Note On *Gibsoniothamnus*

ALWYN H. GENTRY
MISSOURI BOTANICAL GARDEN
ST. LOUIS, MISSOURI

The species roughly intermediate between the Bignoniaceae and the Scrophulariaceae continue to cause taxonomic headaches. Williams has proposed the genus *Gibsoniothamnus* to encompass several species of this alliance which had been erroneously treated under Verbenaceae. He correctly cites his new genus as a further link between the Scrophulariaceae and the enigmatic genus *Schlegelia* which traditionally has been included in the Bignoniaceae. Unfortunately, however, he overlooked the fact that *Gibsoniothamnus pithecobius*, the type species of *Gibsoniothamnus*, is identical to *Schlegelia cornuta* Donn.-Sm., based on a Heyde and Lux collection, number 3044, from San Miguel Uspantán, Quiché, Guatemala.

***Gibsoniothamnus cornutus* (Donn.-Sm.) A. Gentry, comb. nov.** *Schlegelia cornuta* Donn.-Sm. Bot. Gaz. 18: 6. 1893. *Clerodendron pithecobium* Standl. & Steyerl. Field Mus. Bot. 22: 373. 1940. *Gibsoniothamnus pithecobius* L. Wms. Fieldiana, Bot. 32: 214. 1970.
