BUCKBEE'S FULL SEEDS OF LIFE SEEDS

United States Food Administration License Number G-43107

DIRECT FROM THE GROWER TO THE PLANTER

They are Tested, Reliable Seeds for all Soils and all Climates

They Have Satisfied Every Buyer for 49 Years

No Book Accounts

TERMS CASH WITH ORDER

USE ORDER BLANK AND ENVELOPE WHICH YOU WILL FIND INCLOSED WITH THIS CATALOGUE IN MAKING OUT YOUR ORDER

Customers from Canada and Foreign Countries

Must Send Twenty-five Cents Additional for Postage and Packing on Each Dollar's Worth of Seeds Ordered

REMEMBER—We cannot accept Canadian and Foreign Postage Stamps

READ THESE FEW WORDS ABOUT RELIABLE SEEDS

From good seeds only can good crops be grown

Yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes, which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

FAIR PLAY GUARANTEE

First—We guarantee that all seeds sold shall reach customers in good condition.

Second—We guarantee to hold ourselves responsible for the safe arrival of all remittances sent us by P. O. Order, Bank Draft, Express Order, or Registered Letter.

Third—We guarantee to deliver free of charge in the United States all garden and flower seeds listed in this catalogue, except those quoted at wholesale prices on pages 2 and 3, and Field Seeds, Grass Seeds, Potatoes and such other items that are plainly marked to be shipped by Express or Freight at purchaser's expense.

Fourth—We guarantee Buckbee's "Full of Life" Seeds to be just as represented—if they prove otherwise, notify us promptly upon receipt of seeds, sending us the numbered shipping tag which was on the shipment and we will refill the order free of charge, or refund the money paid us for same.

Plant Shipments We always recommend having plants sent by express, when there is an express office near, as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay charges.

Kindly write your list of plants, bulbs and roots all together (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to foreign countries.

View of Buckbee's Seed Warehouses and Offices, the Largest and most Complete, Modern Up-to-Date Seed and Plant Establishment in America with a Thorough Organization for the Prompt and Accurate Execution of Orders. Capacity 7,000 Orders Daily. A hearty welcome is extended to our Patrons and Friends to call and inspect our establishment at all times.

SPECIAL WHOLESALE BULK PRICE LIST OF BUCKBEE'S "FULL OF LIFE" SEEDS

NOTICE—All Seeds listed on Pages 2 and 3 of this Catalogue are shipped by Express or Freight at purchaser's expense. No extra charge is made for packing, boxes or bags.

SEEDS BY PARCEL POST—If any items are wanted BY PARCEL POST add additional for postage and packing at the rate of 10 cents per pound to Wholesale prices listed on Pages 2 and 3 of this Catalogue.

IMPORTANT NOTICE—Reliable "Full of Life" seeds of most all varieties were very short crop the past season, and we reserve the right to decline orders for scarce items unless included along with a good general order for Vegetable Seeds, as it is our purpose to protect, as usual, our thousands of customers who annually look to us for a general supply of Buckbee's "Full of Life" seeds.

BUCKBEE'S "FULL OF LIFE" VEGETABLE SEEDS.

ASPARAGUS

Every home and kitchen garden should have a bed of Asparagus. The growing popularity which this most delightful and wholesome vegetable has attained the past few years is remarkable. Without question, it is one of the most favorite and profitable garden crops, and makes a return early in the spring before any other out-door crop can be marketed, and when a bed is thoroughly established will yield splendid crops for a number of years.

BUCKBEE'S PERFECTION—This is unquestionably the most valuable new variety and the most satisfactory introduction of recent years. At three years old this variety has yielded at the rate of \$500.00 per acre. In short, it has all the qualities demanded for the market and will prove itself to everyone who grows it to be true to its name, Perfection. It is deliciously tender, extra large, early, uniform, prolific, crisp and white. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 60c; 1 lb. \$1.00.

BONVALLET'S GIANT—This grand variety is now planted by the market growers in the Middle West, to the exclusion of almost all others on account of its extreme vigor and rust resistance. Usually it produces a crop a year in advance of other sorts. Moreover, the cutting period is longer than other sorts, as stalk crowns do not divide until quite tall. Our strain has been improved each year by careful reselection. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 50c; 1 lb. 90c.

BARR'S MAMMOTH—Very large stalks, often one inch in diameter, quick growing, tender and succulent. Pkt. 5c; oz. 7c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 50c.

COLUMBIAN MAMMOTH WHITE—Furnishes white shoots which stay white as long as fit for use without earthing up, or any other artificial blanching and can be absolutely depended upon to give 80 to 90 per cent of white plants. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c.

CONOVER'S COLOSSAL—A standard variety of large size and delicious quality. Pkt. 5c; oz. 7c; 2 oz. 10c; ¼ lb. 17c; ½ lb. 28c; 1 lb. 45c.

Buckbee's "Full of Life" Asparagus Roots

Buckbee's Perfection Asparagus

NEW PALMETTO—Extensively grown by Southern gardeners for Northern markets, where it sells at very high prices owing to its mammoth size and regularity. Equally well adapted to the North. Pkt., 5c; oz., 8c; 2 oz., 12c; ¼ lb., 20c; ½ lb., 30c; 1 lb., 55c.

Complete Cultural Directions furnished free with every order for Asparagus Roots

ASPARAGUS ROOTS

Two Year Old Roots	Postpaid		Not Prepaid	
	Per Doz.	Per 100	Per 100	Per 1000

For success and immediate results we recommend planting the 3 and 4 year old roots.

Owing to the many and numerous requests of our customers for the largest sized roots we have especially grown a fair supply of selected 3 and 4 year roots to meet this demand. Our price, as long as the supply lasts, on any of the 7 varieties listed on this page, only 50c per doz.; \$2.75 per 100, postpaid. By express, freight, at buyer's expense, \$1.75 per 100; \$15.00 per 1000.

BROCCOLI

Similar to Cauliflower, of less delicate flavor but harder; of value in the Northern States.

EARLY PURPLE CAPE—This is the best variety for our climate. It produces large heads of a pleasing bluish color, very close and compact. Pkt., 10c; oz., 90c.

NEW WHITE CAPE—Medium sized heads, close and compact, of creamy-white color. A sure header. Pkt., 10c; oz., 75c.

Brussels Sprouts Buckbee's Matchless

BRUSSELS SPROUTS

Brussels Sprouts are very largely grown in the South, as high as 250,000 barrels being shipped in a single season from Norfolk, Va. They are well worthy of extensive culture anywhere in this country. The plants resemble Cabbage in growth, but make small, compact, round heads at each leaf joint on the stalk. These heads are cut off when well formed and marketed in Strawberry Boxes holding one quart. The plants are quite hardy, are not injured but improved by hard frosts and are left in the garden or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family.

IMPROVED PARIS MARKET—On this variety the heads grow very closely arranged on a stalk 20 in. to 2 ft. in height. Quality is very fine. Pkt., 5c; oz., 30c; 2 oz., 50c; ¼ lb., 90c.

BUCKBEE'S MATCHLESS—The finest strain of sprouts. The plants are of strong, vigorous growth, closely pointed and are covered the entire height with very large solid, tightly folded sprouts of exquisite quality. Buckbee's Matchless is an early variety; first will find the sprouts fully developed and the stems thickly set. Pkt., 10c; oz., 35c; 2 oz., 60c; ¼ lb., \$1.00

New Jackson Wonder
Bush Lima

THE BEST
BUSH LIMA BEANS

Buckbee's Improved
Bush Lima

Superior Quality, Exquisite Flavor, Fine Color,
Good Shipper, Hardy Grower, Enormously
Productive, Matures Early, Excellent
Keeper.

This is the very "newest" in the Bush Lima
Bean. It greatly excels all other Bush Limas
in productiveness, being practically loaded down
with pods continuously from early Summer till
frost.

It Matures Extremely Early. Is Suitable, Therefore, for All
Sections North and South, and is a Continuous
Bearer Until Frost.

In size the Beans are what might be termed intermediate, not
so large as the Burpee Bush Lima, but considerably larger than
the Henderson's Bush Lima, making it, in our estimation, the
finest size for all purposes. The bush is sturdy in habit and
about 24 inches high, having good large leaves. It bears its
fruit on long spikes in heavy clusters well out from the plant.
There are several pods in each cluster, as many as ten having
been counted. Each pod contains on an average of four Beans,
though there are more containing five than three, so you see
that it is a great improvement over the old-fashioned Bush
Limas which oftentimes have only one or two in a pod. Con-
sidering the large number of pods on a bush, the yield is
amazingly enormous. In quality the Bean is par excellence,
flavor unsurpassed, and color the very best, both before and
after cooking. Valuable also as a shell bean for winter use.

It has become very popular and our sales of it are enormous,
far exceeding those of any other Bush Lima variety. Send to
BUCKBEE for originator's stock seed. Postpaid, pkt. 10c; ½ lb.
50c; lb. 55c.

FORDHOOK BUSH LIMA

Exceptionally Fine Quality. The Leading Bush Lima in the East.
An improved Dreer's Bush Lima. The plant is vigorous and
erect growing, bearing the pods well above the ground. The
pods, which are produced in large clusters, are medium green,
about 4½ inches long, and each contains three to five large
Beans of exceptionally fine quality. Both pods and Beans are
twice the size of Dreer's Bush Lima; in season it is two weeks
earlier.

Seed large, irregularly oval in shape, very thick, white
with greenish tinge. We consider this a decided acquisition to
the Dwarf Limas and one of the very best. Postpaid, pkt. 8c;
½ lb. 25c; lb. 50c.

BURPEE'S BUSH LIMA

Erect, stout bushes, 18 inches high, and with a diameter of
2 to 3 feet. Very productive. Large pods filled with large Beans
of luscious quality. Postpaid, pkt. 8c; ½ lb. 25c; lb. 40c.

DREER'S BUSH LIMA

Pods short, containing three to four Beans which are closely
packed and are thick, sweet and succulent. Postpaid, pkt. 8c;
½ lb. 25c; lb. 45c.

LIMA

BUSH LIMA

F
O
R
D
H
O
O
K

BURPEE'S IMPROVED BUSH LIMA

The Earliest Large Seeded Bush Lima. One of the Best for
Market as Well as the Home Garden.

This is the earliest of the large seeded Bush Lima Beans. The
first pickings fit for the table may often be taken in July and
from that time until frost a continuous supply may be gathered.
It is fully 8 days earlier than the old Burpee's Bush Lima and
produces larger pods and more and larger Beans in the pod
than this variety; the seed is also considerably thicker. The
plants grow upright about 30 inches in height and measure
often 24 inches across the top. They are very productive, pro-
ducing immense crops of showy pods which measure from 5 to 6
inches in length. The Beans are of enormous size and of most
luscious flavor. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

NEW JACKSON WONDER BUSH LIMA

Immensely Productive.
This is the most productive and very earliest of the Bush
Limas. It is of true bush form, about 2 feet high, bearing in
greatest profusion, broad, flat pods, each having from three to
five medium-sized, handsomely speckled Beans, which cook
quickly and are of superior quality. Good for Summer use, and
as Winter shell Bean. A splendid Bean for the home garden.
Postpaid, pkt. 8c; ½ lb. 20c; lb. 35c.

HENDERSON'S BUSH LIMA

Compact bushes one foot high. Valuable on account of its
earliness and productiveness. Pods
short, flat, with three small
Beans of delicious qual-
ity. Pkt. 7c; ½ lb.
18c; lb. 32c.

Buckbee's Improved Bush Lima.

Best Dwarf Green Podded Beans

BUCKBEE'S IMPROVED EARLY VALENTINE Standard Round Pod Snap Bean.

Buckbee's Improved Valentine is the earliest, hardiest and finest strain of this popular variety in the country; it is a heavy cropper; true round podded; the pods are very uniform in size and of excellent quality. This strain produces edible pods in less than five weeks from sowing. For snaps there is nothing superior to this variety among the green podded sorts. Vines erect, with coarse dark green leaves and large white blossoms. Pods medium length, curved, cylindrical, with crease in back; very fleshy, crisp and tender. Beans medium size, long, irregular, pink marbled with red. Largely grown by market gardeners for an early crop. Postpaid, pkt, 8c; $\frac{1}{2}$ lb. 18c; lb. 34c.

EARLY MOHAWK

Very Early and Productive.

Very hardy, can be planted early. Pods very long and straight. Beans kidney-shaped, variegated drab, purple brown. Postpaid, pkt, 8c; $\frac{1}{2}$ lb. 17c. lb. 32c.

NEW EXTRA EARLY REFUGEE

Splendid Pods of Excellent Quality.

A very early green-podded Bean, furnishing fleshy pods of fine quality. About two weeks earlier than the Late Refugee, with pods of same size and shape, except slightly flatter. Postpaid, pkt, 8c; $\frac{1}{2}$ lb. 17c; lb. 32c.

VARIETIES FOR SHELL BEANS

The following kinds are used exclusively as shelled beans, either green or dried for winter:

BOSTON WHITE BAKING BEAN Famous for Baking.

A sure cropper and more prolific than the common white Bean and also of better quality, ripening its crop early and all at once. Pods straight short, small; Beans small, oval, white. Postpaid, pkt, 8c; $\frac{1}{2}$ lb. 18c; lb. 35c.

NEW DWARF CRANBERRY OR WREN'S EGG

Excellent for Soup or Baking.

Vines compact, upright and very productive. Pods medium length, cylindrical and curved, with splashes of bright red on a yellowish ground. The ripe Beans are large, plump, oval and nearly covered with splashes of bright red. Equal to Lima Beans in quality. Postpaid, pkt, 10c; $\frac{1}{2}$ lb. 18c; lb. 34c.

EXTRA EARLY BOUNTIFUL Stringless, Tender, Continuous Bearer.

One of the very earliest and largest podded green bush Beans. Pods handsome, long and straight, of very fine quality. The plants are quite large, grow erect, commence to bear very early and continue for a long time. They are very productive. The pods are from 7 to 7 $\frac{1}{2}$ inches long, are flat, of light green color, solid, meaty, brittle, tender, stringless at all stages of growth, and of delicious flavor. They are also of very uniform size and shape. The dried seeds resemble those of the Yellow Six Weeks, but Bountiful is much superior in quality, entirely stringless; also earlier and more productive. A splendid variety for the home garden. Pkt, 8c; $\frac{1}{2}$ lb. 18c; lb. 35c.

Extra Early Bountiful.

BEST DWARF GREEN PODDED BEANS

Buckbee's Early Wonder

The Earliest Bean, an Ideal Snap Bean.

The plants are quite large, grow erect and carry their crop well above the foliage. The pods average about 5 inches in length, usually containing about six seeds, and are round, broad, of a dark green color, solidly meaty, extremely brittle and entirely stringless. They are almost free from disease. Flavor is most delicious. It has the peculiarity of preserving its delicate color almost intact when prepared for the table. Its bearing qualities are unexcelled and it matures its crop very regularly, even under adverse conditions. Buckbee's Early Wonder is one of the most popular Beans grown, on account of its extreme earliness, hardness, great productiveness, freedom from stringiness, and splendid quality. Postpaid, pkt. 10c; ½ lb. 22c; lb. 38c.

Black Valentine

Matures Early. Very Hardy.

Productive green-podded sort with strong, vigorous vines. The pods are handsome, nearly round, one-third longer and straighter than the Red Valentine; the plant a little more spreading and in season a little later. A large crop can be depended on and the product is very attractive on the market. The pods are of dark green color. Is a great favorite with market gardeners in many sections on account of its blight resistant qualities. A long distance shipper. Postpaid, pkt. 8c; ½ lb. 17c; lb. 32c.

New Longfellow

A Boon for the Market Gardener.

The pods are very attractive, long, straight and round. They are very fleshy, of dark green color, measuring from 7 to 8 inches in length, and usually contain about six seeds. The quality is of the finest, wonderfully tender, brittle, and there are no strings except when pods are quite old. A very early variety and exceedingly prolific. This Bean has proven one of the most profitable varieties to grow for the market. Postpaid, pkt. 8c; ½ lb. 17c; lb. 34c.

Early Yellow Six Weeks

Standard Reliable Variety.

Vines large, vigorous, branching, productive, with large leaves and lilac blossoms; pods long, straight, narrow, handsome; Beans long kidney-shaped, color yellowish-drab. Very hardy and extra early. Postpaid, pkt. 8c; ½ lb. 18c; lb. 33c.

New Stringless Green Pod

Valuable for Good Quality and Lack of Stringiness.

Early and very prolific; long, round, straight, thick, meaty pods, entirely free from strings or fibre, of rich, deep green color. Their great attractiveness, productiveness and excellent quality is giving them an ever-growing popularity. It is now a great leader and standard for general purposes. In the garden where green pod Beans are desired this sort is quite indispensable. Plant every two weeks for succession until September. Postpaid, pkt. 8c; ½ lb. 18c; lb. 34c.

Tennessee Green Pod

An Early Intermediate Snap Bean.

This is a very popular Bean wherever known. The plants are large, somewhat spreading and prolific. The pods are very long, often 6 to 7 inches, flat, irregular in shape, bright but rather dark green and of exceptionally fine flavor. Postpaid, pkt. 8c; ½ lb. 18c; lb. 34c.

Refugee or 1,000 to 1

Splendid Quality. Extremely Productive.

Highly esteemed for late planting and for canning and pickling. Pods long, cylindrical, green becoming white, streaked with purple as they mature, of good quality as snaps. Seed long, light drab, thickly dotted and splashed with purple. Postpaid, pkt. 8c; ½ lb. 18c; lb. 33c.

Best Dwarf Wax Yellow Pod Beans

**Buckbee's
New Wonder
Wax**

2 and 3

Buckbee's New Wonder Wax

Extra Early—Rust Proof—Heavy Yields.

This variety is a flat podded sort. Plant is a strong, sturdy grower, 18 inches high and 2 feet across. Well loaded with pods 5 to 7 inches long, slim, flat, plump and handsome. Quality tender, brittle and of fine texture of a clean waxy-yellow color. Very early, coming into edible condition much sooner than any other wax podded sort. Rust-proof. You will make no mistake by planting this new sort. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c.

New Early Prolific or Improved Black Wax

The Earliest Wax Bean and One of the Best for the Market and Home Gardener. You will be thoroughly satisfied with this greatly improved strain of Black Wax, which is more vigorous and by far more productive and much earlier than any other strain. The pods are fleshy, of medium length, borne up well among the foliage, and are curved, cylindrical, of a clear waxy-white color, with long, slightly curved points. Vines of medium size, vigorous and hardy. Beans small, oblong and jet black. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 18c; lb. 35c.

Davis Kidney Wax

Big Money Maker for Gardeners and Truckers.

The vine is rustless and very vigorous, bearing its pods near the center in clusters. When young, the pods are brittle, crisp and tender. Seed kidney-shaped, clear white and excellent for baking. A vigorous, hardy, very productive variety, ripening medium early; pods 7 inches long, straight, very showy. The length, uniformly straight, perfect shape, fine color of the pods and the enormous productiveness make this one of the best Beans for the market gardener as well as the canner. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 37c.

Wardwell's Kidney Bean

Most Profitable Market Gardener's Shipping Bean.

The Bean is entirely distinct from that of all other wax varieties. It is a very early variety, ripening only a little later than Golden Wax and yields a larger crop. Pods $6\frac{1}{2}$ to 7 inches long, straight, flat, waxy-yellow, brittle and stringless. Desirable for every climate. Can be grown with great profit in the South for early shipment North. They always command a ready sale in every market. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 22c; lb. 38c.

New Perfection Wax

Rich golden yellow, 8 to 10 inches long; broad; hang in great clusters. Extremely tender and brittle. Combines great productiveness with high quality. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 22c; lb. 40c.

New Brittle Wax

Extreme Earliness—Great Productiveness—Superb Quality—The Best Wax Bean for the Home Garden.

An extremely early Wax Bean, exceedingly handsome and very desirable, especially for snaps for the home garden. The vines are dwarf, spreading and enormously productive. The leaves are roughened. The pods are round, $5\frac{1}{2}$ to 6 inches long, slightly curved, wax-like, light, yellow, solidly fleshy, tender, brittle and entirely stringless at all stages of growth. They are uniformly perfect, an ill-shaped one being rarely seen. The best of the new round podded sorts and excellent for all purposes. Seed long, medium sized, nearly white, with a little dark marking about the eye. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 22c; lb. 40c.

New Brittle Wax.

Best Dwarf Wax Yellow Pod Beans—Continued

Jones New Stringless White Wax

An Exceptionally Valuable New Early Bean.

This Bean has often been called the White Seeded Golden Wax. It resembles this old and popular variety very much, but it is superior to it in being of more robust and vigorous growth and more productive. Furthermore, the seed is pure white. This feature gives it a decided advantage over all colored Beans, as used as snap Beans they cook without discoloring, and are, therefore, more attractive at the table; besides that, the dry Beans can be used the same as any other staple white Beans. Pods $\frac{1}{2}$ to 5 inches long, golden yellow, broad, very meaty and of the finest quality. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c.

Improved Golden Wax

The well known "good old fashioned" sort, very popular for all purposes. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 37c.

Hodson Wax

The Most Productive Garden Bean

Plants of vigorous growth, late maturing, hardy, very productive and free of blight and rust. Pods seven inches long, straight, flat but thick, of cream-yellow color. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 18c; lb. 35c.

Jones' New
Stringless
White Wax.

2 and 3

The Yosemite Mammoth Wax

High Quality Monster Poddied Wax Bean.

The pods frequently attain a length of 10 to 14 inches, with the thickness of a man's finger, and are nearly all solid pulp, the seeds being very small when fit for use. They are of rich golden color and are absolutely stringless, cooking tender and delicious. A popular wax Bean for family or market purposes. It is enormously productive, as many as fifty of its monster pods having been counted on one bush. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c.

Currie's Rust-Proof Black Wax

Great Rust Resistant Market Gardener's Bean.

Early and enormously productive, with large golden-yellow pods and in many localities extensively grown for both market and shipping. One of its chief features is its freedom from blight and rust. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 37c.

Buckbee's Rust-Proof Golden Wax

The Standard Wax Variety for General Use.

One of the most reliable early sorts. Our own original stock, unequalled in size, color and quality of pods. In this variety we have a Bean that possesses all the good points of the old favorite—Golden Wax—but is larger in pods, much more prolific and handsomer in appearance, being of a dark, rich yellow color and of perfect shape. Of grand quality, showing no string or coarseness, even when past its best, but is of tender and melting flavor at all stages of its growth. Being so exceedingly prolific it is not injured by rust. Dwarf, thick-stemmed plants with oval, straight pods which are brittle and entirely stringless. For market gardeners or private families no better variety can be planted. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 40c.

Buckbee's
Rust-Proof
Golden Wax.

BUCKBEE'S BEST POLE OR CLIMBING BEANS

BURGER'S GREEN POD STRINGLESS

This variety is also called White Seeded Kentucky Wonder; it resembles this variety in form of pods, but is earlier, and covers a longer period of productiveness. The pods are straight, long, of a rich dark green, very meaty, of fine quality and entirely stringless. Seed small and pure white. Postpaid, pkt. 8c; ½ lb. 20c; lb. 38c.

LAZY WIFE POLE

Enormously Productive. Splendid Quality. Pods wonderfully broad, thick, entirely stringless; when fully grown from 4 to 6 inches long and exceedingly rich, buttery and fine flavored when cooked. Fine for snap sorts; also as dry shell or Winter Bean. The seed is medium sized, nearly round and pure white. Postpaid, pkt. 8c; ½ lb. 22c; lb. 40c.

BUCKBEE'S GOLDEN HARVEST CLUSTER WAX

The New World-Beating Wax Pole Bean. A magnificent variety that bears very early and continually the entire season, producing clusters of 3 to 6 pods of fine light yellow color. Pods average about 8 inches in length, exceedingly tender and entirely stringless. Owing to its earliness and hardness this magnificent Pole Bean is well adapted even to very Northern latitudes. Its very large Pods are beautiful in appearance and are unexcelled in quality by any Wax Bean. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

Single Mature Plant of McCaslan.

McCASLAN NEW POLE

The Best Pole Bean in Existence. A White Seeded Green Pod Snap or Shell Bean.

Although only of recent introduction, the McCaslan Bean is already very popular and in many localities has displaced the older pole varieties. It is earlier and more productive than Kentucky Wonder and Burger's Stringless and is fully equal to them in quality.

It is the earliest Pole Bean in cultivation, maturing about 10 days earlier than Burger's Stringless and White Creaseback, which were the earliest Pole Beans known so far. The illustration on this page is taken from a photograph of a single matured plant and shows its immense prolificness. The pods are of dark green color, 10 to 11 inches long, and fill perfectly, containing ten and more seeds. They are fine for use as snap sorts, being entirely stringless, meaty and of the finest flavor and quality. When allowed to mature the shelled beans are of pure white color, good sized and most excellent for Winter use.

The vines begin to bear pods quite early and continue to produce enormous quantities until frost.

This is the one Pole Bean for every garden north and south; it stays with you all season, furnishing delicious Beans in Summer and Fall when this vegetable is always scarce.

Pkt. 10c; ½ lb. 25c; lb. 45c.

Red Speckled Cut Short or Corn Hill

A popular variety for planting among the corn and thus furnishing a good crop without the use of poles. Medium early, very productive, pods about 4 inches long. Postpaid, pkt. 8c; ½ lb. 18c; lb. 33c.

BUCKBEE'S EVERBEARING STRINGLESS

Wonderfully prolific. Continuous bearer. Absolutely stringless. White seeded. Green podded. Rustless. Extremely early.

This splendid Pole Bean originated on Rockford Seed Farms, and has been bred up to the highest degree of perfection by years of careful work and selection. An excellent heavy yielding Pole Bean for the home garden and for the market garden and trucker. Robust, hardy and one of the very earliest.

The enormous rich dark green pods which are produced in immense clusters often measure from 7 to 8 inches long and contain from 5 to 7 Beans. They are of admirable form, free from coarseness, exceedingly tender and of delicious mild and sweet flavor. The dry Beans are white.

We own the entire stock of Buckbee's Everbearing, and this variety can only be had from us. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

BEST POLE OR CLIMBING BEANS—Cont'd

Famous Kentucky Wonder.

Famous Kentucky Wonder or Old Homestead

The Old Reliable Standard Green Pod Pole Beans.

Very early and enormously productive, single vines often yielding as much as a peck; entirely stringless. Pods of a silvery green color. Postpaid, pkt. 8c; ½ lb. 18c; 1b. 35c.

Mammoth Poddod Horticultural

The mammoth pods are striped and splashed with brilliant crimson. The Beans are of immense size and of the finest quality, used either green or dry. They are by many preferred to Limas. Best suited for cool climate. Postpaid, pkt. 8c; ½ lb. 18c; 1b. 34c.

Early Golden Cluster Wax

A most productive main crop variety of the Wax Poddod Pole Beans. It is medium early, and of excellent quality if used either as snap or green and dried shell Beans. The vines are large, vigorous. The pods average 8 to 9 inches in length, are very attractive and much used for exhibition purposes; they are flat, straight, very broad, thick and fleshy, entirely stringless. The dry seed is medium sized, oval and pure white. A splendid variety for the home garden and for market. Postpaid, pkt. 10c; ½ lb. 22c; 1b. 42c.

White Dutch Caseknife

A medium late variety, very productive, with pods 8 inches long, containing 7 to 8 pure white seeds. This variety is very largely planted all over the country and is mostly used for green or dried shell Beans, which are of splendid quality. Postpaid, pkt. 8c; ½ lb. 18c; 1b. 34c.

Scarlet Runner

Good for snaps and for green shelled Beans, often used in place of Limas. Mostly used, however, as an ornamental climber, the plants bearing large sprays of brilliant scarlet flowers which are twice the size of common Bean blossoms. Postpaid, pkt. 8c; ½ lb. 17c; 1b. 40c.

White Creaseback

Valuable for its extreme earliness and its habit of ripening all of its pods within a short time. Very prolific, bearing round, fleshy pods in clusters of 4 to 12. Best quality as snaps. Seed small, oval, white, much used for baked Beans. Postpaid, pkt. 8c; ½ lb. 17c; 1b. 35c.

New Striped Creaseback

An extremely early variety with medium sized vigorous vines which are wonderfully productive and bear round, fleshy pods, about 5 inches long, of light green color which are of best quality as snaps. Much used as baked Beans. Postpaid, pkt. 8c; ½ lb. 18c; 1b. 35c.

Buckbee's
New Ideal
Pole Lima.

BEST POLE OR CLIMBING LIMA BEANS

Buckbee's Ideal Pole Lima

The Largest Poddod and Most Prolific Pole Lima Yet Introduced

Vines unusually vigorous, bearing large clusters of broad pods from 7 to 8 inches in length and containing 4 to 6 large Beans of superb quality and rich flavor. This is a medium late variety, a little later than Seibert's Early, but earlier than King of the Garden, and with much larger pods and more productive than either of them. In quality it is unsurpassed and ought to have a place in every garden. It also is the best main crop variety for market gardeners in the Central States. Postpaid, pkt. 10c; ½ lb. 22c; 1b. 40c.

Buckbee's New King of the Garden
This Old Standard Market Sort Is One of the Best for Main Crop

It is vigorous in growth and immensely productive. The vine begins to produce pods near the foot of the pole and the bearing season continues without interruption until frost. The pods are large, numerous and well filled and the Beans are of mammoth size. The handsome pods often attain a length of 5 to 7 or even 8 inches, with five or six perfectly formed Beans in each pod. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 38c.

Seibert's Early Lima

The vine is exceptionally hardy, vigorous and produces pods very early and continues bearing for a long time. In earliness, ease of shelling, size, beauty and quality of green Beans, this variety takes front rank with the best early sorts. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 37c.

Large White Lima

Regular strain; pods and Beans of large size. Too late for the North. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 35c.

Early Leviathan

This Is the Earliest Variety of the Large Seeded Pole Limas

It is a most productive sort and produces pods which are from 5 to 5½ inches long and contain four to six very large seeds, which are quite white, with a slightly greenish tinge, and are of the finest quality. It is excellent for either home or the market. We especially recommend this variety for the Northern States, where, on account of the short season, it has been hitherto impossible to grow this luscious vegetable. Postpaid, pkt. 8c; ½ lb. 22c; 1b. 40c.

TABLE BUCKBEE'S BEETS

"Full of Life"

Buckbee's Earliest of All

Extremely Early

As early as the earliest; makes good crops in less than seven weeks from sowing.

Of Beautiful Appearance

Perfect globe shape, smooth, free from side roots; of rich red color.

Of Superlative Quality

In quality the finest, most delicious of all extra early Beets. It has no superior, and in some respects no equal.

The Standard of Excellence of an Extra Early Beet

Buckbee's Earliest of All—The Best Extra Early Red Turnip Beet, not only for market gardeners, but for canning, and especially for the home garden, making a strikingly handsome product, much superior to that obtained from any other variety equally as early. Its small top, early maturing and the splendid shape and color of the root make it popular with everyone who plants it. Top

small, upright growing, so that the rows may be close together. Leaves are rich bronze-purple borne on slender stems, growing quite compactly. Root globular or ovoid and very smooth. Color of skin dark blood red; flesh deep vermilion red zoned with a darker shade. Very crisp, tender and sweet and remaining so for a long time. Pkt. 10c; oz. 12c; 2 oz. 23c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Detroit Dark Red Turnip

Detroit Dark Red Turnip

A most excellent medium early turnip-rooted sort. It grows to a large size, is of most handsome appearance, and is very productive in all soils and locations and in all seasons. The tops are small, upright growing, so that the rows may be planted close together. Leaf stems and veins are dark red, blade green, roots globular, perfectly smooth, dark blood red. Flesh bright red, zoned with a darker shade; very crisp, tender and sweet, remaining so a long time. Our stock is very uniform in size, shape and color. One of the best Beets for gardener or canner. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.10.

Crosby's Egyptian Extra Early

One of the Earliest Beets in the Market.

Deep red, almost black in color; an improvement over the old Egyptian, being sweeter, more tender, smoother, and also more round in form and larger, although equally as early. The most desirable sort for small Beets for early market, as it is in presentable market shape quicker than any other sort. It is a very rapid grower and can be sown outside as late as July. Crosby's Egyptian is one of the best Beets and a sure money maker for the market gardener. Our strain is exceptionally fine, extremely early, and very uniform in shape and color. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Crosby's Egyptian

BUCKBEE'S "FULL OF LIFE" GARDEN BEETS FOR TABLE USE

Buckbee's Sunset

Without Exception the Best Second Early and Main Crop Variety

Extended experience has shown this variety of our own introduction to be one of the best sorts, not only for market gardeners, but for the home garden. An improvement in turnip-shaped Beets for table use, and by far the best early, dark red turnip Beet in cultivation. Roots are globular and smooth, with flesh deep vermilion red, crisp and sweet. Tops small, upright growing, which allows close planting, making possible the biggest yield per acre of any turnip-shaped variety. The stock which we offer will produce a crop more uniform in shape, color and quality than any other Beet; a little later, but larger than Earliest of All. We control the entire stock of this variety. Pkt. 10c; oz. 14c; 2 oz. 23c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

The Bismarck

A Superb Main Crop Turnip Beet.

Of fine turnip shape, very smooth, free of all side roots; about 4 inches in diameter. The tops are small, of dark bronze-red color; the flesh deep blood-red, exceedingly tender, entirely free of fibre and of rich sugary flavor. Medium early; very handsome. A splendid variety for the home and market gardener. We control the entire supply of seed of this variety. Pkt. 8c; oz. 12c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Edmand's Early Blood Turnip

Roots round and smooth, good marketable size; skin and flesh dark blood-red, tender and sweet. It is an excellent keeper. A very desirable second early for market and home garden. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 28c; ½ lb. 50c; lb. 95c.

A Valuable NEW BOOK Of Practical Information HOW TO GROW SEEDS AND FLOWERS

A complete guide for the house and garden. Price 50c, post-paid, or I will send a copy FREE with an order amounting to \$1.50 or upwards if requested on the order.

BUCKBEE'S "FULL OF LIFE" GARDEN BEETS FOR TABLE USE

and making it a fine variety for ornamental bedding.

MARKET GARDENERS
Profitable Money Making Variety
The root is deep red, very symmetrical, two or three times as long as thick, and always smooth and handsome. The flesh is rich, very dark red, sweet, crisp and tender, never becoming woody even in the portions above the ground. It is a late variety and particularly valuable to store for winter use. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 50c; lb. 90c.

COLUMBIA
Deep Blood Red Splendid Quality
The roots are of a neat turnip shape, with smooth skin and deep blood-red flesh of rich, tender quality. It is ready to use very early, growing almost as quickly as does the Egyptian, while it does not become coarse and stringy when of large size. Gives a good crop from seed sown in July. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

BLACK QUEEN
Darkest of All Blood Red Beets
Black Queen is particularly valuable where a late Summer or Winter variety is wanted. The roots are pear-shaped, of medium size and fine form. Nearly buried in soil. Flesh deep blood-red color; almost black, making a strikingly handsome beet. Exceedingly tender and never woody. It is a large cropper; a good keeper till Spring. Its nicely crumpled leaves are of a beautiful dark red color, giving it a striking appearance on the market stall bedding. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. \$1.00.

Columbia Beet

BUCKBEE'S EXTRA EARLY EGYPTIAN
One of the very earliest and best varieties for forcing; also excellent for first early crop out of doors. Leaves are dark green, veined with dark red; roots dark red, rounded on top, but flat beneath with very small tap roots; flesh dark red, zoned with lighter shades; hard, crisp and tender at all times. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 50c; lb. 90c.

NEW EARLY ECLIPSE
The Popular Beet for Early Use
Tops small, dark purplish green. Roots nearly globular, with a small tap root and collar. A splendid variety. Flesh dark red, zoned with lighter red; sweet, crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

EARLY BLOOD TURNIP
Roots nearly round, flesh deep red with lighter zones; sweet and tender; medium early; later than Detroit and has larger tops. Pkt. 4c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; lb. 75c.

DEWING'S
Flesh deep blood red, very tender and sweet; medium sized roots; medium early. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 80c.

BUCKBEE'S NEW HALF-LONG BLOOD
The Very Best for Winter Use

Roots half as long as Long Blood, but on account of their thickness weigh just as much. Always smooth, sweet, crisp, tender and never woody. Both flesh and leaves are intensely dark crimson in color. One of the best late sorts. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

EARLY YELLOW TURNIP
A Very Popular Variety
Similar to the Blood Turnip Beet, except in color, which is bright yellow. It is of a very sweet, fine flavor and is deservedly popular. The roots are round and smooth and are of good marketable size. The shape is the kind most desired. As a matter of fact, the Early Yellow has much to recommend it and should please you. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

BUCKBEE'S IMPROVED LONG DARK SMOOTH BLOOD
The Standard Long Blood Beet, Excellent for Greens

Without question the finest long beet grown for Fall and Winter use. It is of deep red color, almost black, rich, excellent flavor is an enormous cropper, and keeps solid and fresh throughout the long Winter. Cooks sweet, tender and crisp; is very desirable for pickles. It must not be compared with the common Long Smooth Blood offered by many seedsmen at a less price, as its high grade was attained by long years of care and selection. The roots are thick shouldered grow largely under ground, are, when mature,

NEW TRUE DARK STINSON
Dark Red Color—Long Keeper

A medium early variety excellent for the open garden and very suitable also for forcing; the leaves being small only 5 inches high, the plants can be grown close together. This is a finely bred beet; the roots are medium size, growing about three inches in diameter, are most uniform in size and shape. The color of the skin and flesh is extremely deep red, and the quality exceptionally fine with a very sweet flavor. Especially recommend the Stinson to the home gardener—it is a most beautiful variety and unsurpassed in its exquisite quality. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. 95c.

LATE BLOOD TURNIP
Standard Late Beet—Popular Everywhere

Symmetrical in shape; flesh deep blood-red color, tender and sweet. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; lb. 75c.

Buckbee's Improved Long Dark Smooth Blood

about 2 in. in diameter and 10 inches long. They are ready for the table in about 60 days. They are very prolific, as much as 10 to 12 tons having been grown per acre. Foliage dark crimson. Pkt. 4c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; lb. 75c.

THE
CHEAPEST

FOR ALL
LIVE
STOCK.

MANGEL WURTZELS

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets.

Plant five pounds of Seed per acre.

BUCKBEE'S MASTODON

The Heaviest Cropping and Largest of All Mangels.

It is truly a Mammoth, a single root often weighing 75 pounds and over. In yield it is enormously productive—1,500 to 1,800 bushels per acre is nothing uncommon on good soil. It grows well above ground and on account of its shape is easily harvested. In length is about the same as Buckbee's Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. In fact it combines all the fine points possible to condense in a Mangel of the highest nutritive value, and is without question the best and most profitable Mangel for dairy farmers. This is our pedigree stock—especially selected, and can be relied upon as the best money can buy and our moderate prices place it within the reach of all. Oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c, postpaid.

BUCKBEE'S MAMMOTH LONG RED

A Wonderful Yielder.

A standard and favorite Mangel, producing a very large root uniformly straight and well formed, weighing from 30 to 40 pounds each, of a beautiful dark red color, wonderfully productive, average 1,000 to 1,500 bushels per acre, cropping qualities never excelled. Our stock is a great improvement over the old variety. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

GOLDEN TANKARD

The Great Milk Producer.

This distinct variety is a most important addition to our list of roots for stock feeding, as it contains less water and more sugar than most Mangels. Sheep and all other stock thrive wonderfully on it; its great milk-producing quality and richly colored yellow flesh have made it a favorite with every dairy farmer.

It is an immense yielder and 60 to 75 tons per acre have often been grown on good ground and under good cultivation. The roots are handsome, of an ideal, cylindrical form, with small neck, clean, generally with only one taper, and are easily lifted, and are excellent keepers. The skin is light gray above and deep orange below the ground, the flesh is bright golden yellow, differing from all other varieties, which cut white. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

BUCKBEE'S GOLDEN MONARCH

This entirely new and distinct Mangel grows to the largest size and is of a beautiful russet yellow color. The flesh is white, firm and sweet, greatly relished by cattle and other stock. The roots are large, ovoid shaped with small tops admitting close planting. Easily lifted, growing more than half above ground, producing enormous crops, and is an excellent keeper. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c; postpaid.

GIANT RED ECKENDORF

The roots are smooth, of cylindrical shape, very much like the Tankard Mangel, and weigh from 20 to 25 pounds each. The flesh is firm, solid, of white color and of highly nutritive value. The Eckendorf Mangels are phenomenal yielders and are easily harvested the root growing to the largest part above the ground. Oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 65c, postpaid.

GIANT YELLOW ECKENDORF

The same as the Red Eckendorf, but with yellow skin. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

CHAMPION YELLOW GLOBE

One of the best for stock feeding. The roots grow almost entirely above ground and are therefore best adapted for shallow soils and are easily harvested. It produces as much per acre as most of the longer growing Mangels. It is a good keeper. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

CHAMPION RED GLOBE

Similar to above except in color, which is a light red or pink. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

GIANT OR MAMMOTH JUMBO OR EIFFEL TOWER

A large long red variety of excellent quality. Very similar to Mammoth Long Red. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 55c, postpaid.

MIXED MANGEL SEED

Choicest sorts mixed. Oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 35c; 1 lb. 60c, postpaid.

NOTE—Write for special prices on larger quantities.

Gus Basye, Mabelvale, Ark.—Have planted Buckbee's Extra Early Bountiful Beans for three seasons, find it to be one of the most prolific Beans that was ever grown. For fine flavor and a most tender Bean it is unequalled. It should be advertised as your best bush Bean in your catalogue and we cannot recommend it too highly to all those who wish a good bean for market or home garden.

L. C. Carson, Kelly Station, Pa.—I received all of the seed I ordered from you. I ordered about \$15.00 worth and they were all good and they sure did produce fine. I want you to send me your catalogue again as I wish to order my seed from you next year.

BUCKBEE'S SUGAR BEETS FOR STOCK FEEDING

GIANT FEEDING SUGAR

The Greatest Beet for Feeding Stock.

This magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield under equally favorable conditions, more than double that of sugar beets and not being so sweet, are less liable to injure the kidneys, when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 8c; 2 oz. 12c; ¼ lb. 35c; ½ lb. 60c, postpaid.

BUCKBEE
IMPERIAL
SUGAR

BUCKBEE'S SUGAR BEETS FOR STOCK FEEDING

BUCKBEE'S NEW IMPERIAL SUGAR

This Beet is the result of years of methodical and persevering selection. It gives better results than any other variety. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most

satisfactory results. Postpaid, oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c.

KLEIN WANZLEBEN SUGAR BEET

This variety at the present time has probably a wider cultivation than any other Sugar Beet. While not, as a rule, equal to BUCKBEE'S NEW IMPERIAL SUGAR in saccharine richness, it is considerably more productive. We offer seed the second year from polarized roots. Postpaid, oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 55c.

THE BEST STOCK CARROTS

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

Buckbee's Champion

The World-Beating Stock Carrot

Buckbee's Champion is not, properly speaking, a table Carrot, although the flesh is remarkably firm and sweet. But it is most emphatically a Stock Carrot for the farmer and stock raiser, and once used nothing will take its place. It is the heaviest cropping variety grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. The roots are of medium size, very broad and heavy at the shoulder and are therefore easily harvested. They frequently measure 15 to 20 inches in circumference and 25 to 50 tons per acre is not an extravagant statement as to yield. Our own growth, Choicest Northern Home-Grown Pedigreed Stock Seed. Pkt. 6c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c.

BUCKBEE'S IMPROVED SHORT WHITE—Roots 7 to 9 inches long, smooth, very heavy at the shoulder, having a diameter of 3 to 4 inches, but taper regularly to a point growing almost entirely in the ground. Flesh rich, white, solid, crisp and of excellent flavor. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 70c.

BUCKBEE'S MAJESTIC—The largest, heaviest cropping and most nutritious yellow variety. The roots are of excellent quality, possessing high feeding qualities. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 65c.

LARGE WHITE VOSGES—A field Carrot especially suited for soils that are not very deep. One of the very best for cattle feeding. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 65c.

MAMMOTH WHITE BELGIAN—Splendid variety for fattening stock. The roots are mammoth in size and very productive, often yielding ten tons roots per acre. Pkt. 4c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 55c.

MAMMOTH YELLOW BELGIAN—Identical to the White Belgian except in color. Pkt. 4c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c.

BUCKBEE'S "Full of Life" CARROTS

One Ounce Will Sow a Row 100 Feet Long. Four to Five Pounds Will Sow an Acre.

Buckbee's Earliest Garden.

BUCKBEE'S EARLIEST GARDEN

The Earliest Variety in Cultivation and Best for the Table.

Tops small, finely divided. The reddish orange colored roots are nearly round with a groove about the crown and when fully matured they are about two inches in diameter, but they should be used before they are full grown, when they are tender and delicious. Much used for forcing, and pulled when they have only 4 or 5 leaves. Pkt. 6c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

BUCKBEE'S GOLDEN BALL FORCING

Standard Extra Early Forcing Carrot.

Nearly round roots of yellowish brown color; smaller than the foregoing, and not quite so early. Best for use when young. Pkt. 6c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

EARLY SCARLET HORN

A good variety to grow for the market.

A favorite for early crop; a little later than Early Golden Ball. Color deep beautiful orange; has a short, stump-shaped root about 3 inches long, large at top, therefore easily pulled. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 85c.

BUCKBEE'S CHAMPION HORN

A splendid new Carrot from Holland where it is very largely grown for the market and considered the finest of all table Carrots. It is an extremely early variety, as early as Scarlet Horn and will be ready for the market in about 45 days from sowing, but it is about 6 to 7 inches long or twice the size of Scarlet Horn. It is the sweetest of all Carrots being without any yellow core. The roots are cylindrical, blunt at the end and having a fine neck and small top can be planted close together. The color is very attractive bright red. They are entirely free from any stringy, coarse heart which is found in most other Carrots; are of fine texture and most delicious quality. Owing to its excellent quality, it ought to have a place in every garden and its extreme earliness and great productiveness make it an indispensable variety and a great money-maker for the market gardener. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

Buckbee's Champion Horn.

OX HEART OR GUERANDE

Early, Handsome; Ready Selling.

Tops small for the size of the roots, which are comparatively short, about 3 inches long, but thick and often weighing a pound apiece; they terminate abruptly in a small tap root. Flesh bright orange, fine grained and sweet. About ten days earlier than Danvers. A splendid variety. This is a desirable variety for soil so hard and stiff that longer growing sorts would not thrive in it. When young, excellent for table use, and when matured, equally good for stock. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 80c.

Danvers. A splendid variety. This is a desirable variety for soil so hard and stiff that longer growing sorts would not thrive in it. When young, excellent for table use, and when matured, equally good for stock. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 80c.

BUCKBEE'S SELECT DANVERS

The Best Carrot for Every Purpose.

Adapted to all soils and enormously productive, yielding more than any other table Carrot, and often more than the large field Carrots, and is much easier harvested than these. The flesh is very tender and sweet; it is a valuable Carrot for both table use and for stock. The leading carrot. We have an extra fine strain of this favorite sort, which is of very fine bright color, and exceptionally uniform in shape, size and color. We have sold this strain for years and it is giving the greatest satisfaction to our customers. Pkt. 7c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

Buckbee's Pride of the Market.

HALF LONG DANVERS

Extensively Grown.

Roots are smooth and handsome, deep orange and of medium length. This is the ordinary strain used by most other seedsmen, of which Buckbee's Select Danvers is a great improvement. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 40c; lb. 75c.

NEW EARLY CHANTENAY OR MODEL

A Fine Bunching Carrot. Private Stock.

This is one of the best early Carrots in existence, one which market gardeners should plant for their main early crop; it matures between Ox Heart and Danvers. The Carrots grow about 6 inches long, are stump-rooted, very smooth, deep red, fine grained, sweet and sugary, and not apt to crack open while growing. An excellent table sort and a heavy cropper. Our seeds most carefully selected. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 45c; lb. 85c.

BUCKBEE'S PRIDE OF THE MARKET

Early, Long, Rich Golden Yellow, Splendid Quality, Fine Yielder.

A large, handsome, main crop variety. Roots grow ten to twelve inches in length, very broad at the neck, tapering evenly to the small tap root. Grows smoothly and uniformly; flesh tender, sweet and entirely free from woody coarseness. Unsurpassed for table use and most valuable for market purposes. Pkt. 5c; oz. 10c; 2 oz. 18c; ½ lb. 30c; ½ lb. 55c; lb. \$1.00.

IMPROVED LONG ORANGE

The Best Keeper.

The most popular of the older sorts for farm use on mellow soil. Roots proportionately shorter than the Long Orange and smoother. Fine table quality but also much planted for feeding, being very productive. Pkt. 5c; oz. 10c; 2 oz. 15c; ½ lb. 25c; ½ lb. 40c; lb. 65c.

Oxheart or Guerande.

New Early Chantenay or Model.

BUCKBEE'S RELIABLE CABBAGE SEED

EXTRA EARLY POINTED HEADS

One ounce Cabbage Seed should produce 1500 plants.
Sow 1 1/2 lb. Seed in beds to transplant for one acre.

BUCKBEE'S NEW RACE HORSE

Absolutely the earliest Cabbage in cultivation. Indispensable to the market gardener for his very earliest crop.

Buckbee's Race Horse is ready for use in sixty days from the sowing of the seed—that is ten days earlier than Jersey Wakefield or Lightning and other so-called earliest sorts of other seedsmen. The plants are very hardy and can be set out very early; they are always sure to head, making good sized, solid and firm pointed heads, which, though a little smaller than Jersey Wakefield, are always marketable and being the first in the market bring high prices. There are but few outer leaves and the plants may therefore be set closely together, they will then yield large crops, and as many as 14,000 heads have been grown of this variety on one acre, which brought a larger profit per acre than later and heavier varieties. The heads are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor.

Some space should be given in every garden to this variety, as coming ahead of every other kind, it is bound to make money for the market gardener, and its sweet, delicate flavor will bring a welcome change from the coarse winter sorts for the table.

We control the entire stock of this earliest of all Cabbage. Pkt. 10c; oz. 40c; 2 oz. 75c; 1/4 lb. \$1.25; 1/2 lb. \$2.25; lb. \$4.25.

Buckbee's Selected True Early Jersey Wakefield.

BUCKBEE'S SELECTED TRUE EARLY JERSEY WAKEFIELD

The Standard Extra Early Cabbage in Cultivation.

Buckbee's stock of Jersey Wakefield is grown from selected heads only and is the earliest and finest strain of this variety in the market; it is sold by others also as Lightning. It forms fine solid heads of good size, conical in shape, with very few outside leaves, and of the best quality. The seed is remarkably pure and always gives satisfaction. Buckbee's Jersey Wakefield is about ten days later than Buckbee's Race Horse, but has larger heads and is much more productive. It is the variety mostly planted by market gardeners for the bulk of their extra early crop. Pkt. 8c; oz. 28c; 2 oz. 50c; 1/4 lb. 95c; 1/2 lb. \$1.70; lb. \$3.00.

CHARLESTON OR LARGE WAKEFIELD

A splendid strain of Jersey Wakefield, about a week later, with heads twice as large, weighing from 8 to 12 pounds each and more, and not so pointed as the original Charleston Wakefield; is a good keeper and may be planted as a second crop, to mature in Autumn, if desired. It is much used by market gardeners to follow Jersey Wakefield; a first rate shipper, and in great favor with everybody who knows it. Pkt. 8c; oz. 28c; 2 oz. 50c; 1/4 lb. 95c; 1/2 lb. \$1.70; lb. \$3.00.

EXTRA EARLY WINNINGSTADT

A very fine header and will grow a hard head under circumstances where most sorts would fail. It will stand more frost, drought, wet, insects and diseases than any other early Cabbage. Plants very compact, with short thick leaves. Heads regular, conical and very hard. It is the latest of the pointed varieties. Pkt. 5c; oz. 25c; 2 oz. 40c; 1/4 lb. 70c; 1/2 lb. \$1.30; lb. \$2.50.

BUCKBEE'S "FULL OF LIFE" CABBAGE SEED

EXTRA EARLY FLAT AND ROUND HEADS

The Heaviest Yielding First Early Cabbage.

The Earliest, Large, Round-Headed Variety.

A Distinct and Most Desirable Sort.

Very Popular With Market Gardeners and Most Excellent for the Home Garden.

Copenhagen Market

An extra early Summer Cabbage maturing fully as early as Jersey Wakefield but producing larger heads than any other Cabbage equally as early. The heads average about 10 pounds each in weight, are ball-shaped, solid and firm, with a small core, fine veins, of splendid quality, and remain in marketable condition for a considerable length of time. The type is thoroughly fixed and the heads mature all at the same time, so that the entire crop can be harvested at one time and the field cleared for other crops. The leaves are of light green color, tightly folded together in a remarkably solid and compact form; it has few outer-leaves curving inwards, is of upright growth permitting closer planting than any variety with heads of similar size; it has a short stem, growing close to the ground.

Our stock is grown by the originator in Denmark; it is that strain which produces the large, heavy, round heads of excellent quality, which have made this variety famous.

Pkt. 10c; oz. 40c; 2 oz. 75c; 1/4 lb. \$1.25; 1/2 lb. \$2.25; lb. \$4.25.

Early Spring

The Earliest Flat-Headed Variety. A few days earlier than Jersey Wakefield, producing heads of the same weight but different in shape, being flat, slightly rounded. They are intensely solid, of vivid green color, with short stems and but few outer leaves. Small heart, fine veins, flavor delicious. Pkt. 5c; oz. 25c; 2 oz. 40c; 1/4 lb. 70c; 1/2 lb. \$1.30; lb. \$2.50.

Enkhuizen Glory

Very early, 10 days later than Jersey Wakefield but heads twice as heavy, ball-shaped, thin ribbed, very firm, splendid keepers and of excellent quality. The color is a pale green. In appearance the heads are those of a small Danish Ballhead. The plants grow very uniform in size and shape, are always sure to head. Pkt. 8c; oz. 35c; 2 oz. 60c; 1/4 lb. \$1.15; 1/2 lb. \$2.00; lb. \$3.50.

All-Head Early

A sure header. Matures at the same time as Enkhuizen Glory. The plant is compact, with few outer leaves, stem short. Head very large for so early a variety, very solid, flat, but very deep and uniform in size and shape. Well adapted for kraut. By planting late it can be used also as a Winter Cabbage. Our strain is the finest. Pkt. 5c; oz. 25c; 2 oz. 45c; 1/4 lb. 80c; 1/2 lb. \$1.45; lb. \$2.75.

Buckbee's Early Greenback

If a gardener will plant but one kind of Cabbage this is the one to use. It is a large, solid, flat-headed Cabbage, fully as early and as large as All-Head, and can be planted in Spring and Summer and keeps splendidly over Winter. Practically every plant will produce a fine, hard head, measuring from 10 to 14 inches in diameter. Pkt. 6c; oz. 28c; 2 oz. 50c; 1/4 lb. 95c; 1/2 lb. \$1.70; lb. \$3.00.

CABBAGE

BUCKBEE'S
Extra Early
Large New
Queen

**The Best and
Largest Early
Flat Cabbage
on Earth**

**The Finest
Cabbage
for
General Use**

**The
Most Popular
Summer
Cabbage**

Some Cabbage will do, others please, but Buckbee's **Early Large New Queen** has satisfied and made more money for Cabbage growers throughout the country during the past nearly half a century than any variety ever offered.

Unquestionably it is the finest bred and earliest of the very large (weighs from 17 to 25 pounds) Cabbages and the most solid headed, thoroughbred of this class. It is a dwarf, compact grower, allowing close planting, a sure header, most uniform in growth, beautiful in appearance, free from coarse veining of the leaves, of much better quality than the big ribbed Winter sorts; in fact, it possesses all the fine qualities of the best early varieties, it is unexcelled in flavor and always the leader in every market. Practically every plant will form a very large, solid head and will mature earlier than any variety of equal size. It is suitable for every growing season; in the

South it is considered the best Cabbage for Fall planting, remarkable hardiness and vigor make it the safest Cabbage to plant. It is good for use in Summer, Fall and Winter. The heads become solid and eatable long before they are fully grown, and they will stand well without splitting long after they are fully developed, making them available for use over a longer season than any other kind we know of. It has been proven wherever grown in every way superior to all other Summer Cabbages.

If you want the best early Cabbage, plant Buckbee's **New Early Large Queen** and you will not be disappointed. We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Queen." Order early.

Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.25; ½ lb. \$2.25; 1 lb. \$4.25.

SECOND EARLY CABBAGES

Buckbee's Rockford Market.

BUCKBEE'S ROCKFORD MARKET

A Fine Second Early Cabbage.

It has the peculiarity of heading firmly at an early stage in its growth so that the finest Cabbage can be obtained long before it has attained its natural size. Its uniformity in shape and large yield per acre render it particularly valuable to truckers, and its compact form and good quality make it also one of the finest of the second early Cabbages for the home garden. It is about a week later than New Queen. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

BUCKBEE'S EARLY MARVEL

The heads are extremely hard and solid, round, flattened on top and ready to market fully as early as Early Summer, but larger. It is as good for Autumn or Winter as for early Summer. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

HENDERSON'S EARLY SUMMER

Standard Midsummer Variety.

This variety is deservedly popular with the market gardeners. It forms large, solid, round, flattened, compact heads of excellent quality, which average more than double the size of the Jersey Wakefield, while it matures only ten days later. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

GREGORY'S ALL SEASONS

Nearly as early as Early Summer, but considerably larger in size and one of the largest and most desirable of the second early varieties. The heads are large, nearly round, extremely hard and solid, with finely ribbed leaves; the eating quality is not excelled by any other Cabbage and is far better than that of the big-ribbed Winter sorts, and considered one of the best for kraut. It is suited to all growing seasons, is a sure header under most adverse conditions, and keeps well even if planted very late. Remarkable for its ability to stand the hot sun and dry weather, remaining an exceptionally long time in condition for use. Our strain is the finest on the market. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

SUCCESSION

A great favorite with market gardeners. About two weeks later than New Queen, a sure cropper and long keeper. The heads are very large, deep, solid and firm, of a beautiful light green color and free of all coarse veining; they run very uniform in size and shape and are of splendid quality. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

LATE OR WINTER CABBAGE

BUCKBEE'S MAMMOTH LATE BRIDGEPORT DRUMHEAD

A Standard Fall Shipping Sort.

It makes a large, round, firm head, uniform in shape and color, which seldom bursts or rots. With good cultivation heads attain a weight of 20 to 30 pounds, and are of the finest quality. Sureness in heading and regularity in growth has made this one of the most popular standard sorts for Winter keeping. The quality, either for slicing, for kraut and for general table use is unsurpassed. It is as natural for this Cabbage to form heads as leaves. This variety is much used by market gardeners in northern Illinois and has proven a great money-maker to them. It is a very fine strain of late Cabbage and can be profitably grown anywhere in this country; it is a splendid sort for general use, giving unbounded satisfaction. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

Buckbee's Mammoth Late Bridgeport Drumhead.

SURE HEAD

A Famous Main Crop Cabbage.

Of the "Flat Dutch" type. Heads uniform in size and color, round, flattened on top, extra hard, and firm and fine in texture, weighing under average cultivation from 11 to 15 pounds; sweet flavored; has scarcely any loose leaves. One of the most reliable main-crop Cabbages. A sure header. Its great solidity makes it an excellent shipping as well as keeping variety. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

BUCKBEE'S MAMMOTH LATE FLAT DUTCH

Everywhere a Favorite Market Variety. Always Sure to Head.

This is a money-maker among late Cabbages for gardeners, and for family use it ranks the highest. No variety of late Flat Dutch surpasses it for fine quality and uniform reliability to produce solid, firm heads. Even during the most unfavorable weather the heads are large. They are usually very heavy and solid, in form are round, flat on top and of a bluish-green color with but few outer leaves. The quality is fine and flavor excellent, heads being crisp, tender and white, and they keep in good condition until Spring. Outside of Buckbee's Christmas King this is the variety planted by more gardeners than any other late sort, and one of the best to grow for the family table. Always sure to make a crop, where other sorts fail, and sure to please everybody on all soils North, South, East or West. If you grow late Cabbage, do not fail to plant some of my selected and famous "Full of Life" strain of this variety. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

BUCKBEE'S NEW CENTURY

One of the very best for general use, being very hardy and sure to head well at all seasons. Heads regular, very hard and keeps well both Summer and Winter. Pkt. 8c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

PREMIUM LATE FLAT DUTCH

An old and popular variety, remarkably uniform in size and type. Very heavy, late and a fine shipper. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

LARGE LATE DRUMHEAD

Closely allied to our Mammoth Bridgeport Drum Head. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

Buckbee's Mammoth Late Flat Dutch.

Buckbee's "Full of Life" Cabbage Seed

Buckbee's Christmas King Cabbage

**The Grandest Winter Cabbage
The Largest Cabbage in the World
The Longest Keeper and Surest Header**

The grandest late Cabbage ever introduced. This truly wonderful late variety of our own introduction gives the greatest yields of any Cabbage grown. Thousands of acres are annually sown with this one kind; it is a favorite among the largest and most discriminating growers everywhere and none of them have ever been disappointed in the results. Nine hundred and ninety-nine out of every thousand plants will produce marketable heads, which are of mammoth size, on good, rich soil, reaching the sensational weight of 60 pounds each.

The leaves are deep blue, very wide and overlapping each other forming tight, compact heads, which are all very uniform in size and in time of maturity, and are of the most delicious flavor, crisp and sweet. It never bursts, has but few outside leaves and can be planted closer than most sorts and will then produce a larger crop per acre than any other variety. It is the best Winter keeper; there is no other variety which maintains its fresh appearance so long after it has matured. It is also the best for kraut.

Buckbee's Christmas King is the finest late Cabbage known today; for the market, for shipping and for the home garden it has no superior. We have grown this variety for many years, but improved it continuously and it is today better than ever.

There is big money in Cabbage, but your harvest depends on the seed you sow. Always remember that the seed is the cheapest thing about your entire crop, therefore buy the best, regardless of price, buy the right varieties, and varieties that have been tried out and yield bumper crops in the North, South, East and West. These are Buckbee's Early Queen and Buckbee's Christmas King. We control the complete stock of Christmas King and offer the choicest "FULL OF LIFE" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Christmas King."

Pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.50; ½ lb. \$2.40; lb. \$4.25.

BUCKBEE'S "Full of Life" CABBAGE SEED

Late or Main Crop Varieties—Danish Grown Cabbages

Buckbee's
Great
Dane.

Buckbee's Great Dane

The Hardest Headed Late Cabbage. The Gardener's Favorite, the Best Shipping and Longest Keeping Cabbage.

For years large quantities of Danish Cabbage have been imported to our leading markets, the heads being of such solidity that the demand has been far in excess of the supply, and always at a price far above the ruling market rate. To get to the source of this supply I sent an expert to Denmark, who after careful inspection of the Cabbage-growing localities found at the Island of Amager the GREAT DANE Cabbage, which he considered by far the finest and most productive of all the types and strains of the Ball Head Winter Cabbage grown in Denmark, and he contracted with its originator for all the seed he could supply.

I have handled his stock now for many years, have supplied annually large quantities of it to the Cabbage growers of this country and every year the orders for it show an enormous increase over those of the previous one; proving without doubt the better adaptability to our climate and the great superiority in many other respects of the GREAT DANE to other similar types.

I give herewith the description of this great Cabbage—by the originator, Mr. Torgeson: "For more than twenty years I have worked in perfecting this variety. The stem is medium sized, heads are almost as round as a ball, of good size, perfectly solid, very fine grained, of the best quality. They average larger and heavier, also mature earlier than the other strains of Hol-lander or Ball Head grown here. Because of the larger size, heavier weight, greater solidity of its heads, its unequalled keeping and shipping properties and its more tender quality, it will supplant all other varieties for winter use. I cannot too highly recommend it to gardeners in your land (America)."

We control the entire seed supply and offer the choicest "FULL OF LIFE" Seed (grown by the originator in Denmark), at the following reasonable prices. Send to Buckbee for the true "Great Dane."

Pkt. 10c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.40; lb. \$4.25.

Danish Ball Head

Extra Selected Danish Grown Seed.

The heads, which are of medium size, average a weight of about eight pounds; are very solid and deep, and of a fine white color. Their quality is excellent, and the heads being just as solid and perfect when taken up in the Spring as when they are put away in the Fall. Stem about 5 inches high. Pkt. 8c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; lb. \$3.50.

Danish
Ball
Head.

New Round Head Danish

A Short-Stemmed Type.

Two weeks earlier than Ball Head, heads more round, unusually solid, average larger, with less outer foliage, of more robust growth, and is better able to resist blight. The heads are beautifully white when trimmed. Is especially recommended for high and light soils. Are splendid keepers. Short stems about 2½ inches high. The Round Head requires less space; can therefore be set closer together than Ball Head. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.30; ½ lb. \$2.15; lb. \$3.75.

Wisconsin Hollander

Introduced by the Wisconsin Experiment Station. A strain of the Hollander grown in Wisconsin, resistant against the Yellow Rot disease. Has been grown successfully on the sickest old cabbage fields. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.00.

RED CABBAGE

New Dutch or Pickling

Raised extensively for pickling purposes. Always the first of the Red Cabbages in market. Small, handsome, hard heads of blood-red color and of the finest quality. Average weight, 8 pounds. Pkt. 6c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

Mammoth Red Rock

One of the finest Red Cabbages on the market. Heads average over 10 pounds each, and are always of rich red color, very solid and of excellent flavor. Always sure to head. Try it. Pkt. 6c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25.

New Red Polish

The Best Red Cabbage for Pickling or Table Use.

This New Red Cabbage is a vigorous grower and quite hardy. The heads are of a dark red color, and are extremely firm and heavy. The outside leaves are somewhat crumpled at the edges, giving the plant a pleasing and rather ornamental appearance. It is the largest and surest heading Red Cabbage. New Red Polish is the most profitable red sort with which we are acquainted, and will prove satisfactory in all respects to growers, cook and pickle-maker. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.30; ½ lb. \$2.15; lb. \$3.75.

Buckbee's
Sugar Loaf
Savoy.

Buckbee's Chinese or Celery Cabbage

A new, most delicious vegetable which should be in every garden and which is one of the most profitable crops to grow for the market. Although introduced in this country not very long ago, already hundreds of carloads of it have been grown last year in Florida, California and other states and shipped to Eastern markets. It is offered now in the markets of all large cities and has proven a source of great profit for the grower, yielding three times as much as any other early Cabbage and selling at 10c to 15c per pound when other Cabbage brings only \$12.00 to \$15.00 per ton. Yields in Florida are reported to have been about 30 tons per acre. This vegetable, I believe, is destined to have a wide sale, and whoever grows it will be surprised at the great demand that already exists for it.

The Chinese or Celery Cabbage belongs to the Cabbage family; when young it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, weigh often 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has a distinctive flavor, very delicate and pleasant; every leaf, including the outside ones, is tender and eatable.

It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French dressing it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower.

Chinese Cabbage thrives well in any good soil, but low, moist and even wet ground is the best suited. The seed is like Cabbage seed, and it should be treated like late Cabbage, sowing during July; early plantings are likely to run to seed in hot weather. The seed is sown in drills about 20 inches apart and the plants thinned out to stand 15 inches apart in the rows; if grown for the market start seed in boxes and transplant. Cultivate the same as Cabbage. It will not stand frost and for Winter use it should be stored in a cool, frost-proof cellar.

Our seed is Chinese grown, which is the only reliable stock for good solid heads. Prices, postpaid, pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 75c.

For Cabbage Plants See Page 88

Red Polish.

Savoy Cabbages

Savoy Cabbages have crimped leaves and are more tender, of milder and sweeter flavor than the smooth-leaved varieties; their flavor will improve after being frosted. They are equal in quality to Cauliflower and make a good substitute for it where this vegetable cannot be grown. They should be in every private garden and when once used they will always be planted.

Improved American Savoy

Very Valuable Variety.
Adapted for private use. Grown in fall and allowed to be touched by frost, it is one of the most delicious of all vegetables. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

Buckbee's Sugar Loaf Savoy

Noted for Fine and Delicate Flavor.
This improved variety is the very best of the Savoy for home use or the market. Most attractive, matures early, hardest headed. Plants vigorous, densely crumpled and very sure heading. Blanchers beautifully. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

Buckbee's Chinese or Celery Cabbage.

BUCKBEE'S EXTRA EARLY CHIEF CAULIFLOWER

The Earliest Grown—A Sure Header—Drought Resister—Large Solid Heads of Snowy Whiteness

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. The greater part of Cauliflower seed offered is of European growth, but after years of careful study and perseverance we are able to offer this thoroughbred American variety—"CHIEF." It is of very compact growth, with very short stalks. The plants can be set very close together, and the leaves growing upward naturally protect the heads, which are handsome beyond description, measuring fully 12 to 15 inches across, and even more under careful cultivation; they are pure snow-white, very close, compact and of the most superior quality. The heads being so extremely solid and deep, weigh heavier than any other early variety.

It can be used for early or late planting, for forcing or the open ground; used any way, I recommend it with the full assurance that it will give entire satisfaction and that it is not surpassed by any other variety in earliness and sure heading quality.

In no vegetable is there so vital a relationship between seed and crops as in the Cauliflower. I make Cauliflower a specialty and I know Extra Early Chief will never fail to please the most exacting; it is a thoroughbred, pedigree-strain, the grandest, large-heading, early Cauliflower ever grown. I have sold it for years, supplying the largest Cauliflower growers with it in every part of this country and have received nothing but praise from everybody.

Comparative tests have proved conclusively that Buckbee's Chief matures earlier, is a surer and heavier cropper and produces more marketable heads per acre than any other Cauliflower of equal size. No grower of Cauliflower need fear the outcome of the crop if he is relying on this superb, world-beating variety.

BUCKBEE'S "FULL OF LIFE" CAULIFLOWER—Cont'd

Buckbee's Early Favorite.

BUCKBEE'S EARLY FAVORITE

Very Popular, Very Large, Easily Grown.

A second early, sure heading and reliable variety. Larger and later than Snowball. Will stand heat and drought exceptionally well, which is a great point in its favor and makes it most highly desirable in regions where other varieties of Cauliflower have failed to thrive. Of dwarf growth, with short outer leaves. Early Favorite has never yet failed to please the most exacting grower and its rapidly increasing popularity is due entirely to its real merit and not to any special effort in its behalf. Give it a trial and we are sure you will never have reason to complain of the results. Pkt. 8c; ½ oz. 80c; oz. \$1.40; 2 oz. \$2.50; ¼ lb. \$4.50.

TRUE EARLY SNOWBALL, Pedigree Seed

Certainly a fine variety, a great favorite with market gardeners and a standard throughout the country; very early, close growing, of compact habit; is well adapted for forcing under glass during winter and spring. The heads are large. For early or late planting, for the family or the market garden this variety can be depended upon for excellent results. Snowball is but a few days later than "Buckbee's Chief" and it is not quite so large. We have the finest strain of the Snowball in the country; this can be attested to by our many market gardener customers who used it for many years with great success. Pkt. 10c; ½ oz. \$1.25; oz. \$2.25; 2 oz. \$4.00; ¼ lb. \$7.50.

EXTRA EARLY DWARF ERFURT SELECTED

Remarkable for reliability of heading; dwarf; solid, pure white heads of most superior quality. If planted the first of March, heads 8 to 10 inches in diameter will be ready early in June. This is a fine old sort and is a favorite with many. Snowball and Buckbee's Chief are highly developed strains of this variety and produce somewhat larger heads earlier in the season. Pkt. 10c; ½ oz. \$1.00; oz. \$1.85; 2 oz. \$3.50; ¼ lb. \$6.75.

EXTRA EARLY PARIS

An extra early variety, useful for Spring planting. Heads of medium size with narrow and straight leaves; they are snow white and of fine quality, but not as large nor as firm as the Erfurt type of Cauliflower. Dwarf habit. Pkt. 8c; ½ oz. 40c; oz. 75c; 2 oz. \$1.45; ¼ lb. \$2.75.

LE NORMAND'S SHORT STEM

Sure Heading Standard Late Variety.

The very best large late variety grown. Sure to please. Curd is well protected by broad, short leaves of deep green color; the stems are extremely short and stout. Head very large, solid, pure white and of superb quality. It is very hardy, stands drought very well, and also frost. It is a sure header. Fine in every way. Very popular with market gardeners. Will be ready for use in about 120 days from sowing. Pkt. 8c; ½ oz. 40c; oz. 75c; 2 oz. \$1.45; ¼ lb. \$2.75.

CAULIFLOWER PLANTS

Ready about March 25th—See page 88 for Prices

BUCKBEE'S "FULL OF LIFE" CELERY

BUCKBEE'S ALL HEART

Crisp and Brittle—Rich Golden Color—Exquisite Nutty Flavor.

The latest and best creation in Celery. Originated on Rockford Seed Farms after years of careful trial and experiment and has given unparalleled satisfaction in every part of the country. It is the earliest of the Winter Celeries—ready for use about 14 days later than the early self-blanching sorts listed on page 28. It is a very showy sort, with very broad, medium sized stalks, of fine ivory-white color and a rich golden heart. Crisp, tender and brittle. The flavor is delightfully rich and nutty. This is the best celery for Winter storage. It is unsurpassed for the professional Celery grower, the home and market garden. We control the entire stock of Buckbee's All Heart Celery. Pkt. 10c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; 1 lb. \$3.50.

BUCKBEE'S GENUINE GOLDEN HEART

Original Private Stock. This variety is of a short, stocky growth with a large heart which blanches a beautiful golden yellow, and is crisp, brittle, tender and of fine flavor. An old, very popular, long-keeping sort. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

BUCKBEE'S PERFECTED KALAMAZOO

It is an acknowledged fact that more good Celery is grown in the famous "Kalamazoo Celery Fields" than anywhere in the country. For years our heaviest sales of Celery Seed have been in that section, and we have devoted much time to the improvement of the justly celebrated variety grown in that section, and Buckbee's Perfected Kalamazoo will be found greatly superior to the old strain. The stalks are quite thick, solid, crisp and of creamy-white color, growing very uniform in size and shape. It is profitable alike for market or family use. There is no waste in preparing it for the table. Pkt. 6c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; 1 lb. \$3.50.

GIANT PASCAL OR WINTER KING RE-SELECTED STOCK SEED

A selection from the Golden Self-Blanching, and adds to the general good qualities of its parent, superior keeping qualities. The stalks are short, broad, heavy, thick, solid, crisp, and of a rich nutty flavor, free from any trace of bitterness. They blanch to a paper whiteness. One of the very finest of our Winter Celeries. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

WINTER QUEEN

A very popular sort, and an excellent winter keeper, with short, broad and extra heavy stalks; of compact growth, with very large heart. Blanches easily and quickly. Crisp and delicious nutty flavor. As a late Winter keeper it is unsurpassed. It is worthy of a place in every garden and is a money-maker for the market grower. Pkt. 6c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

Buckbee's All Heart.

CELERY PLANTS—Ready early in June—See page 88.

Buckbee's Easy Blanching Celery

Easiest Blanching and Longest Keeping Celery.

A most valuable Celery of recent introduction. An entirely new and distinct variety, and the only easily-blanching green or long-keeping sort known. It is already quite extensively grown by the most progressive Celery growers, and is bound to become one of the most popular varieties in this country.

Its remarkable combination of easy blanching and long-keeping qualities—not found in any other variety—make it at once the most valuable of all Celeries for those who grow for market as well as for all private gardeners, both for an early crop and for Winter use.

The plants are of strong and stocky growth with green foliage, showing a slight tinge of yellow in the inner leaves. The stalks are very large, heavy, thick and solid with shallow ribs and with extra large and firm hearts.

Our strain blanches so quickly and easily that even those who have never been successful in growing good Celery can now produce Celery equal in quality and appearance to that grown by professional growers and can enjoy this wholesome vegetable during the season.

Easy Blanching is of most attractive appearance, largely on account of its large, finely colored heart, and the quality is superb, tender and brittle, with an excellent nutlike, aromatic flavor.

It grows well on muck and upland soil and keeps better in the trench than any other Celery.

Easy Blanching is displacing Golden Self Blanching wherever it becomes known, as it is less liable to blight and is far superior to it in eating and keeping qualities. It is a trifle taller, fully as stout and ready for the market about two weeks later than Golden Self Blanching, but when bleached and ready for sale it can hardly be distinguished from that variety.

BUCKBEE'S "Full of Life" CELERY

BUCKBEE'S GOLDEN YELLOW SELF-BLANCHING Originator's French Grown Seed.

