Novelties and Specialties for 1920

On the following few pages we are pleased to suggest to you a few of the newer varieties of Vegetables, also some particularly good or improved strains of the standard sorts which we have selected from nearly three thousand field trials at our Seed Farms at Orange, Connecticut.

Webber Wax Beans, or Crackerjack Wax

A new Wax Bean of unusual and distinctive character. Pods are of an exceedingly bright yellow color, and flat—unexcelled in this respect by any other variety. It is the earliest and most prolific Wax Bean we know of, and is certain to be a great favorite. Pkt. 15c; lb. 40c; 100 lbs. \$18.00.

Woodruff's Improved Detroit Dark Red Beet

UNEXCELLED AS A BIG CROPPER

Our strain of this Beet is unexcelled for main crop. It produces a late blood beet; very dark color. Bulbs are uniform in shape, with clean, small tap root. Be sure and include this variety in your next order. It is going to replace the ordinary strain of Detroit Dark Red and is a winner. Pkt. 10c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.00.

Woodruff's Improved Detroit Dark Red Beet.

S. D. WOODRUFF & SON'S QUALITY SEEDS

Woodruff's Selected Southport White Globe Onion Seed.

Hundreds of growers of Fancy White Onions come to use each year for their seed supply of the famous Southport White Globe Onion. We take great pains to have our stock of this Onion of such quality as to add each year to our list of customers. Those who order this year will receive seed of exceptional quality, as the crop is of unusually strong vitality and fully up to the standard of quality we always seek to maintain. Pkt. 5c; oz. 50c; $\frac{1}{4}$ lb. 1.00; lb. \$3.00; 10 lbs. and over, \$2.75 lb.

The Famous New Knight Stock Yellow Globe Danvers Onion

This stock was grown on our Seed Farms. It is the finest strain of Globe Danvers Onion ever grown. It is of elegant Globe type; the best keeper of all Onions for storage purposes. It has a very hard outer skin. It cures a deep yellow color, and grows to an unusually large size. This stock is very limited, being nearly sold out as this book goes to print. Every Onion grow should try this new strain. Pkt. 10c; oz. 50c; $\frac{1}{4}$ lb. 75c; lb. \$2.50; 10 lbs. and over, \$2.25 lb.

Webber, or Crackerjack Wax Beans

One of the earliest Wax Beans, of beautiful color, stringless; extra-heavy yield, and a bean that we consider the finest variety we have for market gardeners for the early crop. Flat pod. Pkt. 15c; lb. 40c; 100 lbs. \$18.00.

Copenhagen Market Cabbage

The most wonderful introduction for the market gardener in recent years. This Cabbage, from the Island of Amagar, is ready for market earlier than the Charleston and nearly as early as our superb Jersey Wakefield. It is the surest heading variety in existence; as heavy and as hard as many of the late round or flat heads, often reaching a weight of seven pounds. It is a deep head, of the Danish Ballhead type, thicker than most varieties. We have it direct from its original source—the Island of Amager. Pkt. 10c; oz. 60c; $\frac{1}{4}$ lb. \$2.00; lb. \$6.00.

Prize Strain Early Jersey Wakefield Cabbage

After years of selection, we have produced a stock of this best of all early pointed Cabbage which meets with our absolute approval. This is the first year we have put this selected strain on the market, and we look for wonderful results. The plant is very robust, and stands more cold than any other. There are few outer leaves, and the head is very pointed and extremely solid. The beauty of this selected strain is that it will head uniformly and at the same time, so that in a very few cuttings you will clean your patch. Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.00. lb. \$3.50.

Big Boston Lettuce S. D. Woodruff & Sons Selected Strain

We believe that this is the surest heading, most solid and most uniform strain of Big Boston Lettuce ever produced. It forms a very large frame, and, unlike most bulky Lettuce, it heads up quickly and is extremely hard. For Spring and Fall use it has no superior. On account of its hardness and the tough character of the outer leaves, it cannot be surpassed for a shipping Lettuce. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50.

Woodruff's Special Strain Chantenay

A selected stock of the most popular variety of Carrot. Very stump-rooted, half-long and smooth, and of high color. A very large yielder, and the best sort for bunching. Much easier to harvest than the longer types. It is earlier in maturing than the Danvers types. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 50c; lb. \$1.75.

