Glenwood Specialties

FOR FALL PLANTING

1920

ADVANTAGES OF FALL PLANTING

Some of the reasons why experienced planters invariably buy for fall delivery are as follows:

First—The ground is in much better condition in the fall, being warm and mellow.

Second—Before spring, stock which has been planted in the fall gets well established in its new position and so gets an early start, and makes large growth the first season, while stock planted in the spring loses considerable time in getting established in its new quarters.

Third—Stock is completely dormant in the fall, therefore can be easily and safely handled, while in the spring the weather often comes off warm so early as to start the buds before the customer can receive and plant.

Fourth—Stock planted in the fall gets the benefit of the late fall and early spring rains, which is of vital importance; while on the contrary, stock set in the spring frequently has to worry through a dry summer, which it is unprepared to do after having been so recently transplanted.

Fifth—**FRUIT IS PRODUCED THE FIRST SUMMER** when Grape Vines, Currants, Raspberries, Blackberries, Gooseberries, etc., are planted in the fall.

Sixth—**ROSE BUSHES AND SHRUBS**, set out in the fall bloom profusely the first summer.

Seventh—Many extensive and experienced planters like the late Horticultural writer, E. P. Roe, **ALWAYS PLAN TO PLANT IN THE FALL**

HONEYSWEET—Sold on Local Markets this Season at 50c per quart.
Grow Your Own! Get the Habit!

The Three Wonder Berries

Honeysweet Black Raspberry

The sensation of the fruit world. Do not fail to include in your order for Dependable Trees and Plants a few at least of the Honeysweet. The berries are just about the most delicious fruit you ever tasted. Ripens in July—sweet and delicious—unlike any other Black Raspberry.

The Honeysweet is extremely hardy, passing through the severe fruit tree killing winter of 1919-1920 without injury to a single twig on any plant in a four-acre patch. Bears every year—has never been a slacker.

LARGE SIZE — GLOSSY BLACK — DELICIOUS. THE WORLD'S GREATEST BLACK RASPBERRY.

The many clusters of big Black Raspberries literally cover the bushes. Twelve of our vigorous nursery grown plants will produce many quarts of fruit, next summer when you are hungry for berries. Twelve or more plants will fit into your garden nicely—no garden should be without Honeysweet.

As a dessert berry, in pies, as a canned sauce, as a jam, you never tasted anything like it before or since. It has been called "The most delicious Black Raspberry."

Price, \$2.50 per 6; \$4.00 per 12; \$15.00 per 50; \$25.00 per 100.

Erskine Park Raspberry

The early to late **EVERBEARING**. Delicious Raspberries on your table all summer from plants set this fall. Raspberries for **FOUR MONTHS**. That is what you get when you plant Erskine Park, the new Everbearing variety. Moreover, they are not only Raspberries, but Raspberries of the highest grade—in size, in brilliant crimson color, in firmness, in flavor. In addition to the bright crimson color of the fruit, and large size, it is so firm and rich in sugar that it will stand shipping two hundred miles, arriving at market in first-class condition. It can readily be kept in perfect condition for several days after gathering.

The merits of this truly reliable everbearing Raspberry may be summarized as follows:

1—It is the earliest of all Red Raspberries; beginning to ripen from June 15th to 20th, just as the Strawberry crop is waning.

2—It is wonderfully prolific; the first or main crop, being greater than that of any other red variety, (equalling the most prolific black-cap or purple cane variety).

3—**IT GIVES A CROP OF FRUIT ALL SUMMER AND AUTUMN**, fruiting on the old canes in generous quantities until late in August. By this date berries begin to ripen upon the young current year's canes, which continue to produce berries in increasing numbers until late autumn; in fact, until severe frosts occur.

Price—\$3.00 per 6; \$5.00 per doz.; \$30.00 per 100.

Our Trees and Plants Satisfy Others

If our trees and plants satisfy others, is it not reasonable to suppose that they will satisfy you?

Tamanend, Pa., July 8, 1920.

Glen Bros., Inc., Rochester, N. Y.

Gentlemen:—My Rose Bushes I got from you are just beautiful this spring. My neighbors are simply raving over their beauty, and all are begging me to send and get them some, so I would like the latest catalogue and price list and I will send another order for fall planting.

(Signed) MRS. C. E. GASSER.

Ashland, Wis., June 14, 1920.

Glen Bros., Inc., Rochester, N. Y.