This is the strain used by gardeners and extensive growers in every large Celery district in the United States. No other strain of seed gives such universal satisfaction, and it is without question the most popular and dependable early strain of Celery grown. The plants are medium sized, stocky, and the stalks crisp, solid, heavy and of a yellowish-green color when young, but as they mature the inner stems and leaves turn a beautiful golden yellow, which adds much to their attractiveness and makes the work of blanching much easier. The handsome color, crispness, tenderness, freedom from stringiness and fine nutty flavor of this variety make it only necessary to be tried in order to establish it as the standard of excellence as an early sort. Pkt. 10c; oz. 65c; 2 oz. \$1.15; ½ lb. \$2.15; ¼ lb. \$4.10; lb. \$8.00.

Select American grown seed. Pkt. 8c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50; ½ lb. \$2.75; lb. \$5.00.

PERFECTED WHITE PLUME

Buckbee's Private Stock.

Is too widely known to require extended description. We will only say that we have not yet found a strain that is as early and of as good a flavor, crisp and tender, as our selection of this sort. It is unsurpassed for Fall and early winter use. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 75c; ½ lb. \$1.30; lb. \$2.50.

NEW COLUMBIA

Buckbee's Perfected Strain.

An early maturing sort, only a few days later than Golden Self-Blanching, and unsurpassed in shape and quality. The plant is of medium height, but very stocky and heavy. The stalks are thick, almost round, resembling in shape those of Giant Pascal, but the color has in it more of the rich yellow tint of Golden Self-Blanching which variety it resembles very much in appearance when trimmed and bunched for the market. Pkt. 8c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; lb. \$3.50.

New Columbia Celery.

BUCKBEE'S "FULL OF LIFE" CELERY SEED

Is noted the World over and is planted by the largest, most critical and successful celery growers in the United States.

CELERIAC, OR TURNIP ROOTED CELERY

Celeriac is grown for the bulbous roots, which are excellent for stews, soups and salads.

NEW DELICATESS—Root turnip-shaped; much larger, smoother and of more tender, sweeter taste, stronger flavor than other varieties. Pkt. 10c; oz. 40c.

LARGE ROOTED GIANT PRAGUE—Improved form of turnip-rooted Celery, producing large and smooth roots, almost round; few side roots. Large green foliage. Pkt. 5c; oz. 25c.

CELERY SEED FOR FLAVORING

Oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 30c; lb. 45c.

CELERY PLANTS READY EARLY IN JUNE. SEE PAGE 88.

The Best First Early Sweet Corns

New Early Sunrise

Buckbee's New Early Sunrise

Absolutely the Earliest Good Sweet Corn

The beauty and quality of this remarkable variety give it prominence over all others for family, market, canning, shipping, and, in fact, all purposes. Ears large (the fat kind), grains of great depth, exceedingly tender and sweet, the sort that fairly melts in the mouth. Something in Sweet Corn that makes everybody talk Early Sunrise as the very best introduction to present date. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. This is a very distinct variety, which was originated many years ago by a market gardener in northern Iowa. It always proved with us earlier than any other so-called extra early variety of other seedsmen. The ears are about 6 inches long, 10 to 12-rowed; they are very uniform and handsome and have a small white cob. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c.

Golden Bantam

A very early Sweet Corn, about ten days later than Sunrise; more hardy and can therefore be planted earlier than most other sweet corn. It grows 3½ to 4 feet high, produces two or more ears to the stalk; the ears, which are 6 to 7 inches long and covered with eight rows of golden yellow grain, are very tender and of exceptionally rich and delicious flavor. Golden Bantam has a distinct taste and many people prefer it to all other varieties. Market gardeners will find it a well-paying crop wherever it has been tried. Our stock has been carefully selected. Postpaid, pkt. 8c; ½ lb. 17c; lb. 32c.

Buckbee's First of All.

Buckbee's First of All

Extra Early Large Size, Heavy Cropper, Sweet and Tender

Comparative tests made by Sweet Corn experts throughout the country as well as at Rockford Seed Farms have proven it to be from three days to a week earlier than Cory, making it very desirable, not only for family gardens, but an especial boon to market gardeners who desire to have the first Sweet Corn in market. Ears are of good size, well filled with large grains to the very tip. Many of the ears contain from ten to twelve rows, while the Cory generally has only eight rows. In habit of growth it excels all other early varieties, being stocky and exceptionally vigorous. The quality is excellent and surpassing sweet. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 16c; lb. 30c.

Mammoth Early White Cob Cory

A very fine extra early variety, but somewhat later than Buckbee's Early Sunrise, and is very largely planted by market gardeners to follow this variety; it has proven a well-paying crop for them.

Mammoth Cory is a selection from the old White Cob Cory, but its ears are 12-rowed and the kernels sit very close together, so that there is no lost space on the cob. The grain is large, broad, very white and of sweet, delicious quality. The plants are vigorous growers of medium height and are very prolific. This is a finely bred sweet corn with handsome, symmetrical ears and is worthy a place in every garden. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 16c; lb. 28c.

Buckbee's Best of All

Early, prolific, sweet, tender, large, handsome. "Best of All" is of exceptionally stocky growth and an abundant and satisfactory yield; ears of large size; kernels very broad and especially sweet, rich, white and tender. Not only is it valuable for family use, but for early market and shipping purposes it is also in the lead. Mr. Crane, one of the most prominent Sweet Corn specialists, writes: "Gave Buckbee's 'Best of All' a fair trial, and will say that it surpasses every claim that you make for it, and more, too. I can highly recommend it for all general purposes." Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 16c; lb. 30c.

Peep o' Day

Very early small-eared variety. Stalks grow three feet high, have few leaves and produce generally more than one ear to the stalk. Ears small, measuring not more than five inches long and filled from butt to tip with ten rows of small grains of a very sweet flavor. Much grown in the Northwest; not quite as early nor as large as Sunrise. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 16c; lb. 28c.

Extra Early Cory

One of the most popular varieties and extra early. Ears of good size, well filled to the very tip with eight rows of broad kernels of excellent quality; vigorous grower; about four feet high. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 16c; lb. 27c.

Early Crosby

A most excellent variety, remarkably early and of the best flavor. Ears of medium size, 12 or more rowed, grain very thick and sweet. Largely grown for canning. Pkt. 7c; $\frac{1}{2}$ lb. 16c; lb. 28c.

Early Minnesota

This popular variety is one of the best early sorts for the market and the private garden. By careful selection we have developed a stock which is remarkably uniform, and in which all the good qualities are intensified. The stalks are about six feet high, bearing one or two ears which are about 8 inches long, 8 rowed and have very broad, white, sweet and tender kernels. Pkt. 7c; $\frac{1}{2}$ lb. 15c; lb. 27c.

Kendall's New Large Early Giant

Ears large and long; 10 to 12 rowed. Kernels white, sweet and tender. Very desirable for both market and family purposes. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 16c; lb. 28c.

Improved Adams Early

While not a Sweet Corn, this is a tender corn often used for the table, particularly in the South. The ears are about 8 inches long, 12 to 14 rowed and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about six feet high. Can be planted earlier than any Sweet Corn. Pkt. 7c; $\frac{1}{2}$ lb. 15c; lb. 25c.

Sweet Corn Yet Introduced
The One Best Sweet Corn

BUCKBEE'S GOLDEN EVERGREEN is the result of a cross between white Evergreen and Golden Bantam, and proved to be a happy and complete blending of each kind, combining the deliciously sweet flavor of Golden Bantam and the evergreen habit of the White Evergreen; those who tasted it say that it outclasses the parent sorts in sweetness and tenderness. It is a true Evergreen, as the ears remain evergreen and edible for many weeks.

BUCKBEE'S GOLDEN EVERGREEN is ready for the table about five days after Golden Bantam, but the ears are much longer than those of that sort, being intermediate in size between those of its parents; they are none too small nor too large and bulky, but just the right size for eating off the cob. The stalks are 5 to 7 feet high of very strong growth, very close-jointed and sturdy, never blowing over; they bear at convenient heights two or more ears, covered with 12 to 14 rows of deep, sugary grains with a tender skin, which is light yellow in the green state, but cooks to bright golden yellow. The Corn comes true to type.

BUCKBEE'S GOLDEN EVERGREEN is of the right size, nice appearance and considered by all who tried it the sweetest Corn ever eaten. It is sure to outstrip in a few years all other varieties in popularity. We believe it is the best all-around Corn and the most desirable one for the family garden; it is also particularly well adapted for market gardeners having a discriminating trade and has always been sold at a premium, there never having been enough to supply the demand. Pkt. 10c; ½ lb. 20c; 1b. 35c.

MEDIUM EARLY VARIETIES

NEW HONEY SWEET

An exceptionally fine variety for second early use, being from one to two weeks later than any extra early varieties. Ears twelve-rowed, medium size, very handsome. Grains of a beautiful creamy white color, deep and cob very small. Fine quality. Postpaid, pkt. 8c; ½ lb. 16c; 1b. 30c.

We Can Also Supply:

	Pkt.	½ lb.	1b.
Black Mexican	8c	16c	30c
Everbearing	8c	16c	30c
Moore's Concord	8c	16c	28c
Perry's Hybrid	8c	16c	28c

BUCKBEE'S PEDIGREED SWEET CORN **LATE OR MAIN CROP VARIETIES—Cont'd.** **Country Gentlemen**

Produces the largest ears of any variety, a single ear often weighing 2 or 3 pounds. Of excellent quality. Very late. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 16c; lb. 32c.

Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 15c; lb. 28c.

COUNTRY GENTLEMEN

This variety is often called the "Shoe Peg" Corn, owing to the arrangement of the crowded kernels, which are long and very sweet. Our seed of this variety has been carefully selected and is true to name. It is considered by many the best of the late varieties. It remains tender and fit for use longer than most sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 18c; lb. 32c.

STOWELL'S EVERGREEN

The best known and most largely planted of all the late varieties. This Corn is distinguished by the large ear, the long, deep kernels, its rich, sugary flavor and its long keeping qualities. Our seed has been selected for its sweetness, productiveness and large size. No better can be obtained. It is Northern grown. Our strain is particularly fine and our price is very reasonable. Buckbee's Private Stock Evergreen, listed below, is an exceptionally fine early strain of Stowell's. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 16c; lb. 32c.

MAMMOTH LATE OR SUGAR

A single ear often weighing 2 or 3 pounds. Of excellent quality. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 16c; lb. 32c.

BUCKBEE'S HICKOX**BUCKBEE'S PRIVATE STOCK EVERGREEN**

Late, Best for Main Crop. For table use the quality of Buckbee's Private Stock Evergreen Sweet Corn cannot be excelled. It is very tender, sugary and remains a long time in condition suitable for cooking. Owing to the fine bright color, the fine shape of the kernels, it is by far the most salable canned corn. The ears are large; the grains long and slender. Earlier and with larger grains than the ordinary Stowells. Outyields all other varieties. Many of our customers reported yields of over 200 bushels of ears per acre. You cannot possibly be disappointed by planting Buckbee's Private Stock Evergreen. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 17c; lb. 32c.

BUCKBEE'S PRIVATE STOCK EVERGREEN **BUCKBEE'S "FULL OF LIFE" POP CORN**

Pop Corn should be found in every garden, especially if there are children to enjoy it during the long Winter evenings which bring young people together for social amusement. Pop Corn becomes twenty times its natural size; thus a quart and a half will make nearly a bushel of popped Corn. Pop Corn is a money-making crop. It always brings a very much higher price than any other Corn and usually a ready market is easily found for any quantity, while in the event of an inactive market it can always be fed and a farmer cannot raise better food.

NEW TOM THUMB—The newest and best. Dwarf growing, heavy cropping, poppper. Beautiful creamy color, making a beautiful appearing dish when popped. Nothing ever grown can compare with this strain. Send to Buckbee for true stock. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 40c.

BUCKBEE'S SNOWBALL—The finest white variety in existence, belonging to the rice family. The best yielder and far in advance of any other variety, ears averaging 6 inches in length. Beautiful shape; the best popper. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 22c; lb. 40c.

NEW RED BEAUTY—Fine variety. The stalks grow 6 feet high, and average three to four ears each from 5 to 6 inches long and covered with large rice-shaped kernels of a deep red color. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 45c.

QUEEN'S GOLDEN—One of the very best and most prolific varieties grown. Its quality and handsome appearance when popped are very noticeable. It pops perfectly white, and a single kernel will expand to a diameter of nearly one inch. The stalks grow 6 feet high and the large ears are produced in abundance. Postpaid, 8c; $\frac{1}{2}$ lb. 20c; lb. 35c.

MAPLEDALE PERFECT—The stalks grow 6 feet high, and the ears are all large in size, with grains nearly clear white in color. An average ear measured six inches and a half long and contained 55 perfect kernels. Pops pure paper white, of fine quality. Be sure to include this remarkable variety in your order for Pop Corn. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 35c.

NEW STRIPED, OR VAREGATED—A fancy variety, very showy and of the best quality. Rather large ears, filled out with clear, transparent white kernels, beautifully striped with bright crimson. A good popper. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 20c; lb. 35c.

BUCKBEE'S NEW BLACK BEAUTY POP CORN—The Most Delicious of All—An extra early variety which pops very large and is the most tender and crisp of all. Although the kernels are black, this color does not seem to show at all when popped, being then a nearly white. This new variety has been bred in Wisconsin and is extremely early, ripening so early it may be popped the same season as grown, without kiln drying. Ears about 6 inches long, twelve-rowed; kernels smooth, shallow, nearly square. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 30c; lb. 50c.

Special Offer FOR ONLY 55c we will send postpaid **ONE** LIBERAL PACKET EACH OF THE 7 GRAND VARIETIES OF POP CORN listed on this page.

BUCKBEE'S "FULL OF LIFE" PICKLING CUCUMBERS

BUCKBEE'S NEW ROCKFORD PICKLE

Without question the finest variety for pickling, possessing every qualification required of a perfect pickling Cucumber and is four-to-one in productiveness compared with other standard sorts.

It has become a general favorite everywhere and is used exclusively by many pickle factories throughout the country. The fruit is of medium size, slender, cylindrical, with large spines and of dark green color. It is wonderfully even in growth and the whole crop can be depended upon to make fine shaped pickles. The vines begin to set the fruit when quite young and continue to bear longer than any other variety, yielding many hundred bushels per acre. You will find this variety valuable for slicing also, being of fine flavor, crisp and delicious. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

EARLY GREEN CLUSTER

Fruit is of the form desirable for pickling. Extraordinarily prolific, growing in clusters of 2 to 3 Cucumbers. Nothing more desirable for small pickles. If the fruit is kept closely gathered the vines will continue bearing all summer. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

BUCKBEE'S INTERNATIONAL

This grand, good, early variety of our own introduction more than pleased all who have tried it. Has no thick ends; of rich, luxuriant growth, an abundant yield; has beautiful medium-sized fruit always of good, even shape. In flavor it has no superior, always tender and crisp. You should not fail to try it. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

EARLY PROLIFIC SHORT GREEN, or EARLY FRAME

A most excellent sort for pickling as well as for slicing. Vigorous, productive plants. Fruit straight, handsome, crisp and tender. Keeps green a long while. Our stock is A1. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

NEW EVERBEARING

The merit of this variety is in the fact that the vines produce fruit continuously until killed by frosts. They exhibit at the same time Cucumbers in every stage of growth, but invariably of perfect form, even when quite small. The fruit is of fine green color and very desirable for pickling. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

SNOW'S PICKLING

An early maturing, very small, dark green Cucumber, cylindrical, square ended and very popular with growers for small pickles. We have been growing this variety ourselves for several years, giving special attention to purity and uniformity of type, and we believe the seed we offer meets the requirements of those who want an ideal bottle pickle. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

WESTERFIELD'S CHICAGO PICKLE

A very desirable sort; fruits of medium length, tapering at each end, with very large and prominent spines. The color is deep green. This is a most prolific variety and is very largely grown for pickle factories. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

BUCKBEE'S NEW EXTRA EARLY LONG GREEN

The Ideal Variety to Plant for General Crop.

Produced by selection from Long Green. Vines vigorous and productive, forming fruit fit for the table nearly as early as the shorter sorts. Fruits often measure 15 to 20 inches when fully matured. They are of fine quality, firm and crisp. Highly valued for slicing. The young fruits make the best pickles, and when ripe are preferable to any for sweet pickles. Our strain is the finest in the market, producing fruits uniformly long, slender, of fine dark green color and of good form, with the large warts and spines well distributed over the surface. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

Buckbee's New Extra Early Long Green.

BUCKBEE'S "FULL OF LIFE" CUCUMBERS WHITE SPINE SORTS

BUCKBEE'S MONARCH WHITE SPINE

The Most Profitable Cucumber for Truckers' Cultivation. Extremely Early. A True Evergreen. The Greatest Yields. The Best for Shipping, the Ideal for the Home Garden.

An extra early White Spine Cucumber; fruits are ready to gather only 5 or 6 days later than Buckbee's First Crop, which is the earliest Cucumber grown. But they are much larger, growing usually from 8 to 10 inches in length. They are nearly cylindrical in form, slightly pointed at the ends; very smooth, straight and of intensely rich dark green color; are very uniform in shape, size, color, always retaining their beautiful color until fully ripe, and presenting the finest appearance on the market. The flesh is white, fine grained, solid and of excellent flavor. The vines are robust, free of disease, setting on fruit quite early and bearing continuously until frost. They produce the largest crop of any known variety.

The Monarch is a sport of the Early White Spine. We have devoted many years to perfect it by careful re-selection of the finest specimens, but it has been tried now throughout the entire country and has not been found wanting in a single point. We recommend it as the best strain of Extra Early White Spine for the market and for the home garden. It is one of the finest Cucumbers for slicing and one of the best for small pickles. This is the variety mostly grown for the market in the South, yielding crops there of more than \$1,000.00 per acre and is matchless for shipping long distances. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.25

Buckbee's First Crop.

BUCKBEE'S NEW ALASKA

Beautiful in shape and color and of the finest quality. An entirely distinct sort developed by ourselves. The vine is vigorous and productive and comes into full bearing very early. The fruit is of fine shape with crisp and tender flesh. An excellent sort for culture under glass. The fruits are about 7 to 8 inches long and are ready for the market between Buckbee's First Crop and Monarch. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

BUCKBEE'S FIRST CROP

This is the earliest of all cucumbers producing marketable fruits of good size; the fruits are 6 to 7 inches long, straight, cylindrical, blunt at the ends and of very dark green color, which they retain a long time after picking. They grow very uniform in shape, size and color. The flesh is firm, crisp and of the finest flavor. The vines are healthy, very vigorous and produce a good crop much before any other variety and continue bearing for an unusually long time. Owing to its extreme earliness, good size, and its beautiful dark green color, it is of great value for the market gardener and is grown on a large scale in many localities of the South to ship North, having proven a big money maker for the Southern shippers. As a pickle for bottle goods, they are also much used, being of ideal size and shape.

Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.25.

DAVIS PERFECT—BUCKBEE'S PRIVATE STOCK

By using this variety, gardeners can produce out-of-doors Cucumbers that will sell in the market for hot-house forcing varieties. The shape is ideal. It is almost seedless one-third of its length from the stem, and the few seeds that are contained in its blossom end when in eating condition are so small and tender that they are hardly noticeable. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.25.

BUCKBEE'S "Full of Life" CUCUMBERS

Buckbee's New Ivory King.

We can also supply the following varieties of Cucumbers, which are too well known to require description, at the following prices:
Each pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.
Postpaid.

Buckbee's New Ivory King

The Only Pure White Cucumber

During the whole period of growth, from the time they first set until full grown, the form is exceptionally straight and symmetrical, making them as choice for a slicing variety as for pickles. The flesh is firm, very crisp, and tender at all stages. Fruit large with clear white skin, tender and excellent in flavor. Splendid for home garden. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.25.

Klondike

An extra fine new strain of White Spine, of very beautiful dark green color. Extremely popular in the South to ship North. Good for table, market or pickling. Comes into bearing early and continues through the season. The fruit is firm and hard and keeps in prime condition a long time after pickling. It grows about 8 inches long and matures between Monarch and Davis Perfect. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 95c.

New Cumberland

Fruits light green, long, straight, thickly set with fine spines. Fine for pickles and slicing. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

New Parisian Prolific Pickling

Decidedly the best of all in quality for pickling. The fruit is of an unusually dark green color, so deep that no coloring matter is necessary in preparing them for pickling. Very crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

USE BUCKBEE'S DEAD SHOT FOR CUCUMBER BUGS!

Postpaid, lb. 25c; by express or freight, not prepaid, 5 lbs. 75c; 10 lbs. \$1.25; 25 lbs. \$2.75; 50 lbs. \$5.25; 100 lbs. \$9.75.

Parisian Pickling Cucumber.

Arlington Imp. White Spine.

Early Russian.

Cool and Crisp.

Boston Pickling or Green Prolific.

Improved Long Green.

Early White Spine.

New Emerald.

Nichol's Medium Green.

ODD CUCUMBERS

SNAKE OR SERPENT

This Cucumber is curious as well as useful. We have seen it 6 feet in length, coiled like a serpent. It is an interesting thing in the garden and for exhibition purposes. It is good for food, of fine quality. Pkt. 5c; oz. 20c.

LEMON CUCUMBER

A real Cucumber, not to be confounded with the Garden Lemon. An entirely distinct variety, similar in shape to that of a lemon and when ripe of same color. Skin smooth, flesh white, tender, crisp, of a sweetness and luscious flavor surpassing all other Cucumbers. Will yield four times as many Cucumbers as any other variety. Should be in every garden. Pkt. 5c; oz. 20c; 2 oz. 35c.

GIANT PERA

Of enormous length, often 2 feet long and of great beauty. Crisp, brittle, of mild flavor, with but few seeds. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c.

Japanese Climbing.

JAPANESE CLIMBING CUCUMBER

The vines are of vigorous growth, with dark green foliage and have strong tendrils, enabling them to climb trellises, brush, etc. Comes into bearing quickly and continues abundantly through the season, while the climbing habit enables the fruit to grow perfectly straight—from 12 to 18 inches in length. Flesh pure white, thick, tender and of delicate flavor. When young makes attractive pickles. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 65c; lb. \$1.25.

Gherkin.

WEST INDIA GHERKINS

Used exclusively for pickling. Small oval-shaped, prickly fruit. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 65c.

Lemon Cucumber.

CHICORY—WITLOOF CHICORY or FRENCH ENDIVE

The Finest Variety of Chicory. The Choicest of All Winter Salads

Witloof Chicory

This is the new salad which is sold at such high prices by dealers of fancy fruit during winter and is so much relished by epicures at the leading hotels. For some time French gardeners have been exporting their produce to this country, but it is easily grown, can be made a very profitable crop here and American gardeners are now taking it up more generally.

Witloof is used principally during winter, furnishing a delightful salad when other fresh vegetables are not available, and is becoming very popular.

The seed is sown in May or June in the open ground in drills 12 to 18 inches apart, and the plants thinned out to 3 inches apart. The plants form long, parsnip-shaped roots and these should be lifted in fall, the top foliage cut off $1\frac{1}{2}$ inches above the neck and the lower ends shortened, making the roots of a uniform length of about 8 inches; then they are stored in soil in a cool place until wanted for growing on.

Witloof may be grown indoors in a cellar or shed where a temperature of about 60 degrees can be maintained. Use a frame or box at least 18 inches deep; fill about 10 inches high with loose soil mixed if possible with some leaf-mould, then set in the roots upright 2 inches apart each way and so that the crown is just covered. The empty room in the bed can now be filled with light soil or sand. Keep the bed dark by covering with an old carpet or boards and water if necessary; the soil should be kept fairly moist, but never soggy.

The blanched heads are the solid portion of the plant and they are ready to use as soon as they show above the sand, which should be in 2 or 3 weeks.

The heads are oblong and very solid, they blanch ivory white and are often quite large, equal to a compact Cos Lettuce. When lifting cut whole head with small portion of the roots attached to it to hold the leaves together. They are generally eaten raw with French dressing and are the tenderest and most delicately flavored of all salads. Pkt. 5c; oz. 25c; 2 oz. 45c; $\frac{1}{4}$ lb. 85c.

CHICORY—LARGE ROOTED or COFFEE

Dried and prepared roots are used quite extensively as a substitute for and an adulterant of Coffee. Pkt. 5c; oz. 15c; 2 oz. 25c; $\frac{1}{4}$ lb. 45c.

CRESS

NEW UPLAND CRESS—Has the highly prized flavor of Water Cress. Its usage should be more general, as it is of as easy culture as Spinach. It is a perennial plant and can be grown for several years without renewal. Pkt. 5c; oz. 20c.

CURLED OR PEPPER GRASS—Much used with Lettuce, to the flavor of which its warm, pungent taste makes a most agreeable addition. Pkt. 5c; oz. 8c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c.

TRUE WATER CRESS—Distinct from the last; thrives only when its roots and stems are submerged in water. Grown best along moist banks of small, rapid streams, or in a tub, in water-covered soil. The plants will increase rapidly by self-sown seed and extension of the roots. One of the most delicious of small salads. Pkt. 10c; oz. 35c.

Chervil, Curled.

CHERVIL

Hardy annual, worthy of more general use for flavoring and garnishing. More beautiful than Parsley.

CURLED—Greatly superior to the old, plain variety, earlier, more handsome, having a subtle perfume and flavor. Pkt. 10c; oz. 25c; 2 oz. 45c; $\frac{1}{4}$ lb. 80c.

CORN SALAD

This delightful salad is used during the late Fall, Winter and Spring months as a substitute for Lettuce. It is also cooked and used like Spinach. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 35c.

Collards.

Corn Salad

COLLARDS

Georgia, Southern or Creole

A variety of Cabbage known in different sections as "Cole," "Colewort," or simple "Greens." It is extensively used in the South. We offer the true white or green stemmed sort so popular in the South. Forms a large, loose, open head, on tall stems. Freezing does not injure, but rather improves their quality. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; 1 lb. \$1.00.

THE WONDERFUL COFFEE BERRY

The Greatest Health Drink—Once Tried Always Used. All pronounce it better than the genuine. It is certainly the best berry to mix with other coffee. Half and half will produce a drink claimed by many to be equal to a good cup of Rio. You can raise your own coffee for one cent a pound. Full directions on every package. Large Pkt. 5c; $\frac{1}{4}$ lb. 15c; $\frac{1}{2}$ lb. 25c; 1 lb. 40c.

Chufas, or Earth Almond.

CHUFAS OR EARTH ALMOND

In sweetness and flavor very much resembles a coconut or almond and greatly liked by all children. Vary in size from a large pea to a hazelnut. The nuts grow under and very near the surface of the ground, easily reached and much like pigs and poultry. As soon as the crop is grown, turn these animals into the field, thus saving the labor of harvesting and feeding. Pull up a few plants by the roots and leave them on the ground, and when either hogs or chickens get a taste of them they will go over the whole field in search for them. Very prolific, nutritious and fattening. Pkt. 5c; $\frac{1}{4}$ lb. 12c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c.

CHIVES—SCHNITTLAUCH

BUCKBEE'S "FULL OF LIFE" EGG PLANT

BUCKBEE'S NEW EARLY LARGE PURPLE

Better variety than New York Purple. Its earliness, large size, high quality of fruit, and its extreme productiveness make it the most profitable to grow. Plants large, spreading; foliage light green. Fruit very large, oval or short, pear-shaped; skin smooth, deep purple; flesh nearly white. Plants ripen two to six large fruits, entirely free from spines. Pkt. 10c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50.

New Black Beauty

This recently introduced Egg Plant is from 10 days to 2 weeks earlier than the old New York Purple varieties, and of rich, lustrous, purplish black color, and is a most distinct sort and a favorite where known. The plants are remarkably healthy in their growth, and yield an abundance of large fruits, which are very attractive in appearance. This variety is entirely spineless. The fruits are of the very finest possible quality. Pkt. 8c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.40.

Buckbee's New White

Produces large fruits, and is very productive. The flesh is more tender and flavor more delicate than that of many purple varieties. Pkt. 8c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.35.

Improved New York Purple

Large, round or oval, of excellent quality, highly esteemed in market. Pkt. 7c; oz. 35c; 2 oz. 70c; ¼ lb. \$1.35.

Extra Early Long Purple

One of the earliest and most productive varieties. Fruit long, dark, rich purple, and of fine quality; earlier but smaller than New York Purple. Pkt. 5c; oz. 35c.

FOR PLANTS SEE PAGE 88

Honey Plant Seed

SPECIAL MIXED—From all the best honey plants that bees feed upon. Pkt. 5c; oz. 10c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Egg Plant.
Extra Early Long Purple.

Dandelions

Improved Large Leaf.

An improved variety of Dandelion, very early. Leaves fully double the size of the common Dandelion. Sow in May or June and cultivate during the Summer, and the following Spring the leaves will be fit to cut.

Cultivated Dandelions are fast becoming favorite Spring Greens. If blanched like celery they make a fine and delicious salad. The roots when dried and roasted are often employed as a substitute for coffee. Pkt. 10c; oz. 60c.

Garlic.

Garlic

The Garlic is the most pungent in taste and has the strongest odor of all the Onion family. It is largely used in the South of Europe, where it is esteemed for flavoring soups, stews, etc. The root or bulb is composed of many small bulbs called "cloves," which are planted in the Spring. We frequently receive orders for Garlic seed, but can supply the bulbs only. Fine bulbs—¼ lb. 25c; ½ lb. 40c; lb. 75c, postpaid.

Buckbee's New
Early Large
Purple.

Endive or Winter Lettuce

GIANT FRINGED OR OYSTER—When fully grown, the center portion can be blanched to a creamy white by tying up, and contrasts finely with the deep green tips of the outer leaves. It is of excellent flavor served as salad. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

GREEN CURLED—A very attractive sort. Dense heads with divided leaves of bright green color, blanching readily to creamy white. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. 90c.

NEW MOSS CURLED—A dense cluster of finely cut-in green leaves, resembling a tuft of moss. When properly blanched they are crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. 95c.

BATAVIAN OR ESCAROLLE—Large, solid heads, thick leaves which can be blanched a fine white and are unsurpassed for salad or make excellent cooked greens. Probably used more than any other variety. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Endive—New Moss Curled.

Horse Radish

Horse Radish rarely produces seed, but is grown from pieces of the roots.

NEW BOHEMIAN OR MALINER KREN.

Ordinary Horse Radish is a very profitable crop, but with this magnificent new sort from Bohemia the possibilities are wonderful. The roots are so much larger and heavier that the yield is about doubled. Then, too, it matures so much quicker that the crop can be sold in October. The flesh is pure white. Three and four tons per acre can be grown easily. Fine Sets, postpaid, 25c per doz.; \$1.50 per 100. By express or freight, not prepaid, 100 for \$1.15; 500 for \$1.75; 1,000 for \$9.00.

COMMON HORSE RADISH.

The old-fashioned standard variety. Sets or Root; postpaid, 20c per doz.; \$1.00 per 100. By express or freight, not prepaid, 100 for 85c; 500 for \$3.75; 1,000 for \$7.00.

Horse Radish, New Bohemian.

BUCKBEE'S NEW CALABASH PIPE GOURD—Light and attractive pipes can be made from the fruits of this Gourd by any one at a nominal cost. They are the lightest pipes made for their size, are graceful in shape, color like meerschaum, and are delightful smokers. Pipes made from the imported gourds are very expensive, American dealers usually charging \$5.00 to \$12.00 apiece for them. The plant thrives and grows luxuriantly in all parts of the United States, from New England to the Gulf, and from the Atlantic to the Pacific, producing in great abundance the fruits or gourds from which the pipes are made. The Vine is also very ornamental and useful for covering fences, unsightly places, etc. Pkt. 10c; oz. 25c.

NEW JAPANESE DISH CLOTH, OR LUFFA—Ornamental enough for a house vine and fruit is very useful. Fruit enormous, two feet in length, and borne in great profusion. The lining of mature fruit, when washed and bleached, is porous, tough, elastic, sponge-like, making the nicest, cleanest substitute for dish cloths and bath sponges imaginable, besides being useful for various articles of fancy work. Pkt. 5c; oz. 35c.

STEAR TROUGH—Enormous, hard-shelled fruit, holding from 3 to 10 gallons each, and as they never rust or rot, and are very light and strong, are just right to use as receptacles for lard, salt, seed corn, soap, etc., or to use as nesting boxes, etc. They last for years. Pkt. 5c; oz. 20c.

GOURDS CALABASH PIPE

←Bowl

GOURD

Stem →

TRUE NEST EGG—Resembling in color, shape and size the eggs of hens. Do not crack, last for years, and make the best of nest eggs. Rapid grower and good climber, extremely ornamental and useful for covering screens, etc. Pkt. 5c; oz. 20c.

HERCULES CLUB—Enormous, long club-shaped fruit, curious and at the same time exceedingly useful to use in storing various articles, as the fruit is hard shelled and lasts for years in perfect condition. Pkt. 5c; oz. 15c.

NEW SERPENT—A beautiful climbing variety of easy culture, heavy foliage and serving as the best shade. None better for climbing purposes. Pkt. 10c.

DIPPER—Another useful gourd that, as its fruit is light and strong and does not rust, rot or heat easily, is just right to use in dipping hot liquids, soap, etc., besides being useful for birds' nests, fancy hanging baskets, etc. They hold from a pint to a quart and a half each. Pkt. 5c; oz. 15c.

NEW SPOON—Small fruits with slender neck four to five inches long, brilliantly marked in green and orange with white or light green stripes. By slicing off a portion on the side of the bowl and drying the shell, a spoon may be made. They will be found quite useful also in darning stockings and glove-fingers, while the dry fruits with the seeds left in make fine rattles for the baby. Pkt. 10c.

FINEST MIXED—Combining in the largest mixture the most curious, interesting and useful of the entire Gourd family. Pkt. 5c; oz. 15c.

KALE OR BORECOLE

1 oz. of seed for 3,500 plants.

DWARF EXCELSIOR GREEN MOSS CURLED KALE—(Green or Sprouts.) This is harder than Cabbage and makes excellent greens for Winter and Spring use. The leaves are as curly as Parsley, tender, and of very fine flavor. It is improved by frost. Sow the seeds in May or June, transplant in July and treat same as Cabbage. Immense quantities of this are grown in the South and shipped to Northern markets. Pkt. 5c; oz. 15c; 2 oz. 30c; ¼ lb. 50c.

TALL GREEN CURLED SCOTCH—This variety is very hardy and is improved by a moderate frost. About thirty inches tall, with an abundance of green leaves, which are densely curled and crinkled. Stands the Winters in the Middle States without protection. Pkt. 5c; oz. 15c; 2 oz. 30c; ¼ lb. 40c.

SIBERIAN—One of the best known and most largely used varieties of Kale. It is sometimes called Sprouts or Greens. The green leaves are very large, and comparatively plain in the center, but coarsely cut and distinctly frilled on the edges. The plant is low but spreading and very hardy. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c.

Kale, Tall Green Curled Scotch.

KOHL RABI

A vegetable intermediate between the Cabbage and Turnip, combining the flavor of both. Edible part is a turnip-shaped bulb, formed by swelling of stem. When used for the table this should be cut when quite small, as it is then very tender and delicate.

KING OF THE EARLY WHITE—Early and choice. Hand-some white bulbs. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 75c.

IMPROVED EARLY IMPERIAL—PURPLE—Color bright purple, with leaf stems tinged with purple. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 65c.

LEEK

Belongs to the Onion family. Sow the seed and care for the young plants as for Onions.

NEW FLAG—We offer a very superior stock of this popular variety, so largely grown for Fall and early Winter use. It is of quick and strong growth, producing long stems of uniform shape and size, averaging 2 inches through by 10 inches long, blanching beautifully white and fine, mild flavor. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 45c.

ROSEN, VERY BEST WINTER—The best variety for winter and spring use, being very hardy; it keeps well when earthed up. Splendid for flavoring. Immense stocky stems 3 inches in diameter; 6 to 8 inches long, snow white and of delicious flavor. Pkt. 5c; oz. 15c; 2 oz. 35c; ¼ lb. 60c.

Leek, Rouen.

Kohl Rabi, Improved Early Imperial.

HERBS

Pot, Sweet and Medicinal

Save a corner of the garden for a few Pot and Sweet Herbs (for flavoring soups, meats, etc.); they are indispensable to every garden, while some of the Medicinal Herbs will be found very useful. They thrive nicely along the sunny side of the fence, in a deep and fairly rich soil.

ANISE

Used for cordial, garnishing and flavoring. Pkt. 5c; oz. 15c.

BALM

The leaves are used for making a pleasant beverage known as Balm Wine or Tea. Pkt. 5c; oz. 25c.

BASIL, SWEET

The leaves are used in flavoring soups, stews and highly-seasoned dishes. Pkt. 5c; oz. 25c.

BORAGE

Leaves used for flavoring, and flowers furnish bee pasture; most easily grown in any waste place. Pkt. 5c; oz. 15c.

CARAWAY

Seeds are used for flavoring bread, pastry, meats, etc. The oil relieves gas on the stomach and prevents griping. Pkt. 5c; oz. 15c.

CATNIP, or CATMINT

Grown for bee pasture. Leaves and young shoots are used for seasoning. Pkt. 10c.

CORIANDER

The seeds are used in the manufacture of liquors, in confectionery and culinary preparations. Pkt. 5c; oz. 15c.

CHAMOMILE

Makes valuable poultices. Desirable also for diseases of the stomach. Pkt. 10c.

DILL

Fruit is warming, stimulating and quiets nervousness. The tea is good for colic and prevents hiccup. Used largely for pickling with cucumbers. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 70c; 1 lb. \$1.25.

FENNEL, SWEET

The leaves are ornamental. When boiled, are used in fish sauces, also make a splendid tea for colic. Pkt. 5c; oz. 15c.

HOARHOUND

Used for seasoning, also for the manufacturing of the popular cough remedy. The tea is a remedy for colds and lung affections. Pkt. 5c; oz. 25c.

LAVENDER

An aromatic medicinal herb. The leaves are used for seasoning, the flowers for perfume. Pkt. 5c; oz. 15c.

MARJORAM, SWEET

The leaves and the ends of the shoots are highly esteemed for seasoning. Pkt. 5c; oz. 25c.

PENNYROYAL

The tea is valuable for colic. The fresh herb is obnoxious to mosquitoes. Pkt. 10c; 3 pkts. for 25c.

ROSEMARY

An aromatic herb. Leaves used for seasoning. The tea produces sweats. Oil is valuable in neuralgia, rheumatism and lumbago. Pkt. 10c.

RUE

For medicinal purposes; good for fowls having rouse. Pkt. 10c.

SAGE

The most extensively used of all herbs for seasoning and dressing. Pkt. 8c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.50.

NOTE—We can also supply: Pkt. Oz.

see Page 87.

SUMMER SAVORY

The leaves and flowers are used for flavoring soups and dressings, etc. Pkt. 5c; oz. 25c.

THYME

The leaves and young shoots are used for seasoning; a tea is also made of the leaves, a remedy for headaches. Pkt. 5c; oz. 25c.

Buckbee's "Full of Life" Lettuce

Curled or Loose
Leaved Varieties

BUCKBEE'S EARLIEST FORCING

The Earliest Lettuce Grown.

For those who like a large, thin, exceedingly tender leaf, and for those markets which demand a large, loose cluster of leaves rather than a solid head, this is the best variety for forcing and growing in the open ground.

The plants form a large, loose head, rich light green in color and blanch nicely. The leaves are very much blistered and crumpled, crisp, and are of excellent quality. This is the earliest of all Lettuce; it is a splendid shipper, of beautiful appearance and keeps in good condition better than any other sort. It is a money-maker for the market gardener, either if sown under glass or outdoors, and is very satisfactory for the home garden. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; 1 lb. \$1.50.

Grand Rapids
Forcing

GRAND RAPIDS FORCING Buckbee's Private Stock. New variety of superior quality and beautiful appearance; a strong grower, free from rot; one of the best for forcing; keeps crisp and tender without wilting, when exposed for sale, longer than most other forcing Lettuce. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25.

IMPROVED BLACK SEEDED SIMPSON Buckbee's Private Stock. Acknowledged one of the best early forcing varieties. Leaves are a delicate green, almost white, crisp, tender and sweet. Very early, easily grown, very reliable, does well in hot Summers when others fail. Largely grown for the market, but also very popular for the home garden. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25.

SIMPSON'S EARLY CURLED

A decidedly crisp variety. Color, very light green; never spotted or brownish in any part. Quality excellent; sweet in flavor. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; 1 lb. 90c.

TOMHANNOCK

Handsome Reddish Bronze Lettuce.

Edges of outer leaves are a reddish bronze; within, the leaves are almost white. Very crisp, tender and sweet. Keeps in fine condition for a long time. Excellent for the home garden. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.00.

EARLY PRIZE-HEAD

This old standard sort still stands at the head of the large, thin-leaved clustering sorts for the home garden. Exceedingly tender, crisp and sweet. There is more Prize Head Lettuce grown in this country than any other variety. It is a most reliable variety for all the year-round cultivation. Leaves light brown, varying to bright green. Pkt. 5c; oz. 10c; 2 oz. 16c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

Cos Lettuce

Cos Lettuce is distinct from other varieties, in having long, narrow, spoon-shaped leaves, folding into loose, sugar-loaf shaped heads which blanch better by having the outer leaves drawn about them and tied. The heads are always crisp and mild and considered by many superior to other kinds.

PARIS WHITE COS—Grows to very large size, producing long, pointed, compact bunches of light green color and fine flavor. Succeeds well in Summer, grows to immense size. Plants often weigh 5 to 6 pounds each. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.00.

DWARF WHITE HEART OR CELERY—Noted for its most excellent flavor. Earliest in cultivation. The plants grow about 3 inches high and 4 to 5 inches across. Of stiff growth, every plant making a well-developed head of the most excellent flavor, and crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.25.

Dwarf White Heart.

Tomhannock.

BUCKBEE'S MAMMOTH ALL HEAD LETTUCE

THE WORLD'S ONE UNBEATABLE HEAD LETTUCE

Entirely New and Distinct

The Most Wonderful Market Gardeners' and Shippers' Lettuce Known

The Best Smooth Leaved Firm Heading All Season Lettuce

Slow to Run to Seed, Unaffected by Hot Weather

A Sure Header and a Large Header

**QUALITY
NOTHING BUT
QUALITY**

MAMMOTH ALL HEAD

is bound in a few years, to supersede all other head Lettuce, as it surpasses them all in size, beauty and perfection of head; also in hardness, resisting both heat and cold, earliness, uniformity and in excellency of flavor.

Sow thinly in rows about one foot apart and thin out to 15 inches apart in the rows, giving the plants plenty of room to fully develop and they are sure to form a large, perfect head.

Mammoth All Head is a great improvement on the well-known Big Boston Lettuce. It forms larger heads, more compact and tightly folded, and is about 10 days earlier than either the white or black seeded variety. It is without the reddish brown tinge on the leaves and, furthermore, it can be sown all through the growing season, and stands heat remarkably well. Is slow to run to seed, and will not seald or burn and will make a head when other varieties fail. In our repeated trials we have found it to be the best smooth leaved, firm heading Lettuce to grow through the summer months.

Mammoth All Head is one of the earliest, large Cabbage-Lettuces grown, forming heads in six weeks from

sowing, and the heads grow to a large size, often more than 12 inches across, are solid and compact with few outer leaves; of an attractive bright light green color, never spotted or reddish in any part. They blanch creamy white, have a decidedly buttery flavor and are crisp, tender and sweet.

This is the grandest, most valuable Lettuce ever introduced. There is no other variety giving such general satisfaction under so many varying conditions. Grown in the open ground, or forced in cold-frames or cool greenhouses, it produces a perfect head of extra large size, which never fails to please both grower and user.

Pkt. 10c; oz. 25c; 2 oz. 40c; 1/4 lb. 70c; 1/2 lb. \$1.30; lb. \$2.50.

Buckbee's "Full of Life" Lettuce—Butterhead Varieties—Cont'd

Buckbee's Extra Early May King.

Buckbee's Extra Early May King

The Earliest Head Lettuce Grown.

An ideal Lettuce for planting in the open ground in Spring, as well as in Fall, and also splendid for forcing. Extremely hardy and very quick growing. Plants grown from 7 to 8 inches in diameter with outer leaves so closely folded that the plant is practically all head. Outer leaves are light green, slightly tinged with yellow, of a specially fine, rich, buttery flavor. The round, compact heads are very solid, so that they will carry well to market. It attains a size suitable for use before any other large heading variety. Buckbee's May King is an extra fine strain and is much earlier than that mostly sold by others. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

Buckbee's Mammoth Big Boston

A very popular variety with market gardeners. It heads well in the open ground during cool weather in Spring and Fall and is grown very extensively in the South for shipping North during the Winter. It is also a fine forcing variety for cold-frames during the Winter months. Our strain is very hardy, sure to head and produces solid heads of large size, often 10 to 12 inches across, which are slow to go to seed. The leaves are thin, hard and crisp, comparatively smooth but wavy at the edges and are of bright, light green color, slightly tinged with reddish brown. The inner head blanches to an attractive greenish white. The quality is excellent.

Our seed of this famous variety is used by thousands who purchase it year after year, testifying by that to its wonderful quality. Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

Buckbee's
Mammoth
Big
Boston.

Buckbee's Ice Drumhead

A Sure Header, Slow to Run to Seed, Unaffected by Hot Weather. Crisp, Tender and Delicious. Absolutely Free from Bitterness.

It grows rapidly; heads very early, only little later than May King, but the heads are much larger, as large as Dutch Cabbage and solid as that. The leaves are thick, broad, light green outside, changing towards the center from a golden yellow to a creamy white. The heads are as palatable as beautiful; very tender; never bitter; of deliciously sweet, buttery flavor.

Buckbee's Ice Drumhead is a sure header and an all-header. It stands hot weather better than any other variety of its class. Ready for use when quite young until it runs to seed. Buckbee's Ice Drumhead is one of the best sellers of Lettuce we grow. It is immensely popular, especially in the Northern and Central States, and justly so, as it is unexcelled in its superb quality, beautiful appearance, heat resistance, keeping and shipping qualities. We control the entire stock of this variety. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

BUCKBEE'S "FULL OF LIFE" LETTUCE—BUTTERHEAD VARIETIES—Continued

All Season or Improved Deacon.

ALL SEASON OR IMPROVED DEACON

This magnificent Butter Lettuce is unsurpassed for family, garden or market use. Light green outside, while the inner blanched portion is a beautiful cream yellow, of delicious, rich buttery flavor. More heat and drought resistant than most varieties of its class. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

BOSTON MARKET, or White Seeded Tennis Ball. Fine heads, hardy, valuable to grow in cold frames in Winter. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

BUCKBEE'S NEW GOLD COIN—The heads are solid and compact and measure 7 inches across. Outer leaves covered with russet red and bronze green, the solid hearts of light creamy color. Very early. Quality excellent. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

BUCKBEE'S SUPERB—An extra early variety, a few days earlier than May King, but smaller. Mostly used for forcing during Winter, for which purpose it has no superior. Wonderfully crisp, tender and delicious flavor. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

CALIFORNIA CREAM BUTTER—Also called Royal Summer Cabbage. Dark green, round, thick leaves forming a very solid round head, which stands a long time without running to seed. Outer leaves spotted brown, inner ones blanched to a rich yellow. Exceedingly rich, buttery, sweet and nutty in flavor. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

EARLY BLACK-SEEDED TENNIS BALL or SALAMANDER—Succeeds everywhere and at all seasons. Sure header, a fine shipper, excellent quality. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

BUCKBEE'S "FULL OF LIFE" LETTUCE—CRISP HEAD OR SUMMER VARIETIES

WONDERFUL

A Big Money Maker. The Standard Main Summer Crop Hot Weather Head Lettuce.

A grand Head Lettuce, called also New York and Los Angeles, furnishes fine crisp Lettuce during the hot Summer months. This is one of the largest varieties grown, producing heads more than 15 inches in diameter and weighing more than 2 pounds each. The outer color is rich dark green, but the heart blanches beautifully and is crisp, tender and delicious. It is reliable, a sure header, and is slow to go to seed. Extensively grown in all sections of the country for Summer use, but also planted in Fall and Winter, especially in the Southwest, from where thousands of carloads of it are shipped during the Winter to Eastern cities. It stands shipping as well as Cabbage and remains in good condition longer than most heading sorts. Most desirable for the private as well as the market gardener. Not used for forcing. Pkt. 8c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25.

NEW ICEBERG

Quick growing and of exquisite flavor. The large curly leaves which cover the outside of the solid head are of bright, light green, with a slight reddish tinge on the edges. They have small indents which are constantly filled with dewdrops, keeping it fresh and showing a remarkable crystalline appearance. We can confidently recommend New Iceberg as always crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

IMPROVED HANSON

Heat-Resisting. Much Used for Midsummer Planting Outdoors. Large, firm cabbage-like heads with broad outer leaves filled at the edge and of light green color. The inner leaves are white and deliciously sweet, crisp and tender. An old, most popular variety grown everywhere and extensively used for the kitchen garden as well as market. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

BUCKBEE'S COMBINATION LETTUCE MIXTURE

One Sowing Produces Salad for the Whole Season.

Contains a grand assortment of decidedly distinct and excellent Lettuces. They mature early, medium and late; some curled and crimped, others produce heads. Colors range from almost pure white, through delicate shades of green and yellow to rich golden. All are delightfully fresh, crisp, tender and of excellent flavor. All sizes, from the small early to the mammoth Summer varieties. Liberal pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

BUCKBEE'S "FULL OF LIFE" MUSK MELONS

A Field of Giant Wonder Gem

Buckbee's Giant
Wonder Gem

THE BEST MELON KNOWN TODAY. AN ENTIRELY
NEW AND DISTINCT MELON, MAGNIFICENT IN EVERY
RESPECT, THE LARGEST IN SIZE AND FINEST IN QUALITY.

Resembling the old Emerald Gem in shape, color and flavor, but though this old standby is considered the standard of excellence in quality among melons, it is only of small size and will not stand shipping; Buckbee's New Giant Wonder Gem, however, is much larger; in fact, it is the largest good melon growing, weighing under ordinary conditions as much as seventeen and eighteen pounds each and with special care much more, and it is also much more netted and of good shipping quality.

The melons are globular, slightly flattened, deeply but irregularly ribbed, covered more or less with shallow netting; the skin is of rich emerald green color while young, becoming slightly tinged with yellow as the fruit matures. The flesh is of deep, rich salmon color, about 3 inches in thickness, thicker than the flesh of any other sort we know of; the melon is indeed almost all solid meat, the cavity being very small, hardly large enough to accommodate the seeds. In quality it is like Emerald Gem when at its best, highly aromatic, of the richest and most luscious flavor, most tender, entirely stringless, practically melting in your mouth. This delicious flavor extends to the very rind.

The vines are of vigorous growth, and the foliage of firm texture, resisting the attack of insects and blight.

These fine, large melons will always sell at good prices, as they closely resemble in appearance and flavor the large, greenhouse grown melons sold at fancy prices at the fruit stands.

Pkt. 10c; oz. 20c; 2 oz. 35c; $\frac{1}{4}$ lb. 65c; $\frac{1}{2}$ lb. \$1.25; 1b. \$2.25, postpaid.

Buckbee's
Giant Wonder
Gem

BUCKBEE'S "Full of Life" ROCKY FORD MUSK MELONS

Buckbee's New Honey Boy

Planted by 50,000 of Our Customers Last Year.

This is the earliest strain of all Rocky Ford Melons. It always brings the highest prices in the market.

Exceedingly early—very prolific—ever-bearing—yielding heavy crops from early Summer until Fall. The fruit is oval, trifle elongated—solid netting—ideal shipper. Flesh is light green, very thick meat, sweet and delicious flavor. These Melons weigh on an average about 1½ lbs. each. They grow very uniform and a large percentage of them are of standard size, forty-five of them filling a crate 12x12x24 inches. You can't go wrong on Buckbee's Honey Boy. Choicest home grown Seeds. Large pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Buckbee's New Honey Boy.

Buckbee's New Victory (See painting from nature on front cover)

Color and shape well shown by illustration, which was painted from an average fruit taken from our fields. Do not fail to try this finest of all Musk Melons this year. We control the entire stock of this variety. Pkt. 15c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.50; lb. \$2.50.

Buckbee's Famous Rocky Ford

Unsurpassed in Luscious Flavor

Always brings the highest price on the market. Most desirable size. Ideal for dessert. A healthy, vigorous grower. Exceedingly prolific. It is one of the most popular of all melons for shipping in baskets. The fruit is oval, slightly ribbed, and densely covered with fine netting. It has a thick flesh, very sweet, finely flavored. They will grow very uniform in shape and color. Pkt. 5c; oz. 12c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Buckbee's Famous Rocky Ford.

Buckbee's New Gold Fleshed Rocky Ford

The Biggest Cropper of All Rocky Ford Melons

A selection from Buckbee's famous Rocky Ford, with salmon (not orange) flesh, maturing about ten days later than Buckbee's Honey Boy. Gold fleshed Rocky Ford is the biggest cropper and finest flavored Melon grown in Rocky Ford. It is covered with heavy gray netting over the entire surface, grows very uniform, and is more disease-resistant than any other variety; under unfavorable conditions when other strains rust badly, the plants of this variety remain green and thrifty and will produce blossoms and fruit for a long time. The flesh is quite firm, deep, leaving but a very small seed cavity, and is of superb quality and delightful, rich, aromatic flavor not excelled by any other variety. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Buckbee's Gold Fleshed Rocky Ford.

Buckbee's "Full of Life" Musk Melons—Green Fleshed Varieties

True Jenny Lind Musk Melon.

New Early Hackensack

This is a Splendid Melon.

The fruit is medium sized, nearly round, evenly and deeply ribbed, with a very coarse netting, and almost as large as the Large Hackensack. The flesh is green, a little coarse, but very juicy, sweet and well flavored. A very early Melon and wonderful yielder and splendid shipper. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

Large Hackensack

The Noted "Turk's Cap" Melon.

About ten days later than the foregoing variety. Fruit very large, weighing from 5 to 6 pounds each; nearly round, somewhat flattened; ribs large and of irregular width, densely covered with coarse netting; flesh green, thick, coarse, but very sweet and fine flavored. A favorite with market gardeners and a good shipper. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 80c.

New Bush Musk Melon

A VALUABLE NOVELTY—A vineless Musk Melon that can be grown in every garden. The bush habit of growth of this new variety enables it to be grown in small gardens, where the vine sorts could not be grown for lack of room, and they yield about twice as much on the same piece of land as the vine sorts. The fruits are of the popular "Jenny Lind" type, but larger, averaging 5 inches in diameter; they vary somewhat in shape from flattened-round to almost spherical; the ribs are shallow, the surface is dark green, but so densely netted that it appears almost russet colored. The flesh is very deep, edible almost to the rind and is colored light green flushed with salmon towards the center. The seed cavity is small. The quality is superb, lusciously sweet and juicy, with a cool, gratifying flavor and a delightful aroma. They ripen a little in advance of "Rocky Ford." The plants grow from 15 to 18 inches in length, and two or three plants can be grown in a hill 2½ to 3 feet apart. Pkt. 8c; oz. 25c; 2 oz. 45c; ¼ lb. 80c.

Queen Ann's See Cut

Sweet Scented Pocket Melon or Pomegranate.

A pretty climbing variety; fruit round, size of an orange, of yellow color, striped and spotted red. Flesh not edible; grown for ornament and its agreeable pungent fragrance, sweetly perfuming the room for days. Trained on trellises or arbors it is very ornamental. It is easy to grow. Cultivate like Musk Melons. Pkt. 5c.

Buckbee's New Prolific Nutmeg

Unsurpassed in Luscious Flavor.

This is a very early Melon of great productiveness. Particularly adapted for home garden, but also grown for market. Fruit of medium size, slightly ribbed, globular. Skin dark green, becoming yellow when ever ripe, and neatly covered with broad, shallow netting, flesh thick, sweet and of light green color. Large Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

True Jenny Lind

"FULL OF LIFE" STRAIN.

This is the earliest of all Musk Melons, and one of the sweetest. Size small, from 3 to 5 inches in diameter; flattened, deeply ribbed and well netted. Much sold under other names such as Earliest Ripe, etc. Our strain of seed is the best. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

Buckbee's New Prolific Nutmeg.

Montreal Market

The Famous Forcing Musk Melon.

Giant, showy Melons much used for exhibition purposes, weighing on an average 10 pounds and measuring 8 to 9 inches in diameter. They often, however, weigh 20 to 25 pounds each, and a weight of 44 pounds is on record. Largely grown in the North, especially in Canada, near Montreal, commanding very high prices during the fall months.

It is justly celebrated not only on account of its large size, but also its delicious melting flavor. They are of the green nutmeg type, almost round, heavily netted; deeply and regularly ribbed with thick, luscious flesh; late; especially adapted to cooler climates. Often started under glass. Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

New Garden Lemon

Resembles the Mango Lemon in manner of growth, but is distinct in that the unripe fruit is striped with very dark green spots, nearly black, and when ripe is not russeted. Fruit a trifle smaller than the Mango Melon. Has a finer flesh and most desirable acid flavor, thus dispensing with sliced lemon, which is so important in putting up the Mango Melon. Unexcelled for general canning purposes. Cultivate similar to Musk Melons. It is an enormous yielder. Pkt. 10c; oz. 25c.

The Mango Melon or Vegetable Peach

Very striking in color, most wonderful yielder. Vines of Mango Melon are somewhat smaller than the Musk Melon, requiring same cultivation. Fruit about the size, shape and color of an orange, somewhat russeted. For sweet pickles, pies or preserving they are splendid. In the West and Northwest where fruit is scarce, they are rapidly becoming popular, as they are easily cultivated, enormously productive, and can be used in every way as the Peach, except that they are not quite as sweet and are not used raw. Pkt. 10c; oz. 25c.

New Garden Lemon, a Single Plant.

BUCKBEE'S "Full of Life" MUSK MELONS—Salmon Fleshed Varieties

Emerald Gem Musk Melon.

EMERALD GEM

Splendid Size, Color and Flavor.

The standard of excellence among the salmon-fleshed varieties. Fruits small to medium size, globular or very slightly flattened at the ends, only slightly netted and ribbed. Skin deep green while young, becoming tinged with yellow as the fruit matures. Flesh deep salmon yellow, thick, ripening close to the rind; sweet, juicy, melting and unsurpassed in flavor. For home use and nearby markets it leads all other kinds on account of its delicious flavor. Choicest stock seed and of our own growing. Large pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25.

Burrell's Gem Musk Melon.

BUCKBEE'S OSAGE

IMPROVED MILLER'S CREAM

The Best Home and Market Melon—Original Stock.

This Melon has made its way into public favor from the market rather than the garden, and is highly prized by those who like an exceedingly sweet and highly flavored Melon. It is medium to large sized, oval, slightly ribbed, dark green in color, covered more or less with shallow netting. The flesh is deep salmon color, very thick and deliciously rich, sugary, there being but a slight cavity in the center of even the largest fruit. The best general purpose Melon yet introduced. The most popular market Melon in the Northern States, not more than a week later than the small earliest Melons, but producing fruits three times as large. Our stock is unequalled, producing fruits larger, earlier and more netted than seed commonly sold by other dealers. Large pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; 1 lb. \$1.25.

Buckbee's Osage.

BURRELL'S GEM

One of the best yellow-fleshed Melons; it is excellent for shipping and a most desirable medium early sort for the home garden. Larger, more elongated, and about a week later than the standard Rocky Ford kinds. It has well-arched ribs, covered with a closely laced and interlaced gray netting. Flesh of a reddish orange color, very thick, fine grained and of rich, spicy flavor. The Melons average 2½ pounds, 6 inches long, 4½ inches thick, and will crate more evenly than any other Melon grown. Vines very vigorous and productive. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; 1 lb. 90c.

PAUL ROSE OR PETOSKEY

The Favorite Basket Melon.

In general appearance much like Rocky Ford Netted Gem, but about one inch larger in diameter; oval fruits, lightly ribbed and densely netted. It has flesh of the color and quality of the Osage, very thick, orange yellow, sweet, highly flavored and sufficiently firm to stand shipping short distances to the market. A splendid variety for the home garden. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; 1 lb. \$1.00.

BUCKBEE'S WESTERN GIANT

Noted Not Only for Its Great Size, But for Its Most Magnificent Flavor and General Good Quality.

A large Melon ripening about the same time as Osage; the flesh is rich, melting and sugary. As an exhibition and large market variety it is grand. It will astonish everyone by its merits, being exceptionally desirable for family and market purposes. For shipping it has no superior. Where size is an object, and there is not a particle of danger of sacrificing quality, Buckbee's Western Giant will always give the most complete satisfaction. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; 1 lb. \$1.50.

Buckbee's Western Giant.

Buckbee's "Full of Life" Musk Melons—Salmon Fleshed Varieties—Cont'd

Buckbee's Ideal

BUCKBEE'S IDEAL

A Most Delicious Melon.

That is the verdict of everyone who has tried this magnificent sort. Weighs from 10 to 15 pounds; exceedingly thin skin. Good keeper and an excellent shipper. The flesh is of a rich salmon color of a sweet, pleasing and delicious flavor. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

BUCKBEE'S PRIZETAKER—A new Melon ten days earlier than Osage, only little smaller, more round, but fully equal to it in delicious sweet flavor. Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

HOODOO—A new orange-fleshed variety. Ideal as a shipping Melon and of the very finest quality. The Melons are of medium size, round, heavily netted; flesh very thick, of rich orange color and sweet flavor. Average weight of Melon 1½ pounds. Large pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

NEW YELLOW MEATED JAPAN—Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

NEW BANANA MELON

This most curious and most exquisitely flavored Melon grows to a length of 18 to 30 inches and is 2 to 4 inches in diameter. The flesh is yellow and quite deep. In appearance and odor it greatly resembles a banana. Seed always scarce. Order early. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

New Banana.

TRUE TIP TOP

The Can't-Be-Beat Melon.

We heartily recommend our pedigreed strain of this variety to every lover of this luscious fruit and to every gardener who grows for the market. Splendid large oval fruits, distinctly ribbed, fairly covered with a shallow netting; flesh salmon colored; firm and edible almost to the rind. Sweet, juicy, melting and delicious. Larger and about a week later than Osage. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Buckbee's Prizetaker.

Buckbee's New Strawberry.

BUCKBEE'S NEW STRAWBERRY

Flavor Like That of a Strawberry.

A grand new Hybrid Musk Melon. The fruits weigh from 6 to 8 pounds each. Their smooth, deep flesh is of an attractive orange-red color, melting and of an exceptionally delicious strawberry flavor. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Honey Dew.

HONEY DEW

A Wonderful New Melon; the Sweetest Melon Ever Grown; Sold at Fabulous Prices.

A new type of Melon, a cross between a Cantaloupe and a Cassaba. The fruit is oval-shaped, about 8 inches in diameter and 7 to 8 inches long, weighing from 8 to 10 pounds each. It ripens about two weeks later than Rocky Ford Cantaloupe and in the North it should be started in hot beds to give plenty time to ripen. The skin is smooth, dull white when ripe. The rind is thin but tough. The flesh is thick, of rich, light green color. This Melon has been appropriately named; it is of a distinct honeylike flavor, more luscious and juicy than any other Musk Melon.

It is the best keeper and shipper of all and will stay in good condition from three to five months after it is ripe; Melons not ripe when frost comes may be stored in a cellar and will there ripen slowly and can be used all winter.

Pkt. 5c; oz. 12c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

CASSABAS—The Long-Keeping Melon

A great acquisition and destined to become a standard vegetable. These are late maturing Musk Melons, which are largely grown in California, and hundreds of cars of them are shipped from there to the East every year. They do not ripen on the vines in the North, but are gathered there before freezing weather and if properly stored all Melons, even half grown ones, will ripen gradually. Sow and cultivate like other Musk Melons. Do not pick until the light streaks become quite yellow. Store away so they do not touch each other in a cool, dark, dry place. When the rind becomes slightly softened and moist they are ready to eat. Some of the Melons will actually keep until February. The seed cavity is small and the flesh thick, of fine texture, juicy and palatable to within one-quarter inch of the skin. The flavor is delicious—similar to Pineapple.

NEW WINTER PINEAPPLE—The original round form, the best keeper of all; will keep all winter; flesh deep lemon colored, of excellent rich spicy flavor. Pkt. 5c; oz. 20c.

NEW GOLDEN CASSABA—Of the same shape as pineapple, golden yellow colored flesh; the best flavored of all Cassabas, but does not keep quite as long as Pineapple. Pkt. 10c; oz. 25c.

New Golden Cassaba Melon.

BUCKBEE'S EARLIEST WATER MELONS

BABY DELIGHT.
The Baby of the Watermelon, a Delight for the grower on account of its extraordinary prolificness, yielding fully as much in weight per acre as any of the larger Melons and being earlier than any other, finds always a ready market and brings very high prices; a delight also for the consumer on account of its convenient size and its luscious sweetness.
This Melon is almost round, and measures from 5 to 7 inches each way and weighs from 3 to 6 pounds. The skin is dark green, the rind thin but strong. The flesh of rich carmine color, always solid and of exceptionally sweet flavor. The seeds are very small, resembling apple seed, but of gray color.
Pkt. 10c; ½ oz. 15c; oz. 25c.

FORDHOOK EARLY—Large, round, dark green, very sweet, good shipper. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.
PIBBNEY'S EARLY—Medium sized, oblong Melons, sweet and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.
HUNGARIAN HONEY—Very early and productive. Small, round Melons, weighing 10 to 15 pounds. Flesh of intensely red color, melting and delicious. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb., 90c.

COLE'S EARLY

The Best Earliest Large Melon for the Home Garden.
Cole's Early is not only one of the earliest varieties in cultivation, but it continues to bear throughout the season. The beautiful bright red flesh is crisp and of delicate texture—granulated, cool and sparkling. In flavor it is lusciously sweet and refreshing. The Melons are not large, seldom over 12 inches in length by 9 inches in diameter, but what they lack in size is more than made up in number and solidity. The heart is large, there is little or no cavity and very few seeds—all solid flesh, the quality of which is sustained clear to the rind. It can be grown successfully over a larger latitude than most other Watermelons, and it will mature large crops in the Northern States when the season is at all favorable. This is a Melon for the family garden and local market, the skin being rather tender, making it unfit for shipping. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

BABY DELIGHT

The Baby of the Watermelon, a Delight for the grower on account of its extraordinary prolificness, yielding fully as much in weight per acre as any of the larger Melons and being earlier than any other, finds always a ready market and brings very high prices; a delight also for the consumer on account of its convenient size and its luscious sweetness.

This Melon is almost round, and measures from 5 to 7 inches each way and weighs from 3 to 6 pounds. The skin is dark green, the rind thin but strong. The flesh of rich carmine color, always solid and of exceptionally sweet flavor. The seeds are very small, resembling apple seed, but of gray color.

Pkt. 10c; ½ oz. 15c; oz. 25c.

NEW EXCEL

This Watermelon has become a favorite sort with the Southern growers for shipping north; does equally as well planted here in our Northern climate. The large oblong melons are of a dark green color with faint stripes. The tough rind permits rough handling in transit, making it a good long distance shipper. The red flesh is very solid, crisp and of excellent flavor. The vines produce an enormous crop of medium early melons, which are handsome in appearance, making them a quick selling melon on the market. A characteristic of this melon is that the seeds are of mixed color, some black, some white with black border. Postpaid, pkt. 5c; oz., 10c; 2 ozs., 15c; ¼ lb., 28c; ½ lb., 50c; lb., 90c.

HARRIS' EARLY

The Best Earliest Large Shipping Melon.

In form the Melon is oval to oblong, beautifully striped with green and gray; bright red flesh, which is sweet and tender. It is very productive. It is the Melon for everybody to grow who wants to be first in the market with fine large Melons weighing from 20 to 40 pounds. It bears shipment very well. Harris' Early ripens about the same time as Cole's, but having a tougher skin it is a better shipper; it also grows larger, but for quality we prefer Cole's. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

Harris' Early.

THE PRIZE WINNER EVERYWHERE

BUCKBEE'S GENUINE PERFECTED

MONTE CRISTO

Trade Mark Registered 1914—By H. W. Buckbee, Et. Al.

The World's One Unbeatable Water Melon THE SWEETEST FLAVORED MELON KNOWN

The Best Variety for the Table—For Shipping and Long Keeping

IN hundreds of markets every season it finds ready sale at good prices when all other sorts go begging for buyers. This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Buckbee's Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms. The greatest yielder. The sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared \$100 or more per acre by growing Buckbee's Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds on the preceding page. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons, and we would advise all who care to plant this "King of Melons" in 1919 to place their orders as early as possible. Please remember that we control the entire product of this variety, so send to Buckbee for choicest stock seed of Buckbee's Monte Cristo Melon. The price is within the reach of all.

Price of choicest stock seed of our own growing: Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 80c; 1 lb. \$1.50.

T. H. Dixon, Houston, Texas: "After repeated failures, I this year tried Buckbee's Water Melon Seed and had splendid results."

John R. Cooper, Syracuse, N. Y.: "I received second prize on my city garden, using your seeds."

J. J. Hayman, Berwick, Pa.: "Although I am 76 years old, I had the finest garden in Berwick this year, using your seeds."

MONTE

CRISTO

Gilman T. Carl on, Pontiac, Ill.: "After trying your seeds, I have decided they are better than any I have ever used."

Ernest Austin, Paragould, Ark.: "I have been ordering seeds of you for six or seven years and always liked them."

BUCKBEE'S "Full of Life" WATERMELON SEED

Buckbee's
Golden
Honey.

BUCKBEE'S GOLDEN HONEY

Golden Fleshed, Crisp, Tender and Delicious.
Some people are prejudiced against a yellow-fleshed Melon, but this prejudice will quickly disappear once they taste Golden Honey, as this Melon is one of the finest grown, the flesh being very sugary, juicy and of a most delicious flavor, similar to that of the celebrated Monte Cristo, known all over the world for its luscious quality.

Golden Honey is early, of oblong shape, medium size. The rind is light green with mottled stripes. The flesh is solid, crisp, of golden yellow color and has a delightful aroma; it is entirely free from hard centers or stringy sections.

This is one of the finest Melons for the home garden and nearby market, but is not a shipper. We believe it will soon be one of the most popular melons grown.

Pkt. 10c; oz. 20c.

KLECKLEY SWEETS

(Kleckley's Original Strain.)

First introduced and offered by us in 1895. Without question, it is one of the sweetest flavored of all Melons. Oblong in shape; skin dark green; flesh bright red, solid and luscious. Valuable for local market and family purposes. The first original strain can be had from no other seedsman. Beware of imitations. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

BUCKBEE'S EVERBEARING ALWAYS SWEET

This is absolutely one of the sweetest Watermelons known, and is sure to be one of the first in the market. It is of most delicious flavor, very juicy and sweet and is splendid for family use, as a few vines yield many Melons. Everybody should try this new early Watermelon. It is the Melon to plant if you are in a climate where the seasons are short, for it will ripen where other varieties will not. It is certainly a splendid Melon for every purpose. Just the size for family use and one of the best for the market garden and shipper. The flesh is deep red in color and exceedingly brittle. Pkt. 5c; oz. 10c; 2 oz. 20c; ¼ lb. 35c; ½ lb. 60c; 1 lb. 81c.

Buckbee's
Everbearing.
Always Sweet.

New
Sugar
Stick.

NEW SUGAR STICK

A large light green or grayish Melon of oblong form, combining handsome appearance with the finest flavor and excellent shipping qualities. Flesh red, of luscious quality. These Melons measure about 2 feet in length and weigh on an average about 30 pounds. We highly recommend this fine Melon; it is one of the best paying and most satisfactory varieties to grow. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

THE TOM WATSON

Best Quality, Fine Shape, Large Size, Good Shipper.

The "Tom Watson" is an extra long Melon of attractive appearance, uniform in shape and quality; the luscious crimson flesh is "as sweet as honey," melting and of superb flavor. The average Melon will weigh 50 to 60 pounds and measures about 28 inches long and about 12 inches in diameter. The skin is dark green, with thick netting all over, quite distinct from other varieties. Its appearance and quality strongly recommend it both for home use and for market. Sure to take a leading place with large Melon growers and shippers. Our choice seed was grown from selected stock under our most painstaking care and is a great improvement over the introducer's stocks. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 80c.

ALABAMA SWEETS

The Ideal Shipping Melon.

Extensively grown in the South for shipping to distant markets. Large, oblong, with firm, dark green and slightly striped rind. The flesh is a bright red and of delicious flavor. seeds are white. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c.

TOM
WATSON

BUCKBEE'S "FULL OF LIFE" WATERMELON SEED

Buckbee's Ice Cream or Peerless.

GEORGIA RATTLESNAKE The Old Reliable Branch's Original Strain

One of the finest Melons ever grown; a splendid keeper, excellent shipper. Sometimes called Striped Gypsy. A very large Melon of good shipping qualities. Shape oblong, striped and mottled with various shades of green. Flesh bright red. Flavor sweet and first-class. Rind not thick. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

THE HALBERT NEW RUBBER RIND One of the Finest Shipping Melons on Earth.

After years of patient labor and careful breeding, Mr. Halbert, of Texas, the well-known Melon breeder, has succeeded in perfecting this grand Melon. Shape of fruits, oblong and quite large in size, weighing from 50 to 100 pounds. Flesh dark red color, sweet and quite tender. Rind very exceedingly tough, almost as a piece of rubber, hence the name. It is decidedly a most handsome Melon in shape and color and will bring the highest price in every market. Excellent for shipping purposes. Genuine originator's stock seed. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Georgia Rattlesnake.

Florida Favorite.

BUCKBEE'S NEW LIBERTY

See Painting from Nature on Front Cover of this Catalogue.

Without question this is the largest of all Melons and one of the best flavored, specimens weighing fifty pounds, having fully as fine and delicate flavor as a small melon. We control the entire stock of this variety so send to Buckbee for originator's stock seed. Price: Genuine Buckbee's New Liberty, pkt., 15c; oz., 25c; 2 oz., 40c; ¼ lb., 75c; ½ lb., \$1.25; lb., \$2.00. Postpaid.

NEW CLIMBING WATERMELON

A Superb Variety, Novel and Attractive. The vine may be allowed to trail on the ground or may be trained and tied to trellises, etc. The Melons are about the size of a cocoanut, with seed no larger than apple seed. They are very solid, rich crimson flesh and of the highest quality, perfectly ideal for the home garden. Fruit ripens for a long period, unlike other sorts which ripen their fruit mostly at one time. Pkt. 10c; 3 pkts. 25c.

BUCKBEE'S ICE CREAM OR PEERLESS

One of the Best for Home Garden.

Splendid in every respect. Has beautiful crimson core, which is always fine grained and cannot be surpassed in flavor. Very prolific, early, magnificent grower. Is one of the best for nearby markets and home purposes. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 80c.

HALBERT HONEY

A Most Deliciously Flavored Melon.

As handsome in color as the Kieckley Sweet, but more regular in form, and much more productive. Generally free from any appearance of neck. They average 12 to 20 inches in length; 6 to 8 inches in diameter. Color of rind a clear, glossy deep green. The flesh is a beautiful crimson, extending clear to the rind. Excellent for home garden and local market. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

FLORIDA FAVORITE

Deliciously Sweet—Second Early Shipper.

A splendid, very popular Melon; in appearance similar to Rattlesnake, but with darker skin. Enormous oblong fruits with dark green skin, faintly striped with a still deeper shade. The rind is thin, but firm; the flesh is of a beautiful clear crimson, extending clear up to the rind, and is very sweet and tender. The vines are very vigorous and productive. Our strain is highly bred and is in great demand. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

WONDERFUL SUGAR

Excellent variety of oblong shape and large size, averaging 20 inches in length and 40 to 60 pounds in weight. Flesh red and deliciously sugary. One of the finest for the home garden and for shipping. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

New Climbing Watermelon.

BUCKBEE'S "Full of Life" WATERMELON SEED

BUCKBEE'S NEW SWEETHEART

Most Popular for Market.

Medium early, large, handsome, heavy; good shipper, long keeper; bright color and of best quality. Vine vigorous and productive, ripening its fruit early. Fruit large, oval, heavy, uniform, mottled light and dark green; rind thin, but firm; flesh bright red, firm, solid, very sweet and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

NEW CHILIAN

A new Melon of splendid quality, which is already very popular on the Pacific Coast and will doubtless take high rank elsewhere as soon as its desirable characteristics have become more generally known. Fruits nearly round or slightly oblong, skin rich deep green, mottled and striped with a still darker shade; flesh of decidedly bright vermilion red; remarkably fine grained, firm and sweet. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 85c.

BUCKBEE'S PERFECTED KOLB'S GEM

One of the Best Long-Distance Shippers.

