SEEDS FOR . . . 1918

The Mountain States Most Extensive Seed Gardens

Select Salmon Tinted Pollock, No. 25—Cantaloupe

AS GOOD AS GROW
FOR YOU TO SOW

FROM

D. V. BURRELL

SEED GROWER, ROCKY FORD, COLORADO

THOUSANDS OF THE MOST SUCCESSFUL PLANTERS OF
PLANT THESE SEEDS EACH YEAR

"AS GOOD AS GROW FOR YOU TO SOW"

My Motto

Rocky Ford, Colo., Dec. 1, 1917.

To My Customers and Friends:

Since sending you my last catalog **Our Country** has been plunged into the great world war and we have ahead of us serious, nerve-breaking conditions, but they will not be nerve-breaking for us. We are determined and we will win.

The production of food is of the most vital importance and this year we are obliged to say that the supply of seeds is very short. Be careful with the planting. Use enough seed to get a good stand but do not allow any to be wasted. Grow a large variety so you can fill your cellar with canned vegetables and root crops. We can grow large quantities of tomatoes, cucumbers, cabbage, turnips, onions and like crops on a small acreage. All these help to save wheat and meat. An acre of garden well grown will save from ten to ten acres of wheat.

I will do all I can to help by sending you as good seed as possible on your orders. On account of the shortage you should order early and if you wish me to substitute what I think nearest equivalent what you order in case I am sold out of what you order, say so. I will not substitute except you request it.

I thank you for the patronage of the past years and look forward with interest to your orders for 1918 planting.

I wish you a prosperous season.

Yours truly

D. V. BURRELL, Seed Grower.

INSTRUCTIONS TO PURCHASERS

Please follow these instructions carefully. If any mistake occurs or your order is delayed, let me hear from you promptly.

MY TERMS ARE CASH WITH ORDER.—Send Postoffice Express Money Order, Bank Draft or Registered Letter. Small amounts may be in postage stamps.

C. O. D.—No goods shipped C. O. D.—Under the new telephone rulings you can wire the money with the order where it is necessary to send wire orders, which does not make it necessary to send C. O. D., as used to be the case.

HOW TO ORDER.—Always write your name, postoffice, state and express office plainly, and if possible use the order sheet. Always carry out the price of each item.

Make all orders or checks payable to D. V. BURRELL.

SAFE ARRIVAL GUARANTEE.—I guarantee safe arrival of seeds sent by Mail or Express, but request all to have their address plainly written. If the seeds are not received in a reasonable time send an exact copy of the order and state kind of remittance. The same will be given immediate attention.

HOW TO SHIP.—Always state how to ship heavy seeds, if by Freight or Express.

GUARANTEE.—It is impractical to guarantee seeds, as under improper care the best of seeds will fail. Some may be sown shallow or too deep, in too dry ground or too wet. Some hard seeds will stand cool weather and grow when soil is too cold for others and will cause them to decay. Insects above or below surface may attack and destroy them. For these reasons D. V. Burrell gives no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds he sends out, and will not in any way be responsible for the crop.

NO PREMIUMS

I do not believe my customers approve of the giving of premiums. Somebody has to pay for them. My idea is to sell to those who buy to plant, looking forward to the growing of a good garden for home use or a PROFITABLE MARKET GARDEN and to sell these seeds as low as I can afford, quality considered, but not to cut down the quality in order to meet prices made by others. In making up this catalog I have been guided entirely by the quality of seeds I have to offer and the supply.

I trust you will favor me with your order fully filled.

The Mountain States Largest Seed Gardens

D. V. Burrell's of Rocky Ford, Colorado

Under the summer evening shadow of Pikes Peak at an elevation of over 4,000 feet, where the days are warm and the nights are cool, the temperature often varying as much as 40 degrees, are located the extensive Seed Gardens of D. V. Burrell, nearly four thousand acres (4,000 acres).

Here under the most favorable conditions to the production of seeds of great vitality are grown a great variety of Vegetable and Flower Seeds for which the demand is rapidly growing not only throughout the United States, but in many foreign lands.

This seed catalog comes to you dressed in working clothes direct from the fields, telling you as near as I can the description of the varieties and their qualities, quoting you as low prices as I can afford and give the growing and harvesting of the seeds the proper attention.

Beware of cheap seeds. Good seeds cannot be sold at less prices than the produce necessary to furnish these seeds can be sold for on the markets. You can't expect to buy good seed wheat at 50c per bushel when milling wheat is worth \$1.50 per bushel. You can't expect to buy good cantaloupe seed at 50c per pound when a crate of cantaloupes which is necessary to produce a pound of seed nets \$1.25 per crate on the market. The cost of good seed is very little compared with the crop results. Buy the best you can get.

My seed crops this year are sufficient to plant nearly one million acres, and whether you plant very extensively for market or only plant a small home Vegetable or Flower garden, I hope to receive your order. Many of the most extensive and most successful planters of the country plant these seeds each year. I will endeavor to send you so good seeds that you will order again.

Send the names of a number of your friends who grow gardens, when you order, and I will send you some special seeds for your trouble. More names, more seeds.

Assuring you my best attention, I am,

Yours truly,

D. V. BURRELL, Seed Grower,

Rocky Ford, Colorado

ASPARAGUS

Culture.—Asparagus will produce well in practically all sections of the country, and it should be in every garden. Plant the seeds thinly (2 to 3 inches apart) in rows 16 to 20 inches apart. This will produce the plants far enough apart so they need not be thinned. Keep free from weeds and cultivate well to get the best possible growth of plants. Transplant to permanent bed when the plants are either one or two years old. The soil for the permanent bed should be well drained and made very rich by covering with a heavy coat of barnyard manure. Disc the manure in and plow deep. Harrow several times as soon as plowed. Plow furrows 6 to 8 inches deep, 4 feet apart and set the plants 2 feet apart in the furrows, spreading the roots out well. Cover with 2 or 3 inches of earth, and after the shoots begin to come up cover more, until the furrows are leveled.

Fertilize well each year with well-rotted manure. Do not cut any the first year and only a part of the crop the next year. You should not cut a full crop until 4 years old, and if well cared for, the bed will continue to produce from twelve to twenty years.

Very careful tests have proven the Palmetto superior to all others in yield and also best to withstand unfavorable weather, as this variety does not rust easily.

Nearly all markets now call for Green Asparagus. The stalks should be cut about $2\frac{1}{2}$ or 3 inches below the surface when 6 inches high. This gives a stalk showing $2\frac{1}{2}$ inches white and 6 inches of natural color. They should then be tied in bunches $2\frac{1}{2}$ inches in diameter, $8\frac{1}{2}$ inches long. Grade the asparagus, making up the bunches from stalks of uniform size.

Make your asparagus bed where there is good air drainage, as there will be less liability to rust than if protected from the wind. Keep the soil full of humus so it will not blow badly. Give the soil a light dressing of slaked lime every two or three years; this will sweeten it and help keep away injurious insects. When the tops are brown in the fall, mow and burn them.

An ounce of seed produces about 500 plants. To be safe allow $1\frac{1}{2}$ pounds of seed for each acre of permanent bed you wish to set; 5,500 plants set an acre; \$400 to \$600 per acre is a very common return from asparagus.

Palmetto Asparagus

BURRELL'S SPECIAL STOCK. This is the most valuable sort grown, as has been proven by many comparative tests. My seed is saved from a special field grown by one of the most successful growers of the country. It is large, very early and an abundant yielder. In sections subject to asparagus diseases this variety has proven most able to resist them. I recommend it for your home garden and especially to market gardens. 5c and 10c pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.40 per lb.; 10 lbs. and up \$1.30 per lb., prepaid.

CONOVER'S COLOSSAL. A standard variety; large productive and of good quality. 5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb.; 10 lbs. and up 75c per lb., prepaid.

GIANT ARGENTIEUL. This French variety is a very valuable sort. The stalks sometimes weigh as much as one-fourth pound. It is a vigorous grower and one of the best sorts for market. 5c and 10c pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.40 per lb.; 10 lbs. and up \$1.30 per lb., prepaid.

Asparagus Should Be in Every Garden

Garden Beans

Beans like a dry and rather light soil, though they will do well in any garden soil, if not planted too early in the spring. Planting should be delayed until all danger of frost is over. Dwarfs are earliest and most hardy, as a general rule. In garden culture beans are usually planted about 2 inches deep, in rows 18 inches apart, and 3 inches apart in the row; in field culture, in drills 2 to 3 feet apart, so as to cultivate with horse one way. Until blossoming season, frequent but shallow cultivation should be given. It is useless to expect a crop from a poorly-prepared field, or from one that needs deep stirring after planting, as cutting of the roots after the plants show bloom is very apt to kill the vines and ruin the crop. One quart will plant 100 feet of drill, and one bushel is sufficient for an acre.

Running beans, especially the Limas, are even more tender than the Dwarfs; therefore, planting must be delayed still later, or until liability to rot in consequence of cold, damp weather has passed. Plant five or six beans in each hill, about 2 inches deep, hills 3 feet apart each way. One quart of seed will be sufficient for 100 hills of Limas, and 250 to 300 hills of the other varieties.

Some market gardeners risk planting part of their crop five or six days before the average time of the last frost in the spring, so that if they are fortunate and miss the frost they will be early on the market. To afford a regular succession of crops throughout the season, plant every two weeks after the first planting until mid-summer.

CROP SHORT

The crop of both Green Pod and Wax Beans is very short this year and I can only offer in small amounts and with general seed orders.

Beans Green Pod, Dwarf or Bush

Burpee's Stringless Green Pod

This should be first choice if you prefer a green pod bean, or if you are growing for market you will find about one-half of your customers prefer a green pod bean, and to supply them you should plant one-half your acreage to this sort.

It is not equalled by any other green pod bean. It is quite hardy, extremely early, and the pods are tender, stringless and of the highest quality.

The pods are fleshy, being full and round before the beans begin to attain any size. They continue to bear a long time when kept picked off, and by planting two or three times during the season, the first planting as soon as danger from frost is past, and then later, about four weeks apart, you have snap beans covering a period of three or four months. Price—Pkt., 10c; 1 lb., 45c., postpaid; by express or freight—lb., 40c.; 10 lbs., \$3.50.

Your Good Garden Helps Win the War

Burrell's Spot Free Davis White Wax Beans

These beans have won a great reputation in the South because of their resistance of pod-spot. I have some very fine stock of this variety, crop good but demand has already taken most of them.

The pods are long, straight, and stringless while young. Color, a waxy yellow, and an excellent shipper. **Price—Pkt., 10c; lb., 45c; postpaid. By Express or Freight—lb., 40c; 10 lbs., \$3.50.**

WARDWELL'S KIDNEY WAX. Long, waxy yellow pods. A well-known sort. **Price—Pkt., 10c; lb., 45c; postpaid. By Express or Freight—lb., 40c; 10 lbs., \$3.50.**

GERMAN BLACK WAX. Pods creamy yellow. Early and productive. **Price—Pkt., 10c; lb., 45c; postpaid. By Express or Freight—lb., 40c; 10 lbs., \$3.50.**

IMPROVED GOLDEN WAX. Golden yellow pods. Tender and good. Well known. **Price—Pkt., 10c; lb., 45c; postpaid. By Express or Freight—lb., 40c; 10 lbs., \$3.50.**

IMPROVED RED VALENTINE. Green pod. Well known. A heavy yielder. **Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.25.**

REFUGEE—1,000 TO 1. A popular late green-podded sort, very productive. **Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.25.**

BLACK VALENTINE. Pods green. Well liked by southern growers. Will stand earlier planting than most sorts. **Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.25.**

Eat What You Can and CAN What You Can't

LIMA BEANS

Henderson's
Bush
Lima

This excellent variety will produce an abundant crop under a wider range of weather or soil conditions than any other Lima, and I urge its planting in every garden. In the home garden a small space will produce finest flavored Lima Beans for use as soon as they are large enough to shell, and later for dry shell beans.

They yield a heavy crop, are a true bush sort, 18 to 20 inches high, require no support and are early, coming bearing continually until frost. The beans have the true Lima flavor, buttery, rich and tender. Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.40.

BURPEE'S BUSH LIMA

A bush form of the large white Lima, which grows about 20 inches high. The beans are very large and of excellent quality, fully equal to the pole Lima, both in quality and size. Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.40.

BEANS—POLE

KING OF THE GARDEN LIMA

This standard market sort is one of the best for main crop. The growth is strong and the yield abundant. The bearing season continues until frost. The pods are large, containing five or six large, white beans. This variety is especially valuable where the garden space is limited, as a few hills will supply a good-sized family. Price—Pkt., 10c; lb., 40c; postpaid. By Express or Freight—lb., 35c; 10 lbs., \$3.40.

The Lazy Wife's Pole Bean is entirely stringless, of fine flavor and bears an abundance of large pods which are fit for use until nearly ripe. A good white shell bean for winter use. Price—Pkt., 10c; lb., 30c; postpaid. By Express or Freight—lb., 25c; 10 lbs., \$2.00.

Old Homestead or Kentucky Wonder. Very prolific; bears its pods in large clusters; pods green and often 8 to 10 inches long; nearly round when young, and very crisp. Price—Pkt., 10c; lb., 30c; postpaid. By Express or Freight—lb., 25c; 10 lbs., \$2.00.

White Dutch Caseknife. A good shell bean, green or dry. An excellent corn bean. Price—Pkt., 10c; lb., 30c; postpaid. By Express or Freight—lb., 25c; 10 lbs., \$2.00.

Red Speckled Cut Short or Cornhill is a favorite sort and much in demand to plant among corn. The pods resemble the Bush Valentine. Price—Pkt., 10c; lb., 25c; postpaid. By Express or Freight—lb., 20c; 10 lbs., \$1.75.

Dry or Shell Beans

TEPARY. This small white bean is about the size of Dwarf Navy Beans, but will grow where the amount of rainfall is less than necessary to produce a crop of other beans. It is a heavy yielder and will prove a very valuable crop on semi-arid land. The quality is equal to the Navy and it is preferred by some. Price—Pkt., 10c; lb., 25c; postpaid. By Freight or Express—1 lb., 20c; 10 lbs., \$1.80; 100 lbs., \$16.00.

PINTO. This brown speckled bean is the Mexican Chili Bean. It is a heavy yielder and in demand as a dry shell bean. Price—Pkt., 10c; lb., 25c; postpaid. By Express of Freight—lb., 20c; 10 lbs., \$1.50; 100 lbs., \$13.00. Special prices on large lots.

My Good Seeds Will Help You Grow a Good Garden

BEETS—Table

Culture

Beets are very easily grown and one of the profitable crops for the market grower. If desirable to be very early, they may be grown in the hotbed and transplanted, for which purpose I recommend Crosby's Egyptian.

Prepare your soil by manuring heavily and discing well before plowing, to make it easier to turn the manure under and to thoroughly mix it with the soil. Harrow as soon as plowed, making a fine, well-settled seed bed. It is a great advantage to drag or float the land, as this crushes all small clods and settles the surface well.

Plant as early in the spring as the weather will permit. Beets will stand light frosts, but care must be taken, as a heavy frost would destroy them.

The rows should be 16 to 20 inches apart and the seed planted from 1 to 1½ inches deep. When the plants have five or six leaves thin table beets to 4 to 6 inches apart. Sugar beets and Mangel-Wurzels 10 to 12 inches apart. Plant 6 to 8 pounds of table beets or stock beets per acre and 20 pounds of sugar beets per acre.

Table beets may be sown at intervals of four weeks until the latter part of June to have tender, even-sized beets throughout the season from late summer until winter, the later planting being for siloing to use or sell during the winter.

I make a specialty of beet seed and sell thousands of pounds each year. The crops the past two years have been short, but I am making prices as low as I can for first-class stock.

CROSBY'S EGYPTIAN

Burrell's Special Stock (See Cut)

This is extremely early, being one of the first early beets. The shape is nearly round, very smooth, a rich red, fine-grained and of extra quality. The tops are small, making fine bunches. They have a very distinctive bright red color and are uniform in shape and appearance.

The tap root is small. The type is well illustrated in the cut herewith.

Crosby's Egyptian

5c and 10c pkts.; 15c per oz.; 45c per ¼ lb.; \$1.50 per lb.; 10 lbs. and up, \$1.40 per lb.; prepaid.

BURRELL'S CRIMSON GLOBE

This very valuable second early sort is a fit companion to my strain of Crosby's Egyptian. The color is darker red, shape just a little more square-shouldered and a little deeper from base of top to tap root. The leaves are very dark red and tops small. It is a good beet to grow for late crop and keeps well when pitted until late in the spring. It is beautifully zoned. Will please you. 5c and 10c pkts.; 15c per oz.; 45c per ¼ lb.; \$1.50 per lb.; 10 lbs. and up \$1.40 per lb.; prepaid.

Edmand's Early Blood Turnip

The roots of good form; round; one small tap root; the flesh deep blood red; very sweet and tender; a well-known and excellent sort.

5c and 10c pkts.; 15c per oz.; 45c per ¼ lb.; \$1.50 per lb.; 10 lbs. and up, \$1.40 per lb.; prepaid.

Prices in this catalog hold good only as long as my supply of seeds lasts. When these are sold, prices will advance.

Burrell's
Crimson
Globe

TABLE BEETS-Continued

Detroit Dark Red

This fine dark red beet is a leader with me. I recommend it for either the home or market garden. I also sell large quantities of it to canning factories, as its uniform shape and dark red color make it very well liked for canning.

The tops are small, dark green and red, the roots globular, very smooth; the flesh a deep red, shaded with lighter red zones. This beet is acknowledged by the beet seed specialists throughout the world as the most uniform in size, shape and color, and of the highest quality. 5c and 10c pkts.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; 10 lbs. and up, \$1.60 per lb.; prepaid.

Detroit Dark Red

Long, Smooth, Dark Blood Red

A standard late variety of good quality; keeps well through the winter; roots smooth, with few side roots. Color very dark purple; flesh dark red, of excellent quality; very good for pickles. 5c and 10c pkts.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.40 per lb.; 10 lbs. and up \$1.30 per lb.; prepaid.

Sutton's Globe

This valuable sort was developed by Sutton & Sons, whose seed-growing establishment is one of the leading in Europe. This beet will rank with the first in quality and appearance. It is nearly round; has the good points of Crosby's Egyptian and is a thoroughbred as to type. Plant it either for home or market garden. 5c and 10c pkts.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; 10 lbs. and up \$1.60 per lb.

Johnson's Defiance

This is a square-shouldered, globe-shaped, dark red, main-crop sort, which will be found a good variety for market or home garden. The tops are very dark red. This was developed by Johnson & Sons, another of Europe's leading growers, and that they gave it their name shows they consider it one of the best—one that defies all others. 5c and 10c pkts.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.75 per lb.; 10 lbs. and up \$1.60 per lb.

There Never Was a Greater Shortage of Garden Seeds in My Memory

MANGEL WURZEL

Giant Long Red

**Often Yields 40 to 60 Tons
Per Acre**

This is the largest, heaviest yielder of the Mangel-Wurzels. A yield of fifty tons per acre is very commonly harvested, and with ordinary care on well-fertilized soil they should produce twenty-five to thirty tons per acre.

They contain 5 to 7 per cent sugar and have high feeding value.

Every farmer should grow Mangel-Wurzel, and a part of the crop may well be this variety. The roots are shaped as shown in cut made from a photograph. Color red, flesh white tinged with rose; grows about one-half out of the ground; easily harvested. 5c and 10c pkts.; 15c per oz.; 35c per $\frac{1}{4}$ lb.; \$1.20 per lb.; 10 lbs. and up \$1.10 per lb.; prepaid.

Golden Tankard

Yellowish orange color. Not so long but thicker than Giant Long Red. Flesh yellow zoned with white; grows partly out of the ground; an immense yielder and preferred by many.

Giant Long Red

5c and 10c pkts.; 15c per oz.; 35c per $\frac{1}{4}$ lb.; \$1.20 per lb.; 10 lbs. and up \$1.10 per lb.

Mangel-Wurzel seed is very scarce, but as 5 or 6 pounds will plant an acre, and the yield is so heavy every one who can should plant them for stock feeding. The yield per acre is equal to several acres of corn in feeding value.

Sudan Grass

As a rule, I do not offer Field Seeds, but Sudan Grass has proven to be a plant of such great merit as a heavy hay producer that I have thought best to offer the seed.

This plant grows very rapidly, and each plant stools heavily, so that a single plant often has one hundred or more stems. It may be cut for hay from three to five times in a season, and the feeding value is practically equal to alfalfa hay. Southern planters will find this the solution of the hay problem for them. Every farmer should plant this seed. Price—15c per $\frac{1}{4}$ lb.; 50c per lb.; prepaid. Not prepaid \$40 per 100 pounds.

Subject to Sale and Advance

CARROTS

Culture.—Any good soil is suitable; manure it well, plow deep and prepare the seed bed as for beets. It is a good plan to plant a few radish seed with the carrot, as carrot starts slowly and the radish mark the rows so they can be cultivated before the carrots come up. Plant rows same distance apart as beets and thin to about 4 inches apart in the row, or if from 2 to 4 inches apart, they need not be thinned. Cover about 1 inch deep. Cultivate often and thoroughly. Sowing may be made as early in the spring as the soil can be put in good condition, or up to June 15 to 20. Two and one-half to three pounds of seed per acre.

Chantenay Half Long

This excellent sort is well illustrated in above cut made from a photograph of a sample produced from my seed. The roots average about 6 inches in length, shaped as shown in cut, deep orange color, smooth, flesh very tender and first-class in every way; medium early; one of the best for market or home garden. It is very productive and easily harvested. Price, 5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; 10 lb. lots and up, \$1.45 per lb., prepaid.

OXHEART OR GUERANDI. This is a very desirable sort. The roots are thick and $4\frac{1}{2}$ to 5 inches long, shape slightly resembling an ox's heart, hence its name. This variety grows better than any other in heavy soil, owing to the short root. The flesh is a bright orange; crisp, tender, fine-grained and sweet. An excellent sort for table, and when full-grown produces a profitable crop for stock feeding. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; 10 lb. lots and up, \$1.45 per lb., prepaid.

DANVER'S HALF-LONG. A half-long orange carrot; very productive and suitable to almost any soil. Flesh a deep orange; fine-grained, crisp and tender. Being such an abundant bearer and of so good quality, it is considered one of the best, and the demand for it for both market and home garden is heavy. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; 10 lb. lots and up, \$1.45 per lb., prepaid.

LONG ORANGE. This valuable sort produces roots often 12 inches in length and 3 to $3\frac{1}{2}$ inches in diameter at the crown, tapering regularly to the small tap root. Color a very deep orange; suitable for table use or stock feeding. Succeeds best in a deep, loamy soil; fine-grained, crisp, tender and of excellent quality. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; 10 lb. lots and up, \$1.45 per lb., prepaid.

IMPROVED SHORT WHITE. One of the most productive. The roots run as much as 4 inches in diameter at the top and taper to a point at the small tap root; length 8 to 10 inches. They will grow to this size on good, rich soil, where nearly all touch each other in the rows. Thin to 4 inches apart. Color creamy white with light green crown. Flesh white, solid and of excellent quality for stock feeding. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.40 per lb.; 10 lb. lots and up, \$1.35 per lb., prepaid.

Reports come from all parts of the country that Burrell's Earliest of All Cucumber is the biggest money-maker of any Cucumber they ever grew. Plant it this year for early market. It will make money for you.

CABBAGE

I Sell Thousands of Pounds

Since starting in the seed business I have sold only the finest grade of cabbage seed obtainable. This seed is produced for me by the leading specialists of the world. Certain sorts which reach the highest development and produce the highest grade of seed in Denmark I have grown there; others in Holland, Long Island and Puget Sound.

With cabbage, the first point is good seed. No matter how well you care for the crop you will fail if you have not reliable seed.

Culture

The soil should be rich and the preparation thorough. Cultivate, cultivate, and keep it up. If under irrigation, frequent irrigations are an advantage, but do not water to take the place of cultivating.

For early cabbage, except in the extreme South, sow the seed in hot beds and transplant to cold frames, setting out in open ground as early as possible in the spring. For late cabbage start the plants in the open the 1st of May in most sections and set out in the permanent row when the plants are 4 to 6 inches high. Many plant the seed in hills 10 to 12 seeds to the hill where the crop is to grow and thin to one when 3 or 4 inches high. This avoids transplanting. Continue hoeing and cultivating until the heads begin to form.