Gentlemen:—I have ordered shrubs and nursery products from three different houses this year, but this package shipped me by you came in such excellent shape that I wish to say I believe I will never order from anyone else in the future.

(Signed) FRANK B. LEMOREAUX.

Monroe, La., Nov. 28, 1919.

Glen Bros., Inc., Rochester, N. Y.

Gentlemen:—I appreciate your mode of business most highly and want to thank you for such a bunch of healthy, large, well rooted rose bushes. They are all budding out at this time and looking fine. They are far superior to some "scrubs" I bought elsewhere. There is no comparison.

(Signed) D. M. McCRAVIE.

Order a Few for the Garden

Royal Purple

A few bushes of Royal Purple in full fruit is a sight to behold. It is enormously productive. The berries are extremely large, and will produce five thousand quarts to the acre—it is the greatest bearer of them all. Fine flavor, hardy, a strong grower, recommended by the introducer as the world's greatest money-making Raspberry. Royal Purple is truly a wonder and marks a great advance in Purple Raspberries.

Set a few plants in your garden this fall and pick quarts and quarts of this delicious fruit next summer. It continues to fruit at least two weeks after Columbian is done.

Royal Purple will stand a temperature of thirty-five to forty degrees below zero without injury, so that it may be safely planted anywhere and everywhere. No garden is complete without it and we predict that the Royal Purple will eventually be planted in every garden and on every farm in America.

Owing to our tremendous stock of beautiful two-year bearing plants, we are able to make the price low for this new variety:

Price for fall delivery only: \$3.00 per dozen; \$20.00 per hundred; \$100.00 per 1,000.

GLEN BROTHERS, Inc. Rochester, N. Y.

ESTABLISHED 1866

BLUEBERRIES

You just love Blueberries—who don't? It is now possible for you to procure from us Blueberry plants to grow in your own garden.

The Blueberry is one of the most delicious native fruits, and grown as easily as Currants or Raspberries.

Can you imagine picking delicious Blueberries from your own plants, in your own garden? But it is true nevertheless, and today hundreds and thousands of people throughout the country are doing just this.

Blueberries with cream; blueberry pie, or preserved blueberries, "Bully good," as the late Colonel Roosevelt would say.

Let us send you a few plants this fall. We offer fine, strong, nursery grown plants, dug with a ball of earth, and this extra precaution of shipping with the dirt unshaken from the roots eliminates all risk in transplanting.

Plants 2-3 feet size, \$2.50 each; \$25.00 per 12.

Plants 3-4 feet size, \$4.00 each; \$40.00 per 12.

Blueberry—Only the Cream is Lacking

Old Glory Grape Collection

Red, White and Blue

Respect for our country's flag would not permit us to give this name to any collection that was not made up of the CHOICEST AND BEST VARIETIES. They are as follows:

WYOMING RED.—Sweet. Extra early. Resembles Delaware, but double its size and ten days earlier.

GREEN MOUNTAIN.—White. A very early, delicious Grape; pulp tender and sweet, with but one or two seeds; bears young and profusely and ripens from the 25th of August to the 1st of September. The only Grape thus far tested that ranks first both in earliness and quality.

CAMPBELL'S EARLY.—Blue. Clusters large and handsome; berries large, nearly round with handsome blue bloom. Flesh rather firm but tender; quality rich, sweet, slightly vinous; a strong and vigorous grower with healthy foliage; very early. The berries do not drop easily from the cluster and the fruit keeps a long time in perfection.

Any posted man will confirm our statement that these three are unrivalled. They combine **STRONG, QUICK GROWTH, HARDINESS, PRODUCTIVENESS AND QUALITY**, and the price is so low that all can afford to have them. They require but little room—"any old fence will do"—and but little care, and bear **YOUNG**.

Price—These three for \$1.50.

Green Mountain—Hardy as an Oak

The National Joy Berry

ELDERBERRIES

The National Joy Berry

Imagine the joy of picking large, ripe, luscious Elderberries from trees growing in your own garden. Heretofore the only way one could get Elderberries was to go out in the country and gather them from trees growing wild in fence corners and along hedge-rows, but we have solved the problem for you in our **NURSERY GROWN Trees**.

Plant a few in your garden this spring. The fruit makes delicious pies and jam. Elderberry wine has been a common home product. Color of fruit is black or blackish. Height of tree is only ten to twenty feet when fully grown and may be planted close together. Fruit ripens August and September. The Elderberry tree grows in almost any soil, requires no care or attention and commences bearing abundantly almost immediately.

