BULBS and PLANTS

for FALL
PLANTING

HOLM & OLSON, Inc.
SAINT PAUL, MINNESOTA

FEWER VARIETIES OF BULBS IMPORTED

The Federal Horticultural Board has placed an embargo on many varieties of bulbs which we formerly listed, and which are not propagated in this country. For this reason we are unable to offer Scillas, Ranunculus, Ixias, Bulb Iris, and many others.

We are making every effort to get the bulbs early so that our customers will get the benefit of early planting. It has been a difficult situation the past few years on account of the war conditions, and last year the long shoreman's strike in New York caused a long delay.

We have kept prices as low as possible for the best grade of bulbs. The cost of the bulbs in Holland has doubled and trebled in some instances. Ocean transportation as well has added to the cost.

The bulbs we offer are of the highest quality, sound and well ripened, all of which is necessary to produce the best flowers.

Order early. By doing so you insure your order being filled. It is impossible to anticipate the demand for all varieties which sometimes results in our being sold out long before the end of the season.

We will not send out inferior stock as a substitute. Our purpose is to give you exactly what you order and expect, and by ordering early you not only make it easier for us to serve you, but insure against disappointment.

TIME TO PLANT

Spring Flowering Bulbs Must Be Planted In the Fall

Every season we get orders during the winter for these bulbs to be shipped in spring, so remember we cannot supply bulbs after November 15th; all bulbs not sold by that date are sent to our greenhouses and planted for forcing. **Order at once**, so bulbs can be shipped as soon as they arrive, and plant in October.

PLANT PERENNIALS EARLY

Order your perennials early that they may make new roots this fall. Any time after August 15th we will be able to supply the plants of most all varieties and they are better planted in August and September than later. Our stock is heavy and the best plants we have ever grown, they are "H. & O." Standard of Quality.

Prices of Nursery Material. We endeavor to keep our prices on trees, evergreens, shrubs and vines as reasonable as we possibly can and still maintain the standard high quality of stock our customers have learned to expect. With every over-head expense increased, and the principal item in the production of nursery material being **labor**, we find it necessary to make a small advance over last season's prices to cover same, and we advise all our patrons to write for quotations on material they require, as our new catalog will not be ready until after January 1st.

BEAUTIFYING YOUR GROUNDS

Our Landscape Service covers the entire Northwest. We do not employ any agents, but we will be pleased to lend the "Service" of Landscape Architects in advising how to treat and beautify property. We will plan and design your grounds, furnish the material grown in our own Nurseries (that you may know is hardy) and if you desire, furnish a practical Landscape Gardener to superintend the planting, in other words —taking the entire responsibility. No other firm in the Northwest can offer you this complete "Service."

COLLECTIONS FOR TULIP-BEDS

The arrangement of the following beds will give very striking results. The beds are 6 feet in diameter and require 156 bulbs, planted 5 inches apart each way. These combinations can be changed, if desired.

Bed A		Bed B		Bed C	
1. 39 Artus	} \$8.50	1. 54 Chrysolora	} \$8.00	1. 80 Chrysolora	} \$8.00
2. 39 La Reine		2. 48 Artus		2. 76 Artus	
3. 39 Chrysolora		3. 54 La Reine			
4. 39 Cottage Maid					

These collections must be sent by express or freight, charges not prepaid.

Enchantress Grande Blanche La Grandesse Lady Derby

QUALITY HYACINTHS

Culture Outdoors. Plant the bulbs 6 inches deep, very uniformly, that they may come into bloom at the same time. A good method is to remove about 4 inches of the soil, level the bed carefully and plant the bulbs 6 inches apart each way, pressing the earth firmly and evenly over the bulbs.

Culture in Glasses. Special glasses are manufactured for the culture of Hyacinths, the bulb fitting in the top. These glasses should be filled with fresh water, also some gravel, and if at hand, some charcoal.

Culture in Pots. Hyacinths are grown successfully by planting in pots. Use good, rich soil, with plenty of manure. Place some pieces of broken pots in the bottom for drainage, and use 4- or 5-inch pots.

Firm the bulb well in the soil, allowing the top of it to stand just a little above the soil. They should then be placed in a cool, dark place for a period of six to eight weeks in order to develop the roots.

EXTRA LARGE DUTCH HYACINTHS

First-size bulbs, mixed.....	1.75	14.00
Second-size bulbs, mixed.....	1.25	8.00

FREESIA PURITY

These dainty, spicy, sweet scented blossoms can easily be had in bloom at Christmas if planted early. They are only suited for pot culture as they are not hardy. Plant a number of bulbs to the pot and keep in a cool place such as a vegetable cellar until the roots show through the soil when tipped out of pot. After bringing into light they should be kept in as low a temperature as possible to get best results. Giant bulbs, 60 cts. per doz; \$4.00 per 100. Large bulbs, 40 cts. per doz.; \$3.00 per 100.

Flamingo Tulips

SELECTED EARLY TULIPS

The length of the flower-stem is indicated by figures; the time of blooming by letters (E. early; L. late), so that you can select varieties of the same height and time of blooming.

Culture Outdoors. Any good garden soil, prepared by spading to a depth of 12 inches, is suitable. Plant the bulbs 5 inches apart and about 4 inches deep. The soil must be equally placed over the bulbs, so they will come up at the same time. Firm the earth well about the bulbs and mulch the beds during the winter.

Culture in Pots. Place six to eight bulbs in a 6-inch pot; set in a cool, dark place for a period of six to eight weeks. If you have a number of pots, take them from the dark room at intervals, so they bloom at different times.

