1899

EVERGREENS
A
SPECIALTY

ESTABLISHED
OVER
40 YEARS

ENTOMOLOGIST'S OFFICE.

JANUARY 16, 1899.

DULY APPOINTED ASSISTANTS OF THIS OFFICE HAVE REPEATEDLY EXAMINED, UNDER MY DIRECTION, THE NURSERY PREMISES OF MR. D. HILL, AT DUNDEE, ILL. I HEREBY CERTIFY THAT THEY ARE APPARENTLY FREE FROM THE SAN JOSE SCALE AND OTHER DANGEROUS INSECTS, AND FROM FUNGUS DISEASES. CAPABLE OF BEING TRANSPORTED WITH NURSERY STOCK TO THE INJURY OF CUSTOMERS.

This statement is invalid after July 1, 1899.

S. A. FORBES, State Entomologist.

INDEX.

The picture on the first cover page represents a Blue Spruce growing on lawn in front of the proprietor's residence.

DUNDEE, ILLINOIS.

Terms and Conditions.

In presenting this Catalogue and Price List for the Spring of 1899 I desire to thank my customers who have so liberally patronized me the past season, and by honest dealing and strict attention to business, I hope to enjoy a continuance of the same.

The growing of Evergreens from seed is my specialty. While my prices will be found lower than most reliable establishments, I am quite confident my trees will be equal to the best and superior to most.

Terms of payment must invariably be cash, or satisfactory note or draft. Orders to be sent C. O. D. must be accompanied by one-fourth cash. Money can be sent, as follows, at my risk: Draft on Chicago, Postoffice order, Registered Letter, or Express Order. Do not send money in an ordinary letter.

Trees furnished as follows: 50 at 100 rates; 500 at 1,000 rates, etc.

All goods delivered at freight depot or express office free of charge, after which our responsibility ceases.

Be particular in all cases to put the order in a distinct, definite form. Let it be on a page or sheet separate from the body of the letter, with name, post-office, county and state plainly written, and give full directions as to route and manner in which stock is to be shipped—freight or express.

I guarantee all my stock to be first-class in every respect and true to label, and to replace at one-half price, upon proper proof of good care, all stock that dies the first year, purchaser paying express or freight, but it is mutually agreed between the purchaser and myself that I am not liable for any sum greater than that originally received for said stock.

Letters of inquiry solicited and will be carefully and cheerfully answered. These nurseries have been established for forty years.

Write at once and take your choice from millions of trees—the largest Evergreen Nurseries in the United States. Also a general line of all kinds of Fruit Trees, Small Fruits, Forest Trees, Ornamentals, Roses, Shrubs, Bulbs, etc. Special attention is given to packing, for long as well as short distance shipments, for which I make no charge.

On receiving trees from a nursery, the boxes or packages should be immediately unpacked and the roots dipped in a puddle made of fresh, mellow soil, about the thickness of paint ready for use, and be careful not to let the roots get dry before planting. Place them in a cool, shady place until ready to plant, and if not immediately ready, heel them into the ground by placing the roots in a trench, covering well up with mellow soil, and well firming with the foot; if the ground is dry, give some water at planting. Set the trees a little deeper than they stood in the nursery, treading the earth firmly about the roots when planting. This is one of the essentials of success.

HOW TO PLANT AND CARE FOR SEEDLING EVERGREENS.

Be sure and prepare the ground very fine and mellow; the garden is a good place to plant and protect the first few years. Plant either in beds like radish beds or in long rows just wide enough to use either the hand or wheel hoe. The fine roots must not be exposed to the sun, dry air or wind, for even a few minutes kill them. They may not change in looks as quick as that, but you may be certain that they will never grow if the roots have dried—even five minutes. Better unpack in cellar or shed and plant from bucket of water—just enough water to cover roots, but not to wet tops. Take one tree at a time and pound earth firmly against roots, placed against the perpendicular side of the trench. The trees should be a little deeper than in nursery, and tramped on both sides very solid. Leave the surface in a smooth, fine condition. Shade them the first year or two by laying any brush across stakes or braces one or two feet high. Fix these so they can easily be removed when cultivation is required. If season is very dry and plants are shaded, they can be watered, but never more than once in two weeks, and then the surface and around and below the roots must be thoroughly and abundantly soaked. A little water on the surface would do more damage than good. Finally give them the best cultivation till about July 15, and you will soon have fine evergreens large enough for planting anywhere.

Medals for Best Exhibit of Hardy Evergreens
World's Columbian Exposition, Chicago, 1893.

MY REFERENCES.

By permission, I refer my friends and patrons to the following firms: Honorable B. E. Fernow, Chief of the Department of Forestry, U. S. Agricultural Department, Washington, D. C., (I am growing for the above department a large quantity of the leading varieties of evergreens.) Also, Albert Miller, ex-postmaster, Dundee, Illinois; Express Agent, Dundee, Illinois; Hon H. B. Willis, Judge of Kane County Circuit Court, Elgin, Illinois; Hon. Norman J. Coleman, St. Louis, Mo., and any reliable nursery firm, bank or commercial agency, and thousands of pleased customers throughout the United States.

Yours truly,

D. HILL, Evergreen Specialist.

Teas' Weeping Mulberry.

Another season's growth fully sustains what we have heretofore claimed for this remarkable tree—unequalled in gracefulness and beauty, combined with the strongest vigor, health and hardiness. And the unsolicited testimony of many having them growing in various parts of the country, from Wisconsin and Canada to Florida—from the bleak hills of New England, the sunny vales of California and the arid plains of Texas—all confirm our claim that it is the best Hardy Weeping Tree ever produced.

The most graceful and beautiful of hardy weeping trees, and wholly unlike anything heretofore introduced, forming a perfect umbrella-shaped head, with long, slender, willowly branches, drooping to the ground parallel with the stem. These hang like the most delicate vines from a hanging basket, and are swayed by the slightest breath of wind. All who see it agree that in light airy gracefulness and delicacy of form and motion it is without a rival.

