STERLING Seed, Plant and Poultry FARM

RALPH W. STERLING, *Prop.*

Formerly W.W. Sterling & Son

Cutchogue, L. I., Suffolk Co., N.Y.

FOREWORD

PLEASE accept this, my 1920 Catalog, as a token of Greeting for the New Year, as well as a Silent Salesman to place before you what I have to sell, the prices I ask for the same, my terms, etc. I wish to thank each one of you who helped to make the past season the biggest year in volume of business on record, for the Sterling Seed, Plant and Poultry Farm.

And I ask one and all, new customers and old, to carefully look this little book over and compare quality, prices and assortment, taking into consideration our courteous and prompt service, with what you could get elsewhere, and thereby be convinced that you will do well to place your business with me. I aim to satisfy my customers no matter what it costs. My profits are sometimes below the zero mark by this method but I am not selling Seeds and Plants for this year only but hope to be in business for many years to come.

Some of my best customers have been dealing with us for years and their business is certainly appreciated.

Burpee's Garden and Field Seeds are the Standard of Quality the world over. They are not cheap by any means, but remember that results are what you and I are after and Burpee's Seeds bring the best results. The fact is always stated if any of my seeds come from any other source than W. Atlee Burpee & Co.

The same may be said of my Grass and Clover Seed. I make it a point to buy the very best grade on the market and always state the percentage of purity and germination on request. Don't buy Grass, Clover and Alfalfa Seed on any other basis.

Some seeds are very scarce and high this year and others are very reasonable.

Fordhook Bush Limas are said to be rather scarce this season but I have a very large stock, the quality is as good as can be found

anywhere and the price is right. Would be pleased to have you come and look my stock over, then you can take whatever quantity you want, of the quality that suits you best. My stock comes from Burpee, Landreth, and two other growers of reliability.

Try a few ounces of my Cauliflower Seed this year. This Kroemer Strain is used extensively through the Calverton section and has been giving entire satisfaction.

Good Brussels Sprout Seed is scarce. I have only a limited quantity but what I have is from selected stock and I am sure will please you if you give it a trial.

Seed Potatoes are high and good seed is scarce.

In the Farm Bureau test held last year at Wainscott, L. I., my seed, which was taken right from the same heap as I filled my orders from, made a very good showing. This seed of mine led the whole contest, making a yield of 286 bushels of salable potatoes and 20 bushels of culls. It showed 6% Mosaic and 8% Leaf Roll, which was a very low percentage. The test at Mattituck was not reliable on account of digging them after the rot had done its worst.

My seed this year is from Wisconsin Grown, and Vermont Grown stock. This Wisconsin Seed made as fine a showing as any stock I ever raised. There was very little of Mosaic or Leaf Roll. The blight did some damage of course, but the seed I have is a fine run of Potatoes, and they will be nicely sorted.

My Cobblers come from Maine, New Seed, and I think they will give good satisfaction as this same strain yielded fine for me last year.

Asparagus Roots are one of my specialties and I raise only the very best improved strains. The Reading Giant is known to be far ahead of the ordinary kinds and the U. S. Department of Agriculture claims the Washington to be very best of all. I have both kinds in 1 year old and the Reading Giant in 2 year old roots.

Strawberry Plants are another specialty. I have 20 or more of the leading kinds and can assure you of good plants at fair prices. Don't fail to try a few World's Wonder, the best of the new kinds tried out last year. The new early kinds were also good, but remember that the kinds that do well for me on heavy soil may not do so well with you in different soil under different conditions. It is best to try several kinds unless you know just the kind you want from your own experience.

Barred Plymouth Rock and S. C. White Leghorn Poultry are the two most popular breeds of fowl. I have a breeding pen of each of these two kinds. Parks' 200 egg strain is the leading strain of B. P. Rocks in this country to-day for egg production. Have just received a fine \$10.00 cockerel from Mr. Parks, a fine bird from a heavy laying hen. Also have received 4 nice Leghorn cockerels from the Eglantine Farm at Greensboro, Md. Lady Eglantine, a hen bred at this farm, laid 303 eggs in 12 months time.

If you are interested in Hovers, Brooders and Incubators send for an illustrated circular giving details and prices for same.

These Wishbone Safe and Sure Brooders and Incubators are entirely new, based on new principles and I advise anyone interested in these articles to look into this kind before ordering elsewhere.