Darwin Tulips, Madame Krelage

DARWIN TULIPS

A distinct type of Single Late Tulips, with immense bowl-shaped flowers of well-rounded form, growing on tall, thick stems from 2 to 3 feet in height. The very brilliant colors ranging from almost pure white through all the shades of pink and purple to a most intense red, together with the long stems, make them unsurpassed for cutting.

This type is admirably suited for planting in borders of shrubs and perennials. The blooms give life and color to any garden. The varieties offered are the best of the type, selected from a large list, and give all the different colorings.

Madame Krelage. 28 L. Soft rosy pink; extra.....	1.00	7.00			

DOUBLE TULIPS

The Double Tulips are used for both bedding and forcing. Their large peony-like blossoms are highly ornamental, coming into bloom a little later than the single sorts, and lasting considerably longer in flower. They make their best display when planted in groups and beds, but are not so highly colored as the single sorts.

CHINESE SACRED LILY

The bulbs grow nicely in pots of soil, but the quickest way to get them into bloom is to set them in a bowl of water with a few pebbles to hold them in place. Each bulb sends up from five to ten flower-stems, producing great clusters of large, pure white, wax-like blossoms with yellow centers and delicious fragrance. Some blooms are single, others double but all equally beautiful. Our bulbs come direct to us from China.

	Each	Doz.
Extra size bulbs.....	\$0.25	\$2.50

Add 20 cts. per dozen for postage, if wanted by mail.

HYACINTH GLASSES

Glasses for growing a single Hyacinth bulb, in clear or colored glass, 50 cts. each; by parcel post 60 cts.

Bulb Fiber

The growing of bulbs indoors gives one much pleasure during the winter months and, best of all, gives you blossoms that will remain for a long season, or that can be cut for any purpose. When growing bulbs in this manner it is wise to give them the best condition that can be made for their growth so that they will produce the best possible flowers. **Bulb Fiber** is the material that does the work; it is clean, odorless, holds moisture, and contains plant-food such as the bulbs need. Quart, 20 cts.; 4 qts., 70 cts., pk., \$1.25.

SELECTED CROCUS

Our selection is the best; the extra-large, well-selected bulbs will produce large flowers of all shades of white, yellow, and blue.

No. 187 . (¾-size). Suitable for bulbs. Prices same.

Chinese Sacred Lily

Emperor and Empress

SELECTED NARCISSI (The Spring Daffodil)

The Narcissi are among spring's earliest flowers, and there is no reason why we should not partake of the pleasures they bring with the first warm days of spring. The Narcissi grow in almost any location, doing well in sunny or shady places, and it matters not if wet or dry. They continue to bloom year after year, increasing in size and effectiveness. They are valuable to place in the border or perennials or shrubbery, where they can be left undisturbed, and for naturalizing in the grass. For forcing, treat the same as tulips, planting them in pots. The flowers assume many forms, and present charming combinations of white, gold, orange, sulphur, and pure yellow.

DOUBLE NARCISSI

	Each	Doz.	100		Each	Doz.	100

Add 10 cts. per dozen for postage.

JONQUILS

A species of Narcissi, with fragrant, bright yellow flowers, which are borne in great abundance. Suitable for house and garden culture. Requires the same treatment as Narcissi. Perfectly hardy.

	Each	Doz.	100
Jonquil, Single. Yellow.	\$0.07	\$0.60	\$4.00
Jonquil, Double. Yellow.	.07	.60	4.00

Add 10 cts. per dozen for postage.

The charm of the old-fashioned garden can be created only by the use of hardy perennials

HARDY PERENNIALS

Usually fall is a good season for setting out these plants, but they should be mulched and planted early rather than late in the season. September is the best season.

Prices: 1-yr., 30 cts. each, \$3.00 per doz.; 2-yrs., strong, 40 cts., \$4.00 per doz., except where noted. Plants priced 35 cts. each, \$3.50 per doz.; 40 cts. each, \$4.00 per doz., 50 cts. each, \$5.00 per doz.

NOTE. While we grow the very finest Perennials, and agree to deliver them in good condition, they are sold with the understanding that should any fail to grow it is the purchaser's loss. Owing to the low prices at which they are sold, we cannot guarantee them to grow, and all orders are accepted on these conditions.

The home-like appearance given by a well-balanced planting

Our Nursery and Landscape Service

For Your Convenience.—The Park Nurseries are easily accessible from St. Paul or Minneapolis and you are invited to inspect our grounds and see the quality of material we grow. From down-town St. Paul use the St. Clair-Hope car direct to the nursery entrance. Coming from Minneapolis transfer to Snelling-E. Seventh (cross-town line) and to St. Clair-Hope cars. If motoring, drive south on Lexington Avenue to St. Clair. Stock selected at the nurseries will be properly tagged and delivered to you at the next planting season.

For Your Use. We grow specimen trees, evergreens and shrubs of the highest quality and in the largest collection of varieties to be found in the Northwest. We pride ourselves on the "H. & O. Quality" of our stock—stock that is **hardy** and that will grow in Minnesota. You can get your selection in any size from the smallest plant to the larger specimens that will give "Results without waiting."

For Your Service. "Our Landscape Department" will advise you just what and where to plant. Our "Landscape Service" is complete—making preliminary plans, then blueprints and estimates, later supplying all necessary nursery stock, doing the actual planting where desired and guaranteeing you satisfaction with the results. Our experience and proven ability are at your service. Patrons living outside the twin cities who contemplate landscape improvements can have their work given prompt and individual attention. Either a personal call by one of our landscape architects can be arranged for or on the more simple plantings practical advice can be given from our office. Inquiries regarding our "Landscape Service" are solicited.
