year-round pasturage.

Land well set in Blue Grass lasts longer than other grasses. In fact, a good Blue Grass pasture is considered to improve from year to year, and on land where it is well adapted, rarely ever requires reseeding.

The best time for sowing Blue Grass is in the fall; it grows rather slowly at first, but soon forms a compact turf, making a fine permanent pasturage when once established. A thick, well-set sod of Blue Grass is usually considered an ideal pasturage, both for nutritious qualities and yield, and wherever Blue Grass succeeds it should be one of the principal constituents of all pasturage mixtures.

Blue Grass being a little slower to become well set than other grasses; it is also a good plan to sow some Perennial Rye Grass with it when sowing in the fall.

Our Special Pasturage Mixtures for fall seeding contain a good proportion of Kentucky Blue Grass. While it is best sown in the fall, it can be sown either in the fall or spring. It should be sown at the rate of 40 to 50 pounds per acre. Price, per lb. 30 cts. (postpaid, lb. 38 cts.). In 5-lb. lots and over, 28 cts. per lb.; bushel 14 lbs., \$3.50. Price fluctuates.

TIMOTHY (Phleum pratense)

The Most Popular, Nutritious and Salable of Hay Grasses

This makes one of the most popular, nutritious and salable of hay grasses. It is best adapted for sowing on clay or heavy loam, lowlands or in mountainous districts, although it will do well on any good loamy soils, provided moisture is abundant. It does not succeed so well, however, as orchard, tall meadow oat or herd's grass on soil of a sandy or light loamy texture and is not of so much value for pasturage as other grasses. The stand of Timothy will also be injured if grazed or cut too closely. The yield of hay on good ground is from 1½ to 3 tons per acre. Timothy requires good land to make good crops. It does not root as deeply, and is not considered as much an improver as other grasses; consequently should not be sown on and deficient in humus or vegetable matter, nor on soils of a light or sandy nature. The best clover to sow with Timothy is the Sapling, as it matures and ripens with Timothy. The practice of sowing the common red clover with Timothy in this section is not advisable, as they do not ripen together, the clover being ready two or three weeks before the Timothy; thus either one or the other must be cut at a stage which will not give the best results. Red Top or Herd's Grass and Meadow Fescue mature at the same time as Timothy, and are excellent grasses to sow with it, both for hay and pasturage. They will increase the yield of hay and will very largely increase the yield and value of the pasturage. Timothy by itself requires to be sown at the rate of about a peck (11 pounds) to the acre; or with clover, 10 pounds of Timothy and 6 pounds of Sapling Clover will give a good seeding. A mixture of Timothy, Red Top, Meadow Fescue and clover should be sown in the following proportions: 6 pounds Timothy, 6 pounds Clover, 6 pounds Fancy Red Top, ½ bushel Meadow Fescue. These will furnish an excellent mixture, both for hay and pasturage, on good loamy, clay or low-ground soils. Present price of our Trade Mark Brand: lb. 12 cts. (postpaid, lb. 20 cts.); in 10-lb. lots and over, 10 cts. per lb.; in 100-lb. lots and over, 9½ cts. per lb.; bushel of 45 lbs., about \$4.25. Price fluctuates.

I have a beautiful stand of timothy and clover; all from your seed.—AUSTIN P. WAGSTAFF Fairfax Co., Va.

Timothy.

Herd's Grass, or Red Top

RHODES GRASS

Our sales of Rhodes Grass seed are increasing rapidly, and customers who have sown it in the South are enthusiastic in its praise. While it is more strongly recommended for the Gulf States, we see no reason why it should not give very good results in other sections of the South, particularly if sown early in the spring, as it makes a very rapid growth and makes the very best quality of hay, far superior for feeding purposes to millets.

It has been grown with success at the U. S. Department of Agriculture's Arlington Test Farms, near Washington, making very leafy foliage, stooling out remarkably, and growing to a good height. We do not believe, however, that it would be hardy or stand winters further north than the Gulf States, but to sow it and use it as an annual, for cutting during the summer, we think excellent results will be obtained.

Under favorable conditions, it ought to furnish two or three cuttings during the summer, and the hay is unquestionably superior, both in nutritive and feeding qualities, and greatly relished by all kinds of cattle.

We give below, letters from customers in Texas and California, calling attention to the splendid results from the sowings of this grass, and while, as stated, it is more strongly recommended for the Gulf States than other sections, we would advise our customers to experiment liberally with this in other southern states, as we believe it is destined to make very satisfactory crops.

Rhodes Grass is a perennial, growing from 3 to 4 feet high, with a large number of very long, narrow and tender leaves. Its fine growth and the quality of the hay are said to be equal to that of the very best timothy hay as grown in more northerly latitudes. Grown from seed, its growth is commonly erect the first season. The second season it makes runner-like branches two to four feet long, with roots at the joints, and covers the ground quite rapidly.

It is not ordinarily considered that Rhodes Grass will stand temperatures below 20 degrees Fahrenheit, so that it will hardly prove a perennial in latitudes where the temperature falls below this.

While Rhodes Grass will furnish excellent yields of grazing, its principal value is for hay, giving two or three cuttings a season of about one ton of excellent quality hay per acre.

The grass stands severe drought and moderate frost without injury.

We strongly recommend the more extensive use of Rhodes Grass, particularly in the far South, and recommend to our farmers throughout other sections to experiment with it liberally, as we believe it will give excellent results, grown as an annual, even in the more northerly of the southern states.

PRICE: Pkt. 10 cts.; lb. 50 cts. (by mail postpaid, 58 cts. per lb.); in 10-lb. lots and over, 45 cts. per lb.; 100 lbs. and over, 43 cts. per lb.

Rhodes Grass a Great Success Both for Hay and Pasturage

My opinion in regard to the value of Rhodes Grass for Texas, based on my experience for the last several years, is that under irrigation it is a great success, either as a hay crop or as a pasture crop, especially if sowed on alluvial sandy soil.

Wherever irrigated land is sown to Rhodes Grass seed and the soil kept moist for a couple of weeks after seeding, the germination has been excellent and the yield has been around ten tons per acre per annum. We can cut it once in 30 days and get about a ton per cutting. It requires under these conditions irrigation every 60 days, and during the heat of the summer perhaps more. Irrigated lands sown in Rhodes Grass and used as a pasture will carry from 2 to 4 animals per acre per annum, and these animals will gain from 1 to 3 pounds per day in weight easily. These are the results of actual tests.—J. W. HOIT, Bexar Co., Texas, Oct. 19, 1917.

Harvesting RHODES GRASS as a Hay Crop.

Planted Eight Acres Rhodes Grass Last Year—Planting 160 Acres This Year.

Rhodes Grass was introduced in this section last June, the first any one knew about it. A man planted eight acres, and is so well pleased he is planting 160 acres now, and another, a neighbor of his, told me he would plant 160 himself.

Farmers here think it will supersede alfalfa, as they claim it is stronger feed and more drought-resisting than anything else we have, and will grow on harder and more alkaline land than alfalfa.

It appears to be destined for a heavy planting.—WILLIAM KELLY, Imperial Co., California, Oct. 27, 1917.

BERMUDA GRASS

This is a most valuable perennial pasturage grass all through the South, and also produces good yields of hay in the far South. It is very well adapted to light soils, and in some sections of the South is the only pasturage grass that will make a good sod on this class of soil. It also does very well on clay and loamy soils. It is rather late in the spring, but stands hot, dry weather remarkably well, making a most valuable summer pasturage grass.

Bermuda Grass is very largely used for sowing on hillsides, railway embankments, mill dams, etc., for binding and holding the soil. We sold large quantities of this seed for use on the Panama Canal embankments.

Bermuda will furnish more summer pasturage during hot, dry spells than any other grass we have ever had experience with. It is rather difficult to eradicate when once established, but this is also a strong recommendation wherever permanent grass is desired. Provided proper methods are used, however, Bermuda Grass land can easily, if desired, be planted in other crops, the only requirement being that the Bermuda grass sod be deeply plowed and thoroughly inverted, so as to give the crops that are planted on same a good start when the shade from these prevent the Bermuda grass from growing.

Bermuda Grass with Burr Clover also makes a very desirable combination, the Burr Clover being in green, growing condition during the winter, when the Bermuda Grass is dormant. Burr Clover is, of course, only adapted for fall seeding, but can be sown on scarified Bermuda sod during September or October.

Bermuda Grass increases crop production.—Fine crops of cowpeas, corn and wheat have been raised on Bermuda grass sod that, previous to the land being taken up in it, would hardly produce a crop at all, showing that Bermuda grass is not only a most valuable pasturage grass, but is also a valuable permanent improver of the soil. The seed should be sown the end of March and May at the rate of 6 to 8 pounds per acre. Do not sow too early, as the seed will not germinate in cool weather. Prepare the ground well, making a good, firm seed-bed, as the seed is small, and cover very lightly with roller or brush harrow (roller is best) to a depth of not more than half an inch. Pkt. 10 cts.; lb. 50 cts. (postpaid, lb. 58 cts.); 10 lbs. and over, 45 cts. per lb.; 100-lb. lots and over, 42 cts. per lb.

Sudan Grass.

Sudan Grass

One of the Most Valuable of Summer Hay Grasses. Yields, Under Favorable Conditions, Three or Four Cuttings Per Season.

Sudan Grass is increasing in popularity everywhere, and is destined, in our opinion, very largely to supplant millet as a summer hay or forage crop. It was originally disseminated by the U. S. Department of Agriculture, and has been grown very generally all throughout the South and West, with marked success.

Reports from our customers the past season show its unquestioned superiority over millet as a summer hay and forage crop. Millet will only yield one cutting; Sudan Grass will yield three, and sometimes four cuttings, under favorable conditions.

We recommend more extensive seedings of Sudan Grass by our customers everywhere.

SOWING THE SEED.—The seed should not be sown until the ground and weather become warm, in this section not earlier than the first of May. Can be sown either in drills from 18 inches to two feet apart at the rate of about 10 lbs. per acre, and cultivated, or can be broadcasted or drilled thickly at the rate of 25 to 30 lbs. per acre.

The hay should be cut as soon as the grass is fully headed, and early cuttings are specially advisable where more cuttings per season are expected. The grass can be cut with a mower, the same as other grasses. Sudan Grass stools out thickly after the first cutting, and makes a thicker growth for the second and third cuttings than for the first cutting.

Sudan Grass is an annual, and requires to be sown each season.

By mail, pkt. 10 cts.; lb. 35 cts. (postpaid lb. 42 cts.); 10-lb. lots and over, 30 cts. per lb.; 100-lb. lots and over, 27 cts. per lb.

Sudan Grass gave three fine cuttings—far better than Millet.

I sowed the Sudan Grass which I bought of you on the 10th of May, and cut three fine cuttings. Some of it was 6 feet high. I consider it far better than any millet and expect to sow more next spring.—C. D. TALIAFERRO, Stafford Co., Va., Oct. 20, 1916.

Sudan Grass makes largest growth of hay, also makes good grazing.

Sudan Grass will make the largest growth of hay of anything planted or hay in this section, also makes good grazing.—W. T. WOOLFOLK, Orange Co., Va., Oct. 20, 1916.

Sudan Grass did well—cut three cuttings.

Sudan Grass did well. I cut three cuttings. Would have got four, but on account of a drought we had during August the last crop I did not cut.—U. G. JORDAN, Searcy Co., Ark., October, 1916.

Paspalum Dilatatum DALLIS GRASS

A Splendid Southern Hay and Pasturage Grass

We believe that Paspalum Dilatatum is destined to prove one of the most valuable and satisfactory grasses all throughout the South. It makes excellent hay and splendid grazing and succeeds and makes its best growth during warm weather, and has great drought-resisting qualities. Paspalum Dilatatum should not be sown as early as other grasses, as it requires warmth and moisture to germinate satisfactorily.

BEST METHODS OF SEEDING PASPALUM

If sown alone, it is better to sow it from the middle of March to the middle of April, and it should be sown at the rate of 6 to 8 lbs. per acre, on well-prepared land. We believe that its greatest value, however, is when sown in mixtures with other grasses, as above indicated, and we strongly recommend to our farmers everywhere to make at least a small seeding of this valuable grass, even if it is only seeded on a portion of their hay or pasture fields, as we believe that its great value will soon make itself apparent wherever it is sown.

Pkg. 10 cts.; lb. 45 cts. (by mail 55 cts.); in 10-lb. lots and over, 40 cts. per lb.; 100-lb. lots and over, 35 cts. per lb.

Crested Dogstail

A valuable pasture grass, largely used in mixtures, recommended for dry soils and situations. Does well on hillsides. Per pound, 35 cts. (postpaid, lb. 43 cts.); in 10-lb. lots and over, 30 cts. per lb.; 100 lbs. and over, 28 cts. per lb.

Perennial Rye Grass

A quick-growing, very early maturing grass, which furnishes good grazing and hay, and does very well in mixtures with grasses like Orchard and Tall Meadow Oat. It makes the quickest growth of any of the grasses, and for a grass to make a quick, leafy sod, will give the most satisfactory results. When sown by itself, sow 30 pounds per acre, either in the spring or fall. Fall seeding, however, gives best results. Pound 15 cts. (postpaid, lb. 23 cts.); in 10-lb. lots and over, 12 cts. per lb.; 100-lb. lots and over, 11 cts. per lb.

Pacey's Perennial Rye Grass

A selection of Perennial Rye Grass, particularly well adapted for lawn and pasture purposes, making a quick, leafy growth of fine texture. Per lb. 15 cts. (postpaid, lb. 23 cts.); in 10-lb. lots and over, 13 cts. per lb.; 100-lb. lots and over, 12 cts. per lb.

Italian Rye Grass (Lolium italicum)

Recommended principally for fall seeding. Yields three or four cuttings per year of most nutritious hay; a very valuable grass, particularly adapted for rich loamy soils or low grounds, does better in damp situations than other grasses. Full description in our Fall Catalogue, which will be mailed on request. Pound 16 cts. (postpaid, lb. 25 cts.); 10 lbs. and over, 14 cts. per lb.; 100 lbs. and over, 13 cts. per lb.

Red, or Chewning's Fescue

(Festuca rubra)

This is rapidly increasing in popularity. It makes a fine growth and thick turf, and is most valuable for lawns and lawn mixtures, as well as being a very desirable grass for pasture. It is also particularly well adapted for putting greens on golf courses, and is specially suited for this purpose throughout the South. Makes a thick, green sod, which stands adverse conditions of weather remarkably well. lb. 40 cts. (postpaid, lb. 47 cts.); 10-lb. lots and over, 35 cts. per lb.; 100 lbs and over, 33 cts. per lb.

Sudan Grass the best forage grass for the South—gives three to four cuttings per season.

I consider the Sudan as the very best forage grass for the South that can be grown. I get from 3 to 4 cuttings, depending on the seasons—never less than three. I believe from 5 to 6 cuttings could be obtained in lower South Carolina and Georgia in one season.—WM. C. FANT, Anderson Co., S. C., Oct. 10, 1917.

Sudan Grass grew seven feet high for first cutting.

All the grasses I have had from you have done fine. The Sudan Grass I sowed broadcast on land not manured. Grew 7 feet high for the first cutting.—C. F. GOFFEY, Avery Co., N. C., Nov. 1, 1916.

Wood's Special Grass and Clover Mixtures

**SPECIALLY RECOMMENDED
FOR PERMANENT HAY
AND PASTURAGE**

The best time for sowing WOOD'S SPECIAL GRASS AND CLOVER MIXTURES in the spring is the end of February or during March, although they can be seeded satisfactorily early in April; but the earlier they are sown, the better. Information regarding preparation of the land and seeding is found on page 74.

There is no question but what our Special Grass and Clover Mixtures yield more pasturage and much better crops of hay, and that the meadows or pastures will keep in good, productive condition very much longer than where only two or three varieties of grass or clover are sown, as is so frequently the custom with our farmers.

WOOD'S SPECIAL GRASS AND CLOVER MIXTURES are put up from grasses, in such proportions as experience has shown are best suited to the different soils and purposes for which they are recommended. Those for permanent pasture are composed of grasses which succeed each other in growth and give a succession from the first of spring till late in the winter; while for those desired more for cutting for hay, we have combined grasses which ripen together. The different mixtures are prepared both as to quantity and varieties best adapted to the soils and situations for which they are recommended. We shall take pleasure in giving our customers the benefit of our knowledge and experience in regard to mixtures to be sown, or we will be glad to advise them as to suitable grasses for their soils and purposes at any time that special information may be desired.

WOOD'S TRADE-MARK BRAND SEEDS USED IN ALL OF OUR GRASS MIXTURES

In all of our grass mixtures we use our Trade-Mark Brand Seeds only, the best quality obtainable, and of tested germination, the quality and purity of the seeds we sell being always our first consideration. We give under the heading of each mixture the kinds of grasses contained in the different mixtures. All are combined in suitable proportions as best adapted for the soils or purposes for which they are recommended.

We are continually in receipt of letters from our customers, speaking of the splendid results which they get from our Special Grass Mixtures, and we give below extracts from some of these letters, giving our customers' experience.

MIXTURES Nos. 1 to 5—For Permanent Pasture but will also make large yielding Crops of Hay

MIXTURE NO. 1—For light, gravelly or sandy soils

Composed of the following grasses and clovers:

Perennial Rye Grass	Crested Dogstail
Red Clover	Meadow Fescue
Alsike Clover	Orchard Grass
Tall Meadow Oat Grass	Red Top or Herds Grass
Alfalfa	Kentucky Blue Grass
White Clover	Japan Clover
Paspalum	Timothy
	Red Fescue

Sow 30 to 35 lbs. to the acre.
Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb.
100 lbs. and over, 22 cts. per lb.

MIXTURE NO. 2—For good loam soil

Composed of the following grasses and clovers:

Tall Meadow Oat Grass	Red Top or Herds Grass
Meadow Fescue	Red Clover
Orchard Grass	Alsike Clover
Perennial Rye Grass	White Clover
Kentucky Blue Grass	Timothy
Alfalfa Clover	Red Fescue

Sow 30 to 35 lbs. to the acre.
Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb.
100 lbs. and over, 22 cts. per lb.

Your Mixture No. 1 is very satisfactory. It has been a great help to me, notwithstanding the fact that it was sown on light sandy land.—W. J. BOONE, Gates Co., N. C., July 23, 1917.

Your No. 2 Grass Mixture gave satisfaction and I got a much better stand from it than from some local seeds on the same land. I think your seeds are hard to beat.—F. K. RICH, Ashe Co., N. C., Oct. 8, 1917.

The No. 3 Grass Mixture that I bought of you last fall proved very satisfactory, as it makes a splendid pasture.—R. R. COLE, James City Co., Va., July 17, 1917.

MIXTURE NO. 3—For heavy loam or clay soils

Composed of the following grasses and clovers:

Alsike Clover	Red Clover
Orchard Grass	Tall Meadow Oat Grass
Red Top or Herds Grass	Kentucky Blue Grass
White Clover	Perennial Rye Grass
Red Fescue	Timothy
Meadow Fescue	Alfalfa Clover

Sow 30 to 35 lbs. to the acre.
Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb.
100 lbs. and over, 22 cts. per lb.

MIXTURE NO. 4—For moist bottom land

Composed of the following grasses and clovers:

Kentucky Blue Grass	Red Top or Herds Grass
Timothy	Italian Rye Grass
Orchard Grass	Mammoth Clover
Alsike Clover	Tall Meadow Oat Grass
Meadow Fescue	Paspalum Grass

Sow 25 to 30 lbs. to the acre.
Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb.; 100 lbs. and over, 22 cts. per lb.

MIXTURE NO. 5—For wet bottom land

Composed of the following grasses and clovers:

Rough-Stalked Meadow Grass	Tall Meadow Oat Grass
Red Top or Herds Grass	Paspalum
Italian Rye Grass	Alsike Clover
Meadow Fescue	Kentucky Blue Grass
Timothy	Mammoth Clover
	Alfalfa

Sow 25 to 30 lbs. to the acre.
Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb.
100 lbs. and over, 22 cts. per lb.

Mixtures Nos. 6 to 9—For Mowing for Hay; will also make splendid pasturage.

OUR SPECIAL MIXTURES for mowing for hay are composed principally of grasses which ripen together for the first cutting, but they also contain smaller proportions of other grasses which will increase considerably the second cuttings, and so add very much to the pasturage yield, in case it is desired to use the fields for pasturage afterwards.

MIXTURE NO. 6—For light gravelly or sandy soils

Composed of the following grasses and clovers:

Orchard Grass	Kentucky Blue Grass
Tall Meadow Oat Grass	Red Clover
Perennial Rye Grass	Red Top or Herds Grass
Red Fescue	Meadow Fescue
Alsike Clover	Alfalfa Clover
Paspalum	

Sow 30 to 35 lbs. to the acre.

Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb. 100 lbs. and over, 22 cts. per lb.

I like the No. 6 Mixture fine. I sowed it on hillside land and it looks fine now. So all of your grass seed is good for me so far.—RICHARD ATES, Buchanan Co., Va., Oct. 18, 1917.

My No. 6 Grass Mixture did fine. I had grass 5 feet tall. I sowed your mixture No. 6 eight years ago, and I cut more grass this season than ever before.—G. F. COFFEY, Avery Co., N. C., Nov. 1, 1916.

Your No. 6 Grass Mixture, which I bought of you last fall, has given tire satisfaction. I seeded it about Sept. 20th and got a fine stand. I am cutting it now. Will get not less than 1½ tons per acre. I will want more seed next fall.—S. H. LEWELLYN, Dare Co., June 14, 1916.

MIXTURE NO. 7—For good loam soil

Composed of the following grasses and clovers:

Tall Meadow Oat Grass	Perennial Rye Grass
Meadow Fescue	Red Clover
Orchard Grass	Alsike Clover
Red Top or Herds Grass	Alfalfa Clover
Timothy	Velvet Blue Grass
Kentucky Blue Grass	

Sow 30 to 35 lbs. to the acre.

Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb. 100 lbs. and over, 22 cts. per lb.

Your No. 7 Grass Mixture is in my opinion one of the best grass mixtures for thin land. Four years ago I seeded half acre with No. 7 Grass Mixture Sept. 1st, and in May I cut two tons of as nice hay as ever I have seen. Now this was the first cutting. I got three cuttings that year. The second cutting I got about one ton and the third cutting half ton. I think the No. 7 Mixture is one of the best for meadow or pasture that I have ever used. Hope your customers will try Old No. 7.—M. WALKER, Rockingham Co., N. C., Oct. 16, 1917.

MIXTURE NO. 8—For heavy loam or clay soils

Composed of the following grasses and clovers:

Meadow Fescue	Red Clover
Orchard Grass	Alsike Clover
Perennial Rye Grass	Timothy
Tall Meadow Oat Grass	Paspalum
Kentucky Blue Grass	Alfalfa Clover
Red Top or Herds Grass	

Sow 30 to 35 lbs. to the acre.

Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb. 100 lbs. and over, 22 cts. per lb.

I am well pleased with Wood's Grass Mixture No. 8, and intend to order more in the spring.—G. FRANK JOHNSTON, Bradley Co., Tenn., Oct. 14, 1917.

I sowed 100 lbs. of No. 8 Grass Mixture last spring. I got a fine quantity of feed from this fall cutting, and from the way it looks now I am expecting a good quantity next year. I think it is a great mixture. I shall sow more of it next spring.—CHAP BODENHEIMER, Germantown, Stokes Co., N. C., Oct. 21, 1915.