Fruit of the largest size, round or slightly oval, marked with irregular mottled stripes of dark and light green, while the underside is of a creamy yellow color. Outer rind or shell, exceedingly hard and firm, making it one of the best sorts for keeping and shipping long distances. Flesh bright red, solid, sweet, tender and melting. The fruits grow very uniform in size, very solid, and are medium early. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

New Chilean.

Sweetheart.

NEW ICEBERG

One of the Best Round Melons for Shipping.

Often called Blue Gem; has a very firm, hard rind, and it is as good a shipper as the Kolb's Gem, but the rind is much darker and richer in color and the flesh is much deeper colored, extends nearer to the rind, is much more tender and sweet. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

NEW ICEBERG

Citron Melons—The Best for Preserves

APPLE PIE MELON—A Wonderful Fruit for Pies, Preserves, Etc.—This is a novelty which will be appreciated in many sections of the country, and especially so during seasons when apples are scarce or high in price. The vine and fruit are quite similar to a Watermelon and they are easily grown on any good soil. Each vine produces from five to fifteen fruits and one large fruit will make as many pies as half a bushel of apples. The flesh is white, solid throughout and of excellent quality for making pies, sauce, preserves, etc., and it resembles apples in flavor. They keep nice and fresh all Winter, so that they can be used at any time and any surplus you may have can be fed to the live stock. In fact, it would pay to raise them for this purpose alone, as they can be kept and fed fresh all Winter. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 75c; lb. \$1.25.

COLORADO PRESERVING—Very Productive, Rich Quality—Makes beautiful, nearly transparent preserves of unsurpassed flavor. Superior to the ordinary preserving Citron in quality. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

RED SEEDED CITRON—Used exclusively for preserves. Slightly striped, round. Extremely productive, splendid flavor. Flesh white. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

GREEN SEEDED CITRON—Flesh white. Makes beautiful preserves of unsurpassed flavor. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

APPLE PIE MELON

Buckbee's Sure Crop Mushrooms

GROWING MUSHROOMS IS NOT DIFFICULT.
Get Reliable Spawn. Start Right and the Results Are Certain and Profitable.

Buckbee's Sure Crop Mushrooms.

On a bed of 50 feet square one can do a profitable marketing business. A bed of this size, it is estimated, will yield 10 quarts of Mushrooms a day, or about \$5.00 worth. This will pay the butcher, grocer and candlestick maker. A boy or girl ten years old can attend to the bed after it is started. The trouble is in the initial work. Afterwards a Mushroom bed piles up more money like a money-lender's interest.

FACTS ABOUT BUCKBEE'S SURE CROP SPAWN

This Spawn is prepared solely for us by a specialist in this country who has not only devoted a lifetime to the work, but who is a profound student of the industry. His work has resulted in procuring the best and most reliable Spawn in the world. Under our contract it is impossible for the grower to secure any Sure Crop Spawn from anyone except Buckbee.

We can safely assure all Mushroom growers, as well as those who have never grown any, but are on the point of trying it, that they will find Sure Crop Spawn to be all that is claimed for it and more. It produces Mushrooms true to type, in much greater abundance, of much earlier maturity and of much larger size than those grown by any other method, and these Mushrooms are in great demand at the very highest market prices.

In order to meet the demand for Sure Crop Spawn, and to provide against deterioration of its producing qualities, our arrangement with the producer is for frequent shipments with, coupled with, the best of all others. It is absolutely certain that our customers will all be furnished with Spawn that is fresh, of quick, vigorous growth and if they handle it properly will bring them big returns.

We have made the price as low as Spawn of such an exceedingly high grade can possibly be sold for.

BUCKBEE'S SURE CROP SPAWN

By mail, postpaid, brick (weight about 1½ lbs.) 45c. At buyer's expense: Bricks 35c; 5 bricks \$1.50; 10 bricks \$2.75; 25 bricks \$6.75; 100 bricks \$21.00.

Arthur Young, 951 Superior St., Racine, Wis., writes: "You will note this is my second order for Sure Crop Mushroom Spawn. The first order of Spawn has been planted two weeks yesterday, and the last few days I have picked quite a few."

BUCKBEE'S HIGH GRADE ENGLISH SPAWN

Comes in pressed bricks weighing a pound or more. Price, postpaid, brick (weight about 1½ lbs.) 40c. Not prepaid, brick 30c; 5 bricks \$1.35; 25 bricks \$6.25; 100 bricks \$21.00.

Buyers in quantity are urged to state whether they want shipment made by freight or express.

We furnish every buyer of Mushroom Spawn with explicit directions for growing. If they are followed there is nothing so certain as big success.

MUSTARD

NEW CHINESE—The large leaves have a pleasant, pungent flavor, and can be eaten the same as other salads. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

OSTRICH PLUMED—Leaves exquisitely crimped, ruffled and frilled of superior flavor and very popular. Prices postpaid, pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

WHITE SEEDED—Useful for salads and greens. Prices postpaid, pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

BLACK SEEDED—Useful for salads and more pungent than any other variety. Prices postpaid, pkt. 5c; oz. 7c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 30c; lb. 50c.

MARTYNIA (Proboscidea)

Ornamental in growth, bearing large spikes of flowers, followed by hairy seed pods, which are used for pickling. Pkt. 10c; oz. 45c.

OKRA or Gumbo

KLECKLEY'S IMPROVED—Immense plants, close jointed with ample foliage, bearing smooth white pods at each leaf joint, young pods are exceptionally tender and fleshy. Pkt. 3c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

PERKINS' IMPROVED—Pods 4 inches long, produced in great profusion, of handsome green color and of best quality. Pkt. 3c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 70c.

WHITE VELVET—Pods round and smooth, never prickly to the touch. Produced in great abundance. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

NEW LADY FINGER—Seed pods produced in abundance give a consistency and flavor that is unequalled. Quite prolific, producing long, slender pods of the form of lady's fingers. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

Okra-Kleckley's Improved.

BUCKBEE'S PEDIGREED ONION SEED

Took the Leading Prizes at the World's Largest Onion Shows
Held at Nappanee and Wolf Lake, Ind.

Buckbee's New Wampum

Best Globe-Shaped Yellow Onion. A Rich Golden Yellow.
Quality Simply Superb. The Great Money Maker.

This grand new variety, which was sent out for trial in 1898, has proven, as its name indicates, the MONEY-MAKING ONION. Its color is a beautiful golden yellow, very attractive and striking. It is the most perfect globe-shaped Onion in existence today. The bulbs are firm and solid and excellent keepers. The necks are small and cure down to almost nothing. It is an enormous yielder; various customers claim from 1,000 to 2,000 bushels per acre. If you wish the best Onion you ever planted, try this greatest of all Onions. This variety received medals by the score for superior quality and vouchers by the thousands were sent us from our customers as the most satisfactory strain for largest cash returns. Buckbee's Great Pedigree Onion Seed of this variety produces the biggest, finest crops of large Onions obtainable. We advise early orders, as our stock is not very large, and this variety cannot be procured elsewhere. Our own growth, choicest Northern grown, high-grade, pedigreed stock seed. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; 1b. \$3.00.

Remember that BUCKBEE'S "FULL OF LIFE" ONION SEED is grown on Buckbee's Seed Farms from carefully handsorted, selected, pedigreed bulbs—all fresh new crop of unusual vigor and superlative vitality. Thousands of customers in the large Onion-growing districts from Maine to California send in their orders every year, as our Onion Seed has an excellent reputation in every prominent Onion-growing district in the country; and is unsurpassed by that of any other house in the trade, and in many sections is planted to the exclusion of all other strains. We are determined, as usual, to furnish our customers the very choicest, strictly fine stock seeds that grow.

MONEY MAKING ONIONS

QUICK GROWING
SURE CROPPERS
LONG KEEPERS

Buckbee's Southport Globe Onions

Southport Globe Onions are most attractive in appearance and most economical in use. They command the highest price in the market. These Onions are big croppers and splendid keepers. Harvested in September, they keep perfectly sound and

merchantable until the following June. Our strains of these varieties have been carefully bred and are unequalled by those of any other grower in size, beauty, yielding and keeping qualities.

Southport Red Globe

Buckbee's Re-Selected Pedigree Seed.

The celebrated Blood-Red Globe Onion. This variety has for many years proved one of the most profitable for the market and shipping trade, commanding uniformly good prices in carload lots. It is of large size and splendid appearance, and frequently yields from 600 to 800 bushels per acre under average culture. It is an Onion of unusual merit. Flesh is firm, finely grained, very rich, yet unusually mild for a red Onion, and is

sure to please the most fastidious. The crop is ready to harvest in early Fall and keeps well until the late Spring months. No one that we have ever known has been disappointed with the results obtained by planting this great Onion.

Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; 1 lb. \$2.00.

Southport Yellow Globe

Buckbee's Re-Selected Pedigree Seed.

Entirely distinct from Onions of the Danvers type, having notable and striking characteristics of its own. Excels in size, excels in yield, excels in keeping qualities, excels in mildness and flavor. Matures in early Fall. It is sure to satisfy the one who buys a packet or the one who sows 50 pounds or more of seed for carload shipments. A truly grand Onion, whose large, golden-yellow spheres make a beautiful appearance, sacked, crated or barreled for the market.

Our own growth, choicest Northern-grown, high-grade, pedigree stock seed. Pkt. 8c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 90c; 1 lb. \$1.75.

Southport White Globe

Buckbee's Re-Selected Pedigree Seed.

Handsomest of all Onions. It is of true globe form, pure white, hard, small necked, ripening regularly and evenly a splendid keeper. The flesh is firm and fine grained and mild to taste. Average yields of 500 to 700 bushels per acre are of frequent occurrence. No market gardener or Onion grower can afford to plant inferior stock, with only cheapness of price to recommend it, when seed like ours is to be had as reasonable, the results of planting a few ounces often paying many times the first cost of the best seed.

Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; 1 lb. \$2.25.

Buckbee's Great Cardinal

The World-Beating Red Globe Onion. Enormous Yielder. Large Size. Perfect Globe Shape, Splendid Keeper. Wonderful Shipper. Matures Early.

The largest American grown red globe Onion. The color is rich, very deep cardinal-purple, darker than that of other red Onions. The flesh is thick and of splendid flavor. It is one of the very best keepers ever introduced. It has the size and shape to recommend it in the highest degree for the market. We would not praise it so highly if we did not believe it to be alone in its class. It is one of the real money makers. No one but Buckbee can furnish GREAT CARDINAL SEED. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; 1 lb. \$2.25.

TWO GIANT GLOBE ONIONS

Denia Onion

The Largest Onion Grown.
An Improved Prizetaker.
American Grown Seed.

This is probably a new onion to many of our customers, but it has been grown now for several years in the southwestern states, creating a sensation wherever used. It is of Spanish origin, supposed to be the parent type of the well-known Prizetaker, but it is far superior to the latter. It is the largest variety of onions grown of commercial value, and is considerably larger than Prizetaker, in fact, it will take two large Prizetakers to equal one Denia in weight. Denia is extraordinarily tender and sweet, surpassing Prizetaker in its mild, delicious flavor. Denia is fully as early and as good a keeper as Prizetaker. The flesh is pure white, of very fine grain, the skin is of bright, light straw color, lighter than that of Prizetaker and almost white.

Our stock is very fine and pure, producing uniform bulbs of the largest size, of splendid globe shape, with small necks, and these bulbs will ripen up hard and are exceptionally good keepers.

To reach the heaviest weight, the seed is best started early indoors, giving the bulbs a long season in which to mature. If you want the largest possible yield of onions of your land grow the Denia.

Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

Buckbee's
Prizetaker
Onion

Buckbee's Prizetaker

Unexcelled Either for Home Use or for Market.

Buckbee's Prizetaker Onion has proved itself to be the greatest acquisition in years and is by far the handsomest, most productive and largest of all Yellow Globe Onions which are grown extensively today. Always grows to a uniform shape, which is a perfect globe; has a very small neck and ripens up without stiffness of the neck.

It succeeds everywhere—East, West, North and South—and whether grown for home use or for marketing it gives universal satisfaction, yielding from 1,200 to 1,500 bushels per acre and the bulbs are generally three times the size of yellow Globe Danvers. Its immense size will recommend it to all, particularly when it is known that its keeping qualities are excellent. The exterior color is pale yellow and the interior clear, sparkling white. Easily grown, medium early in maturing, mild flavor. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

Buckbee's Large Red

The Greatest of All Early Red Onions

WETHERSFIELD

BUCKBEE'S PEDIGREE LARGE RED WETHERSFIELD

OUR LEADING SPECIALTY

One of the chief departments of our seed growing business consists of growing Buckbee's Pedigreed Red Wethersfield Onion for seed purposes only. Our stock has reached such a high point of merit that it is a household word everywhere that "Buckbee's Pedigreed Red Wethersfield Onion Seed is the most reliable and produces more good marketable Onions per acre than any other offered." And from the many thousands of unsolicited testimonials which we have received from all over the country, we have every reason to believe that the time which we personally spend in our onion fields is truly appreciated by our many thousands of customers who stand by us and say: "Buckbee's Seeds are Full of Life."

There are many strains of this justly celebrated Onion offered, but we venture to say none can surpass Buckbee's Prize Medal Stock of this famous variety. The various strains, good, bad and indifferent that are generally offered to the unwary planter, come to maturity all the way from August up until as late as October. This unreliability of cropping is very disastrous to most localities.

BUCKBEE'S PEDIGREED LARGE RED WETHERSFIELD—Our own growth, choicest, northern grown, high-grade, pedigree "Full of Life" stock seed. Pkt. 5c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 90c; lb. \$1.75.

BUCKBEE'S NEW GOLDEN GLOBE DANVERS

Long Keeper. Best Shipper. Unrivaled Market Onion. Always in the Lead. Challenges Competition.

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,000 bushels per acre, while under ordinary cultivation in past seasons several of our customers have reported yields of 1,500 bushels per acre. The bulbs are very hard, solid and are exceptionally good keepers.

Remember, that we control the entire supply of this variety. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

BUCKBEE'S SELECTED YELLOW GLOBE DANVERS

Standard of Excellence for Home and Market Use.

Buckbee's strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as St. Thomas Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 5c; oz. 12c; 2 oz. 22c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

THE GREATEST OF ALL RED ONIONS

The seed which we are offering is of the earliest maturity; grown from hand-sorted bulbs that will produce Onions of immense size; 1½ to 2½-pound Onions from our seed are of frequent occurrence. BUCKBEE'S RED WETHERSFIELD grows with unusual regularity, scallions being unknown. It is a magnificent keeper. An enormous cropper—700 to 1,000 bushels have frequently been raised upon a single acre. The shape is accurately shown in the illustration above. In color the skin is a deep rich, purplish red, while the flesh is of a beautiful white, firmly grained and of good flavor. Our customers throughout the country indorse it as the best Red Onion ever grown.

NEVER HAS BEEN KNOWN TO FAIL

We trust no Onion grower who receives our catalogue will fail to try at least a small quantity of BUCKBEE'S RED WETHERSFIELD ONION, for all ought to know how much superior it is to other strains offered. This seed will produce highly-colored, long-keeping Onions, sure to command the highest price in the market. Will yield double the crop that seed from most other dealers will produce.

QUALITY
NOTHING BUT
QUALITY

BUCKBEE'S
NEW
GOLDEN GLOBE
DANVERS

BUCKBEE'S PEDIGREED "Full of Life" ONION SEED FLAT VARIETIES

NEW WHITE SILVERSKIN OR WHITE PORTUGAL

The Standard White Onion for Market and Family Use. Medium sized bulbs of flat shape, which ripen evenly and quite early—about 10 days earlier than Southport White Globe. They are of handsome appearance; have a clear, white skin as beautiful as glistening silver. The flesh is of mild, delicious flavor. For keeping, this is the best of all white varieties.

A gardener who does not care to plant more than one variety should use this one, and everyone should make a liberal sowing of it for continuous use. These Onions make fine bunching of Green Onions and are also grown for the market as large White Onions. They are also much used for pickling and for Onion Sets. Buy your seeds from first hands. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

EXTRA EARLY RED

The Earliest Red Onion in the World.

A favorite early variety of fine shape. Always a good yielder and magnificent keeper, its beautiful shape and rich purplish crimson color making it extremely attractive and desirable. Medium sized, flat bulbs. Adapted for a great variety of soils and succeeds in wet, cold and mucky land. Very desirable for early market use. Selected stock seed. Pkt. 5c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 90c; lb. \$1.75.

BUCKBEE'S ROUND OR YELLOW DANVERS

A Magnificent Sort in Every Way. The Earliest Yellow Onion.

Very handsome in appearance. Flattened, but thick through, of fine size, in fact, is ideal in every respect for market and family purposes. Skin is thin, of a rich straw color. Flesh is of pearly white, fine grained, firm, mild and of excellent quality. Ripens early, keeps well and sells rapidly. Our own growth, choicest Northern-grown, high-grade pedigree stock seed. Pkt. 8c; oz. 12c; 2 oz. 24c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.35.

SELECTED YELLOW STRASSBURG OR DUTCH

Quite similar to the foregoing, but the bulbs are rather more flattened, of a darker skin, a little larger and mature a few days later. One of the best to grow for sets, and a splendid keeper. High-grade pedigree seed. Pkt. 5c; oz. 12c; 2 oz. 21c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.35.

New White Silverskin or White Portugal,

Extra Early Long Keeping Australian Brown Onion

Hardest of All, Sure Cropper. Abundantly productive. Very fine quality. You can't go wrong on this at the exceptionally low prices at which we offer our home-grown seed.

This remarkable Onion is of medium size, wonderfully hard and solid and most attractive for market, both in form and appearance. They are extremely early in ripening and make no stiff necks or scallions. Every seed seems to produce a good-sized Onion, and the bulb begins to form very quickly when the plant is not over three inches high. Planted with the Red Wethersfield it will average nearly four weeks earlier, and ripen off more uniformly. It has the reputation of its firmness and hardness that it will keep in good condition longer than any other Onion known. The color of the skin is a clear amber-brown. These Onions have been known to keep nearly a whole year in good condition, and on this and other accounts it will commend itself to the Onion Set growers, who often lose heavily in carrying their crop because the sets do not "keep." Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

keeping indefinitely, and we think from its firmness and hardness that it will keep in good condition longer than any other Onion known. The color of the skin is a clear amber-brown. These Onions have been known to keep nearly a whole year in good condition, and on this and other accounts it will commend itself to the Onion Set growers, who often lose heavily in carrying their crop because the sets do not "keep." Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Bermuda Onions

Bermuda Onions are largely grown in the South and have proved a most profitable crop. They are planted there in the fall and shipped north in May and are the earliest large new Onions in the market. Growers can do equally well with them in the North. They are the quickest growing Onions known. Sown at the same time as Danvers and White Portugal, they will produce full grown bulbs about 3 inches in diameter when the others are only 1-inch in size.

WHITE BERMUDA—The bulbs are quite broad and flat in form. The color is not a clear white, but rather a pale straw; flesh crisp, solid and mild, early ripening. Pkt. 8c; oz. 25c; 2 oz. 45c; ¼ lb. 75c.

RED BERMUDA—Similar in form and early ripening to the Bermuda White, but grow larger in size, ranging from 3 to 4 inches in diameter; very flat and of a light pink color. The flesh is white, slightly suffused with pink; very mild. Pkt. 8c; oz. 25c; 2 oz. 45c; ¼ lb. 75c.

CRYSTAL WHITE WAX—This new variety is a large, pure-white, flat Onion. It is the earliest and most popular Onion with the large growers in the South. It produces the mildest and sweetest Onions of them all. It is very fine for slicing, the color being so clear and pure. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.35.

NOTE—For larger quantities write for Special Prices.

BUCKBEE'S MAMMOTH SILVER KING

THE KING OF WHITE ONIONS

Its Mildness of Flavor and Tenderness are Unsurpassed.

The largest white Onion. Grows to a remarkable size—average diameter is from 5 to 7½ inches. Single bulbs often attain weights of from 2½ to 4 pounds each. There is no other white Onion which attains such mammoth size. The shape is flattened, but thick through. The skin is of a beautiful silvery white. The flesh is of a snowy white and is of a particularly mild and pleasant flavor.

This Onion is very popular and is now a leading sort to grow for the market in many localities. Being a sure cropper, producing immense Onions and enormous crops, which bring the highest prices, this variety has been a great money-maker for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. Pkt. 10c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40; ½ lb. \$2.50; lb. \$4.50.

Genuine Tenderly Grown.

PICKLING ONIONS

BUCKBEE'S WHITE PICKLING

Nothing Earlier in Onions.
This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1½ inches in diameter and ¾ of an inch in thickness. Its extreme earliness makes it very valuable for early table use as well as bunch Onions for market. Pedigreed stock seed. Pkt. 6c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

EXTRA EARLY WHITE QUEEN OR WHITE PEARL

A silver-skinned variety of remarkably quick growth. Small bulbs, flat, of mild flavor. Particularly valuable for pickles. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

EARLY WHITE WELSH (For Green Onions)

A most desirable green bunch Onion. It does not form bulbs, only scallions or enlargements at the base of each shoot, which are quite attractive and, being extremely early, sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial can remain in the ground for years. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.50.

Early White Welsh.

Buckbee's Early White Pickling Onions.

BUCKBEE'S "Full of Life" ONION SETS

Buckbee's Yellow Bottom.

Buckbee's White Bottom.

Buckbee's Red Bottom.

BOTTOM ONION SETS

Bottom Onion Sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seed. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

	Postpaid.	Pint	Quart

Buckbee's White Silverskin—Bottom Onion Sets		.20	.35

NOTICE

For Prices on Onion Sets in Bulk, SEE ORDER SHEET.

BUCKBEE'S IMPROVED SPRING TOP SETS

These are planted to produce both early green Onions and large eating Onions. This variety increases by producing sets at the top of the stalk and does not produce seed. They are the best Onions to eat, will yield at least one-third more and ripen very early. It is the best keeper that we know of. Postpaid, pt. 30c; qt. 50c.

WHITE MULTIPLIERS

Produce clusters of small silvery-white Onions from a single bulb; mature earlier than any other sort. They are very sweet and of mild flavor. Fine for Green Bunching Onions and just the right size for pickling. Postpaid, pt. 30c; qt. 50c.

BUCKBEE'S NEW YELLOW POTATO SETS

of reddish yellow color, excellent quality and good keepers. The large bulbs produce clusters of small ones often as many as twenty from a single bulb. Small bulbs produce no clusters; they yield large Onions which are ripe much before any other variety. Excellent for Green Onions and also for pickling. Postpaid, pt. 30c; qt. 50c.

Potato Onion Sets.

YELLOW MULTIPLIERS OR SHALLOTS SETS

Multiplier Onion Sets multiply by division of the parent bulb. They are very early and productive. You will be pleased with results by planting this variety. Postpaid, pt. 25c; qt. 45c.

EGYPTIAN OR PERENNIAL TREE WINTER SETS

This variety never forms a large bulb. Its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Can be planted either in Spring or Fall. We can supply these sets for shipment from September 1 to the following March 1. This variety increases by producing sets at the top of the stalk and does not produce seed.

Postpaid, pt. 25c; qt. 40c.

SPECIAL NOTICE.

Prices on Onion Sets multiply in bulk frequently change as the market advances or declines. See Order Sheet for prices by peck or bushel or more.

Buckbee's Improved Top Onion Sets

PARSLEY

Parsley is used for enriching soups and stews, for salads, for garnishing; also for ornamental borders in the flower garden.

BUCKBEE'S BEAUTY

A distinct and handsome variety of quick, robust growth forming compact, ornamental plants, densely furnished with strong-stemmed graceful leaves, finely cut, most beautifully curled, and of that brilliant emerald green color so highly attractive when used for garnishing. The flavor of the leaves is also unusually rich and aromatic, rendering this variety of special value where used for flavoring, in sauces, dressing, etc., either when fresh or dried. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.00.

NEW MOSS CURLED—Invaluable as a garnishing plant and suited for mixing with dwarf, ornamental foliage plants in the garden. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

EXTRA DWARF CURLED, OR EMERALD—The moss-like leaves are a handsome, bright green color and are finely crimped and curled. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

HAMBURG TURNIP ROOTED—The edible portion of this variety is the fleshy root which resembles a small parsnip and has a flavor similar to Celeriac; it is extensively used for flavoring soups and stews. Large pkt. 6c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

Buckbee's Beauty Parsley.

PEANUTS

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, and now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to olive oil and Peanut meal makes hard hog-flesh. The Spanish Peanut containing a larger percentage of oil than the other kinds, is mostly wanted by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. The cultivation of this crop is also every year extending farther north, and on suitable soil in the northern states Peanuts will make a profitable crop for stock feed where Indian Corn thrives and with a season of only four months free from frost.

Peanuts are also valuable for dry-land farming, owing to their ability to withstand dry weather. Peanuts are soil builders and renovators. The tops make fine hay, relished by all stock, while the roots furnish rich food for both man and stock. A medium light sandy or loamy soil is the best for Peanuts; they have yielded in a dry season on land too poor for corn a ton of excellent dry forage and from 50 to 60 bushels of nuts per acre.

Plant in rows 2½ to 3 feet apart and 4 to 8 inches apart in the rows. The Spanish Peanuts are planted either shelled or in pods, using 1½ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The other varieties are mostly planted shelled at the rate of ½ bushel per acre. Planting must not be done until the weather is warm. Cultivate until they begin to form pods. When they mature pull them up, turning the roots to the sun. In bright weather they will be cured in 24 hours. They must be pulled before frost.

SPANISH PEANUT

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Pkt. 7c; ¼ lb. 15c; ½ lb. 25c; lb. 40c.

Spanish Peanut.

NEW MAMMOTH VIRGINIA

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Choice Seed, pkt. 7c; ¼ lb. 15c; ½ lb. 25c; lb. 45c.

New Dixie Giant Peanut.

NEW DIXIE GIANT

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any, pods. Yields a gallon of nuts to one kernel planted. Price, large pkt. 10c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

NEW EARLY LONG POD BUSH

Originated by one of the best Peanut growers in the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, pkt. 10c; ¼ lb. 20c; ½ lb. 35c; lb. 65c.

New Early Long Pod Bush Peanut.

BUCKBEE'S NEW SUGAR

PARSNIPS

Parsnips are one of the few winter vegetables hardy and are improved in flavor by the action of the frost. Where the climate is mild the roots can be left in the ground over winter and dug as needed. Parsnips are also of great value for stock feeding. They yield immense crops and the roots are very rich in saccharine food.

After repeated trials at Rockford Seed Farms we have no hesitancy in offering Buckbee's New Sugar as the best parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine grained and of the most excellent quality. A magnificent yield, yielding as high as 750 bushels per acre under good cultivation. You will not be disappointed by planting BUCKBEE'S NEW SUGAR PARSNIP. Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.00.

NEW MALTESE—A wonderfully fine strain. The roots do not grow as long as the Hollow Crown, but are of greater diameter and more easily gathered. Very heavy cropper. Flesh fine grained and of most excellent quality. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

IMPROVED HOLLOW CROWN—An excellent variety for the table. The roots grow to a length of about 15 inches with a diameter at the top of 3 inches. Very productive. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 35c; lb. 60c.

NEW INTERMEDIATE—Root smooth, in form of an elongated top. Usually about half as long as Buckbee's New Sugar with a diameter of 3 or 4 inches. Leaves short; early cropper. Excellent for stock as well as table. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

PIE PLANT OR RHUBARB

PIE PLANT OR RHUBARB ROOTS

A saving of from two to three years is made by planting the roots.

BUCKBEE'S NEW PINEAPPLE—Price by mail, postpaid, 25c each; \$2.50 per doz. By express or freight, not prepaid, 20c each; \$2.00 per doz.; \$15.00 per 100.

BUCKBEE'S WESTERN MARKET—Price, by mail, postpaid, 20c each; \$2.00 per doz. By express or freight, not prepaid, 15c each; \$1.25 per doz.; \$7.00 per 100.

SMALL RHUBARB ROOTS—Postpaid, 15c each; \$1.25 doz.

New Pineapple
Rhubarb

RHUBARB ROOTS

PIE PLANT OR RHUBARB SEED

BUCKBEE'S NEW PINEAPPLE—Without doubt this is the earliest of all Pie Plant and a variety that can be used not only in the early Spring, but Summer as well. The very best of the Giant Ever-bearing varieties. Quality simply superb. Stalks of good size, soft and juicy. Skin so thin and tender that it is not necessary to remove it before cooking. Flavor sprightly and refreshing and has the true pineapple flavor. This variety is about two or three times the size of the common Rhubarb. This is the first vegetable of the season and no garden should be without it. Choicest "Full of Life" Seed. Large pkt., 10c; oz., 15c; 2 ozs., 25c; ¼ lb., 45c; ½ lb., 80c; lb., \$1.50.

BUCKBEE'S WESTERN MARKET—A very fine variety, very productive, large size, and very early. The stems are numerous, broad, heavy, but very tender. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.00.

BUCKBEE'S "Full of Life" PEAS CHOICEST EXTRA EARLY ROUND, SMOOTH SORTS

BUCKBEE'S LIGHTNING EXPRESS

EARLIEST IN THE WORLD

GREATEST YIELDER ON EARTH

Buckbee's Lightning Express

Earliest Pea in the World—Ready for Picking in 40 Days.

They are much hardier, more productive and withstand greater changes in the weather than any other variety. They are not only the largest podded white seeded early, but they are ENTIRELY FREE FROM RUNNERS and the entire crop can be taken off in one or two pickings.

10,000 BUSHELS SOLD ANNUALLY

Where earliness, productiveness, uniformity of ripening, large-sized pods and sweetness of flavor are desired, this is the variety to grow. It

may be truly called **THE BLOODED STOCK OF ALL** finest early Peas, and stands at the head for the above fine qualities. In a favorable season ready for the market in 40 days. The entire crop can be taken off in one or two pickings. To the market gardener earliness is of the greatest importance, as even a few days make a great difference in price, often a depreciation of from \$2.00 to \$4.00 per barrel. The inexperienced find this out when too late. Therefore, the earliest is what is required, and **BUCKBEE'S LIGHTNING EXPRESS IS THAT VARIETY. SOW THEM. YOU WILL MAKE NO MISTAKE.**

Please observe that the true stock of **BUCKBEE'S LIGHTNING EXPRESS** can be had through our house only. Postpaid, pkt. 10c; ½ lb. 22c; 1b. 40c.

Buckbee's Selected First and Best

Vines vigorous and hardy, 2 to 2½ feet high, unbranched, bearing 7 or 8 straight pods having 5 to 7 medium-sized smooth Peas of good quality. A very early and very even strain of White Extra Early Peas, surpassed in productiveness and earliness only by Buckbee's Lightning Express. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 38c.

Earliest of All or Alaska

By careful selection we have developed a stock of this smooth, green seeded Pea, which in evenness of growth of vine and early maturity of pods is unequaled by any other extra early green seeded Pea. Vines 2 to 2½ feet high are unbranched, bearing 4 to 7 long pods, which are filled with medium-sized dark green or bluish green Peas of excellent flavor. Ripens the crop all at once and is an invaluable variety for market gardeners and canners. Buckbee's "Full of Life" Pedigreed Stock. Postpaid, pkt. 8c; ½ lb. 18c; 1b. 32c.

Buckbee's Extra Early Tom Thumb

Extremely early; dwarf vines 9 inches high, completely covered with medium-sized pods well filled with smooth white Peas of fine flavor. Postpaid, pkt. 8c; ½ lb. 22c; 1b. 40c.

2 and 3

Bountiful or Ameer

A grand Mammoth Podded Extra Early Pea and a Splendid Market Gardener Sort. The largest podded of all green seeded Extra Early Peas. In our trials none of the numerous Extra Earlys compared with Bountiful in size of pod, number of Peas in a pod, or number of pods to the vine. It is also one of the sweetest and finest flavored of the green round seeded varieties. Grows about 30 inches high and crop can be gathered in one or two pickings. Only a few days later than Buckbee's Earliest of All, but with much larger pods and more Peas in the pods. Postpaid, pkt. 8c; ½ lb. 20c; 1b. 38c.

Bountiful or Ameer.

BUCKBEE'S "FULL OF LIFE" PEAS

CHOICEST, EXTRA EARLY, SWEET, WRINKLED VARIETIES

Honey Sweet

BUCKBEE'S NEW EXTRA EARLY HONEY SWEET

The Earliest Wrinkled Sweet-Flavored Pea in Existence. READY FOR PICKING IN FORTY DAYS.

A wonderfully luxuriant grower and a splendid drought resister. The vines attain a height of 24 inches, do not require staking. Prodigious prolific, the pods are from 2½ to 3 inches long, nearly round, and are always well filled. Honey Sweet has made a splendid record for both quality and quantity on the market. It is as early as Alaska, but far superior to it in quality and yield. Postpaid, pkt. 8c; ½ lb. 25c; 1 lb. 48c.

Quantity
Prices

2 and 3

Gradius or Prosperity.

Thomas Laxton.

THOMAS LAXTON

Extra Early Large Podded Sweet Wrinkled Pea. The rival to the famous Gradius—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradius. A splendid market gardener sort, but especially recommended for the home garden. Postpaid, pkt. 8c; ½ lb. 25c; 1 lb. 47c.

NEW EARLY GRADIUS OR PROSPERITY

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradius is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3½ feet high, requiring no sticks or brush, but sticks may be used if preferred. The vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4½ to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance after cooking. Gradius is adapted to all purposes of the market gardener and does equally well in the home garden. Postpaid, pkt. 8c; ½ lb. 25c; 1 lb. 48c.

Giant Laxtonian.

GIANT LAXTONIAN OR BLUE BANTAM

A giant podded, dwarf, extra early pea. The most valuable Pea introduced in many years. This handsome new wrinkled Pea is the largest podded of all the dwarf early Peas. It grows only 12 to 13 inches high and requires no support, and has the same large pods as Gradius, even a few days earlier in season and of a little darker green color. The Peas are almost double the size of any other early dwarf Pea, are wrinkled, of bluish-green color, and have the true rich marrow flavor, tenderness and quality of the best main crop varieties. Its great earliness, the very large size and dark green color of the pods commends this variety particularly for market gardeners' use, while the unsurpassed quality makes it especially desirable for the table. Postpaid, pkt. 10c; ½ lb. 30c; 1 lb. 55c.

BUCKBEE'S "Full of Life" PEAS

CHOICEST EXTRA EARLY SWEET WRINKLED VARIETIES — Continued

LITTLE MARVEL

A New Dwarf Extra Early Pea of Unusual Value, in Enormous Demand Among Market Gardeners.

We are sure that as soon as a gardener becomes acquainted with this variety he will quit growing the old varieties like American Wonder, Little Gem, etc.

In season this new sort ripens with the American Wonder, while the pods, usually borne in pairs, are more numerous, larger and contain one or two more Peas. Its two striking features are: The beautiful dark green color of the pods and its great keeping qualities, when ready for the table staying in excellent condition for a week longer than "Nott's" or "Wonders." Little Marvel is an extraordinary cropper, and although the pods are only of medium size, it is fully as productive as most larger podded kinds. Vines 15 inches high; pods in pairs $2\frac{1}{2}$ to 3 inches long, square at bottom, jammed with 6 to 8 quite large, deep, green, wrinkled Peas, which are of luscious, sugary flavor. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 28c; lb. 50c.

SUTTON'S EXCELSIOR

An extra early dwarf, Wrinkled Pea. A very heavy cropper. Large, massive pods. Rich, delicious flavor.

As early as the Nott's Excelsior, but much more productive, with larger and broader pods. It grows about 15 to 18 inches high, and is an exceedingly heavy bearer. The pods are $4\frac{1}{2}$ inches long, very broad, square at the end, and are packed with 6 to 8 immense wrinkled Peas. It is one of the sweetest Peas grown, and is unexcelled in delicious, melting quality, and superb, rich flavor. The vines and pods are of a light green color. Now often grown for the market in place of Gradus, which matures at the same time. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 25c; lb. 47c.

McLEAN'S IMPROVED LITTLE GEM

Vines 15 inches high, covered with long pods, well filled with sweet, tender Peas. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 22c; lb. 42c.

NOTT'S EXCELSIOR

Vines larger, more productive, but a few days later than American Wonder, earlier and more prolific than Little Gem. Unsurpassed in sweetness and quality. Height, 12 to 15 inches. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 45c.

TRUE AMERICAN WONDER

Dwarf-wrinkled Pea, esteemed for earliness, productiveness, quality. Strong and robust, about 10 inches high, and produces medium large pods which contain 5 to 6 wrinkled Peas of very sweet flavor. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 45c.

POTLATCH OR BIG DINNER

The Best Main Crop Variety of Large Podded Dwarf Peas.

Potlatch is Chinook Indian for Big Dinner. The vines are sturdy and vigorous, growing about 20 inches high, with coarse and unusually dark green foliage which can be distinguished from that of other peas a quarter of a mile away. The pods, which are borne in pairs, are long, often measuring 6 inches or more. They are broad, pointed, rich dark green in color and in size and fullness fully equal to those of the Tall Telephone Pea. They contain 9 to 11 Peas, which are very large and in sweet-

ness and flavor rank with the finest. Potlatch is a wonder of productiveness and the way the Peas shell out is astonishing. On account of its large, beautiful pods, enormous productiveness, is a great favorite with market gardeners, and owing to a delicious quality one of the best for the table. Potlatch is a second early, dwarf, very large podded Pea; it has become the leading and most popular variety of its class. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 35c; lb. 60c.

Potlatch or Big Dinner.

BUCKBEE'S "FULL OF LIFE" PEAS

Second Early and Main Crop. Sweet, Wrinkled Varieties.

DAISY OR DWARF TELEPHONE

Thoroughbred Main Crop Sweet Wrinkled Peas.

The vines, though growing only about 18 inches in height, are very thick, stout and bear a big crop of large, well-filled pods. The pods average 5 to 6 inches in length, containing 7 to 9 large Peas of a light green color which are tender and sweet. Compared with the tall Carter's Telephone in size, shape and color of pods and exquisite flavor, the two varieties are alike, but the Daisy being dwarf can be grown without support and the rows of it can be made closer together and furthermore it is about ten days earlier than the tall sort. Postpaid, pkt. 8c; ½ lb. 25c; 1b. 47c.

IMPROVED STRATAGEM

High Grade Standard Dwarf Late Pea.

One of the best of the large-podded sorts. The pods are of immense size and uniformly filled with very large dark green Peas of the finest quality. The vines grow 15 to 16 inches in height. About 5 to 6 days later than the Daisy. It is vastly superior to the stocks now generally sold as Stratagem. Vines require no support. Postpaid, pkt. 8c; ½ lb. 22c; 1b. 42c.

CARTER'S TELEPHONE

Selected Stock

A Standard Large Podded Main Crop Variety in Every Market.

The Telephone has become the leading Pea with market gardeners whose trade appreciates fine appearance and high quality. Vines vigorous, growing about 4 feet high, producing an abundance of very large pods filled with immense Peas, which are tender, sweet and of excellent flavor. Foliage and pods are of light, bright green color. Postpaid, pkt. 8c; ½ lb. 25c; 1b. 45c.

ALDERMAN OR IMPROVED TELEPHONE

This comparatively new Pea is, in many respects, the very best early main crop variety of the valuable Telephone type. The vines grow nearly 5 feet high, are dark green, vigorous and exceedingly productive. Pods are very large, long, dark green. They appear a little later than those of Carter's Telephone, but are larger, often measuring 6 inches and over. The Peas are of the largest size and of unsurpassed quality. Market gardeners are demanding the large podded, dark-colored sorts, which retain their fine appearance even after shipping a long distance. The Alderman answers these requirements and furthermore is the most productive variety of this class. We recommend it unreservedly as one of the finest and most desirable for the home as well as for the market gardener. Postpaid, pkt. 8c; ½ lb. 25c; 1b. 48c.

PRINCE EDWARD OR PRODIGIOUS

This is an English strain of the Telephone type, selected and bred from the Alderman, which also belongs to that type, especially for size of the pods. Prince Edward is considered by all who have tried it the most profitable variety to grow for the trucker, and where it is known there is an enormous demand for it. This is the largest garden Pea we grow. It is truly the giant of the Pea family and is unsurpassed for exhibition purposes. In England, where it has been exhibited in the last few years at the leading shows, it has always taken the first prize. The vines grow about 6 feet in height, are of vigorous and robust habit and have dark green foliage and pods. The pods are produced in pairs and in great profusion. They attain the extraordinary length of 7 inches and upwards and are closely packed with 11 to 13 large, dark green Peas of delicious quality. Postpaid, pkt. 10c; ½ lb. 33c; 1b. 60c.

BUCKBEE'S "Full of Life" PEAS

Second Early and Main Crop; Sweet, Wrinkled Sorts—Continued

NEW EVERBEARING

The Great Continuous Everbearing Variety.

Vine stout, about two and one-half feet high, bearing at the top six to ten broad pods. If these are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The Peas are very large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. Postpaid, pkt. 8c; ½ lb. 25c; lb. 45c.

IMPROVED CHAMPION OF ENGLAND

The Standard Sweet Flavored Late Wrinkled Pea.

Very productive and universally admitted to be one of the richest and best flavored Peas. Height four to five feet; seed light green and much shriveled. Very inferior and mixed stocks of this sort are frequently offered, but when the seed is as well grown and selected as that we offer, we consider the variety equal in quality to any in cultivation and one of the best of its season, either for the amateur or market gardener.

This is the latest pea we grow; it is about a week later than Telephone. Postpaid, pkt. 7c; ½ lb. 22c; lb. 40c.

HORSFORDS MARKET GARDEN

A first-class wrinkled Pea; medium late. Height 2 to 3 feet. It is a profitable sort for market gardeners, equally good for the home table and also much used by canners. Medium-sized pods, enormously productive. Postpaid, pkt. 8c; ½ lb. 20c; lb. 38c.

YORKSHIRE HERO

The vines are stout, of medium height, about two or two and one-half feet, bearing near the top a number of rather broad pods of medium size, about three inches long, filled with large peas that remain a long time in condition for use and which never become as hard as most sorts. The peas are of fine quality and will be preferred to any other by those who like a rich, marrow-like pea. Seed large, wrinkled and flattened. Postpaid, pkt. 8c; ½ lb. 20c; lb. 38c.

Grant's Favorite.

GRANT'S FAVORITE

This fine variety of our own introduction is unquestionably the sweetest late Pea ever offered, coming into use just after the early varieties are through bearing. Luxuriant grower, from 3 to 4 feet high. The pods are of good size, and always well filled with exceptionally sweet and highly flavored Peas. It is nearly an upright grower, but will do better if staked or planted along a fence. Postpaid, pkt., 8c; ½ lb. 25c; lb. 45c.

Buckbee's New Vigorosa

THE MOST MAGNIFICENT OF ALL NEW PRODUCTIONS

Nothing like it for a second early Pea has ever been produced. It requires no support. There is no Pea more prolific. It is a leader in the market and in demand among epicures. To try it is to surely succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is **ABSOLUTELY UNPARALLELED**.

No bushing at all is required. The vines grow to be but 20 inches tall and are so stout that they bear immense crops without falling. As an enormous yielder the New Vigorosa ranks first and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases Critical Judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. Postpaid, pkt. 10c; ½ lb. 25c; lb. 45c.

BUCKBEE'S "FULL OF LIFE" PEAS

THE CREAM OF THE BEST LATE VARIETIES

THE ACKNOWLEDGED WORLD BEATERS

BUCKBEE'S MELTING SUGAR PEA Edible Pods

An excellent edible podded Pea with large sized pods, of delicious quality. This class of Peas is used in the same way as the Snap or String Beans, not being shelled, but the pod and peas all being eaten; they are picked when the peas in the pods have reached about half their full size. Pods are very large, sweet, smooth, extremely tender, so brittle that they snap, absolutely without any string and of the most delicious flavor. Vines are tall, about five feet high, and do better if supported. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 47c.

Mammoth Luscious Sugar.

MAMMOTH LUSCIOUS SUGAR

The Finest Edible Podded Pea.

These peas are not shelled, but are eaten like snap beans; the pods are stringless and are unexcelled in flavor, brittleness and sweet succulence. They may be served with butter or white sauce, and can be made ready in 10 to 15 minutes; they are good when quite old. Excellent also for pickles.

The vines grow 5 to 6 feet tall, require support; the pods are 6 to 7 inches long and $1\frac{1}{2}$ inches broad and are produced continuously for a long period in the greatest abundance. Postpaid, pkt. 8c; $\frac{1}{2}$ lb. 25c; lb. 48c.

LARGE BLACK EYED MARROWFAT

One of the largest of the Marrowfats, with a distinct black eye. Vines grow about 5 feet high; pods 3 inches long; Peas very large, smooth and round, of ordinary quality. Immensely productive. Postpaid, pkt. 6c; $\frac{1}{2}$ lb. 16c; lb. 28c.

LARGE WHITE MARROWFAT

Cultivated extensively for the Summer crop. About 5 feet high, of strong growth. Pods about 3 inches long, filled with large, round, creamy, yellow Peas. Enormous croppers. Postpaid, pkt. 7c; $\frac{1}{2}$ lb. 18c; lb. 30c.

BUCKBEE'S MAMMOTH-PODDED SUGAR MARROWFAT

The Largest Podded, Most Productive and Best Flavored of the Marrowfat Peas; a Good Variety for Late Crop.

Here is an excellent Pea for the home gardener—and a profitable shipping variety for the professional Pea Growers. Extremely prolific, outyielding any known sort. Pods are 4 or 5 inches long, completely filled with large peas of good flavor. Vines grow about 4 feet high; should be bushed for best results, although great results are obtained without. The productiveness of this variety, in large pods as well as heavy crop, is a distinctive feature of special interest and importance. Uniformity in type, large pods, and the fine, cool looking, rich, green color of the pods, giving them the highest marketable value in appearance, which is retained several days longer than pods of lighter color could be, are all points for the market gardener to figure on. We have harvested a fine crop of the choicest seed of Buckbee's Mammoth Podded Sugar Marrowfat Peas the past season and will put the price within reach of all. Postpaid, pkt 8c; $\frac{1}{2}$ lb. 25c; lb. 45c.

GROW PEPPERS, ALWAYS MONEY-MAKERS

BUCKBEE'S GREAT WEST—The giant of all. The heaviest cropper; the mildest flavor; the finest appearing; the surest to grow. The one you can't do without. Beautiful red color and of mild flavor. Our stock is limited, so order early. Large pkt 10c; ½ oz. 35c; oz. 60c; 2 oz. \$1.10; ¼ lb. \$2.00.

CHINESE GIANT—Double the size of Ruby King and equally as mild. The compact plants produce four or more extra large Peppers at the base very early in the season, which ripen while a second crop is setting on the branches. Very vigorous, hardy grower, and a valuable variety for either the home or market garden. Large pkt. 10c; ½ oz. 30c; oz. 50c; 2 oz. 95c; ¼ lb. \$1.75.

CORAL GEM BOUQUET—Plant tall, bearing a profusion of round, bright red fruit which is very pungent when ripe. The plant, when in fruit, is very ornamental. Pkt. 5c; oz. 60c.

SWEET MOUNTAIN—Plants very vigorous and productive. Fruit large, long, very smooth and handsome, being, when green, of a bright, deep green color, entirely free from any purple tinge, and mature of a rich red. Flesh very thick, sweet and mild flavored. Well suited to use for stuffed pickles or mangoes. Pkt. 5c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.15.

LONG RED CAYENNE—(The Red Hot Pepper)—A long, slim-pointed pod, and when ripe of a bright red color. Strong and pungent. Pkt. 5c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.15.

NEW PIMENTO—A new variety, absolutely without pungency. Very early. Fruits 4½ inches long by 3 inches across. It should be grown largely in the family garden because it is delicious with salads and sandwiches. The green Peppers are excellent stuffed with slaw and pickled or filled with meat and baked. It is largely used by canneries. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.00.

NEAPOLITAN—The earliest large, mild Red Pepper. Fruits about 4½ inches long by 2 inches across. Pkt. 5c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.40.

IMPROVED RUBY KING—An improved American sort, reaching the largest size, yet retaining the symmetrical shape of the smallest sorts. It is very bright colored, temptingly sweet, mild flavored, and one of the best for stuffed pickles or mangoes. Pkt. 5c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.55.

FINEST MIXED PEPPERS—The above and many other valuable Peppers in choice mixture. Price per pkt. only 5c; oz. 45c; 2 oz. 80c; ¼ lb. \$1.55.

We can also supply the following varieties:

Large Bell or Bull Nose, Golden Queen, Red Chili, Sweet Spanish for—Pkt. 7c; ½ oz. 25c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.45.

to grow for
General Purposes—I
would not hesitate
to say Buckbee's
Great West.

Buckbee's Great West Pepper

Pepper Ruby King

BUCKBEE'S "Full of Life" PUMPKINS

Buckbee's True Sugar Pie.

BUCKBEE'S TRUE SUGAR PIE

One of the very earliest and very best pumpkins. The fruits are small, round, with orange-colored skin and flesh. Remarkably prolific and an excellent keeper. The flesh is thick, fine-grained, dry, sweet, sugary, and of the finest quality for pies. It cannot be beat for table use. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 50c; lb. \$1.00.

NEW JAPANESE PIE

The earliest pumpkin, the seeds marked with curious indentations like Japanese letters. Fruits medium size, good keepers and weigh 15 to 20 pounds each. The flesh is a rich salmon, unusually fine grained. For making pies, custards, etc., they certainly have no superior. Containing but little water, can easily be cut and dried like dried apples and make excellent pies or sauce for winter use. Pkt. 5c; oz. 12c; 2 oz. 23c; $\frac{1}{4}$ lb. 45c.

New Japanese Pie.

BUCKBEE'S KING OF THE MAMMOTHS

Wonderfully grand and colossal variety, astonishing everyone by its mammoth size and heavy weight. Think of it—a single Pumpkin weighing 469 pounds! Many of our customers saw this specimen on exhibition at the World's Fair, King of Mammoths is always a prize winner at fairs and exhibitions. Notwithstanding its enormous size, it is one of the best pie and table varieties grown. A splendid keeper, and exceptionally valuable for feeding purposes. We control the complete stock of this variety. Send to Buckbee for true stock seed. We do not want seed from specimens weighing less than 200 pounds. Pkt. 10c; oz. 15c; 2 oz. 28c; $\frac{1}{4}$ lb. 50c; $\frac{1}{2}$ lb. 80c; lb. \$1.75.

BUCKBEE'S
KING OF THE
MAMMOTHS

BUCKBEE'S NEW SANDWICH ISLAND

A splendid variety, coming from a remote section of the Sandwich Islands, where by chance our representative found it. It has created a great furore in its new home. Remarkably distinct in every way, of fine size, very prolific bearer and deliciously thick flesh. An excellent keeper. Seed of our own growth. Pkt. 10c; oz. 15c; 2 oz. 28c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

WESTERN FIELD

Sometimes Called Big Tom or Connecticut Field.

One of the best varieties for field purposes, particularly desirable for stock feeding. Grows to a fine size. Color rich yellow, flesh fine grained, of good flavor. Postpaid, oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; lb. 75c. By express or freight at buyer's expense, 5 lbs. \$3.35; 10 lbs. \$6.50.

GOLDEN OBLONG

Very hardy and productive; pumpkins fifteen to twenty inches in length and eight to ten inches in diameter. Skin of a rich golden orange, thin but tough, making it almost as good a keeper for Winter as the hard shell squashes. Flesh is light golden yellow, of very rich, fine quality. Pkt. 6c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 28c; $\frac{1}{2}$ lb. 30c; lb. 50c, postpaid.

NEW CALHOUN

Fine variety, heavy and solid; very productive. Skin rich cream color, flesh salmon yellow, very thick, fine grained and of superior quality. Pkt. 5c; oz. 12c; 2 oz. 21c; $\frac{1}{4}$ lb. 40c.

LARGE CHEESE

Sometimes called Kentucky Field—Flattened fruit with broad ribs; creamy buff skin; averages 2 feet in diameter. It is an excellent keeping variety, with thick flesh of exceptionally fine quality. Pkt. 5c; oz. 7c; 2 oz. 12c; $\frac{1}{4}$ lb. 20c; $\frac{1}{2}$ lb. 30c; lb. 50c.

CUSHAW OR CROCKNECK WHITE

Creamy-white skin. Flesh yellow, solid and sweet. Popular for the table. Pkt. 5c; oz. 12c; 2 oz. 23c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

QUAKER PIE

Fine grained and of rich flavor, having none of the stringy nature common to so many varieties. It is early and keeps late. Oval shaped, tapering to the ends. Of cream color, both inside and out. Pkt. 5c; oz. 12c; 2 oz. 21c; $\frac{1}{4}$ lb. 40c.

NEW WINTER LUXURY

Fine keeper and enormously productive. It is very finely netted and in color is a golden russet. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c.

TENNESSEE SWEET POTATO

A magnificent pear-shaped variety of medium size; a little ribbed. Color creamy white. When cooked it has somewhat the appearance of sweet potatoes, but is of more delicious taste. Flesh thick, creamy white, remarkably fine grained, dry and brittle. There is no superior for making pies and custards. Hardy and productive, and keeps perfectly sound until late in the Spring. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c.

The Cream of the Extra Early Radishes

Buckbee's selected strains of Extra Early Radishes, listed on this page, are grown from transplanted roots and are the earliest and finest known. Will invariably produce roots even in size, shape, maturity with small tops, rich, bright colors and command the highest market prices.

BUCKBEE'S ROCKFORD BEAUTY

The Handsomest Radish.

Very early—only a day or two later than Rapid Forcing. Of bright scarlet color, with a large white tip covering almost one-half of the roots. Flesh crystal white, tender and crisp. This is one of the most popular Radishes grown for the home as well as for the market, being of most beautiful appearance and exquisite flavor. We control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 70c; 1 lb. \$1.25.

BUCKBEE'S RAPID FORCING

The Earliest of All Radishes.

Quick growth is one of the main essentials for a crisp and tender Radish. Buckbee's Rapid Forcing matures in about 14 days from sowing; that is several days ahead of any other variety known today. This Radish is of a fine turnip shape. It remains in good condition without getting hollow or pithy longer than any other extra early variety. The flesh is pure white, crisp and of very pleasant flavor. The skin is a most attractive bright scarlet. The leaves are very short, which admits of close sowing. Its extreme earliness, maturing before all other kinds—

its beautiful bright scarlet color, and its unusually brittle and delicious quality, make it most desirable for kitchen garden, and a source of great profit for the market gardener. Remember, that we control the entire stock of this variety. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c; 1 lb. \$1.25.

BUCKBEE'S BRILLIANT GLOBE

Buckbee's Brilliant Globe is a great improvement on the well-known Scarlet Globe, as it runs more even in shape and size, is of a richer and brighter color and is very much earlier. It will surely take the place of the older variety where known. It is well suited for greenhouse and hotbed forcing, and also for growing outdoors. It is of attractive globular form, of magnificent, glowing, bright scarlet color, and has pure white, crisp, tender and juicy flesh. We especially recommend this variety to the market gardener, but it is also one of the finest for the home garden. Pkt. 10c; oz. 15c; 2 oz. 25c; 1/4 lb. 40c; 1/2 lb. 75c; 1 lb. \$1.25.

Buckbee's New Early Red King

BUCKBEE'S CRIMSON GIANT GLOBE

Sweet, Crisp, Juicy, Mild—Wonderful Yields, Beautiful Color, Large Size.

This Radish is an entirely new type and differs radically from all varieties hitherto in cultivation, insofar as its roots attain more than double the size of other round, early varieties, without getting pithy or hollow. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh $\frac{1}{2}$ ounces each and are crisp and juicy. Fine for outdoors and forcing. The seed should be sown very thinly to permit full development of the roots. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. \$1.00.

NEW TRIUMPH

The Greatest Radish Novelty.

Both unique and useful. Matures early, generally in about 14 days. Nothing produces a more pleasing effect on the table than this beautiful variety. The roots are of globular form, tops are short and attractive, which make it valuable for cultivation under glass. The flesh is very crisp and solid and of mild, pleasing flavor. Its most attractive and distinctive feature, however, is the unique color of the skin. The ground color is beautiful ivory white, striped horizontally and splashed with bright scarlet. Sure to become popular with market gardeners and private planters. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. \$1.00.

NEW LEAFLESS

The extra early forcing Radishes lately introduced are remarkable for the small size of their leaves; they develop their roots in so short a time that the latter are practically in advance of the leaves. The character is still more noticeable in this new variety. The seed leaves, which are noted for great development from the start, are the only green parts to be seen on the plants until the bulbs are almost large enough for pulling. At that time one or two short leaves only are produced. The roots are of the shape and color of our Rapid Forcing Radish. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. \$1.00.

EARLY SCARLET TURNIP WHITE-TIPPED

For many years we have found this variety to be the most popular of all among private gardeners, and unsurpassed as a Table Radish, where, by reason of the strong, contrasting colors of the root, it makes a most attractive appearance. The flesh is crisp, white and tender, and extremely mild. Roots smooth, fine bright scarlet, with clear white tips. Very early. Very popular for planting outdoors and a splendid market variety. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

BUCKBEE'S EXTRA EARLY RADISHES**BUCKBEE'S NEW EARLY RED KING**

The Earliest and Best; Sweet, Crisp, Juicy, Mild; Wonderful Yields, Beautiful Color, Uniform Size.

This new variety is our own production and is one of the earliest ever grown—fully matured Radish being pulled on our Rockford Trial Grounds in the short space of 14 days from time seed was planted. Won favorable comment and helped to secure First Prize and Diploma at the State Exhibit at the Springfield, Illinois, State Fair. It is of small size; just right for the purpose; beautiful dark red skin; ivory white flesh; extremely mild and sweet flavor; retains its crispness even after quite old and never becomes pithy. Pkt. 5c; oz. 12c; 2 oz. 21c; $\frac{1}{4}$ lb. 40c; $\frac{1}{2}$ lb. 75c; lb. \$1.25.

BUCKBEE'S CRYSTAL FORCING

The Quickest Growing White Radish.

Without an equal. Matures in 14 days. Pure snow-white in color—fairly crystal—so clear and transparent. Nothing is more tempting and pleasing than a combination of Buckbee's Crystal Forcing and Buckbee's Rapid Forcing when arranged in market or on the table. Pkt. 5c; oz. 10c; 2 oz. 18c; $\frac{1}{4}$ lb. 30c; $\frac{1}{2}$ lb. 55c; lb. \$1.00.

VICK'S SCARLET GLOBE

Its color is a rich scarlet. It has a small top and is a highly bred Radish. A grand forcing variety and excellent for sowing outdoors. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 28c; $\frac{1}{2}$ lb. 50c; lb. 90c.

EARLY WHITE TURNIP

Very handsome; of quick growth; sweet, juicy and tender. Skin ivory white; flesh pure white. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 28c; $\frac{1}{2}$ lb. 50c; lb. 90c.

EARLY SCARLET TURNIP

The famous standard variety. One of the finest, juiciest, sweetest and best Radishes for early use grown. Rich, red color; flesh white. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 85c.

NEW ROSY GEM

Handsome Turnip Radish, a great favorite in many markets and for early planting outdoors. But little later than the preceding and will give entire satisfaction where extreme earliness is not the object. Roots slightly flattened on the underside, color very dark scarlet with a white tip; flesh white and of the best quality. One of the best, either for home or market use. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 28c; $\frac{1}{2}$ lb. 50c; lb. 90c.

New Rosy Gem.

BUCKBEE'S Long and Half Long EARLY RADISHES

EARLY SCARLET OLIVE SHAPED

This variety has a small top and is very early, making it one of the best for forcing under glass. Roots ready to pull may be had in three weeks, and they remain fit for use longer than any other early variety. They are small, true olive shaped, smooth, very deep red in color; flesh is white, crisp, tender and mild in flavor. May be planted very closely owing to their small tops. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; 1 lb. 90c.

EARLY WHITE OLIVE SHAPED

A splendid olive-shaped radish, pure white in color. Distinctly earlier than any other half long white sort. Good-sized radishes may be pulled in 20 to 25 days which are solid and crisp, of good flavor, and first-class in every respect. A splendid companion to Early Scarlet Olive Shaped. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

PARIS BEAUTY OR HALF LONG DEEP SCARLET

A brilliant deep, rich red color, changing to a pure white in the lower portion. About 3 to 4 inches long, but thicker than the foregoing variety. The flesh is very white, crisp and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; 1 lb. 90c.

Early Scarlet Olive-Shaped

Improved French Breakfast

IMPROVED FRENCH BREAKFAST

A great favorite. Beautiful bright scarlet, with pure white tip. Oblong in shape, medium size, makes rapid growth. It is a fine table variety on account of its excellent quality and attractive appearance. Fine for open ground or forcing. It matures quickly and is sweet, crisp, solid and tender. When offered for sale it quickly attracts the buyer's attention. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; 1 lb. 90c.

Cardinal or Long Brightest Scarlet

CARDINAL OR LONG BRIGHTEST SCARLET

The Earliest and Finest of Long Red Radishes

Of the same size and shape as the old and well-known Long Scarlet, but it is a few days earlier and the color is of a much brighter scarlet, with a distinctly clear white tip. It has a small top. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; 1 lb. 90c.

LONG SCARLET SHORT TOP

The Very Best Long Red Radish

Our strain of this very popular long radish is the finest to be had on the market. In it we have, without exception, the very best long, brittle, brightest scarlet radish we are acquainted with. It matures beautiful radishes, which are always brittle and sweet, 30 days from the sowing of the seed. Size and shape cannot be improved. It is undoubtedly the standard long red variety that will withstand the hot dry weather and remain firm and crisp and of fine flavor. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 45c; 1 lb. 90c.

BUCKBEE'S NEW ICICLE

The Finest of All Radishes. The Earliest of the Long White Sorts.

Ready for the table in about three weeks. The roots are perfectly white in color, long, slender and tapering in shape. They quickly grow to market size and remain tender during the entire growing period, and are quite as good when an inch in diameter as when only half an inch. The leaves are short, very few in number, and the roots can, therefore, be grown very closely together. The flesh is crisp, tender and mild in flavor. Admirably adapted for growing under glass as well as in the open ground. Excellent for market and private gardeners. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; 1 lb. \$1.00.

QUALITY
NOTHING BUT
QUALITY

Buckbee's New Icicle

BUCKBEE'S SUMMER RADISHES

Require a longer time than Early Radishes to mature, but grow larger and keep longer

New Golden Dresden.

NEW GOLDEN DRESDEN

A Favorite With Market Gardeners.

It has proved a universal favorite everywhere. Matures in less than 30 days. Flesh pure white, crisp, juicy and of the finest flavor. Skin of beautiful golden russet color. Market gardeners can either grow this variety in the open ground or force it, and be sure of an early, perfect and uniform crop. Unexcelled for the home garden. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

GOLDEN SUMMER TURNIP

Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

NEW WHITE DRESDEN

Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

GRAY SUMMER TURNIP

Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 40c; ½ lb. 75c.

Buckbee's Mammoth Celestial.

BUCKBEE'S ROCKFORD MARKET

A World Beater Among Radishes

The Best Long Radish.

The extraordinary earliness is remarkable in view of the fact that it grows to such a large size and keeps in good condition for such a long time. The shape is regular, smooth and nearly conical; it grows to a very large size about twice as long as Brightest Scarlet. In brightness of color it is quite unique, being the handsomest scarlet we have yet seen in a Radish and tipped at the end of the roots with just enough white to present an appearance. Crisp, tender and juicy. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

IMPROVED CHARTIER

A standard variety. The roots come to usable size very early, remaining hard and crisp three times as long as any other sort. Flesh, white, crisp and mild-flavored. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 80c.

NEW WHITE LADY FINGER

Beautiful in shape and the skin and flesh are pure snow white. Crisp, brittle and of rapid growth. Order early. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

WHITE STRASBURG

This grows to the largest size, but is usable when quite small, thus covering a long season. Four to five inches long and about two inches thick. Very white, crisp and tender. One of the finest of the large summer sorts. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

Buckbee's Rockford Market.

White
Strasburg.

BUCKBEE'S WINTER RADISHES

MAMMOTH CELESTIAL—Edible at all seasons of the year. It can be planted from Spring until late Fall, and keeps in perfect condition all Winter, while the other Winter Radishes are best sown not before June 15th. Roots frequently grow 14 to 18 inches in length and 6 to 8 inches in diameter, growing mostly above the ground. Skin and flesh pure paper white; very tender, crisp, juicy, mild. There is no other Winter Radish equal to it in quality. It is the most juicy, luscious of them all and it keeps its solidity, crispness and sweetness when all others have become pithy and worthless. This is a Radish to tie to and plant in every garden. Its beauty and quality will please everyone. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

CHINESE ROSE—Chinese Rose requires about fifty days from sowing to be fit for the table. It is a beautiful, showy Radish with a bright scarlet skin, growing 4 to 5 inches in length and from 1 to 3 inches in diameter. The roots are cylindrical, somewhat larger at the bottom than on top, blunt at both ends. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

CALIFORNIA MAMMOTH WHITE—Pure white about 1 foot long and 2 or 3 inches through, tapering regularly to the tip. Flesh tender and crisp. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 50c; lb. 90c.

ROUND BLACK SPANISH—The roots are from 3 to 4 inches in diameter, almost round and very black skinned. The flesh is white, very compact, pungent and well flavored. Keeps well all winter. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

LONG BLACK SPANISH—Later than the Round Black Spanish, growing 10 to 12 inches long, having a diameter of from 2 to 3 inches. The skin is black and the flesh white, firm and pungent. Keeps well throughout the winter. A favorite sort with many people. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 80c.

RADISH MIXTURES

Price each of the following varieties: Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 50c; lb. \$1.00.

EARLIEST RADISHES MIXED—For family gardens, earliest varieties.

SUMMER RADISHES MIXED—For family gardens we offer a mixture of all summer varieties.

WINTER RADISHES MIXED—Seed of the best white, black and rose-skinned varieties, which will produce all the best Radishes for Autumn and Winter use.

Chinese Rose.

SALSIFY

OR
VEGETABLE
OYSTER

BUCKBEE'S
ALL AMERICA

SALSIFY

This delicious vegetable should be more generally grown. It surpasses for table use both parsnips and carrots, acquiring, after a good frosting, a decided oyster flavor.

BUCKBEE'S ALL AMERICA—By far the Very Best Salsify—A truly American variety of the highest merit. Introduced in 1908 and sprang into immediate popularity. The largest and thickest roots of all varieties; of most superior quality, excelling by far any variety now on the market. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

MAMMOTH SANDWICH ISLAND—Of extra large size, in every way preferable to the older varieties, being larger, stronger growing, and less liable to branch. Invaluable to market gardeners. Pkt. 8c; oz. 15c; 2 oz. 28c; ¼ lb. 50c; ½ lb. 90c; lb. \$1.75.
LONG WHITE—This is a well-known and standard variety that has stood the test of time. Pkt. 6c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60.

SPINACH

BUCKBEE'S NEW LONG SEASON—Also Called Triumph—The best variety to sow in Spring and also continuously all summer as it remains firm and fresh during the hot summer months. Plants are comparatively small, of compact but prostrate growth. The leaves are thicker and heavier than those of any other sort; they are heavily crumpled and blistered, of dark green color, and do not wilt or run to seed as quickly as any other kind. Pkt. 6c; oz. 8c; 2 oz. 12c; ¼ lb. 30c; ½ lb. 35c; lb. 60c.

MONSTROUS VIOLEXY—Strong, quick grower, immense yielder, the largest spinach; the plants sometimes measure 2 feet in diameter with leaves 10 inches long and 8 inches wide at the base. Leaves handsome in appearance and deservedly popular. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 28c; lb. 40c.
PRICKLY WINTER—Very hardy and productive; slow to run to seed. For fall and spring sowing. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 17c; ½ lb. 27c; lb. 35c.

NEW ZEALAND—An exceptionally fine variety available for use during the hottest months of the year. Quite different from any other Spinach, being of branching habit. Stems and leaves are thick, fleshy, tender and succulent; in color and flavor fully equal to the best spinach. Very productive, sends out fresh growth after being cut continuously until frost. Should be in every garden. Large pkt. 6c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 35c; lb. \$1.00.

SAVOY LEAVED—Often called Norfolk Savoy and Bloomsdale. The earliest Spinach; extremely hardy; the best for fall planting, also much sown in early spring; an excellent shipper. Leaves numerous, succulent, curled, blistered and of glossy dark green color. Pkt. 5c; oz. 7c; 2 oz. 12c; ¼ lb. 30c; ½ lb. 35c; lb. 45c.

IMPROVED ROUND SUMMER BROAD-LEAF—Excellent for early spring sowing. Leaves large, thick and fleshy. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 28c; lb. 40c.

IMPROVED THICK LEAVED—Large, thick, slightly savoyed leaves. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 28c; lb. 40c.

LONG STANDING PRICKLY—Matures a little later than the round leaved sorts, but furnishes a large quantity of thick and well-flavored leaves. Prickly seed. Pkt. 5c; oz. 8c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 28c; lb. 40c.

New Zealand.

SORREL

LARGE-LEAVED GARDEN—The best garden variety, having large pale green leaves of fine quality. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c.

SWISS CHARD or SUMMER SPINACH

LARGE RIBBED WHITE—Also called Silver Beet and Sea Kale Beet—The leaves are used for greens the same as Spinach or beet tops; they are equal in quality and easier to prepare than Spinach, and far superior to beets. Nothing in the garden requires less care, and yet it yields a constant crop from July to winter and can be used all summer when Spinach is not available. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 80c.

LUCULLUS—This grand new and distinct variety is a great acquisition. The stalks are as thick and broad as Rhubarb. The plants grow to a height of from 2 to 2½ feet, and stalks are from 10 to 12 inches long and 1½ inches broad. Pkt. 6c; oz. 10c; 2 oz. 15c; ¼ lb. 28c; ½ lb. 50c; lb. 90c.

Buckbee's New Long Season.

VICTORIA—Large, exceedingly thick; dark green leaf, which is somewhat savoyed; slow to run to seed. An excellent variety. For market or the private garden. Pkt. 5c; oz. 7c; 2 oz. 12c; ¼ lb. 20c; ½ lb. 30c; lb. 45c.

Lucullus
Swiss
Chard.

BUCKBEE'S "Full of Life" SQUASH SUMMER SQUASHES

BUCKBEE'S NEW GIANT SUMMER CROCKNECK Standard Early—Splendid Quality.

Twice as large as the ordinary Crockneck, more warty and earlier. This combination makes it the most desirable for the market or private garden. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

BUCKBEE'S NEW MAMMOTH WHITE BUSH Scalloped or Improved Patty-Pan.

Great improvement over the Early White Bush. Very uniform in shape and wonderfully prolific. Fit to use very early, of a beautiful clear white color, and grows to a large size—12 to 15 inches across. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

MAMMOTH EARLY GOLDEN CUSTARD or YELLOW BUSH, SCALLOPED
Standard early Summer variety. Nice to use in its green state and valuable for making pies when it has attained full size. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

NEW FORDHOOK

This Squash is very early, but in a cool, dry place it will keep as long as a Winter Squash. The outside color is bright yellow; inside color, straw yellow. The skin is so thin that it need not be removed for cooking. The meat is thick, dry and sweet and can be used at any stage of their growth. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Buckbee's New Giant Summer Crockneck.

WINTER SQUASHES

NEW DELICATA

Rind orange-yellow, splashed and striped with dark green. The flesh is rich, dry and particularly fine. A desirable feature is its small size—not too large for an ordinary family; is wonderfully solid and heavy, the seed cavities being very small. It is also extremely early, maturing about the same time as the Summer Squashes, and for early use will doubtless supplant this class on account of its superior dryness and flavor, while its extreme solidity renders it fully as good a keeper as any of the Winter varieties. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

Delicious.

DELICIOUS

For table quality there is no other Squash that can be compared with Delicious in sweetness and richness of flavor. Excellent for Fall as well as for Winter use, keeping well until late in the Spring. The fruits are of medium size, usually weighing from 5 to 10 pounds. The rind is dark green, mottled in lighter shades. The flesh, dark orange, very fine grained and thick. Pkt. 5c; oz. 12c; 2 oz. 23c; ¼ lb. 45c; ½ lb. 80c; lb. \$1.50.

Faxon's New Brazilian.

FAXON'S NEW BRAZILIAN

It is remarkably prolific in habit; quality dry and rich, without regard to the size, coloring or time of ripening of the fruit—something entirely different in this respect from any other Squash. Its valuable points are earliness, long-keeping and high table qualities. We are recommending it to all for general use in the garden. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

PIKE'S PEAK or SIBLEY

One of the best keepers, of the finest quality. Flesh solid, thick, sweet; orange color. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Pike's Peak, or Sibley.

BOSTON MARROW

A desirable Fall and Winter variety, very popular everywhere. Of oval form; skin thin; when ripe, bright orange mottled with light cream color; flesh rich salmon yellow, fine grained, and for sweetness and excellence unsurpassed. We have an unusually good stock of this sort. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c.

Delicata.

GOLDEN WEST HARD SHELL

A Splendid Keeper.

This grand Fall and Winter Squash originated by a "cross" in a field of Hubbards and is practically "bug-resistant." Quality is delicious. Skin and flesh beautiful golden orange-red color. Big yielder. Very profitable for home or market purposes. Makes the very best baked Squash and pies. Don't fail to plant this grand variety. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 30c; ½ lb. 55c; lb. \$1.00.

MAMMOTH WHALE

The Jumbo of the Squash Family.

The Largest of All. Single specimens have grown to the enormous weight of 300 pounds. Outer color a dark olive green with stripes of lighter tinge; flesh very thick and of rich yellow color; quality good, very nutritious, making it exceptionally valuable for all family and market purposes. Profitable also grown for stock feeding. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

Mr. S. R. King, Skidmore, Mo., sends us a photograph of one vine of Delicata Squash from which he gathered 101 fruits, which proves as we claim, that Buckbee's Seeds are "Full of Life."

Mammoth Whale.

BUCKBEE'S "FULL OF LIFE" HUBBARD SQUASH

Four varieties that have been perfected until they are now absolutely unequalled

NEW GOLDEN HUBBARD

First Offered by Us as a Novelty in 1901. Now Known and Grown in Every State in the Union.

This is a true Hubbard Squash, except in color, which is bright golden. The vine is a vigorous but not rampant grower and wonderfully productive, expending the energy derived from liberal fertilizing in the production of an increased number rather than of overgrown and coarse fruits, as some varieties are apt to do. It ripens its crop very early and uniformly, thus making it a certain cropper. The fruits are very uniform in size, weighing from 6 to 8 pounds, and in shape are like the Hubbard. Though maturing early, they are wonderfully long keepers, so they can be held over in good condition for spring use. The shell is warty, hard and strong, and a very beautiful orange red color, except for a bit of olive green on the blossom end. The flesh is deep orange and uniformly so to the rind, never having the green tinge so objectionable in other sorts. It cooks very dry, fine grained and good flavored. We believe this is the best fall and winter sort yet introduced and that it deserves to and will become a most popular variety. It certainly has no superior as a table Squash. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 60c; lb. \$1.15.

New Golden Hubbard Squash.

CHICAGO WARTED HUBBARD

A Standard Variety and a General Favorite.

The leader in many markets. Our strain of the above will produce what we consider the ideal Hubbard for home or for market. For thirty or forty years this Squash has ranked first as a winter keeper. It is shipped thousands of miles in carload lots from west to east every year. With the growing of it in a large way, it was found that the largest, heaviest, dark, rough-skinned specimens are most valuable and most salable. Choicest stock seed of our own growing. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.20.

Chicago Warted Hubbard Squash.

BLUE HUBBARD or MARBLEHEAD

Good Size, Splendid Keeper, Excellent Shipper.

Without question this is one of the best fall and winter varieties; flesh bright, creamy yellow; fine grained, very dry, sweet and delightfully flavored; keeps splendidly throughout the winter. Splendid for all purposes.

The shell is hard and heavily warted. Just wash it clean, cut in half, take out the seeds, bake twenty minutes and you will have the most delicious squash you ever tasted. Splendid for pies because of its sweetness and dairy flavor. Ripens in the fall and keeps as long as Buckbee's Improved Hubbard. Pkt. 5c; oz. 12c; 2 oz. 21c; ¼ lb. 40c; ½ lb. 70c; lb. \$1.35.

BUCKBEE'S IMPROVED HUBBARD

The Famous American Standard Winter Squash.

The Grand Old Favorite—This is a superior selection of this famous variety and one of the best winter Squashes; flesh bright orange yellow, fine grained, very dry, sweet and rich flavored; keeps perfectly good throughout the winter; boils or bakes exceedingly dry and is esteemed by many to be as good baked as a sweet potato. Our stock is most carefully selected with regard to quality of the flesh and color and warts of the shell, but the latter peculiarities are largely determined by the soils in which the Squashes are raised. Our customers can plant this variety in perfect confidence that every fruit will be a pure Hubbard. Pkt. 5c; oz. 10c; 2 oz. 18c; ¼ lb. 35c; ½ lb. 65c; lb. \$1.25.