It is entirely free from the seeming formality and stiffness of the well known Kilmarnock Willow, and its lithe forms and easy curves are the very opposite of the irregular and grotesque habits of the Weeping Mountain Ash, Weeping Elms, Ash, etc.

It has beautiful foliage, rather small, handsomely cut or divided into lobes, and of a beautiful, fresh looking, glossy green. In autumn many of the leaves are bordered with yellow, producing very novel and pleasing effects.

Being a true Russian Mulberry, it possesses the wonderfully vigorous and healthy growth for which this species is noted; is free from disease and insects, and

It is one of the hardiest of trees, enduring unharmed not only the severe cold of the north, but the far more destructive heat and drouth of the south and southwest.

It is a long lived tree, flourishing in almost any soil and situation, wet or dry, and will be found particularly valuable in the western and southwestern states, where the Kilmarnock and other popular weeping trees utterly fail.

It is one of the safest and most successful of all trees to transplant. It has a strong hold on life, and will endure exposure and hard treatment that will kill almost anything but Catalpa or Osage Orange.

Rapid in growth and abundant in foliage, each branch adds to the formation of a finely rounded, symmetrical head, making a most magnificent little tree. It is especially desirable for ornamenting small grounds, where trees of large size could not be used, and it is no less appropriate in parks and other extensive places.

It is admirably adapted to cemetery planting. Indeed, here is a field where it stands without a rival, filling a long felt want. A perfect gem in size, style and exquisite form, together with all the hardiness, vigor and endurance that can be found in a tree. Cemetery trees are too often neglected and usually fail, but here is one peerless in beauty and suitableness that will be found equal to the situation.

It may be trained into a complete shady arbor, or a fine ornamental gateway and in a great variety of fanciful forms.

For prices see page 10.

Fruit Department.

We have many varieties of fruits which can be supplied on application, but name below only those which have proven hardy and valuable in the north and western states. (See our large descriptive catalogue for descriptions.)

Apples and Crabs.

Grapes.

I offer only a few of the Hardest and Best Varieties.

MOORE'S EARLY—Bunch large; berry large, round, with heavy blue bloom; vine exceedingly hardy, entirely exempt from mildew or disease. Its earliness makes it desirable for an early market; its hardness particularly adapts it to Canada and northern parts of the United States. Succeeds admirably in the south.

WORDEN—A splendid large grape of the Concord type, but earlier, larger in bunch and berry, and of decidedly better quality; vine hardier than the old stand-by, and every way as healthy.

	Each.	Doz.	100.
Moore's Early and Worden, 1 year.	\$ 15	\$1 50	\$10 00
“ “ “ 2 years.	25	2 50	15 00
Concord, 1 year.	10	75	4 00
“ 2 years.	15	1 00	6 00
Bunch very large, berries black, sweet and the best all-round grape for family use. Hardest and most productive vines.			

	Each.	Doz.	100.
Niagara, 1 year.....	15	1 50	10 00
“ 2 years.....	25	2 00	15 00
Bunch medium; berry large and greenish white; good for family use and market. A late keeper. Vines hardy and productive.			
Pocklington, 1 year.....	15	1 50	10 00
“ 2 years.....	25	2 00	15 00
Bunch medium; berry large; golden yellow, fair quality; good for deserts and market; late. Vines fairly hardy and productive.			
Agawam, 1 year.....	15	1 50	10 00
“ 2 years.....	25	2 00	15 00
Bunch large; berries large and red; musk flavor; late keeping. Vines very vigorous and productive.			
Cottage, 2 years.....	20	2 00	15 00
Bunch small; berries small and black; very early; good for family use and market. Vines hardy and productive.			
Salem, 2 years.....	25	2 50	15 00
Bunch large; berry large; coppery red; one of the best to use when half ripe for pies, jellies, etc. Late. Vines hardy and productive.			
Brighton, 2 years.....	25	2 50	15 00
Bunch large; berry large; red; excellent quality; late. Vines hardy and productive.			
Moyer, 2 years.....	25	2 50	15 00
Very much like the Delaware, except lighter colored and more productive.			
Diamond, 1 year.....	50	5 00	
“ 2 years.....	1 00	10 00	
Bunch large; berries medium; greenish white; fine quality. Vines hardy and productive.			
Early Ohio.....	1 00	10 00	
Introduced by C. S. Curtice, N. Y., and said to be fine and two weeks earlier than Moore's Early.			

Gooseberries.

Plant three to four feet apart each way, manure well, and after fruit is gathered, prune out all old wood.

ENGLISH VARIETIES.

INDUSTRY—The best English gooseberry yet introduced; of vigorous, upright growth and a greater cropper than any known variety, and shows no sign of mildew; berries of the largest size, one and one-half inches in diameter, and of most excellent flavor, both pleasant and rich; color, when fully ripe, dark red.

2 years.....Each, 50c. Dozen, \$5 00. 100, \$30 00

AMERICAN VARIETIES.

DOWNING—Very large, handsome, pale green and of excellent quality for both cooking and table use; bush a vigorous grower and usually free from mildew.

HOUGHTON SEEDLING—Small to medium, roundish, oval, pale red, sweet, tender, very good; plants spreading, shoots slender, enormously productive.

SMITH'S IMPROVED—Large, pale greenish yellow; skin thin; of excellent quality, being unsurpassed by any other variety for table use or cooking; bush moderately vigorous and excessively productive.

2 years.....Each, 20c. Dozen, \$2 00. 100, \$12 00

Currants.

Set four feet apart in rich ground, cultivate well or mulch heavily; prune out old wood, so that each remaining shoot will have room to grow. If the currant worm appears, dust with hellebore; manure freely.

BLACK NAPLES—Much larger than the Black English, sometimes measuring half an inch in diameter. Fine for wines or jellies.