To destroy the worms, road dust or any fine dust sprinkled over the plant is effective, or spray with soap emulsion or kerosene emulsion. To store for winter use pull the cabbage and set in trenches with the heads down, covering with earth and protecting from rain. The roots should not be entirely covered until cool weather, to prevent heating. Do not trench the cabbage until just before cold weather.

I tested eighty-five varieties of cabbage and among others several new strains of which I purchased all the available seed of two sorts, which I list as the "D. V. B." Cabbage and Burrell's Victor Cabbage. These two are great additions to the list, and every grower should plant them.

If you use 100 to 1,000 pounds or more seed per year, write for my special offer on growing contracts. I produce thousands of pounds of seeds under contract for large planters at as low prices as good seeds can be grown.

The sorts which I list I know to be of the best.

One oz. of seed for 2,000 plants; $\frac{1}{2}$ lb. of seed per acre.

Burrell's Large Charleston Wakefield Cabbage

This fine, large early cabbage is but a few days later than the very earliest small sorts, is a very strong, thrifty grower, but little bothered by insects. The heads weigh from 6 to 10 pounds, sometimes more; are very solid and profitable for the early market. My seed is grown in a section where there is nothing to be desired to permit the growing of the finest cabbage seed. You cannot buy better seed at any price. Price—5c and 10c per pkt.; 35c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.75 per lb.; 10 lbs. lots, \$4.50 per lb.; prepaid.

If you plant from 100 to 1,000 pounds and up of this variety, as some of my customers do, write for my contract offer to grow this seed for you.

Early Jersey Wakefield Cabbage

Earlier than Charleston and smaller heads, more pointed. Extensively grown in the South. I supply large quantities of this to Southern growers, but not so much as of Charleston Wakefield. Price—5c and 10c per pkt.; 35c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.75 per lb.; \$4.50 per lb in 10 lb. lots and up; prepaid.

The D. V. B. Cabbage

Another year has proven the great value of this Extra Early, Round, Solid-headed Cabbage. Is reported by large numbers of my customers to be the finest Extra Early Cabbage they ever saw.

The supply of the seed is very short and every market grower as well as every home gardener who receives my catalog should plant some.

You know an ounce of cabbage seed will make 2,000 to 3,000 plants, and as 4 ounces will, if carefully grown, produce plants for 1 acre—\$4 worth of this seed may bring you several hundred dollars from your crop before your competitor gets on the market.

It is earlier than Jersey Wakefield; produces 4 to 6-pound round solid heads which are just the right size to sell well. Be sure to order some of this. Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; 55c per $\frac{1}{2}$ oz.; \$1 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$14 per lb.; postpaid.

Burrell's Victor Cabbage

This second early cabbage, which is as early as early spring and produces large, round, solid heads, often weighing 15 to 20 pounds, and suitable to use when weighing 5 to 6 pounds, has no superior for quality or tonnage of yield per acre.

I offered to all market gardeners who were readers of Market Growers' Journal an ounce each of seed with the understanding that they were to plant the seed, grow the crop and if they found it the finest second early cabbage they ever grew, they were to send me \$1.00 per ounce after harvest. If they did not consider it such, they were to send me only what they thought it worth; and if they didn't think it worth anything they were to send me nothing but were to tell me why.

Here are some extracts from a few letters:

Mr. Snalls Tibbs, Lancaster, Ohio, says: "Your cabbage is all right; it can't be beat for solid heads."

Mr. F. E. Daggett, Topsham, Maine, says: "I must say it was well worth the price compared with other varieties planted alongside and this I assure you was a pleasant surprise to me for I thought I was growing some of the most profitable early and second early varieties to be had."

Mr. Roland C. Dennis, Martin's Ferry, Ohio, says: "I want to say that I believe it is the best cabbage ever introduced into the neighborhood, both in flavor, especially in sweetness, and solidity. I set it with four other so-called good cabbages and it was far ahead of them; also I believe it is a good resister of drouth, as the season was very dry in this section."

Mr. I. R. Waggoner, Marion, Indiana, says: "Cabbage were extra fine. Solid Fifty Dollars' worth from two rows thirty rods long. Please book me one-half pound of seed for next season."

I want all of my customers to plant some of this seed.

Price—10c per pkt.; 25c per $\frac{1}{4}$ oz.; 45c per $\frac{1}{2}$ oz.; 80c per oz.; \$3 per $\frac{1}{4}$ lb.; \$11 per lb.; 10-lb. lots, \$10 per lb.; postpaid.

CABBAGE—Continued

Two very
Valuable
Sorts

New Early Cabbage, Copenhagen Market

This new cabbage is of very great merit, being as early as Charleston Wakefield and having the round, solid head of the Danish Ballhead. Every cabbage grower should plant some of it. This may prove to be the variety that will be a big money maker for you. The introducer says: "It is undoubtedly without a rival as the finest large round-headed early cabbage in cultivation."

The heads average 8 to 10 pounds each, very solid, with small core and very fine quality. The plant is short-stemmed, the heads being produced very near the ground level. The leaves are closely folded and few outer leaves. The plants may be set closer than ordinary cabbage will permit.

After a thorough trial I recommend this sort either for home or market garden. The supply of this seed is very short.

Price—10c per pkt.; 15c per $\frac{1}{4}$ oz.; 50c per oz.; \$3 per $\frac{1}{2}$ lb.; \$5.50 per lb.; postpaid.

Enkhuizen Glory Cabbage

This new sort originated near the shores of Zuyder Zee in Holland. I offer seed grown by the originator.

It is **large, early, white, solid, new.** The originators have this to say: "Amongst many sorts of white cabbage, none of them combines these two desirable qualities of being **early** and **large** so well as the aforesaid sort. We can recommend this as a really early one (coming as early as the Early Dutch Flat), but at the same time making fine, large, ball-shaped heads, particularly attractive for market purposes."

"The plants are somewhat pale green, and in proportion to the whole, making very little outside leaves and fine large form, thin ribbed, hard heads."

"For the market one of the very best sorts."

This leaves little to be added except that I have thoroughly tested the variety and can recommend it as being a very fine sort, worthy your confidence. Do not hesitate to plant it extensively if you desire such a cabbage as is described above.

Price—5c and 10c per pkt.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$2.75 per $\frac{1}{2}$ lb.; \$5 per lb.; prepaid.

Order early. These prices only hold good as long as my present supply lasts. I cannot buy now from those who grew this seed of above sorts on account of the war.

CABBAGE—Continued

Burrell's Excelsior Flat Dutch Cabbage

This large, late variety is entitled to the name Excelsior. Practically every plant produces a fine head shaped like the illustration and weighing 15 to 20 pounds under favorable conditions. The good report comes in from large numbers of my customers and the increasing number of orders has made it necessary for me to push it much more extensively. I often sell ten to twenty pounds of seed to one large grower. You will find this an excellent late sort and a good keeper. The heads are solid, stem short and quality extra.

This variety is earlier than Premium Late Flat Dutch and much superior to it.

Price—5c and 10c per pkt.; 30c per oz.: \$1.15 per ¼ lb.; \$4.50 per lb.; prepaid.

Fottler's Brunswick Short-Stemmed Cabbage

THIS IS A GREAT SAUERKRAUT CABBAGE

Under ordinary conditions it will produce nearly double the crop of the average varieties. It is a very sure header and the heads average about 15 pounds.

In season it is very little later than the early pointed head sorts, but the time of maturity can be controlled by the time of starting the plants.

The stem is short and rather thick, as it is a heavy feeder; a strong grower. The cut from a photograph indicates this. Note the root system. The quality is good. Heads hard and heavy for their size.

My seed is very dependable. The plants from which it was grown were carefully selected to type.

I recommend it for your home garden and especially to those who grow for a kraut factory. A yield of 30 to 50 tons per acre is obtainable under favorable conditions.

Price—5c and 10c per pkt.; 30c per oz.: \$1.15 per ¼ lb.; \$4.50 per lb.; prepaid.

SWEDISH MARKET

FINEST DENMARK GROWN

One of the finest flat head sorts in cultivation. The main crop sort for market gardeners. The price is necessarily high. The quality is also very high and considering the crop, the cost of this seed is an extremely small item. One pound of the seed will furnish plants for four acres under fair conditions. This seed was grown for me by one of the most critical Danish growers, and no pains in selection of heads or cultivation and harvesting of the stock was spared to have it the best possible quality. The heads average 6 to 8 pounds, very solid and especially suited for late keeping. I recommend it heartily. Do not fail to include some of this seed in your order.

Price—5c and 10c per pkt.; 30c per oz.; \$1.15 per ¼ lb.; \$4.50 per lb.; prepaid.

WINNIGSTADT. One of the best of the second early sorts, very hardy and sure heading. Owing to its compact and upright habit of growth and peculiar texture of its short, thick, rich dark green leaves, the variety seems to suffer less from the cabbage worm than most other sorts. Head of medium size, sharply pointed, very hard and of excellent quality. Leaves covered with bluish white bloom. Keeps well both summer and winter. It is the hardiest, not only as regards frost, but will suffer less from excessive wet, drought, insects or disease than any other second early sort. Price—5c and 10c per pkt.; 30c per oz.; \$1.10 per ¼ lb.; \$4 per lb.; prepaid.

PERFECTION DRUMHEAD SAVOY. Size of the Drumhead, curled leaves of the Savoy. Market gardeners usually find it profitable to provide a limited quantity for discriminating customers. Price—5c and 10c per pkt.; 30c per oz.; \$1.15 per ¼ lb.; \$4.50 per lb.; prepaid.

PRICE OF PACKETS. For the convenience of all I offer 5c and 10c packets. The 5c packets contain sufficient for many small gardens, while the 10c packets are for others who plant larger gardens. I try to have all seeds "As good as grow for you to sow."

CABBAGE—Continued

Special Early Flat Dutch Cabbage

Our seed of this variety is giving such results that the demand is growing very rapidly, and to meet it and still more largely increase it, we have increased our supply and are able to make very attractive prices. The heads weigh 8 to 10 pounds, are very even in size, solid and of good flavor.

This is one of the best second early and stands a long time without bursting.

The plant is short-stemmed, the heads are very solid and uniform in size and shape, slightly flattened; matures as a second early sort. This sort is planted very extensively in the South.

Price—5c and 10c per pkt.; 35c per oz.; \$1.20 per $\frac{1}{4}$ lb.; \$4.60 per lb.; prepaid.

Early All-Head or Faultless

This is an excellent sort, producing a good, solid head weighing 6 to 8 pounds from practically every plant, under fair conditions. It is among the earliest sorts and is a very profitable sort to grow. The outer leaves are few and close planting can be made, as close as 18 inches in the rows and rows 2 feet apart.

Price—5c and 10c per pkt.; 30c per oz.; \$1.15 per $\frac{1}{4}$ lb.; \$4.50 per lb.; prepaid

EARLY SPRING. The earliest Flat Head variety. The heads have few outside leaves and these are small and grow so close to the head that they can be planted very close together. It is round in shape, slightly flattened and very solid, even before the cabbage attain their mature size.

Price—5c and 10c per pkt.; 30c per oz.; \$1.15 per $\frac{1}{4}$ lb.; \$4.50 per lb.; prepaid

EARLY SUMMER. My seed of this variety was selected from large, solid, evenly-sized heads of excellent quality, and is of known value. This is a special market gardener's strain. It is not as well known for home gardens and not as much planted as it should be.

Price—5c and 10c per pkt.; 30c per oz.; \$1.15 per $\frac{1}{4}$ lb.; \$4.50 per lb.; prepaid

Cabbage—Continued

Order your cabbage seed Early — The supply is very short

Extra Fine All-Seasons Cabbage

Plant it early for a second early and late for a late sort, or your early planting will be suitable to use when the heads weigh 6 or 8 pounds and continue first-class until they weigh 12 to 15 pounds. Then they stand a long time without bursting when many other sorts would burst open and spoil. It may well be called All-Seasons. The heads are large and solid, round and flattened on top. Are ready to market as soon as the early flat sorts.

My experience with this sort is so favorable that I cannot fail to list it among the sorts I wish most to recommend. Price—5c and 10c per pkt.; 35c per oz.; \$1.20 per $\frac{1}{4}$ lb.; \$4.60 per lb., prepaid.

Improved Succession

A sure heading, long-keeping variety about 10 days later than the well-known Early Summer, with larger and heavier heads. Price—5c and 10c per pkt.; 35c per oz.; \$1.20 per $\frac{1}{4}$ lb.; \$4.60 per lb., postpaid.

Burrell's Selected Surehead Cabbage

This excellent cabbage has been grown many years by thousands of successful gardeners with uniformly good results. Close, careful selection has kept it one of the best. The heads weigh about 12 pounds, are quite uniform in size, hard and of excellent quality, a good shipper. I recommend it either for your home garden or if you plant extensively for market. Price—5c and 10c per pkt.; 35c per oz.; \$1.20 per $\frac{1}{4}$ lb.; \$4.60 per lb., postpaid.

Premium Late Flat Dutch Cabbage

This standard sort is well known and our sales always run high. The heads are large, flat and of good quality. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.75 per lb., postpaid.

ST. LOUIS LATE MARKET. This is a favorite sort among market gardeners around St. Louis. It is very solid and produces heads weighing from 15 to 18 pounds; is a sure keeper and the quality extra. Price—5c and 10c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb., postpaid.

Be sure to include in your order at least a trial of the following: Cabbage—D. V. B. and Burrell's Victor, Page 11—these are two of the finest sorts, also include Burrell's Earliest of All Cucumber, the New Burrell Lettuce, Salmon tint Pollock No. 25 Cantaloupe, Burrell's Improved Kleckley Sweet Watermelon and Burrell's Special Early Jewel Tomatoes.

CABBAGE—Continued

SHORT STEMMED DANISH ROUND HEAD

FINEST DENMARK GROWN

Very hardy, handsome, very solid, of fine quality and as one of the very best keepers it is particularly desirable for distant markets or for late spring use. The plant is vigorous, compact growing, with shorter stem than most American sorts and exceedingly hardy in resisting cold and dry weather. The leaves are few but rather large, thick, smooth, bluish-green covered with whitish bloom. The head is medium-sized, round, very solid and stands shipment better than any other late sort.

This is of the finest possible selection, grown especially for me in Denmark. It is impossible to buy better seed of this strain; quality is always the first item to consider. This is an excellent market sort. I am not striving to be able to offer my customers low-priced seeds regardless of quality, but first to offer the best possible quality and then make the price as low as I can and have sufficient pay for the most critical care and selection. I want orders from those who want the best seed money will buy at a fair price.

Large planters will find this variety excellent for late planting and a money-maker. The weight of the heads of this sort trimmed is much more for the same size than the American sorts. (Flat Dutch, etc.). Price—5c and 10c per pkt.; 40c per oz.; \$1.50 per ¼ lb.; \$5.75 per lb., postpaid.

On account of the war none of this seed can now be obtained from Denmark and my supply is only a few hundred pounds. Order early to avoid disappointment in not being able to get it.

Middle Stem Danish Ballhead or Hollander

This variety is similar to above, except the stem is longer. (See cut). It is one of the finest sorts for winter, either for the home garden or for the market. This also is grown from very carefully selected heads especially for me by one of the most critical growers in Denmark. Price—5c and 10c per pkt.; 40c per oz.; \$1.50 per ¼ lb.; \$5.75 per lb., prepaid.

Danish Stonehead Red

A very valuable sort, similar to above in shape. Very solid and an excellent keeper. Many prefer this cabbage. I recommend it. Price—5c and 10c per pkt.; 40c per oz.; \$1.50 per ¼ lb.; \$5.75 per lb., postpaid.

CAULIFLOWER

Cauliflower, although one of the most delicious vegetables, is but little grown except by professional gardeners because of the erroneous notion that it is so difficult to grow that only skilled gardeners can produce it. Any one will be reasonably sure of success with this most desirable vegetable if the cultural directions given below are carefully followed.

For spring and early summer crop, sow in March or early in April in hot bed and transplant to cold frame when sufficiently large to handle. As soon as danger of hard freezing is over set in the open ground in rows $2\frac{1}{2}$ feet apart and 18 inches apart in the row. The plants will endure a light frost. The soil for cauliflower should be like that for cabbage, but it is better if made richer than is ordinarily used for that crop. Plenty of good manure must be well incorporated with the soil and the latter be brought into the highest state of tilth. No application, however, can be more necessary or more useful than that of cultivator and hoe. For late crop, sow at same time as for late cabbage and treat in the same manner. It should be borne in mind that cauliflower will not head up well in hot, dry weather and hence the sowings need to be so timed as to bring the heads to maturity either before the hot summer weather sets in or not until the cooler weather of the fall. If it receive at this time a liberal supply of water, the size and quality of the heads will be greatly improved. After the head begins to form, draw the leaves over and tie them together to protect it from the sun and to keep it white.

Each time you go over and tie the heads as above it is a good plan to use a different colored string. Calico strips are usually used. This will help you when cutting the heads to know which are ready.

The heads should be cut for use while the "curd" is compact and hard, as they soon become much impaired in quality and appearance after they open and separate into branches. Of the enemies of the crop, none is more formidable than the cabbage root maggot. This seems to have a special liking for the cauliflower. Probably the best and most surely effective protective measure is enveloping each plant with a tight fitting collar of tarred felt. Plant lice are also serious pests of this crop. Effective remedies are dusting with fine tobacco dust, or spraying with strong tobacco tea or kerosene emulsion.

All the cauliflower seed we offer is produced by the most experienced growers in Europe, in such localities as are best suited to its proper development, and the greatest care is taken to save seed from perfectly developed plants only.

Burrell's Extra Select Early Snowball Cauliflower

This variety is the highest attainment in the development of the cauliflower. This seed is grown for me by an expert specialist in Denmark. Every care is taken to have the seed right. The heads are selected for a close, white curd, solid and uniform.

The cultivation is done in the most thorough manner and the seed is then selected from the single plants which continue to show the highest development. The seed is then graded and I receive only the largest, best developed seeds. This special pains is of great value to my customers, as in this crop so much depends upon the quality of the seed. This sort is remarkable for its extreme earliness, sureness to produce fine, solid heads with a close, white curd. The leaves are produced in sufficient quantity to tie nicely over the head, while the curd is small and permit them to blanch very white. The heads are round and thick, often weighing 6 to 10 pounds before the curd begins to separate. No better strain can be produced. Market growers especially can plant this seed and be assured that it is the seed which will give them the best possible results.

Considering the extreme care taken and the crop results, the price is right. Price—10c per pkt.; 35c per $\frac{1}{8}$ oz.; 65c per $\frac{1}{4}$ oz.; \$1.25 per $\frac{1}{2}$ oz.; \$2.25 per oz.; \$7.00 per $\frac{1}{4}$ lb.; \$25.00 per lb., postpaid.

Cauliflower—Continued

Henderson's Early Snowball Cauliflower

Its dwarf habit and short outer leaves allow it to be planted as close as 18 to 20 inches apart each way. Very valuable for market gardeners. My stock is as fine as possible to secure. Price—10c per pkt.; 35c per $\frac{1}{8}$ oz.; 65c per $\frac{1}{4}$ oz.; \$1.25 per $\frac{1}{2}$ oz.; \$2.25 per oz.; \$7.00 per $\frac{1}{4}$ lb.; \$25.00 per lb., postpaid.

Select Early Dwarf Erfurt Cauliflower

Of dwarf habit, close, compact growth, a sure header, curd close and white; very reliable. Price—10c per pkt.; 45c per $\frac{1}{4}$ oz.; \$1.60 per oz.; \$5.50 per $\frac{1}{4}$ lb.; \$20.00 per lb., postpaid.

Early Short Stemmed Danish Giant Cauliflower

This is an early sort, a sure header and one of the best produced. While not quite so early as Burrell's Extra Select Early Snowball, it is equal in quality, and no matter how critical your trade or how much you have been able to do in producing cauliflower, you can expect to equal your best record with this seed, except as stated as to earliness. Price—10c per pkt.; 35c per $\frac{1}{8}$ oz.; 65c per $\frac{1}{4}$ oz.; \$1.25 per $\frac{1}{2}$ oz.; \$2.25 per oz.; \$7.00 per $\frac{1}{4}$ lb.; \$25.00 per lb., postpaid.

As to Prices: I handle only the finest Danish-grown cauliflower seed obtainable. I have a fair supply on hands of good germination and vitality. You will be well pleased with this seed.

CELERY

Celery Culture. Celery can be successfully grown with but little labor, in a good garden soil, by using plenty of well-rotted manure. This should be put into the trenches, working it well into the soil, at least two weeks before the plants are transplanted into them. It delights, however, in low, moist, rich bottom land, or well drained muck soil.

Growing the Plants. It is not necessary to sow the seeds in a hot bed or cold frame, as it is apt to run to seed if started too soon, but sow in the open ground as soon as it is fit to work in April, and an additional sowing or two between this date and May 1st, will insure a plentiful supply of good plants. Sow in rows so that it can be kept free from weeds. Prepare the soil well and cover the seed very shallow and firm the soil well after sowing; also keep very moist until the seed germinates. After coming up the plants should be partially shaded for a week or ten days, and see that the soil does not get too dry. To insure good "stocky" plants, the tops should be cut back, to say within 2 inches of the crown when about 4 inches high.

Transplanting. The evening is the best time, and especially if after a shower; otherwise give them a good watering and you will lose but very few plants. Remember that it is essential that the soil be pressed firmly about each plant when set out, especially if done in a dry time. Some of our most successful growers set on the level surface, while others prefer a broad shallow trench, only 3 or 4 inches deep. These trenches should be at least 3 feet apart for the dwarf and not less than 4 feet for the larger sorts; set plants in single rows not over 6 inches apart in the trench. Transplanting is done about the middle of June for the first early, and as late as the middle of August for the latest. Keep well cultivated, and in about six weeks "handling" should begin (never do this when wet from rain or dew). This is done to make the celery grow upright. The soil is drawn to the row from each side with an ordinary hoe. Now take all the leaves of the plant in one hand and with the other draw the soil around it, pressing firmly, being careful that no soil gets between the leaves, as it is apt to cause rust, or rot the plant. In about two weeks, or as often as is necessary to keep the leaves in an upright position, more soil should be drawn to the row.

To store celery for winter, dig a trench about 12 inches wide and as deep as the celery is high. Stand the celery in this close together, packing it between two boards set about 6 inches apart. Then gradually lift the boards and pack in on each side with fine earth, making air tight, so as to keep from freezing. When freezing weather sets in cover with a board next to the top, then straw, and when hard-freezing weather cover this with earth. Covered in this way celery is ready for use in six weeks to two months after storing.

One ounce of seed produces about 2,000 plants.

Golden Self Blanching Paris Golden

For several years the French crops of this seed have been very short and it has been almost impossible to get dependable seed.

I have had this grown in the most favorable part of the United States after the most approved methods; all green or hollow stalks being carefully culled out and have to recommend what I believe to be of the best possible American production of this seed. The stalks are a beautiful creamy yellow. The heart is large, solid, crisp and brittle. Price—10c per pkt.; 40c per ½ oz.; 75c per oz.; \$5.00 per ½ lb.; \$9.50 per lb., postpaid.

FRENCH GROWN GOLDEN SELF-BLANCHING

The best I can secure from the leading French growers. Price—10c per pkt.; 75c per ½ oz.; \$1.35 per oz.; \$5.25 per ¼ lb.; \$20.00 per lb., postpaid.

Selected White Plume Celery

This is the earliest sort and most easily blanched. The plant is a rapid grower and should be tied loosely together as soon as 5 or 6 inches high and earthed up to push the growth and blanching, also to insure close, attractively shaped branches.

My seed is of extra quality and always gives good results.

Price—5c and 10c per pkt.; 25c per oz.; 80c per ¼ lb.; \$3.00 per lb., postpaid.

Snowwhite Celery

VERY POPULAR EXTRA EARLY.

I have already received a large number of orders for this seed, stating they wanted the same class of seed as gotten last year.