BUCKBEE'S IMPROVED HUBBARD SQUASH

PRODUCTIVE
EARLY
BEAUTIFUL
GOOD

THE EARLIEST SCARLET TOMATOES

BUCKBEE'S EARLIEST MARKET

The Earliest, Large, Smooth, Scarlet Tomato in Existence.
Indispensable to the Market Gardener. A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a larger portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Buckbee's Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent

kind also for the home garden, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1920. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; 1 lb. \$3.00.

MANSFIELD TREE OR MAMMOTH PRIZE

This wonderful variety grows from 10 to 15 feet in height, and will begin to ripen by July 4th and bear until killed by frost. Flesh firm and solid, almost seedless and of the most delicious flavor. Pkt. 5c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

CHALK'S EARLY JEWEL

The largest, smoothest, and finest flavored extra early bright red Tomato. Within a week to ten days as early as Spark's Earliana, it is even a heavier cropper, with Tomatoes of a larger size and sweeter flavor. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; 1 lb. \$2.50.

BUCKBEE'S NEW 50-DAY TOMATO

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes.

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and it should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Buckbee's Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, pkt. 10c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; 1 lb. \$3.50.

New 50-Day Tomato

BUCKBEE'S "Full of Life" TOMATOES—Scarlet Varieties—Continued

NEW EARLIANA

An extremely early, smooth, bright red Tomato of good size and flavor. Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Go to Buckbee for the earliest strain. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50

BUCKBEE'S BONNY BEST

One of the very best early Tomatoes yet introduced; within a week as early as Earliana, but a much heavier cropper, producing Tomatoes of much larger size, more attractive in shape and color. The fruits are very smooth, round, very deep, solidly meaty, with only a few small seed cells; of bright deep scarlet color and of excellent quality. The plants are very vigorous, of robust growth and fruit continuously throughout the season. Very desirable for the home garden and one of the best for market gardeners whose trade demands extra fine fruits. As a canning sort it yields from 12 to 15 tons to the acre, grading as No. 1. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

Buckbee's
New Early
Banquet

Bonny
Best

BUCKBEE'S NEW EARLY BANQUET

The Earliest and Finest Very Large Scarlet Tomato.

The most valuable variety introduced in the last 30 years.

As large and more productive and earlier than Stone, the king of all main crop tomatoes for the canner and market gardener.

This new variety which we introduced in 1918 has all the good qualities of the old Stone, it has the same large solid, smooth fruits, and its immense productiveness but it far excels it in earliness, beginning to fruit about 2 weeks earlier, hence, lengthening the bearing season.

The fruits are brilliant, bright-red, often weigh a pound and a pound and a half each and are borne in large clusters averaging six and more to the cluster; all fruits are invariably of marketable size and have flesh of the richest, brightest red color, which makes them especially suitable for canning and catsup making. Price, pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.20; ½ lb. \$2.15; lb. \$3.75.

NEW JOHN BAER

An extra early Tomato, large, smooth, bright scarlet fruits of excellent quality. Short, vigorous vines, enormously productive. Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later.

For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets.

Plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center. So freely are the fruits set that one plant usually will produce ½ to ¾ of a bushel of uniform Tomatoes in a season. Most valuable for the market gardener and very desirable for home use. Pkt. 8c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.15; lb. \$2.75.

THE NEW STONE

Buckbee's Improved Strain

A standard main crop variety of red Tomatoes. Late, enormously productive, with very large, very deep solid and very smooth fruits of splendid shape and finest quality. Unsurpassed for slicing and canning. The vines are large, vigorous and very productive. Buckbee's Improved Strain of this old and valuable variety is the finest on the market, being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00.

New Stone.

Buckbee's ^{NEW} BEEFSTEAK TOMATO

Trade Mark Registered 1914—By H. W. Buckbee, Et. Al.

BUCKBEE'S BEEFSTEAK

The King of All Main Crop Tomatoes

NOTHING in the way of a Tomato Creation has ever achieved in so short a time, the tremendously excellent reputation that has come to BUCKBEE'S BEEFSTEAK. Growers from every section of the wide world have sent in unsolicited praise, and the tests to which they have subjected it leave no room for doubt that it has all the qualities required in a Tomato. Its important features are:—Earliness, Large Size, Perfect Shape, Solidity, Handsome Color (which is rich red), Productiveness, Everbearing, Fine Flavor, Best Keeper, Splendid Shipper.

Without question—the King of All Tomatoes—and unqualifiedly Superior to any other variety grown, for market, for family use or canning. It is a sturdy healthy grower and is practically Everbearing, yielding enormous quantities of tomatoes always smooth and handsome until killed by frost. For a main crop there is no variety that can equal Buckbee's Beefsteak, and it is particularly desirable for large growers and shippers as it stands tough handling well, while its beautiful bright red color and handsome shape makes it very valuable as a market sort. It never fails to please every one, the amateur as well as the market gardener.

We supply over 150,000 of our customers with Buckbee's Beefsteak Tomato Seed annually. This speaks for itself, and substantiates our claim that Buckbee's Beefsteak is the "King of All Tomatoes," and the most extensively planted of any variety.

THE WORLD'S ONE UNBEATABLE TOMATO

We control the entire seed supply and offer the choicest "Full of Life" Seed of our own growing at the following reasonable prices. Send to Buckbee for the true "Beefsteak." Pkt. 10c; 3 pkts. 35c; ½ oz. 30c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.75; ½ lb. \$3.00; 1 lb. \$5.00, postpaid.

Ten Reasons Why You Should Plant Buckbee's Beefsteak Tomatoes

- 1—Introduced by us in 1904, and has never failed to give satisfaction.
- 2—Reputation. Less than 1000 packets were sold in 1904. Over 150,000 of our customers were pleased in 1913. This is a wonderful record.
- 3—Has been grown in every state in the Union with splendid results.
- 4—Large size; in fact, the largest smooth Tomato ever grown.
- 5—Matures early, and continues to set fruits until frost.
- 6—A splendid shipper, even when sent long distances.
- 7—Enormously productive; in fact, we claim and believe that you can raise more bushels per acre from Beefsteak than from any other variety.
- 8—Handsome color, which finds it a ready sale in any market.
- 9—Good keeper. Holds up a long time after picking.
- 10—Flavor unequalled, practically all meat, having few seeds.

True Originator's Stock Can Only Be Obtained from H. W. Buckbee

New Early June Pink.

LIVINGSTON'S GLOBE

A very beautiful second early variety. The fruits are of large size, specimens weighing over one pound have been grown from our seed, and they retain a marketable size throughout the season. Always smooth, have firm flesh and very few seeds. They will ripen evenly without any green core. The color of the skin is a fine glossy rose, tinged with purple. The Globe is exceedingly productive, the plants being literally loaded with fruit. In quality there can be nothing more desirable, flesh being mild, pleasant, and of delicious flavor. Pkt. 5c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

Buckbee's Imperial.

BUCKBEE'S IMPERIAL

Unquestionably the Most Productive of the Large Purple Tomatoes.

BUCKBEE'S IMPERIAL is fully as early as Beauty, but the fruits are much larger and heavier. They are very showy, smooth, of fine shape, beautiful, glossy, purplish crimson color, and command the highest prices in every market. The vines are hardy, vigorous and enormous croppers, single plants often yielding under field culture more than a bushel of fully grown, ripe fruits. The plants bear continuously until destroyed by frost. The flesh is firm, of the finest flavor; ripens evenly to the stem. The skin is thin but tough.

BUCKBEE'S IMPERIAL is the best purple variety to grow for the market. A splendid long-distance shipper and most desirable for the home market. Pkt. 10c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

HENDERSON'S PONDEROSA or No. 400

Shape Perfect, Size Massive, Extra Prolific, Early and Late, Finest Quality

Monster Tomatoes, the largest of all Tomatoes, often weighing 2 to 3 pounds each. The fruits are oblong in form, deep through, of rich, bright solid meat, exceptionally free from seed and unsurpassed in sweet delicious flavor; used raw or cooked; a single Tomato enough for a meal. The vines are healthy and vigorous, medium early, and bear large crops continuously until frost. Buckbee's strain is exceptionally fine, bearing smoother and larger fruits than any other one. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.00.

Ponderosa.

PINK or PURPLE TOMATOES

BUCKBEE'S NEW EARLY JUNE PINK

The Earliest Pink in Cultivation.

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.45; lb. \$2.75.

BEAUTY

We have been perfecting this to a larger, smoother fruit than the original stock, and think we have made it one of the smoothest and best of the large purple sorts. Fruit large, uniform, very smooth; color purplish pink, flesh light pink, excellent flavor. The vines are large, vigorous, not subject to rust or blight and bear enormous crops until killed by frost. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.15; lb. \$2.25.

BUCKBEE'S "Full of Life" TREE TOMATOES

The so-called Tree or Bush sorts are the most valuable Tomatoes for the home garden, where room is generally short, as they grow stiffly erect and have close, heavy foliage, allowing very close planting. Even if set as close as 12 x 24 inches apart they will produce an abundant crop. All of these varieties are very productive and of the finest quality.

Buckbee's Tree or Station Tomato.

EARLY DWARF CHAMPION—Very early; hard to beat for home use. Color purplish pink. Fruit smooth, symmetrical, solid and meaty. Pkt. 3c; oz. 35c; 2 oz. 65c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

BUCKBEE'S WORLD'S FAIR—The fruit is a beautiful golden yellow shade, good size, round and solid, with few seeds; flesh meaty and very sweet and mild. A handsome table sort. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.00.

BUCKBEE'S EARLY PROSPERITY—Prosperity is a Tomato of sterling worth, one that is bound to please. It is the earliest of the Tree Tomatoes, with large, perfect fruits; a **SPLENDID KEEPER**, AN **ENORMOUS YIELDER** AND **FINE SHIPPER**. **COLOR BRIGHT SCARLET RED**. Invaluable for the home garden, market garden or for shipping purposes. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.15; ½ lb. \$2.00; lb. \$3.50.

BUCKBEE'S NEW TREE or STATION

This New Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink and it is always round, smooth and symmetrical. Size medium, table quality superior. A good shipper. Pkt. 6c; oz. 28c; 2 oz. 50c; ¼ lb. 55c; ½ lb. \$1.70; lb. \$3.00.

NEW DWARF PONDEROSA

A cross between Dwarf Champion and Tall Ponderosa. The fruits are glossy, purplish-red, with solid, meaty, bright-red flesh; no core and but few seeds. They are fully as large as those of the Tall Ponderosa. Plants grow about 2 feet high, stocky and branching, bearing Tomatoes in great clusters from July until frost. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

DWARF STONE—The largest fruited dwarf tree sort, excepting Masterpiece and Dwarf Ponderosa. The fruits are very similar to New Stone in color, shape and size. They often weigh a pound each and more, are of a bright scarlet color, very smooth, firm and of excellent quality. Pkt. 5c; oz. 25c; 2 oz. 40c; ¼ lb. 70c; ½ lb. \$1.30; lb. \$2.50.

New Dwarf Ponderosa.

BUCKBEE'S NEW MASTERPIECE TOMATO

The Tomato that will surprise you for large size, handsome shape, beautiful rich crimson-purple color, thin and tough skin, solid meaty flesh, small seed cells with few seeds; rich appetizing flavor; smooth, clean fruit that does not crack, no hard or green core, and the true dwarf tree type; plants well balanced, strong and vigorous, phenomenally productive, bearing regular sized fruits con-

tinuously until frost. In fact, New Masterpiece is the acme of perfection in the Tomato family, the largest fruiting and best all-around dwarf growing sort. We have no hesitancy in offering "New Masterpiece" as a candidate for public favor, knowing a trial will convince the most skeptical it is the Tomato of Supreme Excellence.

We control the entire stock of this variety. Price, pkt. 8c; oz. 35c; 2 oz. 60c; ¼ lb. \$1.15; ½ lb. \$2.00; lb. \$3.50.

BUCKBEE'S "FULL OF LIFE" YELLOW TOMATOES

New Golden Ponderosa.

Fruit of all colors, green, white, lemon, pink, orange, yellow to deep ruby-red, borne on the same plant in wonderful abundance. Showy and attractive beyond description. Plant dwarf, stout, upright with novel foliage. Fruit large with more solid flesh and less seed cavity than any other. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

NEW GOLDEN PONDEROSA

A splendid novelty. Equals its famous parent, the red Ponderosa, in every respect but color. It possesses its large size, heavy meat and luscious quality, and in addition is of a striking rich golden yellow color, making a novel and most attractive table effect, especially when served sliced with a red variety. This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size, contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25.

BUCKBEE'S GOLDEN PRIZE

New golden yellow sort. Flesh thick and of extra quality. Produces enormous crops of quite large fruits. Even if you should be prejudiced against a yellow sort, this will please you. Pkt. 6c; oz. 28c; 2 oz. 50c; ¼ lb. 95c; ½ lb. \$1.70; lb. \$3.00.

SEE also BUCKBEE'S WORLD'S FAIR on page 82

CHILD'S RESPLENDENT—THE NOVELTY TOMATO

MIXED TOMATO SEED For the benefit of many customers who would like to try all kinds, we offer this mixture of many sorts. Pkt. 5c oz. 25c; 2 oz. 40c; ¼ lb. 75c.

SMALL FRUITED TOMATOES

Buckbee's Snowball.

CURRENT RED—Extremely small, exquisite flavor. Pkt. 5c; oz. 25c.

CHERRY RED—Fruit small, about five-eighths of an inch in diameter; perfectly round and smooth. Fine for pickles and preserves. Pkt. 5c; oz. 30c.

CHERRY YELLOW—Differs from Red Cherry in color only. Pkt. 5c; oz. 30c.

PEACH NEW ROSE—A most delicious and handsome Tomato with appetizing, fruity flavor not met with in any other variety. Pkt. 5c; oz. 25c.

BUCKBEE'S SNOWBALL. The New White Tomato—A grand new variety of recent introduction, which always gives the best of satisfaction. Color is pearly white inside, skin nearly the same shade, flavor unexcelled, flesh firm and solid. Almost a continual bearer, coming into fruit early and yielding throughout the season an abundance of fine Tomatoes which are 1½ inches in diameter, round and smooth. No better variety can be found for table, pickling or canning purposes. Pkt. 5c; ½ oz. 25c; oz. 40c; 2 oz. 75c; ¼ lb. \$1.25.

PEACH NEW YELLOW—Same as New Rose Peach, but lemon-yellow. Pkt. 5c; oz. 25c.

PEAR RED—Bright red, excellent flavor. True small pear-shaped. Pkt. 5c; oz. 25c.

PEAR YELLOW—Solid flesh, of excellent flavor. True small pear-shaped. Pkt. 5c; oz. 25c.

PLUM YELLOW—Fruit 2 inches long, 1 inch across, with yellow skin and flesh. Pkt. 5c; oz. 25c.

RED PLUM—Same as Yellow Plum except color. Pkt. 5c; oz. 25c.

Yellow Pear.

STRAWBERRY HUSK OR WINE-LEAF CHERRY—The fruit has a pleasant strawberry-like flavor and is much relished raw, but generally used for preserves, for which it is excellent. The small yellow fruits are enclosed in a husk, and when ripe are half an inch in diameter. Easy to grow, do well on any dry soil. Plants of low spreading growth; immensely productive. Pkt. 5c; oz. 30c.

MAMMOTH PURPLE GROUND CHERRY—Large fruits 1½ to 2½ inches in diameter. The flesh is green, the color of the skin is green, changing to a purple. When made into preserves has the appearance of Green Gages. Pkt. 5c; oz. 30c.

Strawberry Husk.

Golden Fig Tomato.

GOLDEN FIG—The illustration shows its exact shape and habit of producing fruit in numerous clusters. It is wonderfully productive, yielding double that of other sorts. Makes pickles and preserves of finest quality. Pkt. 5c; oz. 30c.

BURBANK'S NEW GRAPE—In habit of growth much like a Grape. The fruit is small, round, scarlet. ¾ inch in diameter, of unusually sweet, rich flavor. The plants are of dwarf, stocky growth, with small, dark green potato-leaf foliage and bear their fruits in very long clusters. Pkt. 6c; 3 pkts. 15c; ½ oz. 35c; oz. 60c.

WE CAN also supply the following well-known varieties at the following reasonable prices:

FOR TOMATO PLANTS, SEE PAGE 88

Buckbee's Pedigree Tobacco Seed

Newest and Best Varieties

Imported Sumatra.

CIGAR VARIETIES

VUELTA DE ABAJO—The finest, silkiest and highest flavored Havana Tobacco grown. Pkt. 10c; ½ oz. 40c; oz. 75c.

IMPORTED SUMATRA—Makes high-grade cigar wrapper and brings a high price. Pkt. 10c; ½ oz. 75c; oz. \$1.25.

BIG HAVANA—An Americanized Havana used for cigar purposes; sometimes used as a manufacturing sort. Large, long leaf; very early, making two crops in the south from one planting. Pkt. 5c; oz. 60c.

BRAZILIAN—Makes excellent cigars and delightful aromatic pipe smoking Tobacco. Pkt. 5c; ½ oz. 35c; oz. 60c.

COMSTOCK SPANISH—Sometimes called Zimmer's Spanish. The standard variety for cigar leaf. More extensively grown in this country than any other kind for this purpose. Most popular kind grown in Wisconsin. The leaf is good sized and is suitable for wrappers and fillers. We have the finest strain in the country. Pkt. 5c; oz. 60c.

CONNECTICUT SEED LEAF—Popular in the middle and northern states. Largely grown for fillers. Productive, robust habit. Pkt. 5c; oz. 60c.

CUBAN SEED LEAF—Grown from imported stock; is acclimated and makes fine tobacco. Pkt. 5c; ½ oz. 35c; oz. 60c.

EVANS OR CINNAMON SCENTED—Highly aromatic; extensively grown in Canada for pipe tobacco. Pkt. 5c; ½ oz. 25c; oz. 60c.

GENERAL GRANT—One of the finest, earliest and most popular kinds for Cigars. Matures as far north as Canada. Leaves large. Pkt. 5c; ½ oz. 40c; oz. 75c.

IMPORTED HAVANA—The finest Cuban stock, imported from the famous Vuelta Valley. Pkt. 5c; ½ oz. 40c; oz. 75c.

PENNSYLVANIA SEED-LEAF—The best grown in the famous Lancaster County district. Pkt. 5c; ½ oz. 35c; oz. 60c.

TURKISH—Leaves broad, of fine texture and excellent flavor. Makes the very finest of high-grade Cigars. Pkt. 10c; ½ oz. 60c; oz. 85c.

SELECT VARIETIES

BRADLEY BROAD LEAF—A popular variety for several types — export, manufacturing and Cigars. A good, reliable variety and succeeds where yellow Tobacco can be grown. Pkt. 5c; oz. 50c.

IMPROVED GOLD LEAF—The best bright Tobacco on the market. It is fast replacing all other varieties. Leaves long, broad and of very fine texture. Pkt. 10c; ½ oz. 35c; oz. 60c.

IMPROVED HESTER—Adapted for wrappers, cutters, fillers or cigars. Leaf large, broad, silky; very tough; cures lemon-yellow. Pkt. 5c; oz. 60c.

Imported Havana.

Comstock Spanish.

Turkish.

IMPROVED LONG-LEAF GOOCH—For cutters and wrappers. Has long leaf of fine texture and makes fine, bright Tobacco. Pkt. 5c; oz. 60c.

IMPROVED WHITE BURLEY—This variety is especially valuable to manufacturers, either for cut or plug Tobacco. Often used for wrappers. Leaf large, broad; cures a very desirable color. Pkt. 5c; oz. 50c.

IMPROVED WHITE STEM ORONOKO—Fine for wrappers, cutters and smokers. Bright leaf of good width and length. Pkt. 5c; ½ oz. 35c; oz. 60c.

IMPROVED YELLOW ORONOKO—For yellow wrappers, cutters and smokers. Cures easily a bright color, or can be cured for dark filler. It has good width and fine length of leaf. Pkt. 5c; oz. 50c.

KENTUCKY YELLOW—A very fine, large, broad-leaved Tobacco, suitable for strips, dark fillers and wrappers. Pkt. 5c; oz. 50c.

NEW CONQUEROR—One of the best Tobaccos for wrappers and cutters. Of a beautiful oval shape and makes the finest bright quality leaf. Pkt. 5c; ½ oz. 30c; oz. 50c.

WARNE—A new variety for yellow wrappers. It is tough, silky; makes the finest quality leaf. Pkt. 5c; ½ oz. 50c; oz. 50c.

STANDARD VARIETIES

BEATS ALL, OR LACKS—A heavy, dark type and makes a splendid mahogany. Good texture for dark wrappers and fillers. Pkt. 5c; oz. 50c.

BLUE PRYOR—A large, long and broad leaf. Makes a rich, waxy Tobacco for black wrappers, strips and fillers. Pkt. 5c; oz. 50c.

FLANNAGAN—Greatly used for making sweet fillers and mahogany wrappers. Pkt. 5c; oz. 50c.

ONE SUCKER—A dark manufacturing sort; good breadth, long leaf and good, rich quality. Pkt. 5c; oz. 50c.

STERLING—Early; makes silkiest of wrappers, brightest of cutters and sweetest of fillers. Pkt. 5c; oz. 50c.

IMPROVED SWEET ORONOKO—Makes the finest fillers known. Cures a rich red, long and narrow leaf, tough and waxy. Pkt. 5c; oz. 50c.

TENNESSEE RED—Excellent for dark strips. Pkt. 5c; oz. 50c.

TUCKAHOE—Long leaf and extra fine; the perfection of a wrapper. Pkt. 5c; oz. 50c.

YELLOW MAMMOTH—A new western variety of the export type. Large yield that demands top prices. Pkt. 5c; oz. 50c.

YELLOW PRYOR—Makes a fine wrapper, cutter, filler or smoker. Pkt. 5c; oz. 50c.

Improved White Burley.

General Grant.

BUCKBEE'S BEST TABLE TURNIPS

Buckbee's Extra Early Cameo.

Buckbee's Extra Early Cardinal.

Extra Early Purple Top Milan.

EXTRA EARLY VARIETIES

EXTRA EARLY PURPLE TOP MILAN

The very earliest Turnip grown. The tops of this variety grow very small and are distinctly strapleaved, growing very erect and compact. The roots are small and flat Turnip-shaped; skin purple on top of the root, clear white below. Flesh white, of mild sweet flavor. Pkt. 5c; oz. 15c; 2 oz. 28c; $\frac{1}{4}$ lb. 50c; $\frac{1}{2}$ lb. 90c; lb. \$1.75.

BUCKBEE'S EXTRA EARLY CAMEO

A grand acquisition from the land of the Czar, identical with Buckbee's Cardinal in every way except color, which is a beautiful pearl white. By all means include it in your order. Pkt. 5c; oz. 12c; 2 oz. 23c; $\frac{1}{4}$ lb. 45c; $\frac{1}{2}$ lb. 80c; lb. \$1.50.

BUCKBEE'S EXTRA EARLY CARDINAL

Called by some Scarlet Kashmir—Very early variety, of magnificent shape, handsome appearance and wonderful keeping qualities. Outside skin brilliant cardinal red color, resembling a radish; the flesh is white, tender, crisp, of splendid table quality. It keeps well. Pkt. 5c; oz. 15c; 2 oz. 28c; $\frac{1}{4}$ lb. 50c; $\frac{1}{2}$ lb. 90c; lb. \$1.75.

EARLY VARIETIES

EARLY SNOWBALL or SIX WEEKS

The earliest round variety. Roots of medium size, smooth, very beautiful and showy. Skin and flesh snow white. Very mild and sweet. Pkt. 5c; oz. 10c; 2 oz. 15c. $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 50c; lb. 95c.

BUCKBEE'S RED or PURPLE TOP STRAP LEAF

There is probably a larger amount of seed of this variety sown annually than any other turnip. As a market variety, without doubt the peer of all. Has single tap root and a bright purple top. Matures 8 or 9 weeks from sowing. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 45c; lb. 80c.

NEW GOLDEN GLOBE

Most delicious and sweetest of all yellow fleshed turnips, very superior for all general purposes. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 50c; lb. 95c.

NEW WHITE EGG

This is certainly one of the very choicest and finest varieties, producing beautiful egg-shaped roots with thin white skin. They are always firm, solid and of sweet flavor. A most profitable market sort. Pkt. 5c; oz. 10c; 2 oz. 15c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 50c; lb. 95c.

SELECT TABLE TURNIPS

BUCKBEE'S BEST TABLE TURNIPS—Cont'd.

Cow Horn.

Cow Horn

Sometimes called Long White. The roots are long, carrot-like, of cylindrical form but ending in a point and slightly crooked; they are 12 to 15 inches long by 2½ inches in diameter and grow partly above the ground. The color is pure white with a little shade of green on top. Well flavored and of rapid growth. Fine for Fall and early Winter use. Very valuable also as a soil enricher; can be sown broadcast in Fall on stubble ground, will grow on poor, worn-out soils, and if plowed under will enrich it as much as a crop of clover. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

Improved Early Flat White Dutch

Excellent early garden variety and very much used. The roots are of medium size, very flat and the color white. Very early, sweet and tender. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

New White Flat Strap Leaf

Identical with Buckbee's Red or Purple Top in valuable qualities, differing only in color, which is a beautiful ivory white. The leaves are few and grow upright. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

Yellow Aberdeen

A turnip of high merit. Very hardy, very productive; medium sized roots; late maturing. Unequalled for its long keeping qualities. The flesh is yellow, tender, sugary and very solid. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

Southern Seven Top

Cultivated extensively and with profit in the South for the tops, which are used and are most excellent for greens. It is very hardy, will grow all Winter, but will not produce a good root. In many sections of the South it is also a favorite green feed for stock, and its use as a pasture crop like rape is quite general. Pkt. 5c; oz. 8c; 2 oz. 15c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c.

New Purple Top White Globe

A globular variety, very even in shape and of beautiful appearance. The flesh is white, of excellent quality and desirable for table and stock. Immensely productive, much more so than any flat variety. This variety is a good keeper and a fine market sort. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c.

New Purple Top White Globe.

THE BEST RUTA BAGAS

For Feeding Stock in Fall and Winter there is nothing superior to Turnips and Ruta Bagas.

IF SOWN the first of August RUTA BAGAS make an excellent pasture for sheep during the Fall months, and the root will furnish a rich food for them all Winter. All kinds of stock relish and fatten upon them when fed in combination with hay.

Buckbee's Giant This is the finest of all Swedes, and a variety that should be sown in preference to all others.

Prize Winner Everywhere. This magnificent Ruta Baga, which we first offered in 1890, is unquestionably the most profitable to grow of all Swede Turnips. It is the largest of all, growing to much greater size than the American Purple Top variety, which is so much used in this country; it out-yields all other sorts; a crop of a thousand bushels and over per acre under careful cultivation, being a frequent occurrence; it is the most hardy of all Ruta Bagas withstanding cold and drouth better than any other sort.

Roots are somewhat oval or slightly oblong in shape; purplish red above and bright yellow below the ground. They are quite smooth with but a small tap root and have a small top and very short neck and remain sound and good indefinitely. Flesh is of a beautiful yellow color, always sweet, tender, juicy and nutritious. Price: Pkt. 10c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 70c; 1 lb. \$1.00.

New Monarch or Elephant

Very popular and is certainly a grand variety. Produces large, tankard shaped roots, with small necks, relatively small tops; skin dark purple above ground, yellow below. Flesh rich yellow, fine grained; of the best quality. It's easy to harvest. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 50c; 1 lb. 95c.

Improved Purple Top Yellow

This magnificent Swede is the result of judicious selection; very hardy, productive and nutritious. A large, purple top, yellow variety. Shape slightly oblong. Produces heavy weight per acre. Sweet and good keeper. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 50c; 1 lb. 90c.

Buckbee's Mammoth White Russian

One of the grandest sorts. Grows very large with single tap root, small top, short neck. Strong constitution; certain cropper. Will stand severest weather. Produces a very heavy weight per acre. Flesh white, hard, sweet, of better flavor than most yellow sorts. Fine for table and stock. Keeps sound till late Spring. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 85c.

WONDERBERRY PLANT,
THREE MONTHS FROM SEED.

The Sunberry or Improved Wonderberry

THIS IS WITHOUT QUESTION LUTHER BURBANK'S GREATEST PRODUCTION; A LUSCIOUS BERRY THAT MAY BE GROWN

AND RIPPENED FROM SEED IN ANY SOIL OR CLIMATE IN THREE MONTHS.

Fruit more like a great, rich, luscious blueberry than anything else. Blue-black in color, fine in flavor and unsurpassed for eating raw, cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced, and equally valuable for the North, South, East or West, or, in short, any part of the world. Easiest plant in the world to grow. Succeeding anywhere and yielding great masses of rich fruit all Summer and Fall. The greatest boon to the family garden ever known. Everybody can have this grand fruit at small expense, as one or two packets of the seed will be sufficient for any ordinary garden and produce all the fruit wanted. **THE QUALITY** of the Sunberry or Improved Wonderberry is sweet and delicious when fully ripe. Like the grape it should have time to ripen well after turning black in full sun. Skin, which may seem a little tough in a raw state, cooks tender. Seeds small, one-quarter the size of Tomato seed, and cook soft, and are not noticeable.

PRICE OF SEED: Pkt. 10c; 3 pkts. 25c; 1/2 oz. 40c; oz. 75c.

PRICE OF PLANTS. We can supply a limited number of nicely started plants at 10c each; 3 for 25c; 75c per doz. postpaid.

Strawberries from Seed

BRAZILIAN EVERBEARING

It will begin to bear fruit in about four months after seed is sown and continues to produce fruit until very late in the fall. Seeds sown in April will give ripe berries in July. The berries are not as large as the standard varieties, but are of superior quality and have the rich wild Strawberry flavor. The plant is everbearing in the true sense of the word, producing fruit all summer, and comes perfectly true from seed. It also makes a beautiful pot plant, will grow well in the house, and even fruit during the winter. Perfectly hardy everywhere and easy to grow. A packet of seed should produce 40 to 50 plants. Pkt. 10c; 3 pkts. 25c.

The Best Herb Plants

(See Page 39 for Herb Seed)

Peppermint.—From the leaves of this plant is distilled the well known peppermint of commerce. The green leaves and stems have the same effect as the essential oil, and to most persons the flavor is very pleasant. Hardy Perennial. Strong plants, each, 15c; 2 for 25c.

Spearmint.—The plant which produces the mint of the markets and largely used for culinary purposes. It is also used in concocting the refreshing Mint Julep, so popular in some sections. Hardy Perennial. Strong plants, each 15c; 2 for 25c.

Holt's Mammoth Sage (Hardy and Everlasting).—Holt's Mammoth is a great improvement upon the ordinary Garden Sage; its leaves being four to five inches long, clean and perfect. They are held well up from the soil, are rich in flavor and of great substance. Perfectly hardy; does not produce seeds. Each, 15c; 2 for 25c; Doz. \$1.25.

Tarragon or Estragon.

The True Tarragon.—The leaves and young shoots of which are much prized by many as an ingredient in soups, salads, stews, pickles, etc. Leaves may be used in a fresh state, or cut in the Autumn and dried. Hardy Perennial. Strong plants, each 20c; 1/2 for 50c.

Holt's Mammoth Sage.

Lavender.

Lavender (Old-Fashioned Sweet)—The leaves are sometimes used for seasoning, but the plant is chiefly grown for its fragrant flowers which are used for the distillation of Lavender Water or dried and used to perfume linen. Hardy Perennial. Strong plants, 20c each; 3 for 50c.

BUCKBEE'S RELIABLE VEGETABLE PLANTS

DOZENS BY MAIL POSTPAID; HUNDREDS AND THOUSAND LOTS BY EXPRESS AT BUYER'S EXPENSE.

It is important that you send your order in early so that we can reserve our best plants for you; to be shipped as soon as ready. We can only supply the varieties of vegetable plants listed on this page.

Buckbee's Frost Proof Cabbage Plants Will Double Your Profit, Why?

There are a number of sea islands along the South Carolina sea coast where the soil and climatic conditions are just suited for growing tough, hardy Cabbage plants during the winter and early spring. The seed is planted in the open field in the months of October, November, December, January and February. The plants make a slow but steady growth, until at 8 to 10 weeks of age they are very tough and hardy, the buds are purple and the outer leaves a reddish brown. When in this condition they can be shipped to territory farther north and planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants could be planted. These frost-proof Cabbage plants will stand a temperature of 8 to 10 degrees above zero without injury; the land freezing, or the plants being covered with ice, sleet or snow after they are planted will not injure them.

The top of the plant does not grow until your regular spring weather opens up, but the roots grow from the time they are planted and just as soon as spring weather starts, the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed Cabbage 10 days to two weeks sooner than you can mature them from hot bed and cold frame plants. You know what the difference in profit will be if your crop is matured and marketed before the general crop from home-grown plants is matured.

To get the advantage of these frost-proof Cabbage Plants they must be planted a month or six weeks earlier than you would plant home-grown plants.

Our Cabbage Plants are grown from the best Long Island grown seed and are shipped direct from our growing station in South Carolina by mail or express. We can fill orders from December 1st to April 15th. Owing to present congestion of all transportation, our responsibility rests upon delivery to transportation company.

The plants will be somewhat wilted and have a hard, stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the results.

Can supply only the following varieties of frost-proof Cabbage Plants: Early Jersey Wakefield, Charleston or Large Wakefield, Early Jersey and Early Flat Dutch.

Plants packed 500, 1,000 or 2,000 to the crate. Ordered in these quantities, they weigh about 25 pounds per 1,000 crated for shipment, and can be shipped to any point where they will arrive within four or five days. No plants shipped C. O. D.

Prices: By Mail, Postpaid, 50c per 100. By Express, purchaser paying charges, 50c for \$1.50; in lots of 1000 to 4000 @ \$2.15 per 1000; in lots of 5000 to 9000 @ \$2.05 per 1000; in lots of 10,000 and over @ \$1.95 per 1000.

Asparagus Roots (See page 4)

Mrs. A. L. Wood, Thurman, Neb., writes: I received the Sweet Potato Plants by mail in the best of condition. Thank you for your promptness.

Robt. G. Martin, 952 S. Cooper St., Memphis, Tenn., writes: I received the order of Plants all O. K., and must say, you certainly know how to ship plants. They look as fresh as if they had just been taken out of the bed.

Mrs. H. P. Henrickson, Box 73, Ulen, Minn., writes: I received the plants in good shape and was well pleased with them.

Mrs. Grace Hyde, Springfield, Tenn., writes: The plants I received from you arrived in fine condition.

Rhubarb Roots (See Page 62)

Mrs. W. J. Hutchinson, Caspiana, La., writes: Thank you very much for the splendid plants you sent me. I am sure they will all grow.

Mr. L. Sierra Horcasitas, Loma del Ray, Tacubaya, Mexico, writes: The plants you sent me some days ago by Wells-Fargo Express came in satisfactory condition. I am very much pleased with them and congratulate you for your skillful manner of packing plants to long distances. Notwithstanding the plants were delayed seven days in transit they reached me fresh and green. Sure to live.

BUCKBEE'S "Full of Life" Farm Seeds

SPECIAL NOTICE

For lowest market prices on Farm Seeds, Potatoes and Onion Sets in Bulk, see back page of order sheet, and if the 10-day limit has expired before you are ready to order, send for new list, which will be mailed promptly on request.

BARLEY

SUCCESS BEARLESS BARLEY

This is the earliest Barley known. It is six-rowed and beardless. The absence of beards makes it much more agreeable to handle in threshing and also makes it a safer and better feed for stock than bearded varieties. It is well known that many young pigs are lost annually by choking on Barley heads. This beardless Barley is without question the best nurse-crop which we have. It stools much less than other Barley or Oats, rarely lodges, and forms so little shade that it never injures a meadow, furthermore being a very early variety, it can be cut and put out of the way before Wheat and Oats. It can be grown on any soil. Makes good yields on poor, thin lands and stands up well and yields big crops of 50 to 75 bushels on rich land. Success Beardless Barley is a vigorous grower; has strong straw and heavy, well-filled heads. The grain has hulls like common Barley and its quality is excellent.

Prices, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

ODERBRUCKER or WISCONSIN No. 55 BARLEY

A stiff-strawed, heavy-yielding, six-rowed, bearded variety. It is about the same as Manshury in time of maturity, manner of growth and general appearance, but has a plumper kernel and weighs more to the measured bushel. It has protein content of 15 per cent, or nearly double the amount of protein found in many other varieties. This makes it a very valuable feeding Barley, which is an important consideration with the leading farmers and stockmen, who are now appreciating more and more the value of Barley as a food for all kinds of stock, horses as well as cattle. Prices, postpaid, per lb. 25c; 3 lbs. 70c.

SHEET

NEW WHITE HULLESS BARLEY

This Barley is hullless and beardless. The kernels shell out without the hulls and are very pretty, plump, of oval shape and pure white. It is a very early variety, ripening before the bearded varieties. It can be sown, therefore, after all other grain is planted and it will yet ripen before oats and wheat. In the western states it is often sown as a catch crop. It is not a malting Barley. Can be used for feeding only, but as a fattening feed, especially for hogs, it has no equals, making sweeter meat and nicer lard than corn. For horse feed it is best mixed with oats and the two ground together. It is also very valuable for feeding poultry. This Barley is of the greatest value for the western and northern sections where corn does not do well and is used in its place there for feeding. It is often grown for hay and should be cut just before it becomes ripe, while the straw is green, and in this condition it is relished by all stock. It yields well on poor land and makes enormous crops on good land. It is the heaviest yielding Barley known; 70 to 80 bushels per acre are average yields, and the grains weigh from 60 to 63 pounds to the measured bushel. Prices, postpaid, pkt. 10c; lb. 35c; 3 lbs., 95c.

Success Beardless.

WISCONSIN PEDIGREE BARLEY

The Champion Barley of the world. The greatest of all six-rowed bearded varieties. Wisconsin Pedigree Barley has yielded from 5 to 20 bushels more than common varieties, and many have reported yields from 35 to 65 bushels per acre. The average yield of it in Wisconsin for 5 years has been 36½ bushels per acre and the average yield of common varieties 30 bushels during the same time. Pedigree Barley grows taller than any other six-rowed sort and has very stiff straw, which stands up better than that of Oderbrucker. The heads are unusually large and long and are completely filled out with very plump grain, which is very uniform in size, brighter and whiter than that of most other sorts and very attractive. Postpaid, pkt. 10c; lb. 25c; 3 lbs., 70c.

MANSHURY BARLEY

We believe this to be as fine a Barley as was ever offered the farmers of the United States. It is a variety which will yield plump grains as well as strong, stiff straw and long, well filled heads. In quality no other Barley equals it. It yields abundantly. It is early and very vigorous in growth. The straw seldom lodges. Postpaid, pkt. 10c; lb. 25c; 3 lbs., 70c.

Wisconsin Pedigree Barley.

SOY AND SOJA BEANS

Soy Beans are fast becoming a leading crop in all states of the Union. They can be grown as far north as corn and are always a sure, safe and profitable crop. Soy Beans grow erect, branching out in 4 to 6 stems near the ground, which attain the height of 2 or 3 feet. The branches are thickly covered with leaves and pods from the ground to the top. On a single plant, as many as 200 pods, containing from 3 to 4 beans each, have often been counted.

They are more drought and heat-resistant than alfalfa, grow on all soils, even on sandy and acid ones where clover fails. Growing erect, they can be easily cultivated and harvested.

Soy Beans are mostly grown for grain. This grain is equal in feeding value to oil meal and contains 3½ times as much protein and fat as Corn or Oats.

Soy Bean hay is richer in protein than alfalfa and twice as nourishing as millet hay. Soys are largely used as a catch crop and can be sown as late as July.

As a selling crop, Soy Beans are also quite valuable, but being very rich, they are best mixed with Podder Corn, Millet or Sorghum. Soy Beans make a splendid hog pasture that can be used 6 to 8 weeks after seeding.

For Ensilage, Soy Beans are mostly used in combination with Corn or Japanese Millet, which makes the best of all ensilages, containing all the elements necessary for a completely balanced food for milk cows and is greedily eaten by all stock. If the right varieties are used, Corn and Soy Beans may be planted the same time, but the Japanese Millet being much earlier than Soy Beans, should be sown 4 to 5 weeks later. Use 2 parts of Japanese Millet or Corn to 1 part Soy Beans for a perfect balanced ration. Corn and Soy Beans for ensilage are usually grown separately, but if sown together, at the rate of one-third beans and two-thirds corn, they also give splendid results. When Corn and Beans are grown together in the same rows there will always be a gain of from one to two tons of silage per acre over corn grown alone.

The sowing of Soy Beans in corn when intended for hogging down can be especially recommended; it has been a great success everywhere. In a trial at the Iowa Station, pigs hogging down Corn and Soy Beans gained 30 per cent more than those pastured on corn alone.

Soys are used with great profit as soil renovators, and are especially valuable on sandy soils. When the entire crop is plowed under they will add to the soil such a quantity of nitrogen alone which, in the form of commercial fertilizer, is worth over \$18.00 per acre. This is twice as much as a crop of Cowpeas or Clover will furnish. Soys will produce a crop without inoculation, but inoculated plants produce larger crops. It always pays to inoculate. We offer artificial soil inoculation for Soys on page 40.

Sow the seed about corn-planting time when the ground is thoroughly warm, in rows 18 to 30 inches apart and 2 to 3 inches apart in the rows. From one-third to ½ bushel on corn alone.

Cultivate two or three times, but never after the buds are out.

Evans' Early Soy Bean.

of seed is required per acre. Cover not over ½ inch deep; never roll. Cultivate two or three times, but never after the buds are out.

Evans' Early Soy Bean—Originated by Mr. Evans, the noted Soja Bean specialist of Michigan. The earliest and best variety for states of a short season. Northern-grown seed, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

ITO SAN or EARLY YELLOW—One of the earliest and best. 2 feet high; yields about two tons of cured hay or 25 to 30 bushels of grain per acre. Matures in 95 to 100 days. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

EBONY OR BLACK BEAUTY—Matures in 110 to 120 days. 2 to 3 feet high. Splendid for forage and reasonably good for grain; 2½ to 3 feet high. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

EARLY BROWN or OHIO 9035—Will mature in 115 to 120 days; 2 to 3 feet high. A remarkably heavy yielder of grain and forage. For the retention of beans this is probably the best variety. More than 50 bushels of grain and 3½ to 4 tons of straw per acre have been harvested of it. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

FIELD BEANS

Buckbee's Electric Tree Bean

The Earliest, Heaviest Cropping White Field Bean and the Best for Baking

Growing nearly 2 feet high, branching out in all directions, bearing its pods so high that they seldom touch the ground, enables it to stand a wet spell without any injury. This is, indeed, a wonderful cropper, yielding from 50 to 75 bushels per acre under careful cultivation in a favorable season, while hundreds of our customers report yields of 40 and more bushels per acre under average cultivation. The crop matures in 80 days from planting. Seed medium sized, oval, pure white, very uniform in size and shape. This variety is not only more productive, but also of much better quality and finer appearance than any other White Field Bean. They are very sensitive to both cold and wet, and should not be planted before the ground has become dry and warm.

Pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. \$1.00.

Improved White Navy Beans

The Common White Field Beans. We have selected the stock of this variety which ripens uniformly. The plants are large, spreading, with pods 3½ inches long, containing 6 beans.

Postpaid, pkt. 8c; ½ lb., 18c; lb. 30c; 3 lbs. 85c.

WHITE TEPARY, FIELD BEANS

Grows and Produces a Crop with Less Moisture Than Any Other Plant Known. A Most Valuable Dry Farming Crop for the West.

White Tepary Beans is a native of the Southwest but although it comes from the desert and has been raised in a country having a very light rainfall without irrigation, it responds, nevertheless, to better conditions and we believe will be found profitable for general culture all over our country.

In the warm climate of the Southwest it ripens in about 60 to 65 days. It can even be planted there after the grain is harvested and still make a crop.

It is hardy, will withstand a great deal of neglect and will quickly recover from drought when more favorable conditions set in. Profitable crops can be raised in regions where the rainfall is 8 to 9 inches and less.

In the Southwest, where these Beans have been grown for years, they produce very much larger crops than any other variety. At the Arizona Experiment Station, when ordinary Beans produced 2 to 3 pods to a plant, the Tepary plants had as many as 200 ripe pods.

The Tepary can easily be distinguished from ordinary Beans by its more slender vines and thinner and smoother leaves. The pods are small, only about 3 inches long. The seed is smaller than that of the Navy, oval and of a pure white color.

As a food, Tepary is equal to any Bean known to commerce. When soaked in water they swell to twice their original volume and more than double in weight. A given weight of Teparies will produce 40% more cans than will the same weight of ordinary Navy Beans. Its quick growth makes the bean also very valuable as a green manure crop. Drill in rows 2 to 3 feet apart and 4 inches apart in the rows. Sow 12 lbs. to an acre. Postpaid, pkt. 8c; ½ lb., 15c; lb. 25c; 3 lbs. 75c.

White Tepary.

VELVET BEANS

A valuable plant for the South, used for pasture, green manuring and green forage. It is the rankest grower of any of the legumes; 2 or 3 seeds planted 4 feet apart in rows 5 feet apart will literally cover the ground 2 to 3 feet thick with a mass of foliage and vines 20 to 25 feet long, no matter how poor the soil. It leaves a mulch on the ground that is very beneficial to the soil. Sow 15 lbs. per acre.

100-DAY VELVET BEANS. The earliest and quickest-growing of all Velvet Beans, well adapted for districts further north than Velvet Beans ordinarily have been grown. They are to be preferred to Cowpeas, making two or three times as much growth and pods and will add a supply of vegetable matter to your soil that will show for years to come in your crop. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 85c.

BUCKWHEAT

This desirable and profitable crop, should be more generally known. It is usually sown in the Northern States in July, and will fill up the vacant plots at a time when all other planting is past. Can be sown after a crop of Winter wheat or rye and will make a second crop maturing in about two months. It does well on light soils, gives a good crop even on land low in nitrogen. It makes a splendid flower food for bees and is profitable on account of its large grain yield; turned under it is a good soil improver; where weeds are thick, Buckwheat will smother them and put the soil in good condition for the crop to follow. It is prized as a poultry feed, being regarded as a stimulant to egg production, and when ground is profitably fed to hogs and other stock. It makes also a fine quality of flour—the kind that goes into the famous "Buckwheat Cakes." Sow ½ to 1 bushel per acre.

BUCKBEE'S GIANT JAPANESE

Entirely distinct from all other varieties. Has all the valuable characteristics of the old Japanese Buckwheat, and in addition is earlier and will yield at least one-quarter more per acre. On this account it can be grown farther north. It resists drought and blight very well. The seed is rich dark brown in color and larger than Silver Hull. As much as 60 to 80 bushels to the acre have been harvested of this variety, making it very profitable to raise. More than a week earlier than Silver Hull. Choicest stock seed, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

IMPROVED SILVER HULLED

This valuable variety is a decided improvement on the old black or gray sort. It is early, remains longer in bloom than other sorts. A fine variety for honey bees. The grain is of a beautiful light gray color and has a thin husk. Millers prefer Silver Hull, there being less waste, and it makes whiter, better and more nutritious flour than other varieties. It is more productive than the Japanese and the grain meets with a ready sale, bringing high prices. Choicest stock seed, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

BUCKBEE'S "FULL OF LIFE" FLAX SEED

No. 25 or Primost Flax

This is a pure bred flax. It is selected from a variety which came to the Minnesota Experiment Station from the U. S. Department of Agriculture.

Its record in the field test at the Minnesota Experiment Station showed an average yield for 3 years of 193 bushels, or 3.4 bushels more than the average of the next best varieties. It is about 10 days earlier than common flax and is wilt-resistant to a considerable extent. This is no doubt the champion, best yielding variety of Flax. Our supply of this seed is limited. Send your orders early. Price, postpaid, pkt., 10c; per lb., 30c; 3 lbs., 85c.

No. 25 or Primost Flax

Quality Brush BROOM CORN

THIS IS A BIG MONEY MAKING CROP AND CAN BE GROWN SUCCESSFULLY IN ALL LOCATIONS.

Broom Corn is planted only for its seed heads or brush used for the making of brooms. The seed makes as good feed as corn, but the crop of it is not very large.

Broom Corn can be grown where corn grows and requires the same treatment. It should, however, be planted later, when the ground is quite warm. Only 70 to 80 days are needed to produce a crop. More than a ton of brush has been grown per acre and the market price has been from \$400.00 to \$500.00 per ton in the last year; it varies greatly according to the outcome of the crop. To obtain the highest price for the brush, it must be cut when in bloom and still quite green.

Plant in drills 3 to 3½ feet apart and 6 inches apart in the rows; 5 to 10 pounds are sown per acre.

The demand exceeds the supply, which causes the present high prices for brooms. You will find a steady market for all the good Broom Corn you can grow.

BUCKBEE'S SUPERIOR EVERGREEN

The Standard Tall Variety.

This is the most popular and most productive variety in the market. The original seed was secured in Tennessee, then bred and acclimated, thus making the brush of better quality. In growing it, all imperfect stalks are cut out and the brush is raised and cultivated especially for seed. Stalks 3 to 10 feet high with long, straight brush, well fibred and of bright green color. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 70c.

CALIFORNIA GOLDEN

Carefully selected and improved so that the brush is straight and long. Of finest quality; light green color, turning to light yellow when allowed to get too ripe. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 70c.

OKLAHOMA DWARF

Grows about 5 feet high, with straight, smooth brush, principally used for making whisks and brushes. Very early. Postpaid, pkt. 10c; ½ lb. 15c; lb. 25c; 3 lbs. 70c.

PINTO BEANS

This is the Bean that made New Mexico famous and added much to the wealth of that state; more than a thousand carloads valued over \$4,000,000 were shipped out of that state in a year. The crop per acre on an average brought about \$90.00 to the grower. Large quantities of these Beans have also been grown in other southern and western states.

Pinto Beans are very hardy and as heat resisting as Teparies; they have done very well without irrigation on high altitudes with a light rainfall and wherever they can be grown, they produce larger crops than Teparies. They mature about 2 weeks later than Navies and have to be planted so much earlier. The dried Beans are larger than Navies and are brown striped in color; in flavor, they are much superior to the Navy or any other field bean.

Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. \$1.00.

Buckbee's Superior Evergreen Broom Corn.

BUCKBEE'S "Full of Life" FIELD CORN

We Grow and Furnish Corn Adapted for All Parts of This Country.

Seed Corn will not produce satisfactory results unless planted in localities with similar climatic conditions to those where it was raised. Corn, for instance, that will mature in 90 days in Illinois will require two to three weeks more in Minnesota, and Corn grown in the North should not be planted in the South unless for special purposes, as the yield will be disappointing. For this reason we grow Seed Corn in different localities north and south and we state where each variety was grown and for what section it is best suited.

The Corn we offer is pedigreed stock, carefully bred, free from barren stalks, and the seed is tipped and butted and of the highest vitality.

BUCKBEE'S EARLY NORTHER FLINT CORN

FLINT VARIETIES BUCKBEE'S EARLY NORTHER

The Greatest Yielding Flint Corn.

Ears 10 to 15 inches long, of rich, yellow color. Enormously productive, outyielding any other Flint Corn that we have ever seen in the far North. Maturing exceedingly early, from 85 to 90 days being a fair average. The kernels are large and the stalks are of good height. The ears average two to a stalk, growing well up so as to readily admit being cut by the harvester. The stalks grow very tall and leafy and make superior fodder. Will surely prove of the greatest value to the farmers of the far North, particularly the Dakotas, Northern Minnesota, Wisconsin, Michigan and the Canadian provinces. You will be pleased with this early and big-yielding Flint Corn. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. \$1.00.

IMPROVED INDIAN SQUAW CORN

Holds More Records for Wonderful Performances Under Difficult Conditions Than Any Corn Ever Grown.

It is an extremely early variety, maturing in 75 days, and could be planted up to July 4 and make a crop before frost.

Perhaps the most wonderful quality of this Corn is its power to resist drought. The most protracted dry weather hinders its growth not at all, and still it will weather a wet season equally well. It can stand as much dry weather as Kafir Corn. In Western Kansas and Oklahoma, where this Corn is called Arkansas Valley Squaw Corn, it is considered the best dry land Corn. Its appearance this Corn is one of our most handsome varieties. The kernels are of different colors, red, blue, yellow and white, giving the ears a curiously beautiful mottled appearance. The ears grow from 8 to 12 inches in length and are of symmetrical form. This is the Flint Corn which is so much used in Western Kansas and Nebraska and which gives a good crop in the driest season when all other varieties fail.

Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. \$1.00.

LONGFELLOW

Has Individuality that Commends.

A yellow Flint variety that is particularly adapted to the North; ripens in 90 to 95 days. It is an 8-rowed root, with ears 12 to 15 inches in length and about 1½ inches in diameter. Small cob, large kernel and very broad. Stalks 7½ feet high; ears 3 feet above the ground. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 55c.

NORTH DAKOTA WHITE FLINT

An Early Maturing Variety.

This is a well-established variety, with uniform characteristics, including extra early maturity and medium size, both of stalks and ear. Choicest stock seed. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 55c.

GREAT BRAZILIAN FLOUR CORN

One of the Greatest Novelties Ever Introduced.

This Corn is inclined to stool, and one grain will produce usually more than one stalk. Each stalk bears 2 or 3 ears, 3 to 12 inches in length, and beautifully white. It produces an abundance of fodder and is the best variety for ensilage. It yields to 75 bushels of corn per acre, and the ears are fine for roasting, although not very sweet. It is a good variety for poor soils. The kernel contains more starch than any other Corn, and ground and bolted by the same process as wheat, gives a fine flour that will make bread, biscuits, etc., the same as the wheat flour. Plant two kernels in a hill and cultivate the same as other corn. For flour, plant 8 lbs. for fodder, 15 lbs. per acre. Postpaid, pkt. 10c; ½ lb. 20c; lb. 35c; 3 lbs. \$1.00.

Improved Indian Squaw.

EXTRA EARLY KING PHILIP

A Red Flint That is Unbeatable.

Earliest and best variety of red Flint Corn. Ripens within 40 days from time of planting. Ears 8-rowed, 10 to 12 inches long; stalks 7 feet high, very leafy; good yielder. Choicest stock seed. Postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 55c.

NORTH DAKOTA YELLOW FLINT (Gehu)

The earliest Corn grown in 70 to 75 days. Stalks about 7 feet high; ears about 8 inches long, growing 1½ feet above the ground. In localities where seasons are short and nights cool, it is the one variety that can be depended upon to yield a good crop. On good soil and in a favorable season, it yields 75 bushels per acre and more.

The Squaw Corn, and also the North Dakota White and Gehu Flint, which last two are selections or hybrids of the Squaw Corn, are much planted now for hogging off, the ears growing very close to the ground. They could not be cut by the binder, but by turning the stock into the field and allowing it to harvest the crop nothing will be wasted. The labor of husking, cribbing, feeding, etc., is saved and the most pork is made with the least expense. The Iowa Experiment Station says: "The returns are equally as good in pork produced, where the hogs gather their feed themselves, as when it is hand-fed." The Squaw type of corn growing very fast, could be used for pasturing quite early in the season, and it is also very desirable where soy beans or rape are grown with the Corn, because these varieties could make better growth in the Flint Corn, there being less shade than in taller-growing varieties. Choicest stock seed, postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 55c.

SANFORD'S WHITE FLINT

This variety will mature in about 100 days. It is later than the other Flint Corns which we grow and is not suitable for the extreme northwest. However, it is a very popular variety everywhere else, especially in the eastern states, and is much used by dairymen for green fodder and for ensilage. The reason for its popularity is doubtless that it is more leafy than any other Flint Corn, has very tall stalks, and produces usually two to three ears to a stalk, which are 15 inches and more in length. These ears are smooth, of symmetrical shape and covered with rows of very large, white, flinty kernels.

Choicest stock seed, postpaid, pkt. 10c; ½ lb. 18c; lb. 30c; 3 lbs. 55c.

BUCKBEE'S "Full of Life" SEED CORN

Dent Corns for the Northwest.

REGENERATED RED HACKBERRY OR IMPROVED NORTHWESTERN DENT

The earliest and hardest Dent Corn grown; it is the corn for the North, is very popular throughout the northwestern states and can be depended upon to mature in North Dakota, Northern Minnesota, Wisconsin, Montana and Manitoba; but it is also quite largely used in other states for early feeding, hogging down and is very often grown with early soy beans for that purpose, and for late planting when other corn has been destroyed by frost or drought, as if planted as late as July it will generally mature before frost. It is also planted largely in drought stricken sections of Kansas, Oklahoma, etc., where it is known as White Cap Red Butcher and often is the only variety that will make a crop, there, all home grown kinds being dried up.

The Red Hackberry grown 61 feet high, the ears are 7 to 10 inches long; setting 3 feet above the ground, they can be cut with the corn harvester; they have 10 to 14 rows of large dark kernels with a yellow cap. This corn matures in 75 to 85 days and is very productive, yielding on an average 70 to 75 bushels per acre.

The stalks being shorter than those of later sorts, they can be planted close together; it is mostly grown in drills.

Our strain is the finest and earliest in the country.

Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

MINNESOTA No. 13 or WIS. No. 8

This is the earliest yellow dent corn grown; largely grown all over Minnesota, Wisconsin, the Dakotas and Northern Michigan; there is no other Yellow Dent, fully as early, that is equally as productive.

The stalks are 7 feet high, are very leafy and furnish great quantities of fodder; there are usually two ears on a stalk which average 8 inches in length and have 16 to 20 rows of smooth, plump, rich yellow kernels.

Minnesota No. 13 will ripen in about 90 days and yields from 60 to 80 bushels per acre in a good season.

Our stock is true to type and ripens very early and uniformly.

Postpaid, pkt. 10c;

lb. 30c; 3 lbs.

85c.

MINNE-

SOTA WHITE DENT

This is the earliest white dent grown. It is as early as the Red Hackberry, but much more productive and is adapted for all the Northwestern States; it is much planted there on poor, thin soils and also on cold and wet ground where it will give good crops when other corn fails.

The stalks are 6 1/2 to 7 feet high, have large foliage making unusually fine fodder; the ears are 8 to 9 inches long, 14 to 18 rowed, and have large, deep, white grains. Under average conditions the yield in the Northwest is 75 bushels and more per acre.

Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

SILVER KING or WIS. No. 7

It may be called a small Silvermine not having quite so long a cob nor so deep a grain, but on the other hand it is 10 days earlier.

The ears are 8 to 9 inches long, very uniform in size and type and always filled out clear to the tips; the kernels are of good size, set compactly in straight rows and are pure snow white in color; the corn matures in 100 to 105 days. At the Wisconsin experiment station, Silver King gave an average yield on 22 acres of 93 bushels per acre.

The highest yield per acre of any corn grown in Wisconsin in 1913 was 137 6-10 bushels Silver King and in 1914, 132 bushels 64 pounds of Silver King. Postpaid,

pkt. 10c; lb. 30c; 3 lbs. 85c.

Silver King.

Regenerated Red Hackberry.

MURDOCK EARLY YELLOW DENT

The Murdock is the heaviest yielding Yellow Dent corn that can be grown in the Northwestern states; it is an ideal corn for Southern Minnesota, Southern South Dakota, the Southern half of Wisconsin and Northern Iowa. Murdock was awarded sweepstakes for the Northern zone at the National Corn Exposition of 1909 and 1910 and received First Prize at the Wisconsin State Fair in 1914.

The stalks are 8 feet high, the ears setting 3 1/2 feet from the ground. The ears are 8 to 9 inches long, 16 to 20 rowed and have very deep, large grains, slightly rough which are sitting very compactly and solidly on the cob. There is no other extra early corn which grows as uniformly in type, size of ears and color as Murdock; a load of this rich, golden-yellow corn is a beautiful sight. Murdock matures in about 95 days of average corn weather and has a record of yielding a hundred bushels and more per acre.

Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Murdock.

BUCKBEE'S "Full of Life"

SEED CORN

The varieties listed on this page have been grown in Winnebago Co., Northern Illinois, and are adapted to planting in most parts of Nebraska, Northern Kansas, as far north as Southern Wisconsin and Central Iowa and in all other parts of the Corn Belt, and also in most Eastern States.

Buckbee's
New Early
Prosperity

Buckbee's New Early Prosperity

The best yielding 90 day Yellow Dent Corn for the Corn Belt

Every farmer in the Corn Belt who requires an early corn whether for late planting or for early feed will find this variety most satisfactory. It will produce a big crop of corn, 20 to 25 percent larger than most other kinds ripening so early, and it also produces an abundance of leaves making it an ideal ensilage corn.

Stalks grow 7 to 8 feet high, setting their ears about 31 to 4 feet from the ground; the ears are about 8 inches long of fine golden-yellow color. This is a highly bred corn, yielding ears uniform in type, size and color and producing at least one ear but often two and three to a stalk; all barren stalks have been eliminated. The cobs are very thin and a bushel of 70 pounds ear corn makes more than 60 pounds of shelled corn. Postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

Buckbee's New Early Illinois

The best 90-day White Dent Corn for the Corn Belt

A fitting companion to Buckbee's New Early Prosperity, ripening in about the same time but yielding even better. We have grown these two early Corns on our farms here for several years, and the longer we grow them the better pleased we are with them; we have grown many different, highly praised varieties, but have yet to find their equals in earliness and yield for this section.

The ears of the Early Illinois are medium sized but of great weight and very solid; the size of the ears has no effect upon its yield and it is a fact that a large-eared variety is not necessarily a heavy yielder. The fodder, too, is medium sized. It gives big yields on rich soil and does well on poor land; stands wet weather and drouth.

Postpaid,
pkt. 10c;
lb. 35c;
3 lbs.
\$1.00.

Buckbee's Great Western Yellow Dent

This variety is about 10 days later than Early Prosperity, but an entirely safe and sure cropper in Northern Illinois and the most productive yellow variety that is grown in this latitude;

but it proved also one of the biggest yielders and most satisfactory variety in all other parts of the Corn Belt except the extreme northern. It is a wonderful corn. Many of our customers have planted it for years to the exclusion of all other kinds. It is strictly a thoroughbred corn always coming true to type and it is peculiarly free from barren stalks.

It produces an abundance of foliage which makes it very desirable for fodder. The ears measure 10 to 12 inches in length, often weighing 4 pound or more; they are uniform in size and shape, with 16 to 18 rows of deep, pure golden-yellow kernels set on small-sized cob, which is well filled out over the tip and butt. The grains are of good size, long, flat, and closely set together, and solidly fill the entire surface of the ear. This Corn ripens in about 100 days. It is a Corn for the grain farmer, feeder and dairyman; it can be depended upon to bring the highest market price or to furnish the most and the best feed for your cattle, sheep and hogs. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Buckbee's Great Western White Dent

A most marvelous variety of White Corn which will in yield and quality surprise everyone who plants it.

Great Western White Dent will mature in about 100 days of good corn weather; compared with the Great Western Yellow Dent it is probably a few days earlier and gives on an average somewhat larger yields. We have sold this Corn for many years to all sections of the Corn Belt except the extreme Northern and wherever tried it has become a great favorite. It never failed to make a crop and in our experience we never found a corn white or yellow that would give equally as good results under adverse conditions of weather and soil. The stalks grow about 7 to 8 feet high, many of the stems bear two and some three ears and there are no barren stalks. The ears are 10 to 12 inches in length and weigh 1 pound and over; they are very uniform in size and shape with 16 to 20 rows of pure white kernels, which are very deep. The cob is thin and a bushel of ear corn will make not less than 62 pounds of shelled corn. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Buckbee's
Great Western
Dent Corn

The Corns listed on this page are immense yielders, we are selling them at very reasonable prices; why take chances with common Corn which may yield only half as much as these thoroughbred strains?

BUCKBEE'S "Full of Life" SEED CORN

The Great Prize-Winning Show Corns of the Central and Southern Corn Belt

The two famous prize corns listed here, Boone County White and Reid's Yellow Dent, are the standard varieties for states in the latitude of Illinois and further south. More than 75 per cent of all corn raised in the cornbelt is grown of these two varieties; under these and other names. They are the greatest yielding white and yellow Corns known, have made records of bumper crops never reached by other sorts, and have won more prizes than all other varieties combined.

Our stock of these two varieties has been grown from prize-winning strains and was raised in Northern Illinois. These Corns are safe to plant as far north as Central Iowa. They mature at about the same time, requiring 110 to 115 days.

Reid's Improved Yellow Dent

Reid's Yellow Dent is the main Corn crop of the cornbelt. It outyields any other yellow variety and gave the highest yields of any variety tested at the Illinois Experiment Station for a period of over 20 years.

The stalks are 9 to 12 feet high, making an abundance of fine fodder. The ears are very large, 3 to 11 inches long and 7 to 8 inches in circumference, and have 20 to 24 rows of deep, wedge-shaped kernels, moderately rough and of light yellow color, which is characteristic of this variety. The ears are of cylindrical shape from butt to tip, with no lost space between the rows and tips, and butts are particularly well filled. The cob is red and small and easy to shuck. The ears are remarkably uniform in shape, size and color, and in this respect this variety is superior to all Corns. It shells from 88 to 93 per cent of grain. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Boone County White.

Perfected Boone County White

The most popular and the heaviest cropping white Corn known. It is also the most highly bred Corn in the world.

It does well on all classes of soil. On old corn land it should be planted in preference to yellow Corn. The root system is very extensive, deep growing, making the plant drought-resisting. The stalks are strong and exceedingly heavy from the ear down. They seldom blow down. The foliage is abundant, leaves broad and thick, furnishing an enormous quantity of forage. The ears are 9 to 12 inches in length, 7½ to 8½ inches in circumference, averaging a pound in weight, and contain 18 to 24 rows of exceptionally deep kernels of pure white color. They are solid as a rock, there being very little space between the rows; are of cylindrical shape, rounding off only within about an inch of the top, and are most uniform in size and shape. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

EARLY WHITE CAP YELLOW DENT

A very strong grower with heavy fodder and large ears. Matures in 90 days and is a good Corn for planting as far north as Southern Minnesota. The grain has a white cap and yellow body. Heavy yielder. Postpaid, pkt. 10c; lb. 30c; 3 lbs., 85c.

BUCKBEE'S EARLY GOLD MINE

This great variety will usually produce a crop in 90 days and has always matured in Northern Iowa. It can safely be planted in this section up to the middle of June and still be depended upon to ripen by the middle of September. It produces a magnificent yield, there generally being two good-sized ears to the stalk, with large kernels, cob well filled. Postpaid, pkt. 10c; lb. 30c; 3 lbs., 85c.

BUCKBEE'S GREAT LIBERTY FIELD CORN

This new variegated Corn combines more solid merit than any Corn in cultivation. Expert corn growers pronounce it a perfect field Corn as to yield, size of ears, color and length of grain and quality of fodder. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

THOROUGHbred LEAMING

Deep golden color, striking uniformity. The ears range from 9 to 12 inches long. Kernels broad, thick, deep, rather rough, rounding wedge-shaped. Red cob, medium in size. Matures in about 100 to 110 days. It is safe for planting in Central Iowa. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

BUCKBEE'S GOLIATH FODDER CORN

CORN FOR FORAGE AND ENSILAGE

Fodder corn is a very valuable crop on the farm. It occupies a place that cannot well be filled by any other crop and should be largely planted by every farmer. Corn has no equal in yielding large amounts of valuable forage under a great variety of soil and climatic conditions. Used for forage, ensilage and hay, it furnishes the cheapest supply of healthy and nutritive food in winter, spring, summer and fall for dairy and cattle, for hogs and other live stock on the farm. When preserved as ensilage it can be stored much more cheaply in much less space than any other feed, keeps indefinitely and is always ready to feed. The growing of corn on a fair proportion of the farm will permit the keeping of more cattle and so increase the revenue as well as augment the manure supply so necessary to the maintenance of soil fertility. When other crops have failed and it is too late to plant anything else, fodder corn can always be grown and will furnish feed for the stock and make a paying crop. In selecting corn for fodder and ensilage, we do not recommend the very large, coarse and late varieties, which require a very long time to come to maturity, but according to our experience varieties which have medium sized fodder and ripen medium early in localities where they are to be planted are the most satisfactory. It is not necessary that the crop fully mature, but the nearer it comes to maturity the greater the food value and the more valuable it is to the stock feeding on it.

Sow in drills $3\frac{1}{2}$ feet apart, using from $\frac{1}{4}$ to $\frac{1}{2}$ bushel per acre. The more seed is planted the more bulk, more stalks and leaves, but the less grain will be harvested. About 20 pounds of seed is a good quantity to sow in the cornbelt; sown that thickly the plants will not get larger than a man's thumb, look like a mass of leaves, have a high feeding value and are eaten without waste.

We offer the following corns for fodder and silo:

Buckbee's Goliath Fodder Corn

The World-Beating Fodder and Ensilage Producer.
Surpasses Any Other Fodder Corn on Earth in Yield and Feeding Value.

A great variety which we have been developing for years. Thousands and thousands of our customers in every part of the country assert that it stands without a peer for feeding either in the green state or for silo purposes. It is very rich in nutriment and a wondrously immense yielder. Grows rapidly, is early, short jointed, tall, and produces an overwhelming abundance of leaves and rich, juicy, sugary stalks, with a strong tendency to mature several ears. In favorable seasons, on good soil, it will produce from 50 to 60 tons per acre of the very best feed. We consider this corn the best and most economical fodder and silage variety for most parts of our country. It is grown in the North and South, even Manitoba is planting it largely, but it will mature only as far north as northern Iowa in an average season. The ears when fully grown are from 10 to 12 inches long and have very deep kernels of perfectly white color. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 18c; lb. 30c; 3 lbs. 85c.

White Cob Ensilage Corn

A Popular Standard Variety.

A pure white Corn with a white cob, of tall growth, short joints and leafy, giving an abundance of fodder; sweet, tender and juicy. It is a popular standard variety grown successfully in almost any latitude. Price, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

Red Cob Ensilage Corn

One of the Best Fodder and Silo Corns

Beyond doubt one of the best fodder corns, either to feed green, to put up for the silo, or to cure for hay. It is a pure white corn, cropping as high as 45 tons per acre. It is sweet, tender and juicy; has short joints and therefore an abundance of leaves, and grows to a fair height, but coarse-stalked. The seed is white and grows on a red cob, thus giving it the name. Price, postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

Sweet Fodder Corn

One of the most valuable fodder plants in existence; every stock farmer should devote some land to it. The stalks are sweet, juicy, rich, tender and very nutritious, and the leaves are numerous, very large, broad and succulent. The plant contains more sugar and has a much greater feeding value than any other variety of corn, and whether fed dry or green, is very palatable, and cattle and hogs will greedily eat every part of it. This Corn, if planted at the proper time in spring, will produce well-formed ears in any part of the Northwest before frost.

Sow in drills 25 pounds per acre. Postpaid, pkt., 10c; lb., 30c; 3 lbs., 85c.

Edwards' Genuine Legume Bacteria

For Alfalfa, Sweet Clover, Red Clover, Crimson Clover, Japan Clover, Field or Garden Beans, Velvet Beans, Soja Beans, Field or Garden Peas, Sweet Peas, Peanuts, Vetches, Cowpeas. The same cultures can be used for either Alfalfa or Sweet Clover and likewise the same cultures can be used for Red, Alsike or Crimson Clovers. All the other crops require a different culture for each as named. Be sure to state for what kind of crop the culture is wanted.

When new crops of legumes, such as alfalfa, etc., are to be sown, nitrogen-gathering bacteria, necessary for their successful growth, are usually not present in the soil and must be supplied either by seed inoculation or by the use of soil from an old field previously used for such crops.

Edwards' Legume Bacteria is, we believe, the best of the many Nitrogen Bacteria Culture for seed inoculation and the least expensive one now on the market.

The culture is applied to the seed before sown; the inoculation is done in a few minutes and the bacteria are carried into the soil in ample number to insure infection of the roots when germination takes place.

Seed inoculation is not only used to secure good stand, but the crops also grow more vigorously, winter-kill less readily and in case of perennial legumes, like alfalfa, much larger crops are also harvested the second year than from uninoculated seed. Furthermore, inoculation increases the amount of nitrogen in the plants from 50 to 80 per cent. and increases, therefore, the value of the crops, whether they are used for feeding or green manuring. The cultures are good for 6 months after leaving our warehouse.

Full directions for use with each package.

Price of Edwards' Legume Bacteria Cultures to inoculate 30 lbs. of seed, 75c; for 60 lbs. of seed, \$1.40 postpaid.

BUCKBEE'S "Full of Life" OATS

Oats are a profitable crop if new seed of varieties that have merit is sown. There is no grain that demands a change of seed more often than Oats. Every second or third year the seed stock should be renewed, because if grown in the same soil and in the same neighborhood year after year they will deteriorate and become light and chaffy.

Our prices are so low that every farmer can afford to buy new seed of our pedigreed, vigorous-growing varieties every year and harvest a paying crop.

BUCKBEE'S ILLINOIS

Introduced by us several years ago. At that time it was generally considered "the greatest of all Oats," and although many new varieties have since been offered, some of them of heavier grain and later maturing which have outyielded the Illinois on some soils and under certain conditions and also some earlier varieties which were more productive in some sections but have a smaller berry not wanted by some farmers, we believe most of our customers will continue to sow the Illinois, which is an all-around good, early Oat, with good-sized grain, as a sure cropper year in and year out, adapted to the rich soils of the prairie states, is hard to beat. No one can miss it by sowing this variety.

The Illinois is an early variety, has a well branched head and long but plump pure white grains with a thin hull. The straw is of medium height, very stiff and does not lodge easily, but stands up well on rich, well manured land. It is an ideal sort for any soil. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

"Just a brief word to tell you of the very satisfactory results obtained from using your seeds exclusively on my farm this year. They are 'Full of Life,' hardy and prolific. H. L. HESS, Garrett, Ind.

WHITE KHERSON (Iowa No. 103)

A new production from the Iowa Experiment Station, which won the "Sweepstakes on all Oats" at the International Dry Farming Congress at Wichita, Kansas, in 1914. It has been tried largely in the last few years in the western and in the cornbelt states, and wherever grown it has outyielded all other varieties in the same neighborhood by about 30 bushels per acre. We do not hesitate, therefore, to offer it as the best Oats for the west and the cornbelt as yet produced.

White Kherson was bred from Yellow Kherson, or 60-day Oats, at the Iowa Experiment Station. It has all the good qualities of the old variety, is just as early, has strong, stiff, short straw, branching heads with very numerous small but exceptionally heavy berries with thin hulls, and in addition to this the new Oats has a better color, being pure white, and it is a very much better yielder.

White Kherson matures early before the hot and dry season sets in and before blight and rust appear. This accounts for some of its big yields. It has also proven to stand up extra well on heavy, rich soil, and wherever the ground is rich and the Oats lodge or run to straw these new Oats will prove of special value. Postpaid, pkt. 10c; lb. 25c; 3 for 65c.

SILVERMINE

One of the most popular varieties and very largely grown in all central and western states. It is a medium early Oats, maturing about a week ahead of the Swedish Select, and is very hardy and prolific. Has long, stiff straw and grain of the clearest white color, usually plump and heavy with a reasonably thin hull. It is a sure cropper; will thrive under favorable conditions. It shows little tendency to rust or lodge unless soil is very rich. Many people who have raised Silvermine think them the best Oats on earth. It is the standard variety for main crop in most parts of Iowa. At the trials at the Experiment Station in Wooster, Ohio, the 10-year average yield of Silvermine was 67.08 bushels per acre, or the third best of 21 varieties, about a bushel less per acre than the highest yielder. Silvermine has a record of yielding immense crops of 100 to 160 bushels per acre in favorable years. Our seed is very choice, pure stock, Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

IMPROVED WHITE RUSSIAN

A distinct variety, being a side or horse-mane Oats. It originated in Russia, but has become thoroughly acclimated and is a great favorite everywhere. White Russian is as nearly rust proof as any Oats can be. It is a medium late variety. It is much appreciated for its rugged hardiness, enabling it to withstand diseases, insects and cold, unfavorable weather. It yields large crops. The berries are longer and larger than those of other varieties. It ripens with the Blue Stem Wheat, and these two kinds make a good combination for succotash. This variety is much grown and a very heavy yielder in the North. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 60c.

REGENERATED SWEDISH OATS

An improvement of the well-known Swedish Select; has given larger yields in this country than the old variety, it stands heavier, grows more vigorously, resists droughts better and is free from rust and smut. In short, it possesses all the good qualities of the Swedish Select in a much higher degree than its parent.

