J. STECKLER SEED CO., Ltd.

Incorporated April, 1896.

LARGEST SEED HOUSE IN THE SOUTH.

Store and Office, Nos. 512 to 516 Gravier Street
NEW ORLEANS, LA.

Phone Main 428.

THE HOUSE OF QUALITY.

P. O. Drawer 170.

Cable Address: Steckler, New Orleans.
Use Western Union and A B C 4th and 5th Edition Codes.

PLANTERS' AND GARDENERS' PRICE LIST.

WE DO NOT CHARGE FOR BAGS OR BOXES,

SEEDS POSTPAID BY MAIL.

Please bear in mind that prices quoted in the following list include prepayment of postage on all seeds ordered by packet, ounce, quarter-pound, pound and five pounds.

If ordered to be sent by express or freight, deduct 10 cents per lb. from mail prices quoted.

Larger quantities than pounds or pints will be sent by express or freight at purchaser's expense. Postage on Flowering and Vegetable Plants, add 20% of their value.

Our system of conducting business is to give satisfaction to our customers, which we always guarantee.

All C. O. D. orders must be accompanied by at least half the amount.

Our terms—Cash or satisfactory reference. Orders from unknown parties whose financial rating is not recorded, must be accompanied by a draft on New Orleans, Express or Post Office Money Order. Where neither of the above can be obtained, send remittance in United States postage stamps. Stamps must be in good order, and placed so they will not stick together. No Plants or Live Stock sent C. O. D. by Express.

When ordering write your name plainly, give correct P. O. address if by mail, if by express give your express office or nearest express, to avoid any delay; also if by rail or boat give station or landing and if possible the name of railroad or name of boat. Where no

instructions are given as to how shipment should be made, we will use our own discretion, but we urge all customers to state plainly whether they want goods mailed, expressed, or shipped by boat or by rail. As all shipments by boat must be prepaid, customers not known to us must remit enough to cover freight.

Non-Warranty Note — There are so many contingencies to be encountered in growing plants from seed and in setting out plants that are dependent on the weather and other conditions over which we have no control, that success in planting is not altogether dependent on the seed or plant. We will send out only seed which we believe will grow and produce the kind of plant and variety represented.

This Company gives no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out, and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

In comparing our prices with others, compare quality first, which is of prime importance in seed selection.

THESE PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE.

STECKLER'S FALL SPECIAL COLLECTION.

CABBAGE

Chinese Cabbage.

Frotscher's Superior Large Late Flat Dutch Cabbage.

Plant during June, July and August.

Serious loss is frequently suffered by our gardeners in the South because their Cabbage plants, which have been planted in the Fall, with the expectation of harvesting a crop of heads in the early Spring, run to seed instead of producing the heads which the gardener feels that he has a right to expect. Under such conditions, it is quite natural for the gardener to feel that the seed purchased is at fault, and that he has suffered loss because his seed was not what he had a right to expect, but a little better understanding of the subject will show that this trouble is due to conditions quite beyond the power of seedsmen to control.

Cabbage is biennial, requiring two periods of growth to produce seed. The conditions required are: First, a period of growth in the plant; second, a dormant period or resting stage.

Nature frequently provides all the conditions for the gardener in our Southern States. Cabbage planted in the Fall secures the first period of growth, then Winter comes, cold spells which stop the growth and provide the resting stage, then comes warm weather again which starts the growth and causes the Cabbage to shoot to seed.

To prevent this, we have found it necessary to keep the young plants growing steadily from the start, as a check in the growth is injurious. Soil cannot be too rich. 5 ounces of seed per acre.

It is pretty hard to say which is the best Cabbage among the varieties that we handle as we consider all of the Early Flat and Late Flat Heads leaders; however, Frotscher's Large Late Flat Dutch, Steckler's New Money Making and Stein's have the lead.

Young plants should be sprayed with Corona Arsenate of Lead when ten days old. Use 3 pounds to 100 gallons of water.

Steckler's Volga Cabbage.

Stein's Early Flat Dutch.

Consult **VOORHEE'S BOOK ON FERTILIZERS.** It Treats on Everything. We Sell It, \$3.25 Postpaid.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

Charleston Wakefield Cabbage.

We want to advise our many customers of the superiority of our Cabbage seed. They are all grown in New York State with exception of a few varieties, such as Danish Ball Head and Copenhagen, which are imported seed. All of our Cabbage seed is the very best strain to be had.

CAULIFLOWER.

Large Algiers Cauliflower.

Varieties and Price List of Cauliflower.

Planted June and July for fall maturing. Cauliflower is now one of the principal vegetables and is adaptable to thrive in nearly every kind of soil; this has been demonstrated by our Experimental Station at Baton Rouge. The secret in growing Cauliflower is to keep the plants growing from the start; a check in the growth is injurious. Your soil must be well prepared and rich. The Danish Snowball, Early Dwarf Erfurt and Algiers leads; however, Le Normands, Early and Late Italian does very well. 5 ounces per acre. Use Corona Arsenate of Lead for insecticide.

	Postpaid			
	Pkt.	Oz.	¼ Lb.	Lb.

ONION SEEDS

Frotscher's Louisiana Red Creole.

