MISTAKES WILL HAPPEN WITH THE BEST OF US.

We do not claim to be infallible. We are human. Systematized as is our Organization, a mistake will occasionally creep in; and when it does occur, we are "Johnny on the spot" to make right anything which proves not just as it should be; in other words, ever ready to correct an error. We want no reasonable person to have just cause for complaint.

When you feel justified in making complaint, matter not what the nature, you will be doing us a favor by frankly presenting the case to us without delay. If you fail to do so, it keeps us in ignorance of a possible wrong, thus making us victims of circumstances over which we have no control, because of our having no knowledge of the facts. Procrastination is the thief of time, to say nothing about suspicion overturning what confidence builds—which can be avoided by not putting off until the morrow what can be done today.

O. J. BARNES SEED CO.,

Business Established 1890, Malone, N. Y.

Descriptive and Retail Price List

—OF—

O. J. Barnes Seed Co.

The Best is the Cheapest.

To no one class of merchantable goods does this fact apply more seriously than it does to Seeds, for the reason that the one year of time **lost**, to say nothing of the money wasted on so-called cheap stuff can never be regained. Life is much too short to trifle with time. The most important consideration then upon which the patron should reflect when giving an order is whether the seeds offered will produce for him or her **paying results**, and, in so doing, decide the very best he or she can obtain will be none too good. When anything is cheap as a rule it is necessarily of inferior quality. No reliable firm would sell poor seed and no intending planter wants it for it will not produce for him satisfactory results; it **cannot** any more than a starved or diseased horse can do the work of a perfectly healthy one.

No legitimate business can be **honestly** conducted unless there is a living profit in it.

A man trying to obtain the value of two dollars for one or is seeking for some-

thing for nothing is not a **perfectly honest man** in the true meaning of the word **honest**. Such men know, while they may not be willing to admit the fact, that in order to **even** things up in connection with a pretended **bargain** transaction, someone has got to be swindled. The innocent purchaser, with his senses insulted and his intelligence warning him of his foolish action, seemingly does not care who gets swindled so long as it is not he; that is to say, in plain English, he is perfectly willing that someone else should be swindled and will, in fact, assist all he can in bringing the swindle to a successful termination, stupidly reasoning that some other man is going to **give** him more than the value of his money.

Could he, the purchaser, afford to work for nothing? Would he want to? No. indeed. Then why and by what right expect or demand the same from others? If people were willing to pay a **living** price for an **honest** article, and which is all that we ask, they would **never** have had any just cause for complaint, and not only that, but would save money in connection with their purchases of seeds, as well as gaining time.

Our customers have all the **immense** benefits that are obtained as a natural result of over 25 years' experience in the seed business, our hard work, skill, experimenting, etc. But even all this would not avail were there not connected with it the **utmost honesty and earnestness of purpose.**

Now, to do all this **costs money**; no improvement can be made without it.

Our Seeds are among the Best and Cheapest in the United States.

In making these statements we **mean every word** that we say, and it stands to reason, certainly must so appeal to every **intelligent man**, that we would not be enjoying the **great reputation** we have all over the country, had not **our** seeds **proven** themselves to have been the **best** and they have had the **severest** tests in this North Country and adjoining sections running through a period of over 25 years.

It makes no difference in **what** business a man is engaged, unless he **acts honestly and intelligently** towards it, he **cannot** make it pay, be he farmer, manufacturer or seedsman.

Why has there been so much complaint on the part of purchasers of seeds as a rule? It is because they have purchased from sources that made **prices** instead of **quality** their greatest consideration.

Safe rule to follow:—Buy the **best**, plant the **best** and best of all harvest the **best** results. Our success is the true test of merit.

Now, sir, to **you** as our agent, or to anyone who reads what we have written, does it stand to reason that we can grow, or have grown for us the tested, improved varieties of seeds at same price as the old-as-the-hills varieties with no special merit except they are cheap and used by our fathers and grandfathers. We claim there is reason for progression in the seed business same as in all other lines of business and, therefore, we spare no pains in furnishing our friends and patrons with seeds that are the best known to seed science up to date and our rapidly increasing patronage is proof that our customers appreciate **these facts**.