CHERRY RED—Berry sometimes more than half an inch in diameter, bunches short; the plant is very vigorous and productive when grown on good soil and well cultivated.

RED DUTCH—An old variety, excellent and well known.

VICTORIA—Large, bright red, with very long bunches; late, good bearer.

WHITE GRAPE—Very large, yellowish white, sweet or very mild acid; excellent quality and valuable.

2 years..... Each, 20c. Dozen, \$2 00. 100, \$12 00

NORTH STAR—New, hardy; a northern variety. Each, 35c.

POMONA—New, said to be sweetest and best quality and the most productive of all. Each, 50c.

Raspberries.

	Each.	Doz.	100.
Black varieties, tips.....	\$ 10	\$ 50	\$ 3 00
Tyler, or Souhegan—Large, early, hardy and productive.			
Ohio—Medium, late, good for table use and market, hardy, productive.			
Older tips.....	20	1 00	6 00
Large, medium early, best quality, hardy and productive, best all round berry for table or market.			
Turner—Well known red raspberry.....	10	50	3 00
Cuthbert—Well known red raspberry.....	10	50	3 00

Blackberries.

One year plants, strong.....	\$ 10	\$ 50	\$ 3 00
Snyder—Large, fine flavored, hardy and productive. The only variety we recommend for general planting in the west.			
Ancient Briton.....	20	2 00	10 00
Best for northern climate, because easily wintered by covering.			

Juneberry.

Dwarf, 1 to 2 feet.....	\$ 25	\$ 2 50	\$ 15 00
Grows in bush form. Its fruit is good for pies, sauce, etc., and its beautiful white flowers make it a desirable shrub.			

Garden Roots.

Rhubarb—Wine plant, strong.....	\$ 15	\$ 1 00	\$ 9 00
Asparagus—Conover's Colossal, two years.....	10	60	4 00
Horseradish.....	05	50	2 50

Strawberries.

Can furnish many varieties, but the following are the best.

Prices: Dozen, 50c. 100, \$1 50.

Bederwood (s)—Medium; early; good quality, vigorous and productive. A good fertilizer.

Warfield (p)—Medium; dark red; good quality, hardy and productive.

Crescent (p)—Well known everywhere. Very good.

Capt. Jack (s)—Medium; firm; a good fertilizer.

Bubach (p)—Large; soft; one of the best for home market; strong.

Price..... Dozen, 75c. 100, \$2 00.

Jessie (s)—Large; best quality, fair bearer; good fertilizer for Bubach.

Price..... Dozen, 75c. 100, \$2 00.

Parker Earl (s)—Large; fruit stems strong, bearing large clusters; late; plant stocky, forming new plants slowly; very hardy and productive.

Price... Each, 5c. Dozen, 50c. 100, \$3 00.

Hardy Ornamental Flowering Shrubs.

The Hydrangea Grandiflora continue to be one of the best and most handsome ornamental shrubs ever grown. It blooms finely the first year and gets better and grows large with age. It grows 3 to 4 feet high, is perfectly hardy in all parts of the country, needs no protection in winter, blooms in July and August when other flowers are scarce, and remains in bloom two or three months. The flowers are pure white, afterwards changing to pink and rich coppery red, and are borne in immense pyramidal tresses more than a foot long and nearly as much in diameter. Large, three year old plants, cut back, ready for planting, will bloom first season.

Each, 50c. Dozen, \$4 00.

SPIREA VANHOUEITA.

Spiraea —Van Houttei. The grandest of all Spireas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white blooms, the foliage hardly showing. Clusters of twenty or thirty flat white floret make up the raceme, and these clusters are set close along the drooping stem. Perfectly hardy and an early bloomer. Strong plants, 2½ to 3 feet, 5 to 10 stems.

Each 50c. Dozen \$4 00.

Wiegela—Wiegela Rosea. This is one of the most charming shrubs in cultivation. It cannot be too highly recommended. The flowers are large and of a deep rosy color. They are borne in such profusion that the whole plant appears a mass of lovely blooms.

Large plants..... Each, 50c. Dozen, \$4 00.

Pure white, large plants..... Each, 50c. Dozen, \$4 00.

	Each.	Doz.
Althea, double, white, red and purple, 3 to 4 feet.....	\$ 50	\$3 50
Lilacs, purple and white, 3 to 4 feet.....	50	3 50
Upright and climbing Honeysuckle, 3 to 4 feet.....	50	3 50
Barberry, purple leaf, 2 to 3 feet.....	50	3 50
Japan Quince, 2 to 3 feet.....	50	3 00
Deutzia, double white and pink, Snowballs and Dogwood, Purple Fringe, Snowberry, Syringas, two varieties, 3 to 4 feet.....	50	3 50

Climbing Shrubs and Vines.

	Each.	Doz.
Clematis—By all odds the most popular of all hardy garden climbers, of easy growth, needs but slight protection and re- wards the grower with innumerable blossoms. Large three- year-old roots.....	\$1 00	\$....
Snowflakes—Very fine white variety, blooming freely. A three- year-old plant bearing hundreds of blossoms.....	1 00	
Jackmannii—Large purple. Well known, very hardy, the finest of them all. Large three-year-old roots.....	1 00	
Coccinia—Immensely popular, growing fully twelve feet high, covering the wall with numerous bright coral scarlet flowers. Large three-year-old roots.....	1 00	
Clematis—Edw. Andre. Grand new crimson velvet clematis, very floriferous and fine.....	1 00	
Paniculata—Desirable, a strong grower, very sweet scented flowers, pure white. Strong plants.....	1 00	
Ampelopsis Vetchi—Out doors grown, three years.....	75	6 00
Honeysuckle—Hall's Japan; monthly; fragrant; strong plants.	50	4 00
Trumpet Vine—Strong plants.....	50	4 00
Wistaria, Chinese White.....	1 00	8 00
Wistaria—Chinese, purple, strong plants.....	50	4 00

Clematis Paniculata.