All indications point to the fact that the supply of Onion Seed will be very limited this year and we urge upon you the necessity of promptly placing your orders for your requirements.

Culture.—The ground should be thoroughly worked and fertilized. If planted from September to October 10th, it will not be so susceptible in growing to seed. 3 pounds per acre. Red Creole, Red Bermuda, Yellow Bermuda and Crystal Wax are the favorites in our Southern States. However, the other varieties are extensively planted in other localities.

White Star Potato.

POTATOES.

On account of the scarceness of Irish Potatoes we must emphasize the importance of placing your orders early, from present indication the demand will exceed the supply.

The fall planting potatoes are a selection of our Spring Louisiana Grown, only the selected, well matured specimens are kept, the small sizes (number two) or smaller, they are then stored in the cold storage, the change from very cold temperature in storage to ground heat, will cause them to sprout promptly and a uniform stand is almost assured, proper planting season is during August and September, three barrels per acre planted whole.

	Not Prepaid—		
	15 Lbs.	60 Lbs.	150 Lbs. Sack.

	Packet.	Oz.	$\frac{1}{4}$ Lb.	Lb.
Roquette	.05 and .10	.25	.75	2.50

RADISHES.

Scarlet $\frac{1}{2}$ Long French. Chinese Rose. Brightest Scarlet Black Spanish Winter.
or $\frac{3}{4}$ Long.

CULTURE.—For best results radishes require a rich, loose, moist soil, so they can be grown quickly. The crisp, tender flesh of early radishes depends almost entirely on rapid growth. Successive plantings should be made every 10 days or two weeks to keep up a continuous supply of crisp and tender radishes. For early use plant the round radishes and olive shaped. For later use plant the long and half-long varieties, as they root much deeper and better resist heat and drought. What are known as winter radishes should be sown in August and September. All radishes should be sown thinly in drills one foot apart, seed covered $\frac{1}{2}$ inch and kept clear of grass and weeds. Sow one ounce of seed to 100 feet of row. Our radish seed is of the very best, being grown from carefully selected and transplanted roots. 8 pounds per acre. Radishes are very easy to grow.

Planted from July to November. A vegetable which ought to be more cultivated than it is. It is prepared in different ways and partakes of the flavor of Oysters. Cultivated like Carrot; requires rich soil. 8 pounds per acre.

	Postpaid			
	Packet.	Oz.	¼ Lb.	Lb.
Sandwich Island Mammoth	.05 and .10	.25	.90	3.00

White Shallots.

Steckler's Fullbasket Spinach.

WHITE SHALLOTS.

From reliable sources we have the information that there will be a scarcity of Shallots and it will facilitate our handling your orders for you to place your order with us immediately.

Planted August to March. Largely grown for home consumption and shipping to Northern markets. About 5 bushels per acre.

The quantity of Shallots to be expected from an acre, if planted in field culture, 4 foot rows, would be from 50 to 60 barrels, but if planted, as is the custom around New Orleans, in 2 foot rows, 100 to 125 barrels, provided the Shallots are planted in August and September. If planted later, they do not multiply so well and the quantity would be less. Qt., 50c.; gal., \$1.50, postpaid; peck, \$2.50; measured bushel, \$8.00, not prepaid.

Varieties and Price List of Spinach.

Requires well prepared soil and rich. Planted from September to November.

EXTRA LARGE LEAVED SAVOY.

The leaves of this variety are large, thick and a little curled. Very good for family use and the market garden. Packet, 5c. and 10c.; oz., 15c.; ¼ lb., 25c.; lb., 65c., postpaid.

BROAD LEAVED FLANDERS.

This is the standard variety, both for market and family use. Leaves large, broad and succulent. A fine shipping variety to Northern markets. Packet, 5c. and 10c.; oz., 15c.; ¼ lb., 25c.; lb., 65c., postpaid.

NEW ZEALAND.

(Tetragonia expansa.) Unlike true spinach in type and in that it thrives during hot weather and in any soil, rich or poor. The tender shoots are of good quality and may be cut throughout the summer. The plant becomes very large and spreading. The leaves are comparatively small, broad and pointed. Plant three or four seeds in hills two feet apart each way. Germination of the seed can be hastened by soaking in warm water twenty-four hours. Packet, 5c. and 10c.; oz., 20c.; ¼ lb., 50c.; lb., \$1.75, postpaid.

MONSTROUS VIROFLAY OR THICK LEAVED.

A variety producing a remarkably thick leaf, slightly crimped, and grown extensively by market gardeners. Packet, 5c. and 10c.; oz., 15c.; ¼ lb., 35c.; lb., 75c., postpaid.

STECKLER'S FULL BASKET.

The most delicious flavored and a quick grower. Packet, 5c. and 10c.; oz., 20c.; ¼ lb., 40c.; lb., \$1.00, postpaid.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

SORREL (Broad Leaf).

Planted July to September. Cultivated like Spinach. Used as a green dish or salad. 1 ounce to 100 feet of drill. Packet, 5c. and 10c.; oz., 25c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.50, postpaid.

TOMATOES.

New Stone Tomato.

Redfield Beauty.

