BASIS OF THE SIZES AND CALIPER MEASUREMENTS FOR TREES

On all deciduous fruit trees, except Almonds and Figs, the caliper and height combined determine the grade of the tree.

Not less than 1 inch represents 8 to 10 ft. trees.

Not less than $\frac{3}{4}$ inch represents 6 to 8 ft. trees.

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

Almonds and Figs are inclined to grow stocky, and the caliper measurements will govern the grade regardless of the height of the tree.

ALMONDS

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

FIGS

Not less than $\frac{5}{8}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{1}{2}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{3}{8}$ inch represents 2 to 3 ft. trees.

Stocks mentioned in this list will be furnished as follows: 5 of a variety at the 10 rate; 50 at the 100 rate; 300 at the 1000 rate.
