INSTRUCTIONS TO SALESMEN

1. Before sending in orders be sure that each order is dated and properly filled out. Be sure to name the varieties of each class of stock sold, writing the names plainly on the back of the order.

2. Please be careful to give the street and number of customer, if in the city. If in the country, don't fail to give the post office address and rural route number and also the location of customer, whether north, south, east or west and number of miles from delivery point.

3. Remember that we pay the freight and make no extra charges for packing or boxing.

4. SPECIAL NOTICE. In this price list we have cut out all undesirable varieties, listing those suitable and best for the territory in which you live.

5. Sell only varieties listed in PRICE LIST, unless other varieties are requested by customer, in which case we will try to obtain them.

ORNAMENTAL TREES

Young Smooth Stock. Not rough and overgrown.

All first class in size and quality.

Note 1—The size mentioned after each variety is that considered as proper for first class trees, suitable for transplanting. The size varies according to the habit of growth of varieties mentioned, as some trees when fully grown are smaller than others of the same age, but equally as good.

Note 2—To avoid a misunderstanding in regard to sizes: the 6-8 ft. size takes in trees 6 feet high and over, but **does not** include any 8 foot trees; the 8-10 foot size includes trees 8 feet and over, but does not include any 10 foot trees. For instance, if an 8 foot tree is desired, an 8-10 ft. tree must be ordered.

Note 3—Trees suitable for street planting are marked (S), and those suitable for lawns are marked (L). Those that can be used for either are marked (S&L)

ROSES

In this list we include only such sorts as we know will give BEST RESULTS to the customer.

Our Roses are STRONG, two year old plants, grown out of doors, well rooted, hardy and first class. EVERY PLANT HAS BLOSSOMED BEFORE IT IS SENT OUT, and hence is more valuable than plants sent out by mail, or those offered at cheap prices, which are mere tender shoots, started in a greenhouse, and without strength enough to withstand the shock of transplanting.

Except where budding will make a stronger plant, our Roses are grown on their own roots.