We offer for fall planting a limited number of extra fine, nursery grown specimens, at \$1.50 each, \$15.00 per doz. Order at once, as our stock will soon be exhausted.

Luscious Asparagus THE FIRST SEASON

Two Years Saved by Planting Four-Year
Transplanted Roots
This Fall

A great many more people would grow their own Asparagus if it were not for the two years of waiting. We eliminate this for the planter by cultivating and transplanting the roots until they are four years old, strong and healthy. Downing, no doubt the highest authority, says, "Roots of this age will produce fruit the same season planted."

"Too good to be true," you say, and yet it can be done and done easily, if you **PLANT SOME OF THESE EXTRA LARGE ROOTS**, such as we have worked over and transplanted for the last four years, purposely to give you immediate results.

We offer extra fine, four year old transplanted roots, \$1.00 per doz.; \$3.50 per 50; \$7.00 per 100.

N. B. Order early, before our supply is exhausted.

Asparagus From Your Own Bed Next Summer

Champagne Wineplant

Named because of its fine, sparkling Champagne flavor. It is the ne-plus-ultra of all Rhubarb. Surpasses all other varieties not only in flavor and delicate tenderness of its crimson stalks, but also in size. THE ACTUAL WEIGHT OF TWELVE STALKS BEING ELEVEN POUNDS AND ONE OUNCE. Those who have never tasted Champagne Rhubarb will have a real surprise.

With this variety it is possible to have Rhubarb on your table from Spring until Autumn. It will supply an abundance of appetizing sauce and pies. Few private gardens are without this healthy vegetable and none should be. Its culture is the simplest. A small space 6 x 6 ft. will grow all the Rhubarb that the average family requires or could possibly use. We have sold 100,000 Champagne Rhubarb roots without one dissenting voice.

Plant this fall and have Rhubarb pies next summer.

Price for strong two-year-old plants, 75c each, \$5.00 per doz.

Blowers Big Blackberries

As a dessert fruit, in pies, for jam and other purposes. This greatest of all Blackberries should be in every garden. It is the biggest and best money maker of all Blackberries, and following is its record:

14 ft. 1 in. extreme height of bush; 2,064 berries on bush; 2,720 quarts from $\frac{1}{4}$ acre; 30,206 qt.; 45,307 lbs.; 944 bushels; 22- $\frac{2}{3}$ tons, from one acre.

Sold at a net profit of \$2,121.75 f. o. b. here. Average per acre, \$303.10; 153 bu. of fruit netted \$344.25 from test acre.

The quality of Blowers is superb. Its sprightly, yet moderately acid taste is indicative of the VALUABLE MEDICINAL PROPERTIES without which any Blackberry is worthless. A large, clean, bright berry, the fruit is exceedingly sweet, with no perceptible core, when fully developed. Flavor is pleasant without being peculiar.

IT IS A BLACKBERRY FROM ROOT TO TIP.

It is a first-class shipper, standing up well for several days. Its size and splendid flavor have called forth the following remarks from those who have observed it:

"Was surprised to see the mammoth growth of bush and berry."

"Most splendid fruit as to size, color and quantity that ever grew on Blackberry bushes."

"Berries are large and handsome and the flavor good."

Order quick, as we have already booked orders for thousands of the plants, and our present stock is not large.

Price, strong, two year plants, \$2.00 per doz., \$15.00 per 100, \$100.00 per 1,000.

Forcing Rhubarb
—It's Fun

One Crate of 16 Quarts of Blowers From Six Plants

Pot Grown Superb Everbearing Strawberries

Pot plants may appear expensive, yet when the labor necessary to grow them into the proper condition and the time saved and the results of the crop are considered, they will be found cheaper than the ordinary layer plants.

We can supply a general assortment of both June bearing and everbearing Strawberry plants, but call your particular attention to the Superb, better known as the "June to frost" Strawberry.

A well known authority on Strawberry cultivation states: "You simply cannot keep them from fruiting from June until November unless you pick their blossoms. They are the MOST PERSISTENT plants in their fruiting habit I have ever known."

BERRIES LARGE, PERFECTLY FORMED, BEAUTIFULLY COLORED, DELICIOUSLY FLAVORED. Hardy in plant, in blossom, in fruit. Luscious berries on your table four months of the year.