MIXTURE NO. 9—For moist bottom land

Composed of the following grasses and clovers:

Meadow Foxtail	Italian Rye Grass
Red Top or Herds Grass	Alsike Clover
Timothy	Kentucky Blue Grass
Meadow Fescue	Paspalum
Sapling Clover	

Sow 30 to 35 lbs. to the acre.

Lb. 25 cts. (postpaid, 33 cts. lb.); 10-lb. lots and over, 23 cts. lb. 100 lbs. and over, 22 cts. per lb.

My land is low and overflows 2 to 3 times a year, but does not seem to kill out the No. 9 Mixture, and we have gotten some very fine cuttings of hay off of similar land. In fact, we have just cut about 12,000 lbs. of No. 9 from low lands, and are getting it up today.—H. J. PENN, Rockingham Co., Sept. 5, 1916.

I bought a few pounds of your No. 9 Grass Mixture last spring to sow as an experiment, and I wish to inform you that I got a fine stand, and it is looking so well today that I am contemplating ordering quite a good sized order next spring. I think seeding a mixture is the best way to sow grass.—E. W. SUMNER, Floyd Co., Va., Oct. 19, 1917.

Park Meadow Mixture No. 10

A most desirable and valuable mixture, especially adapted where it is desired to put land down in permanent grass fields. This mixture contains a larger variety of grasses than any of our mixtures, and is admirably adapted both for permanent pasturage and hay, making a thick-set turf, which makes a fine appearance for large parks or meadows. We have sold this mixture to our customers now for several years past with very satisfactory results, and it has been used on large scale on some of our most beautiful suburban farms throughout this and other sections. Our Park Meadow Mixture on account of the greater number of grasses contained in it, is adapted to a greater variety of soils than any of our other mixtures. We would recommend it for use on any soils, excepting possibly very light soils or heavy low grounds. On account of the large number of grasses contained in this mixture, it should be sown a little thicker than the ordinary mixture, and if properly sown and well put in, will furnish excellent continuous grazing throughout the year or very large and satisfactory yields of hay.

We would recommend that it be sown at the rate of 40 to 50 lbs. to the acre. Per lb. 26 cts. (postpaid, 1b. 35 cts.); 10-lb. and over, 24 cts. lb; 100-lbs. and over, 23 cts. lb.

SPECIAL MIXTURES FOR PUBLIC PARKS, GOLF COURSES AND BASEBALL GROUNDS

We have given a great deal of attention and study to the preparation of Special Mixtures for use on golf courses in the South and East. We are prepared to supply the following mixtures, which, with the proper attention, will give the best results:

Wood's Fair Green Mixture

This mixture is especially recommended for golf courses and public parks south of Virginia, and will form a thick turf, giving an excellent playing surface all the year round, and at the same time will remain green through the heat of summer. This contains Bermuda Grass, which is the best drought-resisting grass for the South.

After repeated tests on golf courses south of the Mason and Dixon Line, we have found that grasses containing a fair proportion of Bermuda Grass make by far the best and most satisfactory fair green mixture.

This mixture can also be seeded on baseball parks, croquet lawns, public squares, or a school or college campus, or any place where a wiry, tough, permanent sod is desired for constant use. 30 cts. per lb. (postpaid, 1b. 40 cts.); 10-lb. lots and over, 25 cts. per lb.; 100-lb. lots and over, 23 cts. per lb.

Putting Green Mixture

Composed of the fine dwarf-growing grasses which produce the thick, velvety turf most desired by golfers. Per lb. 40 cts. (postpaid, 1b. 50 cts.); 10-lb. lots and over, 35 cts. per lb.; 100-lb. lots and over, 32 cts. per lb.

SEED OATS—Best and Largest Yielding Varieties

Burt or Ninety-Day Oats.

Oats sown in the spring should be put in as early as practicable, for best results and should be sown thicker than fall seeding, as they do not have time for stooling out so thickly as fall-sown oats. The Burt Ninety-Day Oat continues to be the most popular variety for spring seeding, making a very quick-growing and large-yielding oat.

Spring-seeded oats should be put in at the rate of two to three bushels to the acre and some farmers even sow them more thickly than this, claiming that they get much larger yields from thick seedings.

Burt or Ninety-Day Oats

The Quickest Growing, Most Prolific and Surest Cropping of Spring Oats

For a spring oat for seeding in March and April, the Burt is unquestionably the best and surest yielding of spring oats; the advantages claimed for it being that it is earlier to mature, free from rust, healthy, clean and vigorous growth of straw, and makes a remarkable good yield of clean, bright, heavy grain. On account of its earliness to mature it is one of the surest cropping varieties for the South. Color and appearance of grain somewhat resemble the rust-proof oat, but it is a little lighter in color. Peck 50 cts. bushel \$1.30; in 5-bus. lots and over, \$1.20 per bus. Special prices on large lots.

Used Burt Oats for three successive years; by far the best Spring Oats

I have used the Burt Oats for three successive years, and I find them by far the best spring oats I have ever used. The yield is so much better to the acre than other varieties, making them a favorite for spring planting with many of my acquaintances as well as myself.—C. N. MOORE, Pender Co., N. C. Oct. 31, 1916.

Burt Oats the best of Spring Oats; do better with thick seeding

I have been sowing oats for a number of years. I have sowed many varieties and I find Burt or Ninety Day Oats the best spring oats that I have ever sowed. They do well on low or high land. I sowed $3\frac{1}{2}$ bushels to the acre, and find it better than having them thinner. I find all the seeds that I get from T. W. WOOD & SONS to be the best that I can get anywhere.—C. A. PARKER, Hertford Co., N. C., Oct. 16, 1916.

Appler Oats

The Appler Oat is equally well adapted for sowing both in the spring and the fall, but when put in the spring, should be sown before the middle of March. It makes a strong, quick-growing oat, bunchy heads, heavy grain. While originating in the State of Georgia, this oat has been grown to a considerable extent both in this section and in other Southern States, and has proved to be one of the best and most reliable of rust-proof oats for the South. Price, peck 50 cts.; bushel \$1.40; in 5-bus. lots and over, \$1.30 per bushel.

The Appler Oats you shipped me are the best cleaned and prettiest oats I have ever seen.—J. E. WHITEHEAD, Tallahassee, Leon Co., Fla., October 26, 1917.

Swedish Select

One of the Best, Most Satisfactory, Largest Yielding of White Spring Oats. The oats are large, thick, white, plump, and heavy grain. This oat has given very general satisfaction all throughout this section. Price of the Swedish Select Oats, peck 50 cts.; bushel \$1.50; in 10-bushel lots and over, \$1.40 per bushel.

The Swedish Select Oats were the finest seed that we had ever sowed, and although they were sowed very late on account of wet weather—not being sowed until the first day of May—they made a good growth. We did not let them get ripe, but cut them to feed in the sheaf. The heads were well filled, and had we threshed them, would have yielded a good amount of grain.—OLIN V. WILSON, Ritchie Co., W. Va., Oct. 29, 1916.

White Spring Oats

This is the variety most generally sown throughout the North and West, and is also quite largely grown in this section, although the newer varieties offered by us are decidedly preferable, both as to yield and reliability of cropping. Price of our Trade-Mark Brand White Spring Oats, heaviest and cleanest quality, about \$1.25 per bus.; in 5-bus. lots and over, \$1.15 bus.

Virginia Gray Winter or Turf Oats

When sown early, before the middle of March, these oats will far outyield the ordinary spring oats, making a larger crop and heavier grain. For seed purposes, too, it is most desirable to sow winter oats in the spring, as they make a better and cleaner seed oats for sowing in the fall than if continual seedings are made from the fall-grown oats. Sow at the rate of 2 bushels per acre. Price fluctuates. Present price Trade-Mark Brand, bushel \$1.85; in 5-bus. lots and over, \$1.75 per bushel.

Fulghum

This oat came into prominence in the South in 1913. It is of the rust-proof type, earlier than either Appler or Bancroft, and a heavier yielder. Our tests made at our farm showed that, seeded March 18th, they matured June 29th, two or three days later than the Burt, and five to ten days earlier than either the Appler or the Bancroft. Trade Mark Brand, peck 50 cts.; bushel \$1.85; in 5-bus. lots and over, \$1.75 per bus.

Black Victor Oats

A fine, heavy, productive type of black spring oats, originally grown from English stock. It has proved to be one of the heaviest yielding of spring oats. Black oats are usually considered to be more robust and harder and heavier yielding than other oats, and this new oat promises to fully sustain that reputation. The grain is large and contains a remarkably well developed kernel, making it particularly valuable to grow for feeding purposes. Price, peck 40 cts.; bushel \$1.40; in 10-bus. lots and over, \$1.30 per bus.

Black Spring Oats

Our stock of these oats is specially heavy seed. Black oats usually are considered heavier yielding than the white varieties, and are in high favor in some sections.

Price, Trade Mark Brand, about \$1.25 per bus.; in 5-bus. lots and over, \$1.15 per bus.

Bancroft Oats

Our experiments with this improved strain of rust-proof oats last year proved to be one of the best and largest yielding and surest cropping of spring oats. It matures in about ninety-five days, and is a very superior variety, both in yield and in appearance of grain. Wherever they have been grown they have made a decided impression as a most superior cropping oat. We recommend them to our customers, believing that they will become one of the leading and standard varieties in a very short time. Price, peck 50 cts.; bushel \$1.60; in 5-bus. lots and over, \$1.50 per bushel.

Red Rust Proof Oats

These oats are very popular throughout the South, especially on the light, sandy soils of the coast region. They are also preferred for low grounds or in situations where other oats are much inclined to rust. They make a large yield of fine heavy grain. They are usually sown both in the fall and spring. Price fluctuates. Present price of our Southern grown Trade-Mark Brand, best and cleanest quality, bushel \$1.25; in 5-bus. lots and over, \$1.15 per bushel.

WOOD'S SPRING PASTURAGE MIXTURE

Makes the Quickest-Growing, Largest Yielding and Most Nutritious Grazing for Spring and Early Summer Pasturage

This is a mixture of Spring Barley, rye, vetch, oats and rape, combined in proper proportions to make a quick, early and nutritious spring pasturage, and is specially valuable to come in for use earlier than the regular grasses and clovers; will supply excellent, nutritious grazing two to three weeks before the regular pastures should be grazed, and give a large and continuous yield until summer comes on. The sowing of this mixture will also prove of benefit to the land, where it is desired to plant corn or other crops later in the season. Sow 2 to 3 bushels per acre. Price: \$2.25 per bushel of 40 lbs.; 5-bushel lots and over, \$2.10 per bushel.

I intend to sow four acres of your Spring Pasture Mixture, same as you sold me seed last spring. It made good pasture this summer, and I like it.—M. L. FREEMAN, Sunnyside Farm, Nottoway Co., Va., December, 1916.

We got very satisfactory results from your Spring Pasture Mixture.—MRS. L. E. McCLUNG, Greenbrier Co., W. Va., Oct. 11, 1916.

Wood's Spring Pasture Mixture gave satisfaction in every particular.—F. E. KNOELLER, Sussex Co., Va., October 9, 1916.

CANADA FIELD PEAS

Canada Field Peas, sown early with oats, usually make one of the largest yielding and most nutritious spring forage crops that can be put in; but they should be sown early in February or not later than the middle of March, for the best results. The earlier they are put in, the better. Under favorable circumstances, Canada Field Peas will yield more nutritious forage to the acre than any similar crop that can be seeded in the spring, and they make a complete food, feeding grain being unnecessary when horses and cattle are fed on oat-pea hay. Sow in January, February or early in March, at the rate of one bushel per acre, with one and a half bushels of rust proof or spring oats. Present price, qt. 25 cts. postpaid, 40 cts. qt.); peck \$1.25; bushel \$4.50. Price fluctuates. Will quote price at any time upon request. Cotton sacks, holding 2 bushels, 40 cts. extra.

Canada Field Peas Sown with Oats Makes Good Feed for Cows

The Canada Field Peas we bought of you last spring gave good results. We sowed them with oats, and when the pods were well formed put all in the silo. This mixture makes a good cow feed. We shall want more peas next spring.—BROAD ACRE FARM CO., Nottoway Co., Va., October 8, 1917.

OREGON SPRING VETCH

(VICIA SATIVA)

This has been used very extensively for years on the Pacific Coast, and has been sown to a considerable extent in the Southern States. It makes a very good growth, and sown with oats makes an excellent forage crop. It also makes a good soil-improving crop.

Sow at the rate of 30 lbs. of Vetch with one bushel of Spring or Rust Proof Oats to the acre.

Price: Lb. 10 cts. (postage paid, lb. 18 cts.); 10 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb.

Kaffir Corn

Makes Large Yield of Fodder—Also Specially Valuable to Grow for Grain for Cattle and Poultry

The great value of this crop has long been appreciated in the West, and it is to-day grown on the largest scale in the Western States. It makes a large growth of forage, and is also particularly valuable on account of its yield of grain, which makes most nutritious feed, both for feeding to all kinds of stock and to poultry. Kaffir Corn in the last few years has also been very generally sown with cowpeas, broadcast, at the rate of a peck of Kaffir Corn to a bushel of cow-peas. Sown in this way the Kaffir Corn helps to hold up the cow-peas off the ground, and this causes a larger growth of cow-peas and both can be cut together, making an enormous yielding crop of most nutritious feed. For a forage crop, when sown by itself, Kaffir Corn should be sown broadcast at the rate of from three-quarters to one bushel per acre. When sown for a forage crop, either by itself or with cow-peas, the crop should be cut before it is fully headed out.

I have been planting Kaffir Corn seed for many years, and I regard it as one of the most valuable forage crops we have. I prefer it to any of the sorghums, both for feeding green and for sowing with cow peas for forage. It cannot be recommended too highly.—GEO. H. EDWARDS, Darlington Co., Oct. 11, 1916.

I found the seed very good. The Kaffir Corn is well headed, and some of the best I ever saw. Will say also that the Broom Corn was very fine and turned out splendidly.—GEO. SMITH, Albemarle Co., Oct. 24, 1916.

WHITE KAFFIR CORN.—The standard variety to grow both for forage and for making seed to feed to poultry and cattle. Found 10 cts. (postpaid, lb. 18 cts.); 10 lbs. and over, 8 cts. per lb.; 50 lbs. and over, 7 cts. per lb.

Yellow Milo Maize

This makes a thick, succulent growth of forage, very nutritious and of splendid milk-producing qualities. This, like sorghum, can be cut over two or three times, where it is desired to cut for green forage. Also makes excellent ensilage, or can be cured same as other sorghums. Found 10 cts. (postpaid, lb. 18 cts.); 10 lbs. and over, 8 cts. per lb.; 50 lbs. and over, 7 cts. lb.

Improved Evergreen Broom Corn

An excellent variety; is a good length, fine, straight, and has a green appearance when ripe, and sells at the highest market price. Sow in drills three feet apart, and thin out to three inches. Sow 5 lbs. per acre. Pkt. 10 cts.; lb. 15 cts. (postpaid, lb. 23 cts.); 10 lbs. and over, 12 cts. per lb.; 50 lbs. and over, 10 cts. per lb.

Price of book, "Broom-Corn and Brooms," telling all about growing and marketing Broom-Corn, 60 cts. postpaid.

CANADA FIELD PEAS

Sown with Oats Make a Large-Yielding and Most Nutritious Forage Crop.

HAIRY VETCH

(VICIA VILLOSA)

One of the most valuable forage and soil-improving crops for the South. Considered better adapted for fall than spring seeding, although if sown early in the spring gives very good results. Full description given in our Fall Catalog.

Price: Lb. 25 cts. (postage paid, lb. 33 cts.); 10 lbs. and over, 22 cts. per lb.; 100 lbs. and over, 21 cts. per lb.

Sorghums and Forage Crops

SUGAR DRIP SORGHUM

This variety not only makes a much larger yield of syrup, but syrup of a decidedly superior quality to the ordinary variety of sorghum, and is the only kind that should be used for making sorghum syrup. It is not a difficult matter to make sorghum, and with a variety like this new Sugar Drip, we believe that the making of sorghum will become very general, not only for home use, but also for sale in our local markets. It is also excellently adapted for forage, making an excellent growth, and is more juicy and succulent than other kinds. **Price of Sugar Drip Sorghum:** Pkt. 10 cts.; lb. 23 cts. postpaid. By express or freight, lb. 15 cts.; 10-lb. lots and over, 12 cts. lb.; 50 lbs. 10 cts. per lb.; 100-lb. lots and over, 9 cts. per lb.

137 Gallons Molasses from One Peck of Sugar Drip Sorghum

My one peck of seed of Sugar Drip Sorghum turned out fine. I planted one acre and I made 137 gallons of molasses. I could not ask for better turnout.—J. R. RYLAND, Mecklenburg Co., Va., October 15, 1917

Sugar Drip Sorghum Made a Fine Yield—Sweeter Than Any Other

The Sugar Drip Sorghum was exceedingly sweet, sweeter than any I have tasted. The syrup is also good and sweet. Made a fine yield.—WM. J. PURCELL, Darlington Co., S. C., October 14, 1916.

Sold Sugar Drip Sorghum at \$1.00 per Gallon—Made 145 Gallons On Half Acre

I planted the Sugar Drip Sorghum in 1916 on half an acre of good land, and made 145 gallons of as fine sorghum as ever any man made, and sold same for \$1.00 per gallon.—SILAS CANADAY, Raleigh Co., W. Va., October 21, 1917.

Sugar Drip the Best of All Sorghums.

I have been raising your Sugar Drip Sorghum for four years past, and find it the best all-round sorghum we can get here. It is best, clear and fine-tasted, and those who make it up tell me IT IS EASIER MADE UP, takes less cooking and skimming than any other kind.—S. C. HUEY, Tipton Co., Tenn., May 15, 1916.

Made 175 Gallons of Molasses from One Gallon Seed.

I bought one gallon of Sugar Drip Sorghum seed from you. I planted one acre, made 175 gallons of molasses of excellent flavor, and threshed from same 37 bushels clean seed.—J. F. PATTERSON, Calhoun Co., Miss., April 14, 1916.

Sugar Drip Sorghum the Best Ever Grown.

I furnished the Sugar Drip Sorghum seed which I purchased from you to four different customers, and I am glad to state that they are very much pleased with their crop from it. They all claim that it is the best that they have ever grown.—C. C. BOLTON, Wise Co., Va., October 17, 1916.

SUGAR DRIP SORGHUM

Makes the Largest and Best Yield of Superior Quality Syrup

EARLY AMBER SORGHUM

Furnishes a large yield of most nutritious forage, which can be fed either green or cured, and will yield two or three cuttings a year, stooling cut thicker each time it is cut. It grows 10 to 12 feet high. Sow broadcast for forage at the rate of one to one and a half bushels per acre in drills $3\frac{1}{2}$ to 4 feet apart. **Lb. 12 cts. (postpaid, lb. 20 cts.); 10-lb. lots and over, 9 cts. per lb.; 50 lbs. 9 cts. per lb.; 100-lb. lots and over, 8 cts. per lb.**

EARLY ORANGE SORGHUM

This variety is rapidly growing in favor wherever it is grown. Similar in growth to the Early Amber, but it is claimed that it produces a heavier crop. This and Early Amber are not recommended for syrup purposes. The Sugar Drip is much better, where it is desired to plant to make sorghum syrup. **Pkt. 10 cts.; lb. 23 cts. postpaid. By express or freight, lb. 15 cts.; 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 9 cts. per lb.**

FETERITA

A drought-resisting forage plant which has given the most excellent and satisfactory results wherever it has been sown, and is remarkable for its drought-resisting qualities. Feterita is earlier in maturity than Kafir Corn and is considered superior, both in grain and fodder production. We have sold it quite generally throughout the South, and received very satisfactory reports from our customers who used it. Feterita should be planted and cultivated the same as Kafir Corn, after the ground and weather get warm, from April to July. **Lb. 15 cts. (postpaid, lb. 23 cts.); 10-lb. lots and over, 10 cts. per lb.; 50 lbs. 8 cts. per lb.; 100-lb. lots and over, $7\frac{1}{2}$ cts. per lb.**

Feterita Makes Rapid Growth; Can Be Cut 3 or 4 Times

Feterita is the best plant for cutting for annual crop. Comes up quickly, so as to enable one to cut from 3 to 4 times. Cows seem to like it better than Teosinte, and it makes a decidedly more rapid growth.—JAS. D. HARDEN, Darlington Co., S. C., Dec. 9, 1915.

SHALLU Also called Egyptian Wheat

A grain and forage plant of decided promise, which has received the enthusiastic endorsement of our customers. Shallu should be planted at the same time as Sorghum or Kafir Corn, in drills 24 to 30 inches apart. It stools out after the first cutting, producing a second growth equally as good as the first.

In harvesting the seed, the tops are cut off and cured in a dry place, and threshed out. For forage the stalks can be cut the same as other similar forage crops. It starts its growth again very quickly after cutting, and will in favorable weather mature a second crop within about sixty days after the first cutting.

One of our Florida customers states that when it is planted early in the season it produces two crops of seed and forage from one planting, and that for flour, feed and grain it will equal anything in the United States, while for chickens, hogs, sheep and horses it at all times takes the place of corn.

PRICE: Pkt. 10 cts.; lb. 25 cts. postpaid. By express or freight, lb. 15 cts.; 10-lb. lots and over, 12 cts. per lb.; 50-lb. lots and over, 10 cts. per lb.

Shallu Made a Wonderful Crop of Forage—An Excellent Feed

The Shallu I received from you made a wonderful crop of forage and seed, and I think an excellent feed.—EDW. H. GANZ, Caddo Co., La., October 22, 1917.

Shallu Makes A No. 1 Chicken Feed

I expect to put out quite a few acres of Shallu this spring, as I found the seed bought from you last spring proved to be A No. 1 chicken feed.—W. P. GWYNNE, Orange Co., Fla., Jan. 29, 1917.

Shallu Did Fine; Was a Wonder

The Shallu I bought of you last year did fine. I planted it in July last year; good season followed it, and it was a wonder.—F. J. PERKINSON, Nottoway Co., Va., Oct. 20, 1916.

GERMAN MILLET

German Millet makes a large-yielding and most nutritious hay crop, quick-growing and easily cured. It requires, however, to be seeded thickly—not less than one bushel per acre—and the crop should always be cut while in bloom, before the seed hardens in the head. If the seed is allowed to form, the stalks get hard, and it does not make nearly as good quality hay, and at the same time it is more exhaustive to the land. It can be sown at any time from the middle of May until the end of July. Do not sow too early, as it does not grow off well until the soil and weather get warm. It matures its crop in from 6 to 8 weeks after seeding. Our Southern-grown German Millet makes much better growth than Western-grown seed.

Sowing German Millet with cow-peas for a hay crop seems to be increasing. Sown in this way, it should be sown with some quick-maturing variety of cow-peas, such as Whippoorwill or New Era, and should be sown at the rate of about three-quarters of a bushel of millet and one bushel of cow-peas to the acre. It is necessary, when these crops are sown together, to cut the crop at the time that the millet is ready to cut for hay, regardless of the maturity of the cow-peas. Sown together in this way, they make a much larger yield than either crop alone, and cure up and make splendid, nutritious feed.