Planted during July and August. Break soil deeply and fertilize, 4 ounces to the acre. Steckler's New Stone, Jno. Baer, Spark's Earliana, June Pink, Livingston's Favorite and Dwarf Champion are leaders. However, the other varieties are also adapted and do well.

Top White
Globe.

Extra Early White French or White Egg.

TURNIPS.

CULTURE.—Turnips do best in new ground. When the soil has been worked long, it should receive a top dressing of ashes. If stable manure is used the ground should be manured the Spring previous to sowing, so it may be well incorporated with the soil. When fresh manure is used the Turnips are apt to become speckled. Sow from end of July to October for Fall and Winter, and in January, February and March for Spring and Summer use. They are generally sown broadcast, but the Ruta Baga should be sown in drills, or rather ridges, and should not be sown later than the end of August; the Golden Ball and Aberdeen not later than the end of September. The Early White Flat Dutch, Early Spring and Purple Top White Globe, Purple Top Strap-Leaved Flat and Steckler's Japanese are the favorite for general crop. Others mentioned are also adapted.

STECKLER'S PROGRESSIVE EVERBEARING STRAWBERRIES.

You can have strawberries just as early in the fall as in the spring by planting the Progressive Strawberry, which is the best of all the fall or ever-bearing strawberries. This variety will produce heavy crops in the fall of as fine berries as any spring-ripened strawberries. Truly a luxury for home and profitable for market.

100 for \$3.00, postpaid; 1000 for \$20.00, not prepaid.

STECKLER'S EVERGREEN HEDGE AND BEDDING PLANTS.

The only plant that will thrive in the shade as well as in the sun and will grow in any kind of soil, making a carpet bed, or can be used in making a hedge which will be dark green Summer or Winter.

After it reaches a certain age it produces a little white flower, which gives a fragrant odor. If you have a place where no grass is growing, under trees or any shady place, this is the plant we recommend very highly.

Price 50c per dozen, postage paid. In larger quantities sent by express not prepaid at the following prices: \$2.50 per hundred; 500 and over, \$1.75 per hundred.

CAN BE PLANTED IN ANY MONTH OF THE YEAR.

List of Fruit and Nut Trees Best for South.

Place Order Now for December, January, February and March Shipment.

Our Fruit Trees Are Especially Fine This Season.

Express or Freight.

Fruit and Shade Trees are planted when the sap is dormant, which is during December, January, February and March.

APRICOT TREES.

Apricot Trees. 5 to 6 feet. \$1.25 each; \$12.00 per doz.

FIG TREES.

Celeste Fig. 2 to 3 feet. 60c. each; \$6.00 per dozen. 4 to 5 feet, \$1.50 each; \$12.00 per dozen.

Extra Bushy Branched Celeste Fig Trees. 5 to 6 feet, \$3.50 each.

Japanese Violet Fig. \$2.00 each.

Magnolia Fig. \$1.50 each; 4 to 5 feet, \$12.00 per dozen.

Brown Turkey Fig. \$1.50 each; 4 to 5 feet, \$12.00 per dozen.

Brunswick or Madonna Fig. \$1.50 each; 4 to 5 feet, \$15.00 per dozen.

Lemon or May Fig. 3 to 4 feet, \$1.50 each; \$12.00 per dozen.

White Adriatic. 4 to 5 feet, well branched. \$1.50 each; \$15.00 per dozen.

STECKLER'S HIGH-GRADE CLOVER, GRASS AND FIELD SEEDS.

Specially Adapted for the Southern States.

At the time this Catalogue goes to press we cannot offer Field and Grass Seeds at definite prices, market varying almost daily, so when ready to buy Wheat, Rye, Barley, Oats, Clover, Alfalfa, etc., write us for prices.

ALFALFA OR LUCERNE CLOVER.

Alfalfa is the most talked of and most widely planted of all varieties of clover in the world.

The U. S. Department of Agriculture says: "In addition to the hay crop, Alfalfa at two years adds \$100 to the value of every acre on which it grows. There is not a State in the Union in which Alfalfa cannot be successfully grown." This is saying a good deal but it has been proven.

Alfalfa in the South will produce 5 to 7 tons of hay to the acre each year and in money value is worth 45 per cent. more than other clovers and 60 per cent. more than Timothy hay. It will grow 4 to 5 crops a year and it does not exhaust the soil; it enriches the soil. Its long, branching roots penetrate far down, 15 to 20 feet, and so loosen the subsoil that it is a gigantic subsoiler, resists drought, and gets plant food where other crops would be a failure. When the plants are destroyed in order to raise other crops on Alfalfa Land, the large roots decay and produce a vast source of fertility to be used by following crops.

It is said that the feeding value of a ton of Alfalfa is equal to a ton of shelled corn.

We handle the following brands:

Banner—Price, postpaid, 80c. per pound; not prepaid, \$30.00 per bushel.

Fancy—Price, postpaid, 70c. per pound; not prepaid, \$28.00 per bushel.

Write for prices in large quantities.

Planted from September to November. 20 to 30 lbs. per acre.

SOUTHERN BURR CLOVER.