The Snowwhite Celery was introduced seven years ago and has won a favorable place as one of the finest sorts. The stalks are perfectly white, of good size and very attractive in appearance. The plants grow vigorously, are easily blanched, and the rich, nutty flavor, crispness and general high quality are to be prized. The stalks often weigh, when trimmed, from 1½ to 2 pounds. It keeps well and grows on any soil that will produce any other variety of celery. **Price—10c per pkt.; 40c per oz.; \$1.40 per ¼ lb.; \$5.00 per lb.; \$4.75 per lb. in 5-lb. lots and up, postpaid.**

Giant Pascal Celery

This is one of the most popular varieties for winter use. It is a very good keeper and properly stored can be kept until late in the winter or even until spring.

Giant Pascal is of vigorous growth, making large, heavy, thick stalks which remain green until blanched by some artificial means, either by earthing or storing for the winter.

It blanches to a creamy yellow when the stalks are quite brittle, entirely stringless and very crisp.

I have sold large lots of this seed to market growers, who report excellent results.

Price—10c per pkt.; 30c per oz.; 75c per ¼ lb.; \$2.50 per lb.; \$2.25 per lb. in 5-lb. lots and up, postpaid.

GOLDEN HEART OR GOLDEN DWARF. An excellent standard sort, solid, a good keeper and of a fine nutty flavor. A late variety; one of the best for market gardeners. **Price—5c per pkt.; 15c per oz.; 50c per ¼ lb.; \$1.75 per lb.; \$1.60 per lb. in 5-lb. lots and up, postpaid.**

Tomato Seed

When you turn to the pages where I list tomato seed do not overlook my Special Early Jewel Tomato. If I had but one variety to list and was given my choice it would be this Special Early Jewel. Grow a good garden.

CUCUMBERS

This special item has had my careful study covering the past twenty years, during which time I have grown many thousand acres of cucumbers for seed, producing many hundred thousand pounds of seed.

I come to you for your orders for this seed, knowing what I have to offer is of the best produced.

I started the growing of cucumber seed here, and the results from my seed have been such that a very large portion of the cucumber seed of the United States is now grown here.

Each year I exercise great care to produce such seeds as will keep up this reputation. This requires carefully selected stock seeds: Soil which has not the year previous produced cucumbers, so that volunteers may be avoided; isolation from fields of other varieties; careful attention during the growing season that all off plants be destroyed; skill in harvesting, threshing, washing, curing, cleaning and testing the seed, that the best possible vitality and germination may be procured.

My constant attention to these points is your assurance that the seed which I offer is worthy your confidence. No order too small and large orders of from 1,000 to 10,000 pounds very frequently received. All orders given my very best attention.

Culture.—Cucumbers thrive best in a very rich, loamy soil, not containing too much sand. A rather heavy soil is preferable to sandy soil. The most successful growers fertilize heavily with barnyard manure, scattered evenly over the surface 2 or 3 inches deep, disced thoroughly, then plowed under to a depth of 6 to 8 inches, then thoroughly harrowed and floated. This gives an excellent seed bed.

You can now plant with your garden drill rows 4 feet apart, drilling in about 3 pounds of seed per acre, covering the seed about 1 inch in depth. You can follow the drill mark and cultivate before the plants come up. Cultivate often. When the plants have four to six leaves thin to one plant every 18 inches. Keep the cultivator going as long as you can get through the rows. If under irrigation, water once a week lightly and always cultivate between irrigations until the crop is laid by. Keep the cucumbers picked off as fast as they reach the size desired, as if any are allowed to ripen the plants cease to set on more fruit.

If bothered by the striped cucumber beetle, dust lightly with wood ashes into which a small amount of turpentine has been added, or well-slaked lime mixed with fine dust and a small amount of turpentine.

Be careful not to put too much lime or ashes on the plants, as this will injure them. Keep them growing rapidly and insects have less chance to damage them.

In picking to ship for slicing it is a good plan to divide the field into thirds and pick one-third each day. If under irrigation, lay off the lands in short rows and run the water along the rows very lightly after each picking.

Always cut off the cucumbers and handle very carefully. Do not ship any culls. Throw them away and ship only the first-class specimens. They look so much better the demand is kept up—the consumer is willing to pay a better price. There is less express and package expense and your reputation for a first-class pack is kept up to the advantage of your bank account.

When the market is high many are tempted to ship seconds. Don't do it; keep the market up with quality.

I want to call your especial attention to Burrell's Earliest of All Cucumber and Burrell's Klondike Cucumber. These two sorts are now more extensively planted by critical market growers than any other. They have been the means of a profitable business for thousands of growers. Some report from \$300 to \$1,200 per acre.

Burrell's Earliest of All Cucumber

This cucumber has proven the biggest money-maker ever planted by Florida growers, and the demand for the seed is growing very rapidly. This is a **perfected type of White Spine**. Earlier than any other strain of White Spine and as well colored as any cucumber grown.

The fruits when suitable to slice are 6 to 7 inches long, very dark green with pale green stripes about one-third the length from the blossom end; straight, square-ended and of the very finest quality.

It is a strong grower. The new blood gives it much more vigor than most old varieties have and it sets fruits in great abundance.

For pickling it produces fruits which when suitable for bottle goods are straight, square-ended and very firm. One of the large pickling companies writes me that they find it the best sort they have ever grown for this purpose and back it up with a large order for seed. The specimens shown above give you the type.

CAREFUL PLANTERS have tested this sort thoroughly in check plantings with the best of other varieties, and the results have proven this sort the most profitable to grow.

Burrell's Earliest of All Cucumber

Best for Florida Market Growers

At Williston, Florida, this sort is reported to be the most profitable the growers have planted. Planted in check test with four other leading sorts, it far outclassed them all, being earlier, darker green, and bringing more money.

My sales amount to more than **twenty thousand pounds a year**. I have bred this up by seventeen years of careful selection to an ideal type. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Post or express paid.

Early Fortune Cucumber

This sort is very much like my Klondike Cucumber listed next page. The cucumber is a favorite in many sections, especially in the New Orleans growing section. It is a dark green type of white spine. Very productive and an excellent slicing sort. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Post or express paid.

On orders for cucumber seed amounting to \$50.00, I allow 10 per cent discount and on orders amounting to \$500.00, an additional discount of 10 per cent.

CUCUMBERS

Continued

Burrell's Klondike Cucumber

This is one of my special items of my own introduction. It is a pleasure to be able to state that it has through merit and without extensive advertising worked into the favor of market growers until it is now one of the leaders. It is without an equal for outdoor growing for slicing, producing specimens equal to the finest hot house products under favorable conditions. It is a very hardy grower. Early, yields abundantly and withstands unfavorable weather conditions, even when most sorts fail. When ready to ship the shape averages as in cut; color dark green with pale green stripes from the blossom end about one-third the length; flesh white and crisp, of excellent flavor; length about 7 to 8 inches. No sort produces more uniform fruits. Many single customers purchase from 100 to 500 pounds, and some more. Large lots in 1-pound sealed cloth bags. Price —5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.10 per lb. \$1.00 per lb. in 10-lb. lots. Post or express postpaid.

Davis Perfect Cucumber Burrell's Special Stock

This very valuable new sort was introduced in 1906 and I immediately secured from the introducer a considerable quantity of the seed. This I carefully planted and from the crop I selected the finest specimens for stock seed. I have kept up this selection each year and this year I grew a large acreage and am pleased to say I have seed of this valuable sort to offer my customers at prices which surely merit your orders when you consider it is one of the best possible to secure. The cucumbers shown in the photo below are Davis Perfect. This cucumber is exactly the same color as Burrell's

Klondike, being dark green. Length about 10 inches when suitable to ship, and size quite uniform. It is an excellent sort either for hot house or outdoor culture.

Grown out of doors the color resembles hot house grown stock and it sells well in competition with them. Price — 5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Post or express pre-paid.

10 per cent discount on orders for Cucumber Seed amounting to \$ 50.00.
20 per cent discount on orders for Cucumber Seed amounting to \$500.00.

Improved Long Green Cucumber

My stock of this sort is very fine. The long, dark green cucumbers when suitable for slicing are 10 to 12 inches long, crisp and of the finest quality. This is a very heavy yielder and not to be compared with the ordinary Long Green as it is a great improvement on that sort.

The matured fruits are often 15 to 18 inches long. This is a heavy yielder and for those growers whose market calls for an extra long sort it will prove very profitable. Price—5c per pkt.; 10c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.40 per lb.; \$1.30 per lb. in 10-lb. lots. Post or express prepaid.

Buist's Perfection White Spine Cucumber

This stock is my own growing from the introducer's stock and as it is grown under our ideal soil and climatic conditions, you are sure of as fine stock as it is possible to get of this well-known strain. Thousands of pounds of this seed are planted each year by Southern planters.

In shape and size it is between Burrell's Klondike and Burrell's Earliest of All. I have grown a fine crop this year and offer you a special opportunity. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Post or express prepaid.

BURRELL'S SPECIAL DARK GREEN ARLINGTON. This long, dark green, selection of the Arlington White Spine is a favorite with market growers in many sections. They produce an abundant crop, look well in market, and hold their attractive appearance a long time. I have prepared for a large demand and have nearly twenty thousand pounds of this seed which I grew this year. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.50 per lb.; \$1.40 per lb. in 10-lb. lots. Prepaid.

COOL AND CRISP. A strain of the White Spine, but larger and more cylindrical. Very early and exceedingly prolific. While it is esteemed most highly as a pickling sort, it is one of the very best for slicing, being tender, crisp and of fine flavor. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Prepaid.

EXTRA EARLY WHITE SPINE. This type is about midway between my Klondike and Earliest of All; the quality is excellent. Very good for small pickles, dill pickles or slicing. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 85c per lb. in 10-lb. lot. Prepaid.

CUMBERLAND. The New Cumberland combines prolificacy and vigorous growth with beauty and uniformity. It is of the hardy, white spine type, a rapid and vigorous grower, and very prolific in fruit. The pickles differ from all other hardy sorts in being thickly set with fine spines over almost the entire surface. During the whole period of growth from the time they first set until fully grown, the form is exceptionally straight and symmetrical, thus being as choice for slicing as for pickles. The flesh is firm, very crisp and tender at all stages. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Post or express prepaid.

See bottom of preceding page for special discount on larger orders.

Improved Long Green Cucumber

CUCUMBERS—Continued

Westerfield's Chicago Pickle

My stock of this variety illustrated below is very fine. The fruits are shaped as shown in cut. Medium length, with large, prominent spines. Color a deep green, very prolific and excellent for pickles either for short bottle pickles or dill pickles.

This variety is planted very extensively for the above purposes by large pickling concerns. Note the special prices on 100-pound lots. If you plant larger quantities, write for special wholesale prices. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Prepaid.

Early Short Green

This variety is also known as Early Frame. It is very early; the fruits are square-ended, uniform in shape, very firm, crisp and tender. Used very extensively for pickling, either for short bottle pickles or for dill pickles.

It yields a heavy crop, the fruits being set at practically every joint on the vine. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Prepaid.

Boston Pickling

Another excellent pickler; a favorite with pickle growers. I often sell 2,000 to 3,000 pounds at a time to large picklers. Very productive fruits, small, shaped like Chicago Pickle, but with less prominent spines. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up, post or express paid.

Snow's Pickling

This early, square-ended sort is one of the finest varieties for pickles and many of the largest picklers use this seed exclusively. It is a selection from Chicago Pickle, which is a little shorter and more nearly square-ended.

My stock is carefully grown from the best of stock seeds, and is such as will please the most critical trade. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots, prepaid.

Early Cluster

Vines vigorous, producing the bulk of the crop near the roots in clusters. Fruits thick, square-ended and uniform. A very productive and valuable sort for pickles. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up. Post or express paid.

Early Siberian

One of the earliest sorts grown; only 3 or 4 inches long when fully ripe. Excellent for bottle pickles. Produced in clusters of two and three at practically every joint on the vine; very solid and crisp. Very few seeds. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up. Post or express paid.

Japanese Climbing

Produces long, evenly shaped, crisp, tender fruits in great abundance. The vine has a greater tendency than others to fasten itself to any objects over which it may grow, hence its name. In the small garden where space is limited it may be trained on trellises to good advantage. Fine either for slicing or pickles. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots and up. Post or express paid.

Gherkin

Not cucumber proper, but a little, rough, prickly fruit that grows on a pretty vine with leaves something like a watermelon vine; well liked for pickling. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb. Post or express paid.

See discount on large orders for Cucumber Seed, bottom page 22.

SWEET CORN

The crop of Sweet Corn for seed this year is very short. Order early so you will not be disappointed

Country Gentleman

This variety produces long shoe peg kernels without rows. It is the sweetest of the sweet corns and no finer roasting ear is grown.

Having no rows, it is an excellent sort to grow where worms bother the ears, as instead of following a row into the center of the ear, thus spoiling it, they have no row to follow, and instead work around the end of the ear, which can be cut off, leaving the balance of the ear suitable for use. Price, postpaid—10c pkt.; 60c per lb.; 55c per lb. in 10-lb. lots. Prepaid.

Golden Bantam

This extra early sweet corn is one of the finest varieties grown. The quality is unsurpassed, and it is so hardy that it may be planted several days earlier than other sorts. The ears are six to seven inches long and borne three or four to a stalk. I recommend this sort very highly. Price—10c pkt.; 50c per lb.; 45c per lb. in 10-lb. lots. Prepaid.

Peep o' Day

This very early sort, five to ten days earlier than any other sort, is of great value to market gardeners who make

most of their money by being the first in the market. In addition to its earliness, it is sweet and tender when cooked. It is distinct in habits of growth and appearance. Stalks grow about 4 feet high and the ears about 5 inches long, are well formed and filled out to the tips. Price—10c pkt.; 50c per lb.; 45c per lb. in 10-lb. lots. Prepaid.

Early Minnesota

An early large eared sort of excellent quality. The kernels are broad and deep. Price—10c per pkt.; 50c per lb.; 45c per lb. in 10-lb. lots. Prepaid.

Nothing can take the place of Roasting Ears in their season and don't fail to **CAN A LOT OF SWEET CORN.**

Burrell's Select Stowell's Evergreen Sweet Corn

This is the leading standard variety for home use, market and canning. My stock is most carefully selected and can be depended upon to produce fine, large ears of superior quality. The stalks are of strong growth, each producing two large ears. The grains, while of good size, are long and slender, the cob being small. The grains are of rich, sugary flavor and retain their fine quality until quite advanced. My stock is entirely free from glaze or flintness; the dried grains are much shriveled. Price—10c per pkt.; 50c per lb.; 45c per lb. in 10-lb. lots. Prepaid.

Extra Early Adams

This is not a Sugar Corn, but is earlier. The ears are short, twelve-rowed, and while in condition for roasting cannot be told from Sugar Corn. It will stand earlier planting than Sweet Corn and is a favorite wherever worms work badly on early corn. Price—10c per pkt.; 35c per lb.; 30c per lb. in 10-lb. lots. Prepaid.

White Australian

This is one of the most valuable sorts to grow where the nights are too cool for Sweet Corn or where worms bother the corn. The ears are long, 8 to 12 inches, nearly all eight-rowed. The kernels are broad and white. While tender, it makes excellent roasting ears. If Sweet Corn does not do well for you, do not fail to try this sort. Price—10c per pkt.; 30c per lb.; 25c per lb. in 10-lb. lots. Prepaid.

Black Mexican

This is a very valuable sort for either early or late planting. In quality it is not excelled. Color when in roasting ear purple and white. This variety succeeds well in the Southwest especially. The ears are 6 to 8 inches long and eight-rowed. The kernels are broad and of finest flavor. Price—10c per pkt.; 50c per lb.; 45c per lb. in 10-lb. lots. Prepaid.

Pop Corn

Queen's Golden

This is the largest sort and produces abundantly. The grains are a rich golden color and are creamy white when popped, and a single kernel will expand to nearly an inch. Price—10c per pkt.; 30c per lb.; 25c per lb. in 10-lb. lots. Prepaid.

White Rice

A well-known variety. I offer a very fine strain which produces larger ears than usual and yields very heavy crops. The quality is excellent. Price—10c per pkt.; 30c per lb.; 25c per lb. in 10-lb. lots. Prepaid.

A Page of Sundry Seeds

Broccoli

WHITE CAPE. Heads compact, good size and of a creamy white; one of the most certain to head. Price—10c per pkt.; 30c per oz.; \$1.00 per ¼ lb., postpaid.

Brussels Sprouts

BEST IMPORTED DWARF. Produces many sprouts close together; a good keeper. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.35 per lb., postpaid.

Chicory

LARGE ROOTED. Used to mix with or as a substitute for coffee. Cultivate same as carrots. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 75c per lb., postpaid.

Collards

TRUE SOUTHERN. Price—5c per pkt.; 20c per ¼ lb.; 65c per lb., postpaid.

Celeriac

GIANT SMOOTH PRAGUE. A very large and smooth variety, free from side roots. A desirable sort for market and an excellent keeper. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.; \$1.20 per lb.; \$1.10 per lb. in 5-lb. lots, postpaid.

Cress

TRUE WATER. Thrives only when roots and stems are very moist. It has fine flavor and should be grown wherever it can be given a sufficient supply of pure water. Price—5c per pkt.; 25c per oz., postpaid.

DOUBLE CURLED. This is very early and of fine flavor. Price—5c per oz.; 15c per ¼ lb.; 50c per lb., postpaid.

Endive

GREEN CURLED WINTER. The hardiest variety; leaves dark green, which readily blanch white. Not only most useful as salad, but much used for garnishing. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb., postpaid.

WHITE CURLED. To be used when young for early spring. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb., postpaid.

Gourds

Prices Postpaid.

DIPPER. This is like the Sugar Trough; has a thin, hard shell and can readily be made to serve useful purposes. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

JAPANESE NEST EGG. Fruit small and creamy white; it exactly resembles the egg of a hen. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

SUGAR TROUGH. These gourds grow to hold from 4 to 10 gallons; shells light, but very hard and durable and readily made in useful household utensils. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

HERCULES CLUB. Longest of all. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

DISH CLOTH. Ornamental climber. The interior useful in kitchen when properly prepared. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

MIXED SORTS. This collection contains a great many varieties both useful and curious. Price—5c per pkt.; 10c per oz.; 35c per ¼ lb.

Horse Radish

Horse Radish produces no seed, but is grown from pieces of the roots. Culture—Mark off rows 2½ feet apart in rich, moist, well-prepared ground and set the pieces of roots 18 inches apart in the rows, vertically, the small end down, and the top 1 to 3 inches below the surface. Cultivate thoroughly until the tops cover the ground, when their shade will keep down the weeds. Small Roots—25c per doz., postpaid. Not prepaid, 60c per 100; \$5.00 per 1,000.

EGG PLANT

The Egg Plant should be more generally grown, for when well grown and properly cooked is a most delicious vegetable. The seeds germinate slowly and should be started in a strong, uniform heat, and kept constantly growing, because the young plants seldom recover if checked in their growth. Sow seeds in hot beds or warm greenhouse in March or early April; if no hot bed is at hand they may be grown in any light room where the temperature will average 75 degrees. When plants have formed two rough leaves, transplant them in beds 3 or 4 inches apart. Keep the bed closed and very warm, shading from the direct rays of the sun, giving an abundance of water until the ground is warm and all danger from frosts and cold nights is past, then harden the plants by gradual exposure to the sun and air, then increase the supply of water; transplant to the open ground late in May or June into warm, rich soil, 2 or 3 feet apart each way, according to the richness of the soil. When about a foot high draw the earth up to the stems. Care should be used in cutting the fruit so as not to disturb the roots of the plants. One ounce for 2,000 plants; 4 ounces for one acre.

Burrell's Special Gardener's Stock New York Improved Spineless Egg Plant

My seed of this fine variety of egg plant has been selected for many years to a certain type until it is as fine as can be purchased from any source. The finest specimens from the most productive plants have been selected for stock seeds each year. The fruits are shaped as shown in cut and under favorable conditions measure 6 to 8 inches in diameter. The skin is a handsome, dark purple, flesh white, quality excellent. Market growers who plant largely will find this very desirable. Price—5c and 10c per pkt.; 40c per oz.; \$1.40 per ¼ lb.; \$3.50 per lb., postpaid.

Florida High Bush Egg Plant

This variety has proven a money maker for Southern growers. It resists drouth and excessive moisture extremely well on account of its strong, upright growth, and as the fruits are held well up off the ground, it is very vigorous and productive. Fruits purple, of fine shape and quality; an excellent shipper and well liked on the markets where it commands top prices. Price—10c per pkt.; 30c per oz.; \$1.00 per ¼ lb.; \$3.50 per lb., postpaid.

Black Pekin Egg Plant

The fruits of this variety are longer and darker colored than New York Spineless; jet black, very glossy; a good sort. Price—10c per pkt.; 30c per oz.; \$1.00 per ¼ lb.; \$3.50 per lb., postpaid.

Herbs, Sweet, Pot and Medical

The following at 10c per pkt., postpaid.

Anise; has useful medicinal properties. **Balm;** used for balm tea or balm wine. **Basil, Sweet;** used for highly seasoned dishes. **Bene;** used in confectionery. **Borage;** excellent for bees. **Castor Oil Plant.** **Caraway;** used for flavoring. **Catnip;** used for seasoning. **Coriander;** useful culinary plant. **Cumin;** used for flavoring. **Dill;** used to flavor pickles. **Fennel, Florence.** **Hebane.** **Hop Seed.** **Horehound;** for medicinal purposes. **Hysop;** for medicinal purposes. **Lavender;** a popular aromatic herb, emitting a delightful perfume. **Marjoram, Sweet;** popular for seasoning. **Rosemary;** an aromatic herb. **Saffron.** **Sage;** the leaves are tender, tops are used in stuffing and in sauces. **Savory, Summer;** used for seasoning; also useful as a bee food. **Tansy.** **Winter Savory.** **Wormwood.**

LETTUCE

The most used of all salads; is of easy culture, requires rich, moist soil and clean cultivation, on which depends its appearance, tenderness and flavor. For early spring use, sow in a seed bed in September or October and protect through the winter in cold frames, or in the South with leaves or litter, or sow in a hot bed in early spring; as soon as the ground can be well worked, transplant in good rich ground to rows 18 inches apart and 8 inches in the rows. For a later supply plant every two weeks from the middle of April until July, choosing varieties according to their heat resistance. Sow in drills $\frac{1}{4}$ inch deep, 18 inches apart, and thin large varieties to 12 inches apart in the rows. Ounce of seed makes 2,500 plants. Lettuce is divided into three classes:

First—Curled or Loose Leaved, which produce a large, loose bunch of leaves which curl beautifully and are very tender and crisp. Pretty for garnishing. These sorts are most sown for very early spring use.

Second—Heading or Cabbage Varieties, which produce heads resembling cabbage. Some of these grow to very large size and are the main crop market sorts for outdoor gardens.

Third—Cos or Celery Lettuce, with long head, erect and narrow leaves which blanch very quickly.

Cabbage or Heading Varieties

Selected Market Gardener's Big Boston Lettuce

This is a very desirable variety for forcing or outdoor culture. The heads are large and of fine quality. Planted very extensively South to ship North. Many of my customers purchase 5 to 10 pounds each of this excellent variety. Equally good for home or market garden. **Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots and up. Delivered by mail or express.**

NEW YORK OR WONDERFUL

This valuable sort is much in demand by market growers. The heads are very large, outer leaves a deep, rich green, while the inner leaves blanch a beautiful greenish white. **Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots and up. Delivered by mail or express.**

Improved Hanson. This is a standard summer lettuce; none more reliable for outdoor cultivation. The heads grow to a remarkable size, and are very solid. The outer leaves are a bright green, while the inner head presents a white appearance, as though blanched; tender and crisp and free from any unpleasant bitter taste. It is very slow to seed, and is an ideal summer lettuce. **Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered by mail or express.**

The New Burrell Lettuce

Florida Growers Report This Sort Superior to All Others

I secured this valuable lettuce from a specialist in France and introduced it in 1909. It won favor wherever planted. It comes up strong and grows rapidly. The outer leaves are bright green, curled and crinkled. The inner leaves blanch creamy white and are very tender and of finest quality.

I planted this in a check test with a large number of sorts and it remained solid and in excellent marketable condition after many of the "long-standing" sorts had passed the marketable stage and gone to seed. Price—10c

per pkt.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$1.00 per lb. Delivered free.
Trocadero. This is an excellent large heading, sort; market growers have found it one of the best. Resembles New York or Wonderful. Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb., postpaid.