Prices given in this Price List are subject to change without notice.

We shall, however, adhere as closely as possible to these prices, making no ad-

vances unless it is absolutely necessary. If large quantities are desired or a general list of seeds wanted, we shall be pleased to make special prices by mail. So send in your list of seeds wanted.

We do not claim to compete in prices with some dealers or jobbers who obtain stock of seeds from any source regardless of quality, but we do claim to sell the very best seeds that can be produced and that are suitable for the most critical trade. Cheap seeds should be shunned by all dealers who wish to build up a seed trade and satisfy their customers. The best seeds which are possible to grow are the cheapest in the end.

Bags necessary for safe transportation are charged at cost on wholesale orders only.

We warrant our seeds—While crops occasionally fail from natural causes that are beyond the control of the Seedsman or Cultivator, it is certain that good crops cannot be raised from poor seeds. It is only reasonable that the planter should require some guarantee of the purity and freshness of the seeds he purchases, therefore **we warrant our seeds to be pure and true to name and of strong vitality**—in so far that should any prove otherwise we will refill the order at half price. We will not in any way be responsible for the crop.

O. J. BARNES SEED CO.,
Malone, N. Y.

To Our Numerous Patrons and Friends:

We desire to express our appreciation for whatever favors you have shown us in the past and to assure you that it will be our earnest aim, as well as the aim of our faithful employees, to merit a liberal share of your future orders; and in this spirit, we take a great deal of pleasure and considerable pride in presenting to you Our Retail Price List with descriptions of some of our best varieties for the garden and farm.

This Price List we have prepared with great care, prices being as low as possible, consistent with quality, that cannot be excelled.

Important.

In the List which follows we aim to include only such varieties as we can recommend to our Patrons as first class in every respect. More satisfactory results are brought about than if we embraced in said list many so-called novelties or new creations which so often cause Disappointment and Loss.

Remember, a star (*) is used to mark those varieties which are absolutely the best of their class. Therefore you can make no mistake in ordering those varieties.

Remit by Money Order, Registered Letter or Check, direct to O. J. BARNES SEED CO., 50 Wellington Street, Malone, N. Y.

Upon our patrons' success depends our own.

1890
1916 **BARNES'**

VEGETABLE SEEDS.

Of strong vitality and choice selected strains. We grow and have grown for us seeds as good as can be grown. Remember Barnes' seeds are not "cheap seeds," but are sold at prices as low as seed of uniformly equal high quality can be had anywhere. No matter what price you might pay you would not get better seeds.

Please bear in mind we have marked with a star (*) those that are considered from our trials and also patrons to be the **best** of their respective types for general cultivation.

SEEDS POST PAID BY MAIL.

Prices quoted include payment of Postage on all seeds by the packet, ounce, quarter lb, pound or pint, that is, seeds by the pound as well as all smaller quantities are **delivered free to any address** not only in the United States and its colonies, but also to all foreign countries enjoying with us the benefits of the International Parcel Post. We deliver free also by parcel post **Beans, Peas and Sweet Corn** by the quart and four quarts to any address within three hundred miles of Malone, N. Y., that is, within the first three zones.

We guarantee safe delivery of all seeds whether sent by mail, express or freight.

POP CORN.

Black Wonder, of splendid quality, color

We are Constantly Progressing and Keeping Abreast of the Times.

POP CORN—CONTINUED.

a blue black, large kernels, pops white as snow and a great yielder. This variety is same as used at the celebrated Thousand Islands,

pkt. 10c., pt. 15c., qt. 30c., 4 qts. \$1.00

White Rice Pop Corn, the standard variety, pkt. 10c., pt. 20c., qt. 30c., price per busel given on application.

