BIRDS

OF THE

CARRIZO

The 200,000 acre Carrizo Plain Natural Area, established in 1988, is the largest remaining example of San Joaquin Valley Ecosystems. The Carrizo Plain Natural Area is cooperatively managed by the U. S. Bureau of Land Management, the California Department of Fish & Game, and The Nature Conservancy for the benefit of rare and endangered plants and animals and imperiled natural communities. The variety of habitats within the Carrizo Plain Natural Area also provide for a diverse assemblage of birds.

This checklist includes 183 species of birds documented in the Carrizo Plain Hydrographic Basin through 1993. Please report sightings of accidental, unlisted species or those marked by a "+" to the Goodwin Education Center [(805) 475-2131].

KEY TO CODES

SEASON
PR - Permanent Resident IR - Introduced Resident
WV - Winter Visitor SV - Summer Visitor
SR - Spring/Summer Resident M - Migrant
FR - Former Nesting Resident FV - Former Visitor

HABITAT LOCATION
AQ - Aquatic S - Saltbush Scrub
A - Aerial G - Valley Grassland
AG - Grainfield SD - Semidesert Scrub
H - Human Habitat R - Rocky Outcrops
IB - Iodine Bush Scrub J - Juniper Woodland
WE - Waters Edge
FC - Fremont Cottonwood Woodland

STATUS
A - Abundant AB - Audubon Blue List
C - Common CSC - CA, DF & G Concern
U - Uncommon CE - CA Endangered
R - Rare FE - Fed. Endangered
I - Irregular FT - Fed. Threatened
X - Accidental CT - CA Threatened
* - Nesting Record F1 - Fed. Species, Cat. 1
 F2 - Fed. Species, Cat. 2
 F3 - Fed. Species, Cat. 3
