Spring 1919

FALL PRICE LIST

FOR THE TRADE ONLY

Issued September 14, 1918

JACKSON & PERKINS Co.

Nurserymen and Growers of Florists' Plants

Wholesale Only.

NEWARK, NEW YORK

The "Preferred Stock"

Frau Karl Druschki Roses
Photographed Aug. 15, 1918

Terms and Conditions of Sale

This list cancels all previous quotations. All agreements and contracts are made subject to crop losses through unavoidable causes.

PRICES ARE NET. All bills are due in 60 days, unless other arrangements are made at time of sale. The prices named in this list are based upon present market conditions, and are subject to change without notice. We invite correspondence with prospective buyers, and shall be pleased to quote special prices on want lists calling for larger quantities than are named herein. On the other hand, these are *wholesale prices* and are applicable only to *wholesale* quantities; in no case will we fill retail orders, even though from nurserymen, at these prices. All orders should be made up in 10's or multiples of 10.

TERMS. The usual terms are offered to those of established credit or whose responsibility is known to us. Cash security or satisfactory references required from unknown parties. All bills are due in sixty days unless other arrangements are made at the time of sale. All prices are net and not subject to any discount unless specially agreed upon.

SHIPPING. Customers are requested to give definite instructions in regard to manner of shipping that they desire. In the absence of special instructions we will use our own best judgment, but with the express understanding that it is without responsibility on our part. All shipments travel at the risk and cost of the purchaser. We have the New York Central, the West Shore and Pennsylvania Railways, also, the Rochester and Syracuse interurban trolley line, enabling us to ship in any direction over trunk lines. Express is handled over all four of these routes also.

BOXES will be charged for at the rates noted below. We are obliged to make some increases in our box charges this season, because of the very great advances in the cost of lumber, nails and labor. The increases do not really cover the increased cost to us.

10 ft. 30 in. x 30 in.....	\$5.00	10 ft. 24 in. x 24 in.....	4.00	10 ft. 18 in. x 18 in.....	3.25
10 ft. 28 in. x 28 in.....	4.80	10 ft. 22 in. x 22 in.....	3.75	10 ft. 14 in. x 16 in.....	2.75
10 ft. 26 in. x 26 in.....	4.40	10 ft. 20 in. x 20 in.....	3.50	10 ft. 12 in. x 14 in.....	2.25

Add 50c on all sizes of 12 ft. boxes; decrease in same proportion for shorter boxes.

BALES will be charged for at actual cost of material used. We make no charge for packing or for delivery to the Railroad station.

GUARANTY. We give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any nursery stock, seeds or bulbs we sell, and we will not be in any way responsible for the crop.

CLAIMS for any cause, must be made promptly on receipt of goods. Any stock that is not exactly as represented, may be returned to us immediately on arrival, and we will cheerfully and without question, credit back the unsatisfactory plants, or send others; *but we will not entertain claims made after goods have been once accepted*, or when report is not made within six days after arrival of the stock.

INSPECTION AND FUMIGATION. Certificate of inspection will be furnished with every shipment and when required stock will be fumigated.

SPECIAL NOTICE. Correspondents are requested to use their printed business letter-heads. We do not quote prices to retail buyers nor sell to planters; we have *no retail trade* of our own, and sell to *the trade only*; in justice to our *only* customers, the Nurserymen, Florists, and Dealers we use every effort to limit the distribution of trade prices to those whom we know to be entitled to receive them. *Use printed stationery, or enclose business card.*

LOCATION. We are located thirty miles east of Rochester, N. Y., and cordially invite a visit and inspection of our establishment.

Respectfully,

JACKSON & PERKINS COMPANY.

Newark, New York, September 14, 1918.

Roses

We have always made the growing of Rose-bushes our leading specialty and the reason for it is because *we have always been particularly successful in growing good Roses*. We try to do the most of what we can do best. Newark Roses are well known and in demand throughout the country. Our output of field-grown Roses has increased steadily for the past fifteen years until it is now over a million plants annually. We have no retail trade of our own. We send out no catalogues, employ no agents and sell nothing to planters. Our only customers—the nursery-men and florists—can expect the best that we grow.

NOTE—When shipment is required so early in the fall as to make stripping necessary, an extra charge will be made of 1c each for Ramblers and Climbers, and ½c each for other roses.

Grades—For Fall delivery, we offer only No. 1; in the Spring, we can supply Medium Grade plants at 30 per cent. and No. 2 at 50 per cent. off these prices.

*Varieties marked * are for Winter and Spring delivery only, being mostly plants which we have grown on contract in California, on account of the sorts being not thoroughly hardy here.

Ramblers and Climbers

(a) on own roots		(b) budded	
	Per 100		Per 100
o Baltimore Belle, blush-white; an old favorite.....	\$15.00	b Flower of Fairfield, (Everblooming Crimson Rambler) crimson	\$18.00

		*o Ulrich Brunner.....	22.00

Roses, Roses, Roses, as far as one can see. Magna Charta in the fore-ground and Baby Ramblers just beyond them. This field represents a planting of 600,000 Manetti stocks, budded in Summer of 1917. Jack Frost got some of them last winter, but there are "several" left. Photographed August 9, 1918.

