PLANT SYMBOL LIST FOR
RANGE PLANTS OF ARIZONA AND NEW MEXICO

963367

Introduction

USDA National Agricultural Library
NAL Building
10301 Baltimore Blvd.
Beltsville, MD 20705-2351

This list of common and botanical names has been compiled from records of plants collected by the U. S. Forest Service in Arizona and New Mexico. It is intended to provide a tabulation of (1) accepted botanical names for the most common species, (2) common names for these species, and (3) standard symbols for use in field records.

The botanical names follow the International Code which is the code followed by the U. S. Department of Agriculture. Appropriate cross-reference and synonymy are given where names were different under the formerly used American Code. Synonyms also have been added, as necessary, to correlate with "Arizona Flora" ^{1/} by Kearney and Peebles, Ed. 2, 1951, and "A Flora of Arizona and New Mexico" ^{2/} by Tidestrom and Kittell, 1941, since these two manuals are most likely to be used by research workers in the area.

One to several common names are given for most plants. In the first column of common names is the name or names that have been used in the past in the Southwest. In the second column is the common name from "Standardized Plant Names," 1942, ^{3/} or the "Check List of Native and Naturalized Trees of the United States," ^{4/} if these names are different from those in the first column. Generally the names in the second column are preferable to those in the first. For a few plants, names in the second column are marked by "%". These are suggested names to replace those in use where they are in conflict with accepted names but for which names are not listed in Standardized Plant Names.

Symbols are four letters for genera and species and five letters for varieties. The rules used in assigning symbols are as follows:

1. For genera the first four letters are used and all letters are capitalized.
2. For species the first two letters of the generic name followed by the first two letters of the species name are used and only the first letter capitalized.

^{1/} "Arizona Flora" by Thomas H. Kearney and Robert H. Peebles. Berkeley, California. 1951.

^{2/} "A Flora of Arizona and New Mexico" by Ivar Tidestrom and Sister Teresita Kittell. Washington, D. C. 1941.

^{3/} "Standardized Plant Names" by Harlan P. Kelsey and William A. Dayton. Harrisburg, Pa. 1942.

^{4/} "Check List of Native and Naturalized Trees of the United States." U. S. Dept. Agr. Handbook 41. 1953.

1. The first section of the report deals with the general situation of the country and the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

2. The second section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

3. The third section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

4. The fourth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

5. The fifth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

6. The sixth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

7. The seventh section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

8. The eighth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

9. The ninth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

10. The tenth section of the report deals with the progress of the work during the year. It mentions the various projects that have been completed and the results of the investigations. It also mentions the various projects that have been completed and the results of the investigations.

3. For varieties the first two letters of the generic name, the first two letters of the species name, and the first letter of the variety name are used and only the first letter capitalized.
4. Where duplication of symbols occurs, numbers are added to indicate such duplication. The number is part of the symbol.

Marks used in the list are as follows:

1. Synonyms are indicated by underlining.
2. Subspecies are indicated by "ssp" between the species and subspecies names or preceding the subspecies name when it is indented under the species name.
3. Varieties are indicated by indentation of several spaces under the species name or, in writing the varietal name on the same line as the species name, the word "var." is between the species and variety names. Under the International Code the variety should always be preceded by "var."
4. Forms are indicated by "forma" between the species and form names, or preceding the form name when it is indented several spaces under the species name.

Agsm	smithii Rydb.	western wheatgrass (bluestem wheatgrass)
Agsp	spicatum (Pursh) Scribn. & Smith	bluebunch wheatgrass bearded bluebunch wheatgrass
Agsu	subsecundum (Link) Hitchc.	bearded wheatgrass
Agtr-1	trachycaulum (Link) Malte	slender wheatgrass
	= <u>A. pauciflorum</u> Schwein.	
Agtr-2	trichophorum (Link) Richt.	stiffhair wheatgrass pubescent wheatgrass ^{2/}
AGRO-2	Agrostis	bentgrass
Agal	alba L.	redtop
Agex	exarata Trin.	spike bent spike bentgrass
Aghi	hiemalis (Walt.) B.S.P.	winter bent winter bentgrass
Agpa-1	palustris Huds.	creeping bent creeping bentgrass
Agsc-1	scabra Willd.	winter bent rough bentgrass
	= A. hiemalis of authors, NOT (Walt.) B.S.P.	
	<u>NOTE:</u> The common name of rough bentgrass is suggested for Agrostis scabra to distinguish it from winter bentgrass with which it has been confused in some manuals.	
Agse	semiverticillata (Forsk.) C. Christ.	water bent water bentgrass
ALOP	Alopecurus	foxtail
Alae	aequalis Sobol.	shortawn foxtail
Alge	geniculatus L.	water foxtail

^{1/} Fairway wheatgrass is now the recommended common name for Agropyron cristatum; crested wheatgrass is now the recommended common name for Agropyron desertorum.