**An Excellent Winter Cover Crop. Furnishes Plenty of Pasture for Stock.
Grows Anywhere. A Builder of Land.**

Planted from September to November. In burr, 5 bushels per acre.

Southern Grown in the burr. Price, 1 pound, 40c.; 5 pounds, \$1.75, postpaid; 1 bushel, 10 lbs., \$3.00, not prepaid. Planted from August to October.

Write for prices on quantity lots.

WHITE CLOVER.

This is very largely used in lawn and pasturage mixtures, and is indigenous to the soils throughout the South. It makes a small close, compact growth covering the ground like a carpet. Does well all through the South. Planted from September to November or February and March. 8 pounds per acre. **Prices, postpaid, Fancy, per pound, \$1.00; 10 \$9.00, not prepaid; bushel, \$48.00, not prepaid.** Write for prices in larger quantities.

MEDIUM RED CLOVER.

A valuable farm crop in the Southern Belt. Equally good for pasture, hay or soil improvement. First crop makes rich feed and is the most valuable for hay. Red Clover is a nitrogen-gathering plant and one of the best soil improvers. Clover intelligently used is one of the farmers' best friends and should be used as a rotation crop. Sow in the fall or spring, or at the last working of corn. When alone, 8 to 12 lbs., or with other grasses, 4 to 6 lbs. per acre. **Postpaid, ½ lb., 45c.; 1 lb., 80c.; 15 lbs., \$9.00; bushel, \$32.00, not prepaid.** Planted from September to April.

BOKHARA OR SWEET CLOVER.

Melilotus Alba, Biennial or White Blossom Sweet Clover). Strong grower. When young it resembles Alfalfa to such a degree that it is often mistaken for it, but when mature, which is during its second season, it attains a height of five to six feet and blooms from June to October. The roots of all varieties are large, fleshy, and much branched, and go down to considerable depth. In the Biennial Species, these, with the tops, die at the close of the second year, if the plant ripens seed. If cut before seed is ripe or if pastured so that seed is not matured, the plant lasts over several seasons. It is of great value in reclaiming old worn out soils and the demand for seed is increasing rapidly. **Price, White Blossom, hulled, postpaid, 80 cents per pound; 10 lbs., \$7.00, not prepaid; 60 lbs. (bushel), \$30.00.** Planted September to March. 20 pounds per acre.

JAPAN CLOVER.

(Lespedeza Striata.)

A legume. Southern seed. Grows anywhere; is tenacious in any soil; lasts always; well known now in the South. Planted from December to March. 25 pounds per acre. **Prices, postpaid, ½ lb., 40c.; 1 lb., 75c.; bushel, \$12.00, not prepaid.**

CRIMSON CLOVER FOR THE SOUTH.

Farmers all through the Middle Atlantic and Southern States are increasing the acreage of Crimson Clover very materially, as they find it one of the best and most satisfactory of early forage and soil-improving crops. Its greatest value is as a soil-improver, practical farmers maintaining that a crop of Crimson Clover turned under is equal to a good application of stable manure. It costs less to seed per acre than any other similar crop; and the results, in putting the much-needed nitrogen and humus into the soil, are considered superior even to cow peas. Planted from September to March. 20 pounds per acre. **½ lb., 25c.; 1 lb., 45c., postpaid; 10 lbs., \$3.00; 1 bushel, \$10.00, not prepaid.**

ALSIKE CLOVER.

Swedish Clover—(Trifolium Hybridum).

One of the hardiest of all clovers, resisting extremes of heat and drouth and also severely cold weather to a remarkable extent. It succeeds on a variety of soils, light upland loamy lands, as well as stiff bottom lands. The good qualities of Alsike are being rapidly appreciated everywhere. In this section the use of Alsike is growing rapidly. Planted during October to April. **Prices, postpaid, ½ lb., 45c.; 1 lb., 80c.; 15 lbs., \$9.00, not prepaid; bushel, \$34.00, not prepaid.** 7 to 10 pounds per acre. Write for prices in quantity lots.

TIMOTHY GRASS SEED.

As a crop for hay, Timothy is probably unsurpassed by any other grass. It is greatly relished by all kinds of stock, especially horses; yields more nutritive matter than any other grass or forage plant. Being an early grass it is well adapted to Spring and Summer grazing, and if the Fall season is favorable it will grow sufficiently to furnish good Fall grazing too. Planted during September and October. 12 pounds per acre. **Prices, prepaid, ½ lb., 30c.; 1 lb., 45c.; 10 lbs., \$4.00, not prepaid; bushel, \$9.00, (45 lbs. to bushel), not prepaid.**

STECKLER'S SUNNY SOUTH LAWN GRASS.

For Winter Lawns.

Prepared in the South and prepared for the South by those who know the soil, climate and conditions under which it should be sown, use this mixture and give proper attention to your lawn, water when necessary and during dry spells frequently and you will have the finest and greenest lawn. **Prices, postpaid, \$1.00 per lb.; not prepaid, 10 lbs., \$9.00.** 20 pounds to the bushel. 3 bushels per acre. Planted September to April. Write for prices in large quantities.

STECKLER'S MIXED LAWN GRASS.

Finest Lawn In South.