Quick-pop Pop Corn, an entirely new variety, earliest and best. Most surpassingly delicious in flavor. Enormously productive. As name indicates—Sure and Quick to Pop. Is dwarf in growth, stalks not averaging much over three feet in height, but what it lacks in growth and size of ears is fully made up in productiveness and quality. A real novelty in excellence. A single trial will convince the most skeptical that the Quick-pop Pop Corn is a decided acquisition in the line of improved varieties. Supply small and limited. Secure your seed early if you want an improved variety of extra early pop corn, Sure and Quick to Pop; color light yellow,

pkt. ($\frac{1}{4}$ lb.) 15c., 1 pt. 25c., 1 qt. 40c., 4 qts. \$1.50. Price on larger quantities given on application.

Read the following testimonial from a prominent and reliable farmer of Jefferson County, Northern New York:—

This certifies that I have tested the Quick-Pop Pop Corn and find it is a heavy yielder, producing as it does from two to five ears on a

stalk. That it's fine to pop, and, as name indicates, pops quick. The quality is unsurpassed. I planted it May 12th, 1915, and it was ready to husk and save for seed Aug. 25th, 1915. I consider it a real novelty in excellence in the line of Pop Corn.

MR. ALVIN WRIGHT,

pkt. 10c., pt. 15c., qt. 25c., 4 qts. 75c.,
8 qts. \$1.25, bu. \$4.75.

EXTRA EARLY WRINKLED VARIETIES
THAT DO NOT REQUIRE ANY BUSHING.

GARDEN PEAS—CONTINUED.

Extra Early Wrinkled Varieties. These, while of quick growth and very early maturity, cannot be planted so early as the round-seeded extra earlies in the preceding class, as the dry seed, being wrinkled or shriveled by reason of the large percentage of sugar they contain, is not so hardy and would be liable to rot in the ground if planted before the soil has become partially dried out and well warmed in the spring. They are especially fine for a second planting in the garden, and will come on quickly and furnish a good supply of the finest and sweetest peas early in the season. Allow one and one-half pints for each one hundred feet of row.

Extra Early Gradus, also called "Prosperity Pea." This popular new large-podded wrinkled pea of finest quality matures pods only two or three days later than the small-podded round-seeded extra earlies. The vine has heavy stems with large light-green leaves, and grows three feet high. It produces uniformly large pods, measuring from four to four and a half inches in length, nearly round, and well filled with very large handsome peas of the finest flavor. The peas remain tender and sweet for some time after they are large enough to use,

pkt. 10c.	pt. 20c.	qt. 40c.	4 qts. \$1.25

Barnes' Earliest Pink, pkt. 10c., oz. 25c.

FARM SEEDS.

*Japanese Millet, sometimes called Billion Dollar Grass (*Panicum Crus Galli*), Japanese Millet is one of the most remarkable forage plants ever grown, noted for its luxurious growth, often growing 6 feet tall, remarkable for the immense amount of hay it produces from each acre, and remarkable for its feeding value. It seems to be adapted to all sections, does especially well on low ground, makes more hay than any other type of millet, such as German, Pearl or Hungarian and requires less seed per acre than any other variety. If desired for hay cut just before it heads out, sow seed in May or June for best results, lb. 10c., 100 lbs. \$9.00

Fodder Corn and Field Corn.

I make a specialty of handling the best High Bred Seed Corn in the United States. Some Corn dealers are offering so-called seed corn which they claim is just as good as Barnes' at 20 to 25 cents per bushel less, and even in some cases 50 cents. Don't buy it, if you want **cheap corn**, buy the **Elevator or Milling Corn**, which is still less in price.

IMPROVED FIELD FLINT VARIETIES.

Farmer's Favorite, the earliest of all field varieties 12 rowed, ~~1.75~~ **3.25**
4 qts. ~~55c.~~, 8 qts. \$1.00, 16 qts. \$2.00,
bushel ~~\$3.50~~ **6.00**
Sanford White Flint, \$2.25 bu.

EXTRA EARLY VARIETIES FOR FODDER.

*Early Michigan, an early variety, noted for its early large crop of mature ears, as well as its rich, nutritious quality and leafy habit of growth. Owing to the great demand of this variety I have not been able to fill all my orders for it in the last three years. Hope to have enough for this season's trade. I would advise the booking of orders early, ~~\$2.50~~ ^{3.25} per bu. for extra selected hand-picked quality, selected from crib when being shelled, thoroughly re-screened, removing the smaller tip and screened, carefully, hand-picked and tested before shipment.

