Figure 1.--Pulp mills drawing wood from the South, 1951. Numbered areas are Forest Survey units.

1951 PULPWOOD PRODUCTION IN THE SOUTH

In 1951 pulpwood production in the South was 14,061,100 cords, an increase of 13.1 percent above 1950, and 41.7 percent above 1949. The production of pine pulpwood was 12,442,200 cords, of hardwood 1,451,200 cords, and of dead chestnut only 167,700 cords. Pine production was 11.4 percent above 1950, hardwood 30.6 percent more, and dead chestnut 9.1 percent more.

Since total receipts of domestic pulpwood at all mills in the United States were 25,123,000 cords in 1951, the South produced 56 percent of all the pulpwood cut in the Nation. Among the southern states, Georgia was again the largest producer (fig. 2), accounting for 17 percent of the South's and 9 percent of the Nation's pulpwood cut. All of the southern states showed an increase in the volume of pulpwood production over 1950, with the largest increases in Virginia, North Carolina, Texas, and Louisiana.

Production per county varied from none to 131,600 cords. Thirty-three counties, distributed throughout the South, had cuts of over 60,000 cords apiece. The five leading counties were Baldwin in Alabama, Georgetown and Fairfield in South Carolina, Nassau in Florida, and Copiah in Mississippi.