Price of our Trade Mark Brand Tennessee German Millet, lb. 10 cts. (postpaid, lb. 18 cts.); 10 lbs. and over, 7 cts. per lb.; 100 lbs. and over, 5½ cts. per lb. (bushel 50 lbs., \$2.75). Prices fluctuate.

German Millet Makes Fine Hay—Cures Up Nicely, Easy to Grow, Easy to House

I have planted the Tennessee-grown German Millet for 7 or 8 years, and have never had a failure with it. I consider it a very fine hay, easy to plant, easy to grow, and easy to house, as it cures up very nicely indeed when cut for hay. I shall continue to make Tennessee-grown German Millet as long as I continue to farm.—THOS. S. PETTITT, Halifax Co., N. C., Oct. 17, 1916.

German Millet Sown with Cow Peas Gives Large Yield of Fine Hay

The German Millet I bought of you last spring was very satisfactory. I sowed it with peas and got a large yield of fine hay.—MRS. O. R. CARNEY, Mecklenburg Co., Va., October 5, 1916.

Our German Millet Fine Seed—True to Name; Sown with Cow Peas Makes Feed Hard to Beat

The German Millet seed bought of you was fine seed, and was true to name. I sowed it broadcast with cow peas, and as a result have some very fine feed. I think a mixture of this kind makes a feed that is hard to beat. Cow peas are more easily cured for hay when mixed with millet.—E. R. ATKINS, Prince Edward Co., Va., Oct. 9, 1916.

HUNGARIAN MILLET

This is only recommended for sowing on good low grounds or rich soils. Sown on this class of soils, it makes a very superior hay, and considered equal in nutritive qualities to timothy hay. For uplands or light soils, it does not make as large-yielding crop as the German Millet. Hungarian Millet can be sown any time from the first of May to the end of July, at the rate of one bushel per acre. Price of our Trade-Mark Brand Hungarian Millet, lb. 10 cts. (postpaid, lb. 18 cts.); 10 lbs. and over, 7 cts. per lb.; 100 lbs. and over, 6 cts. per lb. Prices fluctuate.

PEARL, or CAT-TAIL MILLET (Pencillaria)

One of the Best and Most Nutritious of Continuous-Cutting Green Forage Plants

This makes a most nutritious and valuable continuous cutting forage plant, and is increasing in popularity throughout the country. It will grow 10 to 12 feet high, but cutting can be commenced when it has attained the height of 3 to 4 feet, when it will stool out enormously and make a rapid growth, and it can be cut this way three or four times in a season. It is largely used by dairymen and others who have cattle, for furnishing them green food through the summer, as if a sufficient quantity is sown, it can be cut as desired, furnishing a daily supply of green feed until killed by freezing weather. It can be fed either green or cured as dry forage, making a most nutritious feed, which is relished by all kinds of stock. It can also be cut three or four times during the season from one seeding. Sow five pounds of seed per acre in drills three feet apart. Pearl, or Cat-Tail Millet should not be planted before May. It is a tropical plant, and requires warm soil and warm weather to germinate well and grow off to best advantage. Pkt. 10 cts.; lb. 25 cts. (postpaid, lb. 35 cts.); 10 lbs. and over, 23 cts. per lb.; 100 lbs. and over, 20 cts. per lb.

Pearl Millet a Rapid Grower—Can Be Cut Several Times

I found the Pearl or Cattail Millet to be satisfactory for a green feed for cows. I planted in rows heavily manured, and cut when about two feet high. It is a rapid grower, and can be cut several times.—W. H. WALKER, Orange Co., N. C., Oct. 20, 1916.

Pearl or Cat-Tail Millet makes the best feed cut green I ever saw, and the most of it.—J. T. BRISTOW, Northampton Co., N. C., Oct. 9, 1916.

Pearl Millet One of the Best Feeds—Easy to Grow

I had good results from the Pearl or Cat-Tail Millet. I consider it one of the best feeds for grazing or cutting we have, owing to its rapid growth and being so easy to grow; it will grow on almost any soil.—C. O. STAYNER, Gershaw Co., S. C., October, 1917.

German Millet

VELVET BEANS

are rapidly coming to the front as one of the most important forage and soil improving crops. We give full descriptions and interesting information about VELVET BEANS on page 6 of this catalog. Read it.

INOCULATING CULTURES

for ALFALFA, CLOVERS, COW PEAS and all leguminous crops act almost like fertilizers, increasing the nodules and root-growth, making better stands, stronger plants and larger yields. See page 93 of this catalog for full information about these cultures.

Wood's Famous Southern Ensilage Corns

In Ensilage Corns our trade has grown to very large proportions, and we are to-day, we believe, the largest dealers in this class of corn in this country, not only selling very large quantities throughout this section, but also having a very large trade throughout the North and West, and also selling considerable for export to foreign countries.

Virginia has long been noted for supplying the best Ensilage Corn, and our Pamunkey, Eureka, and other varieties are quite generally grown all over this country.

Virginia-grown corns, on account of climatic reasons, make much larger growth in the North and West than corns grown in other sections. Our corns, too, are cured under natural conditions, and are unsurpassed in vigorous germination. Prices named below include new grain bags.

Pamunkey Ensilage Corn

This splendid ensilage corn is increasing in popularity very rapidly wherever it is grown, and we believe it is unquestionably the best and largest-yielding ensilage corn grown. Wherever it is grown, our customers are enthusiastic in its praise. It is a specially selected strain of ensilage corn, selected by ourselves. It grows very tall, attaining a height of 12 to 15 feet. It is prolific in its nature, having two to six ears to the stalk, making a heavy, thick growth of fodder.

We strongly recommend this variety for all sections, believing it will out-yield any other kind in cultivation.

The following are extracts from letters from our customers who are enthusiastic in their praise of this splendid ensilage variety:

Pamunkey Ensilage Corn the Best Ensilage Corn I Ever Raised.

I bought 12 bushels of your Pamunkey last spring, and must say it is the best ensilage corn I ever raised. I think every grain grew, and I am like on Lake Erie where it is hard to get a good stand of corn, but I am going to order Pamunkey again this spring.—W. R. CUTLIP, Ash-tabula Co., Ohio, Feb. 8, 1917.

Wood's Ensilage Corn Leafy, Sturdy; Better Than Other Varieties.

We have used Wood's Pamunkey Ensilage Corn for silo filling for 3 or 4 years. It is leafy, sturdy, and ears well in this section, better than other large varieties.—TORBET & DAY, Passaic Co., N. J., Oct. 29, 1917.

Price of Pamunkey Ensilage Corn: Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel \$3.75; in 5-bus. lots and over, \$3.50 per bushel.

Wood's Virginia Ensilage Corn

This continues to be one of the most popular and satisfactory of ensilage corns, making a very large growth of thick, succulent fodder. We have sold it largely for a number of years, and not only to farmers in our section, but also in the North and West, and it has distinctly proven its superiority for ensilage and fodder purposes wherever it is grown. For Northern planting, climatic change makes Southern corn especially valuable for fodder and ensilage purposes. Pkt. 10 cts.; qt. 20 cts. (postpaid, qt. 35 cts.); peck \$1.10; bushel \$3.50; in 5-bushel lots and over, \$3.25 per bushel. Special prices on large lots.

Wood's Virginia Ensilage Corn yields an immense crop

Have used your Wood's Virginia Ensilage Corn since 1908 and have not had a crop to fail. With us it yields an immense crop for the silo, just after the rush of fall seeding and getting the field corn in shock is over.—FRED MILLER, Holmes Co., O., Feb. 10, 1915.

Virginia Horse Tooth Ensilage

A type of corn that is very largely used for ensilage purposes, with the best and most satisfactory results. It is a large, deep-grained white corn; shape of grain somewhat resembling a horse's tooth, hence the name. Pkt. 10 cts.; qt. 20 cts. (postpaid, qt. 35 cts.); peck \$1.10; bushel \$3.50; in 5-bushel lots and over, \$3.25 per bushel.

Pamunkey Ensilage Corn as a Silo Filler Has No Equal.

I am very much pleased with the Pamunkey Ensilage Corn I got. I think as a silo filler it has no equal.—H. C. MARSHALL, Jefferson Co., W. Va.

Pamunkey Ensilage Corn Makes an Enormous Yield.

The Pamunkey Ensilage Corn I bought from you last spring has been harvested and made an enormous yield. I feel sure that some of the strongest land made 100 bushels to the acre. Stalks were large and tall, some of it being 16 feet high or more. I planted 12 acres and filled two silos, one 12x24 and the other 12x28, and had 8 loads left over. I feel sure that any one using this corn will be well pleased with it in every respect.—GEO. E. FRANCISCO, Warren Co., Tenn., Oct., 1916.

Cocke's Prolific Ensilage Corn

This is a most valuable type of ensilage corn, being amongst the tallest growing of corns; well foddered, makes several ears to the stalk, and a most valuable ensilage variety. Pkt. 10 cts.; qt. 20 cts. (postpaid, qt. 35 cts.); peck \$1.10; bushel \$3.25; in 5-bushel lots and over, \$3.10 per bushel.

Eureka Ensilage Corn

The Eureka Ensilage Corn is a very popular and desirable ensilage corn. It grows very tall and leafy, and is very productive. It is a short-grained, but one of the most productive, both in growth of fodder and grain, of any of the standard varieties. Its great value for ensilage is due to its enormous growth and great productiveness of leaves. It originated in Virginia, and is Virginia-raised corn, but is very generally used and sold for ensilage in the North and West and gives the best and most satisfactory results. Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.10; bushel \$3.50; in 5-bushel lots and over, \$3.25 per bushel.

We planted 7 acres of your Eureka Ensilage Corn last season. After filling our two silos containing 70 tons, we had 1¼ acres left standing, which, besides plenty of fodder, yielded 40 bushels of corn.—R. J. BERNARD, Bibb Co., Ga., Feb. 24, 1917.

WOOD'S PRODUCTIVE SEED CORNS—WHITE VARIETIES

Boone County Corn

The Boone County Corn continues to be one of the most popular and satisfactory corns everywhere it is grown, and is highly recommended as an early-maturing, large-yielding corn for upland or good light loam soils. The ears contain from 18 to 24 rows, and are well filled from butt to tip. It has white cobs of medium size; the kernels are creamy white, very deep, with fine large germs. The depth of kernels always insures a large percentage of shelled corn. Foliage is abundant, leaves thick and succulent, and it makes excellent fodder. Has a good, strong-growing stalk, which stands up well. Boone County Corn usually takes the majority of premiums at both the State and county fairs in this section and can be classed as one of the best early-maturing, large-yielding white corns, and one of the most highly-bred corns in cultivation.

BOONE COUNTY CORN. Selected Seed, Regular stock. Pkt. 10 cts.; quart 25 cts. (postpaid 40 cts.); peck \$1.25; bushel \$3.50.

Boone County the Best Corn I Ever Raised.

The Boone County Corn I ordered from you two years ago is the best corn I ever planted. I raised the finest corn last year I ever did.—J. S. BOOKER, Washington Co., Va., Feb. 16, 1917.

Boone County Corn Took First Premium at County Fair.

You may be interested to know that the corn grown on my place at Louisa, from selected Boone County seed purchased from you, has just taken first premium at the County Fair.—F. W. GWATHMEY, Washington, D. C., Oct. 15, 1917.

WOOD'S PRIZE-WINNING BOONE COUNTY CORN

Grown Specially for Us on the Famous Bellwood Farms

We made an exhibit of this splendid strain of WOOD'S PRIZE-WINNING BOONE COUNTY CORN at the Virginia State Fair last year, and it attracted universal attention and admiration. The remarkable uniformity, large size and well-filled ears showed it to be one of the finest strains of Boone County Corn in cultivation.

For full description and information regarding the splendid record of this corn, together with the methods which have been used to make it one of the most highly-bred and productive seed corns obtainable, see page 6 of this catalog.

Farmers desiring to procure one of the most highly-bred and productive corns obtainable will do well to order our Bellwood Strain of this famous WOOD'S PRIZE-WINNING BOONE COUNTY CORN.

PRICE: Pkt. 10 cts.; quart 30 cts. (postpaid, qt. 45 cts.); peck \$1.50; bushel \$4.00. Selected Ears, \$5.00 per bushel crate.

Wood's Prize Winning Boone County Corn Made Over 86 Bushels per Acre.

The one acre of my corn weighed 86 bushels 14 lbs., and I had two acres more than made 120 bushels. The Prize-Winning Boone County was certainly fine. My boy took the second prize in the county in bushels and first prize in the most profitable acre. This corn was all planted on ridge and. The small seeds I received of you were all fine.—MONROE WILSON, Simpson Co., Ky., Dec. 20, 1916.

Wood's Prize Winning Boone County Corn Produced Twice as Much as Other Corns.

We purchased four kinds of seed corn from different seedsmen. Your Prize-Winning Boone County produced twice as much corn as any of the others, and the stalks are larger.—ARANAS DEVELOPMENT CO., Moore Co., N. C., October, 1917.

Casey's Pure Bred Corn

This corn has been grown, bred and disseminated by one of the leading corn growers of this State, for several years past, and has proved to be one of the best white corns for his section and farther South. It is a pure white corn, deep-grained and very attractive, and has taken a large number of prizes at our State and County fairs. It is of medium growth, and medium early in maturity, making large sized and well-filled ears, of superior quality grain.

PRICE: Pkt. 10 cts.; quart 25 cts. (postpaid qt. 40 cts.); peck \$1.25; bushel \$3.50.

I think very highly of the Snowflake Corn. It is a good, hardy, rapid-growing corn. It ears low and even. All of the ears are about 1/2 foot from the ground. It has a good long growth of fodder and as few barren stalks as I have ever seen in corn in my experience. It stood the drought unusually well. The ears are large and even, with very little shucks, which I like very much.—H. T. WICKHAM, Hanover County, Va.

Improved Southern White Snowflake

This is a most valuable field variety, one that makes a large yield, and, when ground, makes meal of the finest quality. It also makes a splendid roasting-ear corn, being deep-grained, producing large-sized ears, of a shape that is most salable for green corn in our markets. It is an early and quick-growing variety, maturing its crops in about 100 days. It grows about 8 feet in height; ears set 4 to 5 feet from the ground. Nearly always produces two ears to the stalk. Does not blow down easily, and is valuable for replacing. Will make good corn in poor land where other sorts with large stalks will fail. Our market-garden customers will find this a particularly valuable sort for making green corn to sell for roasting ears.

PRICE: Pkt. 10 cts.; quart 30 cts. (postpaid, quart 45 cts.); peck \$1.40; bushel \$4.50.

Cocke's Prolific Corn

This is a valuable variety of white corn, first produced by the late General Cocke on his plantation on the James river. Since that time it has been very greatly improved by careful selection and cultivation. On land of good fertility, and especially on river low grounds, it may be relied upon to produce from two to four ears to the stalk and we have seen growing as high as eleven good ears to the stalk. This prolificacy makes it a high yielding corn. One farmer in Albemarle county, Va., produced 20 bushels of corn of this variety on one acre of land, and 1,575 bushels on 15 acres, or an average over the 15 acres of 105 bushels per acre. Had the season been a more propitious one, he believes the yield would have been still larger. The ears are of good average size, the grain being white, flinty nature, making an excellent meal or hominy corn. Our stock of this corn has been steadily improved by selection, and we believe that we have the best and most productive stock of this variety in existence. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.20; bushel \$3.50.**

The Cocke's Prolific Corn I got from you beats all corn I have ever planted, yielding. I find it an easy matter to make from 80 to 90 bushels corn per acre with Cocke's Prolific.—R. O. CAMPBELL, Bladen Co., N. C., Oct. 22, 1917.

The Cocke's Prolific Corn I bought of you is a surprise to the community. It has from 2 to 4 well-matured ears to the stalk. It is growing on gray gravelly soil in reasonably high state of cultivation, and it looks as if we will gather 50 or 60 bushels to the acre of firm, well-matured corn.—C. W. HALL, Jackson Co., Ala., October, 1917.

Eureka Corn

This corn is a selection from the famous Cocke's Prolific, producing larger ears, but not so many to the stalk. The ears frequently measure from 10 to 14 inches long. It is a pure white, medium hard corn; fine keeper and excellent corn for market or milling. Also a fine corn for ensilage. Has from 2 to 3 ears to the stalk; on good land will yield 60 to 135 bushels to the acre. Grows from 12 to 16 feet high; will weigh about 60 lbs. to the measured bushel. This corn, like all two or three-eared sorts, will do best on good land, and is especially adapted for bottom land. For this class of soil this is one of the largest yielding of white corns. Extensive variety tests in Virginia showed this and the Cocke's Prolific to be the largest yielding of all corns

planted. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.20; bushel \$3.50.**

Virginia White Dent

The standard variety of white corn grown throughout this section. It has deep grains, comparatively small cob, and makes a good growth of both stalk and fodder. Our stock of this has been grown by the same growers for the past ten years, and selections and improvements made each successive year. We recommend this as a most satisfactory and large yielding white field corn, especially for river low ground. **Per peck \$1.00; per bushel \$3.25.**

Old Virginia Shoe Peg Corn

Especially recommended for planting on light, sandy, loamy soil, and for roasting ear corn for shipping green. As it is a quick vigorous grower can be planted late and usually produces one good medium to large size ear, but sometimes two ears to the stalk. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel \$3.50.**

Blount's Prolific

This remarkably prolific corn was introduced by Prof. Blount, who, starting with two ears to the stalk, has succeeded in improving it so as to produce from 3 to 6 ears. It is a large-yielding white variety of flinty nature, making excellent meal. Reports of this corn from Texas and Alabama Experiment Stations rank this as one of the largest yielding of field varieties for the South. For late planting the corn has no superior. It is of quick growth, matures up well and yields splendidly. Blount's Prolific also makes a first-class ensilage corn. Our stock of this corn is an extra fine strain carefully bred. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel \$3.50.**

Blount's Prolific Corn that I got from you last year did fine, as it was so wet, but it would have done better if we could have gotten our corn plowed more. I like it better than any other ensilage corn I have used. It matures early and makes a good, leafy fodder, and has good ears. I think there will be more of it used here next year.—F. F. ARMSTRONG, Fauquier Co., Va., Oct. 16, 1916.

I am well satisfied with the Blount's Prolific Seed Corn I got from you. It yielded well and matured early. I find it makes excellent meal.—JAS. W. GUTHRIE, Carteret Co., N. C., Nov. 3, 1915.

Bigg's Seven-Ear Corn

A remarkably prolific corn, which has given the very best and most satisfactory results to our customers. Mr. Biggs, the originator of this corn, states as follows: "For twenty years I have been making this highly prolific corn and I believe it to be the best corn that I have ever seen. I made one year thirty-three and one-third barrels to the acre, have made twenty-five barrels to the acre several years, have often made twenty, never less than fifteen."

This corn can be most successfully planted for a heavy-yielding variety in competition for prize-winning yields per acre. The ears, while of good size and attractive appearance, owing to so many being produced on one stalk, are not suitable to win in an exhibition of ear corn. Reports from our customers show it to be, however, one of the largest yielding of white corns. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel \$4.00.**

Bigg's Seven Ear Corn just can't be beat. It is the largest yielding corn I ever saw, and I intend to put most of my crop in it another year.—L. W. THOMASON, Muscogee Co., Ga., Oct. 26, 1915.

The Bigg's Seven Ear Corn I bought of you last spring was all that I expected of it. I think it the best corn for the Southern farmer to plant.—W. R. NEVILLE, Halifax Co., N. C., Oct. 8, 1917.

Hickory King Corn

A very popular and productive white corn, especially for high land, and it is in great favor with those who have planted it. It produces on good soil three or four average-sized ears to the stalk. The grain is large, broad and beautifully white, making the finest quality meal. The cob is often so small that a large-sized grain will cover the end of it. **Quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel \$3.50.**

The Hickory King Corn I got from you last spring came up splendidly and made a fine crop. Every one says they never saw such Hickory King ears.—J. C. WOOD, York Co., S. C., Sept. 28, 1917.

The corn I ordered from you last spring did very well. It was Hickory King variety. We think it is a very good upland corn.—JNO. CRAIG, Caldwell Co., N. C., Sept. 13, 1917.

Shenandoah White Dent

A selection of deep-grained white dent corn, made by one of our customers in the Shenandoah Valley. It has proved in our tests to be one of the largest yielding of white corns, maturing ten to fifteen days ahead of other similar varieties, and at the same time making a large and most satisfactory yield. It makes a growth under ordinary circumstances averaging about nine feet in height, and is a very uniform growing, highly-bred, large yielding white corn. We recommend it with confidence to our customers, believing it will give most satisfactory crop results. **Per pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.20; bushel \$3.50.**

The Snowflake made fine corn, a good many ears shelling 1 lb. of corn, but the Shenandoah White Dent beat anything I have ever seen grown in this country. I could sell every grain I made of it at a fancy price for seed corn.—J. C. WOOD, York Co., S. C., Sept. 28, 1917.

100-Day Velvet Beans Give Splendid Results in Pennsylvania.

The 100-Day Velvet Beans I bought of you last June gave excellent results. I planted four acres as a test, grow legumes and plow under the foliage for humus. The field was a dense covered green mat, many vines grew 10 to 18 feet long. Much of the seed ripened in the pods, which could have been gathered for planting. The trial is a profitable departure to get nitrogen and vegetable matter. I live in latitude 40½.—E. R. DEYSHUR, Berks Co., Pa., Oct. 14, 1916.

Wood's Prize Winning Gold Standard

An extra fine selection of this variety, grown in Fauquier County, Va., on which our grower has won First, or Blue Ribbon prizes for the best ten-ear exhibit of this corn at numerous corn shows, including the National Corn Show Exhibit.

We strongly recommend this as one of the best and most productive varieties of yellow corn in cultivation, and it is particularly desirable where it is desired to grow it to compete at county or state fairs.

It is early in maturity, making a good, stout stalk, ordinarily about nine feet high, well foddered, and producing one to two large ears to the stalk.

The grains are deep, and of the most attractive yellow color; cob comparatively small.

We strongly recommend our Prize-Winning strain of this Gold Standard Corn, as one of the best yellow corns in cultivation.

Price: Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel \$4.00.

The Gold Standard Corn I bought from you did fine. On a piece of ground 60 ft. by 200 ft. I made 19 barrels ear corn. It is the best yellow corn that has ever been made in this section.—G. W. HILL, Orangeburg Co., S. C., Aug. 23, 1917.

I think the Prize-Winning Gold Standard Corn far superior to the Improved Golden Dent Corn, as I had them planted side by side, and Gold Standard will make twice the yield of the Golden Dent, and hereafter I expect to use the Gold Standard.—WM. GOUDY, Buckingham Co., Va., Oct. 25, 1917.

Improved Golden Dent

We sell thousands of bushels of this splendid yellow corn every year, and it is one of the best and most reliable cropping yellow corns in cultivation. It makes a large-sized ear, small cob; deep grains, which are of a bright, attractive golden yellow color. It is singularly robust, and withstands injury by adverse weather or other unfavorable conditions better than any other sort we know of, the ears and grain maturing remarkably well, and always being marketed in bright, sound condition. Produces two to three ears to the stalk, and for a first-class, large-yielding yellow corn particularly adapted to the South. It is strongly recommended. **Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.20; bushel \$3.50.**

Reid's Early Yellow Dent

A splendid, highly-bred yellow corn, of early maturity and large yielding. Very popular in Piedmont sections, but is also well adapted to all sections where an early and large-yielding yellow corn is desired.

Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.20; bushel \$3.50.

Reid's Early Yellow Dent is fine. It did well for me. Under the conditions it did exceedingly well. I couldn't say too much for either this or Wood's Prize-Winning Boone County.—L. S. KESSINGER, Mercer Co., W. Va., Oct. 19, 1916.

Wood's
Prize-Winning
Gold Standard
Corn.

Improved Leaming

This continues to give the very best and most satisfactory cropping results wherever it is grown. Succeeds well on all soils, but gives better and more satisfactory crop on light or medium soils than other kinds. It does not make a very large growth of stalk, but produces two or three ears to the stalk, makes large sized ears, with no barren stalks. It is also of very superior feeding qualities, the claim being made that four bushels of this corn will put as much fat on a hog or steer as five of ordinary corn.

It matures early, stands adverse conditions of the weather remarkably well, and is really one of the most reliable cropping corns on our list. It is not quite equal in appearance of grain to our Improved Golden Dent, nor has it proved quite as popular as a seller, but some of our farmer customers report that for yield and feeding qualities they would rather plant the Leaming than any other yellow corn they have ever grown. **Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel \$3.75.**

The Improved Leaming Corn was just fine. I have grown this corn 3 or 4 seasons with very best results. The first year I grew this corn we had a very severe drought and nobody else grew any corn of note. I never had better.—SILAS CANADAY, Raleigh Co., W. Va., Oct. 21, 1917.

Virginia Yellow Dent

A popular strain of Virginia-grown corn, which is giving excellent results in all sections. Early to mature, and makes a large yield.

Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.20; bushel \$3.50.

I wish to say that for the first time in my life I made corn enough to run me until corn comes again, and I lay it to planting Wood's Early Virginia Yellow Dent and Wood's Golden Dent. I cordially thank you for your good seed book.—J. BALLANTYRE, Berkeley Co., S. C., Jan., 1915.

SEEDS BY PARCEL POST.

We call special attention to the advantages of sending seeds by parcel post. Ordered in this way, they are delivered at your post-office or on rural delivery routes at your home, with reasonable quickness and dispatch. We quote prices on small quantities postpaid. Those desiring larger quantities than quoted can easily figure the parcel post cost, and in ordering in this way, seeds can be ordered at prices quoted by us, "by express or freight," adding postage to the cost of the seed for the quantity desired.

For instance: 20 lbs. of seed can be sent to nearly all points in Central Virginia, Maryland, and Delaware, or within the limits of the Second Zone, at a cost of 25 cents, and within the limits of the Third Zone, which includes nearly all of North Carolina, West Virginia, and the southwestern portion of Virginia, all of Pennsylvania and New Jersey, at a cost of 45 cents.

We give full information in regard to parcel post rates, together with a map showing different zones, on the first inside cover page of our Catalog. When ordering seeds by parcel post (except when ordered at the postpaid rates), be sure and add the amount to cover postage to the price of the seed.

The following table gives domestic parcel post rates in abbreviated form:

DOMESTIC PARCEL POST RATES ON SEEDS, PLANTS, BULBS, ROOTS, ETC., WITHIN THE UNITED STATES AND ITS POSSESSIONS

		First Pound or Fraction.	Each Additional Pound or Fraction.
First Zone, Richmond, Va., and within 50 miles of Richmond.....		5 cts.	1 ct.
Second Zone, Within 50 to 150 miles of Richmond.....		5 cts.	1 ct.
Third Zone, Within 150 to 300 miles of Richmond.....		6 cts.	2 cts.
Fourth Zone, Within 300 to 600 miles of Richmond.....		7 cts.	4 cts.
Fifth Zone, Within 600 to 1000 miles of Richmond.....		8 cts.	6 cts.
Sixth Zone, Within 1000 to 1400 miles of Richmond.....		9 cts.	8 cts.
Seventh Zone, Within 1400 to 1800 miles of Richmond.....		11 cts.	10 cts.
Eighth Zone, All over 1800 miles of Richmond.....		12 cts.	12 cts.

Field or Cow Peas

**MOST VALUABLE AND SUREST-CROPPING OF
SUMMER FORAGE AND SOIL IMPROVING CROPS**

Cow Peas make one of the largest yielding and most nutritious forage crops grown. There is also no surer or cheaper means of improving and increasing the productivity of our soils than by sowing the Cow Peas. It is not necessary to turn under the crop of vines to improve the soil, and it is really considered more economical and the best way to cut off the crop of vines and cure them as a forage or hay crop, and then turn under the stubble and roots. Even when the crop is cut off, the land is left in very much better mechanical condition, and the productivity very much increased over what it was before the crop was grown. The Cow Peas, to a greater extent than any other leguminous crop, has the power to extract nitrogen and ammonia from the atmosphere and to store same in the vines and roots, so that, even if the crop is cut off, the land is enriched and its condition improved. From 10,000 to 18,000 pounds of green fodder per acre have been produced by the Cow Pea.

TO GROW FOR HAY they are most valuable, as they yield an immense quantity of feed of the best quality, and produce the crop in so short a time. The bacon made from hogs fed on the dried peas is much sweeter and more solid, and the fat will not run out in cooking nearly so much as if fed on corn.

FOR ENSILAGE they are unsurpassed, being more nutritious than green corn and other crops used for this purpose. Where it is desired to turn the whole crop under as a soil-improver, it is better to do so after the vines are partly dead. A good picking of the dried peas can be made before plowing under, if desired.

FERTILIZING COW-PEAS. Acid phosphate or bone and potash are usually considered the best fertilizers to use on cow-peas, and it is not, as a rule, considered desirable to use fertilizer containing nitrogen or ammonia. Our experience proves, however, that fertilizer containing nitrogen or ammonia is sometimes quite useful on poor lands or land that is deficient in humus or vegetable matter, and that the crop of cow-peas will be improved materially on this class of soils by its use.

SOWING COW-PEAS WITH SOJA BEANS, KAFFIR CORN, ETC.—Cow-Peas are quite frequently sown with Kaffir corn, sorghum, soja beans or corn, in order to furnish some support and to enable the vines to be cut and harvested to better advantage. Soja Beans should be sown at the rate of about half a bushel to one bushel of cow-peas. When Kaffir corn or sorghum is

COW-PEAS
and MILLET

Harvested for Hay.

sown with cow-peas, it should be sown at the rate of one peck of Kaffir corn or sorghum with one bushel of cow-peas to the acre.

The sowing of **Cow Peas and German Millet** for a hay crop has proved very satisfactory with some of our farmers, who have been enabled to sell the product very readily at good prices. Wherever this feed is used, it is very much liked, one of our farmers reporting that after starting its sale in this city, he received constant repeat orders from his customers until his stock was entirely exhausted, selling his entire crop at good, profitable prices.

The **New Era** and the **Whippoorwill** are the best kinds for sowing with **German Millet**, and are recommended usually at the rate of one bushel of peas to three-fourths bushel of German Millet per acre. The crop should be cut when the millet is ready. The peas will have reached the dough state by that time, and make an excellent combination of large-yielding and most nutritious feed.

Cow-Peas can be sown in May, June or July, at the rate of from one to one and a half bushels per acre.

Brabham —Our own experience—and fully confirmed by our customers—has proven conclusively that this new pea is one of the best and most productive, both as regards the growth which it makes and the yield of shelled peas. It holds its foliage well, making it particularly valuable where it is desired to save and cure the forage. It is a hybrid between the Iron and the half-crowder form of Whippoorwill, and is upright in growth. It has proved to be disease-resistant, embracing the good qualities of both the Iron and the Whippoorwill. It is better adapted for light soils than for heavy soils. **Pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, about \$4.00.**

The Brabham Peas made a heavy, vigorous growth, about ten days to two weeks later than Groit. Excellent for hay, and in my opinion would be the pea to sow with corn, as we sometimes do here for hay.—**GEO. W. BELL, Wicomico Co., Md., October, 1916.**

The Brabham Peas I got of you last spring did fine. The only pea that stands root knot.—**T. A. NIBLOCK, Smith Co., Texas, Oct. 24, 1916.**

Iron —A variety of cow-peas which is remarkable for its vigorous growth and disease-resistant qualities, and is especially adapted for hay or forage, as it retains its leaves and foliage better and longer than other kinds. On account of its disease-resistant qualities, it is especially valuable in some sections of the South, as it is entirely resistant to the attacks of the wilt-fungus, root-knot worm or nematode, and will produce a good crop on peasey land where other varieties will fail to make a crop. Even if this pea did not have the above remarkable qualities to recommend it, it would be a most valuable variety and one that is destined to come into general use. It is medium early, very prolific bearer of peas, and is also particularly valuable for hay and forage. The seed of this variety is also smaller than the average cow-pea, consequently it does not require as many to seed an acre as other varieties. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel about \$3.90.**

My experience with Iron Peas has been that they make a good crop of vines and seed on land that would not make other varieties. I believe they are the best peas I ever planted.—**J. M. GREY, Darlington Co., S. C., October 5, 1916.**

I consider the Iron Cow Peas superior to any variety I have tried. Not only do they make as large or larger yield of hay, but a large yield of peas, the hulls of which, when burst, closing over the peas and holding them instead of opening and spilling the peas, as most varieties do. They also seem (as claimed for them) to be free from diseases that affect most varieties.—**S. W. CAMDEN, Pittsylvania Co., Va., October 18, 1916.**

Whippoorwill —A favorite, early, upright-growing variety, more largely used and sold than any other kind. Has brown speckled seed, which are easily gathered. Makes a good growth of vine, which can be easily cut and cured as dry forage. We recommend this where an early variety of good growth and height is desired. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, about \$3.90.**

The Whippoorwill Cow Peas bought of you last spring did splendid, considering the wet weather we had all through July. They are very early and grow upright, making a good vine, and fruit well and are easily gathered. Will plant them again next year.—**J. M. GAY, Nash Co., N. C., Oct. 8, 1917.**

The Whippoorwill Peas I purchased from you in early season proved highly satisfactory, and germination and growth were good, and they had plenty of peas. I consider them one of the best varieties as land improvers and for hay.—**E. E. HATHAWAY, Lancaster Co., Va., October 23, 1917.**

The Whippoorwill Cow Peas which I bought of you did extra well. I got about 1½ to 2 tons of hay per acre.—**J. W. GIBSON, Braxton Co., W. Va., Dec. 28, 1917.**

I consider the Whippoorwill one of the best varieties of Cow-Peas in that it grows erect, matures in a short time and is very productive in seeds that do not shatter easily.—**H. TURNER ROWE, Charles Co., Md., Oct. 20, 1916.**

Two-Crop Clay —This new pea has attained considerable popularity in South Carolina, where it originated. Its name is fully descriptive of its good qualities, as from its quick maturity, two crops can be planted and harvested during one season. It can be advantageously used both as a forage and soil-improving crop, and also for making a profitable crop of dried peas. Its quick maturity gives it many advantages. Planted early, the crop can be harvested and plowed under in plenty of time for fall crops. Planted late, it will make better and quicker growth than other kinds. It is also especially valuable for Northern and Western planting, where the seasons are short. **Price, pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, \$4.00.**

Groit —A fine, new, early maturing cow-pea, somewhat resembling New Era in appearance and size of seed, but makes a larger growth. Very highly recommended as an early-maturing, large-yielding variety. **Price, pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bus (60 lbs.), about \$4.00.**

The Groit Cow Peas I bought of you are fine, large vines now hanging full of ripe peas. They make both vines and peas.—**J. P. POOLE, Charles Co., Md., Oct. 16, 1916.**

New Era—An early maturing variety which has proved very popular and satisfactory. Upright growing, quick to mature, and is remarkably prolific of peas. Rather small vine which cures easily, making splendid dry forage. The seed are smaller in size than the ordinary cow peas, so that it does not require as many to seed an acre—from $\frac{3}{4}$ to 1 bushel per acre will give ample seeding. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, about \$4.00.**

The New Era Cow Peas bought from you for several years have been of A No. 1 quality. Reasonably early, good vine and plenty of pods. We think the best variety for the Kanawha Valley, and should suit other places as well. Several farmers have been watching ours, and they now sow the same kind.—LINZA HILL, Mason Co., W. Va., Nov. 27, 1916.

The New Era Cow Peas purchased from you this summer turned out exceptionally well and made a splendid lot of hay. This variety seems to do better in our locality, where the purpose is to cut for hay, than the other varieties.—J. A. WILMER, Charles Co., Md., Oct. 20, 1916.

Mixed Cow Peas Sown for Soil Improving Purpose.

Mixed Cow-Peas—The principal varieties in the Mixed Cow-Peas we offer are the Clay, Black, Wonderful, Whippoorwill and other Southern varieties. A great many Southern farmers prefer to sow Cow-Peas in mixture, as they grow thicker, producing a better crop of vines and forage than sowing single varieties alone. Where the crop is desired for soil-improving it is really an advantage to sow these mixed peas. Price fluctuates. **Peck \$1.20; bushel, about \$3.75.**

In regard to Mixed Cow Peas I bought of you last spring, I was well pleased with them for forage crop. I cut as fine a crop of hay from them as I ever saw. I don't think the Mixed Peas can be beat for forage crop.—J. H. PETER, Bedford Co., Va., Oct. 18, 1916.

Mixed Cow-Peas with Soja Beans—Where desired we can furnish Mixed Cow-Peas with Soja Beans. It is quite an advantage to sow Soja Beans with Cow-Peas. The Soja Beans are upright in growth and help to hold up the Cow-Pea vines. They are admirably adapted for cutting for hay, the Cow-Peas adding considerably to their nutritive value. The advantage of sowing Cow-Peas in mixture has long been recognized by our Southern growers, and the added advantages of sowing Soja Beans with them will make their use more popular than ever. **Price, per bushel \$1.20; bushel, about \$3.75.**

There was an enormous growth of vine this summer from planting of Mixed Cowpeas and Soja Beans, but when we cut the Cowpeas, which were in proper condition for hay, the Soja Beans were flowering. The Soja Beans were most useful in holding the heavy growth of peas off the ground.—E. NELSON FELL, Warrenton, Fauquier Co., Va. Nov., 1915.

Black—This is the standard variety, and the one most largely grown in this immediate section. It is very prolific, makes a fine growth, both of vine and leaves, and a good yield of peas. It is a splendid land-improver, and most valuable as a forage crop, and makes an enormous yield of rich, nutritious feed. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, about \$4.00.**

Your peas were fine. Think the Black Peas stand the drought better than any peas I ever planted. I got first prize at Marshville Fair.—J. R. HELMS, Union Co., N. C., Oct. 27, 1916.

The Black Cowpeas that I bought of you did fine. I sowed them with your Mammoth Yellow Soja Beans and the results were very satisfactory.—FRANK J. LEHMANN, Powhatan Co., Va., October, 1916.

Clay—One of the medium late varieties of cow-peas. Vigorous growth of vine, running habit. Very popular all through the Southern States. A little earlier than the Unknown or Wonderful Pea, and a good variety for soil-improving. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.20; bushel, about \$3.75.**

I think that the Clay is decidedly the best pea for this part of the country. My crops have been very satisfactory.—E. A. SNYDER, Botetourt Co., Va., Dec. 8, 1916.

Taylor or Early Crowder—This is a large speckled pea, making a large growth of vine, a long large pod, and a large yield of shelled peas. It is early to mature, upright in growth, and a most valuable variety. One of the best hay peas grown. It is also one of the most profitable and surest cropping to plant for a crop of peas. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bus. about \$3.90.** Prices of all cow-peas fluctuate.

Wonderful or Unknown—This popular variety makes an enormous and remarkable growth of vines, but requires the full growing season to make its crop. In yield and growth of vines it surpasses any of the varieties of cow-peas. The vines are of a running habit, and cover more ground and make more hay than any other variety, but make rather fewer pods and fewer peas in proportion. Should be planted in May in order to come to full maturity. **Pkt. 10 cts.; qt. 25 cts. (postpaid, qt. 40 cts.); peck \$1.25; bushel, about \$4.00.**

Red Ripper—Red-seeded; a most desirable and productive variety. Makes short running vines and a fair yield of peas. One of the medium late varieties. Very popular in sections where it is known. **Pkt. 10 cts.; qt. 20 cts.; peck \$1.25; bushel, about \$3.90.**

EDIBLE COW PEAS

Make Profitable Money Crops to Plant Either for Sale, Green or Dry.

The varieties named below are not only valuable as forage and soil-improving crops, but the dried peas are readily salable during the winter, at much higher prices than ordinary cow-peas. The dried peas of the varieties named below are largely used all through the South and in other sections of the country, as table peas during the winter, and the demand for them is constantly on the increase. To make a money crop, as well as to improve the soil at the same time, these varieties are most valuable and desirable. They are also sold quite largely on our Southern market in a green state during the season, and our truckers and market-gardeners find them a very profitable crop to grow in this way.

Cream Crowder—This new pea is not only one of the earliest to mature, but is also one of the most prolific and best flavored table peas in our list. It is also excellent to use for a forage crop and soil improver, as it makes a large growth of vines. **Pkt. 10 cts.; quart 40 cts. (postpaid, qt. 55 cts.).**

Rice, or Cream—A favorite Southern variety. One of the earliest to mature, and yields enormously if shelled peas, which are valuable for use as dried peas during the winter. They are superior in flavor to Blackeye Peas, and somewhat similar in appearance to the Gallavant, or Lady Pea, but are larger in size. Both these and the Gallavant Peas are very popular wherever grown, and they are usually readily salable at higher prices than Blackeye Peas. **Pkt. 10 cts.; qt. 35 cts. (postpaid, qt. 50 cts.); peck \$2.00; bushel \$7.50.**

Extra Early Blackeye—These are ten days to two weeks earlier than the Large Blackeye, and a most valuable variety. They do not run as much as the Large Blackeye Pea, but grows more in bush shape and hold the peas up well off the ground, and the pods are very thick-set on the vine. This variety is particularly valuable for truckers and market-gardeners who sow Blackeye Peas to sell green on the market, and is also a specially desirable variety, for late planting, as well as for early market. **Pkt. 10 cts. qt. 40 cts. (postpaid, qt. 55 cts.); peck \$2.50.**

Early or Rams-Horn Blackeye—A valuable early strain of the Large Blackeye; not quite as early as the Extra-Early Blackeye, but larger in size of peas and growth of vines. Similar in growth of vine and makes larger yield than the Large Blackeye, and quicker to mature, and on this account is very desirable. **Pkt. 10 cts.; qt. 30 cts. (postpaid, qt. 45 cts.); peck \$2.00; bushel \$7.50.** The Rams-Horn Peas did well. I planted a peck of them and gathered 13 bushels, after a large family are out of them all the time they were green. The Rice Peas did well. I am gathering them now. They made about 8 bushels to the peck. I planted them between corn rows.—LUCIUS POTTS, Duplin Co., N. C., Nov. 30, 1915.

Large Blackeye—The Large Blackeye Peas are more prolific, better flavored, and bring a higher price than the ordinary Blackeye, and farmers will find it more profitable to plant these than the ordinary Blackeye; they make a more profitable crop to grow for picking the dry peas for sale in our markets during the winter. **Pkt. 10 cts.; qt. 30 cts. (postpaid, qt. 45 cts.); peck \$2.00; bushel \$7.00.**

Gallavant or Lady—This is an old-fashioned pea, which is very popular in sections where it is known. The peas are small in size, of very fine flavor; superior in table qualities to the Blackeye Pea. It is very prolific, and a desirable variety to grow. It is known in some sections as "The Lady Pea." **Pkt. 10 cts.; qt. 40 cts. (postpaid, qt. 55 cts.). Peck, \$2.00.**

Gallavant or Lady Peas did O. K., and were fine for table use and bring a good price.—D. P. McNEILL, Robeson Co., N. C., Oct. 11, 1916.

SOJA BEANS —Profitable for Crop of Beans, and One of the Best of Summer Forage Crops.

In addition to the fact that Soja Beans make one of the best of summer forage crops, and are splendid soil-improvers, they are coming rapidly into use and popularity for use as table beans, and also for canning, the same as navy beans for "pork and beans." They are also being very largely used for the extraction of oil for commercial purposes. Their uses for these purposes have increased their popularity to a wonderful extent.

This increased demand is causing them to sell at much higher prices than they have in the past, and it is making them one of the most profitable crops for our Southern farmers to grow for a crop of beans.

The increased use of Soja Beans is likely to continue, and we recommend the growing of this crop to our Southern farmers, as likely to prove very profitable in the future. They are also a particularly valuable crop for growing in boll weevil sections in place of cotton.

In some sections, the beans are harvested by being cut, and threshed in a bean or grain separator afterwards. In other sections they are gathered by a bean harvester which gathers the crop in the field, and we are inclined to think that this is the best and most satisfactory way of harvesting the bean crop.

To grow for a crop of beans, they should be planted in drills three feet apart, at the rate of about half a bushel to the acre, and cultivated the same as for corn.

For a forage and soil-improving crop, they are best sown broadcast at the rate of about a bushel to the acre.

For forage and soil-improving purposes, however, they give, in our opinion, best results when sown in connection with cow peas, and half a bushel of Soja Beans with three pecks of cow peas to the acre will give excellent results.

Soja Beans are also a particularly valuable crop to plant for hogs, and they can be planted by themselves for this purpose, and also in the corn rows, and the hogs turned in to feed on the beans after the corn is harvested. The Soja Beans contain more protein and fattening qualities than corn.

Soja Beans do equally well on both light and heavy soils, and resist drought and hot weather to a remarkable extent, making them a particularly desirable crop for the South.

MAMMOTH YELLOW SOJAS

The largest growing and most popular of soja beans for forage purposes. A little later in maturity than other kinds, but makes larger yields, both of forage and seed. Especially valuable for this section and further South. **Pkt. 10 cts. postpaid; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel about \$4.00.** Price fluctuates. Crop values not settled at time catalog is printed.