90 Day Dent—one of the popular early varieties, but by careful test on our own grounds not quite as early as the Early Michigan, per bushel ~~\$2.50~~ ^{3.50}

Barnes' Improved Mastodon Corn.

Since its introduction more seed of this variety has been sold than any other sort ever introduced. This in itself is a great recommendation for the merits of Improved Mastodon Corn.

It has been tested in Vermont and Province of Quebec, Canada, with very gratifying results. Secure your seed through the O. J. Barnes Seed Co., Malone, or any of their duly authorized agents if you wish to have a carefully selected stock of a fixed pure type expressly for seed purposes.

We have each year carefully selected

our stock of this corn until now we have a fixed pure type of this wonderful fodder corn. It is as important to select and grow a pure and perfect type of corn, as it is to select a well-formed hog or perfect type of dairy animal for breeding purposes.

Special merits of this corn: large **growth**, leafy, nutritious and **early**. The stalks attain under normal conditions a height of eight feet; the foliage is large, healthy and makes unusually fine fodder therefore fine for silos, or for fodder corn to raise for cattle instead of hay. In field tests with other leading varieties planted under precisely the same conditions and given the same treatment, it has averaged about 50 per cent. greater crop than any of the other varieties. The constitution of the corn is such as to resist extremes of weather to the last degree, and we offer it with the conviction that it will prove a sensation with all those who want an early, valuable fodder corn.

Ears average 9 to 11 and 12 inches long, 20 to 30 rows on the cob, many stalks bearing two to five large ears, some weighing $1\frac{1}{2}$ to 2 pounds each and handsome shape. The silo men want it because it grows quick and powerful. Buy the best. Plant the best. **Harvest the best.** Supply limited. Book your orders early *Bush 4.00*

Barnes' Imp. Leaming,	bu. \$2.25 <i>3.50</i>
Barnes' Early Mastodon, <i>4.00</i>	bu. \$2.25 <i>2.50</i>
White Cap Yellow Dent, \$2.50	for extra

select hand-picked kiln dried and tested.

Cuban Giant, Iowa Gold Mine, Red Cob
Ensilage, Southern White, Pride of
North and all other old-time varieties
for sale. Prices given on application.

SOMETHING NEW.

Early 8-Rowed Pedigreed Yellow Flint Corn.

This is an eight-rowed variety; kernels medium, and the ears (many of them 15 inches long) are filled out to the very tips. Corn stalks firm and solid; much larger than the common run of Flint sorts. Under average conditions and without a great amount of fertilizer we have seen stalks of this Pedigreed Corn averaging nine feet in height. Under good tillage from 18 to 20 tons per acre of fodder has been produced.

The rows of kernels are practically straight, small butt, and husks easily, and every ear is hand sorted that we offer for Seed. It is grown in New York State, and best of all will mature in eighty-five to 90 days. The stalks make the Best of Fodder.

The Ears are high, therefore saves waste if **Harvester is Used**.

Order early as the supply is small and limited.

For sale by **O. J. Barnes Seed Co.**, the Northern New York Seedsmen, or any of their Authorized Salesmen. *Quash 5.00*

~~Extra Early 8-Rowed Red Glaze White
Flint, the earliest of all the 8-rowed~~

~~Flint varieties. A good grower and in an ordinary favorable season will give a good crop of ears that's sure to mature and therefore give a most excellent crop of fine shelled field corn for cattle, hogs and poultry. Supply is limited, order early, you can save your own seed if you wish.~~

~~qt. 20c., 4 qts. 75c., 8 qts. \$1.25. bu. \$4~~

SOMETHING NEW.