New Green Idyl. A valuable French sort—white seed. Very large, solid heads, slow to run to seed. Excellent quality. Price—10c per pkt.; 35c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$1.00 per lb., postpaid.

Early Prize Head. This popular variety produces large, loose heads of finely crimped and fringed leaves, the outer portions of which are shaded with brown. Exceedingly crisp, sweet and tender. One of the best for the home garden. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered free.

Denver Market Forcing. An early variety of head lettuce, either for forcing or open ground. It forms large heads of good, light green color, and is very slow to go to seed. The leaves are beautifully marked and blistered (like the Savoy Cabbage), very crisp and tender and of excellent flavor. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 70c per lb.; 65c per lb. in 5-lb. lots. Delivered free.

Marblehead Mammoth. This produces the largest head of any sort. The outer leaves are light green and the center leaves are white and very crisp. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered free.

"Trianon" Cos or Celery Lettuce. This lettuce excels all other sorts in quality, having a crispness, tenderness and flavor peculiar to itself and not equaled by others. The heads are long and pointed. The outside leaves should be drawn over the top and tied, when they soon form solid heads and blanch quite white and become crisp and sweet as celery stalks. It may be eaten like celery or prepared as a salad. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered free.

Curled or Loose Leaved Sorts

Grand Rapids Forcing. There is no better forcing variety among the curled-leaved sorts than the Grand Rapids, and it is quite as good for outdoor culture as other sorts. Large, beautiful leaves, very crisp and tender. Twenty to 30 pounds have been raised from a common sash, and three crops taken off the ground. Frequently a house full of this lettuce will average $\frac{1}{2}$ pound to the plant, and occasionally a plant will weigh $1\frac{1}{2}$ pounds. Excellent for shipping and will insure sales at sight. The soil cannot well be too rich. Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots. Delivered free.

Black-Seeded Simpson. The most popular sort of all the non-heading varieties. One of the best for use under glass as well as for early outdoor planting. The plants form large, loose heads; outer leaves a light, yellowish-green, with inner leaves blanched almost white. Resists the heat and remains long in a good edible condition. For this reason it makes a popular variety for all market gardeners' use. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered free.

Early Curled Simpson (Silesia). Forms a close, compact mass of leaves that are large and broad, crimped and blistered and light green in color. Not desirable for forcing with bottom heat. It is, however, recommended for planting in cold frames, and extensively grown in the open. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.60 per lb.; \$1.50 per lb. in 5-lb. lots. Delivered free.

Growing and Harvesting Rocky Ford Cantaloupes

With the subject of growing and marketing cantaloupes, Rocky Ford, Colorado, is very closely associated, because here was the birthplace of the industry, and from here the industry has spread to all parts of the country and beyond its borders, until cantaloupes have become a staple product; plantings for market now aggregating approximately 100,000 acres.

The season begins from Old Mexico and extends through southern California, southern Texas and southern Florida with first shipments in May, and gradually extends northward until the last shipments of the year come from Colorado, during August and September, and continuing sometimes as late as October 15th.

The Netted Gem, from which all the "green-meated" strains have been developed, was the first planted. This melon was nearly round, rather deeply ribbed and almost inclined to be flattened from stem to blossom, heavily netted on the ribs, but without netting across sutures between the ribs, the blossom end well protected, meat green, spicy and very sweet.

From this melon selections were made to a longer type, resulting in the Thoroughbred Rocky Ford cantaloupe, which retains all the original fine eating qualities and has a very desirable shape for crating.

This variety is not grown extensively for market, as later selections, while not of such high flavor, have deeper meat, better netting and are much better shippers.

Another selection developed a type slightly more nearly round and earlier, known as the Early Watters' strain. This is the earliest strain grown, but does not succeed well in districts where the vines are inclined to rust. Its chief point of merit is extreme earliness. It sets a very heavy first crop and ripens them within a few days after the first begin to ripen. While with this sort some growers get big returns because of the extreme earliness, the quality soon runs down, and, as some growers will not consider the effect of shipping poor melons, they send them out after the quality is poor and by the time the trade finds they are not good, these early shippers are through and have their money, and later shippers must suffer. For this reason I suggest going slow on this strain unless there is no tendency whatever for vines to rust in your district.

Rust Resistant Strains

Later selections developed the Eden Gem and the Pollock, from which have been brought to a high state of perfection the Gold-Lined Netted Rock, a melon entirely covered with a closely laced, gray netting; green meat extending almost to the seed cavity, lined with a rich golden portion. This melon is highly flavored and a good shipper. It is highly rust-resistant.

Salmon-Tinted Pollock No. 25 is from the same source. It has the same highly developed netting and shape. The meat is one-half green next to the rind and one-half salmon next to the seed cavity. It also is highly rust resistant and an excellent shipper.

Of the red or salmon-meated varieties, there is the Burrell Gem. The Burrell Gem now has an established place on the market. Over 1,000 cars of these are shipped out of Colorado each year which meet with good sale. This melon is of recent introduction, the first being marketed in 1904. In size it is larger than the Rocky Ford. This melon is well netted, has deep meat of sweet, spicy flavor and is an excellent shipper. They will not do well where there is much rain, as this will cause them to crack.

In growing melons for market, the first step is to get seeds of the best possible quality, as without good seed there can only be one result—failure.

The land should be a sandy loam, well supplied with humus. A heavy oat stubble plowed under is one of the first locations. Green rye is apt to sour the ground and give poor results. In the young orchard sow vetch in the fall and turn it under two or three weeks before time to plant the melons, and you have stored up in the soil as much fertilizer value as you could purchase in commercial fertilizers for \$20 to \$40 per acre and above this have an abundance of humus. The orchard is benefited and you should produce a profitable crop of melons.

Prepare a deep, finely pulverized and well settled seed bed. Plant ten to twelve seeds to the hill, close together, if the soil is inclined to crust, as one plant will help the other raise the crust, and the strongest should be left in thinning. Cover the seed about 2 inches deep. If hills 4 feet each way, thin to one plant when they have five to six leaves; if 6 feet each way, thin to two plants to the hill.

Cultivate frequently, deep away from the plants, but shallow close to them. When hoeing remove the crust from around the plants and replace with fine, loose soil.

Growing and Harvesting Rocky Ford Cantaloupes—Cont'd

If under irrigation, they should be watered regularly about every two weeks and the watering continued through the ripening season to keep the vines thrifty. Many do not irrigate during the ripening season, with the result that after a couple of weeks the melons ripen prematurely and are of poor quality.

Do not pick the melons until they will slip from the vines. This will be indicated by a slight change in color, and for long-distance shipping it is necessary to observe very closely so you get the melons just as soon as the melon is ready to slip from the vine with a light pressure. As the season advances they should be picked very close. Many pick what they call half-slip, i. e., when part of the stem lets loose with a light pressure; they break off the balance. This requires very close care not to get melons which are not yet sweet.

It is necessary to pick every day to get best results.

The most extensive growers follow the pickers with a wagon and extra picking bags, and as soon as a bag is filled it is laid upon the wagon and an empty one taken. When the wagon is loaded it goes to the packing shed and another takes its place. Smaller growers provide sleds drawn by one or two horses instead of wagons.

A trough with a canvas or burlap bottom is provided at the packing shed and the melons are very carefully taken from the bags and placed in the trough for packing.

The standard crate for the green-meated sorts is 12x12x24 inches, which contains forty-five cantaloupes. The smaller cantaloupes are usually crated in pony crates, 11x11x24 inches, which contain fifty-four melons. As a rule, however, the small melons are of poor quality and if no pony crates were shipped the result would be favorable to the industry.

The melons are carefully inspected before crating for proper development and none but good melons packed, care being taken to have the pack tight.

The usual plan is to make the crate complete with the exception of nailing slats on top. A bench is provided on which the empty crate is placed, the end of the crate toward the packer being three or four inches lower than the other. The first melon is taken from the trough, being partially inspected as the hand moves to pick it up for proper maturity. It is turned over and inspected for defects as it passes from one hand to the other, and is placed in the lower left-hand corner of the crate. The second melon is placed in the center of the lower end, and the third in the right-hand corner, making a tight fit. Then the second cross row on the bottom is laid, and so on until the bottom tier is packed. Then the second and third tiers are packed in the same manner. The expert crater can tell the size needed at a glance and seldom ever picks up a second melon to fit unless the first is a cull and must be thrown away.

Make it a rule to pack only such melons as you would wish to buy.

You can put up a very full pack by soaking the slats which you nail on top after filling the crate, as they then bend easily.

The Burrell Gems are packed in flat crates containing only one layer. Size of crate, 13½ inches wide, 4½ inches deep and 24 inches long, which contains twelve standard and fifteen smaller melons. This melon should be wrapped, each being wrapped separately in special wrapping paper. Pink is the best color.

Forty acres is about the least that should be planted for car-lot shipments and where a grower plants less than this he should be able to join with other growers to make up car lots unless he is near markets where his crop can be disposed of by local express shipments.

An average yield per acre of the Rocky Ford variety with the better growers is 150 standard crates per acre, with an extreme yield of 400; of the Burrell Gems, 450 flat crates, with an extreme of 900 flat crates.

The average price per crate net to the grower varies with the season and quality of the product from 70 cents to \$3 per crate for standard crates of the Rocky Ford variety, and 30 cents to \$1.25 per crate for the flat crates of the Burrell Gem variety.

Nearly the entire cantaloupe crop of the country is marketed by specialists who distribute to the different markets, keeping close wire connections with all, to be able to place the melons where there is greatest demand and avoid over supplying any and failing to supply others. The distribution is a very important factor, but the quality of the pack has most to do with the success of the grower. If the melons are right, they always sell quickly and command top prices.

Salmon Tinted Pollock No. 25 Cantaloupe

This melon has been grown for market only three years extensively, and it has won a good reputation as one of the very best for long-distance shipping.

The vines are highly rust-resistant. The meat of very fine texture is deep and firm. Color of meat green one-half the depth from the rind, the remaining one-half a rich salmon, giving it an attractive appearance.

The netting is closely laced and interlaced, there being a subnetting underneath the outer netting.

The size runs from standard to jumbo and it yields a very heavy crop. This is the favorite sort with California growers. I offer the seed in two grades:

Stock Seed Salmon-Tinted Pollock No. 25—Saved from the finest of the first melons to ripen. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Express paid.

Standard Seed Salmon-Tinted Pollock No. 25—Saved from standard size selected melons. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb., in 10-lb. lots and up. Express paid.

Burrell's Select Eden Gem Cantaloupe Seed

This strain of Rocky Ford Cantaloupe is favorably known in nearly all sections where Rocky Fords are grown. It is a heavy yielder, nearly all the melons are solid net, the cut above being a good illustration. The meat is deep and of excellent quality. The melons as grown here run standard size, there being but few too large and less too small. My trade amounts to several thousand pounds of this seed annually.

Stock Seed. From ideal specimens, the finest possible selection. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb. Express prepaid.

No. 1 Seed. Cut from standard, well-netted seed melons of very desirable quality, such as should be planted by market growers' associations and extensive market gardeners who appreciate the fact that good seed is necessary to produce good crops.

Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lbs. and up, 85c per lb. Delivered by express.

Large lots in sealed cloth bags, 1 lb. each.

Burrell's Select Gold Lined Netted Rock or Netted Rock King

BURRELL'S SELECT GOLD-LINED NETTED ROCK OR NETTED ROCK KING is a very valuable market sort. It possesses the necessary points of solid, closely laced netting, deep meat, green nearly the full depth, with a **golden lining**. The flavor is excellent. It will hold up to ship to the farthest markets, and the **vines are highly rust-resistant**. The size runs from standard to jumbo, and the markets are now calling for flat crates packed 12's, at a premium in price.

I have a very large trade on this sort and have already sold several thousand pounds for next year's planting.

I recommend this sort to market growers and associations. My stocks are of the best to be had.

STOCK SEED, BURRELL'S SELECT GOLD-LINED, NETTED ROCK. The finest selection from ideal melons.

Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Express paid.

NO. 1 SEED, BURRELL'S SELECT, GOLD-LINED, NETTED ROCK. This is cut from melons grown especially for seed and from good shipping melons.

Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up. Express paid.

Burrell's Thoroughbred Rocky Ford Cantaloupe

This strain of Rocky Ford has been one of my main sorts for years, and has, I believe, higher flavor than any other of the green-meated sorts, but is not as good a shipper, so I give it less prominence.

This melon has ten distinct ribs. The space between the ribs is narrow and not netted. The netting is closely laced and gray. The flesh green and very spicy; the seed cavity triangular and small.

I offer the seed in two grades.

STOCK SEED, BURRELL'S THOROUGHbred ROCKY FORD CANTALOUPE. Selected to ideal types.

Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in lots of 10 lbs. and up. Express paid.

NO. 1 SEED, BURRELL'S THOROUGHbred ROCKY FORD CANTALOUPE. Saved from good melons grown exclusively for seed.

Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up. Express paid.

Cantaloupes—Continued

Burrell's Improved Watters' Solid Net Rocky Ford Cantaloupe

EXTRA EARLY

DO NOT PLANT THIS VARIETY IF VINES RUST IN YOUR DISTRICT.

This SOLID NET Cantaloupe is the earliest strain of Rocky Ford Cantaloupe. It sets a very heavy first crop so that in a few days after the first crop begins to ripen large pickings are getting ripe. The netting is well developed, gray, and closely laced. The flesh is light green and of excellent quality. The seed cavity is some larger than either of the strains previously listed.

I have sold large quantities of this seed to market growers, with uniformly good results. My fields of this were very fine and produced a large crop of the finest melons.

Stock Seed. Finest possible selection from ideal specimens. 5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb. Delivered by express.

No. 1 Seed. Grown from the finest selection of stock seeds and cut from none but standard, well-netted and fully developed melons from my own fields, grown exclusively for seed.

5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lbs. and up, 85c per lb. Delivered by express.

Rust Resistant Rocky Ford

During the past several years I have listed this and built up a large trade on it, but as now, there are several strains which are rust-resistant I have discontinued listing under above name and list the different strains as described on pages 33 and 34. Do not mistake, the Thoroughbred Rocky Ford is not rust-resistant, but **Salmon-Tint Pollock No. 25, Gold-Lined Netted Rock and Burrell's Select Eden Gem** are rust-resistant.

THE BURRELL GEM CANTALOUPE

ALSO CALLED PINK MEAT.

I first introduced this now famous melon on the market in 1904, marketing forty-one baskets. In 1905 I grew twelve acres for market and sold \$6,000.00 worth of melons from this field. In 1906 I placed them on the Chicago and New York markets, where they sold for two to three times as much as any other melons. They have continued to keep up this good reputation, and this year several thousand cars were shipped from different growing sections, which brought top prices.

The crate now being used for the standard melons measures 24 inches long, 13½ inches wide, 4½ inches deep, and holds 12 melons, or 15 smaller-sized melons. About 80 per cent of my melons run 12 to the crate. The small melons, 15 to the crate, do not sell as well, and it is quite an advantage to get as many 12's as possible.

This is an abundant yielder, often producing 15 to 25 melons to the hill. The meat is rich golden color, very thick, and fine-grained. The flavor cannot be excelled. The seeds are closely held in place in three lobes and do not easily shake loose. The rind is covered with a closely laced gray netting, except the narrow stripe between the ribs, which is not netted. The blossom end is well protected. Shape oblong, averaging six inches long and tapering at the ends. It is an excellent shipper and will carry nearly two weeks without ice.

I do not recommend it for planting where there is excessive rainfall, as this will cause them to crack. Be sure to get your seed from me.

Above account of sale for a light car shows how they sell.

STOCK SEED BURRELL GEM—The Finest Possible Selection.

Price—5c per pkt.; 15c per oz.; 50c per ¼ lb.; \$1.55 per lb.; 10 lbs. and up, \$1.50 per lb.

No. 1 SEED BURRELL GEM, saved from fine, well-netted melons. I recommend this seed to market growers as being very desirable. This melon has brought hundreds of growers profitable returns. It will pay you to give it a trial, for if it is adapted to your soil and climate, you will be well paid for your efforts.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; 10 lbs. and up, 85c per lb. Above prices are delivered by express.

Burrell's New Golden Honey Dew

This new Melon is here offered for the first time. I developed it from a sport from the Honey Dew Melon. It is different from the Honey Dew in this, **THE FLESH IS A RICH GOLDEN COLOR** instead of light green. The melon is very sweet. Keeps a long time and by many who ate them was said to be superior to the Honey Dew.

Here Is a Chance to Be One of the First to Grow This Melon

If you plant an acre or two you can be one of the first to put them on the market.

I was saving the seed from a field of Honey Dew Melons when I found a vine on which there were seven melons, all having a **RICH GOLDEN FLESH**. I saved this seed and planted them by themselves. I found I had a new variety as the crop produced came about 95 per cent true. I have enough seed to plant about two hundred acres. I first decided not to offer any seed until next year and to place them on the market this year myself. I was offered very attractive marketing opportunities but my seed business is growing so rapidly that I **DECIDED TO GIVE MY CUSTOMERS FIRST CHANCE ON THIS NEW MELON**.

At first thought it may seem the price of the seed is high but when you stop to think that there are 50 seeds in a 50c packet and these carefully planted should produce say 35 plants which in turn should produce from 150 to 250 good melons you will see that for **THE FIRST SEED OF A VALUABLE NEW MELON** this is not a high price. By very careful planting **YOU CAN PLANT 3 OR 4 ACRES FROM ONE POUND OF SEED** and at \$40.00 a pound for this seed you have a chance to grow several hundred dollars worth of melons. **THE FIRST 2 1/4 ACRES OF HONEY DEW MELONS BROUGHT OVER \$3,600.00 AND YOU HAVE AN EQUAL CHANCE WITH THIS NEW MELON.**

The size of the New Golden Honey Dew is practically the same as the original Honey Dew. Shape slightly more egg shaped, rind a dull ivory white. The Rich Golden Flesh is sweet and refreshing.

Order early to be sure of your seed. I must reserve enough to plant my seed fields and can only fill orders for what I have above this reserve.

Price—20 seeds, 25c; 50 seeds, 50c; five 50c pkts., \$2.00; 1 oz., \$3.00; 1/4 lb., \$11.00; 1/2 lb., \$21.00; 1 lb., \$40.00. **NOT OVER ONE POUND TO A CUSTOMER.**

The Honey Dew Melon

A Moneymaker for Growers in the Semi-Arid and Irrigated Sections

During the fall of 1915 the first Honey Dew melons were placed on the market and the product of slightly over two acres netted thirty-six hundred dollars (\$3,600.00) in the Chicago and New York City markets. This year these melons have sold at wholesale for from 35 cents to \$1.50 each on the eastern markets.

The rind is a dull white when ripe. Part of the melons show slight checks in the rind like a tendency to net. This appears when the melon is ready to pick. Time of ripening about two weeks later than Rocky Fords.

The size runs six to seven inches in diameter from top to bottom and eight inches in length. The matured melons are practically all the same shape and size.

The flesh is a rich green and very sweet. The melon is the best of all shippers and will keep several weeks, so there is practically no loss from spoiled melons in shipping.

I recommend this melon to market growers. The vines are vigorous and set six to ten melons to the hill and if proper care is taken to ship only ripe melons a fine market can be established.

My supply of seed is strictly right and grown from carefully selected stock seeds—THE INTRODUCER'S STOCK.

Price—5c and 10c per pkt.; 20c per oz.; 70c per $\frac{1}{4}$ lb.; \$2.50 per lb.; \$2.25 per lb. in 10-lb. lots. Prepaid.

Remember when you buy this seed from D. V. BURRELL you are getting the genuine introducer's stock that is strictly dependable.

Hungarian Casaba

This melon is the same shape as Honey Dew, but has an orange-colored rind. The flesh is green, very sweet, and the melon will keep several weeks after ripening. Price—10c per pkt.; 25c per $\frac{1}{2}$ oz.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.00 per lb. Prepaid.

Casaba New Hybrid

This valuable melon will keep two to three months after it is matured, and picked the first of October and stored in a dry, cool place, will keep until Christmas. The quality is very good, and a large demand is growing up in the eastern market. This is the sort most extensively grown in California. Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; 10 lbs., and up \$1.50 per lb. Delivered by express.

Santa Claus Casaba

This melon will keep several months and does not begin to mature in this latitude until the last of September. Stored in a dry place they will keep until Christmas. They should be exposed to the sun a few days before eating, and are ready to eat when the rind begins to soften. Shape oblong, about six inches in diameter and eight inches long; very sweet and of good flavor. Price—pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 40c; lb., \$1.50. Prepaid.

Plant my Improved Hoodoo. Give it a thorough trial. It may prove good enough so you will plant it extensively next year.

CANTALOUPE

Improved Hoodoo—Oblong Type

This melon when first introduced averaged shorter from stem to blossom than from top to bottom. I have carefully selected to an oblong type and now offer seed from my fields which average fully 90 per cent of the oblong type. This has resulted in a deeper meat and a very desirable shipper. Size a little larger than the standard Rocky Ford. Color of meat a rich orange, flavor very good. The cut illustrates shape and netting. It is an excellent melon, and I recommend that you give it a thorough trial.

Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10 lbs. and up, 90c per lb. Delivered by express.

Anne Arundel Musk Mellon

This very early variety is well netted, has deep green meat of very fine flavor, close grained and firm, making an excellent market melon. Not suitable to ship in standard crates, as it is too large—4 to 6 pounds.

Many report excellent crops from it, and those who have short seasons say it is their best sort.

Price—5c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Delivered by express.

OHIO SUGAR MUSK MELON. This new variety introduced last year is of special merit. It is a green fleshed Tip Top. Color of rind light slate, slightly netted. Shape nearly round; rind tough. Meat deep and a rich pea green. Weight about four pounds. This seed is very scarce. My own growing from the introducer's stock.

Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; 1 lb. and up, \$2.00 per lb. Delivered by express.

FORDHOOK MUSK MELON. This new melon is shaped like the Jenny Lind, flattened from stem to blossom; well netted; a good yielder of excellent quality. The salmon colored flesh is very spicy. I recommend it for home gardens.

Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb. Delivered by express.

Muskmelons

The Montreal Market listed below as grown under glass in Canada often sell for \$1.50 each. Many sections of the warm U. S. will produce fully as good melons grown in open ground. Try them.

EMERALD GEM. This extra fine variety is worthy of special mention and has but few equals for the home garden, but being without netting and often cracking open when ripe, it is not a good market melon. Medium size, perfectly smooth; skin a deep emerald green with white ribs. Very attractive in appearance. Flesh salmon-colored, very deep, and quality almost equal to the Rocky Ford. Do not fail to grow a few. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb.

PAUL ROSE. This is a very good melon, has few equals for home garden and is a fair shipper. Fruit oval; flesh a rich orange red. Mr. Paul Rose, who introduced this melon, has made himself famous in the produce world, and the large acreage which he grows each year finds a ready market. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

EXTRA EARLY HACKENSACK. An improvement on the old well-known Hackensack. Same quality; ten days earlier. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

OSAGE. This is a very popular melon and one of the best, owing to its fine spicy flavor and good shipping qualities. Skin dark green, slightly netted; flesh salmon color. Very productive and a long keeper. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

BAY VIEW. Early, vigorous, productive, often weighs 12 to 15 pounds; flesh green and of good flavor; shape long. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

CHICAGO MARKET. Large, green-fleshed nutmeg of good quality; round and flattened. A favorite in Chicago. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.

TIP TOP. This variety has a light, slate-colored rind; fruits are nearly round, deeply ribbed; the flesh is deep and salmon-colored; very fine-grained and of desirable flavor. It is a good variety to grow for nearby markets. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 10-lb. lots and up. All of above delivered by express.

Montreal Market Musk Melon

This is a very large melon, with deep pale green flesh, which is often over three inches thick. The flavor is excellent. The melon is well netted and a good shipper. Single specimens from the Montreal, Canada, district often sell at \$1.25 to \$1.50 each on the New York and Boston markets.

These melons often weigh 15 to 20 pounds.

Price—5c per pkt.; 20c per oz.; 65c per $\frac{1}{4}$ lb.; \$2.50 per lb.; 10 lbs. and up, \$2.25 per lb. Delivered by express.

