WHOLESALE PRICE LIST

of

Gladiolus Bulbs---1919-20

GROWN BY

GEO. S. WOODRUFF, Independence, Iowa

11,

Terms, Cash with order. Net, without discount.
 SIZES—Unless otherwise noted, 1½ inches diameter.

Second size, 1 to 1½ inches.

Third size ¾ to 1 inch.

Prices of second and third size bulbs are usually ¾ and ½ of price of first size respectively.

250 bulbs at 1,000 rate.

25 bulbs at 100 rate.

These bulbs are of my own growing and are healthy and mostly young bulbs from bublets and yearlings.

My gladiolus flowers have taken first premium at the Iowa State Fair for years past, in face of strong competition, tho not grown with any reference to the exhibitions.

Prices are f. o. b. Independence, with no charge for packing except 30 for barrels. Bulbs will be packed carefully to avoid danger from frost.

I have come to the conclusion that there's no use in dividing into so many sizes as we have been doing. Besides, some other growers have been dividing, as I am now doing, and that makes comparison difficult.

Altho labor and everything entering into the cost of growing and handling are higher, I have advanced prices very little—in some cases not at all—and I believe the prices here quoted are very low.

I have had fine weather for growing and my bulbs are the best ever—fine.

I have many other sorts in small quantities.
