ELLERY BAKER, Manager

POMFRET CENTRE, CONN.

USE TELEPHONES UNDER THEIR NAMES

INTRODUCTION

The name "Hiti" signifies high elevation, which gives a longer season, free from early frost and injury to late growth.

This catalog contains only a list of plants grown at Hiti Nursery, *but stock of all kinds is furnished. Prospective buyers are invited to call at or write to the Boston office and discuss their wants. Mr. Ellery Baker will attend to all direct Nursery customers, as heretofore.*

The Nursery, on Dana Road, is about a mile by road from Pomfret Station of the N. Y., N. H. & H. R. R., or a short ten-minute walk up the railroad track. Visitors to the Nursery between April 1st and November 1st will find some one at hand during business hours to show the stock and take orders. Large specimen trees can be seen on property near by, showing the beauties of their older growth.

In these days of automobile travel customers find it easy to visit Pomfret and *select their plants personally.* In this way they see for the first time perhaps some handsome new things that are just what are wanted for certain effects or uses.

The nursery is closed during the winter months, though of course it is open to inspection at any time. There is no glass on the premises, consequently no winter attendant. The whole area embraces only about eight or ten acres, on which are two small buildings used as tool and packing houses. *All plants are thus taken up near at hand and can be quickly packed without loss of time or injury from root exposure, a very great advantage to purchasers. The roots are packed in fresh sphagnum moss, which is a great benefit and safeguard if delayed in transit.*

Large sized stock in quantity can be delivered economically by auto as far as Boston to arrive in perfect condition.

Regular shipments by express or freight carefully put up and f. o. b. at cost of packing.

Terms cash, unless otherwise agreed upon.

JAMES H. BOWDITCH, Proprietor,
903 Tremont Building, Boston, Mass.

EVERGREENS.

		Each
10	<i>Abies Arizonica argentea</i> , 3 to 4 ft.....	\$10.00
45	“ “ “ 18 to 24 in.....	5.00

Some rare varieties of stock not listed, to be
priced on personal examination.

CONCLUSION.

It is sometimes asked why we do not publish a full descriptive Catalogue. Our reply is that the Nursery is small; intended mainly to supply the immediate needs of the proprietor and his personal customers, and we find that there are comparatively few people, as purchasers, who do not know or cannot find out what the list offers through the ordinary botanic names, and we are willing always to explain further to those who are in doubt about anything.

Among our regular customers are included today house architects, engineers, and nurserymen who desire prompt attention, choice stock, and the most careful handling and packing: i.e., reliable service.