Our stock is grown from the originator's seeds and is very plump, heavy and of bright color; pure, clean and entirely free from weeds and other grains. It is ahead of the English stock being grown in this country, and is therefore acclimated and will give much larger crops. Regenerated Swedish has been widely advertised and is one of the most popular Oats grown in this country. It grows on nearly all soils, except when very rich. It is especially well adapted to upland soils and seems to do better on poorer ground than any other variety.

The straw is coarse, very stiff and noted for its power to resist lodging. The heads are large, branching and filled with very large, thick grains of bright color. They are medium late. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 65c.

EARLY BLACK PROLIFIC TARTARIAN

Heaviest Cropping Variety of Pedigreed Black Oats.

Tests made by many progressive farmers convince them that these Black Oats are more reliable croppers than White Oats. They are very early. The grain is short and plump and of the best quality. Early Black Prolific Oats are practically drought-proof and rust-proof. The straw is stiff, the heads are long and the grain yield is heavy. These Oats are the best to grow on rich and also on cold and damp soil. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 80c.

White Kherson (Iowa No. 103).

BUCKBEE'S FAMOUS QUAKER OATS

The Greatest Oats in the Country.
The Earliest of All Large Grained Oats.

The Best Yielding Oats.
The Plumpest and Heaviest Oats.

Quaker Oats is a spreading variety, throwing out its heavily laden branches on all sides. It has thick walled, stiff straw of medium height, that carries the load without lodging, withstanding winds and storms better than most other varieties.

The grains of Quaker Oats are short, very plump and heavy, the heaviest of any oats we know of, generally weighing from 45 to 50 lbs. per measured bushel. They have a thin skin and heavy meat, and in addition the color is a fine white as bright and clean as a new silver dollar. Such oats grade higher on every market than common stock and usually bring a cent or two a bushel more for the crop, which will more than pay the extra cost of seed, not to say anything of the extra yield which may be secured.

These oats are medium early, a few days later than Silvermine. We have grown them now for many years, but never noticed a sign of rust, smut or blight on the straw.

The plants do well on most soils, standing up well on rich land, and owing to their strong root system, they are the best Oats for thin, upland ground and the best drought resister in dry season. They have been grown with great success in all parts of Northwest and in the central and eastern states. They are of strong, vigorous growth and remarkable for their great stooling capacity, which accounts for their wonderful yield; often more than 80 strong, healthy stems, each carrying a large head filled with heavy grains have been counted coming from one single seed. Yields of one hundred bushels per acre have been quite common of Quaker Oats, but even crops of 200 bushels and more have been harvested on well prepared land in a favorable season.

Sow Buckbee's Quaker Oats and do not miss your chance to get a start with this famous variety and harvest more Oats to the acre than ever before and Oats which would always bring a high price in every market, if you do not sell them for seed.

Our stock of Quaker Oats is very fine this year and the seed compares very favorably with that of any other variety. Ask for sample.

Choicest Pedigreed Seed of our own growing. Postpaid, pkt. 10c; 1/2 lb. 15c; 1 lb. 25c; 3 lbs. 70c.

WINTER OATS

Winter Oats are of the greatest value for the states south of the Missouri line. They are grown there for fall and spring pasture and for grain. They also generally stand the winter everywhere in our state and in the southern half of Iowa. Our Winter Oats grown in the North are incomparably superior to southern-grown stock. They are more hardy, earlier, less susceptible to rust, of more vigorous growth, stand up better and are more productive.

TEXAS RED RUST-PROOF WINTER OATS

A standard favorite not only in Texas, from which it derives its name, but all through the Southern States. Texas Rust-Proof Oat has a very heavy berry, nearly every one has a distinctive beard, protecting it from the sun and enabling it to stand extreme heat. It has short, strong, stiff straw and does not lodge easily. These oats are much used on light, sandy soils and also for low grounds, where Oats are likely to rust. These oats can be sown in Fall and Spring. Sow 2 bushels per acre. Postpaid, pkt. 10c; 1 lb. 25c; 3 lbs. 65c.

WINTER TURF OATS

Sometimes called Virginia Gray. This splendid variety has proven immensely popular and satisfactory wherever it has been grown. When sown early in fall and the roots thoroughly established in the soil, it is very hardy and will stand a great deal of cold. Its stooling propensities are remarkable, and on good soil yields from fifty to seventy bushels per acre. The grain is of a dark gray color, with a distinct stripe and weighs heavier than the ordinary Oat. These oats can also be sown in Spring and if sown very early, will outyield ordinary Spring Oats. Sow 1 1/2 to 2 bushels per acre. Postpaid, pkt. 10c; 1 lb. 25c; 3 lbs. 70c.

NEW APPLER WINTER OATS

This is undoubtedly one of the best all round Oats for planting in the Fall as they afford a valuable pasture the greater part of the Winter and early Spring, thus reducing the quantity of other necessary food. They may be harvested early enough in the Spring for other crops to follow. This variety spreads and stools out enormously, especially when grazed, and if stock be taken off by March will yield a large crop of grain. This is a very popular Oat in the South, especially on the light sandy soils of the coast region. Prices, postpaid, pkt., 10c; 1 lb., 25c; 3 lbs., 70c.

BUCKBEE'S NORTHERN GROWN COW PEAS.

BUCKBEE'S EXTRA EARLY MICHIGAN FAVORITE—Mature in about 50 days. In quality and productiveness it is equal to any of the well-known standard varieties: 8 to 12 tons of excellent fodder or 20 to 30 bushels of seed per acre is often harvested. Much used as a fertilizing crop. Postpaid, $\frac{1}{2}$ lb. 20c; lb. 35c; 3 lbs. \$1.00.

NEW ERA—Upright, remarkably prolific. Ripens in 60 days. Yields 2 crops in the South. Postpaid, Pkt. 10c; $\frac{1}{2}$ lb. 18c; lb. 30c; 3 lbs. 85c.

IMPROVED WHIPPOORWILL—Upright, a week later than New Era, a favorite in the South and Middle West. Very productive. Much used for pasture and fertilizer. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 25c; 3 lbs. 70c.

Cow Peas grow on almost all soils and thrive on land too poor for clover. They are drought-resistant, stand the heat of the southern summer and are largely grown in the South, but the early varieties listed here are also of great value for all northern states.

Cow Peas, whether used for green fodder, hay or ensilage, have a higher feeding value than clover, millet or any other grass. They make an excellent hog pasture; an acre of ripening Cow Peas will feed and fatten 15 to 20 young hogs.

The Georgia Experiment Station made $12\frac{1}{2}$ tons green hay or $2\frac{1}{2}$ tons dry per acre. The yield of peas is 15 bus. per acre.

Used for green manuring, Cow Peas will increase wonderfully the fertility of the soil. For hay, Soy Beans or Millet and Cow Peas are much planted together at the rates of about a bushel of Cow Peas to half bushel of Soys or Millet per acre.

Culture—Sow when warm, in drills, 3 feet apart, and cultivate, using 60 lbs. per acre; or broadcast 100 lbs. per acre. The planting is often done in corn at the last cultivation.

BRABHAM—The most valuable Cow Pea today in America. One of the most productive in yield of forage and of shelled peas. Of upright growth, retains foliage exceptionally well. As early and very similar to New Era but is bound to supplant this variety on account of its wilt-resisting qualities. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 18c; lb. 30c; 3 lbs. 85c.

PROLIFIC BLACK EYE—One of the earliest; will mature seed in about 60 days. Of the same value as a forage and soil improving crop as the other varieties, but also grown for table use. Postpaid, pkt. 10c; $\frac{1}{2}$ lb. 15c; lb. 25c; 3 lbs. 70c.

BUCKBEE'S NEW EARLY SNOWFLAKE FIELD PEAS

15 TONS FODDER PER ACRE 60 DAYS FROM PLANTING.

BUCKBEE'S NORTHERN GROWN FIELD PEAS

Equally valuable for Pasture, Silage, Hay, Grain and Fertilizer.

For the northern states there is no crop of greater value than Field Peas. They can be grown under most any condition of soil or climate and yield a profitable crop no matter for what purpose it is grown for pasture, silage, hay, grain or fertilizer. Field Peas make their best growth when the weather is cool and the earlier they are seeded the better they will do. When sown in March or April in the Northern states they will be ready for cutting the latter part of June, coming before any good nutritious feed suitable for silage or hay.

Field Peas are sown alone at the rate of 3 bushels per acre, but the most satisfactory way has been found to be, if sown with oats, about a bushel of peas to a bushel of oats per acre.

When clover or grasses are frozen out or are liable to fall on account of dry weather, then peas and oats will furnish the quickest returns of any forage plants and in feeding value are equal to clover hay. The feeding may commence as soon as the oats are headed out and the peas are in bloom. When the grain reaches the dough state the crop has attained its maximum feeding value, and if wanted for hay it should be cut at that time. If grown for pasturage, as soon as the peas are fully

developed the stock can be turned in. The best way of seeding Peas and Oats is to plow the peas under not more than 4 inches deep; then sow the oats in the usual way.

BUCKBEE'S NEW EARLY SNOWFLAKE—By far the best Field Pea. Immensely productive. Height of vine $3\frac{1}{2}$ to 4 feet. Dry pea is of a beautiful pearly white color. Price, postpaid, pkt. 10c; lb. 35c; 3 lbs., 90c.

BANGALIA—An exceptionally heavy cropper for an extra early Pea. It is easily a week to ten days earlier than the famous June Pea, and two to three weeks earlier than the Canada Pea. The vines are very heavy. The Peas are somewhat wrinkled, very heavy and a beautiful light green in color and decidedly distinct from the White Canadian.

Aside from its drought resisting character and big cropping habit, it is a very early variety, which is a fine quality in a Field Pea. Prices, postpaid, pkt. 10c; lb. 35c; 3 lbs., 90c.

IMPROVED WHITE CANADA FIELD—A well known and standard variety. Prices, postpaid, lb. 30c; 3 lbs., 85c.

Grains of Spring Spelts.

**FOR

SHEET**

Spring Spelts or Emmer

A valuable grain closely related to wheat; the kernels, however, are tightly enclosed in the hulls and adhere to it when threshed. It should receive the same treatment as farmers, as good crops of it can be grown under almost all conditions of soil and climate, although it is, like Macaroni Wheat, especially adapted to dry regions and localities with hot dry Summers; withstands drought where barley fails and barley is also never affected by excessive rains. Spelts is a staple crop in all parts of the West, Northwest and Southwest, but it can also be profitably grown in all sections of the corn belt. Wonderful crops of it have been grown under the most adverse conditions, and record yields of 75 to 100 bushels of grain and 3 to 5 tons of straw have often been reported from the western states. It thrives on poor land, stony ground, in forest regions, on the prairie, it is quite hardy and should be sown as soon as the land can be worked. It has quite stiff straw, stands up well on ground where oats and barley lodge. It neither rusts nor blights. Oats and spelts ripen about the same time and are often sown together for horse feed. Spelts makes a well-balanced feed for horses, cattle or hogs; they all like and thrive on it. To horses it can be fed with the hulls on, the same as oats. When cut when the grain is past the middle milk stage, it will make straw-hay of excellent quality.

Thresh like wheat. Sow 50 to 100 lbs. per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

New White Beardless Winter Spelts

This Winter Spelts has the same characteristics as Spring Spelts. As the name indicates, this variety is without beard, and also has much larger heads and is much more productive in suitable climates than the Spring variety. It thrives best on dry prairie regions with hot Summers, where it has given excellent results; but it is also considerably resistant to the effects of wet weather in humid climates. It is not affected by rust like most other grains. Winter Spelts is as hardy as any Bald Winter wheat and has been grown for a number of years in Southern Minnesota with good success, always giving better returns there than any other Winter Wheat. It certainly is more hardy than Winter Barley and Winter Oats, and we especially recommend it for sowing in place of these two varieties, as it is much more productive and a surer crop. For many Central, Southern and Eastern states, where Spring oats do not yield well and Winter Oats are not hardy, we can recommend this Winter Spelts as a sure crop. Ripens earlier than oats, yields much better and may furnish a considerable quantity of Fall and Winter pasture.

The preparation of the land for seeding and the subsequent management of the Winter Spelts crops are practically the same as required for Winter Rye or Wheat. Sow with a drill at the rate of about 60 lbs. per acre; cover about 3 inches deep. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Spring Spelts

Head of White Beardless Winter Spelts.

MAMMOTH SPRING RYE

Spring Rye is entirely distinct from Winter Rye, and we call particular attention to the fact that we offer genuine Spring Rye.

It can be sown in Spring a little later than other Spring grain and a crop harvested the same season; on that account it is much more used as a catch crop, especially where Winter grain has been killed out. There is an increasing demand for this variety; it is a very profitable farm crop to grow anywhere, and farmers are finding out its value. It does not grow quite as tall as Winter Rye, but usually yields as well and the grain is of fine quality. On good ground the yield is never less than 40 bushels per acre. As it does not stool as much as Winter Rye, not less than 2 bushels are usually sown per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

WINTER RYE

The hardest and the earliest grain crop grown; the best grain crop for sandy soils; in fact, the salvation of the farmer in very sandy sections.

Winter Rye is one of the most valuable grain crops for all sections of the country, and it can be depended upon more than any other to produce a good paying crop everywhere and every year. It is more hardy than wheat, seldom winter kills, is suited to cold climates, and succeeds well everywhere in the South.

SOIL—It can be grown on a great variety of soils, does best on fertile ground, but is of the greatest value for light and poor soils, where it will give fair crops when other cereals fail.

The straw of Rye is more slender and grows taller than wheat, but owing to its extreme rigidity it does not lodge easily. Rye starts to grow much earlier in Spring than Winter Wheat, and ripens a week earlier. It is troubled very little by insects and diseases as it is too near maturity when insects and such diseases as blight, rust, etc., appear. Another great advantage of the Rye is that it aids in the control of many of our dangerous weeds, such as Wild Oats, Mustard, etc., as the grain will mature before the weeds, which will have no opportunity to mature their seeds before harvesting.

Winter Rye is an excellent cover crop for orchards; it prevents the leaching in case of fall or spring rains; it will also prevent the blowing of light, sandy soils.

Rye can be sown in the South from July to November 15th; in the North it is best to sow up to the 15th of September. If sown early, it is used for fall pasture.

Winter Rye is the earliest crop that can be used for **SOILING**, it furnishes a large amount of green feed. The best time to cut it for soiling is between the time of heading and the beginning of the formation of the grain. For the purpose of soiling, however, it is best sown with Sand Vetches at the rate of 40 to 50 pounds of Vetches and one-half bushel of Rye.

TIE STRAW of the Rye is a very valuable part of the crop; it is used for bedding stock, for packing nursery goods in the manufacture of coarse brown paper and, if carefully threshed, it sells at high prices to harness makers for collar making.

Rye is little used for stock feed; yet, in combination with oats or barley, it makes good feed for horses and hogs, but it should not be fed to milk cows, as it will give a bitter flavor to the butter. Sow at the rate of 1½ bushels to an acre.

Giant Winter Rye

A heavy cropper, with stiff straw, large heads and plump, heavy grains. Postpaid, pkt. 10c; lb. 25c; 3 lbs., 70c.

New Rosen Winter Rye

The famous Rye, originated by the Michigan Experiment Station, has now proven its superiority over all other varieties in every Rye-producing section. It has doubled the yield obtainable with any other kind. The average yield of common Rye in this country is less than 15 bushels per acre, but that of Rosen Rye, 40 to 45 bushels.

Rosen Rye has very stiff straw and very large heads with 4 even rows filled with very large kernels. It is a characteristic of the Rosen that the 4 rows are always evenly well filled on 99 per cent of the heads, while Common Rye seldom shows a well-filled head.

We offer genuine, pure, clean stock, postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Mammoth Spring Rye

United States Wheat Director, License No. 002816EH

SPRING WHEAT NEW MARQUIS

Ten days earlier and yields 10 bushels more per acre than any other hard spring wheat known.

Pronounced by both farmers and millers the finest spring wheat for the Northwest and it is also the best headless variety of spring wheat that can be raised in the Cornbelt.

This wheat has very stiff straw of medium height, which does not lodge easily, the heads are bald and quite heavy, have smooth yellow chaff, the kernels flinty, more round than those of other spring wheats, thicker and more plump, and of dark red color. Marquis weighs 64 to 66 lbs. per bushel, a five-year average yield

at the Brandon, Manitoba, experiment station was 44 bushels per acre. Almost without exception it will grade No. 1 Hard, and it is superior to any known variety in milling and baking qualities. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

EARLY JAVA

A very early headed variety and one of the most prolific ones, about 10 days earlier than Velvet Chaff or other standard varieties and about as early as winter wheat. One of the best spring varieties to grow in the Cornbelt. Very stiff straw, long well filled heads with round, plump grains of the best milling quality. Sow 1½ bushels per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

MACARONI, KUBANKA OR DURUM

This is the best of the Macaroni varieties for milling purposes. It is very early and very productive, generally yields 10 to 20 bushels more per acre than any other spring wheat. The heads are headed, the grain very large, hard, glossy and of yellowish color. Sow 1½ to 2 bushels per acre. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

VELVET CHAFF

This is a headed, smooth chaffed variety, very hardy and a big yielder. It yields from two to ten bushels more per acre than the Blue Stem. It is early in maturity, from 110 to 115 days. The Minnesota Experiment Station reports a 14 year average yield of 26.7 bushels. Pkt. 10c; lb. 25c; 3 lbs. 70c.

BLUE STEM MINN. No. 169

One of the heaviest yielding varieties for the Northwest; originated at the Minnesota experiment station. Fine, plump, grains. Large bald heads. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

WINTER WHEAT

New Marquis.

Winter Wheat is the best paying crop on the farm; wherever possible it should be grown instead of Spring Wheat, for if the right varieties are used it will give one-third larger yield and it is as sure a crop.

BUCKBEE'S RED TURKEY. This is a bearded variety and is the hardest known; it can be planted in almost all parts of the Northwest and is also the best adapted sort for the states of Nebraska, Kansas, Oklahoma, etc. It is one of the earliest varieties of winter wheat and matures before rust and chinch bugs appear. The heads are long, well filled with large, flinty grains of reddish-amber color equal to No. 1 Hard spring wheat. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

HARVEST QUEEN. A beardless variety, white chaff, golden-yellow grain; a splendid yielder; while not as hardy as our Red Turkey, it has been grown for years with good success in Southern Minnesota. This and Harvest King are the hardest varieties of beardless winter wheats known, giving excellent results in all parts of the Cornbelt. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

HARVEST KING. Another beardless or bald variety, red chaff, very large dark amber colored grains, larger than most other bald varieties, of splendid milling qualities. The earliest beardless wheat, very hardy. Often sold as Red Cross wheat. One of the most productive kinds in the Cornbelt, quite hardy as far north as Winona, Minn. Postpaid, pkt. 10c; lb. 25c; 3 lbs. 70c.

SHEET

GRAIN OR NON-SACCHARINE SORGHUMS

These varieties are more resistant to heat and drought than Corn, and are therefore more profitable to grow, where—because of drought, hot winds and shallow soils—Corn is not a reliable crop. They yield as much grain as Corn, make excellent fodder and silage and will grow on any soil where Corn will, and on many too poor for Corn. They are unsurpassed as a grain and fodder crop, for dry, alkali lands. The feeding value of the grain, forage and silage of these Sorghums is about equal to that of Corn.

They should be planted about 10 days later than Corn, as they do not withstand the cold and dampness of Spring like Indian Corn, but are strictly hot weather plants. Sow for grain, 4 to 8 lbs. for silage, 8 to 12 lbs., and for hay, 1 to 2 bushels per acre. Cut for hay when the grain is in the milk or soft dough stage; for silage, when in the hard dough stage or nearly ripe; for grain, when fully matured.

Buckbee's Early Kaffir Corn.

WONDERFUL MILO MAIZE

An Early Grain Sorghum. A Sure, Dry-Weather Crop.

This Dwarf Milo is extensively grown for grain in sections where the season is short. It matures in 90 to 95 days; an earlier and surer crop than Kaffir and superior in feeding value. Admirably adapted to dry-land farming. The grains are the largest of all Sorghums. Stalks 2 to 3 feet high; coarser and less leafy than those of Kaffir. Postpaid, pkt. 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. 85c.

BUCKBEE'S EARLY KAFFIR CORN
The Standard Grain Sorghum and the Best for Forage and Silage.

Early Kaffir Corn not only produces excellent forage and silage, but the seed is, as a grain, almost if not equal to Indian Corn, while it is profitably grown on land high and low, rich or poor and whether the season is wet or dry.

Plants attain the height of from 5 to 8 feet, growing upright. Stems have a stalky tendency and produce numerous wide leaves; they do not harden as do many other Sorghums, but keep green, brittle and juicy, making the best silage or forage, either green or dry, of any of the grain Sorghums, and are highly relished by all stock.

Early Kaffir is grown more extensively than any other grain Sorghum, and it usually outyields all other varieties, and also Corn for forage as well as grain. It does well in most parts of the corn belt.

Early Kaffir matures in about 110 to 120 days.

Very choicest "Full of Life" seed of strong germination. Postpaid, pkt., 10c; ½ lb., 18c; 1 lb., 30c; 3 lbs., 85c.

SHEET

Egyptian Wheat or Shailu.

EGYPTIAN WHEAT or SHAILU

A valuable new grain, entirely different from Wheat. It belongs to the Sorghum family and should be planted like Cane or Kaffir Corn, for hay or grain. Broadcast, it makes from 4 to 8 tons to the acre. In drills, it yields 75 to 85 bushels of grain per acre. The plant grows from 5 to 7 feet tall, stools out from the root, a single grain often producing 3 to 4 stalks. It produces more grain than any other Sorghum. The grain makes excellent feed for horses and cattle. When ground it makes fine flour for pancakes; it pops like popcorn. Postpaid, pkt., 10c; ½ lb., 18c; 1 lb., 30c; 3 lbs., 85c.

JERUSALEM CORN

Belongs to the non-saccharine Sorghums, and was brought a few years ago from the arid plains of Palestine. It is pronounced the surest grain crop for dry countries and seasons—better adapted for the sections with very low rainfall than Kaffir Corn or Milo Maize. It grows one large head on main stalk and several smaller heads on side shoots, having often as many as 8 heads on a plant. Very valuable for feeding stock, and proves a gold mine for chicken feed. The grain is pure white and nearly flat. Plant 5 to 10 pounds per acre. Postpaid, pkt. 10c; ½ lb. 20c; 1 lb. 35c; 3 lbs. 85c.

JERUSALEM CORN

FETERITA—The Earliest and Most Drouth Resisting Grain Sorghum.

Introduced by the United States Department of Agriculture from Africa. It produces a stalk 2 to 3 feet high and a large head of small filled with bluish-white seeds. The grain is softer and larger than that of Milo and Kaffir and in feeding value is equal to either of them. Feterita is an excellent drouth resister; it yields from 50 to 80 bushels of grain per acre. It stands erect, branches out from the root, matures 25 days earlier than Kaffir, ripening in about 85 days. Often used as catch crop to follow Winter Wheat or early Oats in the South. Not as leafy as Kaffir and not so much used for forage. Postpaid, pkt. 10c; ½ lb. 18c; 1 lb. 30c; 3 lbs. for 85c.

Feterita

Sugar Cane or Sweet Sorghum

Sugar Cane can be profitably grown in all portions of the United States where corn is grown, and it is more drought resistant than corn. It remains fresh and green through periods of drought that ruin corn.

As a **soiling crop** it has a very high value. Milch cows are exceptionally fond of Sugar Cane, and it is excellent for milk production. It furnishes an enormous quantity of succulent food, outyielding corn for forage, and it is fed with much less waste. At the Iowa Agricultural College 25 tons were harvested per acre.

As a **pasture crop** it is mostly used for hogs and sheep. It makes splendid hay, which is very palatable, nutritious and much relished by all kinds of stock, including hogs.

The silage of Sugar Cane has practically the same feeding value as that of Corn and Kafir, but Sugar Cane generally produces a much larger crop than those varieties and is the most profitable crop to grow for silage. What Sugar Cane is not wanted exclusively for silage it may be mixed with Field Corn with most satisfactory results.

As a **catch crop**, Sugar Cane is much used. It could be sown after an early grain crop, or in place of other crops, if they have been destroyed by frost, flood, drought, etc. The plants grow very quickly, reaching maturity in about 70 days.

It yields a large quantity of **Seed**, about 25 to 30 bushels per acre, which can always be saved, no matter for what purpose the crop is wanted, if the cane is cut only when the seed is nearly ripe. The seed has a high feeding value. It makes a fine feed for all stock if crushed and mixed with oats, peas or soy beans. One of the most common uses of cane seed is as poultry feed, and it is especially recommended for laying hens.

For hay, sow broadcast or in drills at the rate of 50 to 100 lbs.; for silage and forage, sow in drills 3½ feet apart, using 12 to 15 lbs., and for syrup, use 6 to 8 lbs. per acre. The seed should be sown about 10 days later than corn. Cut for hay when grain is in the milk and for silage and syrup when in the dough stage.

BUCKBEE'S NEW HONEY SYRUP CANE The Favorite Syrup Producer.

This is the earliest Cane, and our seed is grown in the North, is entirely pure, not mixed with any other sorghum.

As a syrup producer it has no equal, being exceedingly juicy and sweet, making from 200 to 400 gallons per acre, highly flavored. It grows 10 to 12 feet high, is very prolific, sometimes producing 5 to 7 stalks from one seed. Matures about the middle of August to October, according to time of planting; will keep green and stand, if desired, until killed by frost, allowing the farmer to take his own time to harvest for syrup. In addition to the syrup, a crop of seed could be grown worth \$25.00 or \$30.00 per acre. Also a splendid forage crop for green feeding, and will make excellent hay if sown in drills very thick. It may be planted any time between April and August. Price, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

BUCKBEE'S IMPROVED EARLY AMBER

Successfully grown even in the extreme northern latitudes. Not only is it valuable for fodder and pasture purposes, but it makes a high-grade cane syrup or sorghum. Price, postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

BUCKBEE'S IMPROVED EARLY ORANGE

An exceedingly valuable variety. Very large, of strong and vigorous habit. Frequently produces 240 gallons or over of beautifully colored and highly flavored syrup per acre. About 1 to 3 weeks later than Early Amber, but taller and producing a heavier quantity of forage. Price, postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

Buckbee's
New
Honey
Syrup
Sugar
Cane.

Australian Salt Bush

A valuable forage plant for soils containing alkali and for all regions subject to periodical drought; will grow freely on soils that will produce no other vegetation. It seems to take up from the soil the salty substance which is so detrimental to the growth of other plants, and after 3 or 4 crops of it have been grown the soil is capable of producing any other crop. The plant is a perennial in the South, but not hardy in the North, and has to be sown there every year.

Sow in Spring or Summer, when soil is warm and moist, after a rain; do not cover seed. When once started it will grow strong and vigorously during the driest season. The plants are of spreading habit, branching freely; they make a thick mat of stems and foliage 3 to 4 feet in diameter, yielding about 20 tons of green forage per acre, which makes about 5 tons of hay. This is very nutritious and eagerly eaten by all live stock. When dry it contains about 8 to 10 per cent of salty matter. One pound ¼ lb. seed will sell one acre. Postpaid, pkt. 8c; oz. 15c; ¼ lb. 35c; lb. \$1.25.

Giant Beggar Weed.

Australian Salt Bush.

Thousand-Headed Kale

Similar to and now frequently used in place of rape, as it yields a heavier crop, which is estimated at about 100,000 lbs. per acre in one season.

Thousand-Headed Kale attains a height of 3 to 4 feet; the stem is covered with rosettes of leaves. It grows well on almost any kind of soil and is hardy. All farm animals are fond of it, but it is of especial value for feeding hogs and sheep. Sow same as rape; broadcast requires 1½ lbs. per acre. Postpaid, pkt. 10c; ¼ lb. 40c; lb. \$1.25.

Thousand-Headed Kale.

Giant Beggar Weed or Florida Clover

A Splendid Forage and Soil Renovating Crop for the South

An erect leguminous, annual plant, from 3 to 5 feet high, with abundant foliage; excellent as a pasture crop; makes hay of the finest quality. The feed is much relished by stock and is highly nutritious, comparing favorably with that of red clover and cowpeas. It is especially recommended for thin, sandy soil, and on land too poor to grow any other crop it has produced 3 to 5 tons of cured hay per acre. If cut when about 2 feet high, the plants again stool out from the bottom, yielding successful crops. It is an excellent crop to turn under for green manure. It can be easily eradicated. Sow when soil is warm in June, 3 or 4 lbs. in drill 3 feet apart, or broadcast 10 lbs. per acre; cover 1 to 2 inches. Will mature in 50 days. Postpaid, oz. 10c; ¼ lb. 25c; ½ lb. 40c; lb. 75c.

BUCKBEE'S DWARF BONANZA RAPE

There is no other forage plant which can be grown so advantageously in the northern part of the United States and which furnishes such an abundance of succulent forage during Summer and Fall when the supply of grass and clover is often limited as Rape. It is indispensable for raising sheep and hogs and is much relished by all stock.

Rape belongs to the Cabbage family, grows 2 to 3 feet high and is never troubled by insects.

Buckbee's Dwarf Bonanza is undoubtedly the heaviest yielder of all varieties of Rape. Crops of nearly 50 tons of green fodder per acre have been reported of it, while of Dwarf Essex not more than 10 to 20 tons have been harvested.

Rape is best adapted to cool and moist climates, but has also successfully been grown in warm and dry sections.

Rape does well on most any kind of soil, especially if rich in vegetable matter, as it is a gross feeder. Land that produces a good crop of corn and wheat is suitable for Rape. In the northern states Rape is sown from April to August, and in the South from August to October.

Four to five pounds of seed are sown per acre if sown broadcast, and 2 to 3 pounds if sown in drills 24 to 28 inches apart

to allow cultivation. It may be sown alone in Fall after the grain has been harvested, or it may be sown in the Spring in the Winter or Spring grain, when this is 2 to 3 inches high, at the rate of 2 lbs. per acre. With a good stand of Rape in the stubble, sheep can be turned in in about 3 weeks after the grain is cut. It also is sown in the corn at the last cultivation.

When the crop is cut it is best to follow with a cultivator, this will cause the stems to send out new shoots more rapidly.

Rape is usually ready for use in about 2 months from sowing the seed; it is used as a soiling crop in many places, but its chief use is for pasture and especially for hogs and sheep. Its fattening properties are twice as good as clover.

There is no danger to hogs from bloating, but cattle and sheep may suffer seriously if sufficient care is not taken. When on Rape they should at all times have access to salt.

Rape must not be fed any more after it has been frozen.

Postpaid, pkt. 10c; 1b. 35c; 3 lbs. 95c.

SHEET

Dwarf Essex Rape

A standard variety. Not quite so strong and vigorous as Dwarf Bonanza, but never fails to give the best of satisfaction. Fine imported seed. Price, postpaid, 1b. 30c; 3 lbs. 85c.

Lentils

This is a comparatively unknown but really valuable addition to our food supplies. The seeds should be sown in Spring in drills and no further attention is required until August or September, when the plants are ready to eat. The seeds keep best in the pods and should only be removed as occasion requires. They are cooked after the manner of beans; they also make excellent soup. Pkt. 10c; ¼ lb. 25c; 1b. 75c.

Field Lupines

An annual leguminous plant, very valuable for plowing under to reclaim poor soil, particularly sandy and old, wornout land. It makes also good fodder in either the green state or as hay. The seeds are very fattening when used with hay. Sown in the early Spring at the rate of 60 to 90 lbs. per acre. Postpaid, pkt. 10c; ¼ lb. 25c; 1b. 75c.

Giant Spurry

An annual fodder plant. It flourishes on sandy, wornout soils where no other plant will grow; it grows from 1 to 3 feet high. Can be sown any time from April to August. It comes next to clover as a fertilizer. It is of very rapid growth and can be used for pasture 4 to 6 weeks after sowing. Sown broadcast at the rate of 10 pounds per acre if wanted for hay, or 20 lbs. if needed for fertilizer, and cover lightly by harrowing. For fertilizer plow under when from 15 to 20 inches high. Two crops can be plowed under in one year on account of its quick growth. It is readily eaten by cows. Postpaid, oz. 10c; ¼ lb. 30c; 1b. 90c.

Giant Spurry.

Sunflower

Sunflower seed makes a splendid food for all farm animals; it is relished by horses and cattle, fattens sheep and swine, but it is especially valuable as a food for fowl and is the best egg producing food known. It also keeps the fowl in strong, healthy condition; gives it a bright, lustrous plumage and is said to prevent roup. The strong, thick stalks can also be used as fuel. Sunflower is one of the cheapest foods known. Can be raised cheaper than corn. The variety we offer is an immense yielder and often produces crops of 100 to 125 bushels per acre.

Sunflowers are planted in rows or hills and cultivated the same as corn. If you cannot spare land to cultivate them, plant them in the waste corners. The heads should be cut from the stalks before they are fully ripe, as they are apt to mould on the stalks; spread heads out thinly on the barn floor or corner, and as soon as dry enough remove the seeds from the heads; this is done the easiest way by rubbing the inverted head over a coarse screen. Three pounds of seed will sow one acre.

MAMMOTH RUSSIAN—This is the largest—"the Jumbo" of the Sunflowers. There is no variety which produces larger seeds or heads than this one. Single heads measure 15 to 25 inches in diameter and contain an immense amount of seed. It is very productive. Postpaid, oz. 5c; ½ lb. 15c; 1b. 25c; 3 lbs. 70c.

Bird Seeds

CANARY, best Sicily.....Postpaid, ¼ lb. 18c; 1b. 30c; 3 lbs. 85c

BIRD RAPE, strictly pure.....Postpaid, ¼ lb. 18c; 1b. 30c; 3 lbs. 85c
MILLET, for birds.....Postpaid, ¼ lb. 15c; 1b. 25c; 3 lbs. 70c
MIXED BIRD SEED, for Canaries, etc., strictly clean.....Postpaid, 1b. 25c; 3 lbs. 70c

SUNFLOWER

BUCKBEE'S HARDY NORTHERN AMERICAN ALFALFA

There is no State in the Union Where It Cannot Be Successfully Grown.

FACTS ABOUT ALFALFA

One acre of Alfalfa yields as much protein (the milk and meat producer) as three acres of common Clover or nine of Timothy or twelve of Bromus Grass.

It does not exhaust the soil; it enriches the soil.

CULTURE OF ALFALFA

SOIL—The soil must be well drained and freed of weeds. Alfalfa does not thrive where water is within 6 feet of the surface.

LIME—Where lime is not present in the soil it must be supplied or the plants will fail.

INOCULATION—Soil is the best source of inoculation, see below. We can also furnish bacteria inoculation for Alfalfa. See page 96.

SOWING THE SEED—Seeding can be done in Spring or Fall. In the Northern States seeding must be done before Aug. 15. Use 10 to 15 pounds of seed on a well-prepared seed bed in the Northern, Western and Central States and 20 to 25 pounds in the Eastern and Southern States.

CUTTING FOR HAY—Alfalfa should be cut when about one-tenth in bloom, but in the North never later than Sept. 1.

CUTTING FOR SEED—Cut when the pods are dark brown.

BUCKBEE'S HARDY NORTHERN ALFALFA

We have handled this strain for many years and the best results have been obtained with it everywhere, only in exceptionally severe winters did it freeze out in some Northern localities, but many of the finest Alfalfa fields in the Northwest have been sown with it; some of them are now very old, but still produce well. This seed comes from very old, very long established fields on dry non-irrigated land which lived through the severest winters. The fact that our seed is taken only from very old fields and the actual results our customers obtained with it in the North and South prove it an extremely hardy frost and drought-resistant and almost everlasting strain of Alfalfa. It stood extreme pasturing and late cutting without injury and stood as much cold as any other Alfalfa seed raised in Montana and Dakota, except the hybrid varieties like Grimm, etc. Besides being very hardy, our strain grows very tall and is more productive than most other kinds on the market.

Buckbee's Hardy Northern Alfalfa, "FULL OF LIFE," Price, Postpaid, Pkt. 10c; lb. 50c; 3 lbs. \$1.40.

SIBERIAN ALFALFA

The following varieties are the best of the new kinds of Alfalfa brought by Prof. N. E. Henson, of the South Dakota Experiment Station, from Siberia, where they were growing in localities having a short and hot summer and a long, bitterly cold winter.

These varieties have been grown now for many years in the Northwest and have made good; they grow luxuriantly on the dry uplands west of the Missouri and as far north as Alaska, standing adverse conditions of drought and cold in which no other forage plant will survive. They never winter kill.

The seed we offer is grown in South Dakota and is true stock. We recommend to sow these high-priced sorts with a garden-seed drill in rows 3½ feet apart, using 2 pounds for one acre.

COSSACK—A Hybrid of purple-flowered and hardy yellow-flowered Alfalfa. It resembles Grimm, but is a larger producer of both forage and seed. It also has both yellow and blue flowers, often both on the same stem and many intermediate shades. It can readily be distinguished by its flowers from common Alfalfa which makes it very valuable. Of tall, upright growth, recovers quickly after cutting. Price, postpaid, pkt. 10c; lb. 50c; 3 lbs. \$1.40.

ORENBURG—pure, hardy, yellow-flowered variety. Probably the most valuable of all Alfalfas and entirely different from all other kinds known now. Its root-system is entirely different from those of others, having hardly any tap-root, but a mass of laterals spreading out in all directions and for great distances, making it impossible for the plant to grow where weeds are near the surface. The crowns are 4 inches below the surface and of mature plants average about 2 feet in diameter. They send up hundreds of stems which are finer than those of common alfalfa and much more leafy. Orenburg makes the best forage of all Alfalfas, but it does not grow quite as tall as others. Price, postpaid, pkt. 10c; oz. 25c; lb. \$2.00.

A Single Plant of
Pedigree Grimm
Alfalfa

PEDIGREE GRIMM ALFALFA SEED

Montana Grown on Dry Land

No other Alfalfa has a record of hardiness, drought-resistance and productiveness like Grimm. Two years ago all Alfalfa and Clover fields in a large part of the Northwest froze out—only the fields of Grimm survived. It proved then again the most hardy and dependable forage plant we have.

The characteristics of the Grimm in which it differs from common Alfalfa are:

The branching root stock, which enables the plant to live above hard-fpan, on poorly drained soil and so withstand heaving.

The sunken crown, that is a crown below the surface and protected by soil from winter freezing and drying out. It also generally has variegated flowers, mostly blue shades, but occasionally yellow blossoms.

Our Grimm Alfalfa seed has been grown in Montana on dry land. We recommend it to be genuine, straight stock, free from noxious weeds. It has a vitality of not less than 95 per cent and a purity of 99 per cent.

Sow two pounds of seed per acre when drilling in rows 24 to 32 inches apart. Use five pounds when broadcast on well-prepared fertile soil.

Price, Postpaid, pkt. 10c; \$1.00 per pound. By express or freight, not prepaid, 50 lbs. for \$30.00.

PEDIGREE GRIMM ALFALFA PLANTS

By setting plants a full stand is assured and a gain of one year is made; the plants grow quickly after being set out and secure a foothold in the soil which dry weather cannot overcome. By root planting Alfalfa bacteria are easily established in the soil as they cling to the roots when planted and save the expense of inoculation.

To secure best results, set the plants in rows two to three feet apart and 18 inches apart in the row. They may be plowed in by setting against a furrow and plowing against them. The crown should be set four inches beneath the surface. Cultivate to keep down the weeds. When planted as suggested about 5,000 to 15,000 plants are required to the acre.

We ship Alfalfa Plants during the months of April, May and October.

Prices: Strong Two-Year-Old Plants, by mail, postpaid, per 100, \$1.00; by express, not prepaid, per 500, \$3.00; per 1,000, \$5.00.

INOCULATED ALFALFA SOIL

The best and surest way to inoculate a field with Alfalfa bacteria is by applying soil of an old Alfalfa or Sweet Clover field at the rate of 100 pounds per acre; scatter the soil over the field the afternoon and harrow it in immediately; do not allow the sun to strike it.

We can furnish Alfalfa soil free of weeds at the following prices: By Express or Freight at buyer's expense, sacks included, 100-lb. sack, \$2.00; 500 lbs. \$8.75; 1,000 lbs. for \$15.00.

BUCKBEE'S "FULL OF LIFE" CLOVERS

BUCKBEE'S "FULL OF LIFE" CLOVERS ARE THE HIGHEST GRADE OBTAINABLE

These seeds are carefully tested and are of the highest vitality and purity; they are free of noxious weeds and other foreign seeds. In fact, we aim to have every bushel of Buckbee's Famous "FULL OF LIFE" Clover Seeds that we send out test 98 per cent or better for purity and 95 per cent or better for germination. These seeds are also very plump, heavy, being well ripened, so as to insure a good stand and big crop.

Alsike Clover.

FOR

SHEET

Alsike and Timothy Mixed

When Alsike and Timothy are grown together it is impossible to make a complete separation of the seeds of these two varieties. We are purchasing this mixture for less money than we could have separated seed and can, therefore, sell it for less. Those desiring to sow Alsike and Timothy together, therefore, can save money by buying the seed in mixture as originally harvested. This, we believe, is the cheapest Clover and Grass Seed Mixture you can buy.

Alsike and Timothy make an excellent combination for hay and pasture; they are adapted for the same kinds of soil and mature together; they do well on most any land where other

grasses and clovers grow, but give the best results on moist lands. Both varieties are perennials, are very hardy, do not winter kill and when once established they will live for years. This mixture has given enormous yields on many different kinds of soil and has given better satisfaction than any other grass-mixture ever offered; it is of the highest feeding value for stock of all kinds.

Our mixture contains about $\frac{1}{2}$ Alsike, the other part is pure Timothy. It can be sown alone or with small grain in the Spring or Fall. Price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

Medium Red or June Clover

This is the most valuable and most universally grown clover throughout the country. It is a dependable variety for pasture and meadow. It lives 2 years, grows 2 to 4 feet high, makes 2 crops each year. The first one is generally cut when in blossom for hay; the last crop may be harvested for seed, cut for hay or plowed under, to add fertility to the soil.

Medium Red Clover furnishes a splendid pasture; all animals thrive on it, especially cattle, sheep and pigs.

For soiling crop it is much used, furnishing succulent food all season.

It yields about 3 tons of well cured hay per acre.

This clover, whether used as hay or green fodder, is very nutritious and always greedily eaten by all farm stock; less grain is required where clover is fed to keep stock in the condition.

Clover adds to the fertility of the land on which it is grown. Like all leguminous plants, the clovers add nitrogen to the soil. It can be drawn upon in subsequent crops, and crops following a crop of clover are larger and of better quality than when grown on land not improved by clover. It is estimated that a full crop of Medium Red Clover turned under adds \$3.50 worth of nitrogen alone to the soil per acre. It would pay, therefore, to grow clover even if for no other use than green fertilizer; and it would as the cost of fertilizers and the expenses of using farm manure.

Medium Red Clover does well on a great variety of soils, and it thrives most luxuriantly on strong, well-drained loams.

It may be sown in the Spring or Fall, and if sown alone, 8 to 12 lbs. are used per acre.

Buckbee's Northern-grown Clover Seed has become widely known for its purity, strong vitality, hardiness, vigorous and healthy growth and sterling qualities, so that we now receive many orders from the most distant parts of the United States. It pays to have the best.

Buckbee's "FULL OF LIFE" Medium Red Clover—the plumpest, purest, cleanest seed of the highest vitality. Price, postpaid, pkt. 10c; lb. 75c; 3 lbs. \$2.15.

Medium Red Clover.

Mammoth Red or Sapling Clover

Mammoth Red Clover is quite distinct from Medium, being larger, of coarser and more robust growth, and two to three weeks later. It is also more hardy, stands frost better and is more permanent, but makes only one crop, and pasture after that. On rich, loamy soils it attains an immense growth yielding much more bulk than Medium. Mammoth Red grows well on land too poor and on soil too low for Medium Red, and is therefore largely used to restore fertility to wornout soil. Mammoth Red Clover should be in every permanent pasture, as it retains its greenness throughout the Summer and furnishes a larger amount of forage than Medium Clover; it is especially used for permanent hog pastures. As a fertilizer for green manuring it also surpasses Medium Clover, growing more rank and making more bulk to plow under. Sow 8 to 12 pounds of seed per acre.

Buckbee's "Full of Life" Mammoth Clover, price, postpaid, pkt. 10c; lb. 75c; 3 lbs. \$2.15.

White Clover for Lawns

A low growing clover, spreads rapidly and is very hardy; valuable for permanent pastures, being sweet and nutritious. For lawns it is also much valued, its flowers being white, fragrant heads, which make excellent pasturage for bees. It grows on most any kind of soil, but succeeds best on moist ones. Postpaid, pkt. 10c; lb. 85c; 3 for \$2.50.

White Clover.

Mammoth Red Clover.

White Bokhara, Sweet or Bee Clover (*Melilotus Alba*)

A Money-Making Crop for All Sections of the Country. Valuable for Soilage, Pasture, Hay, as a Honey Plant, and Especially as a Fertilizer.

Of the different varieties of Sweet Clover the white flowering is the most important one and the one mostly grown. It is biennial; if not cut or mowed, it will live the second year. Grows 5 to 9 feet high. The flowers are white, give a strong smell of honey and appear only the second year from sowing.

Sweet Clover can be grown successfully in all parts of our country and on most soils except sour ones. It is one of the few plants to thrive on alkali and also on gumbo land. It will endure more drought, frost, wet than Alfalfa or any other clover.

To succeed with Sweet Clover the ground must contain lime and must be inoculated; the bacteria being the same for Alfalfa and Sweet Clover, old soil of one will inoculate the field of the other variety. We can furnish Alfalfa soil, see page 105, and also Edwards' Legume Bacteria for the inoculation of Sweet Clover, see page 96.

There is no other legume which furnishes more pasture than when 5 or 6 inches tall the cattle could be turned on it; it affords green food from early Spring until late Fall, always throwing out fresh growth as fast as eaten off; it should not be allowed to grow tall, as it will then get hard and woody. It has been used especially successfully in pasturing sheep and hogs. For a permanent pasture it is much sown with Bromus inermis, using about 10 lbs. of each per acre.

Sweet clover yields one good crop of hay the first year and two the second year. It should be cut in hay before it comes into full bloom and about a foot high, otherwise the plants may be killed. The hay is cured the same as clover.

Stock not accustomed to Sweet Clover do not eat it readily at first, but soon acquire a taste for it and prefer it then to all other plants. It gives the milk and butter a delicious flavor and in feeding value it is about equal to Alfalfa. Cattle and sheep may fill up on it to the highest pitch, but will never bloom.

For seed, Sweet Clover should be cut when about 3/4 of the pods have turned brown; an ordinary clover huller will thresh the crop clean. It yields from 6 to 10 bushels per acre.

As a honey plant, White Sweet Clover is most valuable. It blooms from July till frost and yields a big crop of honey of excellent quality.

Sweet Clover is the greatest of all fertilizer plants which we have; when a full crop of it is plowed under it adds four times as much nitrogen to the soil as clover. Buckbee's "Full of Life," hulled seed, postpaid, pkt. 10c; lb. 55c; 3 lbs. \$1.55.

Yellow Sweet Clover (*Melilotus Officialis*)

This is a biennial variety like the white; it does not grow quite so tall, only about 4 to 5 feet high, the stalks and branches are, however, more slender, making fine hay. It blooms a month earlier than the white and is often used to supplement this for bee pasturage. Hulled seed, postpaid, pkt. 10c; lb. 50c; 3 lbs. \$1.40.

Burr Clover

An annual clover for the South; matures in May. A most valuable winter grazing crop, growing luxuriantly all through the Winter. After once being seeded, it reseeds itself and improves in growth each succeeding year. It is admirably adapted for growing with Bermuda Grass; the combination of the two makes a splendid all-the-year-round pasturage. Sow 15 pounds per acre from July to October.

Price, hulled seed, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

Japan Clover or Lespedeza

A valuable perennial clover for the South. Stands excessive drought and is particularly suitable for wornout soils, waste lands and woodland pasture, growing well in the shade.

Especially valuable for pasture and green fertilizer. On good and moist soils it grows 20 inches high and can be cut for hay. It is of low spreading growth on poor soils, furnishing pasture from June till frost. When once established, it usurps the land, driving out all wild grasses and weeds, but can be easily eradicated. Its large roots, when decaying, leave the soil porous and greatly enriched.

Often sown in Spring in the growing grain or in a Bermuda Grass Meadow. Sow broadcast in early Spring, 25 lbs. per acre. Postpaid, pkt. 10c; lb. 65c; 3 lbs. \$1.85.

GIANT INCARNATE

BUCKBEE'S GREAT SAND VETCH (*Vicia villosa*)

The Sand Vetch, also called Winter Vetch or Hairy Vetch, is an annual plant, similar in growth to a Pea Vine, but more slender, more branching and leafy; it will grow from 6 to 10 feet tall. As the name indicates, it has a special adaptation for sandy soils; it succeeds well on light soils too poor for clovers, cowpeas, etc., but will give a bigger crop on better soils.

Although fair crops have been obtained without inoculation, it is our experience that inoculated soil produces surer and bigger yields. We can furnish Nitrogen inoculation for Vetch, see page 96.

Sand Vetch is of great value for pasture and hay, and the fodder, either green or dried, is much relished by all stock; it is very rich, nutritious, containing even more protein than Alfalfa. It is cut for hay when pods are forming; the average yield of hay is from 3 1/2 to 4 tons per acre.

Sand Vetch is, however, mostly grown and is of the greatest value as a fertilizer; it is the best legume for enriching soils of low fertility. The total weight of a crop of Sand Vetch if plowed under is estimated by the Department of Agriculture to be equivalent of \$16.00 to \$45.00 worth of commercial fertilizer per acre; or twice as much as crop of clover.

Sand Vetch is the best cover crop for orchards which we have. Vetch is sown in Spring and in Fall; in the northern states not later than the middle of August; in the corn belt not after middle of September, but later farther south. It grows best in cool weather. If sown before July 1st it generally freezes out, but if sown later it lives over Winter, goes to seed in June, then dies.

Sown early in Spring alone or with a nurse crop of barley or oats, it furnishes good Summer and fall pasture. The best returns, however, are obtained of this plant when sown in the fall and it may be sown alone, or with the corn or cotton, or with winter rye, or with any of the nurse crop. Seeded in the fall, it will come on early in Spring, and will yield a bountiful crop of hay or splendid pasture till June; or can be plowed under about May 10th in the north, when it will be a mass of green stalks and leaves—good all the way to the plow.

Sow 35 to 40 pounds of Sand Vetches if sown alone, or 25 pounds Vetches with 1 bushel of Oats or Barley in Spring, or 1 bushel of Winter Rye in Fall. Cover Vetch about 1 inch deep. Postpaid, pkt. 10c; lb. 50c; 3 lbs. \$1.40.

Spring Vetches

An annual, sown in Spring only; does not do as well in the north as Sand Vetches. Sow alone 50 lbs. per acre, or 40 lbs. Vetches and one bushel of Oats, Postpaid, pkt. 10c; lb. 35c; 3 lbs. 95c.

Buckbee's Sand Vetch

Bokhara or Bee Clover. White Sweet

Crimson Clover (*Giant Incarnate*)

Valuable for Pasture, Soilage, Hay, But Especially for Plowing Under to Restore Wornout Soils

Crimson Clover forms upright branching plants, 2 to 3 feet high, blooms a month earlier than Red Clover, its roots very deeply and is a bountiful provider of nitrogen. It grows more luxuriantly on fertile loam, yet it will thrive better on thinner and poorer soil than Red Clover. It is more efficient for green manuring than the latter. A plowed under crop of Crimson Clover is equivalent to 20 tons of stable manure per acre. It is the cheapest source of nitrogen, has revolutionized the methods of farming in many states, and has restored profitable cultivation thousands of acres of poor land.

It is an annual Clover, where the climate is warm like in the Atlantic and Southern States, it is mostly planted in the Fall and lives over Winter. However, in the Northern States it would winter kill, and here it should be planted only in Spring.

It is one of the best clovers for use in the silo, yielding up to 20 tons of green forage per acre. For soilage and for pasture it is frequently sown with Rape, Winter Rye or Vetches. Sow at the rate of 15 pounds per acre. Price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

BUCKBEE'S "FULL OF LIFE" GRASS SEEDS

Are of the HIGHEST GRADE obtainable, both as respects purity and high germination; they are pure and clean, free from noxious weeds and foreign seeds and are plump, heavy and well ripened, so as to insure a good stand and a big crop.

Timothy

Timothy is the most popular and most important of all hay grasses and is adapted to a wider range of conditions than any other variety of grass. It is one of the most certain grasses to grow, and without doubt is the hardiest of all our grasses; no other kind will stand the extremes of heat and cold better than this one; no other variety equals it in average yields, excels it in feeding value.

It luxuriates on clay and moist soil and is unsurpassed on peat, but it does not root as deeply and is not considered, therefore, as much an improver of soils as many other grasses; consequently it should not be sown on land deficient in humus or on soils of light, sandy nature. It flowers in July and should be cut when in full bloom, as if left until later the hay becomes hard and coarse. The hay is very nourishing and can be preserved for a long time; it is greedily eaten by all cattle and horses and are especially fond of it. On average soils it is frequently sown along with Mammoth Clover, and on lower soils generally with Alsike; these two clovers mature with the Timothy. The practice of sowing the common Red Clover with Timothy is not advisable, as they do not ripen together and either one or the other must be cut at a stage which will not give the best results. For pasture, Timothy cannot be well recommended. If sown alone its growth is not thrifty enough and close pasturing is very injurious to it. For pasturing, therefore, it should be sown along with other grasses and the varieties best suited to grow with it, both for pasture and meadow are Red Top and Meadow Fescue which are some of our most hardy, perennial varieties and at the same time as Timothy. We have also added Timothy to most of our Clover Grass mixtures wherever good results could be expected (see page 113). Timothy attains the height of its productiveness in the first year after being sown. It has proven itself especially well adapted to the Northwest and seldom fails to make a good stand on prairie soil even sown early in the season under suitable conditions.

Height, 2 to 3 feet; yield of hay on good ground, 3 tons per acre. If sown alone, use $\frac{1}{2}$ bushel per acre; to sow with clover, use 3 pounds Timothy and 3 pounds of Alsike, or 5 pounds of Mammoth Clover.

Buckbee's "FULL OF LIFE" brand will stand the test of all Pure Seed Laws and has a purity higher than 98 per cent and a vitality of more than 95 per cent. It is pure, bright seed, very little hulled. Our prices, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.30.

Red Top or Herd's Grass

A very hardy native grass and probably the most perennial variety we have. Red Top accommodates itself to a variety of soils, even to quite dry situations, but succeeds best on moist land, where it attains a height of 2 to 2½ feet. After being once established, it thickens and improves year by year, taking possession of the land, gradually supplanting other grasses; but it is easily eradicated in case it is desired to put the land in cultivated crops. It is especially valuable as a permanent pasture, growing in continuous growth, does better on undrained, moist soils, which are occasionally overflooded, than any other grass. It is of slender growth, fine foliage, and throws out slender, spreading heads; it is very nutritious and much relished by all cattle. Sow 10 pounds seed per acre.

Buckbee's "FULL OF LIFE" Red Top, price, postpaid, pkt. 10c; lb. 40c; 3 lbs. \$1.15.

Meadow Fescue or English Blue Grass

One of the most valuable grasses for all parts of the country. Drought and frost resistant, furnishing an abundance of pasture from early Spring until late Fall.

Meadow Fescue is well suited to a wide range of soils, does well on loamy and gravelly soils, and thrives on heavy black loam, strong and low-lying soils, but is not adapted to light sandy soils.

Of all grasses, Meadow Fescue is the surest crop. It comes up quickly and in three or four weeks after sowing it will be about 4 inches high and cover the ground perfectly.

It lives longer than most other kinds of grasses, and although it produces the first year a good crop of hay or pasture, it does not reach the highest stage of growth until 2 or 3 years, and for this reason it is best adapted for permanent pastures and meadows.

It would not be advisable to sow the seed for a shorter period than 3 or 4 years. As a pasture grass it is particularly valuable, as it is the most persistent grower and is one of the very earliest in the Spring and the latest in the Fall. When two or three years old it produces the most nutritious matter, producing four to five tons of hay per acre. It is always tender and succulent, and the forage, either green or dried, is very nourishing and much relished by cattle. Horses eat it greedily.

Meadow Fescue matures at the same time as Timothy and Red Top and Alsike Clover, and for meadowing and pasturing it is well adapted to all soils. It flowers in June and July. Sow 15 to 25 pounds per acre broadcast without nurse crop. Buckbee's "FULL OF LIFE" Meadow Fescue, price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

Meadow Fescue.

Red Top.

Orchard Grass

A valuable grass for pasture or hay land, and on account of its earliness especially valuable for a permanent pasture. It furnishes green grass very early in the Spring and until late in the Fall. When closely cropped it grows up very quickly and is ready for grazing again in ten to twelve days. It is succulent and nutritious, furnishing excellent pasture or hay. When grown for hay, two good crops can be obtained in one season. The roots extending to a great depth, it will stand drought better than most other grasses; it is very hardy. It grows in tufts, and is, therefore, best sown with other grasses. It is well suited for shady places, such as orchards and groves. Grows on all kinds of land, but does best on deep, rich, sandy loam or clay soils. Height, 3 feet. It flowers in June, three weeks earlier than Timothy and about the same time as Red Clover and Tall Meadow Oat Grass. Sow 2 pounds per acre.

Buckbee's "FULL OF LIFE" Orchard Grass, price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

Orchard Grass.

Kentucky Blue Grass

One of the most widely distributed and valuable native grasses. It is a true perennial, lasting indefinitely and improving every year. It forms a close turf, starts very early in Spring and lasts until frost. It succeeds in almost any soil, except very light or very sandy soils, and stands long, continuous dry weather. It remains small the first year, but becomes fully established the second year. It is especially valuable as a pasture grass, and is also one of the very best grasses for the lawn. It is very productive and nutritious. Sow 20 to 25 pounds per acre.

Buckbee's "FULL OF LIFE" Kentucky Blue Grass, price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

Kentucky Blue Grass.

Bromus Inermis.

BROMUS INERMIS

A great and wonderful grass that has proven a great boon for the dry, arid districts of the West, North and South. It does not need irrigation. It supplies the feed for many of the large stock ranches of the plains. Bromus adapts itself to nearly all conditions of soil and climate, equaling in quality and rivaling in yield almost any other grass. It is a good grass for all States of the Union, does well on poor and on rich soil, has proven one of the best grasses for low, wet and mucky soils, and gave good returns on poor, sandy soil where Timothy was an entire failure. Bromus is one of our hardest perennial grasses. No amount of cold will kill it; it withstands the severest drought and water may stand on it for weeks without injury to it. It is one of the deepest rooted of the cultivated grasses and greatly improves the physical conditions of the soil it grows on. It is as a pasture grass that it is of the greatest value; it starts from two to three weeks earlier in Spring than the native prairie grass and keeps green in Fall longer than any other grasses. It does not become woody at any time, but always remains succulent and is always greedily eaten by all farm stock. Bromus spreads rapidly by underground root stock, and a thin stand thickens up quickly. It forms a dense sod 6 to 8 inches thick, thus binding the soil together and preventing it from being wind blown and at the same time completely eradicating all noxious weeds, such as thistles, mustards, etc., within a few years.

Bromus Inermis obtains a height of from 4 to 5 feet, producing an abundance of leaves, and yields on good soil about 4 tons of cured hay per acre, which has about the same feeding value as Timothy. All farm animals are fond of it, and cattle and sheep like it the best of any grass. Much sown now for pasture with White Sweet Clover, using 10 lbs. each per acre. Sow 15 to 20 pounds per acre.

Buckbee's "FULL OF LIFE" Bromus Inermis is of the highest vitality and free of all dangerous weeds, especially of quack grass. Price, postpaid, pkt. 10c; lb. 45c; 3 lbs. \$1.25.

TALL MEADOW OAT GRASS

A hardy grass of rapid growth, luxuriant and reaching a height of 4½ feet on rich soil by June 15th. Makes excellent hay on sandy loams, but is particularly suited to rich soils and clay formations. It has a wonderful capacity for enduring severe heat, drought and cold. It can be cut usually twice a year; in the South it does much better than Timothy. To make good hay it should be cut immediately when it blooms. It frequently produces twice as much as Timothy. It possesses the advantage of growing quick and late growth, fills well and is admirably suited for a pasture grass. When kept in a close state of feeding it has been found most beneficial. It is often sown together with Orchard Grass and with Medium Red Clover, which 3 varieties ripen at the same time. Sow 25 to 35 pounds per acre.

Buckbee's "FULL OF LIFE" Tall Meadow Oat, price, postpaid, pkt. 10c; lb. 60c; 3 lbs. \$1.75.

CANADA BLUE GRASS

A very hardy perennial grass with creeping root stocks. It grows on the poorest and driest soils—sandy, gravelly or clayey, standing extremes of wetness or drought, and keeping green until the severe frosts of Winter. It is especially valuable for dairy pastures. It is distinguished from the Kentucky Blue Grass by its flattened, wiry stems and by its decidedly bluer color. Sow 20 to 25 pounds per acre. Prices, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

ENGLISH OR PERENNIAL RYE GRASS

Invaluable for permanent pastures. It produces an abundance of remarkably fine foliage, tillers out close to the ground and soon forms a compact sward. After being cut it grows up in a very short time and remains bright and green throughout the season; it consequently is well adapted for lawn mixtures. It is also a good variety for hay if cut when in blossom, as it is then most nutritious; if cut much later it becomes woody. It adapts itself to a great diversity of soils, but flourishes best on rich soils in moist situations.

It will last three to four years. Sow 25 to 30 pounds per acre. Buckbee's "FULL OF LIFE" English Rye, price, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

English Rye Grass.

Italian Rye Grass.

ITALIAN RYE GRASS

A remarkably rapid grower; stands extremes of temperature, remaining green until late in Fall and retaining its freshness in the hottest Summer. When sown very thick or in mixture with other sorts it makes a good, dense turf, and it is used with much satisfaction on lawns. On rich, moist soils it is exceedingly productive and may be cut in four or five weeks after sowing, and every six weeks after that until frost. For temporary meadows, on good soils, it is a most valuable grass. Not perennial, but lasts two to three years. Sow 25 to 30 pounds per acre.

Buckbee's "FULL OF LIFE" Italian Rye, price, postpaid, pkt. 10c; lb. 35c; 3 lbs. \$1.00.

BERMUDA GRASS OR SOUTHERN BLUE GRASS

A most valuable grass for our Southern States, both for pasture and lawns. It is of dwarf habit, with long, creeping stems rooting at the joints and covering the ground with a matting of fine turf which no amount of tramping will impair. It is also useful for binding drifting sand and for steep embankments subject to wash. It requires heat and moisture to start it. As it cannot endure frost, it is of no value North of Virginia. It thrives in the poorest, and sandiest soil, and resists extreme drought and intense tropical heat. Sow at the rate of 6 pounds to the acre. Postpaid, pkt. 10c; lb. 90c; 3 lbs. \$2.65.

JOHNSON GRASS

(Sorghum Halapense.)

When carefully handled, one of the most satisfactory hay crops for the Southern farmer, yielding even during hot and dry seasons three to four cuttings of one and a half to two tons each per acre on good soil. To keep it within bounds the seed should never be allowed to ripen. Besides, when fully ripe, the hay is little better than corn stalks, but, cut before the seed tops appear, it is better than Timothy. It can be eradicated by exposing the roots to frost by late plowing, but we only advise sowing where desired for permanent meadows. Sow 25 to 40 pounds per acre. Postpaid, pkt. 10c; lb. 60c; 3 lbs. \$1.75.

TEOSINTE

This is a truly wonderful forage plant worthy of general cultivation. Give it a rich, warm, sunny soil and it will yield from 20 to 30 tons of green fodder per acre. It is simply marvellous. Down in Georgia, in Florida and Louisiana its yields are all the way from 25 to 50 tons of green fodder per acre. It grows to a height of 13 feet in those states, while in the North it produces from 10 to 15 tons. One of the most nourishing green fodders imaginable. On our Rockford Seed Farms, where the soil is sandy and warm, it always yields a much greater amount of green feed than corn, cane or any other forage plant, and when the season was favorable we cut two crops. About two pounds of seed are required per acre. Price of seed, postpaid, oz. 15c; ¼ lb. 30c; lb. 90c.

Teosinte.

SUDAN GRASS

Sudan Grass is introduced by the United States Department of Agriculture and is the most important forage plant ever introduced by this Department. It has now been thoroughly tested, has given most satisfactory results in most states of the Union, and is destined to become one of the standard Summer grass and forage crops.

It belongs to the Sorghum family and in general appearance is very much like Johnson Grass, but differs from it in that it is entirely free from the persistent underground root system, which makes a Johnson Grass sod so difficult to eradicate. Sudan Grass being an annual and having fibrous roots similar to Millet or Oats, is as easily controlled and eradicated at the close of the growing season as those varieties, and will never become a weed.

It is a tall growing annual grass which when planted in rows and cultivated on fairly rich soil attains a height of 4 to 10 feet, and sown broadcast or drilled in thickly it will grow 3 to 5 feet high. The stems are erect, unbranched and very fine, the largest stalks not more than 3/4 inch thick and are covered with abundance of broad plants are scattered, they stool abundantly, as many as 100 stalks coming from a single root.

Sudan Grass is not particular about the soil. It does best on rich clay loam, but on sandy and poor soils the yields are not so very large. This grass will be of the greatest value to the Central States, and especially to parts of Texas, Kansas, Oklahoma and Colorado, which are deficient in rainfall. The dry regions have no other satisfactory hay crop, and Sudan Grass will therefore be of immense value there, and can be relied upon to produce a crop of hay with very little rainfall. It requires but a short growing season, usually to be cut for hay in about 70 to 75 days, and matures seed in 100 days from planting.

Sudan Grass will stand light frosts, but like all other Sorghums it has a preference for a warm growing season, and for best results should not be planted until the soil has become warm in Spring. It can be sown at any time in Summer 70 to 75 days ahead of the frost. It is sown in rows from 18 to 24 inches apart and cultivated; sown this way it takes 3 to 10 lbs. per acre. On good soil, where there is plenty of moisture, it is also sown broadcast or drilled in, and then 10 to 25 pounds of seed are required per acre.

Sudan Grass is easy to cut with a mower and cures readily. When wanted for seed it is harvested with an ordinary grain binder. Used for hay, it is cut when fully headed out. An

Cutting Sudan Grass.

early cutting is especially advisable when more cuttings per season are expected. After cutting it resumes its growth promptly, and in about 40 to 45 days another cutting is ready. In Texas it has been cut four times, but farther North only two or three cuttings may be expected.

Sudan makes a very nutritious and palatable hay which is relished by cattle, horses and other farm stock. In feeding value the hay is second only to Alfalfa and far better than Millet. The yields vary a great deal, but from five to eight tons of cured hay have been harvested per acre on dry land and a good deal more under irrigation. The yield of seed is, on dry land, from 500 to 1,000 pounds, but on irrigated land as much as 2,500 pounds have been grown per acre.

Sudan Grass crosses quite easily with other cultivated Sorghums and Johnson Grass; we therefore had our seed grown in the North, where no Johnson Grass is grown, and our fields have been kept far apart from any other Sorghums. Buckbee's "FULL OF LIFE" Sudan Grass Seed is the finest and purest in the market.

Buckbee's "FULL OF LIFE" Northern Grown Sudan Grass, price, postpaid, pkf, 10c; lb, 10c; 3 lbs. \$1.15.

GRASS AND CLOVER SEED MIXTURE (Sow One to Two Bushels per Acre.)

All authorities agree that for PASTURE and HAY best results are obtained from the use of grass seed in MIXTURE. The reasons are obvious: First—A NUMBER OF SPECIES will insure a much DENSER GROWTH than the same number of seeds of one or two species, and prove less exhausting to the soil, since they live to a great extent on different constituents. Second—Seasons that affect some grasses adversely are FAVORABLE to other seeds. So that with mixtures failure is PRACTICALLY IMPOSSIBLE. The seed used in these mixtures is of the finest quality obtainable.

BUCKBEE'S RELIABLE "Full of Life" BLENDS—FOR MEADOWS AND PERMANENT PASTURES.

The prices quoted on mixtures below are by Express or Freight at purchaser's expense.

MEADOW MIXTURE No. 1. For Rich, Dry Soils.

BUCKBEE'S SPECIAL HOG PASTURE MIXTURE No. 8

Especially prepared for quick results and a full crop. This mixture is composed of the following ANNUAL VARIETIES: FIELD PEAS, SOJA BEANS, VETCHES, COWPEAS, CRIMSON CLOVER, RAPE, SUGAR CANE, JAPANESE MILLET, TURNIPS, RUTABAGAS, SPELTS, RYE and other grains and forage plants all in the right proportion.

This mixture will provide an abundant pasture within six weeks from day of sowing the seed, continuing green and bountiful until destroyed by frost; almost all of these varieties will come up again as fast as they are eaten down and will furnish 3 to 5 times as much forage as can be obtained from any clover-grass mixture, and this food is succulent and nutritious and much relished by hogs; it will keep them healthy and strong and they will gain in weight easily and quickly. This mixture will prove a most profitable investment for every farmer, not only for feeding hogs, but also all other farm stock. It is usually sown about corn planting time, but can also be sown as a catch crop any time during the season until August.

Use 100 pounds for 3 acres. Price, 10 lbs. 95c; 25 lbs. \$2.15; 50 lbs. \$4.00; 100 lbs. \$7.50; by express or freight not prepaid.

MILLET BUCKBEE'S CALIFORNIA BEAUTY MILLET

The Best Hog and Stock Millet

The most remarkable leafy, bushy, vigorous growing Millet in the world. Yields as high as fifteen tons of hay or more to the acre. It will make a magnificent crop of hay if sown immediately after your Oats or Barley, Rye or Wheat is cut, as it will ripen in from sixty to ninety days. It is positively the Millet wonder—very leafy, prolific and exceptionally fine for hay and feed. This Millet, unlike any other, stands the hot, dry winds of the Dakotas, the burning prairies of Kansas and flourishes on the semi-arid soils of Western Nebraska and Colorado—in fact, it grows where no other Millet grows. Sow one-half bushel per acre. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

LIBERTY OR GOLDEN MILLET

Grows very rank, 4 to 5 feet high, and is one of the best varieties for hay, being sweet, palatable and milk producing. On good rich soil it yields 5 tons of hay and more per acre. The hay seems coarse, but is very tender and cows, horses and all other farm stock are exceedingly fond of it. Should be cut when in full bloom. Sow 3 pecks (35 to 40 lbs.) per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

HUNGARIAN MILLET

A luxuriant, vigorous growing and very leafy Millet which is relished by all farm stock; the hay is not so coarse as that of the Liberty Millet, but the yield is nevertheless quite large, averaging 3 to 4 tons an acre. It is earlier than Liberty Millet and is often used as a second crop to follow Barley and early Potatoes, etc. It is claimed this hay to be less dusty than that of other Millets. Sow 3 pecks (5 to 40 lbs.) per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

NEW WHITE WONDER

The most striking feature of White Wonder Millet is the size of the heads, which will run from eight up to eighteen inches, and a single head will weigh as many as 15,000 seeds. The yield of White Wonder is extremely heavy, being fully half again as heavy as that of common Millet. Some growers of White Wonder Millet claim that it will outyield other Millets three to one. Another desirable feature of White Wonder Millet is its earliness. The foliage is very heavy, the leaves broad, and therefore it produces an immense amount of excellent fodder which cures very readily. Postpaid, pkt. 10c; lb. 30c; 3 lbs. 85c.

HOG OR BROOM-CORN MILLET

It is a very early variety ripening in 50 to 60 days from time of sowing. The seed ripens while the fodder is yet green, hence it can be cut and used for both hay and seed with best success; it yields from 60 to 70 bushels of seed per acre and the fodder is very tender. The seed is very large, 2 or 3 times the size of Liberty Millet and is yellowish-white. This Millet does not grow very tall and is therefore not much planted for hay. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

California Beauty Millet.

Kursk—Siberian Millet.

KURSK—SIBERIAN MILLET

Resembles Liberty Millet in manner of growth and productiveness but is about 2 weeks earlier and the seed is orange-red. It stools quite heavily, is very leafy and bushy and a heavy yielder of both hay and seed, producing 50 to 70 bushels of seed and 4 to 5 tons of hay per acre.

It will ripen in 60 to 70 days from sowing and makes a good crop of hay if sown immediately after the early grain is harvested. This Millet is especially adapted for the Northwestern States, being very early and very hardy it will prosper under conditions when other varieties fail. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

JAPANESE MILLET

Also Called Billion Dollar Grass. Entirely distinct from any other Millet, grows 5 to 8 feet high and produces an enormous crop, often yielding 15 to 20 tons of green fodder or 6 to 8 tons of cured hay per acre. The feeding value of this Millet is much superior to that of corn fodder and the Millet is much more relished by all kinds of stock. Japanese Millet is mostly used for feeding green, but on account of the large yield and good quality of forage it is also most excellent for silo use and frequently a good crop of this Millet can be raised under conditions which would not admit the growing of corn for ensilage. An ideal ensilage mixture may be composed of two parts of Japanese millet to one part of Soja Beans, mixed when filling the silo; this mixture forms a complete balanced ration for milch cows, without the addition of grain.

The seed of this millet makes good food for poultry and hogs, as it contains almost as much fat and extract matter as shelled corn and a little more protein.

Sow the seed at the rate of 12 to 15 lbs. per acre. Postpaid, pkt. 8c; lb. 25c; 3 lbs. 70c.

PEARL MILLET OR PENCILARIA

This quick-growing forage plant has been long known under the name East India or "Cat-tail" Millet. Sown in drills 4 feet apart and cultivated like corn, the plants attain a height of 8 to 10 feet, with slender, long-bladed leaves. These stalks can be cured for winter use and the seed makes an excellent poultry food. But the best use of the plant is to cut the stalk for green forage when about 2 feet high and allow the plants to make a second growth for fall feeding or ensilage. On richly manured land these plants grow with tropical luxuriance and no other crop will yield as much forage. Pearl Millet is of exceptional value for sections subject to protracted drouth where natural grasses dry up, as it will keep on growing and furnish a good crop in the driest season. Eight pounds of seed are required per acre, if sown broadcast and 5 to 6 pounds if sown in drills. Postpaid, pkt. 10c; lb. 40c; 3 lbs. \$1.15.

Buckbee's Famous "Full of Life" Lawn Grass Seed

HARDY, LUXURIANT, ALWAYS GROWS, ALWAYS THRIVES

Our Lawn Grass Seed

Produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, and is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer.

A Lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with the appearance and the permanency of the Lawn.

Buckbee's World's Fair Lawn Grass

The Very Best Lawn Seed Ever Offered.

This famous Prize-Winning Lawn Grass is made up of a most evenly balanced combination of native and foreign fine-leaved, deep-rooting grasses that interweave and flourish in different soils and climates, each showing its best strength at seasons different from the others, and thus keeping the Lawn vigorous and green from winter's end to winter's next advent.

Was awarded the great Columbian Prize at the World's Fair. This mixture was used by the World's Fair authorities to produce the beautiful Lawns, which were without question one of the greatest features of the Fair. It is the Ideal Mixture, and is unrivaled for purity and luxuriance in growth and will give complete satisfaction wherever sown. With ordinary care anyone can, by using this mixture, secure a beautiful Lawn. Complete and explicit directions on "How to Make a Lawn" accompany every package of this seed. The quantity table on this page shows the amount of seed to plant in a given area. Price, postpaid, $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 3 lbs. \$1.15. Large quantities, by express or freight, not prepaid, 5 lbs. \$1.50; 10 lbs. \$2.90; 15 lbs. \$4.30; 25 lbs. \$7.00.

How to Make a Lawn

Is fully described in our new pamphlet, which will be given free with every package of Lawn Seed.

Special Quotations

We shall be pleased to quote special prices to Golf Clubs, Institutions, Parks and others who require Lawn Grass and Clover Seeds in large quantities.

Shady Place Lawn Grass

The Very Best Obtainable—Carefully Blended.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slaked lime, at the rate of one bushel to each thousand square feet, or forty bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed.

Sow from 50 to 60 pounds per acre for a new lawn or bowling green; 15 to 20 pounds per acre will be sufficient to improve existing turf. Price, postpaid, 1 lb. 45c; 3 lbs. \$1.30. By express or freight, not prepaid, 5 lbs. \$1.65; 10 lbs. \$3.20; 15 lbs. \$4.65; 25 lbs. \$7.50.