This wonderful flower blooms in July and lasts until September. It is one of the finest of hardy climbers, with handsome foliage, of very vigorous and rapid growth, and produces in late summer dense sheets of medium sized pure white flowers of the most pleasing fragrance. Each branchlet is thickly set with these showy flowers, and altogether produce a most gorgeous sight. This is a new Japanese plant and perfectly hardy, and finely adapted to use for any covering purpose.

Extra large three-year-old plants for immediate bloom. Each, \$1 00.

For a club of six.....\$4 50 prepaid.

Hybrid Perpetual Roses.

This class of roses is admirably suited for garden culture, for the formation of rose beds, hedges, and permanent plantations where hardy varieties of roses are desired. They are of easy culture and luxuriate in a deep, rich soil. They are benefited by mulching of leaves or strawy manure placed around the roots in the fall of the year. Prune according to the habit of growth, cutting back close all weak shoots and shortening the long canes to a convenient length.

My roses are grown in open ground, are strong, heavy rooted plants two to

four years old; will give an abundance of bloom the first year. Only the best varieties are offered.

	Each.
Gen. Jacqueminot—Brilliant crimson, very large, globular and excellent; a free bloomer unsurpassed in its clear, rich crimson scarlet color. Large plants.....	50c 50c
Anna DeDiesbach—Bright rose color, very large and showy; particularly fine in bud; flower lightly cupped; a vigorous grower; one of the best. Large plants.....	50c
Pierre Notting—Blackish red, shaded with violet; very large and full; form globular; habit good; one of the best dark roses.....	50c
Prince Camille DeRohan—Deep, velvet crimson; large; moderately full.	50c
Paul Neyron—Flowers very large, often measuring five inches in diameter; perfect in shape; color deep shining rose, very fresh and pretty. It is a very strong grower and remarkably free bloomer. Large plants.....	50c
Marshall P. Wilder—Lovely light red, very fragrant, popular and one of the best for bedding.....	50c
John Hopper—Bright rose; large and full; fragrant and profuse bloomer	50c
Gen. Washington—Bright red with crimson shading; very full and free bloomer; fragrant.....	50c
Croquette des Alps—White, slightly pink center; flowers on long stem; medium size; strong grower.....	50c
American Beauty—Large; deep pink; delicious odor; half-hardy out doors.....	50c
Rugosa Rubra—Single; bright red, succeeded by large, red berries or pods. A great acquisition.....	50c
Rugosa Alba—Single; pure white; very hardy and like Rubra has a very beautiful leaf.....	50c
Madam G. Bruant—A Hybrid Rugosa; semi-double, fragrant; pure white; hardy.....	50c
Moss Roses—Salet, perpetual white, crested moss....	Each, 50c. Dozen, \$4 50

Collection Hardy Climbing Roses.

Prairie Queen—Clear, bright pink, sometimes with white stripes; large compact and globular, very double and full; blooms in clusters; one of the finest.....	50c
Baltimore Belle—Pale blush, varigated, carmine, rose and white; very double; flowers in beautiful clusters, the whole plant appearing a perfect mass of bloom; one of the very best climbing roses.....	50c
Champney—A fine, hardy, pillar rose, quite double and fragrant; flowers deep rose, changing to clear pink; very desirable.....	50c
Greville, or Seven Sisters—Flowers in large clusters; varies in color from white to crimson. Large plants.....	50c
Russell's Cottage—A lovely pink; very hardy.....	50c

Some Reasons for Planting.

NORWAY SPRUCE.

1.—It pays in the increased value imparted to land.

Trees possess great value as measured by their cost. Certain beautiful, stately shade and fruit trees are called to mind, which cost their owners not three dollars apiece all told, but which today would not be spared for \$300, \$500 or \$1,000 apiece. Railroads taking planted lands often pay from \$30 to \$300 each for trees occupying the same. The writer knows of \$600 apiece having been awarded in solid cash to the owner for trees that stood on some land that was needed for a certain town park.

The planting of these trees paid enormously, for, besides the money realized in the sales alluded to, the trees had previously given priceless delight in shade, shelter and beauty for many years. The cost was as nothing. Such returns not unfrequently follow judicious planting.

2. It Pays from the Better Living and Increased Comforts that may spring from Planted Ground

The free use not only of fruits, but also of garden vegetables, should be enjoyed by every family in the land daily the year round. The children es-

pecially should be treated to all the luscious fruits, fresh and preserved, that they may desire to eat—none should be deprived of the light and excellent food to be found in the choice culinary vegetables so easily grown.

Many troublesome diseases are unknown to the free uses of a largely vegetable diet. A convincing argument for the value of fruit is this. Settlers in a new country improve in health as their orchards begin to yield freely. Sailors in the frigid zone succumb to severe, sometimes fatal diseases, very soon after their supplies of fruits and vegetables give out.

Statisticians prove beyond any doubt that people on an average live longer now than in past centuries. This fact should in a large part be ascribed to the rapidly increasing use of fruits and vegetables in recent years in all civilized lands.

The presence of trees about a place contributes greatly to the comfort of man and beast. A dense belt of trees, especially evergreens, to the windward of a home will save the consumption of many an additional ton of coal in keeping the residence at an agreeable temperature. A similar gain comes in the saving of feed and the increase of live stock in stables that are well sheltered from wintry storm. The summer life of man and beast is made more pleasant for the presence of an abundance of shade trees. Increase the trees of the land, and we not only add to the attractiveness of our country, but that is provided which modifies the conditions of freshets, of drouth, and of swamping gales and cold.

3. It Pays in the Profits that may be derived from the Sale of Surplus Products.

Our population living in towns and villages become ready buyers from those who have a surplus. On this account the judicious culture of fruits and vegetables is among the most profitable branches of land culture. Tens of thousands of gardeners and fruit growers all over our land derive larger incomes from their small plats of perhaps less than ten acres each, devoted to these crops than does the average farmer from his many acres given to farm crops.