^{2/} Pubescent wheatgrass is the common name used in the USDA (FS) Agriculture Handbook # 58 for Agropyron trichophorum.

Psla	lanceolata Pursh	lemon scurfpea	
Fste	tenuiflora Pursh	slender scurfpea	slimflower scurfpea
Ptaq	Pteridium aquilinum (L.) Kuhn	bracken	
Ptaqp	pubescens Underw.		western bracken
PTER	Pterospora	pinedrops	
Ptan-2	andromedea Nutt.	woodland pinedrops	

Ptiloria See Stephanomeria

Forbs List (continued)

PYRO	Pyrola	pyrola	
Pyel	elliptica Nutt.	waxflower pyrola	
Pypi	picta J. E. Smith	whitevein pyrola	
	<u>secunda</u> See Ramischia secunda		
Pymu	Pyrrhopappus multicaulis DC.	false-dandelion	-----
	<u>Quamoclidion multiflorum</u> See Mirabilis multiflora		
	<u>Quamoclit</u> See Ipomoea		
Rase	Ramischia secunda (L.) Garcke	sidebells-pyrola	
	= <u>Pyrola secunda</u> L.		sidebells pyrola
RANU	Ranunculus	buttercup (crowfoot)	buttercup
Raaq	aquatilis L. <u>1/</u>	aquatic buttercup	watercrowfoot
	= <u>Batrachium aquatile</u> (L.) Wimm.		buttercup
Racy	cymbalaria Pursh	desert buttercup	shore buttercup
Rafl	flammula L.	creeping buttercup	spearwort buttercup
Rahy	hydrocharoides A. Gray	small-leaf aquatic buttercup	-----
Rama	macranthus Scheele	showy buttercup	
RATI	Ratibida	prairie-coneflower	
RHIN	Rhinanthus	yellowrattle	rattleweed
Rhri	rigidus Chab.	yellowrattle	-----
RHYN	Rhynchosia	rosarybean	rhynchosia
	= <u>Dolicholus</u>		
	Ricinus See "Shrubs"		
RIVI	Rivina	rougeplant	
Rihu	humilis L.	bloodberry	bloodberry rouge- plant

1/ Typical R. aquatilis is an Old World species; Ranunculus aquatilis var. capillaceus (Thuill.) DC. is the name for plants of our area; R. trichophyllus Chaix is a synonym of this.

Forbs List (continued)

RORI	Rorippa	rorippa	
Rona	nasturtium-aquaticum (L.) Schinz & Thell.	watercress	
Roob	obtusa (Nutt.) Britt.	fieldcress	obtuse field- cress
Rosy	sylvestris (L.) Besser	yellowcress	yellow fieldcress
RUDB	Rudbeckia	coneflower	
Ruhi	hirta L.	black-eyed-susan	
Rula	laciniata L.	cutleaf coneflower	
Ruoc	occidentalis Nutt.	niggerhead	
RUME	Rumex	dock (sorrel)	dock
Ruac	acetosella L.	sheep sorrel	
Ruco	conglomeratus Murr.	clustered dock	
Rucr	crispus L.	curly dock	
Ruhy	hymenosepalus Torr.	canaigre (wild-rhubarb)	canaigre
Ruob	obtusifolius L.	bitter dock	
SAGI-2	Sagina	pearlwort	
SAGI-1	Sagittaria	arrowhead	
Saka	Salsola kali L. = <u>S. pestifer</u> A. Nels.	Russianthistle	
SALV	Salvia See also "Shrubs"	sage	
Saar	arizonica A. Gray	Arizona sage	-----
Saco	columbariae Benth.	chia sage	California chia
Sare	reflexa Hornem.	RockyMountain sage	-----
SAMO	Samolus	waterpimpernel <u>1/</u>	-----
SANG	Sanguisorba	burnet	
SAPO	Saponaria	soapwort	
Saof	officinalis L.	bouncing-bet	
Sava	vaccaria L.	cow soapwort	
SART	Sartwellia	gypsumweed	-----

1/ There are several "water-pimpernels", incl. Veronica anagallis-aquatica.