RECORD.—The editor of a well known Western newspaper reports the following. One square rod planted May 1st produced July 23rd, 3 quarts; August, 24 quarts; September, 24½ quarts; October, 23 quarts. One quart of delicious berries on your table four months of the year from a patch less than twenty ft. square.

Price, strong, Pot Grown Plants, \$3.00 per doz. \$20.00 per 100.

PICKING SUPERB EVERBEARING STRAWBERRIES N.Y. STATE OCT 15, 1915

Extra—Beautiful Cut Leaf Birch—Special

Growing in our Fairport nurseries are a few hundred specimens Cut-Leaf Birch, 10 to 12 ft. in height. These are magnificent trees, and if you happen to be in the vicinity of Rochester we invite your inspection.

These trees have received the care and attention to make them very symmetrical, and each tree is a perfect specimen.

Cut-Leaf Weeping Birch is one of the most elegant of all weeping or pendulous trees. Its tall, slenderly, vigorous growth, graceful drooping habit, silvery white bark and delicately cut foliage presents a combination of attractive characteristics rarely met with in a single tree. It is very popular planted as a single tree or in groups of three or four trees, the white bark of branches and twigs gleaming conspicuously among the darker greens and browns.

While they last, we offer these trees at \$5.00 each, \$50.00 per doz.

For smaller sizes and prices see our general catalogue, page seventeen.

The Most Beautiful Lawn Tree

North
South

Plant Hardy Nut Trees East West

"The serious mistake is NOT made by the man who sets nut trees, but by the man who does NOT set them."

Set a choice selection of these hardy, vigorous, "northern grown" nut trees about your home, or elsewhere on your estate. We have the largest assortment and largest stock of hardy northern grown nut trees in America.

The English Walnuts

"Most Profitable to Grow" "Most Satisfactory to Own" "Most Delicious to Eat"

Never before has the English Walnut been so valuable to everyone as now. Our GLENWOOD GROWN English Walnut of today has been bred for its beauty as a lawn tree, as well as for the GOLDEN CROP it bears. It has likewise been bred for HEALTH, HARDINESS AND RESISTABILITY in northern climates.

The Thomson orchard, near Rochester, 228 trees, one of the largest commercial bearing orchards in northern New York, has produced in a single season 260 bushels of nuts, 32 pounds to the bushel. The present retail price of the English Walnut here in Rochester is approximately 40c per pound.

We offer acclimated, seedling trees, grown from nuts produced by the Thomson orchard, as follows:

Size, 2-3 ft.	\$1.00 each	\$10.00 per doz.	\$ 75.00 per 100
Size, 3-4 ft.	1.50 each	15.00 per doz.	100.00 per 100
Size, 4-5 ft.	3.00 each	30.00 per doz.	

Extra large English Walnuts, Superb for lawn and driveways.

For those of our customers who wish to secure earliest possible results, both in bearing age and appearance, we offer a few specimen trees that will prove exceptional values.

6-8 ft.	\$10.00 each	\$100.00 per doz.
---------	--------------	-------------------

Pure Strain Filberts The Filberts for Universal Planting

The Filbert is perfectly hardy all through the North, withstanding in our nurseries fifteen degrees below zero without winter-killing or injuring the crop. So that ironclad hardiness, rapidity of growth, earliness of bearing and great adaptability are four qualities which mean a large and extensive planting all through the East.

Mr. John Roos, 9 W. 46th St., Covington, Ky., wrote us on September 25, 1919, as follows:

"The Filberts I bought of you in 1917-1918 are bearing in great quantities this year." What these trees have done for Mr. Roos, they will do for you. We offer the following varieties:

Hazlenut, (American Filbert). Bears large quantities of sweet flavored nuts.

Kentish Cob, (English Filbert). Tree is productive of large, oblong nuts.

Cosford, (Paper shell). Highly prized European variety, nut containing a plump kernel of the richest flavor.

Price for fine nursery grown trees:

Hazlenut and Kentish Cob:			
2-3 ft.	\$.75 each	\$ 7.50 per doz.	\$ 50.00 per 100
3-4 ft.	1.00 each	10.00 per doz.	75.00 per 100
Cosford:			
2-3 ft.	1.00 each	9.00 per doz.	70.00 per 100
3-4 ft.	1.50 each	15.00 per doz.	110.00 per 100
5-6 ft.	3.00 each	30.00 per doz.	