Citrons

GREEN-SEEDED COLORADO. Fruit round; an improved variety. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Delivered by express.

RED-SEEDED CITRON. The old variety; good quality. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.10 per lb.; \$1.00 per lb. in 10-lb. lots. Delivered by express.

Mustard

WHITE ENGLISH. The leaves are light green, mild and tender when young; seed light yellow. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb. Prepaid.

BROWN. Stronger and more pungent than the above. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb. Prepaid.

NEW CHINESE OR GIANT SOUTHERN CURLED. Very large leaves; ready for use six weeks after sowing. Plants continue to yield until after frost. Leaves are eaten, boiled, like spinach. Price—5c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb. Prepaid.

OSTRICH PLUME. This is a valuable sort; produces large, curled leaves of excellent quality. If you enjoy a dish of greens this will please you, and it is a valuable market sort, being ready very early in the spring. Price—5c per pkt.; 15c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb. Prepaid.

WATERMELONS

Above is a photograph of one of my seed fields of Burrell's Improved Kleckley Sweet Watermelon. The long row of melons are selected for stock seed. After my men select these melons and pile them in rows, I personally go over them and reject all not true to type. This very careful selection is done to keep my seed right. See price of this grade of seed next page.

CULTURE.

To successfully grow watermelons it is absolutely necessary to have good seed. Then select proper soil and give it proper cultivation and irrigation (if under irrigation) and if not prepare the land to drain off or retain the moisture, depending upon whether you get much or little rainfall, and the results are usually very good.

Select a well-drained sandy loam; new sod land is best; any good loamy soil which is well drained is good.

If under irrigation run large furrows 8 feet apart and plant the hills well up on the border 8 to 10 feet apart. Be careful not to irrigate too often.

Watermelons are lovers of drouth, and the finest melons are grown under semi-arid conditions.

Plow deep and harrow well to make a fine seed bed. A liberal coat of stable manure disked in before plowing will increase the size and yield.

If not under irrigation, plow the land in ridges by first throwing out a deadfurrow, then backfurrowing into the deadfurrow four or five furrows from each side, and after thoroughly harrowing, plant on the center of the ridge.

Do most of the cultivating with the harrow, setting the teeth straight and cultivating deep.

Keep a fine mulch on the surface and do not let any weeds grow.

Plant ten to twelve seeds to the hill and thin to one plant when they have five to six leaves.

If you use commercial fertilizer mix it thoroughly with the soil around the hill, but do not leave any lumps under the hills where the first roots will reach it, or it will burn the roots and check the growth, if not kill the plant.

Do not plant on land where melons were grown before, even if four or five years before, if you have other good land. The vines remove something from the soil not readily replaced, and following crops usually produce deformed melons with black ends or shriveled ends, even from the best of seeds, while the same seed on adjoining land, where melons have not been grown before, will produce large melons of the finest quality.

Do not press on melons to see if they are ripe. This injures them and results in very poor melons. A slight thump with the finger if the sound rings clear and a high tone indicates a green melon; if a hollow, low tone, or rather dead tone, the melon is ripe.

Usually the curl where the melon attaches to the vine dies when the melon is ripe. By a little practice you can tell by the color. A bright, growing color indicates a green melon; a dull green indicates ripeness.

The Improved Kleckley Sweet and New Chilian are the finest flavored melons and fair shippers up to 150 to 175 miles.

The New Tom Watson and Alabama Sweet are the finest eating melons of the really good shippers.

Thousands of the finest melon fields of the United States, from Florida to Oregon, from Texas to California are grown each year from my seeds.

Burrell's Improved Kleckley Sweet Watermelon No Better Melon Grown

My strain of this melon is listed by some as the New Hard Shell Kleckley Sweet.

THE MOST DELICIOUS WATERMELON GROWN; VERY PRODUCTIVE AND OF ATTRACTIVE APPEARANCE.

Again I offer this strain as the finest eating melon and the thousands of customers who continue to plant it speak volumes in its favor. Some report sales of as much as \$200.00 to \$300.00 per acre, which surely is very good. As it grows with me it is not only the best eating melon, but a good shipper which holds first place on many markets.

The melon is oblong, ends square, color dark green, flesh deep red, stringless, solid and very sweet with but few white seeds set firmly near the rind.

STOCK SEED BURRELL'S IMPROVED KLECKLEY SWEET WATERMELON.

This seed was cut from such melons as are pictured in the pile above. The stock seed melons would average 35 pounds each. Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb. Delivered by express.

For several years I have been unable to supply the demand for stock seed of this variety. A single year I have had to refuse about 1,000 orders for it, although I limited orders to five pounds each. I have cut about 100,000 of these finest melons, averaging 35 to 40 pounds.

I want to supply some to all who wish this seed.

NO. 1 SEED BURRELL'S IMPROVED KLECKLEY SWEET WATERMELON. Saved from desirable melons grown from same stock seed as above. Price—5c per pkt.; 10c per oz.; 35c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.10 per lb. 10 lbs. and up. Delivered by express.

THE NEW TOM WATSON WATERMELON

This large mottled green watermelon often weighs 50 to 60 pounds and averages on good soil over 30 pounds. It has, within the past three years, won place among the very first as a market melon. The flesh is deep red and contains very few seeds, which are firmly bedded. It is the leader, taking into consideration size, shipping and eating quality. I have very carefully selected my stocks and have excellent seed to offer. Your orders will be placed where you should get excellent results if you buy this seed from me.

For the most critical planters I have selected the following:

STOCK SEED, NEW TOM WATSON WATERMELON. Cut from melons just like shown in the cut. None under 30 pounds, and which would average 40 pounds or more. All ideal types. Nothing finer can be grown. Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per pound. Straight on larger lots. Delivered by express.

No. 1 seed New Tom Watson Watermelon grown especially for seed and cut from good shippers. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 10-lb. lots and up, 85c per pound. Delivered by express.

**Burrell's
Select
Alabama
Sweet
Watermelon**

This is a fine shipper. My seeds are planted extensively by many of the most successful Texas and other Southern melon growers.

The rind is dark green marked with still deeper green mottled stripe, and while thin, it is very tough, making the melon a first-class shipper. The flesh is bright red, fine-grained, sweet and luscious, entirely stringless and very firm. The seeds are white, slightly tipped with brown, and are firmly set in small cavities near the rind.

My crops this year were as fine as I believe it is possible to grow. I saved especially for stock seed a considerable quantity of this seed from 35 to 40 pound melons, and offer:

STOCK SEED BURRELL'S SELECT ALABAMA SWEET from above described selection at 5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.85 per lb. 10 lbs. and up. Delivered by express.

NO. 1 SEED BURRELL'S SELECT ALABAMA SWEET. Grown exclusively for seed and cut from fine melons. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 60c per lb.; 55c per lb. 10 lbs. and up. Delivered by express.

My strain of **TOM WATSON WATERMELON** is of the best. Many Southern planters buy large lots of the Stock Seed. One customer who buys several hundred pounds at a time says he gets so much better results from this seed he cannot afford to buy any other.

Dont Overlook Golden Heart

Golden Heart

This delicious new melon averages about twenty pounds, is shaped as shown in cut and the flesh is the color of rich ice cream made of real cream; the flesh is without stringiness, fine-grained, melting and very sweet. Everyone who enjoys a sweet, luscious watermelon will be well pleased with this.

Above was my first description. My customers say I did not claim enough for it; that they "average thirty pounds, and are the finest melons we ever tasted." I saw these melons sell for 40 cents each when other melons were selling for 15 cents, and can recommend them for every home garden and for market growers who are near markets. Price—5c per pkt.; 15c per oz.; 45c per ¼ lb.; \$1.55 per lb.; \$1.50 per lb. in 10-lb. lots and up. Express paid.

Select New Chilian Watermelon

This is the favorite melon in California and especially in the southern part, where large profits are made growing it.

My strain of this melon produces all white seeds. Some others produce mixed white and pale red seeds. Extreme care has been taken to make my strain the best possible, and my crop was as fine as could be desired.

The rind is thin and tough. The white seeds are set near the rind; heart bright red, stringless and of excellent quality. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.; \$9.00 per 10 lbs.; 85c per lb., 40 lbs. and up. Delivered by express.

Florida Favorite Watermelon

This is another variety on which my trade is very large, and I have increased my acreage to take care of this demand. A beautiful melon with light and dark green exterior; shape oblong; flesh bright crimson; crisp and deliciously sweet. It is only a few days later than the first early sorts and a good shipper. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 80c per lb., 10 lbs. and up. Delivered by express.

Winter Queen

This round light green striped with darker green melon has a very thin, tough rind, rich red flesh and few small black seeds set very firmly in the flesh near the rind. It will keep well until mid-winter and is a great treat after all other watermelons are gone. Price—10c per pkt.; 30c per oz.; \$1.00 per ¼ lb.; \$3.85 per lb., postpaid.

McIVER'S WONDERFUL SUGAR. Owing to the very large demand for this variety I have increased my acreage and have several thousand pounds of seed to offer. It is not uncommon to grow crops of these long light and dark green striped melons averaging forty pounds. They are of very striking appearance and extra quality. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 80c per lb., 10 lbs. and up. Delivered by express.

Georgia Rattlesnake

An excellent market variety; large and oblong; rind mottled and striped; a well-known shipping melon. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb.; 80c per lb. in 10-lb. lots and up. Delivered by express.

ALL VARIETIES OF WATERMELON SEED POSTAGE OR EXPRESS PAID

The New Tom Watson Watermelon

See page 44. This melon is the leading sort grown for market at present, and you cannot find better stock than that which I offer. My stock seeds and my general seed crop are produced under the most careful attention. If you are a critical melon grower and want to produce as good as grows for market, get my New Tom Watson watermelon seed.

Southern Grown Tom Watson Watermelon Seed

I have several thousand pounds grown for me from my best stock seed in the South, and while this seed is lighter-colored than my western-grown seed, I believe you will be well pleased with it. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 85c per lb. in 100-lb. lots. Express paid.

Girardeau's Triumph. This is an excellent shipping sort. It is early, the melons are large, dark green with indistinct stripes. The flesh is solid and sweet. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Carolina Bradford. This is a large, long, dark green melon, dimly marked with lighter green stripes. The rind is tough, making it a good shipper. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Cuban Queen. An old, well-known variety that is a very good shipper and grows to an enormous size. It is a heavy yielder. The rind is marked light and dark green; flesh bright red; very solid, crisp and sugary; shape oblong. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Cole's Early. This is one of the earliest melons and a very hardy, sure cropper; medium size, slightly oblong shaped; rind green, striped with lighter shades; flesh dark red. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Dixie. One of the best. A cross between the Kolb's Gem and Mountain Sweet, possessing the best qualities of both. Rind dark green, striped with light green; shape much longer than Kolb's Gem; very large and of good flavor. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Ice Cream. An early variety of good flavor. One of the best to grow in the North, and being so good, it is one that should be in every garden. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Early Fordhook. A very popular sort; medium size; flesh red and sweet; color a mottled gray. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots.

Gray Monarch. One of the largest melons, often weighing 60 to 70 pounds. Rind mottled gray; shape long; flesh crimson, of a good flavor and a good shipper. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Phinney's Early. Another very early melon; hardy; a sure cropper, extensively cultivated in the North. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

Mammoth Iron Clad. Oblong; dark green mottled with lighter shades; flesh bright red, firm, sugary; size very large, often weighing from 60 to 70 pounds. A good shipper. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.

Kentucky Wonder. A new red-seeded variety; oblong; rind dark green with lighter stripes. Flesh a bright red; sugary and firm; it is never mealy; very good. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up.

In addition I offer the following varieties at the uniform price of: 5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 55c per lb. in 10-lb. lots and up: Black Diamond, Boss, Duke Jones, Light Icing, Round Striped Gipsy, Sweetheart and Vick's Early.

ONION

In onion culture, thorough preparation of the ground, careful sowing and the best of after culture, though essential for a full yield, will avail nothing unless seed of the best quality be used. Given the same care and conditions, the product from two lots of onion seed of the same variety but of different quality may be so unequal in the quantity of merchantable onions that it would be more profitable to use the good seed though it cost twenty times as much as the other. The seed I offer is the best obtainable. Although onions are often raised from sets and from division, by far the best and cheapest mode of production is from seed. The facility with which seed is sown and the superior bulbs it produces recommend it for general use.

How to Raise Onions

THE SOIL. A crop of onions can be grown on any soil which will produce a full crop of corn, but on a stiff clay, very light sand or gravel, or on some muck, or swamp lands, neither a large nor a very profitable crop can be grown. I prefer a rich loam with a slight mixture of clay. This is much better if it has been cultivated with hoed crops, kept clean from weeds and well manured for two years previous, because if a sufficient quantity of manure to raise an ordinary soil to a proper degree of fertility is applied at once, it is likely to make the onions soft. The same result will follow if we sow on rank mucky ground or on that which is too wet.

MANURING. There is no crop in which a liberal use of manure is more essential than in this, and it should be of the best quality, well fermented and shoveled over at least twice during the previous summer to kill weed seeds. If rank, fresh manure is used, it is liable to result in soft bulbs with many scallions. Of the commercial manures, any of the high-grade, complete fertilizers are good for ordinary soils and even very rich soils are frequently greatly benefited by fine ground bone, and mucky ones by a liberal dressing of wood ashes.

PREPARATION. Remove all refuse of previous crops in time to complete the work before the ground freezes up and spread the composted manure evenly at the rate of about twenty tons to the acre. This should first be disced in and then the ground ploughed a moderate depth, taking a narrow furrow in order to thoroughly mix the manure with the soil. Carefully avoid tramping on the ground during the winter. Disc thoroughly as early in the spring as it can be worked, after which the entire surface should be made fine and level with a smoothing harrow. It is impossible to cultivate the crop economically unless the rows are perfectly straight.

SOWING THE SEED. This should be done as soon as the ground can be made ready and can be done best by a hand seed drill. This should be carefully adjusted to sow the desired quantity of seed about one-half inch deep. The quantity needed will vary with the soil, the seed used and the kind of onions desired. Thin seeding gives much larger onions than thick seeding. Four or five pounds per acre is the usual quantity needed to grow large onions. I use a drill with a roller attached, but if the drill has none, the ground should be well rolled with a light hand roller immediately after the seed is planted.

CULTIVATION. Give the onions the first hoeing, just skimming the ground between the rows, as soon as they can be seen in the row. Hoe again in a few days, this time close up to the plants, after which weeding must be begun. This operation requires to be carefully and thoroughly done. The weeder must work on his knees astride the row, stirring the earth around the plants, in order to destroy any weeds that have just started. At this weeding or the next, according to the size of the plants, the rows should be thinned, leaving from eight to twelve plants to the foot. In ten days or two weeks they will later give them still another hoeing and if necessary another weeding. If the work has been thoroughly done at the proper time, the crop will not require further care until ready to gather.

GATHERING. As soon as the tops die and fall, the bulbs should be gathered into windrows. If the weather is fine they will need no attention while curing, but if it is not they will need to be stirred by simply moving them slightly along the row. Cut off the tops when perfectly dry, about half an inch from the bulb and then after a few days of bright weather the onions will be fit to store for winter.

It will not do to store onions in large piles or masses, particularly in warm weather, or if they are the least moist, but if perfectly dry when gathered and they are spread not to exceed two feet in depth, they can be kept in fine condition till spring. Any arrangement will answer that will keep them dry and at a uniform temperature of about 32 degrees Fahrenheit, or they may be kept frozen, care being taken not to disturb them. They should be thawed gradually. Repeated freezing and thawing will spoil them.

If bothered with thrip (a small insect which sometimes attacks onions, doing great damage) spray with a tobacco emulsion. Three sprayings will usually completely control them.

Very early onions are grown by the transplanting method, the seed being sown in frames or beds and the small onions transplanted when the size of small lead pencils to the field rows.

Seed Crop Very Short

This not only applies to onions, but to nearly all seeds. Onion seed at this time is in very short supply and evidently not enough for all who will wish to plant. You should order early, prepare the soil well and plant carefully.

Burrell's Private Stock, Colorado Bronze Globe Onion

This is a special selection from the Southport Yellow Globe. It is a great yielder and one of the best to store for spring trade, as it is an excellent keeper. The bulbs are a bronze color, shaped as shown in cut, of good size.

The yield of the field from which my stock to grow this seed was selected produced 900 bushels per acre. I have grown an excellent crop and offer low, direct-from-the-grower prices—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up. Postage or express paid.

Large Red Wethersfield

It is fine-grained and strong in flavor. Very productive and an excellent keeper. Immense crops of this are grown for shipment, and it certainly is one of the very best sorts for market. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up. Postage or express paid.

Australian Brown Onion

A valuable, early variety of medium size, hard and solid, attractive for market, both as to form and appearance. Never make any stiff necks or scullions. It has the reputation of keeping indefinitely. Color of the skin is a clear amber brown. Price—5c and 10c per pkt.; 25c per oz.; 90c per $\frac{1}{4}$ lb.; \$3.25 per lb.; \$3.15 per lb. in 10-lb. lots and up. Postage or express paid.

White Portugal or Silver Skin

VERY SHORT CROP

A large, flat, white onion of mild and pleasant flavor; hard and fine-grained and a good keeper. More extensively sown for sets than any other variety and is also largely grown for pickling. Price—5c and 10c per pkt.; 40c per oz.; \$1.35 per $\frac{1}{4}$ lb.; \$5.00 per lb.; \$4.75 per lb. in 10-lb. lots and up. Postage or express paid.

ONIONS—CONTINUED

Most of the onions when set to produce my seed were worth 15c per pound and the price asked for the seed is less than the onions would have sold for from which they were grown.

Burrell's Special Stock, Southport Red Globe Onion

The above is a photograph of some of my onions. The type is right and the quality of the best to be had. It matures nearly as early as the flat sorts, grows to a large size and is very mild and tender. It is a **GOOD KEEPER** and considered **ONE OF THE BEST RED ONIONS**. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up. Postage or express paid.

Southport Yellow Globe

Shape same as Colorado Bronze Globe. (See previous page). This variety is well known and planted very extensively in the East. It is a little later than the Globe Danver, a very heavy yielder and a sure cropper. Price—5c and 10c per pkt.; 25c per oz.; 90c per $\frac{1}{4}$ lb.; \$3.20 per lb.; \$3.15 per lb. in 10-lb. lots and up. Postage or express paid.

Southport White Globe

Same shape as above; color a clear white. The best keeper of the white sorts. Produces a heavy crop of excellent quality and always sells for top prices on the markets. Price—5c and 10c per pkt.; 50c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.75 per lb.; \$5.60 per lb. in 10-lb. lots and up. Postage or express paid.

Ohio Yellow Globe

The bulbs are large and uniformly globe shaped. Color a deep yellow, flesh white and of excellent quality. The crop ripens evenly and the yield under favorable conditions is extremely heavy. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and Prepaid.

ONIONS—Continued

Yellow Globe Danver Onion

Undoubtedly the best known and most popular of all onions; the earliest yellow variety; is entirely free from stiff necks; globular in shape, has a small top. It is the most productive, producing as high as 1,000 bushels per acre, and will average on good soil with proper culture, 600 to 700 bushels. It is a splendid keeper, well rounded, a very small amount of waste. This seed has proven a great favorite with my customers who plant thousands of pounds. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up. Postage or express paid.

YELLOW FLAT DANVER. My strain of this well-known variety is of the very best, producing a uniform crop, which matures just at the right time for storing for winter. This seed sown thick (60 lbs. to the acre) produces very fine bottom sets. It is free from stiff necks, has a small top and is very productive. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up. Postage or express paid.

PICKLING ONIONS. This seed is practically out of the market. That is such as White Pearl, White Queen and White Barletta. I recommend the following which make very good pickling onions where sown thickly. 10 to 12 pounds of seed per acre.

Crystal Wax—Teneriffe Grown

This large, flat white onion is grown extensively by southern growers. It is very mild and a profitable sort to grow. The seed supply is very short. Price—5c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.75 per lb. Postpaid.

White (Yellow) Bermuda—Teneriffe-grown. This is the most extensively grown sort in southern Texas for early shipping. The seeds come Teneriffe in August and are planted as soon as possible in order to produce early onions, which go on the market the following late spring months. Thousands of carloads are marketed each year. Price—5c per pkt.; 20c per oz.; 70c per $\frac{1}{4}$ lb.; \$2.50 per lb.; \$2.25 per lb. in 10-lb. lots. Postpaid.

ONIONS—Continued

Ailsa Craig Onion

This very large, nearly round, straw-colored onion is one of the largest grown. It is in great demand in the markets wherever offered.

By planting the seed very early in frames and transplanting to the open ground as soon as the ground will do to work in the spring, at which time the plants should be the size of a large lead pencil, very large crops can be produced.

This onion is very mild and any district where onions grow well can establish a paying industry by growing these and marketing them crated.

A very fine exhibition onion. Grow some of these in your garden, either for market or home use, and you will be well pleased. Price—5c and 10c per pkt.; 60c per oz.; \$2.00 per $\frac{1}{4}$ lb.; \$6.50 per lb.; \$6.25 per lb. in 10-lb. lots and up, postpaid.

Mammoth Silver King

Of attractive shape, with silver-white skin and flesh of a most agreeable, mild flavor. It matures quite early and reaches a much larger size than any other of the flat varieties, frequently measuring 20 inches in circumference, and weighing from 3 to 5 pounds when well grown. Must be sown thinly to produce large onions. This is a fine sort to grow for exhibition purposes. Price—5c and 10c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.; \$4.25 per lb. in 10-lb. lots and up, postpaid.

Giant White Italian Tripoli

El Paso or Large Mexican. Of large size and most beautiful form with fine white skin. The first season it will grow an onion from one to one and a half pounds. Price—5c and 10c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.40 per lb. in 10-lb. lots and up, postpaid.

PRIZETAKER. Quite like the above in color, but different in shape, being nearly a perfect globe. Hundreds of acres of this sort are grown in single districts in Texas. This variety of recent introduction annually grows in favor. It is very productive, attractive in appearance and quality, being mild in flavor as the Imported Spanish onions of our grocers, can be grown successfully in any locality where other onions are produced. The color is a bright straw, and it always grows to a uniform shape. Having a small neck, stiff necks are almost unknown. We call attention to the fact: Our seed is the choicest American grown and not Imported Spanish King, as sold by some dealers at low prices under the name of Prizetaker. Prices—5c and 10c per pkt.; 35c per oz.; \$1.20 per $\frac{1}{4}$ lb.; \$4.00 per lb., 10 lbs. and up, \$3.85 per lb., postpaid.

PUMPKINS

Pumpkins are very easily grown, as the seeds are large, the young plants come up strong and the crop is less particular as to the quality of soil compared with melons or cucumbers.

They do best, when planted alone with rows about 5 feet apart for the small sorts and 8 feet apart for the large sort. Plant 10 to 12 seeds to the hill, and when the plants have five or six leaves thin to two, and when runners are 12 to 18 inches long, thin to one by cutting off the other at the surface. This gives protection against insects. Cultivate thoroughly and keep free of weeds.

Good results are obtained by planting a hill every 15 to 20 feet each way in the cornfield, but not compared with above plan.

For insects, take some well-slaked lime and mix with three times as much fine dust, stir into this 2 or 3 tablespoonfuls of turpentine to each pailful and dust the plants; also put a small amount of this around the root of each plant.

Small Sugar or New England Pie

An excellent sort; shape as shown above. Flesh very deep orange. Fruits 8 to 10 inches through. The quality is of the best; none better for pies. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Postage or express paid.

Large Sweet Cheese. Flat, creamy yellow, well known; one of the standard sorts. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 80c per lb.; 75c per lb. in 10-lb. lots and up. Postage or express paid.

Connecticut Field. The well-known, large, yellow field pumpkin. Price—5c per pkt.; 10c per oz.; 20c per $\frac{1}{4}$ lb.; 65c per lb.; 60c per lb. in 10-lb. lots and up. Postage or express paid.

Michigan Mammoth. Similar to above, only extremely large. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 90c per lb.; 80c per lb. in 10-lb. lots. Postage or express paid.

King of Mammoths. This is the exhibition pumpkin for the fair, often weighing 150 to 200 pounds. In quality none are better for pies, and except where the black squash bug is bad it always yields heavily. Outer color light creamy red; meat deep orange red. Note—Often the seed from a big specimen is sold at 5c per seed to those who do not know it by name. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots and up. Postage or express paid.