Forbs List (continued)

SAXI	Saxifraga	saxifrage	
SCRO	Scrophularia	figwort	
SCUT	Scutellaria	skullcap	
Scla	lateriflora L.	sideflowering skullcap	Caucasian skullcap
SEDU	Sedum	stonecrop	
Sest	stenopetalum Pursh	wormleaf stonecrop	
SENE	Senecio	groundsel

TREES AND SHRUBS LIST

ABIE	Abies	fir	
Abco	concolor (Gord. & Glend.) Lindl.	white fir	
Abla	lasiocarpa (Hook.) Nutt.	subalpine fir	
Ablaa	arizonica (Merriam) Lemm.	corkbark fir	
ABUT	Abutilon	Indianmallow	abutilon
ACAC	Acacia	acacia	
Acan	angustissima (Mill.) Kuntze	whiteball acacia	prairie acacia
Acco-1	constricta Benth.	mescat acacia (whitethorn)	mescat acacia
Acfa	farnesiana (L.) Willd.	sweet acacia	
Acgr	greggii A. Gray	catclaw acacia	
AcLi	Acalypha lindheimeri Muell. -Arg.	crimson acalypha	Lindheimer copperleaf
ACAM	Acamptopappus	goldenhead	
Acsp	sphaerocephalus (Harv. & Gray) A. Gray	rayless goldenhead	
ACER	Acer	maple	
Acgl	glabrum Torr.	Rocky Mountain maple	
Acgr-1	grandidentatum Nutt.	bigtooth maple	
Acne	negundo L.	boxelder	
<u>Adelia</u> See Forestiera.			
AGAV	Agave	agave	
Agat	atrovirens Karw.	pulque agave -- a Mexican species	
Agde	deserti Engelm.	desert agave	-----
Agka	kaibabensis McKelvey	Kaibab agave	-----
Agpa-2	palmeri Engelm.	Palmer agave (centuryplant)	Palmer agave
Agpa-3	parryi Engelm.	Parry agave (mescal)	Parry agave
Agpa-4	parviflora Torr.	small-flowered agave	-----
Agsc-3	schottii Engelm.	Schott agave (amole)	-----
Agut	utahensis Engelm.	Utah agave	
ALNU	Alnus	alder	
Alob	oblongifolia Torr.	Arizona alder	
Alte	tenuifolia Nutt.	thinleaf alder (mountain alder)	

Trees and Shrubs List (continued)

Alwr	Aloysia wrightii (A.Gray) Heller = <u>Lippia wrightii</u> A. Gray	Wrights lippia	Wrights lemon-verbena%
AMEL	Amelanchier <u>1/</u>	serviceberry	
Ammo	mormonica C. K. Schneid.	Mormon serviceberry	-----
Amor	oreophila A. Nels.	mountain serviceberry	
Ampo	polycarpa Greene	cluster serviceberry	
Amut	utahensis Koehne	Utah serviceberry	
AMOR	Amorpha	amorpha	
Amca	californica Nutt.	stinkingwillow amorpha	California amorpha
Amfr-1	fruticosa L.	indigobush amorpha	
Amfr-2	Amphipappus fremontii Torr. & Gray	chaffbush (broomweed)	-----
ANIS	Anisacanthus	-----	anisacanth
Anth	thurberi (Torr.) A. Gray	desert-honeysuckle	Thurber anisacanth
		<u>NOTE:</u> There are some true honeysuckles (Lonicera spp.) growing in the southwestern U.S. and northern Mexico deserts. Desert-honeysuckle not a very distinctive name. See also Beloperone.	
APLO	Aplopappus (also spelled Haplopappus)	See Forbs List.	

% Suggested common name.

1/ Serviceberry species hard to tell apart. G. N. Jones,
"American Species of Amelanchier" (Univ. Ill. Biol.
Monog. 20: 1 - 126. 1946) regards A. mormonica and A. oreophila
as synonyms of A. utahensis, and A. polycarpa as a synonym of
A. pumila Nutt. The Forest Service Check List reduces
A. oreophila to a synonym of A. utahensis. Kearney and
Peebles, Arizona Flora, 1951, treat the species as given
above.

. . Trees and Shrubs List (continued)

ARBU	Arbutus	madrone	
Arar-2	arizonica (A. Gray) Sarg.	Arizona madrone	
Arte-2	texana Buckl.	Texas madrone