You can turn a Coal Burning Hover into an oil burning Hover very simply and cheaply and thus get rid of the provoking tendency of coal fires to go out.

Thanking you again for your patronage of the past and asking your continuance of the same, I remain, with very best wishes for a successful and prosperous year,

Sincerely yours,
RALPH W. STERLING.

SEED DEPARTMENT

Instructions

Send cash with your order. This saves bookkeeping, bother and worry, and is the most satisfactory for all parties concerned. Of course we do give credit to reliable parties, but that is a matter of correspondence.

Postage is prepaid on all seeds by the pkt., oz. and $\frac{1}{4}$ lb. Quantities over that are priced net, to be shipped by freight or express. If desired to be sent by Parcel Post add 5c per lb. extra in the first and second zones, and 1c extra for each additional lb., allowing 1 lb. extra for weight of package.

Half lbs. will be sold at lb. rates, half. bu. at bu. rates.

No charge is made for packing or packages except in selling seeds and potatoes in bulk. A charge of 50c each will be made for the 2 bu. seamless bags and 15c each for the potato bags. These bags may be returned if in good condition and the amount paid will be credited on your account.

Remember, We Sell Burpees's Garden and Field Seeds

for less money than you can buy them elsewhere. We always mention it when any of our seeds come from other sources than from W. Atlee Burpee & Co.

Jamaica, N. Y., March 6th, 1919.
Mr. Ralph W. Sterling
Cutchogue, L. I.

Dear Sir:—We have always found your seeds and plants of first quality and have received them in fine condition. It is a great convenience to get plants so near at hand that they are as fresh as if transplanted from one part of the garden to another.

Yours truly,
CLARA LOUISE LAWRENCE.

Mr. Ralph W. Sterling

Dear Sir:—From ½ acre of Fordhook Bush
Limas planted with your seed last year, on
light soil, I cleared about \$300.00

Nearly every bean came up and they did
fine. Another piece on heavier soil did not
do so well as the season was too wet.

Sincerely,
ROLAND B. HORTON.

Yaphank, L. I., Jan. 28th, 1918.

Wm. W. Sterling & Son

Dear Sirs:—The Mills Prize Seed Potatoes I bought of you last season were the best I ever bought. They came up perfect and out-yielded all others.

Very truly yours,
DAVID JONES.

TURNIP AND RUTA BAGA SEED

Japanese Buckwheat, the best kind.	.12	.90
Vetch, Canada Field Peas, etc. Prices on application.		

GRASS—CLOVER AND ALFALFA SEED

Prices liable to change without notice. Terms strictly cash. I buy the very best grade of Grass, Clover and Alfalfa Seed on the market from the Nungesser Dickerson Seed Co. and sell as reasonable as the highest quality recleaned seed can be sold.

My hay mixture, for 1 acre, is 11 to 12 lbs. Timothy sowed with wheat in the Fall, and 5 lbs. Red Clover mixed with 3 lbs. Alsike, to be sowed the following Spring. In sowing alone use the same mixture, adding a little more Timothy, and sowing in August or September. Without Clover use 15 to 18 lbs. of Timothy to the acre. Use a little Lime if your land is sour.

Seamless bags holding 125 lbs. or more, 50c extra, returnable. Purity and Germination percentages on request.

	10 Lbs.	1 Lb. to & Over 10 Lbs.
Timothy, extra recleaned	\$.18	\$.20

Lawn Grass, Burpee's Fordhook finest	.30	.35
Lawn Grass, Sterling Mixture of Red Top, Blue Grass and White Clover	.38	.40

For a good Permanent lawn use 1 lb. Lawn Grass Seed to 400 sq. ft., 80 to 100 lbs. to the acre. For reseeding an old lawn or a poor catch use half that amount.

Peconic, L. I., Jan. 14th, 1920.

Mr. Ralph W. Sterling

Dear Sir:—I used the Mulford Culture on part of my Lima Bean seed last season and found that the inoculation increased the yield at the first picking about 1 pk. to an 18 rod row. As the beans were selling then at \$3.50 per bag I considered that it paid me to use the Culture.

Yours truly,
D. V. HOWELL.