The Black Walnuts Make that Poor Land on Your Farm Pay

One of the most valuable nut trees grown, its timber being highly prized for furniture, interior furnishings, automobiles, sewing machines, firearms, and the like. The wood is a rich dark brown, very durable, hard, strong and splits easily; takes a fine polish. In addition to its importance as a timber tree, however, the round, rough nuts furnish rich, meaty kernels which sell at high prices. A noted authority on nuts recently made the assertion that "The planting of nut trees along all the public highways would, in less than twenty years, result in a crop the food value of which would be greater than at present produced by the entire livestock industry of the country."

Absolutely hardy, growing and bearing under adverse conditions, the American Black Walnut surpasses all other varieties of nuts in point of hardiness. From Canada to the Gulf of Mexico, the Black Walnut will thrive and after the first few years requires little attention, making a rapid, sturdy growth and soon producing an addition to the owner's income without operating expense.

For roadside planting or for reforesting large areas, we have extensive plantings of these valuable trees to offer at the following attractive prices: 3-4 ft., 75c each, \$8 per dozen, \$60 per hundred; 6-8 ft., \$1.25 each, \$12 per dozen, \$90 per hundred; extra large trees, 8-10 ft., \$3 each, \$30 per dozen, \$200 per hundred.

The Butternut

One of our finest native nut trees, growing occasionally to a height of 100 feet and spreading in proportion. The wood is much valued because of the beautiful finish possible in cabinetwork. The large, elongated nuts are rich, sweet, and of delicate flavor; very nutritious. The size of the nuts can be increased by cultivation. As the present supply of cultivated Butternuts is insufficient to satisfy the demand of a single city market, there are large profits in store for planters who will exert themselves to supply this demand. The trees bear when young, and after they come into full bearing will bring large returns on the original investment. Plant largely of Butternuts. For hardiness, disease-resistance, and general all-round desirable characteristics, the Butternut has few superiors. 5-7 ft., \$1 each, \$9 per doz., \$60 per 100.

Thomson English Walnuts, Rochester Grown

Kentish Cob Filberts From Trees Growing at "Glenwood"

The Black Walnut Has a Little
Flavor All Its Own

Butternut—White Walnut

Delicious Apple (Winter)

Trees bear in four to six years. Called "The Great National Dessert Apple." Delicious is the most widely discussed and best Apple introduced in years. Fruit of the highest quality, large, of uniform size. The color is deep, dark red on the cheek next to the sun. While the shaded size is streaked with colorings of red and rich golden yellow. Fruit offered in season at the leading wholesale stores and on the menus of America's leading hotels at 25c to 40c each.

Delicious is a splendid keep and shipper. Trees bear heavy crops annually. Its season is November to February. Delicious is in a class by itself, and we say to those who desire to secure one or more trees for fall planting, order at once, as our stock is not large.

Price for strong, two year trees, \$1.25 each, \$12.00 per doz., \$90 per 100, \$850 per 1,000.

Price for strong four year trees, \$3.00 each, \$30.00 per doz., \$225.00 per 100.

Delicious—Fruit Sells at 25c to 40c Each

Napoleon Sweet Cherry

It is the leading firm, fleshy, sweet Cherry. It takes its place by virtue of its large size, handsome appearance, and high quality of the fruit and the phenomenal productiveness of the trees. In our stating it is America's finest sweet cherry, we do not believe that there will be one dissenting voice.

The fruit ripens in mid-season, averages over one inch in diameter; color varying shades of bright red over a yellow background. It is tender, meaty, crisp, mild, the flavor improving as the season advances. As a canning cherry it is unsurpassed, it always holding its color and firmness. If you desire a really fine variety for eating or canning, take our advice—plant "Napoleon."

We offer for fall planting some extra fine trees that are three to four years old. These trees will grade 7-9 ft. in height with handsome heads and extra fine roots. Until our supply is exhausted we will sell them at \$3.00 per tree, \$30 per dozen.

Large, Luscious Cherries, and Trees Are Loaded Every Year

Grand Duke Purple Plum

LARGE JUICY PLUMS—2½ x 2 INCHES IN SIZE

It is the most desirable purple plum we know of. "The Plums of New York," by V. P. Hedrick, describe it as follows: "Fruit large, cavity shallow, color dark reddish purple or purplish black, overspread with thick bloom; stems ¾ in. long, adhering well to the fruit; flesh golden yellow, firm, sweet, mild; stones clinging, sometimes tinged red."

For those who desire something really fancy and an exceptionally heavy and regular crop, Grand Duke fills the bill.