A neighbor of the writer, from a Bartlett pear orchard of less than two acres, clears upwards of \$1,000 year after year on his crop. The sales from an acre of strawberries in the vicinity of thriving towns and villages is seldom less than \$300, and often reaches \$400 to \$800 a year.

TENNESSEE.

Fruitland, Tenn., March 26, 1898.

D. Hill, Dundee, Ill.

Dear Sir.—Evergreens came in all O. K. They are looking nice.

Yours, etc.,

Hardison.

WISCONSIN.

D. Hill, Dundee, Ill.

Cross plains, Wis., May 12, 1898.

Dear Sir:—Vines arrived all right and in good shape. Thanks for careful attention.

Respectfully,

Mrs. H. Festige.

D. Hill, Dundee, Ill.

Blue Rapids, Kans., April 5, 1898.

Dear Sir:—Evergreens arrived all right. They are nice, thrifty trees.

Yours truly

Nevins Bros.

D. Hill, Dundee, Ill.

Caldwell, Kans., April 4, 1898.

Dear Sir:—I received the little Pines today—just four days from date of shipment—in good condition. If I can get a large per cent of them to grow I will want more next year.

Yours truly,

O. T. Neff.

Evergreens.

These are a class of indispensable trees and shrubs for parks, private and public grounds and farm wind breaks, and possessing varied characteristics of habit growth, form and coloring of foliage, and adapted to a variety of soils.

Several of this class are exceedingly useful for reclaiming waste lands, and many more are of the highest value for the formation of belts for landscape effects, and also for shelter, to allow the use of more tender kinds of trees and plants in localities which otherwise would be too much exposed to climate, sun and wind.

Soil—Conifers will grow in all soils, except those of a wet nature, and even in such there are a few that will thrive. The firs being of a shallow rooted nature will make vigorous growth in many localities where the good soil may be very thin. Several of the pines and firs will grow well on the bleakest side hills, exposed to the most trying gales, and on the coast and prairies they are especially valuable to form belts for the protection of animals and vegetable life. In planting the choice Conifers for ornamental effect, it is well to have the soil of good quality, and the same planting directions apply to these as to other trees, but no fresh manure should be used directly on the roots, and its most advisable use is as a mulch, placed on top of the ground in the fall and raked away in early summer, after the spring rains.

Pruning—Except for hedges, the best time to prune Conifers is previous to their growing season, and careful use of the pruning knife will often revive a tree which otherwise may be on the decline.

Roots—It is very important that Conifers should have an abundance of fine, fibrous roots, and this can only be obtained by frequent transplanting of the stock in the nursery.

We exercise the greatest care to have our trees frequently transplanted or root pruned, to insure such roots. Use blankets or pails of water when planting so as to allow the least possible exposure to the roots of Conifers, and see that the trees do not wilt.

PICEA PUNGENS—Blue Spruce—See First Cover Page.

This is the King of Spruces, clothed in royal robes of silver and sapphire, a very Kohinoor among the gems of the Rockies. It is a child of the storm king, growing at an altitude of from 8,000 to 10,000 feet above the level of the sea. It is generally found even there in deep gorges or on the north of the ranges. We would naturally suppose that it could not endure a sudden change or thrive in a hot climate. There are some fine specimens growing in Washington; also in North Carolina. The question arises, while the tree endures such a diversity of climate, why is it never found on the lower altitudes, or among the foot hills? The answer is, it could not possibly grow there. The Douglas, the Ponderosa and Concolor have larger seeds and send out a strong plant, and therefore they are found lower down. Pungens seed is small, about 110,000 to the pound. In the higher altitudes are frequent showers and often moss in the woods, and the ground is seldom dry. It is not hot enough to kill the plants, and so, on the high altitudes, nature has provided for their propagation. The cone on the Pungens is about one-half the size of that of the Norway. The needles are short and sharp—pungent—hence the name. They are polished like glass.

THE CONCOLOR.

I take this description from an article in the Boston Congregationalist:
 "The tree with that bright foliage is the Concolor. Riding with a friend in

Massachusetts last winter, far off on a hill we saw a row of evergreens. There, said I, is a tree from the Rockies, which proved to be true. As the name indicates, it is even colored, the same the year around. But you say: What a marvelous beauty this has—ermine and emerald blended. Such a sheen! A tree dressed in glory! What is it? It is a robe of matchless beauty the great horticulturist has given these Conifers, making them the most attractive of anything on earth. They are held in reserve for these later days, when nature and art unite to make home, lawn and landscape so attractive to the eye of taste. Note the contrast of this rare color with the deep green of the pines. There are one or two of these on the princely estate of Mr. Hunnewell at Wellesly. They are true to their nature—some trees put on wondrous beauty while young, but these retain their attractiveness down to old age, and wear their brightness, as a christian does his joy, to the very last.

“But in order to see these trees in all their glory, you should see them while bearing their cones. Here is a grove of them. All are dressed in their marvelous attire of silver and green. On one tree the blossoms are of a deep, rich purple. What a contrast to the other hues! But this other tree has blossoms and cones of the brightest green—another contrast. The cones grow erect at the top of the tree. They are perfect in form and about the size of an ear of sweet corn. As they mature in their perfect symmetry, these colors seem to deepen, and then from the cone that clear gum exudes; the sun shines, and it sparkles like crystal. Take this grove then, with the sun shining brightly upon it, with its green and silver, its purple and crystal, and it seems almost too beautiful for earth. From the small plantings of this tree in the east one has no conception of its coming symmetry and grace, its beauty of mingled tints; and yet at the east I note that these trees do as well as in their own habitat, and you will soon have these mountain treasures there, that will hold the stranger spellbound by their unique beauty. I have tried selecting seeds from the rarest specimens, and find that among the thousands now coming up, most of them fairly sparkle with silver.”

DOUGLAS SPRUCE.—*Seudotsuga Douglassi*.