Inoculate Your Legumes—Beans, Peas, Etc. With Mulford Cultures

Mulford Cultures were tested out by many of our customers last year and I have received many good reports. These Cultures are the very best that science can produce as the Mulford Co. manufacture all the vaccines, etc. for the United States Government.

There is a different Culture for each of your different crops so be sure to state what you want to inoculate. If you haven't tried any of these cultures and been convinced that it pays to use them try them out this season. It costs very little.

Garden sized bottles for Peas, Beans, Lima Beans, Sweet Peas, etc., 25c a bottle. Full directions in each package.

¼ acre size for Lima Beans, Alfalfa, Red Clover, Alsike Clover, etc., 50c per bottle.

	Each
1 acre size bottles	\$1.50
5 acre size bottles	5.00

Brocklet telling all about these cultures sent free on request.

Peconic, L. I., Jan. 14th, 1920.

Mr. Ralph W. Sterling

Dear Sir:—I used your Mulford Cultures last year on Sweet Clover, Alsike Clover and Lima Beans.

It helped the growth very much on the Clover and nearly doubled the yield on the Lima Beans.

Yours Sincerely,
GEO. W. GRATHWOHL.

PLANT DEPARTMENT

Plants are one of my specialties, raising them in hot beds, cold frames, and in the field. Customers are invited to come look my plants over and be convinced that it pays to buy of me. My prices are as low as I can make them, consistent with the quality.

50 of one kind will be sold at 100 rates, 500 of one kind at 1,000 rates. Labor is so high I can not make up an order of one or two hundred of three or four kinds and sell them at 1,000 rates.

We pack our plants in wet moss, using the utmost pains to keep roots straight and kinds separate, but not tying in bunches if we can help it as they carry better without tying.

All plants are shipped by express, F. O. B. Cutchogue station. Customers to pay transportation charges. Plants by Parcel Post need 5c per doz, 20c per 100, 30c per 200, and 10c extra for each additional 100, to be added to the list price. Rhubarb Roots and 2 year old Asparagus Roots need considerably more.

STRAWBERRY PLANTS—STERLING QUALITY

Our Strawberry Plants are well rooted, healthy, and true to name. Here is a list of over 20 different kinds to choose from and

there must be a few kinds that will suit your soil and taste. If you want a large sweet berry try the World's Wonder. It beats the Corsican.

Labor is so scarce and high it is impossible to make any special collection offer at reduced prices, but I always try to put in good count and plenty of extra plants for a sort of "Thank you, come again."

Laurel, L. I., 1919.

Mr. Ralph Sterling

Dear Sir:—Enclosed find check for plants. Thanking you for the prompt attention given to the order, they arrived in fine shape.

Yours,

CHAS. McCARTHY.

Reading Giant, 2 year old roots	.20	1.20	10.00

Have a large supply of 2 year old Reading Giants, special price on 5,000 lots.

Weston, N. J., 1917.

Gentlemen:—I have used your Asparagus Plants for three years, setting about seven acres, and I take pleasure in recommending them to all asparagus growers. The roots were uniform in size, consequently an even growth over the whole field, making a three-foot growth the first season, and a seven foot growth the second season.

The Reading Giant seems to grow larger and taller than the Giant Agentueil and for fancy asparagus I think will be the leader.

Yours truly,

JOHN M. HALLOCK.

STERLING'S ANNUAL CATALOG

New Suffolk, L. I., Jan. 15th, 1920.

Mr. Ralph W. Sterling

Dear Ralph:—From the 250 Leghorn Baby Chicks and 200 B. P. Rock Baby chicks purchased of you last April I have now about 225 fine pullets, as handsome as pictures.

Everyone who sees them says they are as handsome a flock of hens as they ever saw. They have laid fair through the Winter, considering the care they have had.

Will sell a few of them if I can get a fair price.

Sincerely Yours,

G. FRED GRATHWOHL.

GUARANTEE

I guarantee the fertility of my eggs for hatching to be 60% in January and February, 75% in March and April, and 80% in May and June. They will probably run much higher than this, but if they do not, return the infertile eggs to me charges prepaid and I will replace them with goods eggs or will refill the order at half price.

In selling Baby Chicks I guarantee full count and safe delivery anywhere on Long Island.

ORDER NOW

Orders for Eggs and Baby Chicks booked at any time, the earlier the better. A deposit of 10% of the entire order must accompany the order, balance can be paid 5 days before the order is to be filled.