Could anything be more desirable than to have one of these trees in your garden loaded with delicious fruit. We offer a limited quantity of this variety in splendid 2-year trees at \$2.50 each, \$25 per dozen; 4-year trees, 7-9 feet in height, \$4.00 each, \$40.00 per 12. Order early, as our supply will undoubtedly soon be exhausted.

Immense in Size—
Delicious in Flavor

New Rochester Peach

The earliest bearing—the earliest fruit.

Produces fruit the first year planted—fruits at Rochester in August.

Mr. C. N. Thomas, 215 W. 40th St., Savannah, Ga., writes us under date of July 23rd last, as follows: "February of this year I bought a Rochester Peach tree from you. On July 20th, same year, I picked one of the finest peaches I ever tasted. The stone was very small and clean. The meat was light yellow, perfectly ripe all the way through. Can you beat this?"

Rochester is unquestionably one of the most desirable peaches yet discovered. Due to the fact that it comes into bearing early and produces its fruit earlier than any other Peach, the fruit ripening here in August, while according to Mr. Thomas' letter, ripens in Georgia in July.

Tree is a strong, up-right grower, of iron-clad hardiness, has stood 16 degrees below zero and produced a full crop, while Elberta and Crawford, under the same conditions, in the same orchard, produced no blossoms, consequently no fruit.

Mr. Yarker, of Greece, N. Y., who has an orchard of 500 Rochester trees, has picked as many as 17 perfect peaches from one tree, year after planting. Mr. Rudman, of Irondequoit, N. Y., who has an orchard of 3,500 Rochester Peach trees, has picked 27 Peaches from a tree of the same age as that of Mr. Yarker. It is seldom known to fruit growers for young trees planted a little over a year to bear fruit.

We offer splendid, well developed trees, with plenty of root power, \$1.00 each, \$10.00 a dozen, \$75.00 a hundred. Extra large, \$1.50 each, \$15.00 per dozen.

Rochester Peach Bears Second Year

Planted About the House Foundation

The Evergreen Bittersweet

Climbing Euonymus Radicans Vegetus Beautiful 365 Days of the Year.

Particularly adapted to cover garden walls, old stumps or embankments with any exposure, but the fruiting is best when the plants receive the warm sun; the plants are strong, robust climbers and in fall and winter bear a profusion of bright red berries. The vine is covered the whole year with green foliage, and absolutely holds the color even in hottest summer or coldest winter. The plant shown in the illustration is about four ft. high, and has been cut back to the height of the foundation a number of times. The picture was taken in March last year, and at this time the vines showed many clusters of bright red berries that had been carried through the winter.

Price for good, strong plants, \$2.50 each; \$25.00 per doz.

Thousand Beauties in Pot

Thousand Beauties

THE WONDER ROSE

THIS BEAUTIFUL NOVELTY SURPASSES ALL OTHER CLIMBING ROSES, IN GROWTH, FOLIAGE AND BEAUTY OF FLOWER.

The flowers are borne in large clusters from June to August. Each flower measures about one and one-half inches in diameter, and is of a beautiful, soft rose-color, changing to rosy-carmine. The plant is of strong, vigorous growth, perfectly hardy, and a good variety to plant where a strong climber is desired. This rose is nearly thornless. The shining dark green foliage is never attacked by disease or insects. A first-class rose for covering fences, walls, verandas, etc.

Imagine a luxurious climbing rose literally covered with thousands of bright blossoms, borne in clusters and quite double. Colors of every imaginable shade from white to deep pink.

Price for strong, two-year plants, \$1.00 each; \$10.00 per doz.

Liberty Iris. Supremely Beautiful

Two Great Liberty Iris

LORELEY and OSSIAN

The tall sword-like leaves are interesting in themselves until the gorgeous flowers with their unusual forms and beautiful variations and numerous shades of color make their appearance in May, when the leaves are completely over-shadowed by the splendor of the blossoms. In Loreley and Ossian we offer two of the finest varieties in our estimation yet disseminated.

DESCRIPTION

LORELEY—Perfect shaped flowers, the falls of a deep ultra-marine blue, more or less veined with creamy-white, sulphur-yellow border. The standards are of a deep sulphur yellow, making a pleasing contrast.

OSSIAN—Standards light yellow, falls bronze at base, shading to purple at tip. Very distinct.

We offer good strong clumps of each:

\$1.00 per 3, \$2.50 per 12, \$25.00 per 100.

No order accepted for less than three plants.