This is emphatically the tree for the million. While on a visit to the eastern nurseries, I noted in almost every instance that it was the most rapid grower of all the conifers. Sometimes the complaint is made that it grows too fast, and is not compact enough for the lawn tree, yet on my grounds they seem to have the perfection of form. The foliage is soft and somewhat resembles the Hemlock, hence the name (resembling the Hemlock). In the mountains it is a grand tree. It reaches from the Rockies to the Pacific slope, and our Chief of Forestry, B. E. Feanow, tells us that he never on earth saw such a burden of lumber to the acre as that produced by this tree in the west. We are of the mind that the seeds from the Conifers gathered on the Pacific Slope are tender, while those gathered in Colorado produce hardy trees, which endure both drought and cold.

The lumber of this tree is very strong, and is invaluable for timber, joists and scantlings, and makes good lumber for finishing, though like the Hemlock, it is easily split. In color it is like the Red Wood of the Pacific Coast.

I want to call your attention to one feature of this tree. In the deep gorges and on the north side of the mountains, as you reach the high altitudes you will find them of the deep blue type—literally sparkling with silver. Seen at a distance they are often taken for Pungens. These trees should be sought out and cultivated, for in addition to their rich coloring, they have more flexible grace than the rigid Pungens.

NORWAY SPRUCE.—*Abies Excelsa*.

A very popular variety from Europe. It has been more extensively planted in this country than has any other evergreen. In fact, it is so well known as being one of the best evergreens for ornamental purposes, that it is only necessary to say that it is also the most valuable for wind breaks, screens and hedges.

AMERICAN WHITE SPRUCE.—*Picea Alba*.

Pyramidal tree of dense growth, with light, silvery green foliage. A more compact tree in all respects than the Norway Spruce. Fine for lawn planting or use near the sea shore. One of the best for general use.

BLACK HILLS SPRUCE.

This is the *Picea Alba* or the White Spruce, but with this difference: That while the Norway and the Black and White Spruce will not endure the winter droughts of the western plains, this tree seems well adapted for all the regions from which the others are excluded. Growing in a dry climate and often richly colored, it seems to meet the requirements of a vast field. While the air of the plains has but about 50 degrees of moisture to 90 degrees in the eastern states, it is necessary to have something which will endure the bright sun and drying winds of winter. We have not the experience with this tree we have with the Rocky Mountain Conifers, yet having a few thousand growing, we have great faith in them for the west, and see no reason why they should not do well in the east also.

HEMLOCK SPRUCE.—*Abies Canedensis*, Sometimes Called Weeping Spruce.

This is a well known evergreen of high northern latitudes. It is one of the most graceful spruces, with light and spreading spray, frequently branching almost to the ground. It is a beauty for the lawn and makes a highly ornamental hedge.

BALSAM FIR.—*P. Balsamea*.

A well known, popular tree, very handsome while young, assuming the upright, conical form; leaves dark green above, silvery beneath; retains its color throughout the severest winter weather; grows quite rapidly when established; desirable every way.

WHITE PINE.—*P. Strobus*.

It is the most ornamental of all our native pines. Foliage light, delicate silvery green. Flourishes in the dryest, poorest soil; easily transplanted.

SCOTCH PINE.—*Pinus Sylvestris*.

A rapidly growing, hardy variety, with stout, erect shoots, and silvery green foliage. Valuable for shelter and makes a good lawn tree, and being one of the hardiest of the evergreen family, it readily adapts itself to the trying climate of Minnesota, the Dakotas and Montana. It also thrives well on the dry plains of Kansas, and is perfectly at home in Illinois, Iowa, Nebraska and other states.

AUSTRIAN PINE: OR BLACK PINE.—*P. Austriaca* syn. *Nigricans*.

A remarkably robust, hardy, spreading tree, leaves long, stiff and dark green; rapid grower; valuable for this country.

PINUS PONDEROSA, OF COLORADO.

Heavy wooded Pine, a rapid grower, forming a tree of great size. Bark reddish and foliage longer and coarser than the Red or Norway Pine. A valuable tree for the west and northwest.

DWARF MOUNTAIN PINE.—*Pinus Montana*.

It is a beautiful little tree or bush, foliage very dense and of a rich, dark green; very valuable for ornamental purposes. It is perfectly hardy in the most exposed situations.

JUNIPER VIRGINIAN.

Red Cedar.—A well known American tree. It varies much in habit and color of foliage. It succeeds well on the plains of Nebraska and Kansas, where other evergreens fail. It is very desirable for ornamental purposes; also for wind breaks, shelter belts and hedges.

AMERICAN ARBORVITAE.—*Thuja Occidentalis*.

A handsome tree of regular and symmetrical habits. Growth thick and bushy; one of the best and most useful evergreens; excellent for screens and hedges.

PYRAMIDAL ARBORVITAE.

A superb, new and hardy sort, of very compact habit; much better than the Irish Juniper, and growing in a perfect column; rare and beautiful. Largely planted in cemeteries, owing to the small amount of space it occupies. This is perhaps the most valuable Arborvitae in cultivation.

THE EUROPEAN LARCH.

Is the greatest timber tree in Europe, combining rapid growth with great durability, extreme hardiness, adaptability to any variety of soil not too wet, and remarkably free from disease. It is also very desirable as an ornamental tree, its conical shape, regular, delicate branches, and soft, light green leaves, making a striking contrast to the different varieties of European and ornamental trees. Thrives well in Minnesota and the Dakotas.

Useful Rules.

To Get the Number of Trees or Plants Required for an Acre.

Divide the number of square feet in an acre (43,569) by the number of square feet each plant occupies. This is obtained by multiplying the distance between the rows by the distance between the plants. For example: Apple trees planted 33x16½ feet gives each tree 544½ square feet, or eighty trees to the acre.

NUMBER TO THE ACRE.

3 feet apart each way	4,840
4 " " " "	2,722
6 " " " "	1,210
8 " " " "	680
16 " " " "	170
20 " " " "	180
16½x33 feet apart each way	80

A Few Straws.