Rugosa and Hybrid Rugosa Roses

The comparatively new race of Hybrid Rugosa Roses is a great acquisition for extremely cold climates. They combine size, quality, fragrance and constant blooming habit with the hardiness, vigor and healthy foliage of the Rugosa type.

Budded except where marked (o)

	Per 100		Per 100
b Amelie Gravereaux, carmine-purple; large.....	\$25.00	b Parfumerie de l' Hay, bright red; double.....	\$25.00

Standard (Tree) Roses for Spring only, \$100 per 100

We were fortunate in securing a considerable quantity of *American grown Tree Roses*. They are not available for early Fall use, but we expect to receive them late in the Fall and can probably make delivery any time after November.

Arthur Goodwin, coppery orange-red passing to salmon-pink

Belle Siebrecht, imperial pink

Cecil Brunner, bright rose, yellowish in center; small blossom

Chateau de Clos Vougeot, fiery red

Cloth of Gold, climbing; sulphur-yellow with deeper center

Frau Karl Druschki, white

General Mac Arthur, bright scarlet red

George Dickson, velvety black crimson

Gloire de Margottin, brilliant dazzling red

Gruss an Teplitz, scarlet, constantly in bloom

Hugh Dickson, brilliant crimson shaded scarlet

Irish Elegance, bud bronzy orange-scarlet, opens apricot; single

Juliet, old gold and red

Kaiserin Augusta Victoria, white; fine form

Lady Hillingdon, deep apricot yellow

La France, rosy-pink

Lyon, shrimp pink

Mme. Caroline Testout, clear rich pink

Mme. Edouard Herriot (*Daily Mail*), coral red, shaded with yellow and bright rosy scarlet passing to shrimp pink

Mme. Ravary, golden yellow buds, opening orange-yellow

Maman Cochet, rich coral pink shaded with rosy crimson

Marechal Neil, climbing; lemon yellow

Mrs. Aaron Ward, yellow

Orleans, Baby rose; brilliant geranium red, suffused rose

Papa Gontier, rosy crimson

Radiance, carmine pink, yellow at base of petals

Sunburst, rich yellow, shaded coppery-rose

Ulrich Brunner, light red; cup-shaped flowers

White Cochet, snow white with outside petals tipped with pink

Clematis

Strong, two years old plants, No. 1 grade.

We have always been very successful in growing Clematis and they have been a leading specialty with us for a great many years. We think we may safely say that we grow and sell more Clematis than any other nursery in this country, or, indeed, in the world.

One of our greenhouses filled with Clematis Jackmanii. There are 18,000 plants in this house and there are four other houses of the same size, similarly filled. They are grown one season in pots in the greenhouses and one season in the field. We are probably the largest growers of large flowering varieties of Clematis in the world. Photographed August 9, 1918.

Perennial Phlox, strong field grown stock

Should not be compared in value with the small plants from two-inch pots which are sold so cheaply. These are one season older.

A part of one of our fields of Hardy Phlox in the fore-ground and Butterfly Bush beyond the Phlox. We grow from 125,000 to 150,000 Phlox annually, all strong field-grown plants.

Photographed August 15, 1918.

		*Thebaide, rosy-pink.....	6.00

Varieties marked * will be supplied at \$45.00 per 1000 for not less than 500 plants nor less than 100 of a kind.

Peonies

We formerly grew something like 200 varieties of Peonies, but we concluded that it was not necessary to stock such a large assortment in order to have everything that was really worth while. We have sifted out duplicates and eliminated those with defects of any kind. The list we give below covers the entire range of colors and the entire blooming season and represents the very best out of several hundred varieties, which we got together from specialists in France, England, Holland, Japan and in this country.

Our Peonies are strong divisions with 3-5 eyes and plenty of roots.

One of Our Peony Blocks.

	Per 100		Per 100
Camille Calot, light rose.....	\$10.00	Edulis Superba, soft pink; early....	\$15.00
Carnea Striata, pale flesh, shading to almost pure white.....	10.00	Felix Crousse, brilliant, flaming red; the best red; mid-season.....	25.00

Evergreens

We have unwittingly allowed our assortment of Evergreens to become somewhat depleted, as a result of the extraordinary demand during the last two years. However, the varieties offered below can be furnished in thrifty, shapely, well furnished stock, all of which has been transplanted at least twice, and much of it has been root-pruned in addition.

Norway Spruces (*Abies Excelsa*) in the J. & P nurseries, a clean, thrifty young block just to be dug from for the first time. Photographed August 15, 1918.

Fruit Department

NO FRUIT TREES FOR EARLY FALL DELIVERY. Most of our supply of Fruit Trees for this season is at a farm located a considerable distance from our packing grounds and with the shortage of help, which we already foresee for the Fall shipping season, we do not dare promise the digging of special orders for Fruit Trees. We shall clear the blocks in the late Fall and bring the trees to our storage cellars for the Winter. We offer the Fruit Trees only for late Fall or Spring shipment.