For lawns of any extent we recommend this our best mixture. We have combined all the most suitable varieties that are necessary for making a beautiful lawn. It is the best proportioned mixture of grasses in the South. Planted during October to December for winter lawn. 60 pounds per acre. **Prices, 1 pound, 75c., postpaid; 10 lbs., \$7.00, not prepaid.** Write for prices in large quantities.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

BERMUDA GRASS.

(*Cynodon Dactylon*.)

Almost everybody living in this section of the country knows this grass; it is planted as a lawn grass; and nothing will stand the sun better, or will make a prettier carpet, when kept short, than this grass. Planted during March to August, 6 pounds per acre. **Price, postpaid, \$1.25 per pound; not prepaid, 5 pounds for \$5.00.** Write for prices in large quantities.

PASPALUM GRASS.

(*Paspalum Dilatatum*.)

It is exceedingly well liked by stock, and furnishes abundant grazing on medium to moist soils. It is decidedly bunchy in habit, each clump producing a great mass of succulent root leaves which are greedily eaten by all classes of live stock. Prof. S. M. Tracy, for many years director of the Mississippi Agricultural Experiment Station, regards it as one of the most valuable pasture grasses of the South. Planted from November to March. 8 pounds per acre. **Prices, postpaid, 1 pound, \$1.25; 10 pounds, \$10.00, not prepaid.**

NATAL GRASS.

This is a splendid new pasture and hay grass. It has been thoroughly tried in Florida for the past two or three years. We have been watching this grass very closely, and, on account of the flattering reports made by many of the growers and the bulletins of the Experimental Station in Florida, know that this is a valuable grass for this section. Planted during May to August. 10 pounds per acre. **Prices, postpaid, ½ pound, 60c.; 1 pound, \$1.00; 10 lbs. for \$9.00, not prepaid.** Write for quantity prices.

ITALIAN RYE GRASS.

Is coming into great favor wherever it is grown. It comes up quickly and makes a dense matter turf, which gives most excellent grazing during the fall and a grand green lawn, winter and early spring. Planted from September to March. **1 pound, 40c., postpaid; 10 lbs., \$3.25, not prepaid; 20 lbs., \$6.00, not prepaid; 100 lbs., \$25.00, not prepaid.**

ENGLISH RYE GRASS.

(*Lolium Perenne*.)

Is largely sown by our landscape gardeners for winter lawns on Bermuda sod. The Bermuda blades being easily affected by frost, become red and rusty looking, while English Rye during winter presents a most beautiful appearance, being of a vivid green, and as the Bermuda during April and May makes its appearance it overgrows the English Rye, causing the latter to decay and act as a fertilizer to the existing grass. It should be sown from September to March. **1 pound, 35c.; 10 pounds, \$2.75, postpaid; 1 bushel, \$5.00, not prepaid; 100 pounds, \$22.00, not prepaid.**

SUDAN GRASS.

A Live Stock Food.

Grows Successfully Everywhere. Stock of all kinds eat it readily. Yields more tonnage per acre than any other forage crop. Produces from ten to fifteen thousand pounds of green fodder per acre; suitable for hay or silage. Planted during August and September, but does better planted in March and April. 15 lbs. per acre. **1 pound, 45c., postpaid; 10 pounds, \$4.00, not prepaid; 100 pounds, \$20.00, not prepaid.** Write for quantity prices.

CARPET GRASS.

(*Paspalum Platy-Caula*.) (*Petit Gazon*.) (*Axonopus Compressus*.)

This Grass grows tenaciously in any sandy soil. Excellent for lawns or pasture purposes on the Gulf Coast and all sandy lands, and grows equally as well on clay uplands. Green all the year in lower Gulf States. It stools heavily and is one parent stalk. Planted from November to March. **1 pound, \$1.25, postpaid; 10 pounds, \$10.00, not postpaid.** Write for quantity prices.

MEADOW FESCUE GRASS.

(*Festuca Pratensis*.)

As a pasturage grass we consider this one of the most valuable. It is affected by dry weather. Planted from August to October. 30 lbs. per acre. **1 pound, 75c., postpaid; 10 pounds, \$6.50, not prepaid.** Write for quantity prices.

PLANT A FALL GARDEN AND REDUCE H. C. L.

ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

KENTUCKY BLUE GRASS.

(Poa Pratensis.)

This is also called smooth meadow grass, spear grass, and green grass, all three very appropriate, characteristic names, but Blue is a misnomer for this grass. It is not blue, but green as grass, and the greenest of grasses. Planted from September to April. 25 to 30 lbs. per acre. 1 pound, 60c., postpaid; 10 lbs., \$5.00, not prepaid.

RED TOP GRASS.

(Agrostis Vulgaris.)

This is the best grass of England, the herd grass of the United States; not in honor of any man, but probably because so well adapted to the herd. Planted from October to February. 30 lbs. per acre. 1 pound, 40c., postpaid; 10 pounds, \$3.50, not prepaid. Write for quantity prices.

ORCHARD CHOICE GRASS.

(Dactylis Glomerata.)