PUMPKINS—Continued

Japanese Pie

This is one of the finest varieties of pumpkins. Color of rind, dark slate green with very slightly lighter mottled stripes. The neck is very large in proportion to the size of the bowl and in it the meat is solid. In quality none can surpass it. Color of meat, very deep orange red, giving the pies that richest pumpkin color as well as flavor. It is a heavy yielder and where squash bugs bother the vines it succeeds better than any other sort. The seeds are peculiarly marked, as if covered with Japanese characters, hence its name. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Postage or express paid.

Green Striped Cushaw

This variety is shaped same as above, but larger and lighter colored. The rind is a pale slate green, striped with a darker green. The flesh is light yellow. The large neck is solid flesh of excellent quality.

It is one of the best for pies or to bake as are squashes.

For several years there has not been sufficient of this seed to supply the demand. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Postage or express paid.

Livingston's Pie

This very fine variety is nearly round, 8 to 10 inches through. The rind is light yellow, covered with a fine netting. The flesh a deep orange, fine-grained and of excellent quality. One of the best for pies. Price—5c per pkt.; 10c per oz.; 30c per $\frac{1}{4}$ lb.; \$1.00 per lb.; 90c per lb. in 10-lb. lots. Postage or express paid.

PARSLEY

Champion Moss Curled. Is a prize winner English variety, in appearance like a tuft of finely curled moss, and of a rich deep green color. It is slow to run to seed and very hardy; of easiest growth; a few seeds sown in onion rows use no space; grows in window boxes. Extra fine for garnishing and culinary purposes. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots. Postage or express paid.

Fine Double Curled. A standard variety; plants bear an abundance of finely curled leaves; very ornamental. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots. Postage or express paid.

Emerald Curled. Extra fine; the leaves are very finely curled and of a deep emerald green color; very easy grower and none finer. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.25 per lb.; \$1.15 per lb. in 10-lb. lots. Postage or express paid.

PEAS

THE CROP OF SEED PEAS IS VERY SHORT

Very early peas require a light and warm soil; too heavy soil will cause them to rot before sprouting.

Later peas will stand a heavier soil, but a sticky, heavy soil is not desirable. For earliest, sow as soon as possible in the spring on soil which has been prepared in the fall before and only requires a thorough discing or cultivating and leveling before planting.

All varieties should be sown comparatively early. By planting different varieties, some early, some medium and some late, a succession may be had.

Plant only about 1 inch deep. Late varieties may be planted in furrows 4 or 5 inches deep, covering only an inch at first and later when the peas are 8 to 10 inches high, cultivate the earth toward the plants, leveling the furrows.

Rows may be 2 feet to 30 inches apart; plant 60 to 90 pounds of seed per acre; 1 pint to 100 feet of drill.

Alaska

The very best early green-seeded variety. The dark green color of the pods makes it an excellent pea for shipping long distances. Very early and uniform grower. A popular sort with canners and shippers. First-class in every respect. Height, 2½ feet. **Price—10c per pkt.; 45c per lb. Postpaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 30c per lb. in 100-lb. lots.

FIRST AND BEST. A very good strain, only two or three days later than the Alaska. It is largely planted by truckers. **Price—10c per pkt.; 40c per lb. Postpaid.**

Not prepaid—30c per lb.; 28c per lb. in 10-lb. lots; 26c per lb. in 100-lb. lots.

TOM THUMB. A very early variety which grows only about 10 inches high. It yields well. Is good for small gardens. **Price—10c per pkt.; 40c per lb. Prepaid.**

Not prepaid—30c per lb.; 28c per lb. in 10-lb. lots; 26c per lb. in 100-lb. lots.

AMERICAN WONDER. One of the earliest wrinkled peas of very good quality; grows about 10 inches high and is very productive. **Price—10c per pkt.; 40c per lb. Prepaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 32c per lb. in 100-lb. lots.

McLEAN'S LITTLE GEM. One foot high; bears heavily and of excellent quality; slightly later than the American Wonder. A favorite sort. **Price—10c per pkt.; 40c per lb. Prepaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 32c per lb. in 100-lb. lots.

NOTT'S EXCELSIOR. This extra fine pea will stand planting very early, almost as soon as the smooth sorts, and produces fine, large pods, one-third larger than American Wonder. Dwarf in habit; height 1 foot. **Price—10c per pkt.; 40c per lb. Prepaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 32c per lb. in 100-lb. lots.

PEAS—Continued

Dwarf Telephone or Daisy

I market-gardened a number of years, and if I were offered only two varieties of peas I would choose Alaska for early and Dwarf Telephone for main crops. It is a cross between the Standard Telephone and Strata-gem, and is an improvement on both of these varieties. It grows 18 inches high and yields an abundance of long, well-filled pods, containing from 7 to 11 large wrinkled peas of the finest quality.

A vigorous growth is characteristic of this sort. For the market or home garden there is none better. Every planter should have some of this. **Price—10c per pkt.; 55c per lb. Prepaid.**

Not prepaid—45c per lb. Cannot fill large orders.

Telephone

The Telephone has become one of the leading peas with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, with large, coarse, light-colored leaves and producing an abundance of very large pointed pods filled with very large peas which are tender, sweet and of excellent flavor. It comes into use soon after the Premium Gem and is one of the best sorts for either home or market. **Price—10c per pkt.; 45c per lb. Prepaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 30c per lb. in 100-lb. lots.

Alderman

The Alderman is of the Telephone type, and for early, main crop it is one of the best. The vines are about four feet high and very productive, the pods four to five inches long and an attractive dark green. The peas are very large and of excellent quality. The Alderman is the pea that meets the market gardener's demand for above qualities. **Price—10c per pkt.; 45c per lb. Prepaid.**

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots; 30c per lb. in 100-lb. lots.

PEAS—Continued

Stratagem

This is a long-podded, dark-colored sort of very fine quality which is much in demand with market growers.

The vines grow vigorously, about 18 inches high, and bear abundant crops of these large pods, containing 9 to 11 large wrinkled peas. They are very large and uniform. My stock is of the best produced in the country. Price—10c per pkt.; 45c per lb. Prepaid.

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots.

Pride of the Market

Vines of medium height, stiff, with large, dark green leaves and bearing at the top, generally in pairs, a good crop of large, pointed dark green pods well filled with large peas of good flavor. I have given this variety special attention and the stock I offer is so much superior to that commonly sold as to seem a different sort. I recommend it as one of the very best of the large-podded varieties, especially suitable for market gardeners. Price—10c per pkt.; 45c per lb. Prepaid.

Not prepaid—35c per lb.; 33c per lb. in 10-lb. lots.

Horsford's Market Garden

The vine is of medium height, hardy and very productive, giving the greatest number of pods of any on our list. Foliage dark green, leaves small. Pods contain 5 to 7 medium-sized, sweet, dark-green peas which retain well their color and sweetness after canning. Price—10c per pkt.; 40c per lb. Prepaid.

Not prepaid—30c per lb.; 28c per lb. in 10-lb. lots; 26c per lb. in 100-lb. lots.

LARGE WHITE MARROWFAT. Late variety, large, well-filled pods. Vines hardy, strong and vigorous; pods fine, broad and of a leathery appearance and borne near the top of the vine. Contain 5 to 6 large peas of good substance and flavor, but not so sweet as the wrinkled sorts. For many years this has been used in immense quantities by canners. The peas are large, round, white and slightly oval. Height of vine 3½ feet. Price—10c per pkt.; 40c per lb. Prepaid.

Not prepaid—30c per lb.; 28c per lb. in 10-lb. lots; 26c per lb. in 100-lb. lots.

BLACK-EYED MARROWFAT. Growth and general characteristics similar to the above. The peas have a distinct black eye, which does not show when they are in the green state. Is more prolific than the white. Price—10c per pkt.; 40c per lb. Prepaid.

Not prepaid—30c per lb.; 28c per lb. in 10-lb. lots; 26c per lb. in 100-lb. lots.

The crop of Seed Peas is very short.

Prices quoted hold good only so long as my supply lasts. Same applies to all other seeds.

PARSNIPS

Prepare a seed bed as for beets. Drill in rows 18 inches apart, covering the seeds one-half inch deep. The seeds germinate slowly, and a few lettuce seed mixed with the parsnip will come up quickly and mark the row so you can cultivate the parsnip before it comes up, if desired.

Plant the seed very early, as soon as the soil will do to work. Give frequent cultivation and thin to 4 inches apart in the row.

Parsnips are of great value both for the table and for feeding stock. They yield an abundant crop.

Plant 4 pounds of seed per acre; $\frac{1}{4}$ oz. to 100 feet of drill.

Hollow Crown or Large Sugar Parsnip

This is a very desirable sort; productive, large, smooth white skin, uniform in shape, tender and of best quality. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb., postpaid; not prepaid, 75c per lb. in 10-lb. lots and up.

Guernsey

A very fine variety which does not grow so long as the Hollow Crown, but broader shouldered. It is easily gathered, and yields an abundance of very smooth, fine-grained roots. Price—5c per pkt.; 10c per oz.; 25c per $\frac{1}{4}$ lb.; 85c per lb., postpaid; not prepaid, 10-lb. lots and up 75c per lb.

Peppers

Give peppers the same cultural methods as egg plants. (See egg plant).

Select Ruby Giant

My seed of this variety is extra fine. Many who planted it for market report having grown the finest and most profitable crop they ever grew. I sell large quantities of this seed to individual growers and associations.

The fruits are very large, often measuring 5 inches in length and 3 to 3 $\frac{1}{2}$ inches in diameter. AN EXCELLENT MANGO PEPPER.

The best and most profitable mild red pepper for market or family use: so sweet and mild that they can be eaten raw, like an apple; largest size. Price—5c and 10c per pkt.; 50c per oz.; \$1.75 per $\frac{1}{4}$ lb.; \$6.50 per lb.; \$6.25 per lb. in 5-lb. lots and up, prepaid.

Ruby King

This is a well-known and excellent variety, shaped as shown in cut. Green when suitable for mangoes, very mild and a profitable sort to grow. Price—5c and 10c per pkt.; 50c per oz.; \$1.75 per $\frac{1}{4}$ lb.; \$6.50 per lb.; \$6.25 per lb. in 5-lb. lots and up. Prepaid.

PEPPERS—Continued

Chinese Giant Pepper

A very large variety of extra fine quality. Not so long as Ruby King, but thicker, and one of the best mango peppers. Well known and well liked by market growers. Price—5c and 10c per pkt.; 60c per oz.; \$2.00 per ¼ lb.; \$7.00 per lb.; \$6.90 per lb. in 5-lb. lots and up. Postage or express paid.

LONG RED CAYENNE. A small, long bright red sort, very productive, extremely strong and pungent. Price—5c per pkt.; 30c per oz.; 90c per ¼ lb.; \$3.50 per lb. Postage or express paid.

LARGE BELL OR BULL NOSE. A favorite and well-known pickling sort; is early, large, mild and thick-skinned. Price—5c per pkt.; 35c per oz.; \$1.00 per ¼ lb.; \$4.00 per lb. Postage or express paid.

MAMMOTH GOLDEN QUEEN. One of the largest, handsomest and most productive of all varieties; color bright golden yellow; large as Ruby King; flavor mild and pleasing. Price—5c per pkt.; 45c per oz.; \$1.50 per ¼ lb.; \$5.50 per lb. Postage or express paid.

SWEET SPANISH. Grows to very large size; sweet flavor, fine for salad. Price—5c per pkt.; 45c per oz.; \$1.50 per ¼ lb.; \$5.50 per lb. Postage or express paid.

MEXICAN CHILI. Used by the Mexicans in making the famous chili con carne and hot tamales. Grows from 3 to 5 inches long and quite pointed. Requires a long, warm season. Plants should be started quite early in hot beds. I offer my customers the following low prices on this seed: 5c per pkt.; 35c per oz.; \$1.00 per ¼ lb.; \$4.00 per lb. Postage or express paid.

RED CHERRY. Plants tall, bearing a profusion of bright red, round fruit, which is very pungent when ripe. The plant is very handsome and an ornament to the garden. Price—5c per pkt.; 30c per oz.; 90c per ¼ lb.; \$3.25 per lb. Postage or express paid.

RHUBARB

Rhubarb is one of my specialties, and this year my crop of seed was a large portion of the entire product of this seed.

Rhubarb is one of the most valuable early garden products, and every one of my customers should grow some of it. Rhubarb pies, rhubarb sauce and rhubarb jelly are very fine. The leaf stalk is used. It is the earliest spring vegetable.

Culture.—Rhubarb seed may be drilled in rows 2 feet apart, covering the seed 1 inch deep. Thin the plants to 6 inches apart in the rows.

When 1 year old transplant either in the fall or spring to the permanent bed which has been previously prepared by manuring heavily and plowing deep, setting the plants 4 feet apart in rows 6 feet apart. Give a heavy coat of manure each spring. Cultivate well and ridge slightly. Do not gather any of the rhubarb from the permanent bed until the second year and do not pull off more than half the stalks at any one time, as this weakens the plants.

When seed stalks appear, break them off, as if the plants run to seed they become exhausted and produce small stalks.

Rhubarb seed does not reproduce true, and while good results obtain from seed, the best plan is to set out clumps containing two and three eyes each, cut from old crowns which have produced the class of stalks desired.

I recommend the clumps which I offer below as being from crowns which have produced very large scarlet stalks of the finest quality, either for home use or market.

Rhubarb Linnaeus

As stated above, this seed does not reproduce true. My seed, of which I grow thousands of pounds is produced from selected crowns, and better cannot be had. Price—5c per pkt.; 15c per oz.; 45c per ¼ lb.; \$1.50 per lb.; \$1.40 per lb. in 10-lb. lots and up. Postage paid.

Rhubarb Roots

These roots are cut from select crowns and produce very fine quality of rhubarb. The large crowns are divided into clumps of two and three eyes each. Price—60c per doz.; \$3.50 per 100; \$30.00 per 1,000; \$28.00 per 1,000 in 10,000 lots. These prices at buyer's expense for transportation.

**VERY
SHORT
CROP**

RADISHES

For forcing under glass or in hot beds use a rich sandy soil. Scatter the seeds evenly over the surface, 40 to 50 to the square foot and sift soil over the seeds, covering about 1 inch deep. Keep the soil moist and of even temperature, at about 70 degrees, for best results. Give good ventilation.

Under these conditions you should be able to market the whole crop in four to five weeks.

For outdoor culture sow in drills 14 to 18 inches apart as soon as the soil can be worked in the spring. Sow some of the small sorts, and at the same time some of the long. I prefer Cincinnati Market and White Icicle. These are ready soon after the small sorts and do not get pithy so soon.

The soil should be very rich, and if under irrigation, water regularly to keep the plants continuously growing, but do not water too heavily.

I am very careful to have the best seed produced, and where better results are had by so doing I offer seed from transplanted roots. This applies particularly to my Cincinnati Market. Many who buy large lots of this seed state they have not been able to secure its equal elsewhere. Ten to 12 pounds of seed per acre; 1 oz. to 150 feet of drill.

CRIMSON GIANT. This valuable early sort is one of the finest for extra early; color very deep scarlet; very solid, slow to get pithy and very desirable for the home garden or early home market. Excellent to grow under glass. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

EARLY SCARLET TURNIP. A fine, quick-growing sort; small, round, crisp, tender, of good eating qualities. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

ROSY GEM OR WHITE-TIPPED FORCING. One of the quickest sorts and of excellent quality. Bright scarlet with white tips; of fine appearance. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

EARLY WHITE TURNIP. Of quick growth; roots round, white, with small tops. Good for forcing or open ground. Flavor very good. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb. Prepaid.

FRENCH BREAKFAST. (Olive shaped.) Deep crimson with white tips. A well-known and equally well-liked variety. One of the best early radishes. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

EARLY SCARLET. (Olive shaped.) Oval, very tender and good quality; fine for forcing or open ground. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

SURPRISE. (Olive shaped.) Skin brown, flesh white, crisp and tender. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

EARLY WHITE. (Olive shaped.) Small, sweet and crisp. Like the other olive-shaped sorts except in color. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb.

All Radish Seed delivered free by parcel post or express.

RADISHES—Continued

Burrell's Long Cincinnati Market

Special Market Gardener's Strain

Single Market Gardeners buy 50 to 100 pounds of this seed from me at a time. The finest Long, Light, Scarlet Radish, nearly transparent, small tops, will stand planting close together, slow to run to seed; grows straight and smooth, 6 to 8 inches long, tender, crisp and does not become hollow and pithy. If you grow for market and plant only two sorts they should be my Long Cincinnati Market and New White Icicle. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.70 per lb. in 10 lb. lots and up. Prepaid.

Long Chartier

A well-liked sort, which attains a very large size before becoming unfit for use. Color, red at the top, changing to pink in the middle and white at the tip. Many market gardeners plant this exclusively for

their market trade. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb. Prepaid.

Long Scarlet Short Top

The standard long variety. Well known for a long time. Good for home or market garden. Roots long, growing partly above the ground; straight, smooth, rich red and of fine quality; a quick grower. Price—5c per pkt.; 15c per oz.; 40c per $\frac{1}{4}$ lb.; \$1.50 per lb. Prepaid.

Long Brightest Scarlet

This new sort much resembles Long Scarlet in shape, but is slightly shorter. It is a very bright scarlet with a white tip and very attractive in appearance. The quality is extra good and it matures quickly. It is a good seller and fine for home gardens as well. Price—5c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb. Prepaid.

Long Black Spanish

Black-skinned, large roots, slightly pungent, hardy. Price—5c per pkt.; 15c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.75 per lb.

All Radish Seed delivered free by parcel post or express.

Be sure to order some of the Giant Japanese Radishes listed page 61—these are very fine.

RADISHES—Continued

New White Icicle Radish, Burrell's Select Seed

This beautiful transparent white variety much resembles the White Vienna. It is of excellent quality. Under favorable conditions stands a long time without going to seed and remains crisp and tender.

It is a sort which should be included in every order; suitable for forcing, and none better for the home or market garden.

Price—5c per pkt.; 20c per oz.; 55c per ¼ lb.; \$2.00 per lb.

WHITE VIENNA, OR LADY FINGER.

Remaining long in edible condition; always sweet, crisp and tender, and of excellent quality. I hope to find this sort in every order, and I know you will be pleased.

Price—5c per pkt.; 20c per oz.; 55c per ¼ lb.; \$1.75 per lb.

WHITE STRASBURG.

A large, white, attractive variety of medium length; matures early and remains for a long time in edible condition. Price — 5c per pkt.; 15c per oz.; 40c per ¼ lb.; \$1.50 per lb.

All Radish Seed delivered free by parcel post or express.

GIANT JAPANESE RADISHES

Seed of the following varieties should be planted about May 1st in the middle and northern states. Prepare a deep seed bed and plant same as other radishes but thin to 8 or 10 inches apart. Cultivate frequently and water if convenient. These radishes often grow to weigh 10 to 15 pounds and are of excellent quality either served as ordinary radishes or cooked. In Japan they take the place of potatoes. Wonderful yielders.

SAKURASHIMA MAMMOTH RADISH. This variety has been grown of immense size; is a transparent white, never pithy. Can be stored in sand or pit and used during the winter. Excellent either as other radishes are eaten without cooking or very good cooked. After growing these in my own garden I believe they should be in every garden. This variety has been grown to weigh 30 pounds. Price—10c per pkt.; 20c per oz.; 60c per ¼ lb.; \$2.00 per lb. Prepaid.

NERIMA LONG RADISH. Think of a radish two to three inches in diameter, fifteen to eighteen inches long. Beautifully transparent white and of excellent quality. This is what you will grow under good conditions from my seed of the Nerima Long. Grow these two fine Japanese Radishes for exhibition and they will attract a great deal of interest. The best part of it is their excellent quality. Price—10c per pkt.; 20c per oz.; 60c per ¼ lb.; \$2.00 per lb. Prepaid.

Be sure to plant some of the Giant Japanese Radishes listed above.

Okra

Extra Early Dwarf (Green Pods). Very early and productive. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postpaid.

Early Dwarf White (White Pods). Pods extra long and when fully matured, measuring a foot in length and very thick and fleshy; early and prolific. Fine for soups. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

White Velvet. A great improvement over older varieties; pods larger, white, very smooth, a more abundant bearer; superior quality. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

Perkins' Perfection Mammoth Green Pod. This seed is grown for me by Mr. Perkins, who originated it. He has given the crops great care, and the stock is of the best to be had. The most productive. Pods very large. Extremely early, tender and preferred by canners as well as growers for market. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 85c per lb. Postage or express paid.

Salsify (Vegetable Oysters)

Many prefer salsify to oysters. The soup from which gives off an odor exactly the same as oysters, and by some liked better than oyster soup. Every garden should produce some of this easily grown plant. Plant very early in the spring. Prepare the soil as for beets; drill in rows 14 to 18 inches apart, so the plants stand 2 to 3 inches apart. The roots grow more nearly straight when close together.

The roots can be used from early fall until spring. Some may be stored in the cellar for winter or covered in a silo in the field. Others may be left in the row where they grew until spring; 8 pounds of seed per acre; 1 ounce to 100 feet of drill.

Salsify—Mammoth Sandwich Island

This large sort is the most profitable to grow. It is white, of good flavor and an excellent sort for market. See view above—picking salsify on my seed farm. Price—5c and 10c per pkt.; 20c per oz.; 60c per ¼ lb.; \$2.00 per lb. Delivered free by parcel post or express.

Spinach

Round leaved Viroflay. Large, thick leaf. Well known. Price—5c and 10c per pkt.; 20c per oz.; 50c per ¼ lb.; \$1.50 per lb.

Bloomsdale, Savoy Leaved. Leaves large, thick, curled. An excellent sort. Price—5c and 10c per pkt.; 20c per oz.; 50c per ¼ lb.; \$1.50 per lb.

New Zealand Spinach

This variety of recent introduction differs from other varieties in that it can be planted in hot weather and thrives throughout the summer.

The rows should be about 2 feet apart and plants 6 to 8 inches apart in the rows.

The tender shoots are of good quality, and this variety is much liked by Southern planters, especially in the Imperial Valley of California.

Price—5c and 10c per pkt.; 20c per oz.; 50c per ¼ lb.; \$1.50 per lb. Prepaid.

Prickly Winter

An improved strain of the long standing type of spinach. Plant very large at maturity, with many medium-sized leaves, very vigorous and hardy. Leaves usually rounded at end, quite thick and uniformly dark green. Seed prickly. Usually planted in the fall, but also well adapted for spring use. Price—5c per pkt.; 20c per oz.; 50c per ¼ lb.; \$1.50 per lb.

Swiss Chard

This is really of the beet family. The mid-leaf, which is very broad, white and tender, is cooked much like asparagus; also grown extensively for chickens. Price—5c per pkt.; 10c per oz.; 25c per ¼ lb.; 80c per lb.

All Spinach Seed delivered free.

SQUASH

The cultural methods for melons and cucumbers will apply. Plant summer sorts 3 to 4 feet each way and thin to one plant when they have five or six leaves. Winter sorts 6 to 8 feet each way and thin to one plant. Make the soil rich. Handle very carefully when harvesting, so as not to bruise them and injure the keeping qualities. Cut from the vine, leaving the stem on the squash; store where there is no danger of freezing. For insects, see pumpkins. Plant 3 pounds of seed per acre.

Early Mammoth Yellow Summer Crookneck

My strain of this variety is very fine. The result of individual selection covering a period of many years. (See cut for appearance.) They are attractive in appearance, uniform in quality and the finest crookneck for early market. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb. Pre-paid.

Summer Crookneck

The old standard sort; early and very productive. Matures the bulk of its crop a little earlier than the Mammoth Summer Crookneck. Fruits when fully grown are about 1 foot long, with uniformly crooked neck and surface densely warted; color bright yellow. Shell very hard when ripe. Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.

Burrell's Select Early Mammoth White Bush Squash

EARLIEST, FINEST STRAIN FOR MARKET GARDENERS.

I grow a large acreage of squashes for seed, and call your attention to the photograph taken in one of my fields. When you buy of me you are getting the seed from the grower and can be assured of the fact that I take the greatest care to have the seed right in quality.