Apples, Dwarf,
on Doucin (English Paradise) Stocks, 2 years

For some years have budded a considerable quantity of apples on English Paradise stocks. This stock dwarfs the mature trees considerably and brings them into fruiting at a much earlier age than standard trees. The dwarf trees are much in demand for planting in city lots where space is limited and for using as fillers in commercial orchards, so as to obtain some income before the standard trees come into bearing.

French Stocks for Nursery Planting

We sell both Fruit Tree Seedlings and Ornamentals of all kinds, in sizes suitable for nursery planting. We are sole American Agents for Mr. Charles Detriche, Sr., Angers, France, who is one of the best growers and most careful graders and packers among the French nurserymen. His catalogue will be sent on request.

Factors of Fertility

Many of our customers expressed so much interest in the pictures and description of our methods which appeared, under the above heading, in our price-list of last fall, that we are repeating the pictures below and giving some amplified details of our crop rotations.

There is a large canning factory located here for which we annually grow a considerable acreage of Peas. We seed Alfalfa along with the Peas and almost never fail to secure a good

A field of alfalfa soon to be plowed under for keeping up the supply of nitrogen and humus in our soil.

carch of Alfalfa. The Peas give us a fair income from the land the first season (and are good nitrogen gatherers as well). The second season we cut one, or sometimes two, crops of Alfalfa, plowing under the second or third crop to fertilize and put humus in the soil. The alfalfa hay, together with corn ensilage, of which we have over fifty acres each summer, enable us to winter

Here is part of the herd of steers such as we winter each season. We shall have 250 more of them this fall and winter.

a large herd of cattle each season. Usually we are able to make a fair profit on the cattle but we figure that, if we only break even on them, we can well afford to keep them for the sake of the manure, which is also a very essential factor in keeping up the fertility of our nursery land.

Forcing Stock for Florists

Hydrangeas, grown in 6 inch pots, plunged out of doors

For this season we have the largest and certainly one of the very best lots of Hydrangeas that we have ever grown. We have discontinued growing them under shade. The plants have all been plunged in the open ground without protection of any kind. While the branches are not as long in growth as when grown under some shade, they are stocky, sturdy plants and are well ripened. From present prospects they will be well set with buds and ready for shipment the middle or latter part of September. In the present scarcity of imported plants of various kinds for forcing, we have no hesitation in recommending our customers to buy good large quantities of these Hydrangeas. We have the utmost confidence that they will both produce good results and find a ready sale.

This is ONE of our blocks of pot-grown Hydrangeas for this season. There are 20,000 in this lot, all in 6-inch pots, and as many more in another block nearby.

Plants with 10-12 branches.....	\$50.00 per 100

VARIETIES

BABY BIMBINET, silvery rose of dwarf compact habit of growth, very early and reliable in blooming.

BOQUET ROSE, rosy amber, an especially attractive color.

GENERAL DE VIBRAYE, large flower, bright rose color. Responds very readily to treatment for producing blue flowers.

LA LORRAINE, pale rose of good habit and a desirable dependable variety.

LILY MOULIERE, a bright cheerful shade of carmine rose, compact in growth, probably the most popular variety of its color.

MME. EMIL MOULIERE, the most popular white sort, very large flower and fine big truss.

VARIETIES—Continued

MME. MAURICE HAMAR, delicate flesh color. One of the older of the French varieties, but still a leading favorite.

OTAKSA, the old favorite and still a leading pink variety.

RADIANCE, deep rosy carmine. When grown at its best this is an unusually attractive color, and a very dependable sort.

SOUVENIR DE MME. CHAUTARD, fine clear pink. One of the very best all around sorts, early and very free flowering.

SAMPLE PLANTS OF OUR HYDRANGEAS

With 7-10 branches

Genistas

Fine shapely, bushy plants, 5 inch pots @ \$30.00 per 100; 4 inch pots @ \$25.00 per 100.

JOHN ROCKEFELLER COULDN'T BUY FROM US

Last season we received, from an advertisement in one of the florists' papers, a considerable order from the Superintendent of the John Rockefeller estate at Pocantico Hills. Following our usual custom, we replied with a courteous letter, explaining that our business was confined strictly to the trade and recommended that the order be placed with a near-by nurseryman who, incidentally, had been a customer of ours for many years. It worked out very satisfactorily all around. The near-by nurseryman got the Rockefeller order and we in turn got his order, not only for the stock it required, but his satisfaction and good-will over our co-operation brought us increased business from him as well.

We are not using this illustration of our policy in any spirit of braggadocio. It is a plain business proposition with us. We think it pays us to follow that policy. We depend on "the trade" to take our output and anything we can do to help our trade customers naturally and incidentally helps us. That is why we doubled our subscription to the Nurserymen's Fund for Market Development.