Hollybrook Early Sojas

Makes a quicker growth and matures their crop two or three weeks earlier than the Mammoth Yellow Soja. It makes a large yield, both of forage and peas, and the added advantage of its earliness makes it a most distinct and valuable acquisition. It is a sure cropper and a vigorous, quick-growing variety. Sown as a forage or hay crop, it is much easier to cure and handle, and makes even a more nutritious crop than cow-peas. **Price: Per pkt. 10 cts.; quart 25 cts. (postpaid, qt. 40 cts.); peck \$1.40; bushel \$4.50.**

Wilson Early Black Sojas

A very prolific variety, and one of the best, in our opinion, for the northern states, where a quick, early variety is desired. Average height on good land is about three feet. The State Experiment Farm of Delaware, after a most extensive investigation of different varieties of Soja Beans, recommends the Wilson Black as ahead of any as a combination hay and seed variety. It was found to mature in about 115 days, to stand up well, make pods a good distance from the ground, and retain its seed. Its fine stem enables it to cure quickly for hay, which is particularly a point in its favor for planting in Delaware, New Jersey and more northerly latitudes, and no late variety of soja beans will compare with it for hay-making in these sections. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.50; bushel, about \$5.00.**

Early Dwarf Green Sojas

An early maturing variety of the soja beans, which makes a large yield of the shelled beans, but does not make as large a growth as other varieties. It is well adapted for late planting or in Northern sections, where other varieties do not have time to mature. **Pkt. 10 cts.; quart 30 cts. (postpaid, quart 45 cts.); peck \$1.50; bushel about \$5.50.**

Ito San Sojas

A very satisfactory variety to grow in a short season. Produces seeds fairly well, and matures in 95 to 100 days. Branches well, so as to be very satisfactorily mown. The plants are of medium size, averaging 25 to 30 inches in height. Will mature as far north as southern Wisconsin and southern Michigan. **Pkt. 10 cts.; quart 30 cts. (postpaid, quart 45 cts.); . peck \$1.50; bushel, about \$5.00.**

Brown Sojas

This is one of the best varieties for forage and soil-improving purposes, making a quick and large growth of forage. Is also very prolific in its yield of beans. Probably better adapted for sowing with cow peas than any other kinds, on account of its maturing with the cow pea crop to better advantage than the Mammoth Yellow. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.20; bushel, about \$3.75.**

Tar-Heel Black Sojas

Dark green foliage. Slightly earlier than Mammoth Yellow. Heavy growth of vine, upright in habit, and a soja bean that is destined to become very popular. Fully equal to any variety of soja beans for hay or seed production. It is fast growing in popularity wherever planted. **Pkt. 10 cts.; quart 25 cts. (postpaid, quart 40 cts.); peck \$1.25; bushel, about \$4.00.**

SOY BEANS FOR HUMAN FOOD

The extension service of the North Carolina College of Agriculture is advocating in a recent circular the use of soy beans for food purposes. In part, the circular states: "There is a great increase this year in the acreage devoted to soy beans in this State. This is as it should be, and people should see to it that some of these beans are saved at the end of the season for food purposes. Soy beans are much richer in protein than lima beans or sirloin steak. In fact, they contain practically double the amount of protein contained by these two staple food products. The soy bean contains about the same amount of fat or oil that is contained in sirloin steak and more than ten times the amount of this constituent than is contained in lima beans. The fuel value of soy beans as a food product is slightly higher than sirloin steak and lima beans."

Because of the possibilities in the use of the soy bean as a food product, sixteen household recipes are given in the circular, in order to encourage their more general use.

Mangels or Stock Beets

A SPLENDID WINTER FEED FOR CATTLE AND HOGS. INCREASES THE MILK FLOW. YIELD LARGER CROPS THAN TURNIPS, AND ARE HIGHER IN FEEDING VALUE.

Culture.—Plantings should be made beginning at corn planting time till the middle of June, soaking the seeds for twenty-four hours before planting. Make the rows 2 to 2½ feet apart, the drills one inch deep on lands that have plenty of moisture in the subsoil; on dry and sandy soil they should be planted deeper. Shallow sowings germinate better and give a larger proportion of vigorous plants. Thin out to stand 8 inches apart in the row; young plants may be transplanted to fill up vacancies. Cultivate as soon after planting as possible. As soon as frosts occur, dig the roots, cut off the tops and pile on a well drained situation, covering with straw or corn stalks and an inch of earth. As it gets colder increase the covering to prevent freezing. Covering gradually prevents heating. They are acid when first dug, but if kept till January they will be sweet and succulent. Always feed with some dry roughage. They should have a fertilizer containing a good per cent of potash. 6 to 8 lbs. will plant an acre.

Yellow or Orange Globe Mangel or Stock Beet

Yellow or Orange Globe —The finest type of yellow globe mangel in cultivation. Grows to a good size, of fine shape with small tap root, few side roots and small top; fine keepers and are high in feeding value. The roots grow almost entirely above ground, adapting them splendidly for shallow soils and making them easy to harvest. Oz. 8 cts.; ¼ lb. 25 cts.; lb. 90 cts. postpaid. By express, 80 cts. per lb.; 10 lbs. and over, 75 cts. per lb.

Golden Tankard —The best known and most largely grown yellow mangel, and especially recommended for dairymen on account of its milk producing properties and the richer quality of the milk. The flesh is firm and solid, rich golden yellow color. On account of its peculiar shape they can be grown closer in the rows than most mangels, increasing the yield per acre considerably. Grows well above ground and easily pulled. Yields particularly well on light soils. Oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid. By express, 90 cts. per lb.; 10 lbs. and over, 85 cts. per lb.

Mammoth Prize Long Red —No other mangel can compare with this variety in yield. Crops of forty to fifty tons per acre have been made on good land and under thorough cultivation. The roots often weigh twenty to twenty-five pounds each. It grows well above ground, is easily pulled; the deep red roots are straight, well formed and solid. Especially adapted to deep soils. Oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.00 postpaid. By express, 90 cts. per lb.; 10 lbs. and over, 85 cts. per lb.

Silesian Sugar —Although this variety does not yield quite as large crops as those described above, the feeding value, pound for pound, is fully half as much again greater on account of its high percentage of dry matter content. Recommended especially for fattening cattle, but is equally well adapted for general feeding as mangels. Oz. 10 cts.; ¼ lb. 25 cts.; lb. 90 cts. postpaid. By express, 80 cts. per lb.; 10 lbs. and over, 75 cts. per lb.

Carrots for Stock Feeding

Carrots make a healthy and desirable food for horses, and every horse owner should plant them liberally, so as to give his horse an occasional feed of carrots through the winter. They are also very desirable for feeding to hogs and cattle and make a tonic and alterative food which is of decided benefit. Plant in March, April or May—the earlier the better—in rows 2½ to 3 feet apart, at the rate of 3 to 4 pounds per acre. Cultivate same as for Mangel beets.

Improved White

Belgian No carrot makes such large and heavy crops and well-shaped roots. It is very nutritious. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. \$1.10 postpaid. By express, \$1.00 per lb.; 5 lb. lots at 90 cts. per lb.

Large Yellow

Belgian —A good keeper for late feeding. Makes long yellow roots. As fully one-third to one-half of the root grows above the surface, they are easily pulled. Pkt. 5 cts.; oz. 12 cts.; ¼ lb. 35 cts.; lb. \$1.35 postpaid. By express, \$1.25 per lb.

Belgian Carrot

SPANISH CHUFAS

A nut grass largely grown for feeding to hogs, for which purpose they are highly recommended. After the crop is grown, hogs may be turned into the field, thus saving the labor of harvesting and feeding.

Culture.—Chufas do best on light, sandy soil, or rather soil that does not contain too much clay except as a sub-soil. They should be planted in drills two and a half to three feet apart, dropping from three to five Chufas in a hill 15 to 20 inches apart, cover about two inches, keep clean and stir the soil occasionally. If for any reason an imperfect stand is obtained, the plants may be transplanted. Level culture is the best. Chufas make rapid growth after coming up. When it is desired to turn the hogs into them, pull up a few of the hills by the roots, and leave them on top of the soil, and when either hogs or chickens get a taste of them, they will go over the whole field in their search for them. They are very productive, nutritious and fattening. They can be planted in May, June, or early in July. Pkt. 10 cts.; quart 25 cts. (by mail, quart 35 cts.); peck \$1.40; bushel \$5.00.

WHITE NAVY BEANS

Planted in June or July, they usually make a very profitable crop to grow as shelled white beans for market. Plant in rows three feet apart, dropping two to three beans together a foot apart in the rows. Cultivate early, as they grow rapidly, but do not work them while the dew is on the foliage, and care should be used not to cultivate deeply after they are three or four inches high. Do not cultivate after they begin to blossom. Carefully grown, these will prove a profitable and successful crop. A peck will plant an acre. Pkt. 10 cts.; lb. 20 cts. (postpaid, lb. 28 cts.); 10 lbs. and over, 18 cts. per lb.; 100 lbs. and over, 17 cts. per lb.

TEOSINTE

A Most Valuable and Enormous Yielding, Continuous Cutting Forage Crop

We strongly recommend our customers who have not done so, to sow this splendid forage crop. If a sufficient quantity is sown, it will furnish a continuous daily supply of most nutritious green food for horses and all kinds of cattle all through the summer. It also makes splendid dry fodder, yielding enormously and being more nutritious and even better relished by all kinds of stock than corn fodder. In appearance it somewhat resembles Indian corn, but the leaves are much larger and broader, and the stalks contain sweeter sap. It produces a great number of shoots, very thickly covered with leaves, yielding an abundance of forage. It stools out enormously after being cut, as many as forty-five stalks having been grown from a single seed. The first cutting can be made when it is two or three feet high. Sow in May or June at the rate of 2 to 3 pounds per acre in drills $3\frac{1}{2}$ to 4 feet apart. **Ounce 10 cts.; $\frac{1}{4}$ lb. 20 cts.; lb. 50 cts.** (postpaid 60 cts. lb.); in 5-lb. lots and over, 45 cts. lb. Special price in quantity.

The following extracts from letters from customers give some idea of its great value:

Teosinte One of the Best Forage Crops—Yields a Wonderful Amount of Green Feed

yield a wonderful amount of green feed at a time when feed is unusually scarce.—DR. J. A. WHITE, Halifax Co., N. C., Oct. 19, 1916.
very small area of land planted in Teosinte will, with proper cultivation, Teosinte is, in my opinion, one of the best forage crops to be had. A

One-Fourth Acre Gives All Green Feed Needed For Four Horses and Four Cows

I had about one-fourth acre in Teosinte, and it furnished all the green feed I needed for four horses and four cows, besides giving some to my hogs. I hope I can always have a small patch. Nothing else has given quite as much satisfaction.—W. R. POWELL, Wake Co., N. C., October 17, 1917.

BENE (Sesame Orientale)

A tall annual herb, sometimes 3 to 4 feet in height, producing flowers followed by seed pods, which shatter after ripening, and the seeds—of an oily nature—are produced in great profusion, and much relished by poultry. The oil from the seed is sweet, and is sometimes used for culinary purposes, like olive oil, and the parched seeds are used in confectionery. It is, however, as a crop to attract and sustain wild birds, particularly quail and partridges, that we chiefly recommend it. The seed is drilled in rows 3 feet apart, as soon as danger of frost is over. Five pounds of seed is sown to the acre. **Price, per lb. 45 cts.** (postpaid 55 cts. lb.); in 10-lb. lots and over, 40 cts. per lb.

Beggar Weed or Florida Clover

(Desmodium Molle)

If this crop had been given a name according to its value, it would have been one of the most justly deemed and popular forage and soil-improving crops throughout the South. It is highly recommended as a forage plant for thin sandy lands and pine barrens. Makes a vigorous growth, 2 to 5 feet high, yielding largely for hay and pasturage; nutritive value compares favorably with red clover, cow-peas, etc.

On the sandy pine lands of the South Atlantic and Gulf States is probably the most valuable forage plant that can be grown. Its growth is dense, 2 to 4 feet, sometimes 7 feet; the forage crop abundant and nutritious.

Sow at any time after frosts are over until the middle of June, in drills 3 feet apart, 3 to 4 lbs. per acre, or broadcast, 10 to 12 lbs. per acre. Cover 1 to 2 inches. When 2 feet high, may be cut for hay or green feed, and will produce successive crops branching largely from the roots. Beggar Weed is not in any sense a pest, and can easily be eradicated, either by cultivation in other crops or cutting. **Pound 40 cts.** (postpaid 50 cts. per lb.); in 10-lb. lots and over, 35 cts. per lb.

The Beggarweed gave very satisfactory results, and I think it worthy of more attention. Used in both green state and cut, sown for hay; all stock are very fond of it. Soil was quite poor, but very good stand.—JNO. E. CHASE, Chesterfield Co., Va., October, 1916.

Mammoth Russian Sunflower

The best variety for the farmer. Makes heads nearly double the size of the common kind, and makes a much larger yield of seed. Will yield, under favorable conditions, 40 to 60 bushels to the acre, and yields of as high as 125 bushels have been reported under exceptionally favorable conditions. It is highly recommended for poultry, and the best egg-producer food known, and the leaves make excellent fodder, relished by all kinds of stock. The seed is a good food for horses, and yields a fine quality of oil. The strong, thick stalks can also be used for fuel. Cultivate the same as corn. When the seed is ripe and hard, cut off the heads and pile loosely in a rail-pen having a solid floor, or in a corn crib. After curing sufficiently, so that they will thresh easily, flay out and run through a threshing machine and clean with an ordinary fanning mill. Some species of sunflower are largely planted in the flower-garden for ornament. See Flower Seed pages. It is claimed in some sections of the South that the growth of a sunflower crop near the house acts as a preventive of malaria.

Per lb. 15 cts. (postpaid 25 cts. lb.); 10-lb. lots and over, 12 cts. per lb.; 100-lb. lots and over, 10 cts. per lb.

BUCKWHEAT

For a late summer crop Buckwheat is very desirable and profitable, especially in mountainous sections. It is easily grown, makes splendid flower food for bees and a large yield of grain, which can usually be sold for remunerative prices. It is also valuable for turning under as an improver of the soil. Even when grown for the grain crop, Buckwheat is not considered exhaustive to the soil. As a smothering crop, where the land contains objectionable weeds, it is very desirable, and it puts the soil in admirable condition for crops to follow.

JAPANESE. This variety of Buckwheat ripens a week earlier than the Silver Hull, and yields more largely than that variety. The kernels are larger than those of other sorts, but owing to its branching qualities, it need not be sown quite so thickly. **Lb. 10 cts.** (postpaid, lb. 13 cts.); 10 lbs. and over 7 cts. lb.; 50 lbs. and over 6 cts. lb.; 100 lbs. and over $5\frac{1}{2}$ cts. lb.

SILVER HULL. A prolific and favorite sort, making a fine quality flour. A superior variety in every way to the ordinary Buckwheat, which it has almost entirely superseded. **Lb. 10 cts.** (postpaid, lb. 13 cts.); 10 lbs. and over 7 cts. lb.; 50 lbs. and over, 6 cts. lb.; 100 lbs. and over, $5\frac{1}{2}$ cts. per lb. Current prices quoted on application. Cotton bags ($2\frac{1}{2}$ bus.), 40 cts. extra.

NATURAL SIZE

Peanuts

For medium light, loamy or sandy land, peanuts are one of the most profitable crops that can be grown. They yield very largely—yields of 50 bushels per acre being reported on land too poor to plant in corn. In addition to the yield of nuts, they yield quite largely of nutritive forage, and will yield ordinarily about a ton of excellent dry forage per acre, in addition to the crop of nuts.

Peanuts should be shelled before planting. They should be planted in May or early June, in rows about $2\frac{1}{2}$ to 3 feet apart, dropping the nuts 8 to 10 inches apart, one in a hill. Cover one or two inches deep. Cultivate three or four times with a cultivator, so as to loosen the earth and keep down weeds, and at the last working, with a small turn-plow throw the dirt to the nuts. Do not cultivate too late in the season, as late cultivation is likely to injure the formation of the nuts. It is also advisable to make an application of lime, scattering it on top of the row just after planting, and to use a top-dressing of land plaster just after the last working. Peanuts require plenty of lime to make first-class nuts, and the use of lime and land plaster as above mentioned is recommended by the most successful growers.

In harvesting, plow the peanuts and then stack against stakes stuck into the ground, the roots with the peanuts on them, to the center, and the leaves outside.

Improved Valencia Peanuts

A most desirable and productive variety, which was originally obtained from Spain. It is a distinct improvement in appearance over any variety now in common use. The pods are close

and well filled, containing 3 to 4 nuts to each pod. Very mild, sweet flavor. Wherever grown has given excellent results, and promises to supersede very largely the old Spanish Peanut.

IMPORTED
VALENCIA.—1b. 20c (postpaid, 28c lb.); 10 lbs. and over 17c lb.; 50 lbs. and over 16c lb.

HOME-GROWN
VALENCIA.—1b. 18c (postpaid, 25c lb.); 10 lbs. and over 15c lb.; 50 lbs. and over 13c lb.

Last year I bought a small amount of Valencia Peanuts. Was so well pleased with their taste and appearance that I induced my neighbors to

get some. This year we planted no other kind. The stores want them because they satisfy their customers. Most of the yields ran 3 and 4 nuts to the shell.—HARRY BYERLY, Baldwin Co., Ala., Oct., 1916.

Spanish Peanuts

In addition to their value for growing for nuts, these are very largely used in the South as a forage and fattening crop for hogs and other stocks. They are early to mature, very productive, and in the far South, where they can be planted in April, two crops can be made in a year, the second crop being planted early in July, the tops making a hay crop and the nuts a grain crop. In harvesting, the nuts hang to the vine and tops and nuts are fed together to hogs, cows and horses as a whole grain ration. Spanish Peanuts grow in more compact form than Virginia Peanuts, making it possible to grow them closer, making the cultivation easier to save. While the nuts are smaller, they are very much sweeter and of finer flavor than the larger sorts, and the "pops" so common in large varieties are seldom found in the Spanish. These and Chufas are two of the best crops in the South for fattening hogs, and no Southern farm, where stock is raised should be without them. 1b. 18 cts. (postpaid 25 cts.); 10 lbs. and over 15 cts. per lb.; 50 lbs. and over 12 cts. per lb. Special prices on large lots.

I have planted Spanish Peanuts for a number of years. They certainly lead all crops for fattening hogs. I have been pleased with all seeds obtained from you.—G. W. CLARK, Jefferson Co., Ga.

Spanish Peanuts and Chufas make two of the best and most satisfactory hog feeds for the South. See page 89 for full information about Chufas.

Spanish Chufas are simply fine and made a good yield. Will turn hogs on both chufas and beans soon. Think I will plant more next year.—J. E. KEEN, Davidson Co., N. C., Oct. 10, 1917.

Improved Virginia Peanuts

This is the variety most generally grown for commercial use, and makes considerably larger nuts than the Spanish. The peanuts we offer are selected from the best and most productive crops grown in this section. Peanuts are one of the most profitable and satisfactory crops that are grown in the South, and we recommend to all our customers, even if they do not plant for market, to plant at least a small patch of peanuts for home use or stock feeding. 1b. 18 cts. (postpaid, 25 cts. lb.); 10 lbs. and over 15 cts. per lb.; 50 lbs. and over 14 cts. per lb. Special prices in quantity.

Virginia Bunch Peanuts

The Virginia Bunch Peanuts are rapidly growing in favor wherever they are planted. They are about a week earlier than the running peanuts, and will, in wet weather, mature better than the running kind. They also make larger nuts, bringing from one to one and a half cents per pound more on the market than the running kinds, and are much easier to cultivate and harvest. They are fully equal to, and some growers claim make larger yields than the running peanuts. Their many advantages in other respects make them decidedly preferable for planting as a profitable crop. The bunch peanuts are usually planted flat, but in cultivating, the earth is thrown to them, making more of a ridge culture than is usually customary with the running variety. 1b. 20 cts. per lb. (postpaid, 28 cts. per lb.); 10 lbs. and over, 16 cts. per lb.; 50 lbs. and over, 14 cts. per lb.

Jerusalem, or White French Artichokes

Artichokes make an enormous crop of nutritious feed for hogs and all kinds of cattle. They will yield, ordinarily, twice as much as potatoes on the same land. Should be planted and cultivated the same as potatoes, although, where desired, hogs can be turned on them about two weeks after the blossoms fall, and allowed to feed on the roots throughout the winter, except when the ground is frozen.

Artichokes are almost entirely hardy and it is best not to dig them until ready to feed. They will stay in perfect condition in the ground until spring. Of course, as they cannot be dug during frozen weather in the winter, it is sometimes desirable to dig a sufficient quantity, so as to have a supply of feed during severe spells of winter weather. Otherwise, it is much better to allow them to remain in the ground until ready for use.

Artichokes can be planted any time in April, the earlier the better. Plant in rows four feet apart, dropping the artichokes 12 to 15 inches apart in the row. It requires 4 to 5 bushels to plant an acre. If land is poor, apply a good potato fertilizer at the rate of 400 to 500 pounds to the acre at the last working of the artichokes.

Price, peck 65 cts.; bushel (50 lbs.) \$2.00; in 5-bushel lots and over, \$1.90 per bushel.

I have been raising artichokes for 30 years, or rather my father has. He got his seed from you. Have grown 38 bushels from one peck planted on a plot of ground 10x12 yards. They will yield 500 or 600 bushels per acre, and require but little cultivation. Have never failed to make a good crop regardless of seasons. Think the demand will be greater than ever this year for them, as they are a great substitute for corn for feeding hogs.—J. B. COLEMAN, Enonville, Buckingham Co., Va., Oct. 30, 1917.

I am pleased with results with Jerusalem Artichokes, although I planted them on thin land; they did fairly well, and the hogs certainly do like them. I expect to plant more next year. I can plant them in fence corners where nothing but weeds grow, and other places, and make lots of feed with no work but planting the artichokes.—CLARENCE NIELD, Weakley Co., Tenn., Jan. 10, 1916.

Improved Varieties of Cotton Seed

The varieties of Cotton Seed that we offer, excepting the Sea Island, are all grown in North Carolina, by the best and most reliable growers. Owing to the rapid spread of boll weevil in parts of South Carolina, Georgia and Alabama, we have discontinued obtaining any varieties of cotton from those states, so as to avoid any possible danger of disseminating the pest of the cotton crop.

The stocks we offer are mostly obtained from the originators of the different varieties, or from the best and most reliable growers in the states named. We use every care in procuring our seeds, to get them from high-yielding and prolific crops, so as to supply our customers with the very best seeds obtainable, and we confidently recommend the cotton seed which we offer, as being much superior to ordinary stocks, and entirely free from any danger of boll-weevil infection.

Mitchell's Improved Early Prolific

(RE-IMPROVED KING)

Mitchell's Early Prolific is very early, very prolific and a large yielder of lint. Defies boll-weevil and all insects in the greatest possible way. It is a broad, double-limbed, double-bolled and fruits with lightning rapidity, until frost. The earliest by fifteen days, and every day counts for advantage and profit in defying insects and in making more fruit before frost. Has made a bale of cotton in thirty days fruiting time, and 1,640 pounds lint per acre. Ideal under intensive culture, and double cropping with clover, oats and early spring vegetables. Plant every other row in spring vegetables. This cotton responds to distance most wonderfully, and from shedding, by giving distance.

This cotton can be universally grown as the safest, surest and the most profitable crop. The seed sealed and guaranteed by the originator. Exclusively grown on the largest plantations in the South. The demand in boll-weevil territory for seed will increase this variety for all that can be grown.

PRICE—Pkt. 10c; lb. 20c; postpaid. By express or freight, 10 lbs. and over, 10c lb.; 50 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb. (\$2.25 bus.).

Your Mitchell's Early Prolific Cotton is very early. I shall make very near two bales per acre on ordinary land. I am perfectly satisfied with it.—W. H. CRUMPLER, Wayne Co., N. C.

Sloan's Prolific

Obtained direct from Mr. Sloan, who has been improving this cotton for eight years, taking the best stalks in the seed patch and planting them each successive year; and in this way he has produced one of the best and most prolific cottons grown in the South; a cotton that will produce, under favorable soil and weather conditions, from two to three bales per acre. It is an early-maturing variety, of large boll, gives a high average turnout of lint, and has proved one of the best and most profitable varieties grown in North Carolina.

From a personal visit to the farm where this cotton was grown, we are very much impressed with its superiority, both in quality and productiveness.

PRICE—Pkt. 10c; lb. 20c; postpaid. By express or freight, 10 lbs. and over, 10c lb.; 50 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb. (\$2.25 bus.).

Simpkins' Ideal Prolific Cotton

One of the best and most productive early cottons; grown ninety days from planting to boll. It has produced as much as three bales per acre, averaging 40 per cent. lint, and in tests made at the Arkansas Experiment Station it averaged first out of twenty-eight varieties tried.