The Favorite at "Glenwood"

JULIET ROSES

JULIET—Old gold and rosy red. One of the most beautiful Roses.

When this catalogue was about to go to press our nursery superintendent happened into the office with a few blossoms of Juliet, and while this space had been reserved for another variety, we immediately concluded to devote it to Juliet, in spite of the fact that we have but a few hundred blooming plants to offer.

Juliet is a magnificent Rose, and we are so enthusiastic about it that any purchaser of this variety who feels dissatisfied with it after it has blossomed next summer, may have the return of his money. We will not, however, under any consideration, supply more than one plant to a customer.

We describe it as follows: Buds coral-red shaded with yellow at the base. The open flowers are of large size, very double, and are of superb coral-red, shaded with the most beautiful sulphur-yellow about one-half the length of each petal. It is truly a wonderful Rose, and as stated your money will be cheerfully refunded if you are not entirely satisfied. This is the first time that such an offer has ever been made on any variety offered by us and is conclusive evidence that we have every confidence in its pleasing you.

Price for strong, two-year-old blooming plants, while the supply lasts, \$2.00 each.

The Gorgeous Herbaceous

PAEONIA

Noblest and Most Beautiful of Hardy Flowers
Rivals the Rose in Beauty, Form and Exquisite Coloring

Below we offer a collection of Paeonies the varieties of which are among America's finest.

No longer is this beautiful flower, equalling the Rose in brilliant color and perfection of bloom, neglected. It has risen in public demand until it now has first place, and deservedly so.

We offer this collection of twelve choice varieties for \$7.00, or single varieties 50c each except as noted.

BERLIOZ—Bright currant-red. Large, compact, globular; strong growth; medium height. Late mid-season.

RUBRA SUPERBA—Deep carmine-crimson. Large, fragrant, rose type; medium height. Very late. 75c each.

MME. DE VERNEVILLE—Pure white, center tipped with carmine. Very large, full bomb shape; very fragrant. Early.

FESTIVA MAXIMA—Pure white flecked with carmine. Very large, rose type. Free flowering, fragrant. Medium early. 75c each.

CANARI—Yellowish; globular bomb type of medium size; fragrant; late. 75c each.

DUC DE WELLINGTON—White with sulphur center; large, bomb type; very free bloomer; very fragrant; late.

LOUIS VANHOUTTE—Dark red; medium-sized, semi-double type; fragrant; late.

EDULIS SUPERBA—Bright mauve-pink; large, rather flat, crown type; strong up-right grower, free bloomer; fragrant; early.

MME. CALOT—Pale hydrangea-pink, center shaded darker; large, rose type; free flowering; fragrant; early. Very good.

PHILOMELE—Yellow, fading to cream, with bright pink collar and crown; medium size; low flat crown; medium height; strong growth; fragrant. Mid-season. 75c each.

JEANNE D'ARC—Guards and center pale lilac-rose, collar cream white, retaining a rich yellow if opened indoors. Medium to large, crown shape; fragrant; strong grower, free bloomer. Early mid-season. One of the choicest of older varieties. Peach blossom pink and cream; reminds one of peaches and cream. \$1.00 each.

EUGENE VERDIER—Very large, compact, typical rose type. Pale hydrangea-pink; fragrant, very erect, rather dwarf habit, with extra strong stems; free bloomer, late. \$1.50 each.

Plant Paeonias This Fall

Cut the Blooms Next Summer

Plant This Fall

An Ideal Hedge, Barberry Thunbergii

JAPANESE BARBERRY

One of the most ornamental and valuable new shrubs; remarkable for its dense spreading growth, its hardiness and attractive appearance throughout the year. One of the earliest to start in the spring; before most other plants have awakened from their winter sleep it is covered with the greenness of its dainty little leaves and a few weeks later with myriads of small pale yellow flowers, followed by an abundant crop of fruit, ripening into scarlet berries which remain to make the bush a conspicuous and attractive object all winter. The brilliant autumn coloring of the leaves, which assume the brightest shades of orange, scarlet, and crimson, is not the least of the attractions of this interesting bush. It is one of the best plants for shrubbery borders, for edging and for hedges. By trimming it can be kept of any size or shape desired, or if allowed to grow without interruption it will make a defensive hedge four or five ft. high, and six or eight ft. broad. Its thorns though not long are very sharp, and severe enough to bar all but the most determined intruders. Set one foot apart.

