Calluna vulgaris Scotch Heather. in named varieties

Scotch Heather the "Bonnie Purple Heather" of song and verse is a very lovely low-growing evergreen shrub, 6" to 3' high, of the Heath Family, covered in mid-summer with small bell-shaped purple flowers, borne on slender spikes. These flowers stay in good condition for some weeks, and if cut while fresh will hold their color and charm all winter. Honey bees, too, are attracted to Scotch Heather and make from it a honey that is considered very choice. This plant is widely known as invaluable for planting in full sun in sandy soil; it is also most attractive as an edging to beds of Rhododendrons, Laurel etc., and in Rock-gardens. This little plant gives most satisfaction when transplanted from pots. Besides the common Purple Heather there are many varieties which give variation in the height of plant, the color of flower, and the season of bloom. Below we give a list of these varieties,

var. alba White Scotch Heather. early blooming, light green foliage, white flowers. 3" pots 12-15" all pot-grown, which we offer as follows:

2 1/2" pots	.40 E	3.50 X	32.50 C
3" pots	.60 E	5.00 X	45.00 C

var. alba elata Tall White Heather. Late blooming, very tall, straight growth. Foliage soft dark green. White fls. 18-24"

Calluna vulgaris (cont.)

- var. alba hammondii Hammond's White Heather. Mid-season, Tall upright, growth, foliage deep rich green, flowers white. 18-24" high. 2 1/2" pot
- var. alba minor. Small leaved white Heather. Mid-season. Tall, bushy growth, foliage very fine, light green. Flowers white. 15-20" high. 3" pots
- var. alba pilosa Late blooming. tall growth, foliage soft grayish green. 18-20" high. 3" pots
- var. alba rigida. Late. Low rigid growth, of rich deep green
- var. var. alportii. Late blooming Tall, straight growth, foliage deep rich green, turning purple in autumn. Flowers rosy carmine. 24" high. 2 1/2"
- var. argentea Silver leaved Heather. mid-season. Rather dwarf growth, foliage green variegated white, flowers purple. 10-12" high. 3" pots.
- var. compacta. Late blooming. Low compact, moss-like growth of bright rich green. Purple flowers 4-6" high. 3" pots
- var. cuprea. Mid-season. Straight medium growth, foliage bright, almost yellowish green, turning to rich glowing red in autumn. Flowers purple. 12-15" high 2 1/2 and 3" pots
- var. hypnoides Late blooming. Low spreading growth, foliage soft deep green flowers deep pink. 6-12" high 3" pots
- var. rubra Early blooming Low spreading growth, foliage soft green turning purple in autumn. Flowers rosy carmine. 6-12" 2 1/2" and 3" pots.
- var. tomentosa Mid-season. Low compact growth, foliage soft gray, flowers purple. 4-6" high. 2 1/2" and 3" pots

Lonicera japonica henryi				
3" pots		.50 E	4.50 X	

Lonicera nitida Evergreen Honeysuckle

A tall growing graceful shrub, with long slender branches thickly clothed with small shiny evergreen leaves which turn rich purple in Autumn. This beautiful shrub is not quite hardy in the vicinity of Boston; but for southern New England, Long Island, New York and south and west it should prove a valuable garden hedge plant.

2 1/2" pots	.50 E	4.50 X
4" pots	1.00 E	
6" pots xx spec.	1.50 E	

Lonicera pileata

This Honeysuckle, also, is evergreen. The growth of this shrub is somewhat stiff, and spreading, the foliage 1/2 inch to 1 inch long, rather box-like, and bright shiny green. While still a small plant L. pileata is covered with small yellow flowers, which produce in early autumn beautiful transparent berries of clear light purple.

Like L. nitida this shrub does not always survive the

severe winters of this climate; but in Southern New England and South and West, it is one of the most useful and beautiful of the new shrubs, as a specimen shrub in the garden, as a shrub for rock-gardens, and as a low wide-spreading hedge.

This is one of the rarest and most beautiful of all Hawthorne. It has large white flowers in early spring. Even the young trees offered by us bear quantities of large round edible scarlet fruits in August and September, and later the substantial leaves turn a beautiful scarlet. A beautiful, small, flowering tree, suitable as a

specimen, for planting in groups on the edges of
woods - or near the sea.