Velvet Green Lawn Grass

A Splendid Standard Mixture.

This special mixture does not include so great a number of expensive grasses as "World's Fair Mixture," but full provision is made for a succession of growth and a careful blending in proper proportion and thoroughly mixed for quickly producing a permanent, thick and velvety sward of uniform growth and rich green grass free from coarseness. Price, postpaid, $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 3 lbs. \$1.00. By express or freight, not prepaid, 5 lbs. \$1.10; 10 lbs. \$2.15; 25 lbs. \$6.50.

Quantity of Lawn Grass Seed to Use

1 lb. for 350 square ft.	25 lbs. for one-fourth acre.
5 lbs. for 1750 square ft.	50 lbs. for one-half acre.
10 lbs. for 3500 square ft.	100 lbs. for one acre.
15 lbs. for 5250 square ft.	

Buckbee's Extra Special Lawn Fertilizer

Makes the Lawn Strong and Keeps It Healthy.

The lack of a good fertilizer is the reason there are so many poor, rusty-looking, unsightly lawns. Use this Lawn Fertilizer if you would have a beautiful and sturdy growth of grass. This fertilizer, used in connection with any of our special Lawn Grass Seed Mixtures, will enable you to produce a perfect lawn. Price, postpaid, 1 lb. 20c. By express, not prepaid, 5 lbs. 30c; 10 lbs. 50c; 25 lbs. \$1.00; 50 lbs. \$1.80; 100 lbs. \$3.50.

BUCKBEE'S "FULL OF LIFE" POTATOES

Pedigreed Stock, Grown in the Famous Red River Valley of the North Expressly for Seed.

No Seed Potatoes can be compared with those produced in the North, either for vigor and freedom from disease, or for producing and long-keeping qualities. Furthermore, our stock is all grown from hill selected Potatoes and only from plants which have produced a large number of market-sized tubers, and it will easily yield a hundred more bushels per acre than common stock.

Remember, no matter what fertilizer, cultivation, protection against disease and insects you give the crop, the fact remains that the yield is dependent very largely on the seed you plant.

DATE OF SHIPMENT.—Potatoes will be shipped at any date ordered, at purchaser's risk, but where no special instructions are given to the contrary, we will hold same until in our judgment there will be a minimum danger from freezing. Of the many varieties that claim public favor, we have selected the best in cultivation.

**BUCKBEE'S
EXTRA EARLY
ROCKFORD**

BUCKBEE'S EXTRA EARLY ROCKFORD

Truly a wonderful Potato. Handsome, blight-proof variety. Very heavy yielder. Cooking quality the best.

A new Extra Early Variety of great promise. Makes an extremely quick growth and, considering its extra earliness, is a wonderfully heavy yielder. Is of very handsome appearance, with pinkish tinged skin and white flesh. Of delightful flavor. Prices, postpaid, 1 lb. 35c; 3 lbs. \$1.00.

EARLY SIX WEEKS

A fine Potato of the Ohio type and as early as that variety. It is in demand everywhere. As now improved we consider it one of the best extra early market varieties grown. As table Potatoes they are not excelled. Prices, postpaid, 1 lb. 25c; 3 lbs. 70c.

NEW EARLY WHITE OHIO

It is a true Ohio of the best type in all except color, which, instead of being pink, as in the parent, is a beautiful creamy white with pink eyes. Prices, postpaid, 1 lb. 30c; 3 lbs. 85c.

IRISH COBBLER

Sometimes called Early Eureka. A most excellent extra early variety, maturing good sized tubers seven weeks from time of planting. It has also the remarkable characteristic of producing almost only tubers of large size. The vines make short, upright growth, allowing close planting. The tubers are of round shape with few shallow eyes. The flesh is pure white, with a clean, smooth skin, and in quality they are excellent, always cooking dry and mealy. They are splendid keepers and, taking it all in all, are one of the most reliable and satisfactory first early sorts, excelling in productiveness many of the late varieties. Specially suited to dry climates on account of its deep roots and by far the best white Potato for the South. In a comparative test of sixty-seven varieties, red and white, made at the Station at Fayetteville, Ark., the Irish Cobbler gave the best yield of all, which was 198.49 bushels per acre. Choicest Pedigreed Stock Seed. Prices, postpaid, 1 lb. 30c; 3 lbs. 85c.

Irish Cobbler.

IMPROVED EXTRA EARLY OHIO

It is fully two weeks ahead of the Early Rose, and is a general favorite with Potato growers and market men alike, and the most profitable Potato they can possibly grow. Maturing early, it brings the highest prices. The tubers grow compact in the hill, are easily dug, with very few small ones—nearly every Potato is of marketable size; has few eyes which are even with the surface. Our Improved Extra Early Ohio is very fine, pure stock and uniform in shape. Prices, postpaid, 1 lb. 25c; 3 lbs. 70c.

BUCKBEE'S NOROTON BEAUTY

This and Bliss Triumph are the earliest Potatoes grown. Noroton is fully as productive as many main crop sorts. It is handsome in appearance, having a russet white skin and pinkish eyes, and being more uniform in size and shape than any other variety. Little troubled by bugs; almost blight and disease resistant. Its table quality is superb. Prices, postpaid, 1 lb. 30c; 3 lbs. 85c.

BLISS RED TRIUMPH

The standard extra early Potato most planted in the South. The tubers are nearly round, are smooth, medium in size, reddish pink in color. Vines are small and compact, with short, thick stalks and broad leaves. This is one of the hardest varieties known, and is not susceptible to rot, scab and other diseases; in fact, it can be grown on the most heavily manured land without danger of rot. Price, postpaid, 1 lb. 30c; 3 lbs. 85c.

PURE EARLY ROSE

The good old favorite, which continues in great popularity. A prolific yielder, sure cropper and popular market Potato. The seed we offer is the purest and best on the market. Prices, postpaid, 1 lb. 25c; 3 lbs. 70c.

A Valuable NEW BOOK of Practical Information

HOW TO GROW SEEDS AND FLOWERS

A complete guide for the house and garden. Price 50c, postpaid, or we will send a copy FREE with an order amounting to \$1.50 or upwards if requested on the order.

BUCKBEE'S IMPROVED GREEN MOUNTAIN POTATOES

Green Mountain is fast becoming the most popular late variety all over the country. In fact, in many sections it has now superseded all other late varieties, being the heaviest cropper of them all and yielding, especially on light soils, often one-third more than the older late sorts; it is medium late, earlier than most main crop varieties. It thrives in all soils and all localities. On good soils the potatoes are all of good size, entirely free from small tubers. This is a strong and vigorous grower with an abundance of bushy vines with light green leaves. The tubers are large, smooth, of oblong to roundish

form, somewhat flattened. The skin is of a yellowish or slightly russet tinge, is finely netted, indicating fine quality. Eyes are few and of medium size and well distributed. The flesh is white, solid, fine grained, cooks white, dry and mealy and has a very fine flavor. It retains its fine eating qualities all through Winter. Buckbee's Improved Green Mountain is selected stock, very pure and a heavier cropper than stock sold by others, and is entirely free from all diseases, scab, etc. Prices, postpaid, lb. 35c; 3 lbs. \$1.00.

Buckbee's
Improved
Green
Mountain

CARMAN No. 3

The Carman No. 3 is one of the greatest yielding Potatoes ever introduced. The tubers are borne very close to the plant, a single turn of the fork turning out every potato. It is of a large size and of the shapeliest form. Eyes are few and shallow. It is a perfect keeper and is not surpassed as a table variety. Skin and flesh of extreme whiteness. It has no hollow heart or any dark parts. We recommend this Potato to our customers as being unqualifiedly one of the best of all late sorts. Prices, postpaid, lb. 25c; 3 lbs. 70c.

SHEET

BURBANK

Continues in good demand and is one of the most largely used kinds. It ripens medium late, is of good size, of fine oblong form and an excellent yielder. The flesh is white, very mealy and of fine flavor and quality. The best Potato for baking. This variety is well adapted for heavy soils and is a long keeper. Prices, postpaid, lb. 25c; 3 lbs. 70c.

RURAL NEW YORKER No. 2

One of the largest yielding varieties in existence. Large, of oval form and rather flat, with few and shallow eyes; the smoothest and cleanest potato grown; skin white, as is also the flesh, which is of best quality; it comes dry and floury. Medium late and best drought resister. Although it is a large yielder, it grows but few and small vines. It is hardy and will stand the heaviest manuring without getting scabby or spotted. Under ordinary circumstances they will yield from 300 to 400 bushels per acre, but by heavy manuring this yield can be doubled. Prices, postpaid, lb. 25c; 3 lbs. 70c.

SIR WALTER RALEIGH

A white-skin, main crop Potato much resembling Rural New Yorker No. 2, of which it is a seedling. It is decidedly better than its parents; the tubers being quite uniform in size, with but few small ones among them. It is from four to six days later than the parent stock. The color is the same, the skin and flesh being white. It is very fine grained. Prices, postpaid, lb. 25c; 3 lbs. 70c.

Grown
Seed

WE GUARANTEE SAFE ARRIVAL IN GOOD CONDITION FOR PLANTING.

Every farmer knows the heavy expense in sending whole Potatoes long distances by Express or Freight, the charges often costing more than the Potatoes. Then, too, if shipped during the Winter and early Spring they usually freeze, and if not sent until this danger is past, they oftentimes arrive too late for planting. The Eyes as put up by us, will keep 60 to 90 days in good condition for growing; as if freshly cut from the Potato, and will produce just as good a crop as if the whole Potato was planted; hence every one who has a garden can order at any time during the Winter or early Spring (no matter how far away) and test the new and choice varieties of Northern-Grown Potatoes we offer, at trifling cost and Save Express or Freight Charges, as we guarantee safe arrival to any post-office in the United States. All orders for the South can be sent at any time during the Winter with perfect safety. Orders for the North and West will be booked when received, and sent when Spring opens or planting time arrives.

Plant eyes in rows 3 feet apart, 12 inches apart in the rows; sixty eyes should produce 3 to 5 bushels. PRICES OF POTATO EYES OF ANY VARIETY WE OFFER BY MAIL PREPAID: 100 Eyes \$1.00; 200 Eyes \$1.90; 500 Eyes \$1.50; 1,000 Eyes \$8.00. Positively no less than 100 Eyes of any variety will be put up.

New Hybridized Potato Seed from the Flower Ball: Headquarters Stock

Growing new and distinct Potatoes from the Seed-Ball-Seed is intensely interesting and fascinating. They will produce innumerable kinds, colors, shapes, sizes, forms and qualities. Some may be of immense value. This incomparable mixture contains choice selections for the United States, Italy, Chile, Switzerland, South America, France, Africa, Mexico and Europe. New creations of merit bring rich returns and your fortune may be in one of these. **POTATO SEED**, Postpaid, Pkt. 10c; 3 Pkts for 25c.

Potato Seed Balls.
(One-Fourth Life Size.)

BUCKBEE'S "Full of Life" FLOWER SEEDS

ASTERS

Queen of the Market

The best early Aster, coming into bloom fourteen days earlier than most other kinds. Good-sized double flowers on long stems; 1 foot high. Separate colors: White, Pink, Scarlet, Rose, Lavender, Purple. Each pkt. 5c; $\frac{1}{2}$ oz. 25c. Finest Mixed, pkt. 5c; $\frac{1}{2}$ oz. 20c.

New Japanese or Tassel

Entirely distinct and novel. Plants of pyramidal growth about 18 inches high, bearing on long stems from 40 to 50 flowers, averaging 5 inches across, composed of wavy and twisted needle-shaped petals, making the flowers free from the stiff and formal appearance usual to asters and offer a most striking contrast with those of any other variety. The color is of a soft flesh pink and rose, the two colors mixed. Pkt. 6c; $\frac{1}{2}$ oz. 35c.

QUEEN OF THE MARKET.

Improved Victoria

Paeony Flowered Perfection

One of the most beautiful and perfect, and deservedly one of the most popular of all Asters; very double, large, beautiful flowers, with incurved petals; height, 18 inches. Blooms in August. Separate colors: Bright Crimson, Clear White, Peach Blossom, Violet, Blue. Each, pkt. 5c; $\frac{1}{2}$ oz. 30c; any 5 pkts. for 20c. Finest Mixed: Pkt. 5c; $\frac{1}{2}$ oz. 25c; oz. \$1.25.

Buckbee's New Upright Mammoth Wonder

See Painting from Nature on Back Cover) Snowdrift, pure white. Red Fire, scarlet. Blue Bird, dark blue. Dove, lavender. Bride, pink.

Each of the above: Pkt. 15c; $\frac{1}{2}$ oz. 85c. Mixed, all colors, postpaid: Pkt. 15c; 2 pkt. 25c; $\frac{1}{2}$ oz. 75c.

P. EONY-FLOWERED PERFECTION.

Buckbee's Improved Victoria

Magnificent flowers, massive and showy, with regular overlapping petals clear to the center. The flowers measure 4 inches and over across and are of rich and varied colors. The plants grow very evenly, pyramidal in form, about 18 inches high, and carry from 25 to 40 flowers. The stems being long and strong, make them fine for cut flowers. Separate colors: Snow White, Flesh Color, Rich Purple, Dark Crimson, Peach Blossom, Light Blue. Each, pkt. 6c; $\frac{1}{2}$ oz. 10c.

VICTORIA CHOICEST MIXED, pkt. 5c; $\frac{1}{2}$ oz. 30c.

Canary Bird

Brightest Sulphur Yellow.

The best yellow variety known; the flowers are of large size, of a rich golden color, perfectly double and imbricated. Its greatest value lies in its rich color, which shows to best advantage when grown with other colors. The flowers are borne upon long, erect stems; excellent for cutting. Pkt. 8c.

FLOWER SEEDS IN BULK

We grow on Rockford Seed Farms large quantities of flower seeds, and will be glad to quote you prices on any amounts you may need.

Improved Daybreak.

Improved Daybreak

Sturdy, upright, bushy plants, 15 inches high, producing in midsummer masses of flowers unequaled by any other Aster, not less than 50 blooms appearing on a plant.

Daybreak Shell Pink. Daybreak Salmon.
Daybreak Snow White. Daybreak Lavender.
Daybreak Blue. Daybreak Mixed Colors.
Daybreak Rose.

Any of the above, per pkt. 6c; $\frac{1}{2}$ oz. 45c.

Canary Bird.

ASTERS—Continued

FIRE KING

The Most Brilliant Aster Ever Produced and the nearest approach to scarlet yet obtained, a color previously unknown in this popular flower. Habit very compact, not more than 10 inches in height, with large, beautifully incurved flowers. Pkt. 8c; ¼ oz. 40c.

SNOWBALL

A most profuse bloomer, a single plant often producing as many as 25 to 30 pure snow-white flowers, globular in form and of good size. Ten inches high. Pkt. 8c; ¼ oz. 40c.

THE KING

Large, massive, double flowers, 5 inches in diameter, with long narrow more or less quilled petals which are curled and incurved in the center. Plants 18 inches high, branching; blooms August to October. Separate colors, White King, Pink King, Crimson King. Mixed Colors, pkt. 7c; ¼ oz. 25c.

BUCKBEE'S RADIANT BRANCHING

The flowers are the most beautifully formed of all large Asters, and quite different in several respects from any Aster known. The branching habit is accompanied with great vigor of growth and profusion of bloom. The flowers are very large, 5 to 6 inches across, very double, borne on long, stiff stems and the colors are clear and handsome. The petals are of thick, durable substance and in consequence the flowers last long in perfection. These magnificent blossoms being gracefully poised on strong, well-leaved stems 15 to 18 inches long, are unsurpassed as cut flowers for vases and home decoration. Bloom from the end of August until frost. We offer the following separate colors: Pure White, Dark Blue, Rose Pink, Lavender, Crimson. Each, pkt. 8c; any 5 for 35c; ¼ oz. 40c.

Buckbee's Radiant Branching Asters, Mixed, Pkt. 6c; ¼ oz. 35c; oz. \$1.25.

Radiant Branching.

NEW GIANT QUILLED

The flowers are produced on long, thin, wiry stems, are very large, perfectly double, with long needle or quill-shaped petals giving the blossoms a very distinct appearance. The plants are of healthy and vigorous habit and grow to a height of about 15 inches. Choice Mixed, pkt. 6c; ¼ oz. 25c.

NEW ROYAL

An early strain of the late Branching Aster, coming into bloom only a little later than Queen of the Market, but superior to it in every way. The flowers measure from 3¼ to 4 inches across, are of perfect form, exceedingly double, are carried on long, strong stems and are unsurpassed as cut flowers. Plants 24 inches high. Separate Colors: White, Pink, Rose, Lavender, Purple. Each, pkt. 8c; any 5 for 35c; ¼ oz. 30c.

MIXED COLORS: Pkt. 7c; ¼ oz. 25c; oz. \$1.25.

BUCKBEE'S NEW GIANT COMET

Or Mammoth Ostrich Plume

Grand American Aster, a magnificent strain of Comet or Ostrich Plume Asters, finer and larger than Crego and Asterum. The plants grow 18 to 24 inches in height, branching freely, each plant bearing from 20 to 30 magnificent flowers from 4 to 6 inches in diameter, composed of long, curled, twisted petals, forming loose, tufty, globular heads. The whole flower has a distinctly feathery effect, greatly resembling that of the fine Japanese Chrysanthemums. We offer the following separate colors: Pure White, Purple, Clear Carmine, Bright Rose, Lilac. Each pkt. 6c. Any 5 pkts. for 25c; ¼ oz. 35c.

Finest Mixed, all the desirable colors: Pkt. 6c; ¼ oz. 30c; oz. \$1.50.

Giant Comet.

Aster New Royal

ASTERS—Continued

TWO NEW AMERICAN BEAUTY ASTERS

Identical, Except in Color. See Illustration.

NEW PURPLE AMERICAN BEAUTY—Now offered for the first time. The color is a deep though bright, rich purple, of the same habit of growth as the American Beauty. Same wonderfully perfect flowers, usually four and even five inches in diameter, borne on long, stiff stems 18 to 24 inches long. Large Pkt. 10c; ½ oz. 75c.

CARMINE AMERICAN BEAUTY—The beautiful Carmine-rose shade. First offered by us in 1918 of upright and vigorous growth, producing immense flowers 4 to 5 inches across, stems long and strong. Flowers are double to the very center and are of a lovely shade of bright carmine-rose, almost identical to the famous American Beauty Rose. This and the New Purple should be in every garden. Large Pkt. 10c; ½ oz. 65c.

BUCKBEE'S SUPERB MIXTURE OF GIANT ASTERS

Absolutely Unexcelled.

Producing beautiful flowers, gigantic in size, gorgeous in colors, perfect in form. This mixture includes the cream of all the Asters on this and the foregoing pages, together with many other sorts of the most beautiful forms and brilliant colors. Especially selected from the finest large-sized, double-flowering types and the most critical flower lover will be pleased and astonished at the wide range of colors and varieties, and we know it will give satisfaction. Pkt. 10c; ½ oz. 40c; oz. \$1.75.

BUCKBEE'S FINE MIXED ASTERS

A splendid collection of the leading types of Asters in choice mixture. We have made the price so low that you cannot pass it by. Pkt. 5c; ½ oz. 20c; oz. 75c.

PERENNIAL ASTERS (Michaelmas Daisies)

Single, Fall blooming, hardy plants, with bright, beautiful flowers; if sown early will bloom the first year. Mixed Pkt. 10c; ½ oz. 50c.

New Aster American Beauty.

ALYSSUM

LITTLE GEM—This should really be called "Snow White Carpet Plant," for the plants, which are only a few inches high, grow so dense and are so completely covered with snow-white blossoms that it creates the impression of a beautiful carpet spread over the ground. We know of no other white flower which is so particularly well adapted to borders, ribbons, etc., as "Little Gem" Alyssum. The plants commence to bloom when quite small, and will flower uninterruptedly all summer long until late in the fall. Added to all this is the sweet fragrance, and we cannot see how a garden could be complete without it. Pkt. 6c; ½ oz. 25c.

SWEET—Pure white, free bloomer. Pkt. 5c; ½ oz. 40c.

SAXATILE COMPACTUM (Basket of Gold)—Showy, deep, pure yellow flowers. One foot high; fine for edging. Hardy Perennial. Pkt. 6c; ½ oz. 35c.

Alyssum, Little Gem.

BALSAM (Lady Slipper)

A favorite garden flower producing its brilliantly colored flowers from early summer until frost. Plants strong growers and sure bloomers. About two feet high; flowers extremely double.

DOUBLE WHITE PERFECTION—Pure white. Always in bloom. Pkt. 8c; ½ oz. 20c.

DOUBLE PURPLE PERFECTION—

The richest, darkest blue. Pkt. 8c; ½ oz. 20c.

DOUBLE LIGHT PINK PERFECTION—The beautiful sea-shell pink shade. Pkt. 8c; ½ oz. 20c.

DOUBLE SCARLET PERFECTION—

—Brilliant and dazzling. Pkt. 8c; ½ oz. 20c.

BUCKBEE'S SUPERB DOUBLE

MIXED—The most perfect in form and largest double-flowered Balsam yet developed. Unrivaled for diversity of rich and delicate colors; flowers often two inches across and borne in wonderful profusion. We offer a very choice selection of numerous hybrid sorts and a most careful blending of the finest colors in a painstaking mixture. Pkt. 7c; ½ oz. 35c.

GOOD MIXED—This mixture is comprised of the standard sorts and will give good results. Pkt. 5c; ½ oz. 20c; oz. 60c.

BALSAM APPLE

A beautiful climbing plant with queer-shaped fruits which, if preserved in alcohol, make a most useful liniment. Foliage gracefully cut and, although tender, annual, the vines run 10 feet or more during the season. Pkt. 6c; ½ oz. 15c.

Balsam, Buckbee's Superb Double.

Ageratum, Blue Perfection.

AGERATUM

One of the best for bedding. The plants start readily, grow rapidly and soon come into bloom, and flower uninterruptedly throughout the season.

BLUE PERFECTION—Deep amethyst blue. Pkt. 6c; ½ oz. 20c.

FINEST MIXED—Pkt. 6c; ½ oz. 10c.

ABUTILON

Frequently called "Flowering Maple" or "Chinese Bell Flower." Blooms quickly; easily grown. Pleases everyone. New Fancy California Seedlings, Mixed; Pkt. 8c.

AMBROSIA

A hardy annual, exceedingly fragrant. It is as desirable as the Rose Geranium as a plant with fragrant foliage and for making into bouquets and other floral work. Pkt. 5c.

ANCHUSA

The Heavenly Blue Flower.

A hardy annual of more than ordinary beauty. It grows about two feet high, branching freely and bearing a profusion of the most lovely flowers similar in all respects to the Forget-Me-Not, though the blossoms are much larger and of finer color. It is always taken for a beautiful large flowering Forget-Me-Not, and for bouquets and cut flowers it is indeed superior to it. It blooms early and continues all summer. Pkt. 6c; ½ oz. 15c.

Baby's Breath
(Gypsophila)

BEANS

SCARLET RUNNER—A Favorite Old-Fashioned Climber. Both ornamental and useful. It grows rapidly to a height of 10 to 12 feet and is covered from July till frost with clusters of beautiful scarlet flowers. Pkt. 5c; ½ lb. 15c.

WHITE RUNNER—Same as above with exception of the flowers, which are white. Pkt. 5c; ½ lb. 15c.

BIRD OF PARADISE FLOWER

This striking and attractive flower has lately become widely popular. The blossoms are of a rich golden yellow, about 2½ inches in diameter, produced in large trusses, the most striking feature being the long, incurving stamens and pistils of a beautiful bright crimson color.

Seed should be soaked in warm water and started indoors or under glass in a light sandy soil. A sunny situation is required in dry warm soil. Plants should be carefully hardened by gradual exposure to fresh air before going into the open ground. If the seed is started early it will bloom the first year. Pkt. 8c.

BEGONIA VERNON

One of the most satisfactory pot plants for the house, and a popular bedding plant for the garden or lawn. Flowers a brilliant orange carmine with bright yellow centers, and the foliage waxy and glossy. Pkt. 8c.

BEGONIA PLANTS—See page 146.

CANNA

But few people know that these beautiful flowers can be so easily grown from seeds, and bloom the first Summer if sown before April. One of the most popular of bedding plants, while even single specimens are most attractive in the garden. Sow singly in small pots as soon as convenient. The roots can be kept in the cellar over Winter.

CROZY'S NEW DWARF—Mixed. Immense flowers in brilliant colors. Pkt. 6c; ¼ oz. 15c.

COMMON TALL MIXED—A splendid assortment of exceptionally fine varieties. Pkt. 5c; ¼ oz. 10c. FOR CANNA PLANTS SEE PAGE 142.

CANARY BIRD FLOWER—(Tropaeolum Canariense)

Beautiful climber, the charming little canary-colored blossom bears a fancied resemblance to a bird with its wings half expanded. The plant has a luxuriant, rambling character, and if seeds are planted by the side of arbor or trellis will run about 20 feet and will blossom from July until frost. Tender annual. Pkt. 5c; ½ oz. 30c; oz. 50c.

CALLIOPSIS OR COREOPSIS

ANNUAL MIXED—Very handsome and showy plants of the easiest culture; require no care and thrive in any garden. Produce flowers in nearly every shade of yellow, orange, crimson, red, brown. It is one of those flowers which will grow in any situation and always be admired. New Dwarf Compact Strain. Pkt. 5c; ¼ oz. 10c.

LANCÉOLATA GRANDIFLORA—One of the finest hardy perennials; blooms the first year from seed and produces on long stems rich bright yellow flowers, 2 or 3 inches across continuously from June till frost. Very valuable for cutting. Pkt. 6c; ¼ oz. 20c.

BUTTERFLY FLOWERS

(Schizanthus.)

Also called Poor Man's Orchid. Wonderfully showy annuals; very decorative for garden beds and unsurpassed for pots for the house. They form compact plants 1½ to 2 feet high, with finely cut foliage, and when in bloom are literally covered with beautiful, orchid-like flowers, and all delicately fringed and curiously marked with crimson lilac, purple and yellow blotches. They are as easily raised as a weed, either in the garden for Summer display or in pots for Winter. Finest Mixed. Pkt. 5c; ¼ oz. 15c.

BABY'S BREATH (Gypsophila)

ELEGANS, ALBA, GRANDIFLORA—An annual that should be in every garden, for it thrives everywhere and furnishes the loveliest material for all kinds of bouquets. Pure white flowers. Pkt. 5c; ¼ oz. 10c.

PANICULATA—One of the favorite hardy perennials; white flowers; fine for bouquets; two feet high. Pkt. 6c; ½ oz. 25c.

BALLOON VINE

A rapid and graceful climber; tender annual; 6 feet high. The flowers resemble small balloons. Pkt. 5c; ½ oz. 15c.

Bird of Paradise.

Cactus From Seed.

Burning Bush.

BURNING BUSH

This beautiful annual bush is rapidly coming into prominence. It grows 2 to 2½ feet high and resembles a close-clipped ornamental evergreen. The globe-shaped or pyramidal bushes are close and compact, and of a pleasing light green color. The plant may be grown singly or in the form of a hedge or background. In Autumn the whole bush turns carmine or blood red. Pkt. 5c; ½ oz. 10c.

GIANT FROSTPROOF BURNING BUSH

A new grand foliage plant for the garden and also pot plant for Christmas and New Year decoration. Differs from foregoing in being twice the size and more hardy, growing outdoors often till New Year, while the old variety dies early in fall. Pkt. 10c; 3 for 25c.

CACTUS SEED

There is a great deal of pleasure derived in growing Cactus from seed. You will be surprised at the odd looks of the Cacti just sprouting, and this is also the only way to secure new and rare varieties. The Seed may be sown in finely sifted sand in flat pans or boxes, which should be kept moderately moist and covered with a piece of glass. Seeds will come up in three to four weeks. Choice Mixed. Pkt. 10c.

Calliopsis

Butterfly Flower.

Cardinal Climber.

CALENDULA
Double Mixed.

Flowers extra large and very double; petals slightly imbricated, white those of the center are incurved. Colors: White, Bright Golden, Yellow and Orange. It blooms profusely all Summer and Fall. Pkt. 5c; ¼ oz. 10c.

CARNATIONS

GIANT-FLOWERING MARGUERITE—These lovely fragrant Carnations produce fine double flowers which often measure 3 inches across. The variety of color includes white, blush, deep pink, salmon, carmine, scarlet, dark crimson, maroon and many beautifully variegated flowers. Most of them have beautifully fringed petals, and are delightfully fragrant. One great merit of these Carnations is that they commence to flower in about 12 weeks' time from seed. Spring-sown plants will bloom from August until frost, sow in Summer for the winter-flowering plants. They are alike valuable for pot culture and for garden use. All Colors Mixed. Pkt. 6c; ¼ oz. 30c.

MARGUERITE CARNATIONS MIXED—Ordinary strain. Pkt. 5c; ¼ oz. 25c.

GREENHOUSE EVERBLOOMING CARNATIONS—This is the famous Carnation that is grown so extensively by Florists for Cut Flowers. Our seed is saved from our wonderful collection of Carnation Plants grown in our celebrated Forest City Greenhouses at Rockford, and is obtained by hand fertilization of the best and most varied colored flowers. Mixed Colors: Pkt. 10c.

(Fine young Plants of the leading varieties of this class are listed on page 117.)

CENTAUREA CYANUS
(Bachelor's Button.)

Also known as "Corn Flower."

BLUE EMPEROR—Single, dark blue, much in demand for cut flowers. Pkt. 6c; ¼ oz. 10c.

SINGLE MIXED—Blue, white, rose, etc. Pkt. 5c; ¼ oz. 10c.

DOUBLE BLUE—Largely grown by florists for buttonieres. Pkt. 8c; ¼ oz. 25c.

DOUBLE FINE MIXED—Flowers are 80 per cent double and semi-double, with beautiful bright colors. Pkt. 5c; ¼ oz. 15c.

Bachelor's Button.

CARDINAL CLIMBER

The finest new annual climber introduced in many years. Very graceful and beautiful, growing rapidly, and in a warm, sunny location, in good soil, it reaches a height of 20 feet and is densely clothed with deeply laciniated palm-like, rich green leaves, bespangled with clusters of fiery scarlet, tubular, spear-shaped flowers, measuring 1½ inches across. Pkt. 10c.

CACALIA
(Tassel Flower.)

Annual, with tassel-shaped flowers; golden-yellow and scarlet. Pkt. 5c; ¼ oz. 20c.

Canterbury Bells or Campanula.

Candytuft Giant Hyacinth Flowered.

GIANT HYACINTH FLOWERED

—Most desirable for cut-flower purposes, producing a very large elongated head of quite large, pure white florets. The immense broad heads frequently measure six inches in length. Pkt. 6c; ¼ oz. 25c.

ALL COLORS MIXED—Pkt. 5c; ½ oz. 15c.

PERENNIAL (Sempervirens) — Unequaled for cemetery work, being perfectly hardy. White flowers. Pkt. 6c.

CANTERBURY BELLS

Well-known popular perennials, producing bell-shaped flowers of many colors; bloom very freely throughout the summer.

MEDIUM SINGLE MIXED—All colors: Pkt. 5c; ¼ oz. 10c.

MEDIUM DOUBLE MIXED—All colors: Pkt. 6c; ¼ oz. 20c.

CALYCANTHEMUM (Cup and Saucer) — The finest Campanulas. Mixed colors: Pkt. 6c; ¼ oz. 25c.

Carnation Giant Marguerites.

CENTAUREA (New Marguerite)
The Most Fragrant and Longest Keeping Cut Flower.

The flowers are the size of a medium Carnation, freely produced on long stems; colors mostly pure white. The flowers are sweet scented and their lasting quality after being cut is remarkable. From Spring sown seed they commence to flower in July. Pkt. 5c; ¼ oz. 15c.

CENTAUREA (Dusty Miller) Silver foliage plants used for edgings, etc.

CANDIDISSIMA—Broadly cut, silvery leaves. Pkt. 8c.
GYMNOCARPA—Fine-cut, silvery leaves. Pkt. 5c.

Centaurea New Marguerite

COCKSCOMBS (Celosia.)

DWARF QUEEN—This is the best dwarf growing Cockscumb; plants about 8 inches high, heads 10 to 12 inches across. Color a rich ruby red. Pkt. 6c; ½ oz. 30c.

OSTRICH PLUME

A new Cockscumb which bears feathery plumes of bloom, more like ostrich feathers or pampas grass than anything else. Plumes are 1 to 2 feet in length, and of all colors from sulphur yellow to deep rich crimson. A plant in bloom is one of the very brightest and showiest of all garden annuals. All Colors Mixed. Pkt. 6c; ½ oz. 15c.

Ostrich Plume Cockscumb.

CHINESE**WOOL FLOWER**

A valuable novelty. A unique form of the Feathered Cockscumb. The plants grow 2 to 3 feet high, branching freely. Each branch terminates in a large ball-shaped flowerhead of rich crimson color, looking as if made of some silky-wool material. They flower profusely from early July till frost. Very effective in beds and borders and valuable for cutting. When dried, the bright color is retained for a long time. Pkt. 10c; 3 for 25c.

Chinese Wool Flower.

**COBAEA
SCANDENS
CLIMBER**

Although it does grandly outside, it is also a splendid house climber, and will do well running over windows in the house, and will reward the grower with abundance of beautiful, large bell-shaped flowers, green at first, but rapidly changing to a beautiful deep violet blue. Plant seed edgewise. Pkt. 5c; ½ oz. 15c.

Chrysanthemum French Marguerite.

CRAB'S-EYE VINE OR WEATHER PLANT

This beautiful plant has, during the last few years, created a great sensation.

If the leaves stand upward, the sky will be cloudless; if they stand out straight, changeable weather is indicated; when the leaves hang straight downward, water may be expected to fall in torrents. A local storm is indicated by the curling together of the leaves.

Bears clusters of bright yellow flowers, followed by pods with brilliant red seeds used for making beads, etc.

Seeds should be soaked in lukewarm water before planting. Pkt. 8c.

COLOMBIAN CLIMBER

CINERARIA HYBRIDA

One of the most popular house plants. Rich and vivid colors—blue and crimson shades. Most of the varieties have a well defined white eye, while the flowers are sharply margined with some high contrasting color. Flowers 2 inches across. Large Flowering, Finest Mixed. Pkt. 10c.

COLUMBIAN CLIMBER

The most superb of all climbers, and used almost exclusively for decorating pillars, etc., at the World's Columbian Exposition, where it was the admiration of all. It is a fine, rapid grower, of easy culture and always a mass of exquisite green, showing no bare spots. Large purple flowers. Pkt. 6c; ½ oz. 25c.

COLEUS HYBRIDUS

One of the best known and most universally admired ornamental foliage plants.

EXTRA FINE MIXED HYBRIDS—Finest and showiest varieties. Pkt. 8c.

FINE MIXED, Pkt. 6c.

COLEUS PLANTS—See page 150.

CHRYSANTHEMUM

BUCKBEE'S CHOICEST MIXED—Large flowering. Best suited for pot culture and cut flowers. Perennial. These are the famous Chrysanthemums that are grown so extensively by florists for cut flowers. Our seed is saved from our own wonderful collection of plants; of the best and most varied colored flowers. Sown in early Spring they will flower in Fall. Buckbee's Choicest Mixture, Pkt. 10c.

FRENCH MARGUERITES—Annual. The plants grow 13 inches high and produce beautiful, large flowers of many bright colors. Single and Double Mixed. Pkt. 5c; ½ oz. 10c.

Columbine or Aquilegia.

BABY GOLDEN

GLOW—Annual. Two feet high; flowers early and profusely. Bright yellow double blossoms. Pkt. 5c.

SNOWBALL—Same as above, except pure white. Pkt. 5c.

**COLUMBINE
OR AQUILEGIA**

One of the best of the early Summer perennials. Curious flowers, extremely graceful, and borne in great quantities high above the foliage, which itself is very beautiful and attractive. Extra fine for cutting. Double and single, all colors. Prize Mixture. Pkt. 5c; ½ oz. 15c.

Coleus Hybridus.

COSMOS

GIANTS OF CALIFORNIA—This strain is noted both for beauty and the gigantic size of its flowers, which measure 4 to 5 inches across. The colors are very varied and beautiful. Choicest mixed. Pkt. 5c; ¼ oz. 15c.

NEW EARLY FLOWERING—Grace, daintiness and brilliancy are the characteristics of this pretty flower, with its yellow heart, encircled with broad, daisy-like petals, carried on long slender stems, rising from a cloud of feathery foliage. Blooms from July to November. Superb mixed. Pkt. 6c; ¼ oz. 15c.

NEW DOUBLE—A new hybrid strain. The flowers vary considerably in their degree of doubleness, some are absolutely double, others have a full or collar surrounding the double disc, and others again are single, but all are very large and beautiful and are produced in great profusion in fall. (See illustration.) Mixed colors. Pkt. 10c.

CYCLAMEN

Charming plants, with beautiful foliage and richly colored, fragrant flowers. Universal favorites for Winter and Spring blooming. The Giant varieties have large leaves and stout flower stalks, throwing the flowers well above the foliage. Seed may be sown any time during the Spring or Autumn. (For Cyclamen Bulbs see page 139.)

PERSICUM—Persian splendid mixed. Pkt. 10c.

GIGANTEUM—Very large flowered mixed. Pkt. 12c.

DIGITALIS—Fox Glove

Handsome and highly ornamental hardy perennial plants of stately growth, succeeding under almost all conditions, and with but little attention will give a wealth of flowers during the Summer. If the spikes are cut out as soon as they commence to fade, new shoots will keep up a profusion of flowers for a long time. Mammoth flowered mixed. Pkt. 5c; ¼ oz. 15c.

Digitalis (Fox Glove)

DATURA

CORNUCOPIA (Horn of Plenty)—Very hardy and beautiful. Flowers are trumpet-shaped, measuring 8 to 10 inches in length and 5 to 7 inches across the mouth and form three distinct flowers growing each within the other. Very fragrant. Pkt. 5c; ¼ oz. 20c.

DRACAENA
INDIVISA—Beautiful ornamental-leaved plants; long, narrow, green foliage. Indispensable for vases and house decorations. Large specimens are also very useful on the lawn. It will stand full exposure to the sun. Pkt. 10c.

Double Flowering Dahlias.

DAHLIAS

The Dahlia still holds its place as king of all the outdoor Autumn flowers, and they may be grown to the greatest perfection from seed, blooming beautifully the first Summer. Anyone can have a magnificent display of these regal beauties at very small cost. They continue to bloom profusely until frost, when the bulbs may be taken up, stored where they will not freeze, then set out again the following Spring. This may be continued year after year with success.

BUCKBEE'S DOUBLE LARGEST FLOWERING MIXED—A superb mixture of the finest double varieties of the largest size and finest colorings. Pkt. 8c; ¼ oz. 40c.

DOUBLE CACTUS FLOWERING MIXED—The most beautiful in cultivation. They are unequalled for rich and varied colors and perfection of form. Pkt. 7c; ¼ oz. 35c.

DOUBLE FINE MIXED—Pkt. 5c; ¼ oz. 25c.

SINGLE NOVELTY MIXED—Brilliant flowers running through a wide range of striking colors. Pkt. 5c; ¼ oz. 15c.

FOR DAHLIA PLANTS, SEE PAGE 142

CYPRESS VINE

A most beautiful climber with delicate dark green feathery foliage and an abundance of bright, star-shaped rose, scarlet and white blossoms. Tender annual. All colors, mixed. Pkt. 5c; ¼ oz. 15c.

CYPRESS VINE

CHINESE LANTERN PLANTS

Produces numerous large inflated husks, much the shape of Chinese lanterns; at first a beautiful green color, changing to a yellowish hue and then to bright scarlet. Pkt. 5c.

CLARKIA ELEGANS

Beautiful, hardy annuals with rose, white and purple flowers in delicate shades. Double mixed. Pkt. 5c; ¼ oz. 10c.

Double Cosmos

CLEOME PUNGENS

(Giant Spider Plant)

A very showy annual, growing 4 to 5 feet high, with rose-colored flowers of peculiar and interesting shape, suggesting spiders. The long, curving stems give the flower its name. It is a plant that is in bloom every day of the season. Pkt. 5c; ¼ oz. 25c.

CORN, Burbank's Ornamental

Rainbow

A highly ornamental plant. Leaves striped crimson, yellow, cream, white, bronze, green, etc. Pkt. 5c.

DOLICHOS

(Hyacinth Bean.)

A showy annual climber, grows luxuriantly about 10 feet high, branching out well from the bottom, and is clothed with dense, insect-proof foliage. The Sweet-Pea-like white and pink blossoms are borne in long, wistaria-like clusters, often a foot in length, which are followed by exceedingly ornamental seed pods. Finest mixed. Pkt. 5c; ¼ oz. 15c.

Dolichos, Hyacinth Bean.

DIANTHUS PINKS

Dianthus Pinks are one of the most useful and desirable plants, and for beauty and variety of colors and markings cannot be surpassed. A bed of these in a flower garden will make a grand display at a small cost. Plants from seed grow and bloom very quickly.

ROCKFORD FAVORITE MIXED—Comprises over 50 of the choicest Chinese and Japanese varieties, and includes, besides the standard sorts, all the new and brightest colors in spotted, striped and handsomely fringed varieties of late introduction, both single and double. This magnificent mixture contains the cream of the Dianthus family, and unexpected results may be obtained by planting a package. We cannot recommend this mixture too highly. Pkt. 6c; $\frac{1}{4}$ oz. 25c.

DOUBLE ROYAL PINKS—The flowers range in color from blood-red to pure white, and are beautifully frilled and fringed. The enormous blooms are especially adapted for cutting, the stems being long. Mixed colors. Pkt. 6c; $\frac{1}{4}$ oz. 25c.

MIXED CHINA OR INDIA PINKS—Our mixture includes all the best colors and shades. Double mixed. Pkt. 6c; $\frac{1}{4}$ oz. 10c.

DOUBLE FIREBALL—A beautiful, very dwarf and compact growing pink, only 10 to 15 inches in height. Flowers are perfectly double and color a rich velvety blood red. Effective for garden beds or pot culture and as cut flowers. Pkt. 6c; $\frac{1}{4}$ oz. 30c.

DOUBLE SNOWBALL—This dwarf Dianthus belongs with Double Fireball, and is equally beautiful, differing only in being pure white instead of red. It has all the sterling qualities of that sort, and is equally hardy and desirable. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

MOURNING CLOAK—A magnificent new variety with very double large flowers of a dark mahogany, almost black; petals margined pure white. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

DIANTHUS PINKS
ROCKFORD FAVORITE MIXED

FRINGED AND RUFFLED (*Lacinatus Mirabilis*)—Petals are deeply cut into fine strips of thread-like fringes for about half their length, and are twisted in all directions, presenting a novel aspect. In color they vary greatly, having all shades from pure white to deep purplish-red with red and rose zones. Single mixed colors. Pkt. 5c; $\frac{1}{4}$ oz. 20c.

HARDY GRASS PINKS (*Pheasant's Eye Pink*)—Single—The old reliable favorite. Fringed edges. White flowers with dark centers. Delightfully clove scented. Pkt. 5c; $\frac{1}{4}$ oz. 15c.

DOUBLE CLOVE PINKS (*Plumaris flore pleno*)—Double and semi-double varieties. Good range of colors, having a strong clove fragrance. Pkt. 6c; $\frac{1}{4}$ oz. 40c.

DAISY (Bellis) DOUBLE

Daisies are easily grown from Spring sown seed and come into flower in a very short time.

LONGFELLOW—Double, dark red. Pkt. 5c.

MAMMOTH WHITE—Double, purest white. Pkt. 5c.

DOUBLE QUILLED MIXED—A new strain. Pkt. 5c.

MAMMOTH OR GIANT MIXED—Finest offered. Pkt. 6c; $\frac{1}{4}$ oz. 30c.

IMPERIAL DOUBLE—Good mixture. Pkt. 5c; $\frac{1}{4}$ oz. 40c.

BLUE DAISY

(*Agathis Coelestis*.)

A beautiful bedding plant and an excellent indoor bloomer. The flowers are the very counterpart of the Paris Daisy, but sky blue with a yellow disc. Of easy growth. Produces flowers all the year. Pkt. 5c.

African Daisy Hybrids.

DIAMOND FLOWER

Dainty little annual with tiny foliage and beautiful little white and violet flowers. Blooms in a month from seed. Pkt. 5c; $\frac{1}{4}$ oz. 40c.

ESCHSCHOLTZIA

(California Poppy.)

Hardy annual, growing about one foot high, bearing a profusion of rich colored flowers about 1 inch in diameter; valuable for garden ornamentation and easily grown.

GOLDEN WEST—Bright yellow and orange. Pkt. 6c; $\frac{1}{4}$ oz. 15c.

SINGLE AND DOUBLE, Mixed Colors. Pkt. 5c; $\frac{1}{4}$ oz. 10c.

Eschscholtzia (California Poppy.)

EVENING PRIMROSE

(Oenothera.)

Large, saucer-like flowers of pure white and soft yellow. Very fragrant. Pkt. 5c.

FAIRY OR BABY ROSE

Roses from Seed the First Year.

The plants bloom in three months after sowing, so that seed sown in February in the house may be had in bloom in June in open ground, where they continue to bloom throughout the season, single, semi-double and double flowers. Pkt. 6c; $\frac{1}{4}$ oz. 20c.

Fairy Rose.

EUPHORBIA

VARIATED (Snow on the Mountain)—Attractive foliage, veined and margined with white; 2 feet. Pkt. 5c.

HETEROPHYLLA (Mexican Fire Plant)—An annual resembling the beautiful hot-house Poinsettia; 2 to 3 feet high of bush-like form, with smooth, glossy green leaves. In summer turn an orange-scarlet. Pkt. 8c.

CHINESE STRAWBERRY

(Fragaria—Indica.)

A Beautiful Basket Plant. Hardy perennial creeper from Indo-China, with yellow blossoms and beautiful small scarlet fruit. Pkt. 5c.

Chinese Strawberry.

Four O'Clock or Marvel of Peru.

FOUR O'CLOCK

(Marvel of Peru.)

No flower makes a prettier border than the old-fashioned Four O'Clock. It is one of the most brilliant and showy plants that can be grown. Finest mixed. Pkt. 5c; oz. 15c.

FEVERFEW

WHITE GEM—A fine, old-fashioned bedding plant; also suitable for pot culture. It grows about 18 inches high with numerous branching flower stems which are literally covered with very double, pure white flowers an inch in diameter. Pkt. 6c; $\frac{1}{2}$ oz. 10c.

GOLDEN FLEECE—Especially adapted for edging, as the foliage is beautifully serrated. Flowers very double, of a rich golden color. Pkt. 6c; $\frac{1}{2}$ oz. 10c.

GIANT GHOST FLOWERS

Is often called Wedding Bells. Blooms always. Fine for house culture and outdoors. The flowers are drooping, bell-shaped, over a foot long, 9 inches wide, of creamy white color and very fragrant. Pkt. 6c; $\frac{1}{2}$ oz. 25c.

GERANIUMS

They will bloom from seed in four to five months, and will frequently reward the cultivator with charming new varieties; in fact, propagation by seed is the only sure way to obtain new varieties.

CALIFORNIA GIANTS—

Seed saved from the finest double, semi-double and single varieties of the most gorgeous and brilliant colors; all shades of scarlet and crimson, rose, pink, salmon, cream, veined, pink, blush, snowy white, and all new auricle types. Pkt. 10c.

APPLE SCENTED—The old-fashioned favorite apple-scented Geraniums. Pkt. 8c.

ZONALE—Mixed. A superb strain. Pkt. 7c.

LADY WASHINGTON—

These are the well known richly colored show Pelargoniums. Our mixture includes all the best varieties. Pkt. 15c.

Geranium California Giant.

FORGET-ME-NOT (Myosotis)

QUICKBLOOMING—This type may be treated as annuals and be sown at any time of the year, beginning to flower in from 8 to 10 weeks' time. The plants are of round, bushy form, 5 to 7 inches high, and when fully grown are perfectly covered with clusters of exquisite flowers. Valuable for winter flowering in pots, as well as for garden beds and edgings. Pkt. 6c; $\frac{1}{2}$ oz. 35c.

VICTORIA—This is the finest variety of the beautiful old favorite Forget-Me-Not. Makes low bushy plants 6 to 8 inches high and the same in width, and bears a profusion of lovely azure blue flowers. Fine for edging and also for growing in pots and for cutting. Pkt. 5c; $\frac{1}{2}$ oz. 25c.

SEMPERBLORENS—A hardy perennial. Large, clear blue flowers in pretty sprays. Everblooming in flower from May until frost. Pkt. 10c.

Forget-Me-Not, Quick Blooming.

Fuchsia.

FUCHSIAS

(Lady's Eardrops.)

Fuchsias are as easily grown from seed as from cuttings, and from seed many new varieties are obtained. They will flower freely the first year in the open ground, while the plants can be taken in the house in winter where they will flower still more freely. Choicest Double and Single mixed. Pkt. 10c.

NEW FRAGRANT TREE FERN

(Artemisia)

This new ornamental foliage plant introduced from China is an annual, and owing to its fast growth reaches its full size during the year of sowing. It forms grand pyramidal bushes of 3 to 5 feet high. As a solitary plant it looks like a nicely grown-out Christmas tree. Also as pot plant it is very pretty, and may also be successfully grown in groups and borders, similar to *Kochia Trichophylla*, or Burning Bush. The color of the finely pinated foliage is a rich dark green.

Last, but not least, it may be mentioned that cut branches last very long, and may, to the greatest advantage, be used for wreaths, decorations, etc. For its great availability and its most easy culture this novelty may most warmly be recommended to all amateurs. Pkt. 5c.

GEUM

(Mrs. Bradshaw.)

A very showy, hardy perennial, 2 feet high. Blooms from June till frost. Flowers deep orange-scarlet, 2 inches in diameter, semi-double, resembling fine large Carnations. Blooms first season if sown early. Pkt. 8c.

Geum (Mrs. Bradshaw.)

GAILLARDIAS

(Blanket Flower.)

ANNUAL VARIETIES—Greatly admired for their fine forms and rich blending of colors, the gay colored flowers being abundantly produced from July until frost, while they thrive anywhere. Single and double mixed. Pkt. 5c; $\frac{1}{2}$ oz. 15c.

PERENNIAL—Grandiflora Hybrids—One of the showiest hardy plants. Growing about 3 feet high and succeeding in any soil in a sunny position, beginning to flower in June, then continuing the entire season. The flowers are of gorgeous coloring. The center is dark red brown, while the petals are marked with rings of brilliant crimson, orange and vermillion, and often a combination of all in one flower. Excellent for cutting. Pkt. 6c; $\frac{1}{2}$ oz. 15c.

Gaillardia Grandiflora Hybrids.

Gloxinia, Hybrida

GLOXINIA

Lovely Summer-blooming pot plants. They flower profusely and have gorgeous color. Many are magnificently spotted and mottled. Easily grown. Blooms in four to five months from time seed is sown. Hybrida finest mixed. Pkt. 10c.

ORNAMENTAL GOURDS

Tender annual climbers of rapid growth, vines often growing 20 to 30 feet long. They have luxuriant foliage and are immune from insects. Fruits curiously shaped in various colors and peculiarly marked. Forms may be wonderfully varied by tying strings around the young fruit or by enclosing same in a carved mold while growing. Many of these fruits keep for years, being very hard shelled. Mixed. Pkt. 5c; oz. 15c.

ORNAMENTAL GOURDS

CODETIA

Beautiful hardy annuals of compact growth, about 1 foot high, bearing freely large flowers, 3 to 4 inches across, of delicate colors and shades that glisten in the sunshine like silk. Fine for bedding and for pots. They do best on rather poor soil and in a not too sunny location. Mixed. Pkt. 5c; ¼ oz. 15c.

ICE PLANT

Handsome and curious trailing plants for hanging baskets, or vases and the garden, the foliage appearing as though covered with ice crystals. This is one of the most beautiful and effective basket plants that can be grown. Dwarf annual trailer 6 inches high. Pkt. 5c; ¼ oz. 15c.

HELIOTROPE

CHOICEST MIXED—Our new selected Heliotrope, is a universal favorite on account of its delightful fragrance and duration of bloom, flowering equally well as bedding plants in summer, or as pot plants in the house during the winter. Seed sown in the Spring makes fine plants for bedding out, and are as easily grown as Verbenas. The colors of the blossoms range from white through all shades of violet to the deepest purple. Pkt. 5c; ¼ oz. 35c.

REGAL—A new variety of dwarf Heliotrope. Compact growth and immense flower heads. All shades mixed. Pkt. 10c.

For **HELIOTROPE PLANTS**, see page 155.

HUMULUS

(Japanese Hop.)

JAPONICUS—One of the most rapid climbers grown. Seed can be sown in the open ground in Spring and the plant will attain enormous dimensions very quickly. The foliage is luxuriant and it is one of the best plants for covering verandas and trellises. Heat, drought and insects do not trouble it. Pkt. 5c; ¼ oz. 10c.

NEW LEOPARD LEAVED—Beautifully variegated white, green and pale yellow. Highly ornamental. Will grow anywhere. Pkt. 5c; ¼ oz. 15c.

Japanese Hop, Leopard Leaved

Hollyhock—New Annual

Regal Heliotrope.

Job's Tears.

JOB'S TEARS

(Coix Lachrymae.)

Curious ornamental grass with broad corn-like leaves and hard, bead-like seeds. Valuable for winter bouquets with everlasting flowers, and also for basket making. The seed is strung and worn around the neck as an ornament, and by teaching babies to chew the beads. Pkt. 5c; oz. 10c.

HIBISCUS

HARDY HYBRIDS—A fast-growing perennial, fine for clumps. Enormous flowers—as large as tea-saucers—white, blush, pale and deep pink, rose, etc. Plants from Spring sown seed will bloom in September. Mixed colors. Pkt. 5c; ¼ oz. 30c.

NEW GIANT FLOWERING RAINBOW—The most striking introduction of hardy plants for many years. Grows about 6 feet high, producing huge blossoms in many shades of pink, rose, brick red, and also white. They bloom from July until frost. Perfectly hardy and grow anywhere. If sown early, will bloom the first season. Mixed colors. Pkt. 10c; ¼ oz. 45c.

LANTANA

Well known shrubby plants with clusters of Verbena-like flowers, and producing their pink, yellow, orange and white heads in great abundance. They have an agreeable aromatic perfume. Hybrida finest mixed. Pkt. 5c; ¼ oz. 15c.

HOLLYHOCK

Unequalled Double Strains

Nothing is more beautiful than a background of stately double Hollyhocks. Our named colors can be depended upon to come true, while our Mixtures we believe to be the finest in the land.

DOUBLE WHITE—Clear, pure white. Pkt. 7c; ¼ oz. 30c.

DOUBLE MAGENTA—Fine bright variety. Pkt. 7c; ¼ oz. 30c.

DOUBLE ROSE—Rich solid color. Pkt. 7c; ¼ oz. 30c.

DOUBLE SCARLET—Intense blood red. Pkt. 7c; ¼ oz. 30c.

DOUBLE LEMON—True lemon yellow. Pkt. 7c; ¼ oz. 30c.

PRIZE DOUBLE MIXED—Perennial—The perfect doubleness and large size of this magnificent flower will please the most critical. The seed has been saved from our own unrivaled collection of plants. All colors mixed. Pkt. 5c; ¼ oz. 20c.

DOUBLE ALLEGHENY—Perennial—Rich colors, fringed petals. Pkt. 5c; ¼ oz. 25c.

NEW ANNUAL EVERBLOOMING

The perennial varieties do not bloom until the second year, if grown from seed; these annual kinds, however, bloom the first year, and if sown in the open ground in May, they will be in flower in August, but if started indoors and set out in May, they will bloom in July. They are continuously covered till frost with large flowers—some semi-double, but mostly densely double with fringed petals, and all are unusually large, often measuring 5 inches across. Double mixed. Pkt. 6c; ¼ oz. 25c.

For **HOLLYHOCK PLANTS**, see page 170.

Hibiscus—Giant Flowering Rainbow

LARKSPUR—DELPHINIUM

NEW DOUBLE HYBRIDS (Hardy Perennial)—Produce beautiful spikes of immense flowers, semi-double and double, from 2 to 3 feet in length. The colors are very beautiful, ranging from pure white through all the shades of lavender and blue, to deep purple. Mixed colors. Pkt. 6c; $\frac{1}{2}$ oz. 25c.

DWARF DOUBLE GIANT HYACINTH—This is one of the best known hardy annuals. Our strain of Giant Hyacinth is a vast improvement over the old varieties more flowers being double and all of them much larger and finer colors. They make handsome beds and borders and are of exceptional value for cutting purposes, the long spikes being borne on long stems and keeping well for a long time when cut. A vase of one color or of mixed colors is most charming. Sown in the open ground early in Spring, plants will be in bloom at the beginning of July and give a continuous succession of flowers until cut down by frost, a record not surpassed by any other annual. Mixed. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

LINARIA—Annual

MAROCANNA EXCELSIOR HYBRIDS—Hardy annual plants, 18 inches high and producing beautiful flowers resembling small Snapdragons. They are very desirable for bedding, bouquets and table decoration and are of the easiest culture. The flower heads are long and are produced on long upright stems. The flowers are wide open, $\frac{3}{4}$ inches across, mostly of violet and light purple shades; each has a white tip with a yellow blotch which gives a bed of them a light tone and makes it very pretty. Our mixture is very beautiful and effective. Pkt. 10c.

LINARIA, KENILWORTH IVY

A very pretty hardy perennial trailing plant for covering rock work, and very useful for hanging baskets. The flowers are small but pretty. It is easily grown from seed. Pkt. 5c; $\frac{1}{2}$ oz. 50c.

Lupinus (Sun Dials).

LUPINUS (Sun Dials)

ANNUAL SORTS MIXED—(Polyphyllus)—Free-flowering, easily grown varieties, with long, beautiful spikes of various colored pea-shaped flowers and graceful, seven-fingered foliage. Valuable for mixed borders, beds and for cutting. Two feet high. Pkt. 5c; $\frac{1}{2}$ oz. 15c.

PERENNIAL SORTS MIXED—(Polyphyllus)—Hardy perennials which should have a place in every garden. The long spikes of pea-shaped flowers are produced in a great variety of colors. They bloom in May and June. Three feet high. Pkt. 5c; $\frac{1}{2}$ oz. 20c.

MATHIOLA (Evening Scented Stock)—The wonderful perfume plant. An old-fashioned hardy annual which has no beauty to recommend it, the flowers being of a dull purplish-lilac color but which deserves being grown in every garden for the exquisite perfume exhaled profusely in the evening and after showers. One foot high. Pkt. 5c; $\frac{1}{2}$ oz. 15c.

Mathiola.

MARIGOLD

LEMON BALL—The extra large flowers are perfectly rounded—of nearly ball-like form; the color is a clear canary-yellow; the brightness of coloring and perfection of form make them resemble large double Yellow Dahlias, only produced so much more abundantly and for a longer season. Pkt. 6c; $\frac{1}{2}$ oz. 15c.

ELDOorado—The flowers are from 2 to 4 inches in diameter, imbricated and perfectly double. They embrace four shades of color—the lightest primrose, lemon, golden yellow and deep orange. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

TALL AFRICAN, DOUBLE MIXED—Very early, profuse bloomers. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

DWARF AFRICAN, DOUBLE MIXED—Pride of the Garden—Compact bushes, 15 inches high with immense double, yellow and orange flowers. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

FRENCH DOUBLE MIXED—A class of showy and extremely effective plants. Fine double flowers of rich and beautiful colors. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

LEGION OF HONOR—A beautiful single dwarf bushy variety, bearing rich, golden yellow flowers with garnet blotches in the center of each petal. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

Marigold-Lemon Ball.

Larkspur—New Double Hybrids.

LOBELIA

FINEST MIXED—A beautiful dwarf-growing plant with delicate little blue and white flowers for borders and vases. About 6 inches high. They are among the few plants that will grow in a shady situation. Pkt. 5c; $\frac{1}{2}$ oz. 10c.

CRYSTAL PALACE COMPACTA—Dark blue flowers, dark foliage, compact, erect growth. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

CARDINALIS (Cardinal Flower)—A beautiful hardy perennial of striking appearance, unrivaled for permanent beds and borders. Will thrive in the shade. Three feet high, with large spikes of brilliant scarlet flowers, 15 to 18 inches long, keeping the plant aflame throughout fall. Pkt. 15c.

Lobelia, Crystal Palace.

MONARDA DIDYMA (Oswego Tea.)

A hardy perennial. Bushy plants 3 feet high covered with masses of vivid scarlet flower heads with petals similar to Cactus Dahlias. It is called Oswego Tea, Mint, etc., on account of the delicious fragrance of the leaves when crushed. Grown anywhere in any soil and in any position, and spreads rapidly. Blooms the second year from seed. Much used in beds around a flag pole on the White House. The tall Monarda is planted in lawn with blue Cornflower and white Forget-me-nots, and the Feverfew in the outer ring. These varieties should be in full bloom by the 4th of July. "Your garden pays its tribute to your country colors, too." Pkt. 10c.

Oswego Tea (Monarda).

Buckbee's Everblooming Mignonette

BUCKBEE'S ROCKFORD—FINEST MIXED

The finest Mignonette Mixture ever blended. It includes all the well-known sorts, together with many new Hybrids. No garden is complete without this mixture. Sow in early Spring and again in July to keep up a succession of flowers till frost. When grown under favorable conditions spikes will not only be of remarkable size, but

deliciously fragrant. The individual florets are of immense size, forming a graceful as well as compact spike. Of extraordinary keeping qualities, retaining their grace and fragrance until every bud opens. Pkt. 5c; ½ oz. 15c; oz. 25c.

IMPROVED GOLDEN QUEEN

Golden-yellow flowers; very sweet and fragrant. Pkt. 5c; ½ oz. 10c.

MILES' GIANT WHITE SPIRAL

Very showy; fragrant blossoms. Pkt. 5c; ½ oz. 15c.

NEW GIANT RED FLOWERED

Intense red. Very sweet-scented. There is no Mignonette except Red Goliath which can equal this. Its flowers are larger in every way than those of other sorts, the spikes are very dense, its foliage is distinct, being crinkly, while its odor is strong and most delicious. Pkt. 5c; ½ oz. 15c.

SWEET FLOWERED

The old favorite Sweet Mignonette with small spikes, but very sweetly scented. Pkt. 5c; oz. 15c.

RED GOLIATH

The grandest Mignonette ever introduced. Remarkable for color, size, fragrance and profusion of bloom. The plants are of strong yet compact growth with rich green foliage. The giant flower spikes are borne on erect, strong stalks, and measure from 6 to 8 inches in length, by 2½ inches in diameter. The individual florets are of an immense size, forming a graceful as well as compact spike which is of a fire-red shade, surpassing all other varieties in brilliancy of color. The fragrance is rich and powerful and the keeping qualities are remarkable, the flowers remaining fresh in water for 8 to 10 days. Pkt. 10c; ½ oz. 25c.

Red Goliath Mignonette.

MOONFLOWER

NEW CROSS-BRED OR HYBRID VARIETY—Of great value for the North, as it is in full bloom one month before the White Seeded. Will grow 30 to 40 feet in a single season. Its flowers are 4 to 6 inches across, very numerous, are open every evening and on cloudy days. Pkt. 5c; ½ oz. 25c.

NEW IVY LEAVED (Day Blooming)—A new Moonflower which opens its blossoms early in the morning (instead of evening), and remains open nearly all day. Flowers pink or creamy white; leaves ivy-shaped. Pkt. 5c.

WHITE SEEDED—This is the variety most generally grown, being larger in flower and of sweeter odor than the Black Seeded variety. Pkt. 5c; ½ oz. 25c.

New Cross-Bred Moonflower.

Monkey Flower.

MONKEY FLOWER

MIMULUS TIGRINUS—Tender little plants about one foot high, producing in great profusion very showy, large, Gloxinia-like flowers, brilliantly colored, blotched and striped in every conceivable manner and ranging in colors through white, yellow, rose, crimson and maroon. Excellent for house culture, baskets and vases, and also have a brilliant effect in beds and borders. They thrive in shady and moist situations. Mixed. Pkt. 5c.

MUSK PLANT

MIMULUS MOSCHATUS—A well-known and favorite plant, both for outside borders and for pot culture. Valued on account of the musky odor of its leaves. Flowers small yellow. Pkt. 7c.

Buckbee's Rockford Mixed Mignonette.

MAURANDIA

(Climber.)

Elegant twining, climbing plants, with handsome, graceful foliage and flowers. Particularly adapted for hanging baskets, vases and light trellises. A half-hardy perennial, flowering in July from Spring-sown seed and continuing till frost. If desired for Winter culture in the house, take up before frost. Mixed colors, blue, mauve and white. Pkt. 5c; ½ oz. 35c.

New Imperial, or Giant Japanese Morning Glory.

Nigella (Love-in-a-Mist)

Nigella (Love-in-a-Mist).

DAMASCENA — A popular old-fashioned flower, free flowering with finely cut foliage surrounding the curious looking flowers and seed pods. Mixed. Pkt. 5c; ¼ oz. 15c.

MISS JEKYL, BLUE — An improved large flowering variety of the above with double cornflower blue blossoms. Pkt. 6c; ¼ oz. 20c.

MISS JEKYL, WHITE — A counterpart of the blue with pure white flowers. Pkt. 8c; ¼ oz. 25c.

Nicotiana (Sweet-Scented Tobacco Plant).

AFFINIS HYBRIDS — Similar to the Affinis, but the flowers are larger. Colors, white, purple, red, salmon, pink, violet, etc. Very showy; bloom profusely all Summer and Fall. Mixed colors. Pkt. 6c; ¼ oz. 25c.

MORNING GLORY

NEW IMPERIAL OR GIANT JAPANESE

The flowers are of gigantic size and the colorings and markings beyond description ranging from snow-white to black purple, with all the possible intermediate shades, such as pink, rose, fiery red, copper red, carmine, crimson, pale blue, deep blue, royal purple, maroon, bronze, indigo, slate, brown, cherry and ash gray. Others are edged with white, having throats of one of the above colors; there is also an endless number of flowers spotted, marbled, striped, flaked and splashed. Choicest mixed. Pkt. 6c; oz. 18c; 2 oz. 30c; ¼ lb. 25c.

IMPROVED TALL OR CLIMBING

Most popular climber in cultivation. Of rapid growth. Our seed is selected from the best varieties only, and is a great improvement over the old sorts. Select mixed. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c.

DWARF MORNING GLORY

The wonder of the age as a Winter house-blooming variety. Flowers richly colored. Mixed. Pkt. 5c; oz. 15c.

NEW FUCHSIA-FLOWERED—TALL

The vines or shoots are gracefully slender, but very numerous and most densely set with five-fingered deep green leaves, growing very rapidly. Bear pretty, light rosy-pink flowers. Finest mixed. Pkt. 8c.

BUCKBEE'S NEW DOUBLE—TALL

This Double Morning Glory will be greeted as a welcome addition to this class of plants. It is of rapid growth, producing its large double flowers very freely. They are of beautiful form and coloring. Mixed. Pkt. 10c.

BUCKBEE'S
NEW DOUBLE MORNING GLORY

Nicotiana

Sweet Scented Tobacco Plant

AFFINIS — Handsome and well-known hardy annuals that grow easily from seed, forming compact bushes about 3 feet high which are in continuous bloom throughout the season. Their blooms are tube-shaped, pure white, very sweet-scented and desirable as cut flowers. Pkt. 5c; ¼ oz. 15c.

Nolans.

Nolans

Beautiful trailing plant, fine for growing in masses, and unsurpassed for baskets, pots, vases or rock work. Flower is similar in shape to the Morning Glory. Fine Mixed. Pkt. 5c; ¼ oz. 10c.

BUCKBEE'S NASTURTIUMS

Buckbee's Tall Giant Flowering Nasturtiums.

Buckbee's Tall Giant Flowering Mixed

A wonderful diversity of rich colors and new and striking combinations are found in this unequalled mixture. A row in full bloom is truly gorgeous beyond description, containing as it does every shade and tint of yellow, rose, scarlet, carmine, orange, lemon, bronze, violet, purple, maroon, ruby, cream and pink; both in solid colors and mottled and striped in many showy and exquisite ways. Pkt. 6c; oz. 15c; $\frac{1}{4}$ lb. 55c; lb. \$1.40.

Tall Selected Mixed

This mixture is a most beautiful assortment of rich and brilliant colors and is surpassed only by Buckbee's Giant Flowering Mixture. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. 95c.

Hybrids of Madame Gunter

A most beautiful dark-leaved strain of climbing varieties, flowering profusely and having a wide range of bright and distinct colorings. Pkt. 5c; oz. 18c; $\frac{1}{4}$ lb. 60c.

New Tall "Ivy-Leaved"

The plants are of running growth, but have the same foliage and flowers as the Dwarf Ivy-Leaved varieties. Pkt. 6c; $\frac{1}{2}$ oz. 20c.

New "Ivy-Leaved" Dwarf Mixed

A new class, with thick, green lobed leaves resembling those of the English Ivy. The flowers, which are borne in the greatest abundance throughout the season, are of medium size, and peculiarly cut and fringed, giving them an airy butterfly effect. Pkt. 6c; $\frac{1}{2}$ oz. 20c.

Ivy-Leaved Nasturtium.

New Tall Variegated Leaved

The leaves are so beautifully variegated with yellow, white and green that the plants would be worthy of culture for the foliage alone. The flowers are of the same size, form and colors as the regular tall Nasturtiums. Superb Mixed. Pkt. 6c; $\frac{1}{2}$ oz. 20.

New Dwarf Variegated Leaved

The very best of the variegated leaved Nasturtiums. The leaves are marked with white, green and yellow and contrast nicely with the large showy flowers which are of all colors. Pkt. 6c; $\frac{1}{2}$ oz. 20.

Buckbee's Giant Flowering Dwarf Mixed

These grand New Bedding Nasturtiums are brilliant in the extreme. They produce in wonderful abundance large flowers of the most gorgeous hues. The colors are very intense, making a sharp diversity of color not to be found in common mixtures. The plants are strong and vigorous, growing very quickly and producing erect, symmetrical bushes, with foliage from light green to deep blue green. Pkt. 6c; oz. 15c; $\frac{1}{4}$ lb. 55c; lb. \$1.50.

Dwarf Fine Mixed

A first-class mixture from selected colors that harmonize beautifully. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 35c; lb. 95c.

Lilliput or Miniature Mixed

Very beautiful varieties smaller in growth, leaf and flower than the other dwarf sorts, forming dwarf compact bushes, 8 to 10 inches high, full of flowers throughout the season by flowers of a great variety of brilliant colors. Pkt. 5c; oz. 25c.

Variegated Leaved Nasturtium.

Dwarf Giant Flowering Nasturtium.

MAMMOTH SUNRISE PANSIES

Pansies are a universal favorite with young and old and, aside from their great beauty, we all treasure them as the symbol of modest worth and true affection. The smallest yard must have its Pansies. Not poor, forlorn plants, struggling with heat and drouth and hard baked ground, though even there, yielding us handfuls of cheery bloom; but, rather, strong, vigorous plants, riotous in the cool, deep, mellow beds they love, made rich with fertilizers, kept free from weeds, and shaded from the hot afternoon sun. In such a bed one may gather great, velvety Pansies by the handfuls—flowers so radiantly beautiful that they scarcely seem of the earth. Pansies are now produced in an almost infinite variety of colors and markings. Their brilliancy of shading, extended season of blooming and long-keeping characteristics make them general favorites. We have been interested in the bringing forward of advanced types of large varieties in this country as well as in Europe, and our stocks are the very best obtainable. We spare neither pains nor expense to satisfy the most critical trade. Poor Pansy seed is dear at any price. Ours is saved with great care and is the best.

Buckbee's Mammoth Sunrise Mixture

This splendid mixture is a blended combination of mammoth flowering Pansies. It contains all colors and will prove a delightful surprise in regard to the great size and rich and varied colorings of its flowers. Very popular. Pkt. 10c; 1/8 oz. 75c.

Buckbee's Sweet Scented Mixture

The Perfume of the Violet. The Beauty of the Pansy.

This new class is the result of crossing the Pansy with the Sweet Violet; the resulting hybrids, in addition to retaining the delightful Violet perfume, produce the most beautiful Pansy-like blossoms, 2 to 2 1/2 inches across, of great substance and of an endless variety of colors. Mixed. Pkt. 8c; 1/8 oz. 60c.

Buckbee's Sweet Scented Pansies

Orchid—Flowered

All the delicate shades and tints of the orchids may be found in these charmingly pretty favorites. Rose, orange, pink, lilac, terra cotta, chamomile and other exquisite shades. Orchid-flowered Pansies are not as large as some of our giant strains, but they will appeal by their exquisite coloring and the elegant shape of their flowers. Pkt. 8c; 1/8 oz. 60c.

Giant Flowering Pansies in Separate Colors

They Are the Largest and Most Beautiful Pansies in Cultivation
GIANT YELLOW PRINCE—Pure golden yellow, sometimes with the three lower petals marked with purplish or red blotches and hair lines. Pkt. 8c.

GIANT SNOW QUEEN—The largest pure white Pansy without blotches. Edge of petal is frilled. Pkt. 8c.

GIANT STRIPED—The flowers are striped and mottled in various tints. Pkt. 8c.

GIANT ADONIS—Light blue with a white center setting off the dark blotches on the petals in striking manner. Pkt. 8c.

GIANT BEACONFIELD—This is a great favorite on account of the rich combination of purple and lavender, shading to white towards the top. Pkt. 8c.

GIANT PSYCHE—Velvety violet-blue with a broad white edge. Petals waved and ruffled after the Masterpiece style. Pkt. 8c.

GIANT EMPEROR WILLIAM—Rich deep blue. Pkt. 8c.

GIANT VOLCANO—The best red Pansy. Each petal is marked with a very large dark blotch. Pkt. 10c.

GIANT BLACK PRINCE—The rich, glossy black has a peculiar, soft, velvety appearance, the magnificent large flowers are of fine circular form. It flowers so profusely that a bed of the Black Prince makes a sight not often equalled. Pkt. 8c.

GIANT BRIDESMAID—Rosy-white, with darker blotches. Pkt. 8c.

BUCKBEE'S COLLECTION OF GIANT PANSIES—1 Pkt.
each of the above 10 sorts for 75c.

BUCKBEE'S "FULL OF LIFE" PANSIES

Buckbee's Giant Flowering Pansy.

GIANT MADAME PERRET

A superb new strain; large flowers and beautiful colors, blossoms ranging through all the shades of red, from a pink to a fine, deep purple, with an intermediate bright red edged with white. The face of the flower in some cases is regular in color, while in others it is lined and striped. The extraordinary size of the flowers, which reach as much as 3 to 3½ inches in diameter, makes it a novelty of the first rank. Pkt. 7c; ½ oz. 60c.

GIANT "MASTERPIECE"

This magnificent Pansy comes nearer to double Pansies than anything ever introduced under that name, the border of every petal being conspicuously crimped and curled in such a fashion that the flowers appear double. The color combinations and variations are very odd and striking, and contain some very lovely tints that cannot be found in any other strain of Pansies. Pkt. 15c; 2 for 25c.

Giant Masterpiece Pansy.

BUCKBEE'S GIANT FLOWERING MIXED

In this magnificent mixture of giant flowering Pansies, the colorings are wonderfully rich and varied; every shade and tint of rose, canary-yellow, black, white, cream, lavender, garnet, sky-blue and orange are produced in endless variations and striking combinations, while others have silvery grounds, heavily blotched at the base of each petal with a dark, rich shade. The enormous flowers are of thick, velvety texture, perfect form, and borne on long stems well above the foliage. The compact, rounded plants are of sturdy habit and deep rooted, so that they bear the gigantic flowers profusely and continuously. Pkt. 10c; ½ oz. \$1.00; oz. \$7.00.

BUCKBEE'S WORLD'S FAIR PRIZE MIXED

This mixture was awarded Grand Prize Medal at the World's Fair. It is an exceedingly fine mixture, producing flowers of rare beauty in both colorings and markings. Pkt. 6c; ¼ oz. 55c.

IMPERIAL SPLENDID MIXED

Much used for bedding. The flowers, while not giants are very large, of fine form, and of a wonderful variety of colors, this mixture embracing over fifty varieties. Pkt. 5c; ¼ oz. 50c.

Giant Madame Perret Pansy

BUCKBEE'S BEDDING PANSIES IN SEPARATE COLORS

These are very early and free flowering, and of good size.