Prices	12-18 in. plants,	\$3.00 per doz.,	\$20.00 per 100.

Barberry Thunbergii—The Most Beautiful Hedge—Never Winter-Kills

Christmas Rose

It is with real pleasure that we have to offer this coming fall a large supply of extra fine Christmas Roses, each plant carefully grown, and a specimen. Few people realize the beauty and real pleasure that a bed of these hardy little plants will give, when, after a few mild days in December and January, the buds will burst forth into rich, creamy white flowers, two to three inches across. They are the only flower at this season, yielding with the utmost freedom, both for effect and for cut flowers.

The Christmas Rose makes a particularly rich setting against Evergreens, and the cheer of seeing a smother of magnificent white blossoms during the dreary months repays the planter well.

This variety succeeds in any ordinary garden soil, but for best results, use a soil of rich loam and coarse sand, with top dressing of compost. A partially shaded situation is preferable, which adapts them to shrubbery border, but for cut flowers, large beds may be planted, the only precaution being not to disturb the plants when once established.

Fine, heavy two-year-old plants, \$1.00 each; \$10.00 doz.

Blooms Under the Snow

Fancy Trees for Quicker Results

Plant Larger Fruit Trees

APPLES PEARS PLUMS

Not as small as the smallest nor as large as the largest, but trees of a size and age that will insure the planter fairly quick results.

For those who prefer larger trees, we are offering a limited quantity of well shaped, carefully grown fruit trees, 4 years old, 7-9 feet in height, with splendid symmetrical tops and unusually fine root systems.

The picture at the side shows one of these plum trees dug at random. No handsomer trees could possibly be produced and we know that you will be well pleased with any purchased. To insure the best results the trees should be planted in the fall.

APPLES

Autumn
Oldenburg.
Winter
Baldwin.
Northern Spy.
R. I. Greening.
Rome Beauty.
Stayman's Winesap.

PLUMS

Early
Abundance, cherry red.
Lombard, violet red.

Late
Shrop. Damson, blue.
Bradshaw, violet.
Burbank, cherry red.
October Purple.

PEARS

Summer
Bartlett.
Clapp's Favorite.
Autumn
Duchess.
Sheldon.
Seckel.
Winter
Anjou.
Kieffer.
Lincoln Coreless.

Price—\$3.00 each, \$30.00 per dozen; special prices on larger quantities.

Dwarf Fruit Tree Collection

Six choice varieties, three of apple and three of pear—just enough trees for a small yard and enough variety for everyone in the family. Dwarf trees are distinctly for the amateur and the home plantation. They enable you to have varieties which cannot be found commercially, and to secure an assortment which will give fruit in succession for an extended season. You may have your own apples and pears from July to June, or in almost continued succession for twelve months of the year.

The varieties that we have selected for this collection are unsurpassed; some of them will bear fruit next season.

1 Red Astrachan Apple,	Season for Table Use,	August.
1 Wealthy Apple,	" " " "	October, November.
1 Winesap Apple,	" " " "	January to June.
1 Koonce Pear,	" " " "	July.
1 Bartlett Pear,	" " " "	September.
1 Anjou Pear,	" " " "	October to January.

The trees for this collection are carefully selected. It is our aim to supply only trees that are thrifty, well branched and rooted and we have made the price within the reach of all.

Our price is only \$5.00 for this collection.

Golden Queen—A Treat

A Rich Golden Yellow Raspberry

Treat yourself to this: Pour some rich, golden cream on a dish of rich, golden Raspberries, add a little sugar—Ye Gods! it's great!

Golden Queen should be in every garden. One customer writes that he did not know what Raspberries were until he had tasted them. The flavor is of the highest quality, and in size is equal to the Cuthbert. A very strong grower, and hardy enough for the entire northern latitudes.

We offer strong, two-year-old plants only.

12 plants for \$1.50; 100 plants for \$10.00.

975 E. 93rd St., Brooklyn, N. Y., July 28, 1920.

Messrs. Glen Bros., Rochester, N. Y.

Gentlemen:—The berry bushes ordered from you in April and delivered to me in May were planted immediately as advised. Every one of them survived transportation; every one bloomed, and every one is now bearing fruit large and delicious.

I really can't tell which I like the best, "Erskine Park" or the "Golden Queen." Both good. Had the first taste Sunday for dessert. I am more than pleased.

Thanking you for the selection you sent me, I beg to remain,

Yours truly,
(Signed) MRS. L. BEECKNER.