Golden Glow (or Wisconsin No. 12) claimed to be the earliest good sized variety of Dent Corn in existence. Something early and yet large enough for a profitable variety for general culture as a fodder or ensilage corn. It is noted for giving a big crop of good sized ears. It was awarded first prize at the International Corn Show in Wisconsin (year 1913) as the best yellow Dent Corn. Description:—Golden Glow is a pure yellow Corn, most attractive in color and appearance, ears are fairly large, averaging about eight inches in length, symmetrical in shape, slightly tapering with exceptionally well filled tips; kernels of good length for such an early corn, very free from a tendency to flintiness; stalks large and strong with abundant foliage, making it therefore a very desirable variety for fodder or the silo. Supply is limited, send in your orders early,

Sir Walter Raleigh	

An entirely new variety of potatoes, viz:
Green Mountain, Jr. Wonderful to
yield, fine for market and table, pure
white, vigorous and healthy,
30 lbs. \$1.50

Early Queen, an improved variety of
extra early potatoes, that for quality
cannot be excelled and also productive,
has many other good traits, which tak-
en together renders it the most valuable
early potato of recent introduction.
Supply small and limited, 30 lbs. \$1.50

Wisconsin 6-Rowed Pedigreed Barley.
The World's Champion 6-Rowed Barley.

First:—It out-yields all others.

Second:—Plumpness of grain, unusual-
ly fine plump kernels.

Third:—Stiffness of straw, stands up
better than the ordinary variety.

Fourth:—Vigor of growth taller than
any other, stalks sometimes 5 feet high.

Fifth:—Heads more completely filled out than any other variety.

Sixth:—Kernels all alike. An important matter with Barley.

Seventh:—Many speak of the unusually long, large heads.

Eighth:—All round excellence. As near perfection as perhaps its possible to get Barley.

Ninth:—And last reason. The best because it has been awarded more prizes than any other variety.

Place orders early, small supply. Price $\frac{1}{2}$ pk. or 4 qts. 50c., 1 pk. or 8 qts. 75c., 1 bu. up to 5 \$2.75, 10 bu. per bu. \$2.65.

The Standard 6-Rowed Barley. fine, clean, first-class seed, next best to the pedigree Barley, 4 qts. 40c., 8 qts. 65c., 1 bu. \$2.25, 2 bu. and upwards per bu. \$2.00. Order quick, going fast.

Dwarf Essex Rape.

An immense amount of green feed, and its nutritive value is nearly twice that of clover. It may be sown any time from early spring until September with grain or alone. A word about the seed. We aim to get what is entirely free from bird rape, mustard or anything of that sort. The Dwarf Essex is the only desirable variety. Makes a splendid fall feed for cattle, sheep or swine. Rape is usually ready for use in about 8 or 10 weeks from date of seeding. 10 lbs. seed great plen-

ty for one acre. Looks like turnips in growing. Owing to war in Europe seed is higher than usual, prices:

lb. 20c., 5 lbs. 80c., 15c per lb over 5 lbs. *per #25d any quantity*

Sweedish or Washington Oats. No. 9422.

Of this grand white branch variety, Prof. Moore at experimental station says: "New, heaviest, thinnest hull, stiffest straw, best of thirty-six varieties; weight 36 to 40 pounds measured bushel." Prof. Carlton, of U. S. Department of Agriculture, pronounces the variety at the head of the oat kingdom. Under unfavorable circumstances they yielded 80½ bushels per acre, weighing 37½ lbs. per bushel. These are the finest oats we have ever grown, straw 4 to 5 ft. tall, many heads 8 to 11½ inches, do not rust, stand up well, plump meats make it the greatest serial of all oats. One party says yield is double to Michigan Wonder. Another says 20 bushels more than Welcome or Lincoln. In 1904-1905 reports of yields were from 80 to 115 bushels per acre. Our grower says, best oats we have ever grown, about one week earlier than others, stands up well, does not rust, think if sown thicker yield would have been at least 90 bushels per acre. These oats in Vermont state have given on a large acreage 80 bushels to the acre. Price, 8 lbs. or 1 pk. 75c., 16 lbs. or ½ bu. \$1.25, bu. \$2.00.

Average Time Required for Garden

Seeds to Germinate.

	Days		Days
Beans	5-10	Lettuce	6-8
Beets	7-10	Onion	7-10
Cabbage	4-8	Peas	6-10
Carrots	12-18	Parsnips	10-20
Cauliflower	4-8	Pepper	9-14
Celery	10-20	Radish	3-6
Corn	5-8	Salsify	7-12
Cucumber	6-10	Tomato	6-12
Endive	5-10	Turnip	4-8

Average Vitality of Seeds.