This squash is very early and just the right size for market. The bush habit is well established and the uniform appearance makes it a profitable sort when it comes to packing, as the fruits all look alike.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.

DWARF WHITE BUSH SCALLOP.

A small, well-known sort much grown for market. Bush habit not so well established as Mammoth White Bush.

Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.

All Squash Seeds delivered free by parcel post or express.

SQUASH—Continued

Improved Hubbard

This is the standard variety and has no superior. If you are planting but one variety for winter I would recommend that this be the Hubbard. It is a favorite both for market and home use. Good specimens are about equal to the sweet potato. The shell is hard and dry, and with some care can be kept until late in the spring. My strain is very fine. **Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.**

CHICAGO WARTED HUBBARD. This very fine variety much resembles the Original Hubbard except that it is larger and more covered with warts. Can be kept until late spring. The shell is very hard and dry. **Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.**

GOLDEN HUBBARD. This is slightly smaller than the Original Hubbard and instead of having a slate green rind, it is a rich golden color. In quality it is unsurpassed. It is an excellent keeper. **Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.**

GOLDEN BRONZE. A very fine sort; flesh thick, deep reddish orange color; fine grained and of excellent flavor. A good keeper; shape oval. largest at blossom end; the rind is golden bronze in color when ripe. **Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.**

PIKE'S PEAK. An excellent sort, rather long for its thickness; slate colored rind; flesh creamy yellow, of good flavor; a good keeper. **Price—5c per pkt.; 10c per oz.; 30c per ¼ lb.; \$1.00 per lb.**

TOMATOES

For very early fruit the seed should be sown in a hot bed about the first week in March in drills 5 inches apart and half inch deep. Later sowings may be made until the last of April. Sufficient plants for a small garden may be started by sowing a few seed in a shallow box or flower pot and placing in a window in the house. When the plants are 3 or 4 inches high they should be set out 4 or 5 inches apart in another hot bed or cold frame, or removed into small pots, allowing a single plant to a pot. Expose to the air as much as possible to harden. Water freely at time of transplanting and shelter from the sun a few days until the plants are established. Cultivate thoroughly as long as vines will permit, but the last two or three workings should be very shallow (surface cultivation) or the crop may be badly injured, especially if the cultivator is run too near the plants. Tomatoes will admit of training to stakes or trellises, and the fruit is very much improved, not only in appearance but in quality. This mode of cultivation is quite common among gardeners who grow for early market. The usual method is to set one strong plant to a stake 5 to 7 feet high, tying the plants up with wool or other strong, soft, twine, pruning out quite freely as vines advance in growth. By this method plants may be set much closer than in the ordinary way. For fine, large specimens of high color and attractive appearance generally, grow the clusters of the fruit in paper sacks, as is commonly practiced by grape growers. The sacks should be put on when the tomatoes are about three-fourths grown. About 2,000 plants from 1 ounce of seed is a safe estimate.

What About the Price of Tomato Seed

Yes, I make a good profit on tomato seed at \$1.00 per ounce, but no more than the gardener who grows select early tomatoes and sells them for 5c per pound, and it takes the finest of these very early tomatoes to produce this best seed. Then, by planting an ounce of this choice seed at \$1.00, you have only to sell 20 pounds of early tomatoes per acre at 5c per pound to pay for this seed, and a good crop may enable you to average 5c per pound for 2,000 to 3,000 pounds per acre, besides giving you a total yield of 12 to 20 tons per acre. It is only this: The best seed is the lowest in cost in the long run and the person making a specialty of carefully selecting the seed should get a price for it equal to what may reasonably be expected for the early fancy tomatoes on the market.

My general list of tomato seeds are selected from tomatoes grown exclusively for seed, all the good fruits of the crop being cut. This seed is grown from carefully selected stock seed, which is in turn grown from very select specimens in stock seed plots, but my finest seeds are grown from the finest selection of stock seeds, and the seeds offered are again selected from the finest first fruits to ripen.

I sell tomato seeds to thousands of market growers, and four out of five buy the best seeds. Many of these persons have planted this best seed for several years and continue to order them each year.

Burrell's Special Selection of Chalk's Early Jewel Tomato

Selecting the very finest specimens of this valuable variety has resulted in this special selection which I have to offer you of my own growing, and I recommend it to the most critical growers. No matter how particular your trade is, no matter how good tomatoes you have been growing, you can afford to plant liberally of this seed.

The fruits begin to ripen four or five days later than the Earliana; are large, bright red, quite solid and very smooth; they ripen without cracks or green core. The flesh is thick and solid, with comparatively few seeds. I count on establishing as great a record for my special strains of tomato seed as for my special cantaloupe seeds, and believe I am entitled to such a price as will pay me for taking extreme care in selection.

Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb. Not over $\frac{1}{2}$ lb. of this grade to one customer. Postpaid.

Standard Grade Chalk's Early Jewel. This is grown especially for seed for me under contract by a tomato seed specialist, but is not my own growing. **Price**—5c per pkt.; 35c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.75 per lb.; \$3.50 per lb. in 5-lb. lots and up. Postpaid.

JOHN BAER IS NEXT TO MY SPECIAL EARLY JEWELL IN QUALITY

JOHN BAER TOMATO

BURRELL'S SPECIAL SELECTION

When this now famous tomato was introduced I purchased some of the introducer's stock and have made selections from this seed, and this year grew an excellent crop from this selection and offer seed which I recommend to market growers or for home gardens.

The deep red fruits are evenly sized, very smooth, resembling my special Early Jewell in shape, color and habit of growth.

My Special Selection of John Baer Tomato is in the same class as the other special stocks which I have been supplying to thousands of the most critical planters of the country and will surely meet with the same welcome and appreciation.

The vines are medium in size, permitting planting about four feet apart each way. The tomatoes are well protected from sun-scald and set on an extremely heavy crop.

Remember the same conditions which have made my Rocky Ford Grown Cantaloupe and Cucumber Seed superior to others make my tomato seed such as produces more vigorous plants from which the fruit is not only better and the yield more abundant, but the earliness is increased.

Plant a large acreage of Burrell's Special John Baer Tomatoes this year and you will be well repaid if growing conditions are favorable.

Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb.; \$13.50 per pound. Prepaid.

Burrell's Special John Baer Tomato

Spark's Earliana Tomato Burrell's Special Strain

This **Extra Early**, red tomato has been the source of large returns with many market tomato growers. The plants grow rather open and are loaded with fruits. Will grow best set about $3\frac{1}{2}$ feet apart each way, and by starting the plants early in hot beds you will have tomatoes about sixty days after setting out the plants. The bright red fruits are quite uniform in shape, good marketable size and very smooth for so early a sort. The habit of growth is such that the vines do not hide the fruits, making them less liable to sun-scauld, as from the first they become accustomed to the direct rays, and also allowing them to be picked at small expense.

They are borne in large clusters and the yield is heavy.

This strain is far ahead of the Standard Earliana seed. One of the most critical seedsmen of the United States went over my field the season of 1909 and wanted to purchase of this seed to introduce it as a novelty. He stated they were the finest Extra Early tomatoes he had ever seen, and were entitled to a distinct place because of their superior quality.

If Extra Early tomatoes of the finest quality will make you money, or if you live in the North where it is difficult to get the tomatoes early enough to mature the crop, this is the sort you want.

One of my Iowa customers writes: "I had ripe tomatoes two weeks earlier than any of my neighbors." That would mean a good deal to you, wouldn't it?

Price—10c per pkt.; 30c per $\frac{1}{4}$ oz.; \$1.00 per oz.; \$3.75 per $\frac{1}{4}$ lb.; \$7.00 per $\frac{1}{2}$ lb. No more than $\frac{1}{2}$ pound to one person.

Standard Sparks' Earliana Tomato. This seed is very desirable. It is grown for me by a tomato seed specialist. Price—5c per pkt.; 40c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.; \$4.25 per lb. in 5-lb lots and up, postpaid.

Bonny Best Tomato

This has proven one of the biggest money-makers with tomato growers. It should be planted wherever tomatoes are grown. North or South, it is equally valuable. It is within a few days as early as Earliana—large, bright red, solid; evenly shaped and of the finest quality; a good shipper and an excellent sort for canning.

My stock is of the best strain obtainable in the country, and the great care in growing and selecting this stock should recommend it to all particular tomato growers.

The fruits are borne in clusters, usually of five, and the yield is very heavy.

Price—5c per pkt.; 15c per $\frac{1}{4}$ oz.; 50c per oz.; \$1.85 per $\frac{1}{4}$ lb.; \$3.50 per $\frac{1}{2}$ lb.; \$6.50 per lb., postpaid.

TOMATOES—Continued

MARKET GARDENERS' STRAIN BEAUTY TOMATO.

This strain has been carefully selected for a number of years, until it is now far ahead of the seed of this variety usually offered. The photo above is of a basket of these tomatoes which won first premium at the Rocky Ford Fair. On the market 8-pound baskets of these sold readily at 50c per basket, when 20-pound baskets of ordinary tomatoes were selling at 75c per basket, nearly double the price of ordinary tomatoes. It pays to plant only the best.

This strain is not offered through any other source. Those who secure a supply will be fortunate.

Remember, an ounce of seed produced 2,500 to 3,000 plants, and at the price per ounce, the cost compared with the crop is practically nothing.

No better sort for home garden or shipping; hardy, strong grower, productive; fruits large, smooth and of excellent quality. Color a glossy crimson tinged with purple. Grows in clusters of four to six large fruits and retains its large size late in the season. The flesh is firm, skin tough, and it seldom rots or cracks after it rains. They can be picked as soon as there is a slight change in color from green, and ripen up nicely, look well and keep a long time after ripe.

Price—10c per pkt.; 50c per ½ oz.; \$1.00 per oz.; \$3.75 per ¼ lb.; \$14.00 per lb., postpaid.

I received one order for 100 pounds of this seed—\$1,400.00. Hundreds of the leading tomato growers ordered from 1 ounce to 1 pound.

An ounce of this seed may make your crop worth \$100.00 more than ordinary seed.

TOMATOES—Continued

The New Hummer Tomato

THIS VALUABLE VARIETY was introduced in 1907 and sold by the originator at $\frac{1}{2}$ c per seed (20c per packet of 40 seeds). I secured a supply of this seed from him and grew my supply of seed here under irrigation, where there is no better place to mature the best seed. From this start I selected the seed offered here. It was one of the best crops of tomatoes I have ever grown. A representative of the Kansas City Packer visited the field and stated that he "BELIEVES it the finest sort in cultivation."

The fruits are round, with practically no indentation at the stem, color bright red. Fruit solid, with but few seeds set near the rind. No green core; the fruits ripen all over and clear through. The center cuts solid, bright red flesh of extra quality. Almost an extra early sort.

Price—10c per pkt.; 75c per oz.; \$2.75 per $\frac{1}{4}$ lb.; \$10.00 per lb., post-paid.

Livingston's Globe Tomato

This is one of the finest market sorts. The fruits are large, and a good marketable size is retained throughout the season; always smooth, firm-fleshed and with few seeds; ripens evenly; color, a fine glossy rose, tinged with purple, and without the slightest hint of yellow at any stage of ripening. Fruit clusters spring from the main stem much closer together than in most sorts. It is a remarkably good keeper, none of the many varieties we grow surpassing it in this respect. In quality there is nothing more to be desired, being mild, pleasant and of delicate flavor, and the beautiful and attractive globe-shaped fruits will find ready sale. I sell large quantities of this seed to Southern growers.

One large Florida grower wrote me that my Globe tomato seed gave better results than any other Globe tomato seed they could get and wanted more "just like we got last year."

Price—10c per pkt.; 40c per oz.; \$1.50 per $\frac{1}{4}$ lb.; \$5.50 per lb.; 10 lbs., \$5.00 per lb., postpaid.

TOMATOES—Continued

The following prices include free delivery by parcel post or express:

JUNE PINK. This sort is among the extra earlies and the fruits are of good quality. It is grown very extensively in many fruit sections, where first in the market means so much. The fruits are medium size, pink, and of good quality. Price—5c per pkt.; 30c per oz.; \$1.00 per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.25 per lb. in 5-lb. lots and up.

LIVINGSTON'S EARLY ACME. A tomato especially for early market use. Well-known and generally cultivated, both for early and main crops. Plants are of strong and vigorous growth; very productive; fruits of medium size, perfect form, round, slightly depressed at the ends and very smooth (never rough); color a glossy red, with purplish tinge; ripens all over and through at the same time. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

LIVINGSTON'S BEAUTY, STANDARD GRADE. A decided favorite for home, market or shipping; hardy, a strong grower, productive, large, always smooth, perfect shape and excellent quality. Color a very glossy crimson with a tinge of purple. Grows in clusters of four to six large fruits, retaining its large size late in the season. Ripens early and is entirely free from ribbed and elongated fruit. Flesh very firm, has a tough skin and but few seeds; seldom rots or cracks after a rain. For shipping or early market it cannot be excelled. They can be picked quite green, look well, ripen nicely and keep a week after ripe. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

THE MIKADO. Notwithstanding that it produces very large fruits, it is at the same time one of the very earliest grown. The tomatoes are produced in immense clusters, and are perfectly solid, generally smooth, but sometimes irregular. The color is purplish red. Foliage distinct from any other variety. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

DWARF CHAMPION. Most distinct and valuable. Dwarf, stiff habit, dark green foliage, not needing any support. It is very early and wonderfully prolific. Color same as Acme. It is perfectly round and smooth, of medium size. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

NEW STONE. Is a well-known variety, which ripens for main crop; very large and of bright scarlet color; very smooth, with occasionally a specimen slightly octagonal shape; ripening evenly to the stem, and as the name indicates, it is very solid and an excellent shipper. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

MATCHLESS. This new late variety is one of the best, handsomest and heaviest yielders known. The tomatoes are large, bright red and ripen very evenly, yielding few seeds. They are an excellent shipping variety and also good for canning. Price—5c per pkt.; 35c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.; \$4.25 per lb. in 5-lb. lots and up.

MAGNUS. A distinct and new variety; purple, robust in habit and a good main crop sort. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

LIVINGSTON'S PERFECTION. The fruit is almost round, ripens clear up to the stem, is solid and rich in flavor. The skin is both thin and tough, making it a good shipper, while its clear, scarlet color makes it most attractive. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

PONDEROSA. This is the largest fruited tomato and of fine quality for slicing. The vines are of strong, rather open growth; fruits largely oblong in form, deep through and generally ridged or ribbed; deep purple in color. The flesh is solid, with small seed cells, and of fine, sweet flavor. Planted in good soil, fruits frequently attain a weight of 1 pound and over. Rather late to ripen. Price—5c per pkt.; 35c per oz.; \$1.25 per $\frac{1}{4}$ lb.; \$4.50 per lb.; \$4.25 per lb. in 5-lb. lots and up.

HONOR BRIGHT. A very heavy yielder of uniformly good fruit. The quality is excellent when ripened on the vines, and if picked when first beginning to show color it ripens in transit to market or when laid on shelves after frost and is of very good quality. One of the best. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

PARAGON. Fruit large, dark red in color and perfectly smooth. The flesh is solid and of excellent flavor. It ripens evenly and quickly. Much used for canning purposes. The foliage is heavy. The Paragon is sometimes described as being as smooth as an apple. It is a favorite market variety in certain sections. A fine variety and a heavy bearer. Price—5c per pkt.; 30c per oz.; 90c per $\frac{1}{4}$ lb.; \$3.25 per lb.; \$3.00 per lb. in 5-lb. lots and up.

LIVINGSTON'S FAVORITE. A large, smooth, dark red variety; a good shipper and canner. Price—5c per pkt.; 30c per oz.; \$1.10 per $\frac{1}{4}$ lb.; \$4.00 per lb.; \$3.75 per lb. in 5-lb. lots and up.

WHITE'S EXCELSIOR. A large pink main crop sort of considerable value. In some sections it is a favorite sort. While not an early sort, it is an excellent shipper. Price—5c per pkt.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.75 per lb. in 5-lb. lots and up.

YELLOW PLUM. Fruit plum-shaped, deep yellow color; flesh yellow and good; esteemed for preserves. Price—5c per pkt.; 30c per oz.; 90c per $\frac{1}{4}$ lb.; \$3.50 per lb.; \$3.25 per lb. in 5-lb. lots and up.

Above prices parcel post or express paid.

TURNIP

White Egg

broadcast among corn and potatoes. It is the bottom and a reddish purple above the grower. It is a fine variety, either for the table or for stock feeding. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.65 per lb. in 10-lb. lots.

EARLY WHITE FLAT DUTCH. An excellent garden variety; the best for spring sowing. Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.65 per lb. in 10-lb. lots.

EXTRA EARLY PURPLE TOP MILAN. This is the earliest turnip in cultivation and a splendid variety; bulb white and flat, of medium size with a bright purple top; one of the sweetest and finest flavored of summer sorts. Price—5c and 10c per pkg.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots.

EARLY WHITE MILAN. One of the earliest turnips, possessing all of the good qualities of the Early Purple Top Milan. It is very smooth and entirely white. Its excellent qualities and fine appearance make it a valuable crop to grow, and it is ready for market a week earlier than any other white variety; will produce a heavy crop. It will be one of the best for market. Price—5c and 10c per pkt.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots.

PURPLE TOP WHITE GLOBE

This excellent table variety is globular in shape, of good size and very attractive appearance. The roots are large, purple or dark red above ground, white below. The flesh is white, fine grained and tender. The roots when in best condition for the table are about 3 inches in diameter, but can be grown much larger for stock feeding. This sort keeps well for so early a variety and is one of the best for market use. Sometimes known as Red Top White Globe.

Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.90 per lb.; \$1.80 per lb. in 10-lb. lots.

Above prices prepaid by Parcel Post or Express.

I handle thousands of pounds of turnip seeds and offer of the best seeds. I have these grown by one of the leading European specialists, and after fully testing them compared with others, I recommend them as of the best.

Every person who plants a garden or field should grow some turnips.

For early use drill in rows or sow broadcast very early in the spring. For winter use sow in July or August broadcast and harrow in the seed.

Be careful not to get them too thick, as this results in all top and no turnip. One pound of seed is sufficient for an acre.

For winter use store in a cool cellar and cover with sand or silo them in the field by covering with earth, then a layer of straw, then more earth of sufficient depth to keep from freezing. When first siloed leave a small open space on the top covered with straw until cold weather, to prevent heating. When cold, freezing weather comes cover this.

White Egg. Belongs to the class of quick-growing fall turnips, and for this purpose should be sown August 10th in this latitude; a favorite with market growers for winter and early spring sales. Its shape is nearly that of an egg; very fine sort. Price—5c and 10c per pkt.; 15c per oz.; 50c per $\frac{1}{4}$ lb.; \$1.85 per lb.; \$1.75 per lb. in 10-lb. lots.

Purple Top Strap Leaved. The most widely cultivated and best-known variety. Used largely for sowing

round and flat, white on

the ground, and a very quick

grower. It is a fine variety, either for the table or for stock feeding.

Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.65 per lb. in 10-lb. lots.

EARLY WHITE FLAT DUTCH. An excellent garden variety; the best for spring sowing.

Price—5c and 10c per pkt.; 15c per oz.; 45c per $\frac{1}{4}$ lb.; \$1.75 per lb.; \$1.65 per lb. in 10-lb. lots.

EXTRA EARLY PURPLE TOP MILAN. This is the earliest turnip in cultivation and a splendid variety; bulb white and flat, of medium size with a bright purple top; one of the sweetest and finest flavored of summer sorts.

Price—5c and 10c per pkg.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots.

EARLY WHITE MILAN. One of the earliest turnips, possessing all of the good qualities of the Early Purple Top Milan. It is very smooth and entirely white.

Its excellent qualities and fine appearance make it a valuable crop to grow, and it is ready for market a week earlier than any other white variety; will produce a heavy crop.

It will be one of the best for market. Price—5c and 10c per pkt.; 20c per oz.; 60c per $\frac{1}{4}$ lb.; \$2.00 per lb.; \$1.90 per lb. in 10-lb. lots.

PURPLE TOP WHITE GLOBE

This excellent table variety is globular in shape, of good size and very attractive appearance.

The roots are large, purple or dark red above ground, white below.

The flesh is white, fine grained and tender. The roots when in best condition for the table are about 3 inches in diameter, but can be grown much larger for stock feeding.

This sort keeps well for so early a variety and is one of the best for market use. Sometimes known as Red Top White Globe.

Price—5c and 10c per pkt.; 20c per oz.; 55c per $\frac{1}{4}$ lb.; \$1.90 per lb.; \$1.80 per lb. in 10-lb. lots.

Above prices prepaid by Parcel Post or Express.

FLOWER SEEDS

SEMPLER'S BRANCHING—CREGO'S GIANT

Asters

Asters are the **Queen of Autumn Annuals**. These beautiful flowers are easily grown. The seed I offer is the best to be had. For early flowers sow early in the spring in fine soil in boxes, which should be set in the greenhouse or in a sunny window. Transplant when well up to 3 inches apart and set out of doors as soon as the ground is warm. For later blooming—and the late blooms are the best—sow the seed in the open ground about time for the last frost and transplant, if desired; or they may be thinned and grown where the seed is planted.

SEMPLER'S BRANCHING ASTERS. The plants grow 18 inches to 2 feet high and branch freely. The full-petaled flowers are 3 to 4 inches across and born on long stems. Comes in flower late in the autumn. Colors—white, pink, crimson, purple, light blue and mixed. **Price** (any separate color or mixed), 10c per pkt.; 50c per $\frac{1}{4}$ oz.

CREGO'S GIANT ASTERS. This new giant-flowered sort has narrow petals. The outer petals curved back. The center petals overlapping and twisted. The flowers often measure 4 to 5 inches across. Separate colors, rose, pink, shell pink, purple and white. **Price**—15c per pkt., or mixed, 15c per pkt.; $\frac{1}{8}$ oz., 25c.

MIKADO PINK (ROCHESTER). A beautiful mid-season aster. The flowers are very large and well formed. Color, light rose, with lavender tint. Petals long and narrow. The center petals are curved and twisted, covering the center of the flower. Height, about 2 feet; branching. Stems, 12 to 15 inches long. **Price**—15c per pkt.; 40c per $\frac{1}{4}$ oz.

PEERLESS PINK. A very attractive delicate pink aster. The large flowers are borne on long stems. Height, 2 feet; branches freely. A very desirable late sort. **Price**—15c per pkt.; 45c per $\frac{1}{4}$ oz.

TRUFFOUTS PERFECTION PEONY-FLOWERED. A mid-season class of upright growth. Flowers large bell-shaped; stems long, curved inward; many shades running from white to pink, deep rose, light and dark blue; mixed. **Price**—10c per pkt.; 35c per $\frac{1}{4}$ oz.

GIANT COMET. The petals of this class of asters are long and narrow. They recurve and twist about the center as though the flower had been rapidly whirled around, causing the petals to curve around the center all in one direction. The plants grow about 2 feet tall; flowers large and uniform in shape. They are late bloomers. The flowers are very attractive on account of their light, feathery appearance. **Price**—White, pkt., 15c; $\frac{1}{4}$ oz., 45c; mixed, pkt., 15c; $\frac{1}{4}$ oz., 45c.

FLOWER SEEDS

CONTINUED

ALYSSUM, SWEET

Little Gem. A favorite little annual because of its fragrance and abundance of bloom. Grows only six inches high, yet one plant will cover a space 12 to 20 inches in diameter and be a mass of the purest white from early summer until frost. One of the finest plants for beds, borders and rockwork.

Price—5c per pkt.

ANTIRRHUM—Snapdragon

GIANT-FLOWERED MIXED. A most beautiful new sort, having all the finest colors and markings and a perpetual bloomer. The flowers are of immense size and produced in long spikes 1 to 2 feet in length. They succeed best in a rather light soil in a sunny position, and although perennials, are best treated as annuals. Price—10c per pkt.

CANDYTUFT

NEW EMPRESS. Among the most highly prized of summer annuals, considered indispensable for cutting. The heads of bloom are quite large and pure white. Perfectly hardy, grows easily and blooms throughout the season. Looks best in beds and masses. Sow outside where it is to bloom. Height 1 foot. Price—10c per pkt.