EMPEROR FREDERICK—Velvety brown, shaded into a narrow band of deep golden yellow, which borders each petal. Pkt. 6c.

EMPEROR WILLIAM—The flowers are of the true ultramarine blue color, with well defined violet purple eye. Pkt. 6c.

FAUST or KING OF THE BLACKS—Almost coal-black. Pkt. 6c.

FIRE KING—Lower petals with large blotch of deep brown-red, margined yellow; upper petals fiery red-brown. Pkt. 7c.

LORD BEACONFIELD—Deep purple-violet, shading to white on the upper petals. Pkt. 6c.

NEW RED MIXED—A mixture of all the best red and fiery shades which have been produced up to date. Pkt. 6c.

PEACOCK—Upper petals ultramarine blue; lower, deep claret with white margin. Pkt. 6c.

PURE WHITE—Pure white, without blotches. Pkt. 6c.

ROSY MORN—Purplish white, without blotches. Pkt. 6c.

YELLOW GEM—Pure yellow, without edge. Pkt. 6c.

BUCKBEE'S COLLECTION OF BEDDING PANSIES—1 PKT. EACH OF THE ABOVE 10 KINDS FOR 55c.

Buckbee's Mammoth Prize Mixed Phlox
The Finest Mixture Ever Offered

Buckbee's Mammoth Prize

Their long duration in bloom, combined with their almost unequaled richness of color, renders these Phlox of invaluable service in the flower garden. The color ranges in every conceivable shade. The flowers are twice the size of common Phlox, of great substance and beautiful form. The plants are of stout branching habit, always erect. **BUCKBEE'S MAMMOTH PRIZE**, Grandest of All Phlox, in Finest Mixture, Pkt. 8c; $\frac{1}{2}$ oz. 25c.

Hardy or Perennial

(For Plants, See Page 168)

The great rich heads of flower masses are simply magnificent. The most admired sorts and the best bloomers. Mixed, Pkt. 10c.

New Double Flowering Phlox.

New Double

Double Phlox are most desirable annuals for cut flowers, lasting longer than single ones. We have secured a particularly fine strain from France, which has a large percentage of pure white and cream color and is perfectly double and semi-double. The white is especially valuable as a cut flower. The semi-double flowers are fully as desirable as the doubles; in fact, many claim they are even prettier. This Phlox is not rivaled among garden flowers in brilliancy of bloom. They are strong growing, healthy plants, with pretty foliage, and belong in every garden, being one of the most brilliant and at the same time one of the earliest and most satisfactory plants, which can be readily grown from seed. The fine blooms, produced in large trusses, furnish a grand display in the garden and are very effective for table decoration. We are sure our customers will be greatly pleased with them. Select Mixed. Pkt. 8c; $\frac{1}{2}$ oz. 40c.

Finest Mixed

Contains in splendid blend many varieties. Invaluable for bedding and cut-flower purposes. Pkt. 5c; $\frac{1}{2}$ oz. 15c.

Starred and Fringed

In the fringed flowers the petals are fimbriate, three-toothed, of a great variety of magnificent velvety colors with a bright eye in the center and a white border. In the Starred Phloxes the central teeth of the petals are five or six times as large as the lateral ones, and projecting beyond them like little spines, give the flowers a distinctively star-like form. All colors mixed. Pkt. 6c; $\frac{1}{2}$ oz. 25c.

Cecily, New Dwarf, Compact, Large Flowering

A lovely strain with immense flowers. The plants grow erect, only 6 to 8 inches high. For bedding alone, or as borders in beds with taller varieties, it is one of the most brilliantly effective annual flowers. A choice mixture of countless shades. Pkt. 6c; $\frac{1}{2}$ oz. 50c.

Portulaca or Moss Rose

DOUBLE GIANT FLOWERED

MIXED—One of the most showy and beautiful annuals with abundant highly colored flowers. For baskets, beds, masses or edging it is invaluable. Pkt. 6c; $\frac{1}{2}$ oz. 50c.

SINGLE MIXED—A great variety of colors. Mixed, Pkt. 5c; $\frac{1}{2}$ oz. 15c.

Double Portulaca, or Moss Rose.

Hardy or Perennial Phlox.

BUCKBEE'S "FULL OF LIFE" PETUNIAS

Giants of California Petunia.

GIANTS OF CALIFORNIA

A California strain of great beauty, size and luxuriance. The flowers are of immense size, often measuring 5 to 6 inches across. The variety of colors, markings, veinings and blotchings distinguish them from all others. They are usually ruffled and fringed on the edges, and present a great variety of beautiful colors. Pkt. 10c.

BUCKBEE'S NEW DOUBLE FANCY FRINGED

A mixture of the best large flowering and Fringed Double Petunias. It embraces a wide range of colors and shows finer combinations than we have heretofore found in any double Petunias, including delicate mauve, porcelain blue, white, garnet and velvet shades. This carefully hybridized seed will yield a larger percentage of double flowers than any other Petunia in cultivation. Mixed. Pkt. 15c.

Double Fancy Fringed Petunias

HYBRIDA—Single Mixed

A splendid mixture, embracing all colors, including striped and blotched varieties. Are excellent for bedding or massing, remaining in bloom the entire summer. Pkt. 5c; ½ oz. 35c.

DWARF—Single Mixed

Neat, compact growing erect bushes about 8 inches high, covered with a multitude of flowers all season. Valuable for edging and pots. Pkt. 10c.

GRANDIFLORA—Single Large Flowering

One of the richest colored mixtures in cultivation, beautifully veined with various shades of purple, rose, lavender, yellow and crimson. Mixed. Pkt. 8c.

Buckbee's Giant Single Petunias

ROSY MORN—One of the prettiest soft carmine-pink with white throat. Very fine for beds or porch boxes. Pkt. 8c.
HOWARDS STAR—Color is an old rose with well defined white star-like stripes. Pkt. 8c.
SNOWBALL—Dwarf and compact plant. Blooms profusely the entire season. Flowers pure satiny white. Pkt. 8c.
STRIPED—Flowers not quite as large as above, but all are beautifully striped and blotched. Pkt. 8c.

Petunia Plants—See Page 159

BUCKBEE'S "FULL OF LIFE" POPPIES

Although the Poppy may be termed by some an old fashioned flower, it is as indispensable today as it was in our Grandmother's garden. Innumerable flowers of the brightest and most varied colors with their graceful, feathery foliage makes this one of the most desirable of our easily grown annuals.

BURBANK'S SANTA ROSA GIANT SHIRLEY

A great advance in single-flowering annual Poppies. The flowers are immense, often measuring 3 to 4 inches across, the petals are fluted and crinkled and in the sunlight appear like ruffled satin. Bloom in continuous succession for weeks. Flowers white, white-veined pink, white-splashed crimson, rose banded with white, salmon, carmine, blush, scarlet, and many splashed, striped, dotted and edged, etc. Pkt. 5c; ½ oz. 15c.

BUCKBEE'S GIANT GRANDEST DOUBLE MIXED

A dazzling mixture of beautiful double Poppies, giant-flowering kinds of the richest and brightest colors, as well as the daintiest and softest tints. Pkt. 5c; ½ oz. 15c; oz. 25c.

PAEONY FLOWERED

Large, showy, double, globular flowers. Fine Mixed. Pkt. 5c; oz. 15c.

ICELAND

Hardy perennials, bloom the first year from seed. Brilliant flowers. Mixed Colors. Pkt. 5c; ½ oz. 20c.

ORIENTAL HYBRIDS

Hardy perennials with enormous gorgeous flowers. Mixed Colors. Pkt. 8c; ½ oz. 30c.

Oriental Hybrid Poppy.

Buckbee's Giant Double Poppies.

POPPY PLANTS—See Page 170

Pyrethrum Hybridum, Single and Double.

HYBRIDUM GRANDIFLORUM, Single—Large, bright and showy, daisy-like flowers ranging in colors from white, light pink, to deep red, with bright yellow centers, bloom in spring and again in fall. The flowers are invaluable for cut flowers, being borne on long stems and lasting a long time. The foliage is most elegant in its finely cut, fern-like form and fresh deep green color and is attractive at all times. Nothing surpasses these Pyrethrum for profusion of flowers during the season, and being so simply and easily cultivated, they ought to have a place in every garden whether large or small; height 2 feet. Hardy perennial. Mixed. Pkt. 10c.

HYBRIDUM DOUBLE—Hardy perennial; large double, beautiful flowers, resembling a refined China Aster. Height 1½ feet. Pkt. 20c.

QUALITY
NOTHING BUT
QUALITY

Primula Sinensis or Chinese Primrose.

Penstemon

A most showy perennial; as a bedding plant takes rank with the Petunia, Phlox, etc. Colors, rose, red, carmine, cherry, pink, lilac, purple, etc. The plants grow 2 feet high; every branch is a spike of large flowers, gloxinia-like in size and shape. Not quite hardy and is best treated like an annual, sown early indoor and set out as soon as the weather permits; it will bloom from July till frost. Choicest Mixed. Pkt. 5c; ¼ oz. 25c.

Ricinus

(Castor Oil Bean)

ZANZIBARIENSIS GIANT MIXED—From seeds sown in the open ground in May the plants are in full foliage early in July, and attain a height of 12 to 14 feet. The enormous leaves, beautifully lobed, measure 2½ to nearly 4 feet across. Pkt. 5c; oz. 15c.

GOOD MIXED—Many choice varieties. Pkt. 5c; oz. 10c.

Ricinus Zanzibariensis or Giant Castor Oil Bean.

Primula Sinensis or Chinese Primrose

One of our most beautiful and indispensable plants for Winter or Spring blooming in the house or conservatory. Unequaled as Winter bloomers—easily grown.

CHINESE PRIMROSE, Buckbee's Superb Mixed—An elegant mixture embracing all the best large-flowering varieties, and also including the fringed sorts. Pkt. 10c.

CHINESE PRIMROSE, Finest Double Mixed—A splendid strain of the finest large-flowering fringed varieties. Our mixture includes the most brilliant colors. Pkt. 18c.

Primula Obconica Grandiflora

BABY PRIMROSE—Primula Obconica is as near an everblooming plant as is possible to obtain. It has been known to flower for over twelve months without a break. Pkt. 10c.

Rudbeckia.

Rudbeckia

(Speciosa Bicolor)

Showy Annual of Easy Culture. Eighteen inches in height. The flowers are produced singly on long, stiff stems and have a diameter of 2 to 3 inches. Large rounded purplish cone in center, with narrow petals around the base of cone. Petals are a deep orange-yellow, heavily marked with brownish red on inner portion. Pkt. 5c; ¼ oz. 15c.

Salvia—Scarlet Dragon.

SALPIGLOSSIS

Very showy bedding or border plants with richly colored, erect, funnel-shaped flowers. The flowers are very beautifully marbled and penciled purple, scarlet, crimson, yellow, buff, blue and almost black. Bloom from August to October.

NEW EMPEROR—This variety shows a very marked distinctiveness from the older type in habit of growth as well as in flowers. It forms only one leading stem about 30 inches high, from which branch out near the top numerous side shoots, each bearing a large flower, thus forming a veritable bouquet of the most beautiful flowers, each one richly veined with gold. A bed of Emperor Salpiglossis in flower is strikingly beautiful. Mixed Colors. Pkt. 8c; ½ oz. 25c.

LARGE FLOWERING MIXED—Pkt. 5c; ½ oz. 15c.

SENECIO ELEGANS

A beautiful free flowering annual. Flowers purple, red, crimson, rose and white; perfectly double. Pkt. 5c; ½ oz. 25c.

SENSITIVE PLANT

An interesting and curious plant with globular heads of pink flowers. It affords much amusement by its sensitive character—even when touched slightly, the leaves instantly close and droop for a short time. Pkt. 5c; ½ oz. 15c.

SCABIOSA OR MOURNING BRIDE

This is one of the most attractive of the old-fashioned flowers. Great abundance and long succession of richly colored fragrant blossoms borne on long stems make it one of the most useful of the decorative plants of the garden.

Giant Snapdragon.

BLACK KNIGHT—Deep velvety purple. Pkt. 8c; ½ oz. 25c.

FIREY SCARLET—Rich vermilion red. Pkt. 8c; ½ oz. 25c.

APPLE BLOSSOM—Delicate shell pink. Pkt. 8c; ½ oz. 25c.

SNOWBALL—Purest white. Pkt. 8c; ½ oz. 25c.

DWARF DOUBLE LARGE FLOWERING MIXED—Pkt. 5c; ½ oz. 15c.

TAIL DOUBLE LARGE FLOWERING MIXED—Pkt. 5c; ½ oz. 15c.

CAUCASIA (Blue Bonnet)—Hardy perennial, 3 feet high. Flowers lilac-blue on long stem; fine for cutting. Pkt. 8c.

SNAPDRAGON

(Antirrhinum.)

Snapsdragon now rivals the Sweet Pea in popularity, and it is one of the most valuable flowers which can readily be grown from seed, whether intended for cutting or for show in the garden.

FIRE KING—Deepest cardinal red. Pkt. 8c; ½ oz. 25c.

YELLOW W. BEAUTY—Bright orange yellow. Pkt. 8c; ½ oz. 25c.

SILVER PINK—One of the best. Pkt. 8c; ½ oz. 25c.

QUEEN VICTORIA—White shaded cream. Pkt. 8c; ½ oz. 25c.

GIANT—The flowers of this new type are double the size of older sorts, are more closely set on the stems and the colors most clear and brilliant. They grow about 12 inches high. All colors, mixed. Pkt. 5c; ½ oz. 25c.

TOM THUMB—Eight inches high. Finest mixed, all colors. Pkt. 5c; ½ oz. 20c.

SALVIA OR SCARLET SAGE

SPLENDENS—The original Scarlet Sage with beautiful long spikes of bright scarlet color. It is a standard bedding plant and keeps the garden bright with color until frost. Pkt. 5c; ½ oz. 35c.

SCARLET DRAGON—The Most Magnificent Summer and Autumn Flowering Bedding Plant—The old Salvia Splendens or Scarlet Sage has long been a favorite, and our customers can partially appreciate the superiority of this new variety when we state that the flowers are nearly double the size, closely crowding the immense long spikes that often measure 6 inches across. Full-grown plants in bloom form compact bushes 3 feet high, and bloom from ground to summit. We know of nothing that can equal the gorgeous effect of a row or bed of these fine Salvias when in full bloom; the waving masses of glistening scarlet against green surroundings of lawn or foliage is matchless. Grows very easily from the seed. Pkt. 8c; or 3 pkts. 20c; ½ oz. 45c.

SALVIA PLANTS—10c each; 3 for 25c, postpaid. By express at buyer's expense, \$7.00 per 100.

Salpiglossis—New Emperor.

SMILAX

One of the most desirable window vines on account of its charming, glossy green, elegant and graceful foliage, and will grow several feet high the first season. Pkt. 5c; ½ oz. 25c.

STOKESIA HYBRIDS

Cornflower Aster

A beautiful hardy perennial plant no garden should be without. Blooms in July from Spring-sown seed and continues till frost. Plants 3 feet high, bearing 20 to 30 blossoms 4 to 5 inches across in shades of blue, pink, purple, yellow and also in white. Mixed Colors. Pkt. 10c; ½ oz. 35c.

Be sure to include Buckbee's New Upright Mammoth Wonder Aster in your flower seed order.

Dwarf Double Scabiosa.

Stocks
Large Flowering
Globe
Pyramidal.

STOCKS

LARGE FLOWERING GLOBE PYRAMIDAL—This is the best class for outdoor bedding for Summer blooming, and is the earliest of all to come into flower. Spike and flowers very large, the individual blooms frequently measuring 2 to 2½ inches in diameter. The large, double and perfect flowers are produced in great profusion, and the plant is of pretty shape. Seed saved from named sorts of various colors. Grand Mixture. Pkt. 8c; ½ oz. 45c.

GIANT FLOWERING BEAUTY STOCKS—A magnificent new strain of early flowering winter stocks, forming bushy plants about 2 feet high with tall, strong spikes of unusually large, very double, deliciously fragrant flowers. These plants do not bloom as early as Globe Pyramidal Stocks, but longer and more profusely. Mixed Colors. Pkt. 7c; ½ oz. 40c.

DWARF—Large Flowering, Ten Weeks—Fine Mixed—A very popular strain. Pkt. 5c; ½ oz. 25c.

VESUVIUS—Brightest crimson. Pkt. 10c; ½ oz. 50c.

MONT BLANC—Clear white. Pkt. 10c; ½ oz. 50c.

MONT CARLO—Pure yellow. Pkt. 10c; ½ oz. 50c.

BLUE BIRD—Purplish blue. Pkt. 10c; ½ oz. 50c.

PRINCESS ALICE PERPETUAL—Cut and Come Again—A pure white double variety, about 2 feet high, producing endless numbers of side branches. Every branch bears a cluster of delightfully fragrant flowers, and new ones are produced to replace those which are removed. Pkt. 6c; ½ oz. 30c.

SUNFLOWERS

NEW CHRYSANTHEMUM FLOWERED—Fine, perfectly double golden flowers, resembling Japanese Chrysanthemums. Height, 6 feet. Pkt. 5c; ½ oz. 15c.

NEW DOUBLE MULTIFLORA—The plant is pyramidal in shape and the handsome, double flowers are produced at base of each leaf. Pkt. 5c; ½ oz. 12c.

STELLA—Flowers star-shaped, of brightest golden yellow, with dark centers. Borne on long stems. Four feet high. Pkt. 5c; ½ oz. 15c.

RED SUNFLOWER—A unique and gorgeous novelty. The plants grow 7 to 9 feet and produce large flowers from 5 inches to a foot in diameter. The color also varies greatly, but the majority of flowers have a more or less wide red circle around the purplish black center, and the tips of the petals are golden yellow. Pkt. 8c.

FINEST MIXED—For background or screen to hide unsightly places. Pkt. 5c; ½ oz. 15c.

SWEET ROCKET

Hardy perennials, bearing purple or white flowers. Plants 2 to 3 feet high. Flowers fragrant. Fine mixed. Pkt. 5c; ½ oz. 15c.

VINCA

Ornamental free flowering house or bedding plants. Flower the first season. Glossy green foliage; handsome circular red and white flowers about 1½ inches across. Will flower in the garden all season, and if potted in Fall will bloom all winter. Mixed. Pkt. 5c; ½ oz. 25c.

Sunflower
Chrysanthemum
Flowered.

SWEET WILLIAM

NEW HARDY EVERBLOOMING. The Floral Wonder. Blooms in 50 days from sowing of seed—Flowers all Summer and Fall—Lasts for years.

The old favorite Sweet William, as all know, does not flower until the second year, from seed, but this new hybrid-strain, a cross of the old perennial sort with the Chinese Pink, begins to bloom in 50 to 60 days from seed sown in Spring, and continues to flower all Summer and Fall. It is entirely hardy and will last for years, doing better each succeeding year.

The flowers are very fragrant and like those of the old Sweet William in size, form, marking and colors. Some of them have smooth edges, while others are fringed. The colors embrace every tone and shade from pure white to deep crimson; some flowers are self colored, but the majority are two-colored.

The plants are about one foot high, are neater and prettier than the old variety, and bloom long after they are gone. The Everblooming Sweet William may be started indoors or sown direct in the garden. All Colors Mixed. Pkt. 10c; ½ oz. 45c.

PERENNIAL SWEET WILLIAM

PERENNIAL FINE SINGLE MIXED—Various beautiful shades and markings. Pkt. 5c; ½ oz. 15c.

PERENNIAL FINE DOUBLE MIXED—A splendid strain. All colors. Pkt. 6c; ½ oz. 25c.

VIOLET

(Viola Odorata.)

The true hardy violet. This should not be wanting in any garden, on account of its fragrance and early appearance. Succeeds best in a shady, sheltered place, and can be easily increased by dividing the roots. Finest Mixed. Pkt. 8c.

New
Hardy
Everblooming
Sweet William.

A Spray of GIANT HYBRID SWEET PEAS

New Yellow Sweet Peas

One of the most beautiful, interesting and easily grown plants in existence. This beautiful novelty has been much admired by visitors because of the unusual waviness of its duplex or double flowers. A few sprays form quite an imposing bunch. The flowers are of a rich primrose color, generally borne three on a stem, and produced extremely early. Large Pkt. 10c.

Select List of Named Giant Hybrid Sweet Peas

- WHITE**
DOROTHY ECKFORD—Grand pure white, shell-shaped flowers of extra large size; borne three on a stem.
PRIMROSE
HON. MRS. E. KENYON—Beautiful primrose yellow.
ORANGE
MISS WILLMOTT—Brilliant orange-pink; very large.
ST. GEORGE—Orange-scarlet; magnificent.
PINK
PRIMA DONNA—Exquisite clear light pink.
JANET SCOTT—A grand deep rich pink.
ROSE
PRINCE OF WALES—The finest bright rose.
SCARLET
KING EDWARD VII—The finest crimson-scarlet.
QUEEN ALEXANDRA—Intense pure scarlet.
LAVENDER
FLORA NORTON—Clear bright blue.
LADY GISEL HAMILTON—A grand pale lavender.
MRS. WALTER WRIGHT—Beautiful mauve.
BLUE AND PURPLE
LORD NELSON—Rich, deep navy-blue.
DUKE OF WESTMINSTER—Purple tinted violet.
MAROON
BLACK KNIGHT—Very deep maroon, shaded black.
STRIPED OR MOTTLED
AMERICA—Striped blood-red on white.
BLANCHE FERRY—The popular pink and white.
DAINTY—White, daintily edged with pink.
HELEN PIERCE—White, mottled bright blue.
MAID OF HONOR—White shaded with blue.

PRICES—For any of the above 20 varieties: Pkt. 5c; oz. 15c; 2 oz. 25c; ¼ lb. 45c, postpaid.

Buckbee's Pedigreed Gilt Edge Mixture

Best Colors, Largest Size, Very Fragrant.

This mixture is carefully blended by ourselves from all the finest selected colors in the right proportion for the most beautiful show and without question it cannot be surpassed for gorgeousness of colors and brilliancy of effect, embracing every known good sort to date in the large-flowering, new and best standard varieties. Large packet 6c; oz. 15c; 2 oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25, postpaid.

FINE MIXED

A cheap mixture, but a real good one, and will please those who do not care for the fancy new varieties of late introduction. Pkt. 5c; oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; lb. 85c, postpaid.

Cupid or Dwarf Sweet Peas

In Fine Mixture.

These little beauties only grow 5 to 6 inches high, and excite wonder wherever seen; are very fragrant; bear full-sized flowers of fine substance, two or three on each stem; are profuse bloomers; excellent for beds, borders and pot culture. As they cover the ground so closely they are not so likely to suffer from drought as the tall sorts. Our mixture includes all the desirable colors and shades. Pkt. 6c; oz. 18c; 2 oz. 30c; ¼ lb. 55c.

Cupid or Dwarf Sweet Pea.

Everlasting Sweet Peas (Lathyrus)

Perfectly hardy perennial. Handsome, free-blooming climber with clusters of elegant Sweet-Pea-like blossoms, which are produced in the greatest profusion. They come up year after year, and also bloom earlier than other Sweet Peas. Especially suitable for covering arbors and trellises. Mixed, All Colors. Pkt. 8c; ¼ oz. 25c.

Double Flowering Sweet Peas

In Fine Mixture. Under favorable conditions they will produce a large percentage of double flowers. Usually the double and single flowers are borne about half-and-half. They are regular tall-growing Sweet Peas. Our mixture includes every desirable shade and color. Pkt. 6c; oz. 25c; 2 oz. 35c; ¼ lb. 60c.

Double Sweet Pea.

BUCKBEE'S Orchid Flowered
or Giant Waved

Spencer Sweet Peas

A wonderful type, quite distinct from the old sorts, with beautifully formed huge, open and upright standards and immense wings, the flowers measuring from 2 to 2½ inches across. Both standards and wings are distinctly waved. A very large percentage of these varieties bearing four or more of these immense flowers to the stem, making them unsurpassed as cut flowers. The following are the best of the new and old sorts:

WHITE

CONSTANCE HINTON—The best black-seeded white.
KING WHITE—New, hailed as the King of the Whites. Immense blooms, faultlessly frilled and waved.

PRIMROSE

DOBBIE'S CREAM—The largest and finest primrose-yellow.

ORANGE

THOMAS STEVENSON—Fiery orange-scarlet, most striking color of all.
ROBERT SYDENHAM—Glowing orange, the nearest approach of real yellow yet seen; very large and beautiful.

PINK

ELFRIDA PEARSON—The finest and largest light pink.
MARGARET ATLEE—The best rich pink.
HERCULES—A lovely soft rosy pink, immense flowers.
LADY EVELYN EYRE—Delicate blush pink, flushed salmon.

ROSE

AURORA—Salmon Rose, striped and flaked on white ground; very large.

ROSABELLE—The largest deep rose.

MRS. CUTHBERTSON—Rose-pink, wings white; an Improved *Blanche Ferry*.

SCARLET

FIERY CROSS—Scorching fire-red; does not burn in sunlight.
FREDERICK—Magnificent, glowing scarlet, surpassing all in its class.
VERMILION BRILLIANT—Rich bright scarlet; surpassing all other scarlets in color, size, form and profusion of bloom.

LAVERNER

R. F. FELTON—Soft lavender-blue; flowers of enormous size.
FLORENCE NIGHTINGALE—The largest and finest pure lavender.

BLUE AND PURPLE

WEDGEWOOD—Clear silvery blue, the best blue Spencer.
ROYAL PURPLE—Immense flowers, rich royal purple.

MAROON

KING MANOEL—Giant wavy flowers, rich, glossy, deep maroon.

PRICE FOR ANY OF THE ABOVE 20 NAMED VARIETIES: Pkt. 8c; oz. 25c.

Buckbee's New Early Flowering Giant Spencer Sweet Peas

A New Race Five to Six Weeks Earlier Than the Regular Spencer Sweet Peas

These new varieties have been developed by crossing Spencer Sweet Peas with Early *Blanche Ferry*. The plants are very vigorous growers, profuse and continuous bloomers. They come into flower five to six weeks earlier than the other Spencers, and if grown outdoors and the flowers are kept picked, will bloom in the Northern states until destroyed by frost. They are much better adapted for our Southern states than the late flowering varieties and will no doubt supersede all other types in warm climates. They are already very popular and in great demand for forcing under glass for winter blooming. The flowers are of immense size, measuring fully 2½ inches in diameter, beautifully waved and are carried on stiff stems of great length usually in threes and often in fours.

EARLY MORNING STAR—Deep orange-scarlet or flame color.

EARLY SONG BIRD—A soft shade of pale pink.

EARLY MELODY—Deep rose-pink.

EARLY SPRING MAID—Exquisite light cream-pink.

EARLY SNOWFLAKE—The best pure white early Spencer.

EARLY HEATHER BELL—A rich pleasing mauve-lavender.

EARLY RED ORCHID—Rich bright crimson.

YARRAWA—The new famous early blooming Australian variety. Commences flowering two weeks before any other large flowering sort and continues weeks after other Sweet Peas. Large, waved, rose-pink flowers.

EARLY FLOWERING GIANT SPENCER MIXED—Made up especially for our customers from the above and many other new varieties.

Any of the above Early Flowering Spencers: Pkg. 15c; any two for 25c.

Buckbee's Grand Mixture of Giant Spencer or Orchid Sweet Peas

This grand mixture is composed exclusively of Spencer Hybrids in proper proportion for most brilliant effect. It contains some most superb seedlings that have not yet been introduced. New and exquisite colors and shades, such as apricot, lavender, light and dark blue, several shades of pinks and scarlets from light shades to deep rose; also striped and mottled varieties, with purple and deep maroons, all of the waved and fluted Spencer type. Without exception this is the very finest mixture it is possible to make. Grow them liberally and they will make the finest display of Sweet Peas ever seen in your neighborhood. Price, large pkt. 7c; oz. 20c; 2 oz. 35c; ¼ lb. 65c; postpaid.

VERBENAS

BUCKBEE'S GIANT COSMOPOLITAN MIXED

This selection and mixture embraces all the choice and most desirable colors in the Giant Flowering Verbenas. The shades are mostly very delicate and dainty; in fact, perfectly exquisite, there being very little of the common blue and purple colors among them. Many of the individual flowers are nearly as large as a silver half dollar. Pkt. 10c; ¼ oz. 35c.

CHOICEST PRIZE MIXED

From a most superb collection of named varieties. Very large in flower and corymbs, and of the richest and most brilliant colors. Pkt. 5c; ¼ oz. 35c.

MAMMOTH SORTS In Separate Colors

BLUE KING—Showy and distinct, best blue.
BURBANK'S MAYFLOWER—Lovely pink.
GOLDEN BEDDER—Scarlet, yellow foliage.
ITALIAN STRIPED—Striped flowers.
PURPLE—Dark purple. Very rich color.
PURE WHITE—A fine strain.
SCARLET DEFIANCE—Brightest scarlet.
YELLOW—Soft yellow or primrose.
Price for above, each: Pkt. 10c; ¼ oz. 35c. The set of eight colors, one pkt. each, 65c.

LEMON VERBENA

Fragrant plant, easily grown from seed. Pkt. 5c.

VERBENA ODORATA Sweet Scented

Very sweet scented. Flowers pure white. Pkt. 5c; ¼ oz. 35c.

Water Lilies

Flowers of the most exquisite coloring, and so profuse blooming that a tub of them is never without flowers from early summer until frost. They will bloom in ten weeks from seed. Anyone can succeed with them. Mixed Colors. Pkt. 10c.

Wild Cucumber Vine

Undoubtedly the best climber for covering verandas, trellises, etc., never suffering from the heat and never infested with insects. Pkt. 5c; ½ oz. 10c.

Zinnias

BUCKBEE'S NEW GIANT FLOWERED—A superb new class of Zinnias, giant in size, measuring 5 to 8 inches across and perfectly double flowers of richest, most varied colors and shades. Plants grow 3 feet high. Choicest Mixed. Pkt. 6c; ¼ oz. 35c.

BUCKBEE'S SUPERIOR DOUBLE MIXED—The grandest mixture of double flowers. Large size, brilliant colors. Pkt. 5c; ¼ oz. 20c.

GIANT CRIMSON—Pkt. 8c; ¼ oz. 25c.

GIANT ORANGE—Pkt. 8c; ¼ oz. 25c.

GIANT WHITE—Pkt. 8c; ¼ oz. 25c.

GIANT PINK—Pkt. 8c; ¼ oz. 25c.

MAMMOTH ZEBRA—The finest strain of striped or Zebra Zinnias in cultivation. Pkt. 5c; ¼ oz. 25c.

LILLIPUT MIXED—Half the height of ordinary Zinnias. Blossoms small, double and of very brilliant colors. Pkt. 5c; ¼ oz. 25c.

Buckbee's
New
Giant
Flowered
Zinnia.

Wall Flower

SINGLE PARSIAN—This annual variety will flower throughout Summer and Fall from seed sown in Spring. Pkt. 5c; ¼ oz. 25c.

DOUBLE MIXED—Spikes of deliciously fragrant flowers, combining many shades and colors, chocolate and orange-purple predominating. Half hardy perennial. Pkt. 10c.

Wild Flower Garden

A mixture of many varieties of beautiful, easy-growing flowers, producing a constant and varied bloom the whole season, and is especially suited for those who wish only a few seeds each of the leading varieties. In no other manner can so many seeds be obtained at such a small cost. Large pkt. 5c; oz. 15c; ¼ lb. 50c.

Everlasting and Ornamental Grasses

ACROCLINIUM—Double Mixed. Pkt. 5c; ¼ oz. 15c.

AGROSTIS NEBULOSA (Cloud Grass)—18 inches, delicate and graceful. Pkt. 5c.

COIX LACHRYMAE (Job's Tears)—Pkt. 5c; oz. 10c.

GOMPHRENA (Globe Amaranth)—2 feet, many colors. Mixed. Pkt. 5c; ¼ oz. 15c.

HELICHRYSUM—Double mixed, 2½ feet high. One of the best. Pkt. 5c; ¼ oz. 15c.

RHODANTHE—One foot high. Mixed. Pkt. 5c; ¼ oz. 15c.

MIXED EVERLASTINGS—Pkt. 5c; ¼ oz. 15c.

ORNAMENTAL GRASSES—Mixed. Pkt. 5c; ¼ oz. 15c.

Ornamental Grasses.

BUCKBEE'S SUMMER FLOWERING BULBS

"Full of Life" **WE GROW AND OFFER ONLY THE MOST POPULAR SORTS THAT ARE EASILY GROWN, REQUIRE SCARCELY ANY CARE, AND MAKE A SHOWY AND GORGEOUS DISPLAY. ALL OUR BULBS ARE SURE TO GROW AND BLOOM.**

REMEMBER, the bulbs offered are large, sound and solid, with live center shoots and are far superior to the small bulbs frequently offered.

Amaryllis Formosissima.

Many of our best bulbs are grown for us in Europe, and orders for them are taken only subject to our receiving the bulbs from our growers; we will ship as soon as received, or return amount paid for them.

Amaryllis Formosissima

JACOBÆAN LILY

There is hardly a flower which has such deep, rich velvety crimson color, a color so intensely brilliant as this. It is a free bloomer and succeeds well either in pots or in the open ground, and blooms very soon after planting. Few flowers can equal it in richness and beauty of color; blooms profusely every year. 20c each; 3 for 50c.

Apios Tuberosa

WISTARIA, HARDY TUBEROUS ROOTED

A valuable and desirable tuberous-rooted twiner, resembling Wistaria in form of leaf and flower, but smaller. Grows to a height of 8 to 10 feet. Dies to the ground each winter, but the tuberous root is perfectly hardy. The numerous clusters of deep purple, pea-shaped blossoms have a strong, delicious violet fragrance. A valuable vine for trellis or rock work; plant two or three bulbs near together to produce a mass of vines and flowers. 10c each; 3 for 25c; doz. 75c, postpaid.

Cyclamen

(NEW GIANT FLOWERED PERSIAN VIOLET)

Most beautiful of all pot plants, giving the richest profusion of elegant flowers; foliage decidedly handsome, being variegated with different shades of green, helping to show off the richly-colored flowers. In fact, a plant in bloom resembles a tastily arranged vase of flowers and beautiful foliage. Price of choice bulbs, 25c each; 3 for 60c, postpaid.

New Giant Flowered Cyclamen.

Cinnamon Vine

Beautiful foliage, dainty flowers, exquisite perfume

Hardy climber with dark green foliage, and late in the season bearing a profusion of small white flowers of a delicious cinnamon fragrance. Perfectly hardy everywhere, the vines dying down to the ground each autumn, but growing very rapidly in early Spring, soon covering any trellis or arbor. Where you wish to hide unsightly places we would suggest planting the Cinnamon Vine. Every tuber sure to grow. Plant any time in Spring. Please order at once. Price of bulbs, 10c each; 3 for 25c, postpaid.

Caladium

NEW FANCY LEAVED VARIETIES—For window boxes, house or greenhouse growing this is one of the most decorative plants. Their leaves, handsomer than Begonias, are spotted, marbled, veined and striped with white, pink and dark red. These bulbs, though comparatively rare, are easily grown, and their handsome foliage is much admired. Bulbs should be started into growth in a warm place. Selected Plants, 28c each; 3 for 75c, postpaid.

Caladium

Elephant's Ears

NEW FANCY LEAVED CALADIUMS

TUBEROUS - ROOTED WISTARIA

Cinnamon Vine.

Elephant's Ear

CALADIUM ESCULENTUM—A handsome plant of a tropical aspect, bearing leaves sometimes a yard or more in expanse. Effective as a single plant on a lawn, or in groups; also useful for decorative effects near streams or ponds. We make a specialty of supplying bulbs of this splendid plant, and handle them in large lots. Good size bulbs, 15c each; \$1.50 doz. Larger bulbs, 25c each; \$2.50 doz. Mammoth bulbs, 50c each.

A Valuable New Book

of Practical Information

How to Grow Seeds and Flowers

A complete guide for the house and garden, profusely illustrated. Price 50c, postpaid, or we will send a copy FREE with an order amounting to \$1.50 or upwards, if requested on the order.

COPYRIGHTED BY ABLANC 1890.

Mammoth Ever-Blooming White Calla.

BUCKBEE'S NEW SUNBEAM CALLA
See painting from nature on back cover. Large bulb 35 cents;
3 for \$1.00, postpaid.

Giant Summer Hyacinths (Hyacinthus Candicans)

A species of Hyacinth which blooms during August, September and October, if planted in Spring. The bulbs are large, round and solid, and throw up large flower-stems 3 to 5 feet high, with gigantic spikes of thimble-shaped white blossoms. A bed of a dozen or more bulbs produces a grand effect. A few planted in the center of a bed of Verbenas, Petunias or other flowers make a beautiful display. For a cemetery nothing can be more beautiful or appropriate and nothing thrives better in any situation. Strong bulbs sure to bloom, producing 2, 3 and even 4 flower-stems. 10c each, 3 for 25c; doz., 75c. Postpaid.

New Tango Flower

Fragrance of the South.

This exquisite flower is found on the high table lands or mesas of Central Mexico and Peru. Its pure and chaste sweetness, delightful and subtle fragrance are indescribable. The bulbs can be planted as soon as danger of frost is over, and will bloom in four to six weeks. Each bulb as it grows in the ground will form bulbets, each of which sends up a flower stalk, thus keeping up one mass of bloom from early summer till frost cuts them down. The flowers appear from ten to twenty to each stalk, are snowy white, star-like, petals thick, like wax, filling their surroundings with the fragrance they exude. Select Bulbs—Each 15c; 3 for 40c; doz, \$1.50, postpaid.

New Tango Flower

Giant Summer Hyacinth

Golden Trumpet Novel, Beautiful and Fragrant

A variety of the well-known *Amaryllis* family of free flowering habit, which starts growth and blooms as soon as potted. The flowers are borne in clusters of 3 to 6 and are in color the brightest golden yellow and such fragrance! Strong and delicious without being in any way rank or offensive as is the case with many highly scented flowers, being a combination between the Lilac and the Tuberose. Two or three spikes of these exquisite large yellow blossoms are produced at each blooming period. Pot the bulbs at any time. Winter or Spring, and they will soon be in bloom. A truly magnificent plant. Strong bulbs, 10c each; 3 for 25c; 75c doz. Postpaid.

Madeira Vine (Climbing Mignonette)

A rapid growing vine, covering a large space in a short time. Fleshy, heart-shaped leaves of a light green, and in late Summer, numerous racemes of feathered flowers of powerful and delicious fragrance. A very beautiful and popular vine. 5c each, 12 for 50c. Postpaid.

Golden Trumpet

Rare and Beautiful Flowering Bulbs

Mammoth Ever-Blooming White Calla

One of the grandest of all Callas, being a great favorite everywhere. Its foliage alone makes it desirable as a decorative plant being of perfect form, with large stately leaves of a bright green color, giving it a tropical appearance. Add to this its profusion of superb white flowers, yielded throughout the season, and you have a plant you may well be proud of. Our select stock is adapted for pot culture everywhere; can also be set out of doors in summer. Try this beauty. Strong bulbs which will please you. Each, 20c; 3 for 50c. Postpaid.

New Spotted Leaf or Bouquet Calla

A great favorite everywhere, each plant being a veritable bouquet in itself. It is of the dwarf, compact, bushy habit, producing a mass of amazingly beautiful leaves, and an abundance of small, pure white Callas, so small that they serve admirably for corsage bouquets. Foliage is deep green, covered with innumerable white spots, giving the plant a magnificent appearance. Each 20c; 3 for 50c. Postpaid.

The New Yellow Calla

The bulbs are strong and send up numerous flowers, which are golden yellow with black center. The color is one of the most beautiful shades of yellow seen among flowers and the jet black center lends to the blossoms a peculiar charm. Each 30c; 3 for 85c. Postpaid.

True Little Gem Calla

The pet of all is this new and beautiful miniature Calla, growing only about 8 inches high. It is, indeed, a beauty, completely enveloped in its regal white blossoms, through the entire season. As easily grown as the other Callas. Each 20c; 3 for 50c. Postpaid.

Hardy Tuberous-Rooted Moon Flower

(Ipomoea Pandurata)

They will stand any vicissitude of weather until frost kills the vine to the ground. Each year it springs up stronger than before, until it becomes a large, luxuriant vine, clothed with a luxuriant growth of pretty cordate leaves, and bearing great quantities, yes, thousands of large, thick-textured waxy flowers of a rich creamy-white with a throat of violet-purple. It will grow in any soil, no matter how poor, and its blossoms remain open all day, unlike other Ipomoeas. It is perfectly hardy in any climate. 20c each; \$2.00 per doz., postpaid.

Mexican Star Flower

(Milla Edifera)

The flowers are pure waxy white, two inches in diameter, star-shaped and usually in pairs on long slender stems. It is beautiful, especially for cutting, as it lasts a long time in water. Too much praise cannot be bestowed upon this lovely flower. It pleases everyone, and should be grown largely. The blossoms frequently last two weeks when cut and placed in vases of water. It is a perfect gem. 6c each; 12 for 60c, postpaid.

Mexican Star Flower.

Tuberous BUCKBEE'S MONSTROUS FLOWERING.

A most delightfully fragrant and beautiful summer-flowering bulb. Plants are of dwarf, stocky growth, producing flower-spikes 2 feet high covered $\frac{2}{3}$ of their length with perfectly double flowers 2 inches across, which are glistening white and deliciously fragrant. For early flowers start in February or March in Greenhouse or hot bed, planting in inter-valve as late as August. For flowering in open border, plant about the middle of May. Our select strain of bulbs has no equal and will produce the best and sweetest scented flowers ever seen. Bulbs of good size, each 10c; per doz. 50c. Postpaid.

Mammoth Bulbs, blooms enormous in size and very double and fragrant, each 15c; 3 for 40c; per doz. \$1.25, postpaid.

Everblooming Tuberose.

Monstrous Tuberose.

Armstrong's Everblooming Tuberose

This variety blooms year after year and produces single pure white flowers of a fragrance similar to that of the "Jasmine." It makes a splendid cut flower and should be in every one's garden. Each 8c; 4 for 30c; doz. 75c, postpaid.

Summer Flowering Oxalis

No bulb is so valuable for edging the borders of walks or flower beds as the beautiful flowering Oxalis.

DIEPPI—Pure white; very fine.

LANANDRIA—Fine rosy-pink, beautiful cut foliage.

SHAMROCK—Lovely clover-like foliage and pink blossoms.

MIXED COLORS—Several sorts.

Prices of bulbs of the above four varieties, 10c per dozen; 25 for 15c; 100 for 50c, postpaid.

MAMMOTH BULBS—These bulbs are nearly as large as Gladiolus, and will produce a wonderful profusion of bloom. 5c each; 3 for 10c; 12 for 25c, postpaid.

Resurrection Plant

Most Unique Novelty. A Marvel of Plant Life.

This peculiar plant is found among the pines and cedars of Palestine. It is a ball of tightly folded leaflets, dry and apparently dead. But a transformation takes place once it is dropped into a bowl of water, for in a short time there is a great, loose, expanded rosette of fine fernlike leaves, both odd and beautiful. This can be repeated many times, the plant curling tightly together when dry, expanding when soaked. 15c each; 3 for 40c, postpaid.

A GREAT CURIOSITY
THE MARVELOUS
RESURRECTION
PLANT.

Fairy Lilies (Zephyranthes)

Pretty flowers, similar to the Amaryllis, but of miniature growth. The best way is to plant several bulbs in a box or flower-pot. They can also be planted in the open ground in the Spring and lifted in the Fall, and treated the same as Gladioli. All colors mixed. Each 10c; 3 for 25c, postpaid.

Fairy Lilies.

CANNAS

King Humbert Canna.

NOVELTY CANNA SET

The following are the finest of the latest novelties. They are magnificent sorts with immense trusses of enormous flowers.
PRICE, each, 25c; doz. \$2.50. The set of 6 for \$1.35, postpaid.
DAZZLER—3½ feet. A clear, brilliant rosy carmine.
FUREKA—½ feet. The best white.
FANAL—4 feet, flowers brilliant, fiery cinnabar-red, dark foliage.

GLADIOLUS

The Gladioli deserves a place in every garden, large or small, being of easiest possible culture. They make grand beds and the bulbs can be planted any time during Spring and early Summer.

BUCKBEE'S FAMOUS GRAND NAMED GLADIOLI

The following are the finest and most distinct sorts, giving a wide range of colors; they include the best of the latest and older sorts. Price, each, 10c, or one each of the complete collection (12 varieties) for only \$1.00, postpaid.

AMERICA—Beautiful soft flesh pink, orchid-like in its coloring, magnificent large flowers.

BARON RULOT—Dark violet blue, a tall, vigorous grower.

EMPERESS OF INDIA—Velvety crimson-maroon, shaded black, the richest color of all.

EUROPE—The best pure white; large snow-white flowers.

HALLEY—Extra early, enormous, wide open flowers, salmon-pink barred, bright red.

MRS. FRANCIS KING—A striking shade of light scarlet, strong spikes with 13 to 20 immense flowers; most effective.

NIAGARA—Very large flowers, soft cream yellow, slightly tinged rosy-carmine in the throat.

PANAMA—Resembles America, but is of a much deeper pink. Long, straight spikes with very large flowers.

PINK BEAUTY—Immense lily-like flowers of a brilliant salmon-pink, marked with glowing blood-red blotches in the throat. One of the finest varieties yet introduced.

PRINCE'S—Immense, wide-open flowers of rich, dazzling scarlet, marked with white on the lower portion.

SCHWABEN—Magnificent large flowers and spikes. Canary-yellow with crimson center.

SULPHUR KING—The finest clear yellow yet introduced.

BUCKBEE'S NEW FRILLED AND RUFFLED GLADIOLI

A new class of Gladioli. The flowers of this type are very large, widely expanded and of round form; the edges of the petals are beautifully frilled and ruffled and the coloring is very rich and beautiful. The flowers are produced on tall imposing spikes. Many colors mixed. Price, each, 15c; doz., \$1.50. Postpaid.

BUCKBEE'S FAMOUS ROCKFORD MIXED GLADIOLI

Gorgeous Colors and Marvelous Markings

We call special attention to our Famous Rockford Mixed Gladioli which have been constantly improved year after year by discarding all undesirable flowers and developing new shades and combinations of colors. Lily of the Valley

LILY OF THE VALLEY

Buckbee's Mammoth Flowering. The sweetest, the loveliest Spring blooming plant, producing delightfully fragrant, pure white, bell-shaped blooms. Will thrive anywhere. Large flowering roots. 6 for 40c; doz, 70c. Postpaid.

WONDERFUL MAGIC LILY

This wonderful flower produces in early spring attractive green foliage which grows until July, when it ripens off and disappears, but about a month later, as if by magic, the flower stalks spring to a height of three feet, with a cluster of 8 or 10 lily-shaped flowers three to four inches across, of a delicate lilac-pink, shaded blue. Price, strong blooming bulbs, 40c; 3 or \$1.00.

JAPANESE LILIES

Auratum (The Gold Banded Lily). Immense blooms nearly a foot in width when open, are produced in profusion and are deliciously fragrant. The large white petals are thickly spotted with chocolate-crimson, and have a bright golden-yellow band through the center of each. Blooms from July to September. Large bulbs. Each 38c; 2 for 75c. Postpaid.

Speciosum Album. Pure white flowers with a greenish band through the center of each petal. They are of great substance and very fragrant; blooms in August and September. Mammoth bulbs. Each 36c; 2 for 70c. Postpaid.

Speciosum Rubrum. The six broad white or pink petals are thickly dotted with rose or crimson spots; very effective and desirable; thrifty and hardy; blooms in August and September. Large bulbs. Each 34c; 2 for 65c. Postpaid.

Our List of Plants for House Culture, also for outdoors has been carefully revised and is up-to-date and we offer only the most valuable, easily grown and popular varieties that cannot fail to give satisfaction.

The Wonder Bedding Plant Acalypha

Brighter and More Attractive than Coleus.

BICOLOR, AUTUMN TINTS—A most wonderful plant, surpassing the finest Coleus or Begonia in the rich color of the leaves, which are beautifully marked with a bright green color margined with a wide irregular band of lemon yellow and having wide yellow bars running lengthwise of the leaf, and also thickly dotted with yellow blotches. Its most important feature is its wonderful qualification for bedding, as it will stand bedding out like a Coleus; in fact, in the sunniest place it produces the highest coloring. 20c each, 3 for 50c.

Anthericum Mandaianum

A new variegated decorative plant well adapted as center to jardinières, porch boxes and hanging baskets. The leaves are about 6 inches long, dark green with a band of bright yellow through the center. Each, 20c; 3 for 50c. Postpaid.

Chinese Paper Plant.

Chinese Paper Plant

A magnificent pot plant, with splendid Camellia-like deep shining green foliage. Commences to bloom when small and continues throughout the year. When older it is literally covered with blossoms of a dazzling rosy crimson, with deep golden yellow anthers. Each, 20c; 3 for 50c. Postpaid.

Asparagus Sprengeri

The Charming Emerald Feather Fern.

Grows freely the whole year round, producing sprays 4 to 5 feet long, of fresh, green, feathery foliage. Valuable for cutting, particularly in use with large Roses. Grown in suspended pots, it makes a very pretty decorative house plant. Strong plants, 15c to 25c each, postpaid. Larger plants, 35c to 50 to \$1.00 each, by express, not prepaid.

Artillery Plant

(Pilea Serpaetolia.)

Graceful, frond, like leaves. When in flower, produces a snappy sound when water is shown on the leaves. A thin, smoky vapor will also arise when the leaves are sprinkled. Altogether a very attractive novelty, besides being an ornamental house plant. Each, 15c; 2 for 25c. Postpaid.

Asparagus Plumosus

THE BEAUTIFUL LACE FERN.

The rare and delicate beauty of this plant can scarcely be shown by a picture or conveyed by a description. The bright green foliage of very delicate texture falls gracefully, giving it a style and air that cannot be surpassed. No finer decorative plant has ever been produced. As a house plant it is deservedly popular as it will thrive under almost all conditions. Strong plants, 15c to 25c each, postpaid. Larger plants, 35c, 50c, 75c to \$1.00 each, by express, not prepaid.

LACE FERN (ASPARAGUS PLUMOSUS)

Rex or Painted Leaf Begonias

New King of Rex Begonia.

KING OF REX—Extra large leaf of fine silver, small dark, starry center and edge embrodered in the same dark shade. Extra fine. Select plants, each 35c.

EMPEROR WILLIAM—A very short, bushy-growing variety. The most part of the leaf is of a silver color streaked with dark green on the edges. A very pointed leaf with a hairy growth on the edges. Fine plants, each 30c.

Corallina
Lucerna.

RUBRA—One of the finest Begonias. Its dark, glossy-green leaves, combined with its free-flowering habit, make it one of the very best plants for house decoration. The flowers are a scarlet-rose color. Each, 25c.

CORALLINA LUCERNA—The grandest of all flowering Begonias, a wonderful new variety, long leaves of spotted olive green and beneath bright wine-red and gigantic trusses of coral-red flowers, almost hiding the plant. Continuously in bloom from April until November. One of the showiest and most desirable varieties. Each 25c.

ALBA PICTA—Elegant, slender, glossy green leaves; thickly spotted, silvery-white flowers. Each, 25c.

FUCHSIOIDES COCCINEA—A beautiful, free-blooming variety with graceful branches and pendulous, bright scarlet flowers. Each, 20c.

SANDERSONI—Bushy plants with glossy, deep green leaves, scarlet flowers in drooping clusters; buds are heart shaped. Each, 20c.

SPECIAL OFFER The full set, one each of the 10 flowering Begonias on this page, for \$1.85, postpaid

Watermelon Begonia

A Most Beautiful Ornamental Plant from the Sandwich Islands.

Excellent for display on the dinner table or parlor window. The leaves are distinctly variegated white and green, thick and waxy-like and have the appearance of being powdered with frosted silver. Price, 25c each; 3 for 70c, postpaid.

SPECIAL OFFER:

One choice plant each of the above six new and rare Rex Begonias for only \$1.65, postpaid.

Lord
Palmerston

Finest Flowering Begonias

The Flowering Begonias are among our most beautiful and satisfactory flowers for house culture and bedding. They grow nicely, make neat, handsome plants, bloom constantly, and their pretty, wax-like flowers and glossy, bright-colored leaves and stems are always greatly admired.

OTTO HACKER—In a class by itself. A strong, vigorous grower, of fine upright habit, with large shining deep green leaves eight to ten inches long. Flowers bright coral-red, borne in immense clusters eight to ten inches across. Each, 20c.

ARGENTEA GUTTATA—It has pure-bronze leaves, oblong in shape, with silver markings and large trusses of white flowers. Each, 15c.

METALLICA—This elegant variety has very large, glossy leaves shaded with green, crimson and olive, with a peculiar metallic lustre over all. Flowers large, rose or pinkish white. It is one of the most popular, desirable and showy varieties in cultivation. Each 25c.

THURSTONI—This Begonia is a cross between Metallica and Sanguinea, having the bright red foliage and veining underneath the leaves, and bright green shading to red in the younger growth on top. The flowers are a beautiful rosy-white. Each, 25c.

ROBUSTA—The stem and under side of the leaf are Indian-red; the upper side of the leaf glossy olive green. The petals are white with a pink stripe in the center and are enlivened by golden anthers; the buds are coral red. Each, 15c.

Thurstoni.

BUCKBEE'S Ever-Blooming CARNATIONS

Madam Butterfly.

MATCHLESS—Well named the Matchless White. The most lasting Carnation when cut. Beautiful, extra large pure white flowers, wonderfully fragrant. Blooms early and continuously. 20c each.

BELLE WASHBURN—Large size flowers, brilliant scarlet; free and continuous blooming. 15c each.

ENCHANTRESS SUPREME—Light salmon-pink; endures bright sunlight without fading. The calyx does not burst. A great improvement of the old Enchantress. 20c each.

FRANCES BUCKBEE—Brilliant crimson maroon. A big advance over all others of this color. The plant is a free and easy grower, and always in bloom. A gem in every way. 25c each.

Surprise Collection

Of 6 Beautiful Varieties for Only 75c, Postpaid.

WHITE ENCHANTRESS—An old favorite; one of the finest white carnations, produces large flowers constantly throughout the season. 15c each.

BEACON—The standard scarlet; the freest flowering carnation in existence. 15c each.

DORIS—Brilliant maroon-crimson. A wonderfully free and persistent bloomer. 15c each.

MRS. C. W. WARD—The most popular pink; a pure deep pink, a brilliant shade; perfect form. 15c each.

DOROTHY GAY—Variegated; pink with white stripes; a very prolific bloomer. 15c each.

ELDORADO—Large, finely formed flowers of light clear yellow, petals edged with a narrow band of light pink. A strong, vigorous grower with healthy foliage. 20c each.

Bargain Collection

Of 1 Sterling Carnations for Only 50c, Postpaid.

FLORA HILL—One of the very choicest white varieties; of large size. 15c each.

RED WING—A clear, bright scarlet; nicely formed flowers; they do not split the calyx and keep well when cut. 15c each.

MAY BUCKBEE—An exquisite shade of satin pink; has a fine stem. Strong calyx and the freest bloomer extant. 20c each.

CARDINAL—Bright crimson flowers of an enormous size. This new Carnation has taken several prizes at the latest shows. It is a strong grower indoor as well as out. It is an early and continuous producer. 15c each.

THE NOVELTY CARNATION "BLUE KING"

This greatest novelty in Carnations is a marvel of beauty, bearing a flower of entirely new and distinct shade, a color hitherto unknown in Carnations, which catches the eye at once and causes everyone to exclaim: "What an exquisite color!" The flower is best described by the words—bluish, purplish-crimson, rich, deep and intense, the blue shade being at times very pronounced, with ox-blood shadings. Flowers very perfect, measuring 3½ inches across when well grown; long, strong stems. A healthy and vigorous grower, very fragrant and a free bloomer. It is the richest and most startling color in the Carnation family. Price, 25c each or 3 for 70c. Postpaid.

Exhibition Collection

Of 10 Best and Newest Carnations for Only \$2.25, Postpaid.

CRYSTAL WHITE—A grand novelty. Large full flowers of the purest glistening white; very early and very floriferous. Undoubtedly the finest white; has been awarded the American Carnation Society's Gold Medal and numerous other prizes. 25c each.

MADAM BUTTERFLY—New. A giant variety, a wonderful grower, producing flowers on every shoot. Color glowing cerise with scarlet shading. A splendid flower in every way; carries everything before it on the exhibition table. Awarded Gold Medal of the American Carnation Society. 30c each.

YELLOW PRINCE—A very pretty flower, bright clean yellow; vigorous plants free from disease. 25c each.

LADDIE—A pure intense, glowing deep pink; flowers 3½ inches across and over; keeps well when cut; an early and continuous bloomer. 25c each.

SERGEANT YORK—The most brilliant scarlet. Stiff stemmed, early and very free flowering. 25c each.

ARMISTICE—Flowers snow-white, very fragrant, perfect in form, large in size, borne on long wiry stems early and continuously throughout the season. 25c each.

TITANIA—New. A clear shell pink. 25c each.

ROSALIE—New. Light salmon-pink; a lovely color. Very free flowering. 25c each.

CELEBRATION—A splendid new carnation. One of the finest scarlet varieties; large flowers produced on long stems in great profusion. Blooms early and continues all season. 25c each.

AURORA—The best variegated carnation. Color creamy-white penciled with bright red. A vigorous grower and very free flowering. Flowers very large. 25c each.

Paradise Collection

Of 8 Lovely Carnations for Only \$1.45, Postpaid.

M. A. PATTEN—The newest striped Carnation. Color, white with red stripes. Blooms large and spreading, stiff stem and a fine grower. 20c each.

SUNBEAM—Strong grower and free-flowering; long stem; flowers three inches in diameter and a deep golden yellow, with faint red stripes. 20c each.

VICTORY—Intense scarlet with a bright orange glow to the coloring. Very popular. The flowers are borne in great profusion, the plant makes a vigorous growth. Has stiff, wiry stems. 25c each.

ATERGLOW—Deep pink; extra long stems and large flowers. A strikingly handsome and very valuable new sort. 20c each.

Victory Carnation.

CHRYSANTHEMUMS BUCKBEE'S GRAND PRIZE WINNERS

Louisa Pockett

Early Collection

The Three Earliest Large Flowering Varieties

ADVANCE—The earliest large pure white known. Flowers $5\frac{1}{2}$ inches across have been cut July 25th. Indispensable for the cut-flower trade. Each, 15c.

W. DUCKHAM—Massive incurved flowers of beautiful light pink. 15c each, 2 for 25c.

LILIAN COPPARD—Chestnut on gold ground. A large flower of fine form and good keeping qualities. 15c each, 2 for 25c.

The Set of these **SIX Mid-season varieties** only 75c, postpaid.

CHRYSANTHEMUMS BUCKBEE'S GRAND PRIZE WINNERS

Glory of
Seven Oaks

Garden Collection

Early Hardy Outdoor Chrysanthemums

The Glory of the Fall Garden

These are all very early varieties with full double, good sized flowers, selected for their earliness and hardiness. They begin to bloom the last of August and being frost-resisting, will continue to flower profusely until a very hard frost, often well into November, giving color, life and beauty to an otherwise empty garden. They are also root-hardy and will stand the winter most anywhere if given some protection of litter or leaves.

- CRANFORDIA—Large, deep bronze yellow; very early.
 - LESLIE—Rich buttercup yellow.
 - NORMANDIE—One of the earliest and best creamy whites.
 - WINNETKA—Pure snow-white; free flowering, from July onward.
 - FIRELIGHT—Brilliant carmine shaded scarlet.
 - GOACHER'S CRIMSON—Large, bright crimson.
 - EDEN—Rose pink.
 - PROVENCE—Large, bright pink petals with gold points.
 - ROSIE—Deep terracotta, large.
 - L'ARGENTUILLAIS—Deep chestnut.
 - PETIT LOUIS—Large, silvery mauve.
- Any of the above varieties, 15c each. The set of the ELEVEN kinds for \$1.45, pos. paid.

GLORY OF SEVEN OAKS—Perpetual blooming. Blooms profusely bedded out from June to December. Perfectly hardy in the open ground. Flowers 4 to 5 inches across on stems 2 to 3 feet. Begins blooming in thumb pots.

Flowers of the brightest golden yellow, double to the very center and of large size and borne in clusters of 3 to 6 on strong upright stems. 20c each, 3 for 50c.

Pompon Collection

Early Flowering Hardy Pompon or Button Chrysanthemums

The only sorts which are entirely hardy in the Northern states. Small but very double, perfect flowers which will bloom outdoors despite early frosts. Also grand as pot plants.

- ACTO—Deep bright rose. Each, 15c.
 - BROWN BESSIE—Reddish bronze. Each, 15c.
 - ETOILE D'OR—Bright yellow. Each, 15c.
 - INGA—Beautiful, bright red. Each, 15c.
 - MINTA—Pink. Each, 15c.
 - MODEL—Pure white. Each, 15c.
- The set of these SIX Pompons for 76c. postpaid.

Caprice Collection

Early flowering varieties especially adapted to grow for pot plants, being short, compact-growing and producing a wealth of very large, double flowers.

- BRUTUS—Golden bronze.
 - BUTLER'S CAPRICE—Deep pink.
 - KATHLEEN THOMPSON—Crimson.
 - LADY LYDIA—Pure white.
 - PURPLE CAPRICE—Purple.
 - YELLOW CAPRICE—Yellow.
- Any of the above, 15c each. The set of SIX Caprices for 78c, postpaid.

Giant Flowering Collection

- The Latest Introductions
The Set of Four Mammoth Varieties
Only 67c, Postpaid.
- DUBLIN LADY—A changeable glistening purplish bronze. 15c each, postpaid.
 - CRUSADER—Blooms of enormous size, glistening white; the finest white Mum with reflexed petals. 25c each, postpaid.
 - COL. FRED STERLING—An extremely handsome yellow. Color is bright and pure. 20c each, postpaid.
 - MAZEPPA—Flowers of immense size, deep rosy-pink. A handsome and striking variety. 20c each, postpaid.

Crusader

COLEUS

Beautiful Fancy Varieties.

These beautiful new Coleus are much used for planting in beds and borders; also for pots, window boxes, vases, etc. SPECIAL OFFER 8¢—Each, except where noted, 10¢, or the full set of 3 new Coleus for 17¢, postpaid. Price per 100, except where noted, by express at buyer's expense, \$6.00.

BECKWITH'S GEM—A beautiful fancy variety with large leaves and finely scalloped edges. The center of leaf is dark velvety-maroon, bordered with fiery-red; the edge is green, changing to creamy-yellow at the point of leaf.

QUEEN OF THE WEST—Large leaf, and slightly serrated; outer band of bright oxide-green with margin of bright yellow, and center creamy-white; covered with blotches of carmine and maroon.

GOLDEN BENDER—Clear yellow when well developed, edge somewhat crinkled, with center rib of lighter yellow.

DUNERIA—The grandest Coleus of recent years; has a deep velvety texture. Crimson-maroon center; beautifully scalloped edge of light red.

TRAILING BEAUTY—This Coleus is entirely new. It is the only one that trails. The foliage is most glorious, having a large, distinct center of bright pink or red, with a broad border of emerald-green, suitable for hanging baskets, window boxes, vases or for pot culture. 15¢ each; 2 for 25¢, postpaid. By express at buyer's expense, 100 for \$9.00.

New Comet Plant

The most Unique Flowering Plant of the Century. Fluffy, trailing, tail-like blossoms, soft crimson scarlet, 20 to 30 inches long on specimen plants. Try one or more of these fine plants; they are always in bloom. Fine plants, 25¢ each; 3 for 70¢, postpaid.

Crab or Christmas Cactus.

Crab or Christmas Cactus

An early flowering crimson scarlet variety, with long drooping flowers, borne in great profusion. Stems branching and hanging in bunches. It grows and blooms with the greatest ease, require absolutely no care, living for months without water, increasing in value yearly. Fine plants, 20¢ each; 3 for 50¢, postpaid.

New Comet Plant.

New Double Daisy, Mrs. F. Sanders.

Crown of Thorns

The Great Biblical Plant.

On the Wild Rocky Hills of Judea this emblematic plant is found. Very peculiar, thorny, with a few bright green leaves and an abundance of light rose blossoms. Easy to grow, can be trained to assume any desired shape. Fine plants, 25¢ each; 3 for 70¢, postpaid.

Crown of Thorns.

Cigar Plant (Cuphea)

Bushy plants of neat habit about 15 inches high, bearing great numbers of narrow, tubular flowers, bright scarlet, with purple and white tips. Bright and attractive, always in bloom. These plants thrive beautifully in hanging baskets, vases, etc., are also fine as pot plants in the window and good for bedding outdoors. Each, 15¢; 2 for 25¢, postpaid.

Cigar Plant.

Dragon Plant

(Dracaena Indivisa.)

One of the best decorative foliage plants largely used for house adornment. It is much used as the center-part for vases and window-boxes. Its numerous, graceful, slender, arching, green leaves harmonize with and set off advantageously any other and all plants used in conjunction with it. Price, postpaid, 20¢ each; larger plants, 35¢; extra large specimen plants by express, not prepaid, \$1.00 each.

Daisies

MRS. F. SANDERS—Flowers of the most glistening white throughout, frequently measuring five inches across. The center of the flower is a mass of closely arranged fringed florets, surrounded or edged by broad shining petals, produced on long stems. 20¢ each; 3 for 50¢.

BLUE DAISY (Ageratum Coelestis)—A beautiful bedding plant and an excellent indoor bloomer. The flowers are daisy-shaped, of a delicate light blue with a yellow disc. Flowers all the year round. 15¢ each; 2 for 25¢, postpaid.

PARIS DAISY—These plants are the favorites of all as they are of the easiest culture and make beautiful cut flowers. They are a delight in the garden where their conspicuous flowers and rich green indented foliage blend harmoniously with any other bedding plants; they are equally valuable as potted plants, blooming throughout the winter. 15¢ each; 2 for 25¢, postpaid.

BLUSH QUEEN ALEXANDRA—The new Mammoth White Paris Daisy. Single, semi-double and often fully double blooms appear on the same plant. Any one of these types is beautiful, but the combination is superb. The flowers measure 2½ to 3 inches across. 15¢ each; 2 for 25¢, postpaid.

YELLOW DAISY—(Etoile d'or)—The New Yellow Paris Daisy; a rich golden color. 15¢ each; 2 to 25¢, postpaid.

BUCKBEE'S FULL OF LIFE FERNS

Newport Parlor Fern.

NEWPORT PARLOR FERN

Resembles the Boston in some respects, but grows more erect, has shorter, narrower fronds and makes three times as many of them. Thrives nicely in parlor or living room, requires very little attention. Fine young plants 50c to 30c each, postpaid. Larger plants 75c, \$1.25 and \$1.75 each, by express not prepaid.

NEW ROOSEVELT FERN

In general characteristics it resembles the Boston Fern, but it produces many more fronds, making it a bushier and handsomer plant. Fine young plants, 25c, 35c and 50c each, postpaid. Larger plants, \$1.00, 2.00 and \$3.00 each, by express, not prepaid.

Ostrich Plume Fern

BOSTON FERN

This is one of the old standbys, and still one of the best. Its long, graceful, drooping fronds often attain a length of five or six feet in a single year. Fine young plants 15c, 25c and 35c each, postpaid. Larger plants 50c and \$1.00 to \$1.50 each, by express, not prepaid.

MAIDEN HAIR FERN

Always in great demand for table and house decoration; will thrive nicely in parlor or living room, and grow more beautiful each year. Price, 25c each, or 3 for 70c, postpaid.

Maiden Hair Fern.

THE NEW CRESTED FERN

Rather dwarf in growth, but graceful, very compact, dense and feathery. Each frond or branch has a double row of perfect little fronds set at right angles to the mid-rib, and so thick they seem almost crowded. It is a healthy, vigorous grower. Fine young plants 25c, 35c and 45c each, postpaid. Larger plants \$1.00, \$2.00 and \$3.00 each, by express, not prepaid.

New Crested Fern

Moss Fern

MOSS FERN

A new upright growing Moss with numerous feathery stems branching from the base and forming a dense tuft. Well grown plants attain a height of twelve to fifteen inches. Always fresh and green. Easily grown. 20c, 30c and 40c each, postpaid.

THE OSTRICH PLUME FERN

A strong, vigorous grower, but the fronds are heavy and feathery, and arch over in a most graceful manner, showing two shades of green and producing a lovely mossy effect, which adds greatly to its beauty. Fine young plants 25c and 35c each, postpaid. Larger plants \$1.00, \$2.00 and \$3.00 each, by express, not prepaid.

FERNS FOR FERN DISHES

We have grown a large quantity of small ferns suitable for Fern dishes. Assorted varieties. Each 15c, 4 for 50c, postpaid.

QUALITY
NOTHING BUT

Phenomenal Fuchsia.

Little Beauty Fuchsia.

LITTLE BEAUTY

The Greatest Novelty in Fuchsias.

The loveliest-flowering, dwarf-growing Fuchsia known. It is a superb and handsome little beauty, branching like a tree and covered with enormous perfectly formed flowers. Sepals bright scarlet, with rich violet-purple corollas. Vigorous growing, free-flowering, beautiful habit. A most charming window plant, remarkable for its constant profusion of exquisitely beautiful flowers, and really one of the most desirable Fuchsias in cultivation. 15c each; 2 for 25c, postpaid.

SPLENDID FREE-BLOOMING FUCHSIAS

THE VERY BEST AND NEWEST VARIETIES, EASILY GROWN—SURE TO BLOOM.

Gloire Des Marches Fuchsia.

PHENOMENAL—The largest flowering Fuchsia in cultivation. The plant is a tall grower, branching like a tree; the leaves are dark, glossy green, with veins of dark crimson, giving the foliage a rich ornamental appearance. The flowers are of enormous size, a single flower measuring $3\frac{1}{4}$ inches across; sepals bright scarlet, with rich, violet purple corollas, very double. 15c each, 2 for 25c, postpaid.

SPECIOSA—(The True Winter Blooming Fuchsia.)—This lovely Fuchsia blooms with greatest profusion during Winter, is scarcely ever without flowers from September till June; the flowers are large and of the most graceful form; color, rich carmine and rose; a most charming window plant, remarkable for its bright glossy green leaves and constant profusion of exquisitely beautiful flowers. 15c each, 2 for 25c, postpaid.

TROPHEE—(Double)—Violet blue corolla; very dark rich red sepals, waxy luster. Plant of fine form, easy to grow, continually in bloom. Positively one of the grandest varieties ever offered. 15c each, 2 for 25c, postpaid.

LOVELY—Large semi-double flowers; color rosy mauve with rich scarlet sepals. Exquisite. 15c each, 2 for 25c, postpaid.

GLOIRE DES MARCHES—Undoubtedly the finest Double White Fuchsia ever sent out; makes a neat compact plant, branches freely and is covered nearly all the time with exquisite large flowers, having brilliant deep scarlet sepals and a corolla of pure snowy whiteness. 15c each, 2 for 25c, postpaid.

BLACK PRINCE—This is, without question, the very finest Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. Blossoms of a beautiful waxy-carmine or pink color. Certainly a plant for easy culture. 15c each, 2 for 25c, postpaid.

TRAILING QUEEN—This Fuchsia is an entirely new departure, different from other large-flowering varieties in its habit of growth, as it is a trailing vine. The young plants, as they commence growth, creep out to the edge of the pot, and then go trailing downward. It continues growing and branching in this way until the vines are a solid waxy mass of the most elegant foliage and perfect flowers. The flowers are borne in large, drooping clusters; very large, long, graceful; sepals scarlet, corolla purple. 15c each, 2 for 25c, postpaid.

Berthe de Presilly.

Harcourt.

NEW AMERICAN BEAUTY GERANIUM

The Semi-Double of the Purest American Beauty Color.

The one Geranium of its color. The plants are compact, medium tall, of stately shape; lustrous green foliage with a brownish circle. The flower heads are gigantic and the individual blooms measure 2 3/4 inches across; often as many as eight spikes have fully opened, several half open flowers and more are in buds. It surpasses all other Geraniums in brilliancy of color, in size of its blossoms and trusses and in constancy and profusion of blooms. Fine, strong plants, 20c each; 3 for 50c, postpaid.

DOUBLE NEW LIFE GERANIUM

A Curious and Beautiful Novelty.

Always scarce and difficult to obtain. The petals are dark red and in the center of each there appears a small pure white floret, giving the flowers a novel and curious appearance. Very beautiful when flowers are perfect, but variable and best for house culture. This is a grand and strikingly beautiful variety, but at the same time one of the most easily grown and satisfactory of all flowering plants. 20c each; 3 for 50c, postpaid.

Rosalda.

BUCKBEE'S BEAUTIFUL GERANIUMS

Pansy Geranium.

The Pansy Geranium

A Grand House Plant of easiest growth, dwarf habit, and literally covered with flowers all the time, and as it requires little or no attention it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivaling the Pansy in uniqueness of coloring. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Strong plants, ready to bloom, 35c each; 3 for \$1.00, postpaid.

Sweet-Scented Geraniums

15c each; 3 for 40c. The set of 5 for only 60c, postpaid.

LARGE LEAF ROSE—Indispensable in the formation of bouquets.

MRS. TAYLOR—Rose-scented. Flowers scarlet.

NUTMEG—Highly scented. Very valuable.

OAK LEAVED—One of the best fragrant sorts.

LEMON—Lemon scented. A grand variety.

Variegated or Silver Leaved Geraniums

Very pretty for bedding and edgings, but particularly valuable for pots and window culture.

HAPPY THOUGHT—Foliage beautiful green and yellow; magenta flowers. 20c each.

MAD SALLEROI—Foliage, green, edged white. 15c each.

SILVER LEAVED S. A. NUTT—Remarkably beautiful variegated foliage. The green and white about evenly apportioned; flowers of the same character and color as the famous S. A. Nutt. 20c.

MRS. PARKER—Double pink flowers, leaves silver, margined white. 25c each.

MRS. POLLOCK—Leaves bronze-crimson edged yellow; pink flowers. 20c each.

WM. LANGGUTH—Pretty scarlet flowers, silver leaf. 20c each.

THE SET FOR ONLY 55c, POSTPAID.

Strawberry Geranium.

The Strawberry Geranium

One of the handsomest plants imaginable, a gem of many colors, exceedingly rare and beautiful. Leaves nearly round, and striped freely with silver bands; blooms white, of great beauty and borne in spikes nearly 12 inches high; of easiest growth. Adapted for hanging baskets, vases, etc. Will stand neglect and mistreatment. 20c each; 3 for 50c, postpaid.

Ivy Leaf Geraniums

These are among the prettiest flowers we have; they are of exquisite colors and borne in large clusters all the year round; the plants are of graceful, trailing growth, with bright, glossy ivy-shaped leaves; fine for pots, window boxes, vases, etc.; also for bedding.

MADAM MARSHALL FOCH—Flush-white, upper petals feathered deep pink. 25c each.

RYCROFT'S SURPRISE—Charming clear rose-pink. 20c each.

JOAN D'ARC—A beautiful pure white. 20c each.

ACHIEVEMENT—Rose with white eye. 20c each.

CAESAR FRANCK—Soft, rich crimson. 20c each.

SOUTENIR DE CHAS. TURNER—Pink and maroon. 20c each.

THE SET OF SIX FOR ONLY 90c POSTPAID.

Wm. Langguth.
Variegated or Silver Leaf Geranium. Ivy Leaf Geranium.
Rycroft's Surprise.

Pelargoniums Lady Washington Geranium

Some of the most beautiful of our Summer and Fall flowering plants; they offer a rich and varied assortment of colors; easily grown.

EASTER GREETINGS—A New Everblooming Variety. Flowers large and free; bright amaranth red, each petal marked with a large black blotch. This variety is distinct from the rest, and remarkable on account of its long blooming season, producing its prime crop very early in spring and continuing throughout the Summer and Fall. 35c each; 3 for \$1.00.

CRIMSON KING—Intense rich crimson, single flowers of extra size. 30c each; 3 for 85c.

MRS. ROBERT SANDFORD—Extra large flowers perfectly double and beautifully long and ruffled, of glistening snow white color, exceedingly beautiful. 35c each; 3 for \$1.00.

MAD. THIBAUT—Bright pure pink; flowers perfectly double, 3 inches across; petals heavily ruffled. 30c each; 3 for 85c.

The Set of 4 for only \$1.15, postpaid.

Easter Greetings.

Heliotrope Madame Brunt.

HELIOTROPES

These are universal favorites on account of their delightful fragrance. Flower equally well as bedding plants in Summer, or as pot plants during Winter.

ALBERT DELEAUX—Foliage is a bright golden-yellow, marked slightly with a delicate green. Flowers deep lavender. Each, 15c; 3 for 40c, postpaid.