	Years		Years
Beans	3-6	Onion	2-7
Beets	5-10	Parsnip	1-2
Cabbage	5-10	Peas	3-7
Carrots	4-8	Parsley	3-8
Cauliflower ..	5-10	Pepper	4-7
Celery	6-10	Pumpkin	4-8
Corn, Sweet ..	3-5	Radish	5-10
Cucumber ..	6-10	Salisfy	2-8
Lettuce	5-9	Squash	5-10
Muskmelon ..	5-10	Tomato	4-9

Seeds lose in vitality each year, some varieties much faster than others, and much depends upon the strength of vitality when seeds were harvested and how and where harvested and how and where seeds are kept. Seeds keeps to the limit of the above table in most cases would likely have very low or no vitality.

Barnes' Poultry Yards.

Barnes' Improved strains of Silver Campines. If you are looking for the breed that will beat them all as layers of large, chalk white eggs you should certainly have the Improved Silver Campines. They are quick to mature, laying within 5 to 6 months from time of hatching. They are hardy, active and precocious growers, quick to mature and practically non-setters. Eggs are fertile and usually hatch extra good. We guarantee our stock to be pure white egg strain and the eggs from my yards are all perfect

as to size and color. Our Silver Campines are an exceptionally fine lot of Prize Birds never failing to capture the prizes wherever exhibited as we are prepared to prove. Sweepstake prizes at Malone, Ogdensburg, Thousand Islands Poultry Show at Clayton, N. Y., and every other place wherever exhibited.

Read the following testimonials from our patrons:

Franklin County, N. Y., Feb. 6th, 1915.

To All Whom it May Concern:—

This certifies that I purchased of O. J. Barnes & Son, Malone, N. Y., last spring one setting of eggs (15) Silver Campines and from that setting raised four cockerel prize birds and seven pullets and that last week I was awarded first prize from the Franklin County Poultry Association at their Poultry Show for a young pen and also 1st prize for best cockerel bird. The birds proved to all be of an improved and strictly thoroughbred type.

JOHN S. ADAMS.

Jefferson County, N. Y., Sept. 1st, 1915

I also purchased one setting of eggs, Silver Campines, and I raised eleven prize birds, 8 pullets and three cockerels.

MRS. FRANCIS RUSHO,

Jefferson County, N. Y.

Don't buy until you write us and get our prices. All our birds are prize winners. Prices for eggs and birds given on application.

O. J. BARNES SEED CO.,

Malone, N. Y.

STOP THAT AWFUL WASTE OF GOOD EGGS!

Breeders everywhere are throwing from thirty to forty per cent. of their good hatchable eggs on the dump every time they make a hatch—and they are doing it with a full knowledge that the chicks they could have hatched would represent a mighty handsome profit. Many of these breeders have been led to believe that a 60 or 70 per cent. hatch should be entirely satisfactory—and so it is to the people who make and sell the incubators—but why should we be satisfied with 60 or 70 per cent. hatches when we know that a truly successful incubator should hatch every hatchable egg we put in it.

We are agents for an incubator that we not only claim will hatch every hatchable egg you put in it, but we sell it under an absolute guarantee that it will do all we claim, and allow a 40 days' trial with every Buckeye incubator we sell. Whether you are a beginner or a big breeder we want you to try a Buckeye—any of the six sizes—and see just how easy it is to produce a big, strong chick from every hatchable egg. Whether you already own a lot of incubators or never saw one before, you get the same guarantee and 40 days' trial—you must get a chick from every hatchable egg the first time you try it. Let us show you a BUCKEYE, fire proof, insurable. The perfect Hatcher! Made in six sizes, 60 eggs to 600 eggs and we sell them as low as \$7.50. "Anybody can hatch chickens with a Buckeye."

See the Kant Krowd, Klose Kontact, Fresh Air Brooder. It's a Wonderful Life-Saver.