Woodruff's New Long Danvers Carrot

Note that this is distinct from the Half-Long Danvers. Possessing every feature of that popular variety, this new Carrot is nearly twice its length. It is as bright in color as the deepest Long Orange. It is extremely smooth and well formed.

In the districts where Carrots are marketed in boxes, two across will fill a bushel box. In length it is between a Danvers and a Long Orange. It is blunt in growth, with a very small tap root, smoother than any other Carrot grown. It goes to you with our hearty recommendation. Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 75c; lb. \$2.00.

S. D. WOODRUFF & SON'S QUALITY SEEDS

Spark's Earliana Tomato.

Spark's Earliana

Said to be the earliest large Tomato in the world. This Tomato is not only remarkable for its earliness, but for its very large size, handsome shape and bright red color. Its solidity and fine quality are quite equal to the best medium and late sorts. From less than 4,000 hills the originator realized from his first pickings \$725.00 clear of freight and commission, being in the market fully a week before all others. Oz. 40c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.50.

We Are Headquarters for Onion Sets

We believe that there is a difference in Onion Sets. *Our Sets are grown from selected strains of seed. Good seed will produce good results.* We ship only the fancy, small, bright Sets.

White Onion Sets.

Golden Bantam Corn

Connecticut-grown Sweet Corn is the best in the world. Our strain of Golden Bantam is earlier than any other strain grown because it can be planted earlier. It is in great demand in every market on account of its wonderfully sweet flavor. It is the biggest yielder of all early Sweet Corn and commands nearly double the price in any market. Doz. ears 75c; qt. 40c; bu. \$8.00; 100 ears \$4.50.

Early Mayflower Corn

A wonderful early Corn. Will produce more ears than the Early Cory. The ears are larger, and are matured and fit for market within a few days of the Early Dawn. Doz. ears 75c; qt. 40c; bu. \$8.00; 100 ears \$5.00.

Woodruff's Hybrid Cucumber

Our principal reason for selecting this strain was its freeness from blight. It is more robust, hardier and a bigger cropper than any other. The seed has been selected from staked hills, not from selected fruits. It is the finest strain of market Cucumber in existence. It is early, dark green in color, good shipper, and a tremendous yielder, with fruit longer than the usual White Spine. Pkt. 10c; oz. 20c; ¼ lb. 75c; lb. \$2.00.

Woodruff's Rival Parsnip

A new variety of immense popularity. Combines the merits of the Long, Smooth and Hollow Crown varieties. Roots thick through, half-long, pure white and remarkably smooth. Pkt. 5c; oz. 10c; ¼ lb. 40c; lb. \$1.25.

Early Dighton Corn

Two years ago one of our enterprising customers, near Boston, sent us a few ears of corn, claiming that the corn was fit for market seven days ahead of our Early Dawn, and our trials proved he told the truth. Ears nearly as large as Early Dawn, seven days earlier maturing. A real old-fashioned novelty. You all want some of this. Pkt. 15c; qt. 40c; bu. \$10.00; 100 ears \$5.00.

By transplanting, the plants will make immense, tender leaves of good quality, and the headed varieties will often head, making solid heads weighing one pound or more. Give them plenty of room, and they will well repay you for the little time and trouble you take in transplanting. Try it out on a small scale, anyway, and see if we are not right.

Yellow Globe.

THREE FAMOUS CONNECTICUT ONIONS

Connecticut is the home of the celebrated Southport Globe types of Onions, and our stocks of these varieties are as near to being perfect as painstaking care will make them.

During our fifty years in the seed business, we have made a specialty of these three standard kinds of onions.

SOUTHPORT YELLOW GLOBE

The standard heavy cropper, pure yellow Globe sort planted so generally in the United States. Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. 75c; lb. \$2.00; 10 lbs. or more, \$1.90 lb.

Should be pulled before fully ripe and kept under cover to protect from getting weather stained. Pkt. 10c; oz. 40c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.00; 10 lbs. or more, \$2.75 lb.

SOUTHPORT RED GLOBE

BRADSTREET, MASS., December 9.

S. D. Woodruff & Sons, Orange, Conn.:

Gentlemen,—My best acre of Yellow Globe Onions, raised from your seed, went 834 bushels, against 704 bushels on an acre from seed from another dealer, in soil side by side. The best acre of your Red Globe Seed went 724 bushels; from six acres of your Red Globe and Yellow Globe Seed they averaged 675 bushels per acre.