This is one of the best grasses for pasture. It grows quickly. It may be mowed from two to four times a year, according to season and treatment. Planted from September to March. 20 lbs. per acre. 1 pound, 50c., postpaid; 10 pounds, \$4.50, not postpaid. Write for quantity price.

DWARF ESSEX RAPE**A Splendid Winter Forage Plant.**

This is sown broadcast and furnishes a rich nutritious winter pasture, can be grazed 6 weeks after planted. 20 lbs. per acre. 1 pound, 30c., postpaid; 10 pounds, \$2.75; 100 pounds, \$14.00, not prepaid. Write for quantity price.

SOUTHERN GROWN RYE AND BARLEY.**Southern Grown Winter Rye.**

Makes a fine Winter pasture and if cut before fully headed it will produce a good quality of hay. Planted from September to November. 1½ bushels per acre; 56 lbs. per bushel. 1 pound, 30c., postpaid; ¼ bushel, \$1.00; 1 bushel, \$3.50, not prepaid.

Abruzzi Rye.

This variety, which is said to be fully a week or ten days earlier than the ordinary rye, and which is claimed to yield much more per acre than common rye, has been grown extensively in the east and southeast for several years. It is rapidly becoming popular in the South and Southwest generally. Planted from September to November. 1½ bushels per acre; 56 lbs. per bushel. 1 pound, 40c., postpaid; ½ bushel, \$3.25; 1 bushel, \$6.00, not prepaid.

Rosen Rye.

Rosen Rye in comparison with other ryes in the same season has the reputation of yielding 10 bushels more and sometimes 15 bushels more to the acre. Planted from September to November. 1½ bushels per acre, 56 lbs. per bushel. 1 pound, 35c., postpaid; ½ bushel, \$2.25; 1 bushel, \$4.25, not prepaid.

Barley—(Southern Grown.)

The particular value of Barley in the South is for Winter and Spring grazing. Planted from September to November. 2 bushels per acre; 48 lbs. per bushel. 1 pound, 25c., postpaid; ¼ bushel, \$1.25; 1 bushel, \$3.75, not prepaid.

VETCH, A WINTER CROP.**Hairy, Winter or Sand Vetch.**

Planted with small amounts of rye, oats, wheat or barley for a support after it begins to run. Vetch makes a magnificent hay crop in spring, coming in ahead of everything else except thoroughly established fields of alfalfa, and at the same time leaves added fertility to the soil. Planted on Bermuda sod and scratched in lightly in October it furnishes an abundance of grazing all through winter and spring for beef or dairy cattle, hogs or sheep, and in late spring can be let go to seed, thus seeding down the ground for next season. Grown in abundance it makes possible the profitable growing and fattening of cattle, something that hundreds have attempted to do and failed simply because they have had to buy feed for those cattle at top-of-the-market prices. Crops like Vetch make possible profitable live stock breeding which in turn means prosperity on Southern farms. 40 lbs. per acre. 50 lbs. per bushel. 1 pound, 60c., postpaid; ½ bushel, \$11.50; 1 bushel, \$22.00, not prepaid.

RHODES OR EAST COAST GRASS.**12 Tons of Dry Hay Per Acre Per Year.**

10 to 12 tons of hay per acre per year. Makes splendid hay. A great drought resister. Rapid grower. Withstands rain and drought. Its growth and drought-resisting qualities are truly marvelous. It is a quick grower, with creeping roots. The growth is luxuriant, growing about four feet high, and producing a very heavy crop of hay to the acre. Stock of all kinds eat it readily, either green, chaffed or as hay, and thrive well on it. Grows on any soil, producing seed the summer through. Sow thinly and lightly. Planted during September to November. 8 pounds per acre. Prices, postpaid, 1 pound, \$1.00; not prepaid, 5 pounds, \$4.50. Write for quantity price.

BEST OF ALL HEAVY YIELDING "RUST PROOF"

OATS FOR THE SOUTH.

Steckler's Red Rust Proof Oats.

Louisiana Red Rust Proof Oats.

STECKLER'S RED RUST PROOF OATS.

Are considered the best for the South. Planted during October and November and in early Spring. $2\frac{1}{2}$ bushels per acre. Pound, 25c., postpaid; peck, \$1.00; 32 lb. bu., \$2.50; 5 bu. sack, \$12.00, not prepaid.

PATTERSON RED RUST PROOF OATS, LOUISIANA GROWN SEED.

These Oats date back from 1866, and have been grown successfully ever since, it is too well known to comment upon. Planted during October and November. $2\frac{1}{2}$ bushels per acre; 32 lbs. per bushel. Pound, 25c., postpaid; peck, \$1.00; 1 bushel, \$2.25; 5 bushels, \$10.00, not prepaid.

FULGHUM EARLY OATS.

We have watched this comparatively new Oats for a few years and we think the extravagant claims by the producer are correct. It is early; with exceedingly heavy straw. Planted from September to November. $2\frac{1}{2}$ bushels per acre; 32 lbs. per bushel. Pound, 25c., postpaid; peck, \$1.25; 1 bushel, \$2.75; 5 bushels, \$12.50, not prepaid.

EARLY WINTER TURF OATS.