PICCIOLA—Rays velvet, almost red, with a distinct, white center, producing immense heads of flowers well above the foliage. Each, 15c; 3 for 40c.

MME. DE BLONAY—The finest large flowering white. Each, 15c; 3 for 40c, postpaid.

MADAME BRUNT—Very large trusses of rich dark purple flowers. Very free flowering. Each, 15c; 3 for 40c.

CZAR—Strong, stocky growth, heavily corrugated dark foliage; immense clusters of semi-double flowers, rich purple. Each, 15c; 3 for 40c.

Special Offer G2 The full set, one each of the above 5 varieties of Heliotrope, only 58c, postpaid.

Hydrangeas for Pot Culture

Grand low growing bushy shrubs; used for decorating lawns and porches during Summer; they bear enormous heads of flowers, not being entirely hardy are usually kept in tubs or boxes, set out in Summer and taken to cellar over Winter.

French Hydrangeas

ATTRACTION—By far the best pink; trusses of immense size; color, clear baby pink; blooms early. 25c each.

LA LORRAINE—Large flowers of pale rose color; has become a general favorite during the last few years. 20c each.

MME. E. MOILLER—The most popular white; very free flowering; of large size and fine form. Awarded silver medal at the National Flower Show in Boston, 1917. Each, 20c.

MOUSSELINE (The Famous Blue Hydrangea)—The color is a mauve-rose with cream-colored center. Flower heads very large and held erect. Each, 20c.

OTAKSA—A Japanese variety used extensively for Easter decorations. It produces enormous trusses of intense pink (sometimes blue) flowers throughout entire summer. Each, 20c.

THOMAS HOGG—Splendid variety. Attains a height and width of over 6 feet, and is fairly covered with immense trusses of creamy white flowers, measuring 15 inches in diameter. Price, 20c each.

Special Offer G3 One each of the 6 HYDRANGEAS. Fine, strong young plants, for only \$1.10, postpaid.

Hibiscus

ORANGE QUEEN—Large, double, orange-colored flowers. Very novel and attractive. 20c each; 3 for 50c, postpaid.

BRILLIANT KING—Semi-double flowers of a bright vermilion-scarlet; petals waved and recurved; very handsome flowers. 20c each; 3 for 50c, postpaid.

APPLE BLOSSOM—This is a truly surprising house plant, the flowers are so immense and yet so beautiful that you can scarcely believe that they are not artificial in some way. It is a rapid, erect grower, with bright glossy green leaves and immense double flowers like Roses, 4 to 5 inches in diameter. Color rich bright pink, with deep crimson center; likes heat and moisture and begins to bloom very quickly. 25c each, 3 for 70c.

Ivy

ENGLISH IVY—Queen Victoria—This is a hardy true evergreen climbing vine, with dark glossy green leaves. Much used for covering walls of churches, etc., and for cemetery work; also one of the very best plants for house culture. 15c each; 2 for 25c, postpaid.

PARLOR OR ORIENTAL IVY—A quick growing trailing plant of delicate green foliage; fine for hanging baskets, etc. Each 15c; 2 for 25c, postpaid.

VARIEGATED GROUND IVY—(Glechoma)—A graceful and beautiful half hardy perennial creeping plant, which quickly and densely carpets the ground; equally attractive for vases or hanging baskets. The charming foliage is bright green and pure white, and emits a refreshing fragrance. Each 15c; 2 for 25c, postpaid.

Hydrangea Attraction.

English Ivy

Hibiscus Apple Blossom.

Star Jasmine

Sweet Scented.

Almost continuously in bloom. A valuable house plant in the north especially during Winter, but perfectly hardy in the South; flowers star-shaped, pure white and very fragrant. The idol of poets, and one of the sweetest flowers. Easily grown, even small plants bear a profusion of bloom; small, glossy evergreen foliage. Each 20c; 3 for 50c, postpaid.

Star Jasmine.

Nightblooming Jasmine.

NIGHTBLOOMING JASMINE—(Cestrum Parqui)—An interesting tender shrub of easy cultivation, with waxy dark green leaves and open bunches of tubular, creamy white flowers. Although entirely inodorous during the day, they fill the whole garden with fragrance at night. Grows rapidly; is an excellent garden plant, also well adapted to house and window culture. Blooms nearly all the year. Each, 25c; 3 for 70c, postpaid.

Climbing Lantana.

Climbing Lantana

Evergreen and Everblooming. It is at all times graceful, pretty and evergreen, blooming profusely at all stages of growth. The large clusters are of a dainty lilac-pink color with a white center. As its growth is easily controlled by pruning it can be made to fit any space where a large or small vine is desired. It is one of the most charming pot vines for windows and is a splendid garden vine for Summer and never out of bloom. Fine plants, 15c each, 3 for 40c, postpaid.

Weeping Lantana

MRS. MCKINLEY—A fine plant, of graceful, drooping habit, producing flowers at each leaf-point. The flowers are a brilliant rosy lilac, borne in elegant clusters, and hundreds and thousands of them are in bloom all the time and literally cover the whole plant. One of the best varieties for hanging baskets. We make the price very low so as to meet the large popular demand. Each 15c or 3 for 40c, postpaid.

Solanum Jasminoides

These old-fashioned shrubs have become immensely popular again. They are very attractive plants that can be grown in almost any soil or situation and kept growing all the year or rested in the cellar. The dark green willow-like foliage is in itself neat and pleasing.

LUEA, Yellow—Large and very beautiful. Each 20c, postpaid.

LILLIAN HENDERSON, White—Magnificent, large, snow-white double blossoms. Each 20c, postpaid.

ROSY MORN, Pink—Large blossoms, rosy pink. Each 20c, postpaid.

VAREGATED—Leaves bordered white, creamy white, flowers pink, very double. A magnificent plant, the contrast of foliage and delicate color of blossoms being very striking. Each 25c, postpaid.

SPECIAL OFFER—The full set, one each of the 4 varieties of Oleanders for 70c, postpaid.

Scarlet Fountain Plant (Russelia)

A Charming Basket or Vase Plant.

A novel and beautiful plant, suitable either for bedding or pot culture. Has long, wiry, leafless stems, drooping and bearing quantities of long, tubular flowers of the most vivid scarlet color. Especially adapted for hanging baskets, vases, window boxes, etc., where a delicate and graceful effect is sought. It is literally covered with brilliant coral-red buds and flowers, the full size being three-fourths to seven-eighths inches long. The great drooping masses of bloom are like a fountain of coral, scarlet and green. In the South it is perfectly hardy and a superb garden flower. In any climate it is one of the very easiest of plants to grow, and one of the most brilliant and persistent of bloomers. Price, 15c each, 3 for 40c.

Lopesia Rosea

A Very Beautiful Christmas Plant.

Called **Winter Blooming Scarlet Fountain Plant**, because very similar to that variety, but a better winter-bloomer; it is in fact the most persistent winter-bloomer which we have, being in flower continuously from November to May; it is a very neat Christmas plant. The plants are covered with thousands of small spider-like flowers of a beautiful rose color. They are of the easiest culture. Each 25c, 3 for 70c.

Manettia Vine

One of the handsomest little vines, easily and quickly grown and blooms continuously. Adapted for hanging baskets, pot culture, vases or bedding. The flower is of the shape and about four times the size shown on bottom of our illustration, and of brilliant scarlet, tipped with clear golden yellow, making it most wonderfully attractive. Each 15c, 2 for 25c, postpaid.

Solanum Jasminoides

A beautiful plant of climbing habit attaining a height of 3 to 5 feet, but can be pinched back and grown in bush form. Its flowers are star shaped and borne in enormous clusters often a foot across; they are pure white with a violet tinge on back of petals and on the buds. A splendid pot plant both for Summer and Winter, and makes a grand show outdoors when trained against a wall. Each 20c, 3 for 50c, postpaid.

Oleanders

These old-fashioned shrubs have become immensely popular again. They are very attractive plants that can be grown in almost any soil or situation and kept growing all the year or rested in the cellar. The dark green willow-like foliage is in itself neat and pleasing.

LUEA, Yellow—Large and very beautiful. Each 20c, postpaid.

LILLIAN HENDERSON, White—Magnificent, large, snow-white double blossoms. Each 20c, postpaid.

ROSY MORN, Pink—Large blossoms, rosy pink. Each 20c, postpaid.

VAREGATED—Leaves bordered white, creamy white, flowers pink, very double. A magnificent plant, the contrast of foliage and delicate color of blossoms being very striking. Each 25c, postpaid.

SPECIAL OFFER—The full set, one each of the 4 varieties of Oleanders for 70c, postpaid.

Scarlet Fountain Plant.

New Climbing Lily-of-the-Valley

A beautiful new plant of climbing or trailing habit. It has beautiful heart-shaped leaves and branches freely, growing in most fine symmetrical form. It is in bloom all the time, the pendulous blossoms appearing at the axils of the leaves and are bell-shaped, pure white, and about the size, form and color of Lily-of-the-Valley. As a specimen pot or basket flower for the window it is a splendid acquisition. Grows very rapidly and makes a lovely plant in a short time. Fine Plants, 15c each, 3 for 40c, postpaid.

Pomegranate

(Punica)

A beautiful, shrubby plant of symmetrical growth, equally good for bedding or pot culture in the house. The blossoms are of a beautiful orange scarlet color. It is quite hardy in the South, remaining unharmed there in open ground in Winter, in the North the plant may be stored in the cellar to protect it against severe frost. Each 20c, 3 for 50c postpaid.

Oleander—Rosy Morn.

Surinam Dwarf Cherry

Ornamental as well as useful, both in flower and fruit. The fruits are rich bright red in color and most delicious flavor. Being of dwarf growth, it makes a most desirable pot plant and will interest the "shut-ins" for house culture. Strong plants, each 40c, 3 for \$1.00, postpaid.

Otaheite Orange

An extra fine pot plant, with glossy leaves, the true fragrant Orange blooms and abundant little bright Oranges that will hang on the little bush like balls of gold for six months after they are ripe. They will bloom and fruit in a two-inch pot; and we have seen a plant in a common window, that was but 15 inches high and had 25 oranges on it. Our price: Nice young thrifty plants, postpaid, 15c to 20c each. Select extra strong plants, 25c each, postpaid. Fine 2-year-old plants for immediate effect, by express, 75c each. Extra large plants, by express, \$1.50 to \$2.50 each.

Otaheite Orange.

Brazilian Plume Plant.

Brazilian Plume Plant

A native of Brazil, of the easiest possible culture, and does well in all kinds of soil, and in any situation. It is a strong, rapid grower, and throws long shoots, each of which is tipped with the beautiful pink, plume-like flowers, the ends of every petal drooping in a most charming manner. It is a grand pot plant, commencing to flower when the plants are very small, and blooming profusely for several months out of the year. 20c each, 3 for 50c.

FRUITS FOR POT CULTURE

SPECIAL OFFER A-1

FOR ONLY \$1.10.

We will send by mail, postpaid, one each of the five rare tropical Fruits illustrated on this page. Strong Selected Plants. Safe Arrival Guaranteed.

Buckbee's New Everbearing Ponderosa Lemon

A Lemon that can be as easily grown in a pot as a Geranium and which produces fruit weighing from one to three pounds each. These enormous fruits are borne on plants one to two feet high growing in pots. It is everbearing and its fruit is delicious for lemonade and culinary purposes. The enormous Lemons have a thin rind and are full of acid juice. Will thrive in any good soil, either indoors or out. One of the very finest plants for house culture. Our price is for the very best plants: Select, each, postpaid, 25c. Smaller, thrifty plants, postpaid, 15c to 20c each. Splendid 2-year-old plants, for immediate effect, by express, 75c. Extra large plants, by express, \$1.50 to \$2.50.

Smyrna Fig

A dwarf variety imported from the Far East, of compact, hardy growth, making little wood. As a pot or tub plant it is extremely valuable either indoors or outside. It will Winter safely in an ordinary cellar, or it can be allowed to harden off with a few frosts in the early Fall and then brought indoors for growing during the Winter. The fruit is of medium size, very sweet and almost seedless. Strong plants, each 40c, 3 for \$1.00, postpaid.

Strawberry Guava

Another luscious tropical fruit and charming house plant, rivaling the famous Otaheite Orange in beauty. It is a nice, clean grower with thick glossy, green leaves, and like the orange, it bears both flowers and fruit at the same time. The flowers are pure white and delightfully fragrant. The fruit is large, nearly the size of a walnut, of a beautiful reddish color, and delicious, sweet and spicy flavor; it makes the highly famed Guava Jelly. The plant begins to bloom and bear fruit while quite small. Price, strong plants, 35c, 2 for 65c, postpaid.

Strawberry Guava.

BUCKBEE'S GIANT FLOWERED PANSY PLANTS

PALMS AND OTHER FINE DECORATIVE PLANTS

Special Offer G Set of the Six Palms listed below, postpaid by Mail only \$200

Kentia Belmoreana.

Chamaerops Excelsa.

LATANIA

BORBONICA

Seaforthia.

CHAMAEROPS EXCELSA (Japanese Fan Palm)—One of the hardest of the Fan Palms. Foliage dark green; the segments of the fan-shaped leaves deeply cut, the edges covered with tooth-like spines. Grows from 15 to 20 feet high; very desirable for lawn decoration. Fine plants, 40c each, postpaid.

KENTIA BELMOREANA—Exceedingly popular parlor Palm. Decidedly rugged under all kinds of treatment. Fine plants, 40c each, postpaid.

KENTIA FOSTERIANA—Without exception the most hardy Palm in its class. Quite graceful and scarcely has an equal for table decorations. Fine plants 40c each, postpaid.

LATANIA BORBONICA—This is one of the very best Palms for house culture, so hardy as to thrive in any ordinary living room, in spite of heat, cold, dust or draught. Has elegant fan-shaped leaves, rich dark green, beautifully fringed. Grows easily, needs no petting or coaxing. Fine plants, 35c each, postpaid.

PHOENIX CANARIENSIS—Beautiful, strong-growing Palm with glossy, dark green foliage. Sure to please and easily grown. Fine plants, 50c each, postpaid.

SEAFORTHIA ELEGANS—A magnificent plant for jardinières or center of tropical bed. Most graceful. Leaves of rare beautiful formation. Fine plants, 40c each, postpaid.

Phoenix.

Pandanus (Screw Pine) Veitchii

One of the finest decorative plants with graceful, curved foliage of light green color striped with broad bands of pure white. It stands ordinary house culture well and is always fresh and bright in appearance. A splendid vase plant. As the plant grows older it becomes more stately and beautiful. Price, by express, not prepaid, 75c, \$1.00, \$2.00, \$3.00 and \$5.00.

India Rubber Plant (Ficus Belgica)

The India Rubber Tree is well known as one of the finest plants for the table and parlor decoration. It has large, thick olive green leaves and graceful polished stems. Will stand much more neglect than most plants. By express, not prepaid, fine plants, 50c, 75c to \$1.00 each. Larger plants, \$1.50 to \$2.00.

Veitchii.
Pandanus.

Umbrella Palm

As decorative as a palm. Hardy, useful and beautiful window plant for all seasons, always fresh, green and attractive. Invaluable as an aquatic plant. Stems 2 to 3 feet high, surmounted by whorls of leaves. Price 15c each, or 3 for 40c.

Australian Silk Tree.

Australian Silk Tree

A fine plant for house culture, of rapid growth, finely cut foliage. The young fern-like leaves are of a light brown color, the tips being covered with a soft down, closely resembling ray silk, hence the name "Silk Oak." In its native place it grows large and has bright, orange-colored flowers. 15c each; 3 for 40c.

Resurrection Plant

When dry it looks like a ball of dead leaves, but as soon as dropped in water it transforms into a rosette of green beautiful leaves. 15c each; 2 for 25c.

India Rubber Plant.

Tiger Plant.

The Beautiful Tiger House Plant

A beautiful decorative plant which will stand any amount of neglect and should be grown for positions where other plants do not thrive. It will grow where nothing else does, in a sunless window, a dark hall, a cool bedroom, or stand on the mantel in a heated sitting-room. It will stand gas and dust, and will go for months without a drop of water, yet remain as thrifty as ever. Singularly beautiful, as well as easily grown. Erect, rigid, sword-like leaves, in some old specimens reaching a length of from four to six feet. The leaves are thick and fleshy, a dark green color, with clouded bars of white. In May and June it sends up long, soft, feathery, white flower spikes. The vivid outlines of this plant, together with its distinctive marbling, make it a superb plant for jardinières, centers of vases, etc. It will also grow splendidly out of doors in Summer. Fine plants, postpaid, each 50c; 3 for 50c. Larger plants by express, not prepaid, \$1.00 to \$1.50 each.

Umbrella Palm.

BUCKBEE'S LARGE FLOWERING DOUBLE PETUNIAS

The Double Petunia is one of the finest bedding plants for massing mixed borders and also for vases. The brilliancy and variety of its colors, combined with the long duration of its blooming period, render it invaluable for garden decoration. It is the flower for everybody, the smallest yard and the finest park is not complete without these butterflies among flowers, that mind neither heat, drought nor rain, but bloom in profusion the whole season. Our collection is unsurpassed for brilliancy of color and size of bloom.

MAJESTIC

Rich, deep purple, shaded crimson. 15c each.

PINK BEAUTY

A very handsome shade of pink, the only pink variety known. 20c each.

SEA FOAM

The finest petunia grown; color a sea-foam white; flowers of the largest size and beautifully frilled. 15c each.

STRIKING

Rich purple, mottled and edged white. A most beautiful combination of colors fully meriting the name Striking. 15c each.

SPECIAL OFFER 6c. FOR ONLY 60c. WE WILL SEND POSTPAID THE FOUR LOVELY PETUNIAS LISTED ABOVE.

Petunia Pink
Beauty.

Royal Purple Plant.

Royal Purple Plant (Strobilanthes.)

The leaves are beautifully variegated, with a deep metallic purple, shaded with dark rose and margined light green. It is particularly fine for beds and border and is entirely distinct from any other bedding plant. Grown as a pot plant in the house it is very bright and effective. 20c each; 3 for 50c, postpaid.

Wandering Jew (Tradescantia)

MULTICOLOR—Fine variegated leaves, striped crimson, green and silver. A very rapid grower and excellent for hanging baskets, vases, window boxes, etc. Highly ornamental. 15c each; 2 for 25c.

VARIEGATED—Same as above, but leaves are dark green with stripes of frosted silver. Very beautiful. Each, 15c; 2 for 25c.

Wandering Jew.

SWAN FLOWER (Swainsonia)

ALBA—This is a very beautiful plant, both for flower bed and house culture; flowers are pure, snowy white, and borne in pretty sprays all over the plant. Price, 15c each; 2 for 25c, postpaid.

ROSEA—Same as Alba except in color, which is bright, rich, rosy red. Price, 15c each; 2 for 25c, postpaid.

Lemon Verbena

A universal favorite and invaluable for its pale green fragrant leaves, so graceful when mixed with bouquets. They will retain their fragrance for years when dried. As a plant for the garden or for pots it is equally valuable. 15c each; 2 for 25c, postpaid.

New Blue Star Flower

As a pot plant for window culture it is one of the very finest things ever introduced and a perpetual bloomer both Summer and Winter. As a bedding plant it is equally valuable, standing sun and drought and showing a great profusion of blossoms all season. Fine plants for blooming at once. 15c each; 2 for 25c, postpaid.

New Blue Star Flower.

SWEET VIOLETS

ROYALTY—The new double Violet. Beautiful azure blue, of rare fragrance. Each, 20c; 2 for 50c.

THE CALIFORNIA—Flowers single, of immense size; color, clear violet purple. The fragrance is delightful. Each, 15c; 3 for 40c.

GOVERNOR HERRICK—Rich, dark purple, single flowers of lovely fragrance. Each, 15c; 3 for 40c.

IMPROVED MARIE LOUISE—One of the finest double blue Violets grown. Very fragrant and a continual bloomer. Each, 15c; 3 for 40c.

THE BRIDE—A grand pure white variety. Flowers are double and immense in size, extra early and deliciously fragrant. Each, 15c; 3 for 40c.

HARDY VIOLETS—See page 170.

New Double Violet—Royalty.

GENISTA.

SHOWER OF GOLD (Genista)

A beautiful yellow flowering plant that grows and flowers freely with ordinary care, covering the plant literally with its rich golden-yellow blooms when well grown. A very popular plant for Easter decorations, at which time it is usually a mass of bloom. 20c each; 3 for 50c, postpaid.

BUCKBEE'S EVERBLOOMING MONTHLY ROSES

Los Angeles.
New American
Hybrid—Tea Rose.

LADY ALICE STANLEY—A beautiful shade of deep coral-rose. Perfect in every way; magnificent, large, full, double blooms of great fragrance. 20c each; 3 for 50c.

LAURENT CARLE—Large, brilliant, velvety carmine flowers of perfect form and intensely fragrant. One of the finest roses grown. 20c each; 3 for 50c.

MADAME RAVARY—Rich, deep nanken-yellow, becoming lighter as the flowers expand; flowers of splendid form, full, double and very fragrant. 20c each; 3 for 50c.

MRS. CHARLES RUSSELL—Grand, rosy-pink blooms, fully as large as American Beauty on stems 3 feet long. Each 25c.

MRS. GEO. SHAWYER—Brilliant deep pink, very large blossoms, carried on 3 to 4 feet stems. 20c each.

BUCKBEE'S EVERBLOOMING MONTHLY TEA ROSES

BUCKBEE'S EVERBLOOMING MONTHLY TEA ROSES

STAR COLLECTION

9 Rare Varieties, the full Set, One **\$1.25**
Each, postpaid, only.....
or 9 Large 2 year old Plants for \$3.55

BESSIE BROWN—Creamy white flowers of immense size; deliciously fragrant. A strong, vigorous grower. 15c each; 3 for 40c.

GRUSS AN TEPLITZ—Dark, rich crimson with velvety fery-red center. So free blooming as to present a blaze of scarlet. 15c each; 3 for 40c.

MADAME CAROLINE TESTOUT—Clear, bright satiny-pink flowers; very large and showy. An old favorite, ever beautiful, seldom out of bloom. 15c each; 3 for 40c.

MME. EDOUARD HERRIER—The Daily Mail Rose. Beautiful unique flowers of a coral red color shaded yellow. Each, 20c.

MRS. AARON WARD—A distinct Indian-yellow, shading lighter towards the edges. Strong, vigorous, very floriferous plants. 15c each; 3 for 40c.

PHARISAE—Rosy white shaded salmon. Large, double flowers of splendid form. 15c each; 3 for 40c.

PRIMROSE—Melon-yellow in Spring and Summer, deeper in Autumn, with apricot shading. Large, double flowers, deliciously scented. 20c each; 3 for 50c.

RED RADIANCE—Clear crimson-red, which does not fade. Large, perfect, double blossoms. 20c each; 3 for 50c.

WM. R. SMITH—Creamy white flowers with rose shading, of large size and elegant form. A rose of exceeding beauty. 15c each; 3 for 40c.

Large two-year-old plants of the above variety, each.....45c

CHATEAU de CLOS VOUGEOT—The black rose, blackish crimson shaded fery red; the richest color of all roses. 20c each; 3 for 50c.

COL. R. S. WILLIAMSON—Color satiny-white with deep bluish center; very large, beautiful flowers. 20c each; 3 for 50c.

COLUMBIA—Enormous flowers often 6 inches across, very deep, and full double. Color true glowing pink, becoming more intense when maturing. Almost thornless. Each 35c; 2 for 60c.

DUCHESS OF WELLINGTON—(Orange Killarney.) Intense saffron-yellow or orange color. Very attractive and without a rival in its class and color. Large, full flowers, delightfully fragrant. Very free flowering. 20c each; 3 for 50c.

FRANCIS SCOTT KEY—Rich crimson-red flowers, very large, well formed and of unusual substance. A strong sturdy growing variety. 20c each; 3 for 50c.

GOLDEN EMBLEM—A new, most wonderful rose. At its best it surpasses Marechal Niel in shape and coloring. Rich, deep golden-yellow color. Perpetually flowering. Large, perfect flowers. Probably the most striking and remarkable rose known today. Each, 45c;

HOOSIER BEAUTY—Glowing crimson-scarlet; large, full, well shaped flowers, sweetly scented. A splendid red garden rose. 20c each; 3 for 50c.

JONKHEER J. L. MOCK (Giant La France)—Deep imperial pink, perfect, firm, highly performed. The largest of all Hybrid Tea Roses. Very free flowering. 20c each; 3 for 50c.

KILLARNEY BRILLIANT—Brilliant rich pink. Larger and more double than its parent the old Killarney. A truly magnificent rose. 20c each; 3 for 50c.

LOS ANGELES—By all odds one of the finest roses ever introduced. Truly magnificent in vigor of growth, color, form, fragrance and in everything required of a first class rose. The color is a luminous flame-pink, toned with coral-red and shaded with translucent gold at the base of the petals. The long pointed buds expand into intensely fragrant beautiful flowers of the largest size. 40c each; 2 for 75c.

MY MARYLAND—Color, salmon-pink which brightens as the flower expands. Very large, double, fragrant flowers. 20c each; 3 for 50c.

NATIONAL EMBLEM—A perfect garden rose. Color dark crimson shading to vermilion at the edges. Very full double flowers produced with marvelous freedom throughout the season. Each, 25c.

OPHELIA—Salmon-tinted, shaded with rose; large flowers of perfect shape. A glorious rose. 20c each; 3 for 50c.

SUNBURST—Beautiful old gold shaded coppery-crimson with sunset tints. A magnificent free-blooming rose. 20c each; 3 for 50c.

WHITE KILLARNEY—Pure waxy white flowers more double and larger than Pink Killarney. 20c each; 3 for 50c.

Radiance.

Gruss an Teplitz.

Crimson
Baby
Rambler.

BUCKBEE'S 1920 ROSE COLLECTIONS

Hardy Baby Ramblers

CRIMSON BABY RAMBLER—A dwarf bush form of Crimson Rambler; is fully covered with large clusters of rich crimson-red flowers throughout the season. The size of the cluster and the number of its flowers is marvelous.

PINK BABY RAMBLER—The flower stalks contain 50 to 60 flowers and buds at one time. Flowers cerise pink, measuring two inches across, with a double row of twisted petals; center, chromo yellow.

WHITE BABY RAMBLER—Of free, compact growth and very attractive. Produces double pure white flowers in great abundance.

Any of the Baby Rambler Roses, Fine Plants, 20c each; the set of 3 for 54c. Large two-year-old Plants, 45c each.

Famous Soupert Roses

CLOTHILDE SOUPERT—A strong dwarf grower and a truly wonderful bloomer, producing cluster after cluster of the finest formed flowers. In form they are perfectly full and double and deliciously sweet. The color effect is beautiful—ivory-white shading toward the center to silvery rose. Hardy everywhere.

WHITE SOUPERT—The Genuine White Soupert. Identical in every way with Clothilde Soupert except in color, which is ivory-white. Free blooming and hardy.

YELLOW SOUPERT—Everybody's Rose. The flowers are very double and are produced in immense clusters; buds exceedingly dainty. A strong upright, bushy grower. Color, white on beautiful light yellow ground; center, chromo yellow. Any of the Soupert Roses, 15c each; the set of 3 for 42c.

Large two-year-old Plants, 40c each.

Everblooming Cochet Roses

PINK MAMAN COCHET—Flowers of enormous size, very full and of great depth and substance. Color, clear, rich pink, changing to silvery rose. Deliciously sweet, a hardy, vigorous grower; flowers the whole season.

RED MAMAN COCHET (Mrs. B. R. Caut)—Magnificent, perfectly double flowers of a bright rosy red color, produced in wonderful profusion all season.

WHITE MAMAN COCHET—A sport of Pink Maman Cochet and identical with it except in color, which is pure snow white. The finest bedding Tea Roses in existence.

YELLOW MAMAN COCHET—One of the finest ever-blooming yellow Roses. Gracefully molded buds, magnificent, large, very double and sweet flowers of deep sulphur yellow color.

Any of the Cochet Roses, Fine Plants, 15c each; the set of 4 for 53c. Large two-year-old Plants, 40c each.

Unexcelled La France Roses

PINK LA FRANCE—The color of this is an exquisite shade of silver pink tinged with crimson. The buds are large, beautifully forced and the open flower exceedingly handsome, with a delightful fragrance. In continuous bloom all Summer and late into the Fall until stopped by frost.

RED LA FRANCE—It is much deeper in color than its pink sister, being a brilliant rose pink, handsomely shaded, deeper toward the center.

STRIPED LA FRANCE—The flowers are distinctly striped with pearl-white and satin-rose.

WHITE LA FRANCE—Silvery white, with the faintest tinge of Rose blush. Buds and flowers are extra large and of splendid shape and exquisitely perfumed.

Any of the La France Roses, Fine Plants, 20c each; the set of 4 for 72c. Large two-year-old Plants, 50c each.

Clothilde Soupert.

Cochet Roses.

Pink La France.

BUCKBEE'S HARDY HYBRID JUNE ROSES

White American Beauty or Frau Karl Druschki.

WHITE AMERICAN BEAUTY or Frau Karl Druschki—The best hardy White Rose in existence. Long buds and immense, perfectly double flowers, 4 to 5 inches across. Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

GEN. JACQUEMINOT—Famous the world over as one of the most magnificent hardy Crimson Roses ever introduced. Every one wants a "General Jack." Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

Hardy Memorial or Evergreen Roses

Sometimes called the Wichuriana Roses, but appropriately classed as "Memorials" because everywhere acknowledged to be the most suitable and satisfactory Roses for cemetery planting. They will climb when trained, or if let alone creep along the ground as closely as an ivy and make a dense mat of shiny dark green foliage, which will remain green on the plants nearly all Winter.

SNOW WREATH—The famous, pure white cemetery rose. Hardy as grass, will grow in sun or shade, poor ground or rich. Makes a beautiful display of blossoms, very large (often 5 or 6 inches around), pure satiny white with bright golden center. 20c each; 3 for 50c. Large 2-year-old plants, 45c each.

JERSEY BEAUTY—Elegant single flowers, 3 inches in diameter, pale yellow, very fragrant. 10c each; 3 for 40c. Large 2-year-old plants, 40c each.

HIAWATHA—Brilliant scarlet, bears large clusters of single flowers; very effective. 20c each; 3 for 50c. Large 2-year-old plants, 45c each.

SWEETHEART—Bright, rich pink, with orange red stamens. Flowers single, of good size and very fragrant. 20c each; 3 for 50c. Large 2-year-old plants, 45c each.

UNIVERSAL FAVORITE—Double bright pink, equally as beautiful as the double white and a charming companion for it. 15c each; 3 for 40c. Large 2-year-old plants, 40c each.

Moss Rose, Henry Martin.

AMERICAN BEAUTY—The National Rose of America. The largest, sweetest and best of all hardy Roses. Immense size, rich color, exquisite form and delicious fragrance, magnificent buds and large, deep, double flowers. Color is a rich, rosy crimson. Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

CLIO—One of the most beautiful hardy Roses grown. Flowers very large, rich color, shaded in center to rosy-pink. Strong plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 50c each.

GLOIRE LYONNAISE—Flowers large, pale yellow shaded with white, orange and fawn, buds beautiful, being long and pointed. Fine strong plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 50c each.

GEORGE AREND'S or Pink American Beauty (New)—The color is a tender rose, pink, the flowers are the same large size and beautiful form as the American Beauty. They are also delightfully fragrant. Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

MRS. JOHN LAING—Soft pink, beautiful form, large size, exceedingly fragrant and free flowering. Strong plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 50c each.

MRS. R. G. SHARMAN CRAWFORD—Color deep, rosy pink, outer petals shaded with pale flesh, white at base of petals; beautiful in every respect. Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

PAUL NEXRON—Probably the largest Rose in cultivation and one of the best bloomers. Color a bright shining pink, clear and beautiful. Strong plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 50c each.

PRINCE CAMILLE DE ROHAN—The Black Hardy Rose. Large, handsome, fragrant flowers. Color deep rich, crimson maroon, shaded black. Postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

ROGER LAMBERLIN—The finest variegated hardy Rose, gleaming crimson edged with white bands. Strong plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

ULRICH BRUNNER—Cherry-red, brilliant and showy; intensely fragrant. Strong plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 50c each.

Beautiful Hardy Moss Roses

A class of Roses which are much admired. The beauty of the flower consists of the delicate mossy covering which surrounds the bud, and which gives the opening flower a unique appearance. They are strong, vigorous growers, perfectly hardy.

HENRY MARTIN. Rich deep rosy red, tinged with crimson; large globular flowers, very full and sweet; finely mossed. Price, strong plants, postpaid, 25c each, 3 for 70c. Large 2-year-old plants, 50c each.

MOUSSELINE. Large cluster of snow-white, extra large, full and double flowers delightfully perfumed; buds thickly covered with lovely deep green moss. Price, strong plants, postpaid, 25c each, 3 for 70c. Large 2-year-old plants 50c each.

PRINCESS ADELAIDE. Rich, glossy pink, tinged with crimson; large globular flowers, very full and sweet; finely mossed; one of the finest. Price, strong plants, postpaid, 25c each, 3 for 70c. Large 2-year-old plants, 50c each.

Special Offer C-9 One each of these three beautiful Moss Roses in strong one-year-old plants, postpaid, for only 70c, or one each of the 3 large 2-year-old plants, for \$1.40.

THE BEST HARDY CLIMBING ROSES

Climbing American Beauty Rose.

CLIMBING AMERICAN BEAUTY—One of the finest climbing Roses. Same size and same dark rosy-crimson color and exquisite fragrance as American Beauty, but blooms more profusely, not only in Spring, but throughout the season. Strong plants, 25c each; 3 for 70c, postpaid. Large 2-year-old plants, 50c each.

AMERICAN PILLAR—Popular single, hardy climbing Rose of a brilliant carmine-rose with a white eye and yellow stamens; they are 3 to 5 inches across. Strong plants, 20c each; 3 for 50c, postpaid. Large 2-year-old plants, 45c each.

MARECHAL NEIL—Golden yellow. Its magnificent buds are known the world over. A rapid grower, making shoots 20 feet high in a single season. Fragrance delicious. Fine plants, postpaid, 25c each; 3 for 70c. Large 2-year-old plants, 50c each.

PEAIRIE QUEEN—Bright, rosy-red, large, globular flowers. A rapid grower and always popular. Strong plants, 15c each; 2 for 25c. Large 2-year-old plants, 40c each.

EXCELSA OR RED DOROTHY PERKINS—The flowers are very double, produced in large trusses of 20 to 40 and of an intense crimson-maroon with the tips of the petals tinged scarlet. Strong plants, 20c each; 3 for 50c, postpaid. Large 2-year-old plants, 45c each.

TRIUMPH—Flowers creamy white, semi-double, produced in large clusters freely and continuously. Strong plants, 20c each; 3 for 50c. Large 2-year-old plants, 45c each.

TAUSENDSCHON OR 1,000 BEAUTIES—Entirely distinct, rapid growing and almost thornless. Flowers are very large, fully 3 inches across and show every shade from pure white to deep pink. Fine plants, postpaid, 20c each; 3 for 50c. Large 2-year-old plants, 40c each.

WHITE DOROTHY—A pure white sport of the well-known Dorothy Perkins of the same habit of growth and freedom of flowering. Fine plants, 20c each; 3 for 50c, postpaid. Large 2-year-old plants, 45c each.

IMPROVED YELLOW RAMBLER—Large clusters of medium sized full double flowers of a saffron yellow, deepening to golden yellow in the center. Fine plants, 20c each; 3 for 50c, postpaid. Large 2-year-old plants, 45c each.

IMPROVED CRIMSON RAMBLER—Absolutely hardy, vigorous grower, prolific bloomer, producing a gorgeous mass of crimson blossoms which remain on the plant a long time. Often grows 12 to 15 feet in a single season. Fine plants, 20c each; 3 for 50c, postpaid. Large 2-year-old plants, 40c each.

NEW HARDY CLIMBING BABY RAMBLER

New Hardy Climbing Baby Rambler.

A new member of the Climbing Rose class, with all the freedom of bloom and bright coloring. The past year, this climbing "sport" has proven very attractive, vigorous in growth and with a continuous show of bright colored bloom, clusters fully as large as those of Baby Rambler, produced all through the Summer. The foliage is bright green, thick and healthy, not so liable to mildew as the old Crimson Rambler whose unsightly foliage has been cause for annoyance to every Rose lover. Strong young plants, 20c each; 3 for 50c. Large 2-year-old plants, 35c each.

QUALITY
NOTHING BUT
QUALITY

FLOWER OF FAIRFIELD

The Ever Blooming Crimson Rambler

The Most Wonderful Garden Rose Introduced for Years

For many years past it has been the endeavor of every Rose grower to produce a climbing variety that would be of perpetual flowering habit. The many beautiful varieties of Rambler Roses were valuable acquisitions, but none of them could be called perpetual or ever-blooming, they producing only one crop of flowers during the season. The Flower of Fairfield, however, is correctly termed a perpetual blooming variety. It commences flowering in the Spring or early Summer and produces repeated crops of bloom until late in the Autumn. Flower of Fairfield blooms very profusely on young wood the first year after planting. It is very effective for covering walls, trellises or arches and is equally attractive for table decoration or other uses as cut flowers. Strong plants, 25c each; 3 for 70c, postpaid. Large 2-year-old plants, 50c each.

THE BLUE ROSE

Vellchenblau or Violet Blue—Newest Climbing Rose "The Sensation of the Century"

After years of effort rosarians have been rewarded by the production of a Blue Rose, which will be welcomed with the greatest interest by all lovers of the garden. This new climbing Rose surpasses all others of recent introduction in having a pure blue color. The flowers appear in large clusters after the manner of the Crimson Rambler, and are semi-double and of medium size. Upon first opening the color is partly bright red and partly bright rose, turning soon to a steel blue. The color is best described by saying that it resembles that of early violets. This variety is a strong grower, has shining green foliage and few thorns. Strong plants, 25c each; 3 for 70c, postpaid. Large 2-year-old plants, 50c each.

The Grand New Blue Rose.

Butterfly Bush.

CHOICE HARDY ORNAMENTAL SHRUBS

No flowering plants are more worthy of cultivation than shrubs, and none can be cultivated more easily.

HARDY BUTTERFLY BUSH or SUMMER LILAC VEITCHII—A pretty shrub of spreading habit, growing 4½ feet high and flowering freely the first season. The long tapering flower-spikes, often 12 to 15 inches long, are covered densely with lilac-like violet-mauve colored blooms from June till frost. Delightfully fragrant. During the Summer this plant is a Mecca for butterflies, and for this reason it is named the "Butterfly Bush." Price, strong, thrifty plants, 20c each; 3 for 50c, postpaid.

ASIATICA—The white Butterfly Bush, with pure white fragrant flower-spikes, larger and finer than the above variety. Not quite hardy in the North. It is a glorious pot plant for winter blooming. Each 25c; 3 for 70c, postpaid.

SWEET SCENTED SHRUB or Calycanthus

Of spreading growth, bearing throughout the Summer great numbers of double, dull brownish purple flowers of exquisite strawberry-like fragrance. The wood and leaves are also sweet scented, which causes it to be known as Sweet Scented and Strawberry Shrub. Each 25c; 3 for 70c, postpaid.

SWEET PEPPER BUSH

(Clethra Alnifolia) A low-growing shrub with dense, pale green foliage, covered with spikes of delightfully fragrant white flowers, produced from July to October, when flowers are of such value. A hedge of it fully equals the wonderful Jessamine hedges of the South, both in beauty and fragrance. Strong plants, each 35c; 3 for \$1.00, postpaid.

CALYCANTHUS.

Hydrangea—Hills of Snow.

NEW HYDRANGEA "HILLS OF SNOW"

Immense snow-white panicles of blooms, literally covering the bush; absolutely hardy, standing 20 degrees below zero without injury.

This magnificent, hardy American shrub is the finest addition to this class of plants found in many a year. The heads of blooms, which are of large size and pure snow-white color, are produced in marvelous profusion, covering the bush with a magnificent mass of glistening pure white flowers. The foliage is finely finished, lacking entirely that coarseness found in so many of our best known shrubs. One of the most valuable characteristics is its coming into bloom just after the passing of all the early Spring shrubs; while its long season, from early June, through September, renders it doubly valuable, not only to the florist for cut-flowers, but also to the owner of a garden—as there is no shrub so grandly decorative. The large heads of blooms are superbly attractive, and the habit of the plant is excellent. This splendid hardy shrub is bound to become most widely grown just as soon as its great value becomes known. We have a fine stock of this valuable shrub growing and can offer them to you at the following very reasonable prices: Strong Plants, postpaid, each 25c; doz. \$2.50. By Express, not prepaid, Larger Plants, each 50c; doz. \$5.00; or, Extra Large Plants, each 75c; doz. \$7.50.

HYDRANGEA—PANICULATA GRANDIFLORA THE MOST POPULAR OF ALL HARDY SHRUBS

Hundreds of thousands of them are sold every year and the demand is constantly increasing. Unsurpassed for the lawn, or for cemetery planting. It readily attains a height of 5 to 7 feet; hardy in all localities, needs no protection in Winter; blooms the first and every season in July and August and continues to bloom for two or three months; the flowers are massive, cone-shaped, sometimes 10 inches in length, and changing from the original pure white to pink, and finally to a beautiful rich coppery red. Fine Plants, postpaid, each 15c; doz. \$1.50. Larger Plants, by Express, not prepaid, each 25c; doz. \$2.50. Extra Large Plants, each 50c; doz. \$5.00.

Deutzia Lemoincii.

DEUTZIA LEMOINEI

One of the best hardy shrubs. Magnificent broad, dense heads of very full, pure snowy-white flowers, produced in such profusion as to completely cover the bush. A great improvement upon the older varieties, the flower being larger and more enduring and the bush a stronger grower. Strong Plants, each 20c; 3 for 50c, postpaid.

Hydrangea—Paniculata Grandiflora.

CHOICE HARDY ORNAMENTAL SHRUBS—Contd.

GOLDEN ELDER

One of the best yellow foliage shrubs; the color is remarkably bright, rich and constant, and makes a fine contrast in the shrubbery border. Bears small fragrant white flowers in early summer, followed by clusters of black berries. Strong plants 25c each; 3 for 70c, postpaid.

PERSIAN TREE LILAC

Popular Favorites for Their Beauty and Perfume.

A neat, handsome little tree, growing 7 to 8 feet high, with slender branches and long, narrow foliage. The flowers grow in immense clusters, delightfully and deliciously sweet and fragrant. It is perfectly hardy, a vigorous grower, and flowers abundantly with a fragrance and beauty that is surpassed by no other shrub. A general favorite for planting in the dooryard or on a lawn. We offer nice, strong plants.
PERSIAN BLUE, 30c each; 3 for 80c, postpaid.
PERSIAN WHITE, 30c each; 3 for 80c, postpaid.

LONICERA, BUSH HONEYSUCKLE

TARTARICA (Tartarian Honeysuckle)—A large shrub with numerous upright, spreading branches. The flowers are of pink color, are borne in great profusion in late Spring, and contrast beautifully with the foliage. The fruits are red, ripen in Summer, persist till Fall and are very showy. Strong plants, 20c each; 3 for 50c, postpaid.

GRANDIFLORA—Large bright red flowers striped with white; blooms in June. The two honeysuckles appear to fine advantage if planted together. Strong plants, 20c each; 3 for 50c, postpaid.

FORSYTHIA

Fortune's (Golden Bell).

A splendid old shrub with dark, shining foliage, lighting up the garden in early Spring with its great masses of bright golden-yellow flowers, which are borne in great profusion all over the bush before the leaves appear. Strong plants, 25c each; 3 for 70c, postpaid.

THE NEW HARDY

JAPANESE SNOWBALL

This Japanese variety of the old-fashioned Snowball is one of the grandest and most striking of all hardy shrubs. It forms an erect, compact plant, 6 to 8 feet in height, blooms in June and for a long time the plants are filled with hundreds of big snowy balls that glisten with ethereal whiteness like gems in the sunlight. Price 25c each; 3 for 70c, postpaid.

SNOWBERRY

A well-known dwarf shrub with small pink flowers and large white berries that hang on the plant the greater part of the winter. Strong plants, each, 25c; 3 for 70c, postpaid.

SYRINGA MOCK ORANGE

(Philadelphus Coronarius.)

A beautiful creamy white flowers, deliciously fragrant and borne in great profusion. A very showy and desirable shrub. Strong, thrifty plants, 25c each; 3 for 70c, postpaid.

Syringa, or Mock Orange.

Persian Lilac.

SPIREA BRIDAL WREATH

This lovely old-fashioned shrub is always popular, and justly so, because of its real beauty; bears large spirals of densely crowded double white flowers, each blossom like a miniature rose, the entire length of the branches—and they appear by the million—hence the common title of "Bridal Wreath." A beautiful floral wreath is made at once by bending and tying the ends of the branch together. The grandest of all spirals and one of the most beautiful hardy shrubs in existence. Fine plants 20c each; 3 for 50c, postpaid.

Japanese Snowball.

SPIREA, ANTHONY WATERER

A perpetual bloomer. Makes a dwarf bush 18 to 24 inches high, covered from Spring until late in the Fall with large heads of lovely crimson flowers, borne in dense clusters and have a peculiar feathery appearance, which is beautiful. Flowering profusely when only a few inches high, one of the best and most desirable plants at the front of shrub-beries or wherever a low bush is required. Fine plants 25c each; 3 for 70c, postpaid.

WEIGELIA

EVA RATHKE—A remarkably free bloomer, flowering continuously throughout the Summer and Autumn; of an entirely distinct color, being a rich ruby-carmine, borne in clusters all along the branches. One of the finest all-around flowering shrubs. Strong plants 25c each; 3 for 70c, postpaid.

ROSEA NANA VARIEGATA—One of the most useful dwarf shrubs with beautiful leaves, broadly variegated green, pink and creamy white; the flowers are delicate rose-pink. When in its double beauty of bloom and foliage it is without a peer. Strong plants 25c each; 3 for 70c, postpaid.

Variegated Weigelia

Weigelia, Eva Rathke.

AMPELOPSIS Veitchii

AMPELOPSIS

VEITCHII (Boston or Japan Ivy)—The fashionable and most hardy wall climber of the day. Clings tightly to rock, brick, etc., and it is a wall of living green the Summer through, turning in Autumn to a flaming crimson, when it is certainly gorgeous. It stands the dust and dry air of cities admirably. Strong plants, 25c each; 3 for 70c, postpaid.

ENGLEMAN'S IVY (Englemanii)—A desirable variety with clinging tendrils by which it will climb walls or trees and cling as close as the Boston Ivy. The foliage resembles Quincefolia, but is much more dense. Strong plants, each 25c; 3 for 70c, postpaid.

VIRGINIA CREEPER (Quincefolia)—A native vine of rapid growth, with large, luxuriant foliage, which in the Autumn takes on the most gorgeous coloring. Strong plants, each 35c; 3 for \$1.00, postpaid.

CLEMATIS

Hardy Perpetual Flowering

Of all the vines used either for shade or decoration, none can compare with the Clematis in its many and varied forms, producing hundreds and thousands of picturesque and strikingly beautiful blossoms.

Clematis Jackmanii.

Clematis Paniculata.

Mountain Beauty Vine (ANTIGONON LEPTOPUS)

A beautiful new Climbing Vine, not quite hardy here, but specially recommended for the South and Pacific coast; it is a vigorous climber suitable for covering porches, verandas, etc.; has handsome foliage and is covered for months at a time with splendid clusters of rose-pink flowers of the most exquisite color; leaves heart-shaped. Price, fine strong plants, 25c each; or 3 for 70c, postpaid.

Bitter Sweet (Celastrus Scandens)

A native vine with good foliage; yellow flowers in June, and bright, ornamental orange and scarlet berries throughout Fall and Winter. It is very hardy; grows in sunny or shaded places, and is not surpassed as a vine for covering trellis-work, trees, rocks or walls. Each 20c; 3 for 50c, postpaid. Larger size 35c each.

Mountain Beauty Vine.

CLEMATIS HENRYI—Fine, large, creamy white flowers. The very best of the white varieties; a perpetual bloomer. Large field-grown roots, 3 years old, only 75c each, postpaid.

CLEMATIS STANDISHI—One of the most striking beauties ever offered. In color it is a most exquisite lavender-blue of large size, often measuring 6 inches across. Thousands of flowers may be grown on a single plant. Every year's growth adds to its beauty. It is a perpetual bloomer. Large roots, 3 years old, 75c each, postpaid.

CLEMATIS JACKMANII—A perfect beauty. 5,000 blossoms have been counted on a single specimen plant. Jackmanii is of rapid growth, early, abundant and continuous bloomer. Perfectly hardy and adapted to all kinds of culture. In flower from middle of June to middle of October. The blossoms are of large size, intense royal velvety-purple when in full bloom, varying through all the exquisite shades of violet 6 inches across, richly veined and handsomely shaded. The most striking and picturesque variety known. Strong field-grown, 3-year-old roots, price 75c each, postpaid.

CLEMATIS MAD. EDOUARD ANDRE—An entirely distinct, and most novel variety and the nearest approach to a red ever sent out. Thousands of flowers produced on a single specimen plant. Large 3-year-old roots, price 75c each, postpaid.

CLEMATIS PANICULATA—(Japanese Virgin's Bower)—One of the most beautiful of our hardy flowering vines. The flowers are pure white, three-fourths of an inch in diameter, star-shaped, and are borne in great panicles or clusters of bloom, fairly covering the plant. These clusters are carried on long, slender stems, and stand out boldly from between the glossy-green leaves. The fragrance of the flowers is delicious, resembling the English Hawthorne blossoms. It begins to bloom in August, at a time when most other hardy climbers are out of bloom—an inestimable advantage. It is a strong, rapid grower, quickly reaching a height of from 15 to 20 feet and spreading out when trained on wires or strings. It is perfectly hardy in all sections of the country, and it is, in our opinion, the most valuable among hardy climbing vines. A grand porch climber. Good, strong plants, 25c each; 3 for 70c; large strong plants, 50c each; 3 for \$1.25, postpaid.

Notice—We have extra strong roots of the above 5 varieties of Clematis at \$1.00 each, prepaid.

BEST HARDY ORNAMENTAL CLIMBERS

Japanese Kudzu Vine

Favorite vines of strong, rapid growth in any soil or location. They are well adapted for all trellis-work, for climbing over arbors, for training to posts and along fences. They are beautiful when used for ground-cover to ramble in a wild and natural way. The vines take root where they touch the ground, and this habit makes them suitable also for retaining purposes on slopes and banks. They withstand shade and make a ground cover in places where grass will not grow.

HALLEANA—(Hall's Japan)—For real home vines there is nothing prettier than Honey-suckles, and Halleana is considered by many the sweetest and most beautiful of all. It is a strong, rapid grower, perfectly hardy. Blooms constantly and profusely from June to November. Flowers are pure white, changing to yellow and of peculiarly delicious fragrance. Fine for trellises or pillars. Foliage bright, glossy green; makes dense shade. Strong plants, 20c each; or 3 for 50c, postpaid.

GOLDEN LEAVES—Marvelously effective. It bears innumerable sprays of the most perfect little leaves, that are covered with a network of gold and green, often marked with pink also. A strong grower with white blossoms. A unique vine. Strong plants, 20c each; or 3 for 50c, postpaid.

SPECIAL OFFER—One fine plant each of the two Honey-suckles for only 35c, postpaid.

Honey-suckle Halleana.

The Wonderful Hardy Japanese Kudzu Vine (Pueraria Thunbergiana, "Jack-and-the-Bean-Stalk" Vine)

The most remarkable and rapid growing of all hardy vines, often making a growth of fifty to seventy-five feet in one season and flourishes where nothing else will grow; will last for 25 years or more. In the North the plant dies to the ground in Winter, coming up again from the roots in the Spring. It has clusters of delightfully fragrant purple flowers all Summer and Autumn. The large, beautiful, deep green leaves afford a dense shade, making it invaluable for covering porches, arbors, fences, old trees, etc. Price, Strong 1-year-old roots, 20c each, or 12 for \$1.75. Large 2-year-old plants, each 50c; 13 for \$2.75, postpaid.

Matrimony Vine

A vigorous, hardy climbing plant. It covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers, which are succeeded by brilliant scarlet berries nearly an inch long. It will grow and thrive in any situation, either shade or bright sunlight. Strong Plants, each 25c; 3 for 70c, postpaid.

Trumpet Creeper (Bignonia Radicans)

A familiar, high and rapid growing vine, with rich green foliage and large, showy, trumpet-shaped scarlet flowers. Very desirable for covering Summer-houses, training over arbors, and to climb over trees, rocks and rustic bridges. Bignonias will grow in almost any soil and are very hardy. Strong 2-year-old plants, each, 25c, 5 for 60c, postpaid.

Chinese Wistaria

Chinese Wistaria

One of the most elegant and rapid growing hardy climbing plants; attains an immense size, growing at the rate of 15 to 20 feet in a single season. Bears an abundance of long, pendulous clusters of purple-lilac flowers in May and June and again in Autumn. Price, large 2-year-old plants, 35c, postpaid.

Evergreen Bittersweet (Euonymus Radicans Vegeta)

The Best Evergreen Vine for America.

A most valuable, new vine. A hardy, very strong, robust evergreen vine, climbing by aerial rootlets, ascending a height of 25 to 30 feet in one season. It clings to walls, rocks and trees for which it makes a splendid dense evergreen cover. The leaves are large, rounded, glossy green, absolutely holding the color in the hottest summer as well as in the coldest winter. In the fall it bears a profusion of bright orange-red berries which remain on the plant the greater part of the winter.

There is no better climbing vine for this country than Evergreen Bittersweet. It is easy to grow, will grow in any soil and climate; it has the advantage over deciduous vines being beautiful 365 days of the year, instead of a few weeks or months. It is more hardy than English Ivy.

Strong plants, 50c each, postpaid. Larger plants 75c each.

Matrimony Vine

Flag Iris or Fleur de Lis

The Fleur de Lis is one of the most desirable early Spring-flowering plants. No garden is complete without a collection of these beautiful flags. They are most effective if planted in masses on the lawn or among shrubbery, etc. They are hardy everywhere, and succeed in any soil without cultivation or care of any kind.

BLACK PRINCE—Deep, rich, royal purple. Very effective.

CELESTE—Bright, satiny blue.

DARIUS—Lemon yellow and lilac. Distinct and beautiful.

HER MAJESTY—Beautiful, rosy lilac. Very large.

MADAME CHEREAU—White broadly margined violet.

PLUMER—Deep, coppery bronze. Very free flowering.

Price, any of the above, 20c each; \$2.00 doz., postpaid.

SPECIAL OFFER E 6. The set, one each of six named Fleur de Lis, postpaid, for only 85c.

Mixed All Colors, 15c each; doz., \$1.50, postpaid.

Flag Iris
or
Fleur de Lis

JAPANESE IRIS

The magnificent Iris are among the most beautiful of our Summer-flowering plants, and are becoming more popular every season. They commence blooming about the middle of June, and continue for five or six weeks. Many of these flowers measure from 10 to 12 in. in diameter, and rival the Orchids in their rich colorings and markings. For cut flowers they should be cut in the bud state, allowing the bloom to expand when placed in water. Price, postpaid, Choicest Mixed, all colors, each 35c, \$2.50 per doz.

Hardy Perennial Phlox Thor

HARDY PHLOX

No class of Hardy Perennials is of more importance than the Phlox which succeed under almost any conditions and flower from the end of June until late in the Fall; and while they will continue in good condition and flower freely for many years without attention, still they are much improved by liberal cultivation. There are quite a number of different varieties, but we offer only the latest and best varieties and entirely distinct sorts, the finest in their respective color. Our select assortment contains the very cream of the Phlox family.

ALBION—White, suffused pink and pink eye.

ELIZABETH CAMPBELL—Light salmon-pink with dark red eye. Each, 25c; doz., \$2.50.

EUROPA—Pure snow-white with crimson eye, immense florets and trusses.

MRS. JENKINS—Pure snow-white; gigantic trusses and flowers. The finest white Phlox.

JEANNE D'ARC—Pure white, late.

KATHIE—Deep reddish violet with deeper eye. One of the darkest.

RIVERTON GEM—Mauve-rose with carmine-red eye.

RHYNSTROM—Carmine-rose, THOR—Deep salmon-pink with a scarlet glow. Each, 25c; doz., \$2.50.

WIDAR—Lovely violet-blue with white eye.

Prices, any of above, unless noted, 20c each; \$2.00 doz.

SPECIAL OFFER E 11. One each of the above 10 Hardy Phlox, postpaid, \$1.75.

MIXED HARDY PHLOX—A fine assortment. Each, 15c; doz., \$1.50, postpaid.

Lady in White—The Famous Cemetery Plant.

Bleeding Heart.

Canterbury Bells.

BUCKBEE'S CHOICE
"FULL OF LIFE"

HARDY PERENNIAL PLANTS

The old-fashioned hardy garden flowers are very popular, and deservedly so. No feature of the garden can be more satisfactory than a good assortment of these hardy plants, producing from early Spring to late in the Fall a continuous succession of charming flowers, which are equally valuable for garden ornamentation and cutting purposes. No class of plants will yield better or more pleasing results for the money invested. They require very little care or attention, are perfectly hardy and yield a rich harvest of bloom.

LADY IN WHITE (The Famous Cemetery Plant)—One of the very best white flowered plants for the border. The flowers are borne in the greatest profusion the entire Summer on strong, erect stems, pure white in color. Select plants, postpaid, 20c each; 3 for 50c; \$1.95 per doz.

AQUILEGIA (Columbine)—Long-spurred varieties of many rich and varied colors and with broad petals. Two feet high. Columbines are a most important part of the hardy garden and should be grown in quantity. With their airy grace they will serve to lighten up a too stiff and formal planting. Their lasting flowers and long stems are also splendid for cutting. Prices, postpaid, 20c; 3 for 50c; \$1.95 per doz.

ARMERIA (Thrift)—Attractive, dwarf plants for low edgings, forming rosettes of narrow evergreen leaves on the ground, from which they send up stiff, very stems with dense heads of flowers; bloom all season. Pink and white flowers. Prices, postpaid, 25c; 3 for 70c; \$2.50 per doz.

BARY'S BREATH (Gypsophila Paniculata)—A beautiful old-fashioned plant possessing a grace not found in any other perennial. Beautiful pure white flowers. Plants grow 2 to 3 feet in height and about the same in diameter. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

BLEEDING HEART (Dielytra, or Dicentra)—An old-fashioned favorite; its long and graceful heart-shaped pink flowers are always attractive. Prices, postpaid, 25c each; 3 for 70c; \$2.75 per doz.

CANTERBURY BELLS (Campanula Medium)—Beautiful large bell-shaped flowers in blue, rose and white colors. The Medium is the most satisfactory of the Campanulas. It grows 3 feet high on good soil and blooms for a long time, if flowers are cut immediately upon fading and if planted in a half-shady place. Mixed colors. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

CHIMNEY BELL-FLOWER (Campanula Pyramidalis)—The most conspicuous of the Campanulas, producing spikes 4 to 6 feet high, crowded with salver-shaped flowers July till frost. Colors: blue and white. Each 25c; 3 for 70c; doz. \$2.50.

COREOPSIS (Lanceolata Grandiflora)—One of the most popular hardy plants. The flowers are of a rich golden yellow and invaluable for cutting; continues in bloom the entire Summer and Fall. Each 15c; 3 for 40c; doz. \$1.50, postpaid.

CORN FLOWER ASTER (Stokesia)—A most charming and beautiful native plant. Grows from 18 to 24 inches high, bearing freely from early in July until October its handsome Corn Flower-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in masses or beds of any size. Mixed colors, blue, purple, pink, yellow and white. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

DAISY SHASTA (Alaska)—The very best daisy. These new Hybrids of Shasta Daisy give us flowers of different forms and a large range in shape from fully double to single; and in color from pure white to pale lemon yellow—some solid color, some prettily variegated with yellow discs. The plants are very free flowering and in bloom throughout a long season, making as effective a field show and as profitable a cut flower supply as any hardy perennial grown. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

DAY LILY, HEMEROCALLIS—Popular beautiful plants belonging to the Lily Family; succeed everywhere. Flowers close at night, very fragrant. Three feet high, flowers in June and July. We offer the following distinct varieties:

White—Pure glistening, snow white. Each 25c; 3 for 70c; doz. \$2.50.

Variegated—Variegated foliage. White flowers. Each 25c; 3 for 70c; doz. \$2.50.

Buttercup—The best yellow. Each 25c; 3 for 70c; doz. \$2.50.

Japanese Double—Large orange flowers with darker shadings. Each 25c; 3 for 70c; doz. \$2.75.

DELPHINIUM OR LARKSPUR (Gold Medal Hybrids)—These flowers are being used with telling effect in our parks and public grounds. They are one of the few hardy blue flowers of any note. By cutting off the flowers as soon as faded, a second and third crop will succeed. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

FOX GLOVE (Digitalis)—Another good old-fashioned but dignified and stately perennial. The strong flower stalks—often 4 to 6 feet high—always give an appearance of strength wherever planted. Mixed colors. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

Coreopsis.

Shasta Daisy.

Fox Glove.

Day Lily.

Giant Rainbow Hibiscus.

Hollyhock.

Hypericum.

Platycodon.

HARDY PERENNIAL PLANTS Continued

GAILLARDIA GRANDIFLORA—One of the showiest and most effective hardy plants, about 2 feet high, and continuous bloomers from June till cut down by the frost. The flowers are of gorgeous coloring; the center is of dark red-brown, with petals marked with rings of brilliant crimson, orange and vermilion. Excellent for cutting. Each 15c; 3 for 40c; doz. \$1.50, postpaid.

HIBISCUS (Mallow) CRIMSON EYE—Noble, shrub-like plants, 3 to 4 feet high. Large fine green foliage and flowers of immense size, pure white, with a large spot of deep velvety crimson in the center. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

NEW GIANT RAINBOW HIBISCUS—The most notable and striking introduction of hardy perennial plants for many years. Plants 6 feet high, with huge blossoms 10 to 12 inches across, in white and all shades of pink, rose and scarlet. These flowers remain open all day, whereas other Mallows close about noon, and they are producers from July till frost. Each 25c; 3 for 70c; doz. \$2.75, postpaid.

HOLLYHOCK—Few hardy plants combine as many good qualities as the Hollyhock. The flowers form perfect rosettes of the most lovely shades of color. It requires a rich, deep soil, well drained, and will repay in quantity and elegance of bloom any extra care. A slight protection during the Winter will be beneficial. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

HYPERICUM MOSERIANUM (St. John's Wort, Gold Flower)—A hardy perennial. Enormous, rich golden-yellow flowers with yellow stamens and crimson anthers nestling amongst the bright green foliage. Marvelously free flowering the entire season. Each 25c; 3 for 70c; doz. \$2.75, postpaid.

MONARDA DIDYMA (Pea Balm, Oswego Tea, Mint)—Showy plants 2 to 3 feet high, with aromatic foliage and brilliant crimson-scarlet flowers from July to September. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

MYOSOTIS—A true Forget-Me-Not. Azure blue flowers hardly ever out of flower, useful in shady spots. Price 15c each; 3 for 40c; doz. \$1.50, postpaid.

PHYSOTEGIA (False Dragon Head)—Native perennial, 3 to 4 feet high, forming dense bushes and bearing all Summer showy spikes of pretty, tubular flowers of delicate pink color, resembling a large heather. Prices, postpaid, 20c each; 3 for 50c; \$1.95 per doz.

PINKS, HARDY GARDEN—Old favorites bearing their sweet clove-scented flowers in the greatest profusion during the Summer months. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

POPPY, ORIENTAL—Nothing can equal these Poppies during their period of flowering for a gorgeous display of a rich, brilliant coloring. Select plants, price, postpaid, 25c each; 3 for 70c; \$2.50 per doz.

PLATYCODON (Balloon Flower)—Neat, branching bushes, 2 to 3 feet high, with 10 to 12 stalks covered with large bell-shaped flowers from July till September. Blue and white flower. Each 20c; 3 for 50c; doz. \$1.95, postpaid.

RUBICEKIA, GOLDEN GLOW—It is a question whether any other hardy perennial has ever met with greater popularity than this. It is a strong, robust grower of 5 to 6 feet, and produces masses of double golden yellow cactus dahlia-like flowers from July to September. Price 20c each; 3 for 50c; \$1.95 doz., postpaid.

SAGE, VARIEGATED—Pretty, dwarf bushes about one foot high, with small oval leaves neatly margined yellow; very fine for edging. This is a hardy perennial, the leaves may be used for the same purposes as the common herb. Price 20c 3 for 50c; \$1.95 per doz., postpaid.

SILENE ORIENTALIS (Catchfly)—Dwarf, charming plants with large heads of dark rose flowers appearing continuously from Spring till frost. Suitable for edging and for rock gardens. Prices, postpaid, 20c each; 3 for 50c; \$1.95 per doz.

SWEET WILLIAM (Dianthus Barbatua)—Beautiful old-fashioned favorite border plant. The stock we offer has been grown from a select strain; various colors. Price 15c each 3 for 40c; \$1.50 per doz., postpaid.

TRITOMA (Red Hot Poker Plant)—Surpasses the finest Cannas for attractiveness and brilliancy; blooms incessantly from August until November. Plants show from six to ten grand flower stalks all the time, each holding at a height of 3 feet a great cluster of flame colored flowers. Prices, postpaid, 25c each; 3 for 70c; \$2.50 per doz.

VIOLET, HARDY ENGLISH—This Violet is entirely hardy; of a deep Violet purple color and most deliciously fragrant and perfectly double. Will grow and bloom in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy English Violet. Prices, postpaid, 25c each; 3 for 70c; \$2.50 per doz.

YUCCA FILAMENTOSA (Adam's Needle)—One of the finest and most effective hardy foliage and flowering plants. Broad, sword-like foliage and tall, much-branched flowering spikes, often 5 to 6 feet long, densely packed with large, fragrant, drooping, creamy-white flowers during June and July. Price 25c each; 3 for 70c; \$2.50 per doz.

Hardy Garden Pinks

Golden Glow.

Sweet William

Tritoma

Yucca

MONEY MAKING STRAWBERRIES

The QUEEN
OF ALL
BERRIES

STRAWBERRY PLANT ORDERS

Will be shipped direct from our Strawberry Farms and cannot be shipped with other goods. Send your orders in early and they will be filled in rotation just as early in the Spring as possible.

WHEN WE SHIP STRAWBERRY PLANTS—In this locality Field Grown Strawberry Plants are ready for shipment in April. We can also make Fall shipments if desired. We ship Strawberry Plants during the months of March, April, May, October and November only. Be sure to state exact date you want your plants shipped when ordering. Otherwise we will use our best judgment.

My plants are suited to all soils and climates. 100 Plants will supply an ordinary family with fresh fruit all season. Set Out BUCKBEE'S "Full of Life" STRAWBERRY PLANTS. Start Right! Get the Best. ORDER EARLY.

We Warrant all shipments of Strawberry Plants to reach purchaser's hands in good growing condition and when so accepted, no orders will be duplicated or replaced for any cause.

NOTICE.
All varieties marked (S) are Staminate Perfect Flowering and Bisexual Varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.
For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

MONEY IN STRAWBERRIES.

A Strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$600.00 profit per acre. Only one expense—the Cost of Plants, which is merely nominal—lasts for years.

EVERBEARING OR FALL-BEARING STRAWBERRY

A dish of luscious strawberries in Fall is a luxury which everyone who owns a garden could enjoy. Plant at least a dozen plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in Spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the Fall crop.

BUCKBEE'S SELECT LIST OF SMALL FRUITS

BLACKBERRIES

BURBANK'S NEW THORNSLESS

The Finest Flavored, Heaviest Cropping, Best Appearing Berry Ever Grown. Easily Harvested, Sure to Please.

This new variety is the peer of all the Mammoth Blackberries and produces a berry superior to any other, on vines which are absolutely free from thorns. The canes start to grow early in the Spring, making thick, straight stalks about 5 feet high when they begin the trailing habit, at which time they should be trellised. It is a prolific grower, the canes reaching from 10 to 20 feet in a season and can be pruned to suit. It is not an evergreen, but some leaves usually stay on all winter. This Blackberry commences growing early in the Spring and the fruit ripens two or three weeks earlier than any other variety. It is enormously productive—in fact, plants have been known to produce over 10 pounds of fruit at one picking. The size is immense, berries usually measure 3 inches in length and are as large as a man's thumb. The flavor is distinct, much like the wild Blackberries of California. It is practically free from seeds and the core is very small and firm. It contains less acid than most varieties, which makes it unequalled for cooking purposes. Price, strong plants, each 25c; doz. \$2.50, postpaid.

MAMMOTH—The Giant of All

The berries are enormously large; in fact, the largest Black-Mammoth Blackberry. berries in the world. They measure from 2 to 2½ inches long, thus eclipsing any other sort. For cooking purposes fulfills all the desired qualities of other Blackberries, and as a fresh fruit is generally preferable, owing to large size and having more pulp and less core. Price, strong plants, each 15c; doz. \$1.50, postpaid.

ELDORADO

A very vigorous growing, perfectly hardy variety. Fruit very large, borne in clusters which ripen very evenly; quality unsurpassed and an excellent shipper. Price, 10c each, or 95c doz., postpaid.

GRAPES

CAMPBELL'S EARLY—The berries are large, often an inch or more in diameter, glossy black with a purple bloom, sweet and juicy, with few seeds. As a keeper and shipper this variety is unequalled by any other American Grape. Price, 2-year-old strong plants, 25c each, or \$2.50 doz., postpaid.

WHITE DIAMOND—Valuable for all sections of the United States. Best white, healthy and perfectly hardy. Prices same as Campbell's Early.

MOORE'S EARLY—One of the best early ripening varieties. The bunch is large, round and with a black-blue bloom. In quality surpassing the Concord. Price, 2-year-old strong plants, 20c each, or \$2.00 doz., postpaid.

CONCORD—The well-known standard black-blue variety. It succeeds wherever Grapes are grown. Prices same as Moore's Early.

WORDEN—A large black Grape of the Concord type, but 5 to 10 days earlier. Price same as Moore's.

Special Offer E3 The set of 5 choice Grapes Only 90c
one of each variety, by mail, postpaid.

CURRENTS

PERFECTION—The latest introduction, created by crossing Fay's Prolific with White Grape. It combines the best qualities of both parents. In color it is a beautiful bright red and of a larger size than Fay, the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive Currents, and in quality it is superior to anything in the market today, being of a rich, mild, sub-acid flavor and having plenty of pulp with few seeds. Price, 25c each, or \$2.50 doz., postpaid.

GIANT RUBY—The largest red Currant. Unusually hardy in habit of growth and bears profusely. The berries are beautiful light red and grow in immense clusters, more resembling bunches of red Grapes than Currents. Price, 25c each, or \$2.50 doz., postpaid.

WHITE WINE—This is the hardest white sort and is therefore especially desirable for the middle and northern states. It bears great bunches of pearly white Currants of most delicious flavor. Vigorous grower, very productive. The sweetest and richest white Currant extant. Fruit larger and stems longer than White Grapes. In the fruit sugar and acid are blended without excess of either. The best of all for a dessert fruit. Price, 25c each, or \$2.50 doz., postpaid.

Special Offer E4 The set of 3 Currents one of each variety, by mail, postpaid. Only 60c

Perfection
Currants.

IMPORTANT NOTICE—CURRENTS AND GOOSEBERRIES

Owing to the embargo placed by our Government, we cannot ship Currents and Gooseberries into any states west of the Mississippi River nor in Illinois. Customers living in these Western States will please not order them and so save unnecessary correspondence.

GOOSEBERRIES

CHAMPION—An excellent new variety originated in Minnesota. A vigorous grower, very hardy, free from mildew and rust and very productive. The fruit ripens early, is of large size, round, smooth, of greenish white color with thin transparent skin and of most excellent quality. The very best Gooseberry known today. Price, Strong Plants, 30c each, or \$2.75 doz., postpaid.

RED JACKET—Fruit large, a bright shiny red, a most beautiful and attractive berry. Flavor is most delicious and commands the very best market price. Canes and foliage are at all times vigorous, clean, healthy and mildew proof. Thoroughly hardy and enormously productive. Prices same as Champion.

DOWNING—The berry is large, handsome, a pale green in color, of excellent quality. A favorite for home and market. Price same as Champion.

Champion Gooseberry.

Campbell's
Early
Grape.

St. Regis

RASPBERRIES

RED RASPBERRIES

ST. REGIS EVERBEARING. Bears Fruit Perpetually for Four Months—It is the first Red Raspberry to give ripe fruit, and continues to produce berries without intermission until October. The berries are surpassing in quality—rich, sugary, with full Raspberry flavor. They are of exceedingly meaty, firm texture, and keep in good condition for a very long time after being gathered. St. Regis is very hardy, an excellent shipper and wonderfully prolific. Fine, strong, selected plants, 20c each; \$1.75 per doz., postpaid.

HERBERT—The hardest Raspberry; a strong, vigorous grower; fruit bright red, very sweet and juicy. Earlier and with larger berries than most others. Price, 15c each; \$1.25 doz., postpaid.

BLACK RASPBERRIES

CUMBERLAND—New. The largest Black Raspberry known, averaging $\frac{3}{4}$ inch in diameter. Good and firm as the Gregg, but the bush is harder. A strong, vigorous grower and wonderfully productive. Mid-season. Price, 15c each; \$1.25 doz., postpaid.

COLUMBIAN—Purple or dark blue color, rich flavor, very large size. An excellent shipper, and the best for canning and drying. Late. 15c each; \$1.25 doz. Postpaid.

IMPROVED RUSSIAN MULBERRY

An ornamental, hardy, fruit-bearing tree. Suitable for all sections of this country. Makes a beautiful tree for the lawn. Fruit larger than blackberries and of delicious flavor. It is a very rapid grower, often reaching the height of 50 feet and from 3 to 5 feet in diameter, and is perfectly hardy. Commences to bear when two years old, and is very prolific. The fruit larger than the average blackberry, has a fine, aromatic flavor and sub-acid, sweet taste, and is used for dessert as we use blackberries or raspberries. Price, 15c each, or 3 for 40c, postpaid.

THE STRAWBERRY RASPBERRY

(Tree Strawberry)

Bush from 18 inches to 2 feet in height, entirely hardy and impervious to heat and drought. Berries are larger than the largest Strawberries, bright, shining scarlet, with an exquisite bloom. MAKES DELICIOUS JELLY, JAMS AND TARTS, having a delicious flavor entirely different from any other fruit. An immense yielder, producing regularly and abundantly. It bears the first season and gets stronger and larger each year. All lovers of fruit should give it a trial. It will both surprise and please you. Price, 20c each, or 3 for 50c, postpaid.

Strawberry Raspberry.

BURBANK'S HYBRID BERRY "PHENOMENAL"

Burbank's Latest Berry Triumph—Largest Berry Known. A cross between a Dewberry and a Raspberry. The color and flavor are those of the Raspberry, while in size and shape it is more like the Dewberry. The berries grow in clusters from five to ten, or more, and single berries, grown under favorable conditions, have measured $3\frac{1}{2}$ one way by $3\frac{1}{4}$ the other way. The color is a bright crimson. They are of delicious flavor. Price, Strong Plants, each 20c; doz. \$1.75, postpaid.

THE WONDERFUL HIMALAYA BERRY

The Greatest Wonder of All.

Ripening after all other berries are gone and extending the berry season several weeks. It is a vigorous grower and should be grown on trellis, as the vines will grow from 30 to 40 feet in one year. The berries are large, black and borne in clusters. They are of oblong shape, very sweet, juicy and with almost no core. They begin ripening the last of June and as fast as the ripe fruits are pulled off more ripen. Price, Strong Plants, each 20c; doz. \$1.75, postpaid.

NEW LOGAN BERRY (Blackberry-Raspberry)

This Thornless Blackberry-Raspberry originated in California. It is an exceedingly strong grower, making the growth of 10 feet in one season. The fruit is as large as the largest sized Blackberry, of the same form and shape, and the color, when fully ripe, is a dark bright red. It is excellent for the table. The fruit is extremely firm and the vines are enormous bearers. The fruit ripens before Raspberries and Blackberries. Price, 20c each, or \$1.75 per doz., postpaid.

DEWBERRY

AUSTIN'S IMPROVED—The berries are much larger than those of any other Dewberry or Blackberry. It requires no trellises or stakes. The fruit is jet black and of superior flavor. For productiveness it outrivals all other Dewberries. Price, 10c each, or 90c doz., postpaid.

Himalaya

Improved Russian Mulberry.

Phenomenal