Yours respectfully,

PEDIGREE ONION SEEDS

One of Our Greatest Specialties Is Thoroughbred Pedigree Onion Seed

Yellow Globe Danvers Onions.

We feel justified in claiming for our seed all that can be said about any seed, viz.: that it is as good as can possibly be produced. Now, the reasons for this claim are these: We grow our Onion Seed from selected bulbs. We carefully harvest and cure the seed. We offer it to you direct. The price is as low as we can produce the best seed. Once a trial order, always a customer, has always been our motto regarding Onion Seed. Do not be tempted to buy Onion Seed of uncertain quality because it is a few cents less per pound in price.

ONIONS

For the benefit of any prospective customers, we would state that Messrs. Belden & Sons are one of the largest growers of Onions in the United States, and we would cheerfully refer any prospective customers to them, as to what they think of the quality of our goods and our business methods. There are probably less than one dozen single growers of Onions in the world who produce as many Onions annually as do the Messrs. Belden. We could furnish dozens of similar reports from smaller growers throughout the various onion-producing sections in the United States.

ONION SETS PRICES SUBJECT TO MARKET CHANGES

We Are Headquarters in the East For Choice Philadelphia Grown Sets

CULTURE.—Place the Onion Sets 3 to 4 inches apart, according to size, 2 inches deep, in rows 1 foot apart. Furrow out the soil with a hand plow, and set the onion in this furrow right side up and cover firmly. Twelve to fifteen bushel Sets required per acre.

WHY ONION SETS ARE PLANTED

Onion Sets produce bulbs in one-half the time that is required in raising from seed, thus enabling the planter to get the highest market price for his early onions.

No crop the farmer puts in the ground is surer to return a profitable crop than a crop of Onion Sets. If you set good, sound sets and give them good soil and good culture, a fairly good crop is assured. Markets for past two or three years have been good, and in almost every case crop has been a money-maker.

PEAS

CULTURE.—To grow for market sow in single rows 1 inch apart, and 2 to 3 inches deep, the rows from 2 to 4 feet apart. When grown in garden sow in double rows 6 to 8 inches apart; tall sorts require brush. Begin sowing the extra early varieties as soon as the ground can be worked in March; continue for a succession, every two weeks, until June. One quart will plant 100 feet of drill; 1½ bushels to the acre.

"BLUE - BANTAM" —Is unequalled for combination of extreme earliness and unusual productiveness. The dwarf, vigorous vines average fifteen inches in height and carry really enormous crops of large, deep bluish-green pods, which measure four and one-half inches long and are tightly packed with eight to ten extra large, deep bluish-green peas. The pods are ready to pick as early as American Wonder, while double the size—in fact, they average fully as large as Gradus. Pkt. 15c; lb. 50c; 100 lbs. \$32.00.

LAXTONIAN.—One of the earliest dwarf peas. Vines are vigorous, growing about eighteen inches high, well covered with large, even-sized pods, averaging 8 or 9 to a vine and 9 to 10 peas in a pod. Quality of the best. Pkt. 15c; lb. 50c; 100 lbs. \$32.00.

We raise our own seed stock on our own farms in Aroostook County, Maine.

We store our Potatoes in our own storehouses in Maine, and we ship them ourselves. We are not Seed Potato Jobbers, but Seed Potato Growers. Mr. Bagley, the man in charge of our farms in Maine, is recognized as one of the best Potato men in the United States. IRISH COBBLER POTATO

(S. D. W. Brand)

The wonderful popularity of this Potato is due to its white color, round shape, immense productiveness, superior quality. Can anything more be added to make a perfect Potato?

With the usual care we have taken with our stock of this sort to keep it pure (and there are many impure stocks of it on the market) we shall put them out in 1919 under our own (S. D. W. Brand). Is it not worth a little more to be sure of pure stock. 15 lbs. (1 peck), \$1.00; 60 lbs. (1 bushel), \$3.50; 165 lbs. \$8.00.

POTATOES

HUSTLER POTATO

A NEW LATE CROP VARIETY

We are offering to you this year for the first time a new variety of potato which we have named **HUSTLER**.

We have been experimenting on this potato on our Seed Farms in Maine for the past two years, and have found it to be the greatest **BLIGHT RESISTER** we have ever seen. We are certain that it will surpass all other late varieties. It produces **TUBERS** of large size and attractive appearance, flesh white. Our reports show that this potato will yield from **FIFTEEN TO TWENTY BARRELS MORE PER ACRE** than any other variety we know.