THE EXPERIENCES OF OTHERS ARE ALWAYS INTERESTING.

The following complimentary letters from a few of my patrons are all voluntary, none having been solicited. Thousands could be given if space would permit.

ALABAMA.

D. Hill, Dundee, Ill.

Pinnacle, Ala., May 15, 1897.

Dear Sir:—I received the Arborvitae Pyramidal and six small but very nice Norway Spruce and four very good and beautiful Hemlock Spruce. Many thanks for those little ones

Yours very truly, A. H. Wetzel.

CONNECTICUT.

D. Hill, Dundee, Ill.

Milford, Ct., May 23, 1898.

Dear Sir:—I am well pleased with the Norway Spruce you sent me. The packing was perfect and they were in good condition. You will hear from me again when I need anything in your line

Yours truly, D. C. Lines.

IOWA.

D. Hill, Dundee, Ill.

Dear Sir:—Evergreens arrived in very good condition—they are very fine trees. I am well pleased with them. I admire your way of packing.

Yours, truly, H. Schlegel.

D. Hill, Dundee, Ill.

Cedar Rapids, Iowa, April 5, 1898.

Dear Sir:—The trees came in the best possible condition and were as fresh as young, healthy children. It was quite a task to plant them all, but they are planted and I hope they will grow and growing talk praise for the nurseryman and evergreen specialist in Dundee, Ill.

Yours very truly,

F. K. Ringsmuth.

D. Hill, Dundee, Ill.

Alden, Iowa, April 7, 1898.

Dear Sir:—Shipment of Cedars came to hand. Was surprised to see such fine seedlings. They are the best I ever handled. I shall remit in about five or ten days, or as soon as I get back from a business trip.

Yours very truly,

J. W. Draper.

D. Hill, Dundee, Ill.

Harlan, Iowa, April 19, 1898.

Dear Sir:—Your Evergreens arrived about a week ago. I am well pleased with them. They are well rooted, hardy, good streets.

Yours respectfully,

Peter Anderson.

D. Hill, Dundee, Ill.

Sac City, Iowa, May 3, 1898.

Dear Sir:—Plants arrived all right and in good condition. Can truly say it is the best nursery stock I ever received.

Yours very truly,

E. V. Cleveland.

D. Hill, Dundee, Ill.

Glendon, Iowa, May 10, 1898.

Dear Sir:—The trees arrived in good condition. I am well pleased with them. Many thanks for the 50 White Pine sent as a present.

Respectfully,

J. Early.

ILLINOIS.

D. Hill, Dundee, Ill.

Watago, Ill., May 14, 1898.

Dear Sir:—The seedlings arrived in very good condition. They were carefully packed. Thanks.

Yours very truly, Henry P. Ecklund.

D. Hill, Dundee, Ill.

Vassal, Ill., April 6, 1898.

Dear Sir:—I received the nursery stock on April 4th in good condition. Am well pleased with it. I shall send you another order this fall. Please accept thanks.

Yours very truly,

Geo. Brookey.

INDIANA.

D. Hill, Dundee, Ill. Clay City, Ind., May 21, 1898.
 Dear Sir:—The evergreens arrived in good condition and were well packed.
 Many thanks for your kindness, and nice selection.
 Yours very truly, H. Leg.

KANSAS.

D. Hill, Dundee, Ill. Manhattan, Kans., April 4, 1898.
 Dear Sir:—The evergreens came to hand in due time and in good condition. I am much pleased with them and will remember you in the future should I need anything in your line
 Yours respectfully,
 John Elliot, Supt. of Cemetery.
 D. Hill, Dundee, Ill. Lindsboro, Kans, April 5, 1898.
 Dear Sir:—The Evergreens came o hand the 1st inst. and were in fine condition. Were much better than I expected for the money and I am well pleased with them. Thanks.
 Respectfully, C. J. Winblad.
 D. Hill, Dundee, Ill. Minneapolis, Kans., April 9, 1898.
 Dear Sir:—Evergreens arrived in fine shape. Was surprised to find such nice trees and much larger than I expected. If I have good luck with them yiu may expect other orders from this neighborhood.
 Yours truly, Peter L. Bower.

D. Hill, Dundee, Ill. Claflin, Kans., April 20, 1898.
 Dear Sir:—Received Evergreens al O. K. Am very much pleased with them. Hope they will do well. I will highly recommend your nursery.
 Very respectfully, Mrs. Addie Grissell.

KENTUCKY.

D. Hill, Dundee, Ill. Warsaw, Ky., May 4, 1898.
 Dear Sir:—The Evergreens arrived a few days ago. I am very much pleased with them. Thanks for prompt shipment. Expect to give you a larger order next spring.

MICHIGAN.

D. Hill, Dundee, Ill. Okemos, Mich., April 5, 1898.
 Dear Sir:—Evergreens were received yesterday in good condition. I planted them immediately and expect to have something beautiful in my old age.
 Yours respectfully, L. H. Laylin.

MINNESOTA.

D. Hill, Dundee, Ill. Olivia, Minn., May 20, 1898.
 Dear Sir:—Your trees reached us in good shape and are the finest we have bought. Thanking you for past favors, I remain
 Yours very truly,
 J. E. W. Peterson.

D. Hill, Dundee, Ill. Lakeville, Minn., May 18, 1898.
 Dear Sir:—Trees arrived in fine condition.
 Respectfully yours, F. M. Kilbourne.

D. Hill, Dundee, Ill. Benedict, Minn., May 15, 1898.
 Dear Sir:—Evergreens arrived in good condition.
 Yours very truly, Peter Kaelzer.

MASSACHUSSETTS.

D. Hill, Dundee, Ill. Groton, Mass., March 31, 1898.
 Dear Sir:—Plants were received in excellent condition and were in every way satisfactory.
 Respectfully yours, H. Huebner.

MARYLAND.