This cotton also took first premiums at the North Carolina State Fair for several years.

The advantage of planting an early maturing cotton like the Simpkins is well understood by all cotton growers, particularly where danger of boll weevil exists.

Price: Pkt. 10 cts.; lb. 20 cts. postpaid. By express or freight 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb. (\$2.25 bus.).

The Simpkins' Ideal Cotton seed I got from you is the best cotton in Tennessee. It made 40½ per cent lint for me.—W. D. WOMBLE, Giles Co., Tenn., Jan. 2, 1917.

Sea Island

Sea Island Cotton is the finest long-staple cotton grown, and is the kind most universally grown all through the islands off the coast of South Carolina and Georgia, as it sells at much higher prices than other cottons.

While this cotton is grown to advantage in some other sections of the country than the Charleston District, it is necessary to procure seed fresh from the Sea Islands every season, if the high qualities of this cotton are to be maintained. Our seed is obtained from one of the best growers of this celebrated cotton.

Price: Pkt. 10 cts.; lb. 20 cts. postpaid. By express or freight 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 9 cts. per lb.; 100 lbs. and over, 8 cts. per lb. (\$2.25 bus.).

Early King

An early variety of cotton of Sugar Loaf type, introduced in North Carolina a number of years ago. It still continues very popular in some sections.

Price: Pkt. 10 cts.; lb. 20 cts. postpaid. By express or freight 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb. (\$2.25 bus.).

The cotton seed I bought of you beats any in my neighborhood. Its fine.—J. B. LEE, Currituck Co., N. C., July 11, 1916.

I want some kind of cotton to beat the boll weevil. I bought 5 bushels from you last spring, and it sure did pay me.—JAMES WALLACE, JR., Shelby Co., Ala., Jan. 2, 1917.

Cook's Improved

The Cook is one of the few early maturing types of the large boll cottons recommended by the U. S. Department of Agriculture for sections of the cotton belt infested or about to be infested by the boll weevil. This cotton grows a large and strong stalk, and fruits exceedingly well. It is not a cluster cotton, with heavy, thick foliage, but one that limbs out well, starting close to the ground.

It should be planted on average fertile lands in 5-foot rows, and the plants spaced 18 inches apart. Where the lands are very rich, 6-foot rows should be used for the best results.

It has a good upland short staple, and should give an averaged turn-out at the gin of 40 per cent. lint.

This variety is not only recommended for boll-weevil sections, but has been very generally grown in North and South Carolina for several years past, and is rapidly forging to the front as one of the leading varieties of cotton in the sections where it has been grown.

Price: Pkt. 10 cts.; lb. 20 cts. postpaid. By express or freight 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 9 cts. per lb.; 100 lbs. and over, 8 cts. per lb. (\$2.40 bus.).

I planted 2½ acres with the 2 bushels Cook's Improved Cotton seed. Some of my neighbors say it will make 5 bales, but I think I will get 3 bales off of it anyway.—J. C. WOOD, York Co., S. C., Sept. 28, 1917.

Sugar Loaf

This cotton is supplied to us by one of the best and most successful North Carolina growers. All grown on one farm, and stock that can be relied upon to give the best and most satisfactory results under favorable weather and planting conditions. Sugar Loaf is one of the earliest cottons to mature; very prolific, and makes a large yield of fine quality lint. It is disease-resistant, and very popular in sections where it is grown. It is a particularly desirable variety for boll-weevil territory, on account of its earliness and prolific yielding qualities.

Price: Pkt. 10 cts.; lb. 20 cts. postpaid. By express or freight 10 lbs. and over, 10 cts. per lb.; 50 lbs. and over, 8 cts. per lb.; 100 lbs. and over, 7½ cts. per lb. (\$2.25 bus.).

The Sugar Loaf Cotton did well. It is the earliest cotton in the world. I planted some of it the 10th day of June and it all opened.—S. A. MEDLIN, Union Co., N. C., Jan. 15, 1917.

Inoculating Cultures For Leguminous Crops

INCREASE YOUR CROPS — IMPROVE YOUR SOIL

The advantage of inoculation on Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches and other leguminous crops has been fully and distinctly proven, and it is particularly desirable and advantageous to use these inoculating cultures, especially on land that has not been grown in similar crops in preceding years.

The principal advantage of inoculation is increasing the nodules and root growth, which makes stronger growing plants and more productive crops.

STANDARD INOCULATING BACTERIA

Easy to Apply—Simply Moisten the Seed Before Sowing. Full Directions in Every Package.

The Standard Inoculating Bacteria which we offer is scientifically grown direct from the nodules, by bacteriologists who have made this their life work, and the laboratories are fitted up with the latest and best equipment, and scientific accuracy is maintained.

Special circulars about **STANDARD INOCULATING BACTERIA**, giving full information, mailed on request. The packages also contain full directions for use.

STANDARD INOCULATING BACTERIA are specially prepared for

ALFALFA
NAVY BEANS
RED CLOVER
SWEET PEAS

SOY BEANS
CANADA PEAS
ALSIKE CLOVER
GARDEN PEAS

COW PEAS
GARDEN BEANS
CRIMSON CLOVER
FIELD BEANS

SWEET CLOVER
VETCH
AND ALL OTHER
LEGUMES

Special Mixture for all Garden Beans and Peas.

Prices of **STANDARD INOCULATING BACTERIA**: Garden size, 35 cts.; 1-Acre size, 50 cts.; 2-Acre size, 95 cts.; 4-Acre size, \$1.50; 6-Acre size, \$2.00. By mail, 5 cts. extra. When ordering, state the crop to be inoculated, as there is a different bacteria for each legume.

Mulford Cultures

are scientifically prepared and tested by experts, in the biological laboratories of H. K. Mulford Co., Philadelphia, U. S. A., with the same degree of care as Mulford Antitoxins, Serums, Vaccines, etc., which are standard all over the world.

MULFORD CULTURES contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

MULFORD CULTURES are "different" and should not be confused with other brands.

The count is different (bacterial counts show fully twice as many bacteria as in the old form cultures).

The bottle is different, and larger in size, and being sealed prevents all possibility of contamination from the outside air.

PRICES: Mulford Cultures are supplied for the varieties of legumes listed at the following prices: Garden size ($\frac{1}{4}$ acre), 50 cts. 1-Acre size, \$1.50. 5-Acre size, \$5.00 ("a dollar per acre"). Trial Packages (for Garden Peas, Garden Beans, Lima Beans, and Sweet Peas only), 25 cts. In lots of 25 acres or more on one order, either of one kind or assorted, 90 cts. per acre.

Be sure to specify the particular legume on which you desire to use the **MULFORD CULTURES**, otherwise we will not know how to fill your order.

(These prices include delivery on freight shipments.)

Special illustrated circular, giving full and interesting information in regard to the **MULFORD CULTURES**, mailed on request. Don't hesitate to write for this if interested.

Cahoon Broadcast Seed Sower

FOR SOWING SEED, GRAIN, CLOVER SEED, ETC.

The best seeder manufactured, and sows all kinds of grain, clover seed, etc., rapidly and evenly. A person entirely unused to seeding can, by following the simple directions sent with machine, sow from four to six acres an hour at a common walking gait. It sows uniformly and saves four fifths in labor by its use. Every farmer should have one of these sowers. Circulars giving full information and directions for use, mailed on application. Price, \$3.00 each.

Cyclone Seed Sower

A VERY POPULAR SEEDER AND VERY EXTENSIVELY SOLD

This sower is guaranteed to distribute seed perfectly, evenly, and will not throw seed in an upward direction or against the operator, but direct and evenly to the land. Sows clover, timothy, red top or herds grass, alfalfa, oats, rye, wheat, millet, buckwheat, turnip and other varieties of farm seeds. It also distributes bone dust, land plaster and fertilizer to advantage. Clover seed is sown a width of 18 feet; timothy, 15 feet; alfalfa, 20 feet; wheat, 25 feet, millet, 18 feet; oats, 18 feet. Thus, it will be seen that one operator can sow from 40 to 60 acres per day, according to the kind of seed. Price, \$2.00 each.

Wood's High Grade Fertilizers

The high Prices of Farm Products make liberal use of Fertilizers desirable and profitable. :: ::

Fertilizers Relatively Cheaper Than Farm Products

Owing to shortage of fertilizing materials and heavy manufacturing costs, the prices of fertilizer have advanced during the past year; but prices have not advanced, generally speaking, in anything like the same proportion as the crops which they are used to grow. Pound for pound, and bushel for bushel, cotton, corn and other crops will buy more fertilizer now than ever before.

The scarcity of farm labor should make farmers pay more attention to intensive farming; if necessary, putting in smaller acreages and applying fertilizer more heavily, so as to increase yields on the acreage which is put in. This is a very important consideration to our farmers, in view of the great scarcity of labor.

Order Your Fertilizers and Seeds as Early as Practicable

In view of the present conditions of railroad transportation, it is very desirable for farmers to order fertilizers and all supplies as well in advance of their requirements as possible, so as to have them on hand when they are required for use.

The materials from which our fertilizers are made are of the best quality. The Ammonia and Nitrogen are derived from animal matter, such as Meat, Blood, Fish and High-Grade Sulphate and Nitrate. The Sulphuric Acid is obtained from high-grade Phosphate and Bone. The Potash is derived from sources calculated to produce the best results on the particular crops for which it is recommended. We can offer the following brands of fertilizer subject to change in price without notice at the following prices:

Vegetable Fertilizer

Analysis: Ammonia, 3 to 4 per cent; Phosphoric Acid, 8 to 10 per cent; Potash, soluble, 1 per cent. **Bag of 200 lbs., \$4.60; ton, \$45.00.**

This fertilizer is especially prepared and highly recommended for all vegetable crops. It gives most excellent results on peas, beans, cabbage, melons and tomatoes. Use 300 to 400 pounds per acre in hills or drills, or 600 to 800 pounds per acre broadcast, mixing a little with the soil. A good substitution for stable manure, or can be used in connection with it. This also makes an excellent tobacco fertilizer.

Standard Vegetable Fertilizer

Analysis: Ammonia, 3 to 4 per cent; Phosphoric Acid, 8 to 10 per cent; Potash, soluble, 3 to 4 per cent. **Bag of 200 lbs., \$5.85; per ton, \$57.50.**

This fertilizer is especially prepared and highly recommended for all vegetable crops. It gives most excellent results on peas, beans, cabbage, melons and tomatoes. Use 400 to 500 pounds per acre in hills or drills, or 700 to 800 pounds per acre broadcast, mixing a little with the soil. A good substitution for stable manure, or can be used in connection with it. This also makes an excellent tobacco fertilizer.

Potato Fertilizer

Analysis: Ammonia, 2 to 3 per cent; Phosphoric Acid, 9 to 10 per cent; Potash, 1 per cent. **Bag of 200 lbs., \$4.10; ton, \$40.00.**

This fertilizer is especially prepared for Irish and sweet potatoes, but will give splendid results on all root crops. On Irish potatoes it will make large, smooth tubers of good keeping qualities. Use 800 to 1,000 pounds broadcast, or 300 lbs. in drills. If used with stable manure, use 400 pounds of fertilizer in the row. For sweet potatoes, 200 to 400 pounds per acre will give good results for producing a large yield of smooth, good-keeping roots. On onions, beets, salsify, parsnips, carrots and celery, use 400 to 600 pounds per acre in drills, mixing a little with soil.

Standard Potato Fertilizer

Analysis: Ammonia, 3 to 4 per cent; Phosphoric Acid, 8 to 10 per cent; Potash, 4 per cent or over. **Per bag of 200 lbs. \$6.30; per ton \$62.50.**

Wood's Standard Potato Fertilizer is especially prepared and recommended for use on Irish and Sweet Potatoes, but owing to the large amount of Potash it contains will give excellent results on almost any kind of root crop. Our truckers generally use 1,000 to 1,200 pounds broadcast or 300 to 500 pounds in drills. This brand is recommended for truckers and market gardeners who are desirous of obtaining high fertilizer containing a very large percentage of Potash.

Market Grower Fertilizer

Analysis: Ammonia, 4 to 5 per cent; Phosphoric Acid, 8 to 10 per cent; Potash, 1 per cent. **Bag of 200 lbs., \$5.30; ton, \$52.00.**

A great many of the large Hanover and Henrico truck growers require a special fertilizer to force their early truck for market, and, therefore, we have had this grade of goods prepared especially for this purpose. We recommend this fertilizer as giving the best results on cabbage, tomatoes, melons and all kinds of vegetables which are grown for market.

High Grade Truckee

Analysis: Ammonia, 6 to 7 per cent; Phosphoric Acid, 8 to 10 per cent; Potash, 1 per cent. **Per bag of 200 lbs., \$6.50; per ton \$64.00.**

This fertilizer gives the very best results on all vegetable crops, and is especially valuable where quick results are wanted. It also gives most excellent results on general farm crops. A great many good farmers and truckers think it cheaper to buy fertilizers of high grade analysis, even though they use less to the acre, than to buy fertilizers of low analysis and use larger quantities to the acre, as the saving in freight and handling is quite an item.

Corn Fertilizer

Analysis: Ammonia, 1.21 per cent; Phosphoric Acid, 10 to 11 per cent; Potash, 1 per cent. **Bag of 200 lbs., \$3.60; ton, \$35.00.**

This is especially prepared for the corn crop, containing the necessary ingredients to insure successful crops. It will largely increase the yield of both grain and fodder, besides proving of permanent benefit to the land. Use 200 to 400 pounds per acre in drills.

General Crop Fertilizer

Guaranteed Analysis.—Ammonia, 1½ per cent.; available Phosphoric Acid, 12 per cent.

Bag of 200 lbs., \$3.50; per ton, \$34.00.

A Soluble Phosphate, with Ammonia.—This fertilizer furnishes not only abundant quantities of Phosphoric Acid, but also Ammonia, and can be used with or without farm manure, in the drill or broadcast, on all fall grain crops.

Use 600 to 800 pounds per acre, broadcast.

Grain and Grass Fertilizer

Analysis: Ammonia, 2 to 3 per cent; Phosphoric Acid, 9 to 10 per cent; Potash, 1 per cent. **Bag of 200 lbs., \$4.10; ton, \$40.00.**

This brand is specially prepared for all grain and grass crops. It is quick-acting and at the same time lasting in its results, largely increasing the grain crop, and at the same time acting as a permanent improver, thus also benefitting the grass or clover crop materially, or leaving the land in better condition for any other crop that may follow the grain crop. Use 300 to 400 pounds per acre when drilled with the grain. When broadcasted, use at the rate of 400 to 500 pounds per acre, and it is better to apply it before seeding the grain and to harrow all in together.

High Grade Acid Phosphate

Analysis: Available Phosphoric Acid, 16 per cent. **Bag of 200 lbs., \$2.35; ton, \$22.50.**

Our experience has led us to believe that nearly all southern soils are lacking in available phosphoric acid and lime, and for this reason acid phosphate is a most valuable fertilizer. It gives excellent results on nearly all crops, but is especially recommended for use on grain and grass. Apply at the rate of 400 to 600 pounds per acre, either in drills or broadcast. If broadcasted, it should be harrowed in at the time of applying, so as to incorporate it well with the soil. When used on grass, clover and grain crops, it is best to apply it 2 or 3 weeks before seeding.

Listers' Standard Bone Superphosphate

Listers' Standard is made purely from an Animal Bone basis, and it cannot, of course, be sold quite as low as fertilizers in which the phosphoric acid is derived from acid phosphate, and while fertilizers deriving their phosphoric acid from the latter source, give, as a rule, excellent results; still it is the opinion of many practical farmers that the animal bone basis fertilizers are more reliable and lasting in their effect, and that they give much surer and better results in dry seasons.

Analysis: Ammonia, 3 per cent.; phosphoric acid, 9 per cent.; soluble potash, 1 per cent. Bag 200 lbs. \$4.90; ton, \$48.00.

Listers' Standard is a complete manure, containing all the elements of plant-food, and can be used on any crop as a substitute for stable manure, or, used with it, will give much better results than the use of manure alone. It gives the most satisfactory results on all farm and vegetable crops, being especially recommended for both late and early cabbage, potatoes and corn. It is also excellently adapted for use on grain crops, especially those to be followed by grass. Our customers who have used it for years pronounce it to be one of the most reliable fertilizers for all seasons that they have ever used.

reliable fertilizers for all seasons that they have ever used.

Wood's Pure Animal Bone

A First-Class Article of Finely-Ground Bone, Specially Recommended for Use on Grain, Grass and Clover Crops.

Analysis.—Ammonia, $4\frac{1}{2}$ per cent.; Bone Phosphate of Lime, 50 per cent.; equivalent to phosphoric acid, 23 per cent. Bag of 200 lbs., \$5.30; ton, \$52.00. Special prices on large lots.

Pure Animal Bone is one of the best and most satisfactory fertilizers that the farmer can use. It can always be relied upon to give excellent results upon the growing crops, at the same time being as a permanent improver, showing its results for several years afterwards wherever it is applied. It is the best of dry-weather fertilizers, as, if it is prevented by drought from acting, its strength still remains in the soil, and is thus available when seasonable weather comes on, or for later crops.

It is ordinarily used at the rate of 300 to 500 pounds to the acre, although heavier applications are frequently made. It should be covered or incorporated with the soil at the same time as applied, in order to prevent the escape of ammonia.

Standard Bone Meal

ANALYSIS.—Ammonia, 3 per cent.; Bone Phosphate of Lime, 50 per cent.; equivalent to Phosphoric Acid, 22 per cent.

Bag of 200 lbs. \$4.60; ton, \$45.00.

A first-class fertilizer for general use, giving not only immediate effects, but also lasting and beneficial results. It is steamed bone, not quite as high in analysis as our Pure Animal Bone, but is an excellent fertilizer, and has given the very best results and satisfaction to our customers wherever used. While it can be used to advantage upon all crops, it is especially recommended for grain, grass and clover crops. Bag 200 lbs., \$5.00; ton, \$48.00.

Nitrate of Soda

The most available form in which nitrogen can possibly be applied. Specially recommended for spring use for strawberries and vegetable crops, also grass and grain crops. It is best applied in the spring just at the beginning of the active growing season.

Price, per lb. 15 cts.; 25 lbs. or more, 10 cts. per lb.; 100-lb. bag, \$5.50; per 200-lb. bag, \$10.50; 5-bag lots and over, \$10.00 per bag.

LAND PLASTER

The principal use of land plaster is as a top-dressing for grass and clover crops in the spring, and for this purpose its use is decidedly beneficial, considerable increases in crops being reported from its use. It should be broadcasted during February or March, at the rate of 300 to 400 pounds per acre. Land plaster is also very useful to conserve the fertilizing qualities of stable manure, as it fixes and holds the ammonia, rendering it more available for use by the growing crops. It can be used to advantage in stables, cattle stalls, chicken houses, on manure piles, etc., to prevent the escape of ammonia and at the same time stop odors. It adds very much to the clean appearance of stables where used and will increase the value of natural manures of the farm to a considerable extent. Land plaster is also used quite largely as an insecticide, particularly in connection with Paris green on potatoes. **Price:** Per bag of 200 lbs., \$1.35; per ton, \$12.00.

MAPES' MANURES

THE MAPES' COMPANY is one of the oldest and most reliable fertilizer concerns in the country, and puts up a fertilizer which is entirely different from the fertilizers usually manufactured in that the **MAPES' COMPANY does not use Acid Phosphate** as a basis for its fertilizers, but makes them purely from animal bone and other high-grade materials. The **MAPES' MANURES**, too, are the result of years of experience and careful experiments by thoroughly competent men, with the different crops for which they are recommended. Our most successful customers have used these high-grade manures in the largest quantities, year after year, and recommended them in the strongest terms for high quality, profitable crops and permanent improvement of the soil.

Mapes' Potato Manure (War Brand)

Analysis: Ammonia $4\frac{1}{2}$ to 5 per cent; phosphoric acid 8 to 10 per cent (available 8 per cent); soluble potash, actual 1 per cent.

Price: Per bag of 200 lbs., \$5.90; per ton, \$58.00.

Produces better and smoother potatoes and makes a much larger yield. It is specially prepared and recommended for both Irish and Sweet Potatoes, and also gives excellent results on Asparagus, early vegetables, Tomatoes, Sugar Beet, Sorghum, Sugar Cane, Sweet Corn, and is also well adapted and gives the most satisfactory results on Strawberry and all small fruits. Use about 400 lbs. per acre in drill for Irish Potatoes, or about 800 lbs. per acre broadcast; for Sweet Potatoes 200 to 400 lbs. per acre in drill.

Mapes' General Special (War Brand)

Analysis: Ammonia 7 per cent; phosphoric acid 8 to 10 per cent (available 6 to 8 per cent.); soluble potash, actual 1 per cent. **Price:** Per bag of 200 lbs., \$7.50; per ton, \$74.00.

This is a complete manure for all crops, especially prepared for use on average good or heavy soils. On this class of soils it is specially recommended for use on general farm crops, such as Corn, Millet, Oats, Wheat, Rye and for all grain crops and seeding to grass with or without grain. The drilling quality of this manure, and its effect on Wheat, Rye and succeeding grass crops, have achieved for it, after many years' use, a very high reputation.

Fertilizers for Garden Crops

Put up in 100-lb. bags.

To meet the demands for fertilizers in small quantities for garden and farm use we offer **MAPES' POTATO MANURE (War Brand)**, **MAPES' GENERAL CROP (War Brand)**, in one hundred pound bags. We quote prices on these as follows:

MAPES' POTATO MANURE (War Brand), per bag of 100 pounds \$3.25.

MAPES' GENERAL SPECIAL (War Brand). Bag of 100 pounds, \$4.00.

Thomas Phosphate, or Basic Slag

The grade we offer analyzes from 17 to 19 per cent. phosphoric acid, and 35 to 38 per cent. phosphate of lime. It is particularly adapted to the soils throughout this section, and gives specially good results on poorer soils or soils that are deficient in lime and phosphoric content. We recommend its use to our customers, feeling sure that they will be well satisfied with the results. **Per bag of 100 lbs., \$1.50; per ton, \$26.00.**

Wood's Lawn Enricher

A splendid fertilizer to keep lawns vigorous and in a green, growing condition all through the year. An application of Lawn Enricher in the spring and fall will help the grass wonderfully. It can be applied as a top dressing to lawn at any time except during droughts. For making new lawns it should be applied at the rate of 25 lbs. for 1,200 square feet, or at the rate of 800 lbs. per acre. As a top dressing for old lawns, use from 400 to 500 lbs. per acre, or for small yards, 6 lbs. to each 300 square feet.

Price: 5-lb. bag, 40 cts.; 10-lb. bag, 60 cts.; 25-lb. bag, 90 cts.; 100-lb. bag, \$3.00; ton, \$50.00. Half ton, at ton rate.

Darling's Sheep Manure

Pulverized Sheep Manure is a very desirable fertilizer for use as a top-dressing on lawns, and also when preparing and making the lawn. It also gives excellent results in small gardens for use in growing vegetables, flowers, shrubs, and vines.