DON'T FAIL TO TRY THIS POTATO, EVEN IF YOU ONLY PLANT A FEW. If you do this, we know that you will plant nothing else next year.

LONG ISLAND WONDER

This new Potato will soon be as well known and as popular as Green Mountain is today. It will be promptly used in place of the Green Mountain as soon as tried beside it, because, under similar conditions, it will yield from **10 to 30 barrels more per acre than Green Mountain**. It has done this in several States, where tried by our customers during the past season.

In Aroostook County, Maine, where it was grown on our own seed farm, it caused wonderful comment. We are receiving orders daily from growers in Maine, who saw our fields, for everyone who did, knows it is to be a real "Wonder."

15 lbs. (1 peck), \$1.50; 60 lbs. (1 bushel), \$3.50; 165 lbs., \$8.00.

Hustler Potato.

This is a most excellent late potato; it does remarkably well on poor soils, and is free from diseases; it resists drought wonderfully well, and produces tubers of large size and attractive appearance; flesh white. It is a good keeper, and when put away in the fall will keep well until Spring. 15 lbs. (1 peck), \$1.00; 60 lbs. (1 bushel), \$3.50; 165 lbs. \$8.00.

RADISHES

Our strains of all varieties of Radish Seeds are grown from selected stock seed. They are true to name and will please you. Radishes are a very profitable crop for the market gardener. They will stand considerable cool weather, and can be planted early; will make a crop in 25 to 30 days, so that other crops may be planted on the ground after the Radishes are marketed.

CULTURE.—Sow the seed in the open ground as soon as danger of hard frosts is over, or in cold frames whenever space is available. Savoy Leaf Spinach.

SPINACH

CULTURE.—Sow in early spring, in drills a foot apart (10 to 12 lbs. to the acre), every two weeks for a succession, and, as it grows, thin out for use. The seed in that case lies dormant through the Winter in the ground.

TURNIP

CULTURE.—For early Turnips, sow as soon as the ground opens in spring. Ruta Bagas should be sown from any time in July to first of August; but the other kinds, for winter use, may be sown from the middle of July to the end of August. Turnips are generally sown broadcast, but much larger crops are obtained (particularly of the Ruta Bagas) by cultivating in drills 18 inches apart, and thinning to 6 inches in the drill. Sow in drills one pound to the acre; broadcast, 2 to 3 pounds to the acre.

LAWN GRASS SEED

HOW TO LAY DOWN A LAWN

From the middle of March to the middle of May is the most favorable time for laying down a lawn. Any soil where Potatoes or Corn will grow is suitable, since it is well that the soil be not too rich, or the Grasses will grow too rapidly.

The ground should be thoroughly ploughed, harrowed and pulverized and brought to a smooth surface.

After sowing, the ground should be rolled in order to press the seed firmly in the soil.

The sowing should be done when the ground is moist or before a rainfall.

Grass seed may also be sown early in the Fall, but must be sown early enough to give the Grass

a good strong growth before Winter sets in.

Every succeeding Spring the lawn should be gone over with a heavy roller, as Winter frosts loosen the soil, and rolling is necessary to compress it again. It is well to roll frequently.

It is advisable to mow the lawn frequently, as it improves the Grass, both in vigor of root-growth and in firmness of texture.

It is not well to cut the Grass too close, especially in the hot Summer months when the roots need some shade to protect them from the burning sun.

A good top-growth is also necessary to protect the roots from severe Winter frosts.

FARM SEEDS

BUCKWHEAT

A field of Buckwheat sown in May, June or July will add much to the comfort of the home during the Winter months. A small quantity of Buckwheat sown in July will make abundant food for quail during early Winter, and it is being sowed by many farmers for that purpose.

Japanese Buckwheat. Lb. 25c; 100 lbs. \$6.50.
Silver Hull Buckwheat. Lb. 25c; 100 lbs. \$6.50.

JAPANESE BARNYARD MILLET

(Panicum Crus-Galli)

This wonderful and valuable new forage plant was introduced in this country by Professor Brooks of the Massachusetts Agricultural Experiment Station. It has proved an enormous yielder in all sections of the United States where tried—hay and fodder of the most excellent quality growing on any soil, yielding 12 to 20 tons per acre, and growing 5 to 8 feet in height. Cattle and horses eat it greedily. Sow in May and June broadcast, 20 to 32 lbs. per acre, or in drills 20 lbs. per acre. Lb. 20c (by mail postpaid, lb. 25c); 10 lbs. \$2.00; 100 lbs. \$12.00, by freight or express.