D. Hill, Dundee, Ill. Woodstock, Md., April 18, 1898.
 Dear Sir:—The Evergreens arrived in good condition. I am much pleased with them.
 Yours very truly, Rev. A. Sabeth.

The Highest and Only Award for the Best Collection of Hardy Evergreens at the World's Columbian Exposition, Chicago, 1893, was awarded to D. HILL, Evergreen Specialist, Dundee, Ill.

\$1,600 FOR A FOUR ACRE GROVE!

If you are the owner of a Prairie Farm, don't delay the planting of a grove, wind-break, shelter-belt or screen. It will add thousands of dollars to its value if the proper varieties of trees are used.

Only eight years ago the writer planted a four acre grove of trees on a quarter section of cheap land in the state of Minnesota, and where the settlers said trees would not grow. Sixteen Hundred Dollars, hard cash, is the amount I received for this little grove.

On the open prairie, three miles west of the town of St. James, in the county of Watonwan, state of Minnesota, on Section No. 17, can be seen not the largest grove in the state, but one of the most beautiful and perfect groves, wind and snow breaks to be found in the state. Any farmer can have just such a grove at a cost of \$100.00 or less, but not by doing what the first settlers in a prairie country usually do: namely, fool away their money for worthless wild trees that are dead before planted.

Varieties planted in this grove were, the European Larch, Scotch and Austrian Pines, Balsam Fir and Norway Spruce. They are today 16 to 20 feet in height. There were no other improvements or buildings on this farm which was sold for \$30.00 per acre. Without the grove \$18.00 to \$20.00 would have been a high price for the land. Thus you see the grove has made for me, sixteen hundred to two thousand dollars.

Any of the merchants, the St. James bank, or A. R. Voss, farmer and stock breeder, of St. James, Minn., can confirm the above statement as to this grove.

D. HILL,

EVERGREEN SPECIALIST,

DUNDEE, ILLINOIS.

DUNDEE, ILL.,

March 21st, 1899.

DEAR SIR :

Having purchased the Entire Nursery Stock of the ELGIN NURSERIES, at ELGIN, ILL.—which is only 5 miles from my Dundee Nursery,—I find by their books that you have been patron of the above Nurseries. I therefore solicit your patronage for the future, and assure you no pains will be spared in digging, packing and shipping to insure safe arrival of goods.

In addition to prices named in my catalogue and 50 Great Bargain Sheet sent herewith, I present the following for your consideration; freight charges prepaid when order amounts to \$10 and upwards:

100 Scotch Pine, transplanted, 2 feet	..	..	..	..	\$10.00
100 Norway Spruce, „ 2 feet	..	..	..	..	15.00
100 Norway Spruce, „ 1½ ft.	..	..	..	..	12.00
100 Hemlock Spruce, „ 12 to 18 inches	..	..	..	..	8.00
100 Am. Arbor Vitae, „ 12 to 18 inches	..	..	..	..	6.00

Seedling Evergreens—Selected Trees.

100 Norway Spruce, 12 to 15 inches	..	..	..	..	\$2.00
100 Scotch Pine, 12 to 15 inches	..	..	..	..	2.00
100 Austrian Pine, 12 to 15 inches	..	..	..	..	2.00
100 White Pine, 10 to 12 inches	..	..	..	..	2.00
100 Am. Arbor Vitae, 10 to 12 inches	..	..	..	..	2.00
100 European Larch, heavy, 2 to 3 feet	..	..	..	..	3.50
100 Black Walnut, heavy, 2 to 3 feet	..	..	..	..	2.00

My Nurseries at Dundee as well as Elgin are located on the open prairie, exposed to all kinds of wind and weather, thus giving my trees a hardiness not found in trees that are grown under protection. My trees are all Nursery grown, and guaranteed in every way as represented.

REFERENCE: ELGIN NATIONAL BANK, ELGIN, ILL.

Please examine my Catalogue and Bargain Sheet and send me a trial order.

DR. HUBER

PROPRIETOR,

ELGIN AND DUNDEE NURSERIES,

ELGIN, ILL.

50 GREAT BARGAINS

To induce beginners and others to try a sample of my stock, I offer the following **SPECIAL BARGAINS**, everything No. 1 and first-class, and cannot fail to give satisfaction. Don't fail to try one or more of these bargains. Take your choice of any of the following packages, one or more, by mail, postpaid, to any postoffice in the United States, or by freight prepaid, to any railroad station in the United States east of the Rocky Mountains, **EXCEPT LISTS NO. 48, 49 AND 50.** See *other side*.

30 **PACKAGES** FOR ONLY \$1.00 PER PACKAGE.

These mail packages are made up of the number named of each variety. We never divide the packages, or put more than one variety in each \$1.00 package.

Evergreen Seedlings.

- 1.—100 Scotch Pine, 2 years.....6 to 8 in
- 2.—20 Scotch Pine, 3 years.....1 ft. fine
- 3.—100 Austrian Pine, 3 years.....6 to 8 in
- 4.—20 Austrian Pine, 3 years.....1 ft. fine
- 5.—12 Pinus Ponderosa, 3 years.....1 ft. fine
- 6.—100 White Pine, 2 years.....4 to 6 in
- 7.—50 Pitch Pine, 2 years.....4 to 6 in

Transplanted Evergreens

The trees here offered are all No. 1, and first-class in every way. Two or three times transplanted, therefore well rooted. They cannot fail to please. The assortment includes many of the newer and higher priced Evergreens. They will be packed and delivered to your nearest railroad station.

Freight Charges Prepaid upon receipt of price named except Note 48, 49 and 50

20 Blue Spruce.....	1 foot
20 Douglas Spruce.....	1 foot
20 American Arbor Vitae.....	1 foot
20 Concolor.....	1 foot
20 Balsam Fir.....	1 foot

List No. 34. Price \$5.00.

9 Scotch Pine.....	1 foot
9 Austrian Pine.....	1 foot

50 GREAT BARGAINS