Directions for Applying: To renovate an old lawn scatter Pulverized Sheep Manure over the surface of the lawn, applying either in the spring or fall. For making new lawns prepare the ground thoroughly and scatter Sheep Manure over the entire surface to be fertilized. Work the manure thoroughly into the soil by raking, and then sow the lawn grass seed and rake in lightly. **Price:** 10-lb. carton, 60 cts.; 15-lb. bag, 85 cts.; 50-lb. bag, \$1.35; 100-lb. bag, \$2.25; per ton, \$35.00; 1,000-lb. lots at the ton rate.

Poultry Supply Dept.

PRICES FLUCTUATE. Price of Poultry Foods are always subject to market fluctuations. Prices named below are our prices at this date. We always fill all orders entrusted to us at the lowest ruling prices on date the order is received. If prices decline, we give our customers the benefit of it. If they advance, we charge the advanced prices.

Wood's Poultry Grain Food This mixture contains everything which is needed for the grown fowls—wheat, barley, oats, cracked corn, kafir corn, ground bone and oyster shell, making a complete food, specially recommended for poultry and laying hens at all seasons. Price, 50 lbs. \$2.00; 100 lbs. \$3.90.

Hollybrook Chick Food A complete scientifically compounded food for young chicks. Prepared so as to fully nourish and sustain the young chicks from the time of hatching until they are fully developed. Price, 50-lb. bag \$2.25; 100-lb. bag \$4.25.

Hollybrook Chick Mash —An Ideal Mash Food for Little Chicks. Price, 50 lbs. \$2.00; 100-lb. bag \$3.50; 500-lb. lots, \$3.45 per 100 lbs.

Hollybrook Forcing Food—This food is especially prepared for forcing growth, so as to produce early broilers and roasters. Price, 50-lb. bag, \$2.00; 100 lbs. \$3.60.

Hollybrook Growing Food —A dry mash food which promotes rapid growth of bone and muscle. Price, 50-lb. bag, \$2.00; 100-lb. bag, \$3.60.

Hollybrook Developing Food This is a special food intended for properly maturing the young chicks after they are ready to be weaned from chick food. Price, 50-lb. bag, \$2.20; 100-lb. bag, \$4.10.

Hollybrook Duck Mash —This ranks in excellence with our other "Hollybrook" poultry foods, and is mixed in the right proportions to give the best results for general feeding. 50-lb. bag, \$1.95; 100-lb. bag, \$3.60; 500-lb. lots, \$3.55 per 100 lbs.

Hollybrook Laying Food is a good balanced ration from which to make the morning mash containing all the elements necessary for egg production, and will give most satisfactory results. Price, 50-lb. bag, \$1.85; 100-lb. bag, \$3.50.

Hollybrook Pigeon Mixture Containing Cracked Corn.—An ideal mixture of Canada Field Peas, hemp and other grains especially prepared for pigeons. 50-lb. bag \$2.40; 100-lb. bag \$4.50.

Hollybrook Pigeon Mixture

Containing No Cracked Corn. 4 50-lb. bag \$2.50; 100-lb. bag, \$4.60.

Hollybrook Scratching Food

This mixture contains a large assortment of cracked and small grains to be used as an exercise food, scattered in the pens to make the hens work for what they get. Price, 50-lb. bag, \$2.15; 100-lb. bag, \$4.05.

Wood's Scratch Food

An excellent mixture of various grains properly balanced and contains no grit or oyster shells. Price, 50-lb. bag, \$2.05; 100-lb. bag, \$3.85.

Green Cut or Mealed Alfalfa is one of the best green foods for winter use. For winter egg-production, it is absolutely necessary that green food should be fed. Price, 50-lb. bag, \$1.40; 100-lb. bag, \$2.60.

Schumacher Poultry Oatmeal, or Pin Head Oats

—This steel-cut oat is of a very high nutritive value. It is easily digested and very valuable as a bone and muscle maker for young chicks. The oat is first hulled and then cut to a desirable size for feeding. Price, 10-lb. bag, \$1.00; 25-lb. bag, \$2.00; 50-lb. bag, \$3.75; 100-lb. bag, \$7.00.

Poultry Mustard Improved digestion means greater nourishment from a given quantity of food; this means more eggs. This is not ordinary table mustard, but is prepared for poultry alone. Feed a teaspoonful for every six fowls; mix with dry meal, then add water. Price, by express, 1½-lb. pkg. 40 cts.; 3-lb. pkg. 70 cts.; 5-lb. pkg. \$1.10; 10-lb. pkg. \$2.00; 25-lb. pail, \$4.50.

Hollybrook Meat Scraps A standard meat food for poultry. It is absolutely necessary to supply them with plenty of animal food in winter to take the place of bugs and other insects which they get during the summer months, and to meet this demand we are in position to supply **Hollybrook Meat Scraps**, which contain from 45 per cent. to 55 per cent. protein, the most expensive and most valuable element in poultry foods. We guarantee every bag to be pure, sweet and free from taint, and the goods to be finely ground. Feed from a dry food hopper. Let the fowls help themselves, they will not eat too much. Meat Scraps can also be fed in a wet mash, using a very little at first and gradually increasing until you are feeding about 10 per cent. of the mixture. For fattening feed more freely. Price, 10 lbs. 75 cts.; 50 lbs. \$2.75; 100-lb. bag, \$5.25.

Darling's Meat Scraps —A high protein meat food for poultry. —We have been selling Darling's Meat Scraps for a great many years, and they give universal satisfaction; every bag guaranteed. Feeding instructions same as for Hollybrook Meat Scraps. Price, 10 lbs. 75 cts.; 50 lbs. \$2.75; 100-lb. bag \$5.25.

Darling's Meat Crisps A clean, wholesome, meat concentrate for poultry. Guaranteed to contain 75 per cent. Protein and will keep perfectly under any condition where ground grain will remain sweet. Darling's Meat Crisps is uniformly ground in three sizes—fine, medium and coarse. Price postpaid, 3-lb. pkg. 47 cts.; 6½-lb. pkg. 88 cts. Price, by express, 3-lb. pkg. 35 cts.; 6½-lb. pkg. 70 cts.

Blood Meal —If you want eggs in the winter and early spring, when they sell at the highest prices, you must feed animal food. For this purpose Blood Meal is unexcelled as an egg producer; will make your hens lay, your chicks grow fast and keep your fowls healthy. Should be mixed with cornmeal, bran or wet food. 10-lb. bag, \$1.10; 25-lb. bag, \$2.00; 100-lb. bag, \$7.50.

Poultry Bone —Made from fresh green bone from which the moisture and grease have been extracted, leaving nothing but phosphate of lime and protein. Should be mixed with cornmeal or bran and fed every other day; on alternate days use meat scraps or blood meal. State whether fine, medium or coarse bone is wanted. We keep all sizes. 10-lb. bag, \$1.10; 50-lb. bag, \$2.60; 100-lb. bag, \$5.00.

WHEAT.—Per bushel of 60 lbs., \$2.25.

WHEAT BRAN.—100-lb. bag, \$2.50.

SHIP STUFF.—100-lb. bag, \$2.75.

KAFFIR CORN.—50-lb. bag, \$2.50; 100-lb. bag, \$4.75.

FLAX SEED.—Per lb. 10 cts.; 50-lb. bag, \$4.50; 100 lbs. \$8.50.

SUNFLOWER.—Lb. 12 cts.; 10 lbs. for 90 cts.; 100 lbs. \$8.00.

IMPORTED MILLET.—Lb. 7 cts.; 10 lbs. 60 cts.; 100 lbs. \$5.00.

HEMP.—Lb. 10 cts.; 10 lbs. for 90 cts.

BUCKWHEAT.—Bus. (48 lbs.), \$2.75.

MILO MAIZE.—50-lb. bag, \$2.50; 100-lb. bag, \$4.75.

Crushed Oyster Shells —Splendid for poultry to help the formation of egg-shells and keeps fowls healthy. Use it freely. Feed alone.

POULTRY SIZE, 15 lbs. 25 cts.; 50 lbs. 50 cts.; 100 lbs. 90 cts.

CHICK SIZE, 15 lbs. 25 cts.; 50 lbs. 60 cts.; 100 lbs. \$1.00.

Mica Spar Crystal Grit —This Grit is prepared especially for poultry, and is one of the sharpest and hardest grits known. Put up in three sizes: fine, medium and coarse. Price, 5 lbs. 15 cts.; 25 lbs. 35 cts.; 50 lbs. 50 cts.; 100 lbs. 85 cts. Special price in 500-lb. lots.

Charcoal —No poultry raiser can afford to be without charcoal. It aids digestion, purifies the blood and promotes the health of the chickens to a wonderful extent. It is prepared in three grades: Grade A (fine granulated) for use in mash mixture; Grade B (medium granulated) for small newly hatched to half-grown chicks; Grade C (coarse granulated) for fowls. Put up in 2-lb. paper cartons and 50-lb. paper lined bags. Price, postpaid, 2-lb. cartons, 25 cts. Price, by express, 2-lb. cartons 15 cts.; 50-lb. paper-lined sacks \$1.75.

Sterling Poultry Remedies

This is a meat food and a tonic conditioner that makes hens lay. It is compounded according to a scientific formula and contains animal protein and nitrogenous extracts in a highly concentrated form. This condimental food takes the place of insect life, when bugs, worms, etc., which are natural animal food, cannot be obtained. It will shorten the moulting period, bring on an early egg production and keep up the fowl's strength. At first feed every day at the rate of two table spoons to a quart of meal or wet food, afterward two or three times a week and when the hens commence laying freely it can be discontinued. **PRICE, 2½-lb. pkg. 35 cts. POSTPAID. BY EXPRESS, 2½-lb. pkg. 25 cts.**

Sterling Roup Remedy Roup is a deadly disease, but, if taken in its early stages with the use of our **Sterling Roup Remedy**, you will prevent much loss among your poultry. When first you detect any signs of frothiness or bubbles in the corner of the eyes, or sneezing, snuffles, or a water discharge from the eyes and nostrils, you should not lose time in separating these fowls from the rest of the flock. **PRICE POSTPAID, small size, 31 cts.; large size, 56 cts. PRICE BY EXPRESS, small size, 25 cts.; large size, 50 cts.**

Sterling Cholera Remedy Sterling Cholera Remedy is one of the best possible remedies for cholera in all its forms and stages. Cholera is the most deadly disease affecting poultry, therefore every poultryman should take every precaution to keep his fowls free from this disease. This is put up in powder form, so it can be given to the fowls very easily by putting it in their drinking water. **PRICE POSTPAID, 56 cts.; PRICE BY EXPRESS, 50 cts.**

Sterling Microzone —A wonderful remedy for the prevention and cure of roup, cholera, bowel complaint, sore head, etc. In all cases where the fowls are sick or not doing well, a little Microzone should be given every day in the drinking water of all the fowls, as it not only cures the sick, but prevents contagion. Put up in liquid and tablet form at 50 cts. per package, or 12-ounce bottle. The tablet form may be sent by mail, shipping weight 2 ounces. The liquid must go by express.

Sterling Lice Powder This preparation is carefully compounded and contains no carbolic acid or other chemicals which will injure the fertility of the eggs. It is easy to apply, sure in effect, and can be used in the nest of setting hens without injuring the young chicks or eggs. Vermin will weaken the fowl and make them susceptible to all diseases, which reduces the egg production, also the vitality. For lice on cattle and fleas on dogs, **Sterling Lice Powder** is a most effective remedy. **PRICE POSTPAID, 5-oz. box 16 cts.; 15-oz. box 33 cts.; 48-oz. box 62 cts.; 100-oz. box \$1.20. PRICE BY EXPRESS, 5-oz. box 10 cts.; 15-oz. box 25 cts.; 48-oz. box 50 cts.; 100-oz. box \$1.00.**

Sterling Liquid Lice Killer Sterling Lice Paint is a scientifically compounded preparation for killing lice, mites and their parasites on fowls, but which also does excellent execution on lice and ticks on sheep, hogs, horses and cattle. For poultry it is simply used by sprinkling or spraying on the roosts, which form a vapor or gas of the same weight as the air, which hovers about the bodies of the fowls while they sleep, penetrating the feathers and killing all the insects there. Directions for use on every can. **PRICE: 1-qt. can 40 cts. each; 2-qt. can 70 cts. each; 1-gal. can \$1.10 BY EXPRESS.**

Sterling Disinfectant Is unexcelled for disinfecting poultry houses and runs, stables, dog kennels, toilet or any place where a good germ or odor destroyer is needed. One gallon will make 100 gallons of disinfectant. **1-qt. can 50 cts.; ½ gal., 85 cts.; 1 gal. \$1.50, BY EXPRESS.**

Sterlingworth Diarrhoea Remedy A guaranteed remedy for white diarrhoea in young chicks and for dysentery, diarrhoea and all bowel troubles in full-grown fowls. It is the old original White Diarrhoea Powder. It is used in the drink of the fowls and chicks. They take their own medicine. We know of nothing to equal it. Keep the remedy on hand and use some in the "little fellows" drink when they are two days old. **PRICE, trial size 25 cts. POSTPAID; box sufficient for several flocks, 50 cts. POSTPAID.**

Sterlingworth Water Glass This preparation is put up especially for preserving eggs. Eggs put down in this solution will keep fresh for ten months. One gallon makes sufficient solution for 50 dozen eggs. **Price: 1-qt. can 40 cts. each; 1-gal. can \$1.00 each.**

Conkey's Poultry Remedies

Conkey's Poultry Tonic —A high quality tonic, egg maker, and regulator, good for young and old birds all the year. Contains no filler—and no cayenne pepper or other harmful ingredient. Helps nature do its work in a natural, normal way. Does not over stimulate. **PRICE, POSTPAID, 1½-lb. pkg. 38 cts.; 3½-lb. pkg. 72 cts.; 12-lb. pail \$1.70. PRICE, BY EXPRESS, 1½-lb. pkg. 30 cts.; 3½-lb. pkg. 60 cts.; 12-lb. pail \$1.40; 25-lb. pail \$2.75.**

Conkey's Roup Remedy —Known to every poultryman. A wonderful remedy that quickly reduces the swelling and brings the bird back to normal. Given in the drinking water. **PRICE, POSTPAID, small size, 36 cts.; medium size, 66 cts.; large size, \$1.23. PRICE, BY EXPRESS, small size, 30 cts.; medium size, 60 cts.; large size, \$1.20.**

Conkey's Bronchitis Remedy —A penetrating healing oil that allays the inflammation in the bronchial tubes. Stops the rattling and effort to breathe. **PRICE, POSTPAID, 66 cts.; PRICE, BY EXPRESS, 60 cts.**

Conkey's Cholera Remedy —For indigestion and so-called cholera in growing and grown birds. Given in drinking water quickly overcomes the diseased, feverish condition. **PRICE, POSTPAID, small size 36 cts.; large size, 66 cts. PRICE, BY EXPRESS, small size 30 cts.; large size 60 cts.**

Conkey's Chicken Pox (Sorehead) Remedy

Package contains salve for application on sores and a blood purifying tonic. Easily applied. **PRICE POSTPAID, small size 36 cts.; large size 66 cts. PRICE BY EXPRESS, small size 30 cts.; large size 60 cts.**

Conkey's Gape Remedy —Consists of a sneezing powder for sprinkling over the chicks and a tonic for strengthening the entire system. **PRICE POSTPAID, small size 36 cts.; large size 66 cts. PRICE BY EXPRESS, small size 30 cts.; large size, 60 cts.**

Conkey's Poultry Worm Remedy —Should be given at fixed intervals at least four times a year to the entire flock. Given in the food. A treatment that is very important. **PRICE POSTPAID, small size 36 cts.; large size 66 cts. PRICE, BY EXPRESS, small size 30 cts.; large size 60 cts.**

Conkey's White Diarrhoea Remedy —To be given to young chicks from the first drink until they are three weeks old. Aids wonderfully in preventing the development of this dread disease. **PRICE, POSTPAID, small size 36 cts.; large size 66 cts. PRICE BY EXPRESS, small size 30 cts.; large size 60 cts.**

Conkey's Limberneck Remedy —Made especially for the treatment of the poisoning which causes this trouble. A powerful remedy capable of producing a quick response to the treatment if case is taken in time. **PRICE POSTPAID, 66 cts.; BY EXPRESS, 60 cts.**

Conkey's Scaly Leg Remedy —A penetrating salve that rapidly destroys the mites causing the scaly growth. Also desirable for brightening up the legs of show birds. **PRICE POSTPAID, 36 cts.; PRICE BY EXPRESS, 30 cts.**

Conkey's Head Lice Ointment —For destroying the murderous head louse. Comes in tube form. **PRICE POSTPAID, 15 cts. and 30 cts.**

Conkey's Lice Powder —A particularly efficient preparation for the treatment of the body louse. **PRICE POSTPAID, 5-oz. pkg. 21 cts.; 15-oz. pkg. 36 cts.; 48-oz. pkg. 72 cts.; 100-oz. pkg. \$1.60. PRICE BY EXPRESS, 5-oz. pkg. 15 cts.; 15-oz. pkg. 30 cts.; 48-oz. pkg. 60 cts.; 100-oz. pkg. \$1.20.**

Conkey's Lice Liquid —A powerful liquid for use in spraying the poultry house. Kills the house of mites if used consistently. **1 qt. 50 cts.; ½ gal. 75 cts.; 1 gal. \$1.25; 5 gals. \$5.50. EXPRESS EXTRA.**

Conkey's Nox-i-cide —An all-round disinfectant, germicide and insecticide. Emulsifies in water and is so powerful that a small quantity accomplishes remarkable results. Desirable for use in the house, poultry house, or stable. **1 pt. 40 cts.; 1 qt. 70 cts.; ½ gal. \$1.00; 1 gal. \$1.75; 5 gals. \$7.50. EXPRESS EXTRA.**

Conkey's Buttermilk Starting Food is a well balanced, carefully made food, that will bring results. It supplies buttermilk to the chicks in dry form with only the water eliminated. The rich, pure buttermilk is mixed with a combination of clean, wholesome grains balanced just right for the sensitive organs of the little chick. The lactic acid acts as a preventative measure against disease; the buttermilk and grains make the chick grow wonderfully fast, solid and sturdy. **PRICE, POSTPAID 1-lb. pkg. 18 cts.; 3-lb. pkg. 37 cts.; 6½-lb. pkg. 68 cts. PRICE, BY EXPRESS, 1-lb. pkg. 10 cts.; 3-lb. pkg. 25 cts.; 6½-lb. pkg. 50 cts.**

Rust's Haven's Poultry Remedies

Rust's Egg Producer —One of the best and most satisfactory preparations we have ever sold for feeding to poultry to increase egg production. Our customers who have used it speak in the highest praise of it, saying that it not only largely increases the quantity of eggs, but improves the appearance and condition of the poultry. Feed every day, at first, at the rate of one tablespoon to a quart of meal or wet food; afterwards two or three times a week, and when the hens commence laying freely it can be discontinued. **PRICE POSTPAID**, 1 lb. pkg. 33 cts.; 2½-lb. pkg. 60 cts.; 6-lb. pkg. \$1.13; 10-lb. pkg. \$1.75. **PRICE BY EXPRESS**, 1-lb. pkg. 25 cts.; 2½-lb. pkg. 50 cts.; 6-lb. pkg. \$1.00; 10-lb. pkg. \$1.50; 25-lb. pkg. \$3.50.

Rust Haven's Climax Condition Powder —A first-class preparation for poultry and cattle. A splendid preventive and cure for cholera and other poultry diseases; it tones up the system and greatly improves the plumage after the trying moulting season. It is also a good medicine for hogs, cattle and horses, and gives splendid satisfaction to our customers who use it. **PRICE POSTPAID**, 13-oz. pkg. 33 cts.; 32-oz. pkg. 60 cts.; 5-lb. pkg. \$1.18; 8-lb. pkg. \$1.74. **PRICE BY EXPRESS**, 13-oz. pkg. 25 cts.; 32-oz. pkg. 50 cts.; 5-lb. pkg. \$1.00; 8-lb. pkg. \$1.50; 20-lb. pkg. \$3.50.

CARBOLA The Disinfectant that Paints. Carbola is infinitely superior to lime, which loses what slight disinfecting qualities it ever had by slacking when exposed to the air. Very much better than kalsomine or whitewash because it paints just as clean and bright a white, but will not chip, scale or peel off—no matter how many coats are applied. It may be used on either stone, brick, wood, metal or cement, and can be put on over a whitewashed or painted surface. Can be applied with either sprayer or brush. **Price**, trial pkg., postpaid 35 cts., by express 25 cts.; 10-lb. pkg. by express \$1.00; 20-lb. pkg. by express \$2.00; 50-lb. pkg. \$4.00.

MACNAIR'S CHICKEN POWDER —Feed your chicks on Macnair's Chicken Powder, and if these barn yard pests eat a chick which has been fed on it they will surely die. On account of the peculiar construction of the stomachs of these animals, what is life to chicks and turkeys is death to hawks. This powder is a medicine that gives wonderful results in safeguarding against and curing Cholera, Gape, Roup, Limber Neck, Indigestion and Diarrhoea. **PRICE**, sample package, postpaid, 31 cts. Larger package (not mailable) 25 cts. **BY EXPRESS**.

HACKETT'S GAPE CURE —An excellent remedy for this deadly disease. It is not given internally, but simply dusted over the chicks and they inhale the dust, which kills the worms and germ. **PRICE POSTPAID**, 31 cts. each. **PRICE BY EXPRESS**, 25 cts. each.

Rust's Soluble Roup Powder —An excellent remedy for fowls and pigeons. **PRICE POSTPAID**, 4-oz. box 31 cts.; 9-oz. box 56 cts.; 20-oz. box \$1.08. **PRICE BY EXPRESS**, 4-oz. box 25 cts.; 9-oz. box 50 cts.; 20-oz. box \$1.00.

Rust's Havens Roup Pills —These pills act directly upon the glands and mucous membrane, allay all tendency to fever and carry off all morbid matter from the system. **PRICE, POSTPAID**, 50 pills in a box 31 cts.; box of 112 pills 56 cts.; box of 250 pills \$1.06. **PRICE BY EXPRESS**, box of 50 pills 25 cts.; box of 112 pills 50 cts.; box of 250 pills \$1.00.

Rust's Lice Killing Powder —Contains no naphthalene or other odorous ingredients, it does not affect the flavor of eggs or injure them for hatching when fowls or nests are dusted with it. Directions on each box. **PRICE POSTPAID**, 5-oz. box 16 cts.; 16-oz. box 33 cts.; 48-oz. box 62 cts. **PRICE BY EXPRESS**, 5-oz. box 10 cts.; 16-oz. box 25 cts.; 48-oz. box 50 cts.

Rust's Liquid Lice Killer is an instantaneous disinfectant. It prevents and destroys germs, vermin and bad odors. 1-qt. cans 35 cts.; 2-qt. cans 60 cts.; 4-qt. cans \$1.00 **BY EXPRESS**.

Cyphers' Roup Cure —**PRICE POSTPAID**, small size, 31 cts.; medium size 56 cts.; large size \$1.06. **PRICE BY EXPRESS**, small size 25 cts.; medium size 50 cts.; large size \$1.00.

Cyphers' Lice Powder —An excellent preparation for killing lice on fowls. **PRICE POSTPAID**, 5-oz. box 16 cts.; 15-oz. box 31 cts.; 48-oz. box 62 cts.; 100-oz. box \$1.20. **PRICE BY EXPRESS**, 5-oz. box 10 cts.; 15-oz. box 25 cts.; 48-oz. box 50 cts.; 100-oz. box \$1.00.