Stool more than any other variety; can be pastured the whole Winter, and are as hardy as Wheat. Claimed to produce more and heavier grain than other varieties. $2\frac{1}{2}$ bushels per acre; 32 lbs. per bushel. Pound, 25c., postpaid; peck, \$1.25; 1 bushel, \$3.25, not prepaid.

GROW GOOD WHEAT.

While very little wheat is grown in Louisiana and some of our best planters discourage it, still some plant it principally for green feed and we now find it necessary to carry a full line for the benefit of our neighboring State customers who plant for commercial purposes.

Fultz.

One of the old stand-bys, matures early and is a good producer, not bearded, grows well in high and bottom land. Planted September to November. 1 bushel per acre, 60 lbs. per bushel. 1 pound, 30c., postpaid; peck \$1.25; 1 bushel, \$4.50, not prepaid.

(OVER)

Blue Stem or Purple Straw.

This is a favorite among the wheat growers in the South. It's a fine, rather early, productive, beardless variety of wheat, a standard in this section. It has always been a rather early variety, but the strain we are now handling ripens from a week to ten days ahead of the old strain. Good for grain production or if you desire to cut it when "In dough" makes a splendid hay crop. Planted from September to November. 1 bushel per acre; 60 lbs. per bushel. 1 pound, 30c., postpaid; 1 peck, \$1.25; 1 bushel, \$4.50, not prepaid.

Fulcaster Wheat.

Is grown in the Southern Regions of the wheat area, and does fairly well here. Planted September to November. 1 bushel per acre; 60 lbs. per bushel. 1 pound, 30c., postpaid; peck, \$1.25; 1 bushel, \$4.50, not prepaid. Bearded and is a cross between Fultz and Mediterranean. Best planted in bottom land.

Red May Wheat.

We have never been able to see where this variety was any earlier and better than the Blue Stem, although many prefer it to that variety, claiming great earliness. It's a standard variety and a great favorite in the State of Tennessee. Planted from September to November. 1 bushel per acre; 60 lbs. per bushel. Prices, 1 pound, 30c., postpaid; peck, \$1.25; 1 bushel, \$4.50, not prepaid. Write for quantity prices.

REDUCE YOUR FERTILIZER BILL.

Insure your alfalfa, clover, vetch and other legume crops by inoculating the seed with FARMOGERM, thereby taking your nitrogen from the air. Legumes not inoculated take the nitrogen necessary for their growth from the soil the same as corn, cotton, grains, etc.

Failures to get a good stand of legumes are often due to lack of inoculation. Why take a chance when you can buy FARMOGERM and make sure of putting the right variety of germs of the highest nitrogen fixing ability into your soil?

FARMOGERM is simple to apply—seed can be treated in a few moments. Full directions on each bottle.

Unless your soil is very acid or wet, FARMOGERM will:

1. Increase the yield and quality of legume crops, giving quick growth and earlier maturity.
2. Increase the food value of legumes.
3. Make legumes grow in new localities where they cannot otherwise be grown successfully.
4. Supply nitrate to other crops growing with the inoculated legume crop.
5. Enrich the soil for future crops, thereby increasing the permanent value of the farm; better crops—better soil—less fertilizer—less labor.

We can supply you with FARMOGERM for any legume crop of the following prices: 5-acre size, \$8.00; 1-acre size, \$2.00; ¼-acre size, 50 cents.

Legume bacteria cannot live without air—FARMOGERM is the only culture put up with the patented ventilating stopper which supplies them with pure filtered air. That is why you know when you buy FARMOGERM that you are getting a culture which will produce results. It is guaranteed to be fresh, active and vigorous. Accept no substitutes.

PLANT A FALL GARDEN AND REDUCE H. C. L.

FROST-PROOF CABBAGE PLANTS.

Varieties: Early Jersey Wakefield, Large Charleston Wakefield and Flat Dutch (Early).

List of Cabbage plants for shipment by Parcel Post, postage paid, as follows: 100 to 300 plants at 50c. per 100; 500 plants for \$1.75; 1,000 or more at \$3.25 per 1,000. Plants are packed for Parcel Post shipment in even quantities of 100, 200, 300, 400, 500 and 1,000 plants of a variety to a package, as we do not ship two varieties in the same package.

Price by Express where purchaser pays the Express charges: In lots of 1,000 to 4,000 plants at \$2.25 per 1,000; in lots of 5,000 or more at \$2.00 per 1,000. We do not ship less than 1,000 plants of a variety by Express. After your order is received by us it must be forwarded to our growing farm for shipment, this takes several days.

Plants cannot be pulled or packed during wet or freezing weather, this sometimes causes a delay in the shipment, but we always make shipment as soon as weather conditions permit. A delay of 10 days is not unusual.

We begin making fall shipments about December 15th, but sometimes, if growing conditions are favorable, we can ship as early as November 20th. These plants will stand anything above 20 degrees of cold, therefore are Frost-Proof. Up to that temperature we will positively fill no orders for less than 100 plants.

FERTILIZERS.

BETTER AND LARGER YIELDS.