CONQUEROR OATS

Sweden has long been noted for producing the very best Oats in the world. We are importing from Sweden this season a new Oat which is unquestionably the best Oat produced there. Note the following description: The Conqueror Oat has the highest record for yield of any white Oat in cultivation on good Oat land. We are so thoroughly convinced that the reason so few really good crops of Oats are produced in the eastern states is due to poor Oat seed, that we are giving considerable space to this new variety. No farmer can afford to sow poor Oat seed. Start with a few bushels of the Conqueror and note the great difference in your crops. Price, pk. 75c; bus. \$2.25; 10-bus. lots at \$2.00 per bus.

WINTER WHEAT

Red. Peck \$1.00; bushel \$3.50.

SEED OATS

The Seed Oats we offer are the heaviest, plump-est and finest samples we have ever seen. All put up in sacks of 2½ bus. each, no charge for bags. All are Ohio grown and selected from heaviest producing crops.

BARLEY

We are headquarters on Barley. For sowing for a forage crop it is being used very extensively. The early frost does not kill it, and it can be pastured clear into the Winter. If cut in September it makes good hay. Bus. \$3.25; 5-bus. lots, \$3.00 per bushel.

FIELD, or COW PEAS

THE GREAT SOIL IMPROVER

Makes poor land rich—makes good land more productive—also makes a splendid and nutritious green forage or hay crop, enriching the soil even when the crop is cut off.

The demand for soil-improving crops is steadily on the increase in the North, and no crop is more valuable than Cow Peas or Soja Beans.

Black Cow Peas. Peck \$1.25; bus. \$4.50.

Whippoorwill. Pk. \$1.25; bus. \$4.00.

Soja Beans. Peck \$1.25; bus. \$4.50.

Quantity required per acre, two bushels.

CANADA FIELD PEAS

Canada Field Peas, sown early with Oats, usually make one of the largest yielding and most nutritious Spring forage crops that can be put in, but they should be sown early in April, or not later than the middle of May for best results. Crop short this season. Pk. \$1.50; bus. \$4.50; 10-bus. lots at \$4.25 per bus.

WOODRUFF'S HOME MIXED FERTILIZERS

We have mixed our own fertilizer for use on our extensive seed farms for the past few years and cannot too strongly recommend this method of buying fertilizers. The successful results we have obtained from using WOODRUFF'S HOME MIXTURE on our farms has induced us to offer these goods at a reasonable price to the dozens of our customers who quickly see the extra value offered. The fertilizer we offer is in every respect the same as we use on our own extensive seed farms, is made from strictly high-grade chemicals and mixed by ourselves. We buy these chemicals in 50 to 100-ton lots for spot cash, and by so doing we are enabled to sell a strictly high-grade fertilizer at a much lower price than the same quality can be purchased from manufacturers of ready-mixed fertilizers.

We Call Special Attention to Any Report of the Connecticut Agricultural Experiment Station for the Past Five Years.

We offer the following formula:

Ammonia,	4%	} Spot cash price, \$55.00 per ton, F. O. B. Orange, Ct.	Per 100 lbs., \$ 3.00
Available Phos. Acid,	9%		Per 500 lbs., 13.00
Potash,	3%		

If you compare this formula at this price with any standard goods, you will be able to judge of the great saving in price by using our Home Mixture. Owing to increased cost of chemicals we are obliged to raise our price.

PRICES SUBJECT TO CHANGE

We offer the following high-grade chemicals F. O. B. cars, Orange, Conn., to those who wish to mix their own fertilizer; we recommend, however, our customers to use our Home Mixture, as our facilities for handling and mixing are such that we do it at a minimum cost.

Nitrate of Soda in original bags, about 225 lbs. each, at \$4.00 per 100 lbs.

Animal Tankage, guaranteed	7½% Ammonia	} at \$5.00 per 100 lbs.
	25 % Bone Phosphate of Lime	

Acid Phosphate, guaranteed 16% Available Phosphoric Acid, at \$1.75 per 100 lbs.

All the above prices are for cash with order or before shipment. These offerings will not appeal to the planter who expects 8 months or 1 year's time in which to pay for his fertilizer, but for the buyer who can pay cash we believe they will be attractive. We can almost always ship on the day the order is received.