Cyphers' Lice Paint —For painting roosts. 1-qt. can 25 cts.; 2-qt. can 60 cts.; 1-gal. can \$1.00 **BY EXPRESS**.

Napcreol —For disinfecting poultry houses, etc. 1-qt. cans, 50 cts.; ½-gal. 85 cts.; 1 gal. \$1.50 **BY EXPRESS**.

Remedy No. 6.—For Indigestion and Liver Diseases.

Remedy No. 7.—For Ulcers and Diseases of the Skin.

Remedy No. 8.—For Rheumatism and Cramps.

Remedy No. 9.—For Worms.

Remedy No. 10.—For Diseases of Egg Organs.

PRICE POSTPAID, 27 cts. each; **BY EXPRESS** 25 cts. each.

Egg Boxes and Carriers

Eyrie Egg Boxes —Specially made for shipping or delivering eggs for setting by express. They are made of corrugated paper, which is the best packing material known. It provides a cushion, which, while elastic, will not crush. The insertion of the handle automatically locks the box. The handle also prevents the putting of anything on top of the box, and provides a means of handling it, thus limiting the liability of rough usage by the express agent. These boxes packed weigh less than three pounds, which makes the express rate to any point in the United States very low. **PRICE POSTPAID**, 15-egg size \$2.50 per doz.; 30-egg size \$3.65 per doz. **PRICE BY EXPRESS**, 15-egg size \$2.25 per doz.; 30-egg size, \$3.25 per doz.

Humpty Dumpty Folding Egg Crate —A safe and convenient folding, shipping crate for eggs. Made of hard wood with wire rod through corners and card board division and fillers. Fig. 1, folded flat; fig. 2, set up closed; fig. 3, set up open; fig. 4, shows half doz. complete, ready for shipment.

Parcel Post Egg Boxes —These boxes are so constructed that each egg is separated by a thickness of corrugated board and the entire contents are surrounded by a double wall of air-cushioned corrugated board. Absolute protection is therefore assured. **PRICE POSTPAID**, 1-doz. size, \$1.20 per doz.; 2-doz. size, \$1.70 per doz.; 3-doz. size, \$2.17 per doz.; 4-doz. size, \$1.41 per ½ doz.; 5-doz. size, \$1.65 per ½ doz.; 6-doz. size, \$1.84 per ½ doz. **PRICE BY EXPRESS**, 1-doz. size, \$1.00 per doz.; 2-doz. size, \$1.40 per doz.; 3-doz. size, \$1.75 per doz.; 4-doz. size, \$2.30 per doz.; 5-doz. size, \$2.70 per doz.; 6-doz. size, \$3.00 per doz.

Anderson Folding Egg Boxes are made of corrugated paper with double-faced corrugated paper partitions protecting each individual egg. Cannot be used for sending eggs by mail. **PRICE**, 50-egg size, \$3.00 per doz., shipping weight 2 lbs. and 2 ozs. each; 100-egg size, \$5.00 per doz., shipping weight 3 lbs. and 4 ozs. each.

Farmers' Modern Egg Carriers —A safe and convenient crate for carrying eggs to market. The individual carriers, holding one dozen eggs, are made of tough jute boards with compartment divisions. These carriers are placed in a crate made of light lumber, well balanced and strong enough to withstand any use. **PRICES BY EXPRESS**, 6-doz. size, 90 cts.; 3-doz. size, \$1.00; 18-doz. egg size, \$1.50.

Capacity.	Each, Postpaid.	Each, By Express.	Per Doz., By Express.

Poultry Helps and Appliances

Standard Wall Fountains are made of the best galvanized iron and will last many years with the proper treatment. It can be hung on wall of a building or against an upright post or board at any height. A hood projects over the water trough and prevents the water from becoming soiled. **PRICE POSTPAID**, 2-qt. size 66 cts.; 1-gallon size 83 cts.; 2-gallon size \$1.10. **PRICE BY EXPRESS**, 2-qt. size 60 cts.; 1-gallon size 75 cts.; 2-gallon size \$1.00.

Drop Bottom Wall Fountains

These drop-bottom drinking fountains are new, and made of No. 28-gauge galvanized steel. The bottom can be swung open with one hand, as it is secured by one spring in the front, while most fountains have a spring on each side, requiring both hands to open; even then they are opened with considerable trouble. The rod which extends through the hinge of the drop bottom is made of solid brass, preventing possibility of rust or of breaking off. **PRICE POSTPAID**, 2-qt. size 68 cts.; 1-gal. size 85 cts.; 2-gal. size \$1.14. **PRICE BY EXPRESS**, 2-qt. size 60 cts.; 1-gal. size 75 cts.; 2-gal. size \$1.00.

Nesco Sanitary Drinking Fountains are made in three sizes; the top is made cone-shape; which is a great advantage. It prevents the chickens from roosting on top of them, which is so often the case with a flat-top fountain, and keeps the water fresh and clean. **PRICE POSTPAID**, small size 36 cts.; medium size 43 cts.; large size 53 cts.; **PRICE BY EXPRESS**, small size 30 cts.; medium size 35 cts.; large size 45 cts.

Peerless Wall Fountains are something new and extra serviceable in the way of poultry fountains. They are made with a detachable bottom which makes them easy to clean and keep clean. **PRICE POSTPAID**, 1-qt. size 46 cts.; 5-qt. size 85 cts.; 10-qt. size \$1.39. **PRICE BY EXPRESS**, 1-qt. size 40 cts.; 5-qt. size 75 cts.; 10-qt. size \$1.25.

Economic Poultry Fountain and Feeder

—These pans make one of the finest feeders that we know of. In the first place there is nothing loose—only one part. Nothing to get lost. The feet supporting the thread socket into which the Mason jar screws are firmly electric welded to the bottom of the pan. They can be used for either food or water and afford a constant clean supply. We do not furnish the glass jar, but any Mason jar will fit them. **PRICE POSTPAID**, small size 31 cts.; large size 36 cts. **PRICE BY EXPRESS**, small size 25 cts.; large size 30 cts.

Sexton's Dry Food Hopper

—This hopper is arranged to hang on the wall the desired distance from the floor. It is impossible to waste any feed, as the pan at the bottom takes any feed that may be picked out. The body being covered keeps the feed dust-proof, clean and dry. Made of galvanized iron, and the grating is of round galvanized wire, preventing the poultry from cutting their bills. Price, 12-qt. size \$1.25 each by express.

JUNIOR CHICK FEEDER

—A simple, practical and sanitary feeder for little chicks. Note shape of feeding spaces—the chick can feed with ease, but cannot get inside. By the use of this feeder the feed is kept clean, will not waste, and cannot be fouled by the chicks. Can be used for dry mash, grain, sour milk or water. **PRICE POSTPAID**, 36 cts. each; **BY EXPRESS** 30 cts. each.

Standard Dry Food Hopper —These Standard Dry Food Hoppers are made somewhat similar to the Shell and Grit Box, but larger. It is a practical labor and food saving device for feeding dry grain food, either whole or ground. They have two compartments, the larger for grain mixture, holding about six quarts, and the smaller one for beef scraps, holding about three quarts. Those who are interested in dry feeding and desire to economize on the cost of grain and beef scraps cannot afford to be without the Dry Food Hopper. **PRICE POSTPAID**, \$1.12 each. **PRICE BY EXPRESS**, \$1.00 each; \$10.00 per dozen.

Grit and Shell Box —This box is manufactured from the best galvanized iron and contains three compartments for food, shells or grit. It can be hung up against the wall at any height desired, and is a thoroughly first-class article, practically indestructible, and will last a lifetime. It is the best self-feeding "food hopper" on the market. By the use of these self-feeding boxes practically every particle of grit, oyster shells, bone, meal, forcing food, grain, scraps and other materials supplied will be properly used, preventing all waste, and thus increasing the profits. **PRICE POSTPAID**, 85 cts. each. **PRICE BY EXPRESS**, 75 cts. each; \$7.00 per doz.

One-Two-Three Feeder —For feeding Dry Mash Scraps, Grit, Oyster Shells, Charcoal or any poultry feed. The separator can be arranged so as you can have one, two or three compartments. When used for one kind of feed take out the separator; for two kinds put separator in one end; when used for three kinds, say scraps, shell and grit, put separator in the middle and you have three compartments. **PRICE POSTPAID**, small size \$1.10; large size \$1.50. **PRICE BY EXPRESS**, small size \$1.00; large size \$1.25.

Boston Dry Food Hopper is made of galvanized sheet iron and is practically indestructible and will last a lifetime. It is also absolutely rat-proof and positive in this action. **PRICE POSTPAID**, small chick size, holds ½ peck, \$1.39; medium size for beef scraps, grit, etc., \$1.14; large size, for dry feed, \$1.50; **PRICE BY EXPRESS**, small chick size, \$1.25; medium size, \$1.00; large size, \$1.25.

Hub Chicken Feeder is sanitary, keeps chickens cannot get into it, feed clean and dry, the feed. **PRICE POSTPAID**, 9-inch feeder, 48 cts.; 15-inch feeder, 70 cts. **PRICE BY EXPRESS**, 9-inch feeder, 40 cts.; 15-inch feeder, 60 cts.

The 6 in 1 Exerciser and Feeder —Is just what its name implies. It is a large, rust-proof, galvanized, steel hopper supported on four strong iron legs and devised to hold all the food necessary for poultry.

The center hopper holds the mixed grain food, generally composed of cracked corn, wheat, Kaffir corn, buckwheat, barley, oats, etc., and is so constructed that an agitator underneath containing whole corn as bait, can be worked by the fowls to scatter broadcast a small amount each time of the dry grain mixture. It gives the hens the necessary exercise hunting for the grains. Surrounding this center hopper are six compartments made to contain dry mash, beef scrap, grit, charcoal, oyster shells, etc., easily accessible to the fowls, and the feeder is so constructed that no food is wasted. The cover is conical in shape, preventing roosting upon it. Price: 40-qt. size \$4.50 each by express.

Shipping Coops **FOR FANCY POULTRY.**—These coops are light, strong and easily put together. It is a closed coop made of light lumber, having a two-inch opening front and back under slatted top, so as to give the fowls plenty of fresh air when shipping. They are made in 3 sizes as follows. Shipped knocked down.
12 inches long by 18 inches wide by 18 inches high, 1 bird size, 40 cts. each; \$4.00 per dozen.

18 inches long by 18 inches wide by 18 inches high, 2 bird size, 45 cts. each; \$4.50 per dozen.
18 inches long by 21 inches wide by 21 inches high, 3 bird size, 50 cts. each; \$5.00 per dozen, **BY EXPRESS.**

Philadelphia Poultry Marker—This marker is two sizes—one for chicks and one for adult fowls. The sizes of holes punched are shown by the black dots printed at the side of this marker. The size made for adult fowls is too large for proper use on newly hatched chicks. **PRICE, each, 30 cts. POSTPAID.**

Cyphers Perfect Poultry Punch

—This punch is so simple in construction that it will appeal to all as a practical tool. It makes a good, clear, clean cut, and does not mutilate the web, as do many cheaper punches. These punches are made expressly for us, and we guarantee them to meet all requirements. **PRICE POSTPAID, each, 56 cts. Price by Express 50 cts. each.**

Champion Leg Bands—Give perfect satisfaction. They are neat, light, strong and durable; easily and quickly put on and guaranteed to stay on. This band is made in one piece, in two sizes, adjustable to fit any fowl. It is made of aluminum, large size for Asiatic class and turkeys; small size for Plymouth Rocks and smaller breeds. **PRICE, 12, 15 cts.; 25, 30 cts.; 50, 50 cts.; 100, 75 cts. POSTPAID.**

Poultry Killing Knife

—Every poultry raiser who kills and dresses for market, either chickens, ducks, geese or turkeys, should own one of these knives. They are made of finely tempered instrument steel and will last a lifetime. **PRICE POSTPAID, 50 cts. each.**

The X-Ray Egg Tester—The X-Ray Tester is designed for use on ordinary lamp and fits over any style of burner. These testers are thoroughly practical, and where small numbers of eggs are to be tested will answer the purpose as well as the Practical Egg Tester. **PRICE POSTPAID, 31 cts. each. PRICE BY EXPRESS, 25 cts. each.**

The Practical Egg Tester—This Tester is eight inches high, ten inches deep, and ten inches wide, and is just the tester for use on large duck and broiler farms. It is equipped with an extra strong reflector of superior quality. The eggs are held against the hole in the cloth end of the testing tube, bringing in view the development of the contents of the eggs, making it possible to discover the degree of fertility. **PRICE, complete, including box, lamp and reflector, \$1.50 BY EXPRESS.**

Porcelain Nest Eggs—These eggs are made of first-class flint glass. They do not break easily and will last a lifetime. **PRICE POSTPAID, 35 cts. per doz. BY EXPRESS, 2 for 5 cts.; doz. 25 cts.**

Lice Killing Nest Eggs—A lice destroyer and nest egg combined. Place in the corner of the nest or under nesting materials, and they will keep the nest sweet and clean. **PRICE POSTPAID, 10 cts. each; 60 cts. per dozen. BY EXPRESS, 5 cts. each; 50 cts. per dozen.**

Philadelphia Caponizing Set

—One of the chief advantages of caponizing is that it makes the fowl grow faster, and makes the meat sweeter, and, therefore, capons sell at a much higher price on the market than ordinary fowls. **PRICE POSTPAID, \$3.00.**

Mann's Green Bone Cutters

—We confidently recommend these bone cutters for we are certain that there is no better green bone cutter manufactured. Green cut bone is one of the best foods for egg production. **No. 5 B, \$10.00; No. 7, on stand, \$15.00.**

Blackhawk Grinding Mill—A most useful and substantial machine for poultrymen, as well as for farm and family use. By the use of this machine

you can always have fresh Graham Meal, as well as corn meal for the table. It is easily taken apart for cleaning, and is easily adjusted for fine or coarse grinding. Is adapted for grinding all kinds of grain and seeds, such as wheat, corn, rye, kafir corn, sunflower seed, etc., but cannot be used for bones or shells. **PRICE, \$3.50.**

Family Grist Mill—This mill is made especially to grind Graham Flour, Rice, Corn Meal, Coffee, Spices, etc., for table use. It can also be adjusted for merely cracking the grain if desired. The grinding surfaces are very hard and ground off perfectly true on emery wheels. The shaft is steel. Diameter of hand wheel 20 inches. Weight 29 lbs. Capacity 1 lb. in 2 minutes. **PRICE, \$5.00 each.**

Dry Bone and Shell Mill is the best thing for grinding dry bones, oyster shells and coarse grain, like corn. The low price at which it is sold is within the reach of every poultryman. **PRICE, \$5.00 each.**

Gape Worm Extractors—When gape worms lodge in the wind-pipe they must be extracted, if the chicken is to recover. The gape worms, if there are any, will be found adhering to the walls of the wind-pipe. **PRICE POSTPAID, 30 cts.**

EXTRAS FOR STANDARD CYPHERS INCUBATORS AND BROODERS

When ordering extras for either incubator or brooder, be sure and state size and style of machine; also the year manufactured. We carry the following in stock and can forward promptly:

Incubator Thermometers—The best incubator or brooder manufactured is worthless unless the thermometer used therein is accurate. Hundreds of hatches in incubators fail because of inferior thermometers, and large numbers of chickens are killed in brooders owing to defective or worthless thermometers. The thermometer here listed is thoroughly tested before shipped. **PRICE 60 cts. POSTPAID.**

Brooder Thermometers—Each, **POSTPAID, 45 cts.**

Incubator Hygrometers—Should be used by one who runs an incubator. They regulate the moisture accurately, overcoming the trouble so many have of chickens "dead in the shell." **\$1.50 each, POSTPAID.**

LAMPS with burner and wick complete for No. 0 incubator, 93 cts. postpaid; by express, 75 cts. each. For Nos. 1, 2 and 3 incubators, \$1.00 postpaid; by express 90 cts. each.

LAMP BOWLS without burner for No. 0 incubator, 58 cts. postpaid; by express 50 cts. each. For Nos. 1, 2 and 3 incubators, 70 cts. postpaid; by express, 60 cts. each.

LAMP BURNERS. For No. 0 incubator, 36 cts. postpaid; by express, 30 cts. each. For No. 1 incubator, 50 cts. postpaid; by express, 40 cts. each. For Nos. 2 and 3 incubator, 60 cts. postpaid; by express, 50 cts. each.

TIN DISC AND WIRE (state size of incubator), 15 cts. each, postpaid.

CONNECTING RODS. For Nos. 0, 1, 2 or 3 incubator, 30 cts. each postpaid.

WIRE HANGER FOR INCUBATOR THERMOMETER (state size of incubator), 20 cts. each postpaid.

LAMP WICKS. For Nos. 0 and 1 incubators, 20 cts. per doz. postpaid. For Nos. 2 and 3 incubators, 25 cts. per doz. postpaid.

BROODER LAMP complete with burner and wick for 1909 to 1915 brooder, \$1.00 postpaid; by express, 90 cts. each.

CONNECTING ROD FOR ADAPTABLE HOVER, 25 cts. each postpaid.

CYPHERS COMPANY INCUBATORS and BROODERS

For the season of 1918 we offer our customers the Cyphers Incubator Company's complete line of incubators. These **three** styles of high-class, guaranteed hatching machines, running through **eight different sizes**, represent all that is efficient, convenient and reliable in incubator construction. In buying a Cyphers Company Incubator you take no chance.

If you mean business, if you wish for success, we urge you to buy and use strictly first-class brooding apparatus, not some foolish "paper affair" or a cracker-box death-trap that is "made to sell" at a catch-penny price. We recommend Cyphers Company Brooders and Hovers as the safest and most reliable brooding equipment in the market. Thousands of poultry keepers have profited by their use—you will make no mistake in using the Standard Cyphers.

STANDARD CYPHERS INCUBATORS

MADE IN FOUR SIZES.

390-400 Egg Standard Cyphers Incubator

Price, Complete, \$34.00.

of every purchaser who will give it a fair trial. Are built in four popular sizes and at prices as follows:

PRICES:

No. 0. Cyphers Standard Incubator, 70-egg size.....	\$18.00
No. 1. Cyphers Standard Incubator, 144-egg size.....	23.00
No. 2. Cyphers Standard Incubator, 244-egg size.....	41.00
No. 3. Cyphers Standard Incubator, 390-egg size.....	49.00

COLUMBIA HOT-AIR INCUBATORS

Are built to meet the widespread demand for large-capacity, lamp-heated machines that can be sold at **surprisingly low prices** and yet be guaranteed to do high-class work. Have wooden cases, attractively finished in dark green, with brass trimmings and double walls. Seamless-bottom lamp bowls, best quality brass burners, zinc and steel Standard Cyphers toggle-joint thermostat and same regulating equipment as used on highest-priced machines. Fume-proof, forced draft heater, asbestos covered and metal banded. Automatic in ventilation and embodies diffusive principle. Roomy chick nursery under egg trays. Are made in two sizes: 130-140 eggs, price complete, \$20.00; 240-250 eggs, price complete, \$28.00.

MADE IN TWO SIZES.

240-250 Egg Columbia Hot-Air Incubator. Price, Complete, \$28.00.

SUPERIOR HOT-WATER INCUBATORS

MADE IN TWO SIZES.

120-130 Egg Superior Hot-Water Incubator Price, complete, \$18.00.

These machines are exactly what the name says. They are heated by hot water instead of hot air and are "superior" in every detail. The water boiler and tank (tubular) are of heavy-weight copper. Lamp has seamless bowl; burner is best on market. Incubator case is of wood, attractively finished in golden brown, with brass trimmings (hinges, buttons, etc.) and has double walls, with air space insulation. Are equipped with Standard Cyphers zinc and steel toggle-joint thermostat and knife-edge regulator. Have forced water circulation and are automatic in ventilation. Roomy chick nurseries. Are built in two sizes: 60-65 eggs, price complete, \$13.00; 120-130 eggs (see illustration), price complete, \$18.00.

STANDARD CYPHERS BROODERS

The Standard Cyphers Brooders are not only fire-proofed and insurable, but are the most durable, convenient, and most efficient indoor and outdoor brooders thus far invented and placed on the market. They are equipped with the same type of high-grade thermostat as used in the Standard Cyphers Incubator—you can, therefore, depend upon an even, steady temperature in the hover, and a lively, thrifty, growing lot of chicks.

These Cyphers 1918 Brooders, all sizes and styles, are self-regulating, self-ventilating and varmint-proof.

The outdoor styles are usable also as colony coops for the growing chicks. They are easily and quickly converted into colony

roosting coops by simply taking out the hover, which is made removable for that purpose.

THIS DOUBLE USE of the Cyphers Brooder means a considerable saving of money. It makes a safe and comfortable enclosure for the young chicks at night, and saves the buying of a coop for them. These outdoor brooders, on account of their fire-proof construction, can be used indoors, although we supply a special brooder, style D, for indoor purposes. All Cyphers 1918 Brooders, both outdoor and indoor, contain **either two or three apartments**. The popular style B (shown in illustration herewith) contains three apartments; first, roomy space under the hover; second, hover chamber; third, well-lighted exercising apartment. It has often been said by users of Cyphers Brooders that "They Mother the Chicks Better than a Hen."

PRICES:

Like Cyphers Incubators, we sell Cyphers Brooders at factory prices, F. O. B. Richmond, Va.	
Style A. Cyphers Fire-Proof Brooder.....	\$18.00
Style B. Cyphers Fire-Proof Brooder.....	23.00
Style C. Cyphers Fire-Proof Brooder.....	25.00

CYPHERS PORTABLE HOVER

The Cyphers Portable Hover is the only self-regulating and self-ventilating Portable Brooding Hover thus far invented, and we guarantee it to be the best brooding device of the kind on the market. As it is equipped with the same high-grade thermostat as the Cyphers Incubators and the Cyphers Adaptable Hover, it maintains a **steady and uniform heat**. It is positively and infallibly automatic in ventilation, preventing the trapping of "dead" air or poisonous gases underneath the curtain.

This Portable Hover, as its name indicates, can be picked up at any time, all complete, and moved about without hindering its operation. Very convenient for cleaning and moving. Rated capacity, seventy-five new hatched chicks, or fifty chicks that are ten days to six weeks old. Price of Cyphers Portable Hover, \$12.50.

CYPHERS ADAPTABLE HOVER

The Cyphers Adaptable Hover is self-ventilating and self-regulating. It supplies a continuous supply of fresh, pure warmed air under the hover, and at the same time maintains a steady, uniform heat. It is "adaptable" to use in colony coops, in portable houses, in home-made brooder coops, such as goods boxes, piano boxes, and organ cases as well as in large brooding houses. Capacity, seventy-five newly hatched chicks that are ten days to six weeks old. Price of Cyphers Adaptable Hover, \$12.50.

International Sanitary Hover —This is one of the best brooding devices ever devised, it can be counted on to raise your chicks to strong vigorous and active birds. It is called the Perfect Brooding Device. Price, 100-chick size, \$8.50.

Cyphers Electric Incubators —The easiest, cleanest and safest method for hatching eggs. By the use of electricity all the necessary annoyances of the oil lamp are entirely avoided. There is no dirt, no smoke, no fumes and absolutely no danger of fire. Price, No. 1 size, 60 egg capacity, \$20.00; No. 2 size, 120 egg capacity, \$25.00.