To grow vegetables of any kind profitably use **HIGH GRADE PALMETTO GUANO**. Apply 500 to 1000 pounds per acre. For the small home garden we can furnish popular size packages of this fertilizer as follows: 1 pound, 30 cents, postpaid; 3 pounds, 60 cents, postpaid; 5 pounds, 85 cents, postpaid; 100 pound sack, \$6.00, not prepaid.

GENERAL GARDENING.

For general gardening purposes use **HIGH GRADE FINE BONE MEAL**. This material contains both Phosphoric Acid and Ammonia in such form as to become of use to plant gradually; put up in packages for the home garden use as follows: 1 pound, 30 cents, postpaid; 3 pounds, 85 cents, postpaid; 5 pounds, \$1.00, postpaid; 100 pounds, \$6.00, not prepaid.

"BACKWARD GROWTH."

By this we mean where a plant shows no desire to bloom or produce its fruit it is in want of food. Top dress your backward crops with **TRUCKER'S FAVORITE**. This fertilizer is put up in 100 pound sacks. For home gardens, we make a specialty of selling in small packages of: 1 pound, 30 cents, postpaid; 3 pounds, 85 cents, postpaid; 5 pounds, \$1.00, postpaid; 100 pounds, \$4.50, not prepaid.

PRICES OF FERTILIZERS.

Special Cotton and Corn, 10-2-2, 1 lb., 30 cents; 3 pounds, 75 cents, postpaid; 100 pounds, \$4.00, not prepaid.

High Grade Acid Phosphate, 16-0-0, 1 lb., 30 cents; 3 pounds for 85 cents, postpaid; 100 pounds, \$3.50, not prepaid.

Garden City Phosphate, 14-0-0, 1 pound, 30 cents; 3 pounds for 85 cents, postpaid; 100 pounds, \$3.50, not prepaid.

Nitrate of Soda, 1 pound, 30 cents; 3 pounds for 85 cents, postpaid; 100 pounds, \$9.00, not prepaid.

STECKLER'S LEAF MOULD.—Admirably adapted for raising Seedlings, Cuttings, and general Conservatory and framework, increases the size of the flowers, gives substance and enduring qualities, insures brilliancy and intensity of color. Specially suited for hanging baskets, because of its lightness and freedom from drip; less frequent watering required. Bedding out plants grown in Leaf Mould will resist long continued drought. Clean to handle

and therefore specially suitable for window boxes and for growing flowers at home. 1 lb., 25c., postpaid; 5 lbs., 50c.; 10-lb. bag, 75c.; 100-lb. bag, \$2.75, not prepaid.

STOPS CHICKS DYING

Most people lose half of every hatch, and seem to expect it. Chicken cholera or white diarrhoea is the trouble.

Science offers the poultry raiser a new wonderful discovery, AVICOL, that is easily given in the water for either the prevention or treatment. The thousands of poultry raisers who have used Avicol are unanimous in their praise of it.

Get a package of Avicol to-day. If you don't find that it promptly stops your chicks dying, or is not successful in the treatment of white diarrhoea and all other bowel diseases of poultry, your money will be refunded.

Avicol revives the drooping chicks and helps them grow and develop rapidly. Shows positive results in 48 hours. Don't be without it.

25c. Size (Add 1c War Tax); 50c. Size (Add 2c War Tax); \$1.00 Size (Add 4c War Tax).

TALCIMIZED SODIUM FLUORIDE

KILLS POULTRY LICE.

The U. S. Department of Agriculture recommends Sodium Fluoride to kill poultry lice. They report that it does the work better than anything else, killing both old and young lice, including the young which come from the eggs present on the fowl at the time of treatment.

TALCIMIZED FORM MADE ESPECIALLY FOR POULTRY.

Talcimized Sodium Fluoride is made especially for poultry and carries the Government's direction for applying. It is safe, easy to use, inexpensive and absolutely does the work quickly and effectively.

Price 35c. (Enough to Treat 50 Chickens.)

DON SUNG Makes Hens Lay.

DON SUNG (Chinese for egg-laying) is a new scientific discovery for hens that stimulates the egg-laying organs and makes the hen healthy, strong and vigorous. As a result she lays regularly in any season.

DON SUNG is easily given in the feed, and costs nothing to try. It doesn't force or hurt the hen in any way. In fact, it makes her healthier. It is used by thousands of successful poultry raisers the world over.

Positively Guaranteed—Try This Test At Our Risk.

Take ten hens, separate them from the others and give them DON SUNG for one month. Then figure your egg yield. If you don't find that DON SUNG has paid for itself and paid you a good profit besides, your money will be refunded without question or argument. A 50-cent package will handle this test.

Price, 50 Cents (Add 2c War Tax).

Large Size, \$1.00 (Add 4c War Tax). Holds 3 Times the 50 Cents Size.
Special Size, \$5.00 (Add 20c War Tax). Holds 6 Times the \$1.00 Size.

paid.

HUMANE ANTI-HEN SETTING DEVICE.

Bend around the leg joint with the solid metal parts at front and back of the leg. Draw the tongues through the slots until the device fits snugly and bend over, locking into position. Free the hen with the rest of the flock and allow the device to remain on her leg for 24 hours—then remove, and she will be entirely cured of her broodiness and will start laying again. 15 cents each, \$1.50 per dozen, postpaid.