CANDYTUFT, MIXED. Bears a profusion of clusters of flowers in a wide range of colors. Very valuable for borders or effective in beds or masses. Sow very early in the spring, or late in the fall, rows 1 foot apart; thin to 3 inches apart in the rows; give plenty of water. Price—5c per pkt.; 20c per oz.

BALSAMS—Lady Slipper

DOUBLE CAMELIA-FLOWERED MIXED. An excellent strain. The flowers are large, of fine form and as double as a Camellia; colors varied and brilliant. For the finest double blossoms, transplant two or three times. Height 2 feet. Price—5c per pkt.; 40c per oz.

CANARY BIRD VINE

A member of the Nasturtium family. A beautiful rapid-growing annual climber, the charming little canary-colored blossoms bearing a fancied resemblance to a bird with its wings half expanded. Price—5c per pkt.

CANNA

CROZY'S DWARF MIXED. Produces plants of dwarf, luxuriant growth with immense gladiolus-like flowers of the most brilliant colors. They will bloom freely the first year from seed if started about the middle of April. Before planting soak the seed in hot water twenty-four hours. When plants are up to the second leaf, transplant singly into pots. Set out in the garden after all danger of frost is past. The roots can be kept in the cellar over winter. Price—10c per pkt.

CENTAUREA—Sweet Sultan

CENTAUREA IMPERIALIS MIXED. This is without doubt the most beautiful of all the Sweet Sultans, and unsurpassed for early summer flowers. The flowers are large, very sweet scented and borne in great abundance on long, graceful stems, rendering them valuable for cutting. Price—10c per pkt.

CYPRESS VINE—Ipomoea Quamoclit

FINEST MIXED. The delicate fern-like foliage and masses of white and scarlet star-shaped flowers make this one of the most beautiful climbers imaginable. Trained to trellises or allowed to run up strings or poles, it is unsurpassed for grace and beauty. Sow in the open ground only after it is thoroughly warm. The seed starts more readily if soaked in warm water two hours before sowing. Grows about 6 feet high. Price—10c per pkt.

FLOWER SEED—Continued

Cosmos

EARLY FLOWERING MIXED. A favorite fall flower. This early flowering strain may be had in bloom from July to November. Plants are such strong, vigorous growers and so free with their favors, they can scarcely be spared from any garden. Grown in rows or massed it makes a fine display; splendid for bouquets. Height 4 to 6 feet. Price—5c per pkt.

DIANTHUS

Double Mixed. Few flowers can equal these in beauty and profusion of bloom. For garden decoration they are one of the most satisfactory annuals, and as the stems are long, are equally good for cutting. The combination of colors is almost endless. Price—5c per pkt.

DAHLIA

Double Cactus Mixed. A distinct and elegant variety, the most popular at the present time. Unequalled for its rich and varied colors and perfection of bloom. Dahlias are easily grown from seed and

bloom the first season. Seed sown in the house in March and April will produce flowering plants as soon as those grown from tubers, and no two plants will be alike in flower. Price—10c per pkt.

Daisy

SHASTA. One of Luther Burbank's hybrids, the result of a cross between the common field daisy and an European sort. It is a hardy perennial, bearing large, graceful flowers of the purest whiteness, averaging about 4 inches in diameter. The stems are 12 to 18 inches long. The flowers remain fresh for two weeks or more after cutting. Price 10c per pkt.

ESCHSCHOLTZIA

California Poppy

Glory of the West. Summer flowering annuals of low, spreading growth, delicate foliage and golden yellow flower. Splendid for bedding. Very showy and free flowering. As the plants do not bear transplanting, sow where they are wanted to bloom and thin to 6 inches apart. Price—5c per pkt.

GAILLARDIA
Blanket Flower
Fine Mixed. Beautiful annuals for the flower garden, producing showy plants 1 to 2 feet high which bloom continuously everywhere. Very Price—5c per pkt.

from early summer until November. Thrives well effectively grown in masses. Excellent for cutting.

Geranium

ZONALE MIXED. An excellent mixture of the largest and finest varieties. Geraniums are very interesting plants to raise from seed, as there is always a chance of securing something new and desirable; in fact, propagation by seed is the only way to obtain new varieties. To get into bloom the first summer, sow seeds quite early in house and transplant as soon as large enough, giving more room. Set out in the garden when the weather will permit. Price—10c per pkt.

Larkspur

EMPEROR, MIXED. A well-known annual of great beauty. As they are not easily transplanted, sow the seed where the plants are wanted to bloom and thin out so they will stand at least 10 inches apart. Height 2 feet. Price—5c per pkt.

PHLOX

DRUMMONDII GRANDIFLORA. Flowers nearly twice as large as the ordinary Phlox Drummondii, while the colors are richer and brighter. For beds, borders and massing it is unsurpassed. The colors range from purest white in deepest crimson. Sown outside, they bloom very soon after planting and until frost. For early bloom, seed may be sown inside and transplanted. Height 1 to 1½ feet. Price—5c per pkt.

PORTULACCA

Rose Moss

DOUBLE MIXED. There are scarcely any flowers in cultivation which make such a dazzling display of beauty as a bed of many-hued portulaccas. Blooms from July until frost. Very desirable for beds, borders, rock work and ribbon beds and especially adapted for sunny situations and the light sandy soils. Sow in the garden as soon as it becomes warm, and after the plants appear withhold water. Stands any amount of hot, dry weather and can be easily transplanted when in full bloom. Price—10c per pkt.

PANSY

GIANT TRIMARDEAU MIXED. The largest flowering of all pansies. To succeed with pansies only the best seed should be sown. Have the bed where it will not receive the full heat of the sun—the east and north side of the house is generally a good location. Seed sown in the house or hot-bed between January and April or in the open ground as soon as the soil can be worked in the spring will give flowers all summer and fall. For early spring blooming and for the largest and finest flowers, sow between July and September and protect during the winter. Price—10c per pkt.

POPPY

PAEONY FLOWERED, MIXED. Large double, showy flowers almost equal to paeonies. Poppies are of quick growth and produce a wealth of the most gorgeous blooms. Seed should be sown early where they are to bloom and covered lightly; thin to six inches apart. Do well in any good garden soil. Price—5c per pkt.

Shirley Poppy. (See page 80.)

SWEET PEAS

SPENCER VARIETIES

APPLE BLOSSOM SPENCER. Bright rose standard with wings of light primrose tinted rose carmine. A very large, free blooming sort. Price—pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

AURORA SPENCER. Brilliant orange-rose, striped or flaked on white. Price—pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

BLUE JACKET. A fine, deep navy blue. Pkt., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75.

DAINTY SPENCER. White, edged with rose. Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

DUPLEX CRIMSON KING. A beautiful self-scarlet. Pkt., 10c; oz., 45c; $\frac{1}{4}$ lb., \$1.30.

MAJESTIC. A large deep cream self. Pkt., 10c; oz., 60c; $\frac{1}{4}$ lb., \$1.75.

KING WHITE. The best white Spencer. Pkt., 20c; oz., \$1.00; $\frac{1}{4}$ lb., \$3.25.

KING EDWARD SPENCER. Pure red. Pkt., 10c; oz., 50c; $\frac{1}{4}$ lb., \$1.60.

KING ALFRED. Large, orange-pink. Pkt., 10c; oz., 40c; $\frac{1}{4}$ lb., \$1.25.

PRIMROSE SPENCER. Creamy yellow. Pkt., 10c; oz., 35c; $\frac{1}{4}$ lb., \$1.00.

SPENCER'S MIXED. A very fine mixture. Pkt., 10c; oz., 30c; $\frac{1}{4}$ lb., 80c; lb., \$3.00.

Grandiflora

THE OLDER TYPE OF SWEET PEAS

BURRELL'S SPECIAL MIXTURE, GRANDIFLORA, consisting of a large number of varieties carefully mixed to give the best colors. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 30c; lb., \$1.00; 5 lbs., \$4.00.

ZINNIAS

I am Headquarters for Zinnia seed and urge you to plant these liberally for borders or for bedding.

These flowers are so easily grown and the newest selections so beautifully colored and so nearly perfect in form that they rival the dahlia and aster for beauty.

From a Photo of One of My Zinnia Fields. See Next Page for Varieties.

ZINNIAS—Continued

BURRELL'S SUPERB MIXTURE, GIANT FLOWERED ZINNIA. This very fine mixture of light, lively colors with a suitable proportion of Pure White Canary Yellow and Crimson make what I consider the finest mixture of Zinnias I ever saw. This lot is made up of the seed from giant flowers, with long, soft petals. Price—10c per pkt.; 30c per $\frac{1}{8}$ oz.; 55c per $\frac{1}{4}$ oz.; \$1.05 per $\frac{1}{2}$ oz.; \$2.00 per oz.

BURRELL'S TALL ROBUSTA GRANDIFLORA MIXED. This includes all colors known to Zinnias and is a desirable mixture of these large flowering Zinnias. Price—10c per pkt.; 35c per $\frac{1}{4}$ oz.; \$1.10 per oz.; \$4.00 per $\frac{1}{4}$ lb.

The following extra fine single color selections are listed inside of back cover page:

Burrell's Giant Crimson Zinnia.

Burrell's Giant Canary Yellow Zinnia.

Burrell's Giant White Zinnia.

Burrell's Giant Violet Zinnia.

See inside back cover for description and prices.

BURRELL'S EXTRA SELECTED BLACK NIGHT ZINNIAS. One of the leading flower seedsmen of England, when he saw my crop of this variety, stated that he would take pride in exhibiting such a flower at the leading flower shows. The flowers are about two and one-half inches in diameter, very deep red, and the flowers often three inches deep when fully grown. I recommend this sort highly. Price—pkt., 20c; $\frac{1}{4}$ oz., 75c; $\frac{1}{2}$ oz., \$1.35; 1 oz. \$2.50.

BURRELL'S SPECIAL MIXTURE ELEGANS, DOUBLE MIXED. This selection contains the whole range of colors known to Zinnias and a large per cent of the flowers are of the brighter colors as canary yellow, crimson and scarlet, each in many shades, making this mixture one that is sure to please. The plants grow three to four feet tall and the double flowers often three to four inches in diameter. Price—pkt., 10c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c.

ELEGANS DWARF MIXED. The plants grow two to three feet tall and a very large number of colors are produced. The flowers are quite double and two to three inches in diameter. Price—pkt., 5c; $\frac{1}{2}$ oz., 35c; 1 oz., 60c.

BURRELL'S GIANT PURPLE ZINNIA. These flowers are very large and double. An extra good selection. Price—10c per pkt.; 60c per oz.

SCARLET LARGE-FLOWERED ZINNIA. These flowers are very uniform in color and make handsome beds and very attractive bouquets. Price—pkt., 10c; oz., 45c.

ZINNIAS, STRIPED OR ZEBRA-FLOWERED. These flowers are produced abundantly in all colors and each flower is striped like a zebra. Many oddly-colored flowers make them very interesting to grow. Price—pkt., 10c; oz., 40c.

BURRELL'S SPECIAL CURLED AND CRESTED ZINNIA. These flowers are produced in all colors and the long, narrow petals are curled. This special mixture contains a large per cent of soft, light colors and for a border they can hardly be surpassed. The plants are about two feet tall and covered with beautiful flowers. Price—pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 65c.

BURRELL'S SPECIAL POMPONE ZINNIA. This mixture of all Zinnia colors grows about two and one-half feet tall. The flowers are very deep and uniform, though only about an inch in diameter. They are very pretty and many think them the finest type of Zinnias. Price—pkt., 10c; $\frac{1}{4}$ oz., 20c; oz., 65c.

General List of Flower Seeds

Abutilon. Large, bell-shaped flowers, richly veined; tender perennial. Finest varieties mixed. Price—5c per pkt.

Ageratum. Used largely for bedding and borders; mixed colors. Price—5c per pkt.

Alyssum. Little Gem. See page 74.

Amaranthus. Tricolor. (Joseph's Coat.) Showy annual foliage plant; leaves red, yellow and green. Height 3 feet. Price—5c per pkt.

Anemone. (Wind Flower.) Beautiful spring flowering plants; many rich colors. Hardy perennial. Price—5c per pkt.

Antirrhinum. (Snapdragon.) Giant Flowering Mixed. See page 74.

Aquilegia (Columbine.) A hardy perennial. Single Mixed. Price—5c per pkt.

Asperula Azurea Setosa. Light blue or lavender flower. Hardy annual. Height 9 inches. Price—5c per pkt.

Asters. Beautiful autumn flowers, considered by many the finest flowers. See page 73.

Asparagus Fern Sprengeri. Fine plant for pot culture or hanging baskets. Price—10c per pkt.

Bachelor's Button. A showy annual; great variety of colors. Price—5c per pkt.

Balloon Vine. (Love in a Puff.) Rapid growing annual climber; white flowers, followed by balloon-like seed pods. Price—5c per pkt.

Balsam. Double Camelia Flowered. See page 74.

Calliopsis. Showy garden annual; golden yellow flowers; choicest mixture. Price—5c per pkt.

Canary Bird Vine. See page 74.

Candytuft. See page 74.

Canna. Cozy's Dwarf. See page 74.

Carnation. Choice Double Mixed. Produces many double flowers of all shades and colors. Price—10c per pkt.

Centaurea. Imperialis Mixed. See page 74.

Celosia Cristata. (Cockscomb.) Tall sorts, mixed. Price—5c per pkt.

Clematis. Paniculata. One of the finest hardy climbers. Fragrant white flowers. Price—5c per pkt.

Coix Lachryma. (Job's Tears.) Curious ornamental grass from East India with broad corn-like leaves, and seeds of a light slate color, wonderfully lustrous. Valuable for winter bouquets. Price—5c per pkt.

Convolvulus. (Morning Glory.) Major. All colors mixed. Price—5c per pkt.

Cosmos. Early Flowering, Mixed. See page 75.

Chrysanthemum. Annual Varieties Mixed. Price 5c per pkt.

Perennial Varieties Mixed. Price—10c per pkt.

Cuphea. (Cigar or Firecracker Plant.) A pretty bedding plant. Flowers resemble a lighted cigar. Mixed. Price—5c per pkt.

Cypress Vine. See page 74.

Dahlia. Double Cactus Mixed. See page 75.

Daisy. Shasta. See page 75.

Bellis, or Double Daisy. Perennials, will bloom the same season if sown early. Price—10c per pkt.

Dianthus. Double Mixed. See page 75.

Snow Queen. Beautiful snow white variety of pinks. Price—10c per pkt.

Digitalis. (Foxglove.) Flowers borne in tall spikes, bell or thimble shaped. All colors. Price—5c per pkt.

Dolichos. (Hyacinth Bean.) Desirable climbing plant. Mixed colors. Price—5c per pkt.

Eschscholtzia. (California Poppies.) See page 76.

Fuchsia. Double, Finest Mixed. Easily grown from seed. Price—25c per pkt.

Gaillardia. See page 76.

Geranium. Zonale Mixed. See page 76.

Gilia. Mixed colors. Hardy annual. Among the earliest to flower and will keep long in water. Flowers grow in clusters. Price—5c per pkt.

Gypsophila. (Baby's Breath, or Angel's Breath.) Elegant. Charming for mixing with bouquets. Star-shaped white flowers. Price—5c per pkt.

Heliotrope, Fine Mixed. Very fragrant, excellent for bedding or indoor culture. Price—5c per pkt.

Hollyhock. Double Mixed, Best. The flowers are as double as a rose and of many shades of color. Once started they keep coming year after year. Price—10c per pkt.

Double Mixed, Good. Price 5c per pkt.

Ipomoea. (Moon Flowers, Brazilian Morning Glories.) New Hybrid climbers of very rapid growth, with many beautiful and varied flowers. Price—10c per pkt.

Lantana. Finest Mixed. Tender perennial. Excellent for bedding or pot culture. Price—5c per pkt.

Larkspur. Emperor Mixed. See page 76.

Lobelia. Finest Mixed. Price—5c per pkt.

Marigold. African Mixed. Of easy cultivation, producing an elegant display of perfectly double orange yellow and brown flowers. Height 3 feet. Price—5c per pkt.

Marvel of Peru. 4 O'Clocks. Mixed. Price—5c per pkt.

Matricaria (Feverfew.) Capensis, double white. Will bloom first season from seed. Perennial. Price—5c per pkt.

Mignonette. Giant Matchet. Very fragrant. Price—10c per pkt.

Myosotis. (Forget-Me-Not.) Palustris. Neat and beautiful little plants with pretty star-like flowers. Succeed best in a moist, shady place. Bloom first year if sown early. Price—5c per pkt.

Flower Seed—Continued

Nasturtium. Finest Dwarf Mixed. Pkt., 5c; oz., 10c.

Tall Varieties, Mixed. Suitable for trellis. Price—5c per pkt.; 10c per oz.

Nigella. (Love in a Mist.) Small blue flowers, finely cut foliage. Hardy annual. Price—5c per pkt.

Oxalis, Mixed. Very attractive plants with richly colored flowers, suitable for rock work and rustic baskets. Half-hardy perennial. Height 6 inches. Price—10c per pkt.

Pansy. Giant Trimardeau Mixed. Price—10c per pkt.

Good Mixed. Price—5c per pkt.

Giant Golden Queen. Price—10c per pkt.

Giant Royal Purple. Price—10c per pkt.

Giant Violet Blue. Price—10c per pkt.

Petunia. Giant of California. Largest flowering. Price—10c per pkt.

Phlox. Drummondii Grandiflora. Price—5c per pkt.

Poppy. Paeony Flowered. Price—5c per pkt.

Double Carnation Flowered Mixed. Price—5c per pkt.

Portulacca. Double Mixed. Price—5c per pkt.

Single Mixed. Price—5c per pkt.

Primula Veris. (Cowslip.) The well-known English Cowslip, flowering early in spring. Price—5c per pkt.

Pyrethrum. (Golden Feather.) Very useful and universally admired ornamental foliage bedding plants. Golden-yellow foliage and white flowers. Price—5c per pkt.

Ricinus. (Castor Oil Plant.) Stately, strong-growing plant with very ornamental foliage. Annuals of very quick growth. Price—5c per pkt.

Rhodanthe, Mixed. One of the best everlasting flowers and a charming annual. Price—5c per pkt.

Salpiglossis, Mixed Varieties. (Velvet Flower or Pointed Tube Tongue.) Showy bedding or border plants with richly colored erect funnel-shaped flowers. Price—5c per pkt.

Salvia. (Scarlet Sage.) Price—10c per pkt.

Scabiosa. (Mourning Bride.) Price—5c per pkt.

Schizanthus. (Butterfly Flower) Mixed colors. Excellent free-flowering plant for garden or greenhouse, bearing peculiarly shaped and oddly marked flowers. Hardy annual. Price—5c per pkt.

Silene. (Catchfly.) Mixed colors. Very pretty for low beds or edgings. Flowers white, pink and red. Annual. Price—5c per pkt.

Sensitive Plant. Leaves close touched. Price—5c per pkt.

Smilax. Charming tender perennial climber for greenhouse or window gardens. Very graceful. Excellent for decoration. Price—10c per pkt.

Stocks. (Gillyflower.) Good mixed. Unsurpassed in brilliancy of color and general effect. Fine for bedding, borders, massing and pot culture. Price—10c per pkt.

Stokesia Cyanea. (Cornflower Aster.) Beautiful blue flowers borne freely until frost. Price—10c per pkt.

Sweet Peas

Spencer Sorts

I have listed a number of the very finest sorts of Sweet Peas on page 77, and am sure these selections will prove a great pleasure to all who plant them.

The Spencer Strains have almost entirely taken the place of the Grandiflora types which were practically the only ones planted a few years ago.

Some yet consider the Grandiflora preferable, and I list Burrell's Special Mixture, which contains the finest of these, on page 77.

Sweet William. Double Mixed. Hardy perennial. Flowers are produced in very large heads in many brilliant and rich colors. Price—5c per pkt.; Single Mixed, 5c per pkt.

Thunbergia. (Climbing Black-Eyed Susan.) Mixed. A trailing or climbing plant with flowers of various shades of yellow and white, having a dark center, or eye. Price—10c per pkt.

Verbena. Mammoth Mixed. Price—5c per pkt.

Violets. Single Blue. Price—5c per pkt.

Shirly Poppy

This beautiful variety produces through a long season large single flowers of charming delicacy. The colors are of wide range—from pure white through the softest shades of pink and rose to brightest scarlet and carmine red. The petals are very thin. Some crumpled like tissue paper; others like fine silk. About 20 inches high. Plant very early. Hardy annual. Price—5c per pkt.; 25c per oz.

Some Special Varieties Which Should Be Included in Every Order

Burpees' Stringless Green Pod Beans.

Crosby's Egyptian Beet.

Golden Bantam Sweet Corn.

D. V. B. Cabbage.

Burrell's Victor Cabbage.

Burrell's Earliest of all Cucumber.

The New Burrell Lettuce.

Burrell's Select Salmon Tinted Pollock No. 25 Cantaloupe.

Burrell's Improved Kleckley Sweet Watermelon.

Burrell's Colorado Bronze Globe Onion.

Burrell's Select Early Jewell Tomato.

See catalog descriptions and prices under the different headings. These special sorts have proven so far superior to the ordinary sorts that all who plant them are so well pleased that they not only order again but become enthusiastic about the quality of my stocks.

Burrell's Special Zinnias

Giant Flowered

have carefully selected the following to large flowers from 4 to 5 inches across of the type illustrated from a photograph shown above. We have excellent selections in separate colors, as listed below. The Giant White and Canary Yellow, planted in alternate rows, give a very pleasing effect. The Giant White is a beautiful flower. You will surely be well pleased with these.

Burrell's Giant Crimson Zinnia

Flowers 4 to 6 inches in diameter and of such glowing color that they are very attractive even from a long distance. The long, soft petals form wheel-shaped flowers that they rival the finest Dahlias. Price, pkt., 10c; 1/2 oz., 30c; 1/4 oz., 55c; 1/2 oz., \$1.05; 1 oz., \$2.00.

Burrell's Giant Canary Yellow Zinnia

Large flowers; long, soft petals. A very fine flower. Price, pkt., 10c; 1/2 oz., 30c; 1/4 oz., 55c; 1/2 oz., \$1.05; 1 oz., \$2.00.

Burrell's Giant White Zinnia

A very unusual flower of pure white, often 6 inches in diameter when in full bloom. Not to be compared with ordinary Zinnias. Price, pkt., 10c; 1/2 oz., 30c; 1/4 oz., 55c; 1/2 oz., \$1.05; 1 oz., \$2.00.

Burrell's Giant Violet Zinnia

An excellent flower; same type as above sorts. Price, 10c per pkt.; 1/2 oz., 30c; 1/4 oz., 55c; 1/2 oz., \$1.05; 1 oz., \$2.00.

SEED GROWER
ROCKY FORD, COLO.

The following Special Varieties are of such great merit that every order should include them. Nothing better for the home or market garden.

Burrell's Earliest of All Cucumber

Nearly 15,000 pounds already sold for 1918 planting.

This Extra Early Cucumber produces a heavy crop of evenly shaped, dark green fruits, earlier than any other good sort. Market growers make big money by planting Burrell's Earliest of All Cucumber. Price, pkts., 5c and 10c; 15c per oz.; 40c per ¼ lb.; \$1.40 per lb.; \$1.25 per lb. in 10-lb. lots; \$1.15 per lb. in 100-lb. lots and up. Prepaid.

Burrell's Improved Kleckley Sweet Watermelon

The finest melon grown for home use or nearby markets.

This excellent selection of the Kleckley Sweet is well known throughout the country. Thousands plant it each year and I am usually compelled to refuse many orders. This year I have a good supply of seed. See description inside catalog. Price, Stock Seed, 5c and 10c per pkt.; 15c per oz.; 55c per ¼ lb.; \$2.00 per lb. Prepaid. No discount on large orders.

Burrell's Select Early Jewel Tomato

Very early, large, smooth, red sort. A money maker for market growers. None better for the home garden.

I have been carefully selecting this seed for a number of years. This is all line bred stock. I do not believe a better selection can be purchased. An ounce of seed will produce enough plants, under favorable conditions, to grow an acre of tomatoes. Price, 10c per pkt.; 30c per ¼ oz.; \$1.00 per oz. Prepaid.

D. V. BURRELL SEED GROWER

"AS GOOD AS G"
