A FULL LINE OF FARM
GARDEN & FLOWER SEEDS

Poultry Foods and Spraying Material

Phone No. 192

P. O. Box 236

DWARF ESSEX RAPE

This makes the most valuable pasture for hogs. It can be planted early and be allowed to grow up. The hogs can be turned in and eat it down. It can be done several times this way every year. It also can be planted late with corn, and when the corn is cut the hogs can go into a very fine pasture. It only requires five pounds to the acre, and it is very cheap seeding.

MANITOBA OR HOG MILLET

The seed is very rich and thus specially valuable as a hog food. A very much-prized peculiarity of this millet is that the seed ripens while the stem is yet green, thus, if cut promptly, can be threshed for the seed, while the hay, after being threshed, will make excellent fodder. Sow same as other millet.

GERMAN MILLET

No other plant that has yet been introduced here for grass or forage has been able to produce anything approaching the enormous yield of this plant when grown under favorable circumstances. It has produced from four to five tons of hay to the acre, and from seventy to eighty bushels of seed. Sow half a bushel to the acre; fifty pounds to the bushel.

Millet is the best of all hay crops for late planting where other crops have failed. One of our leading farmers in this vicinity sowed millet on the 30th of last June and cut the field on August 29th, the average yield being five and a half tons to the acre. Give it a trial.

SORGHUM SEED

With Sorghum Molasses at \$1.50 per gallon and Sorghum Seed at \$5.50 per 100 lbs., there is nothing more profitable for a farmer to raise than Sorghum. With these prices a farmer can realize \$150 from an acre. Give it a trial.

To the Trade--We Take Pleasure in Presenting Our Wholesale Price List of Seeds for 1921

We have spared no pains or cost to procure a stock of fine quality, growing them ourselves, or having them grown for us by the best and most reliable growers in America and Europe, and feel confident that they will do credit to all who handle them. Our prices you will find as low as those of any other reliable seed house, freight considered.

We have the largest and most complete stock between Denver and San Francisco. All new and clean. Our entire time is devoted to the seed trade. We have no side issues. When in Provo call and see us.

Our manager has had over forty years' experience in market gardening, nursery and seed business, and we expect to give our customers the benefit of his experience in the selection of seeds, etc. You may rest assured there are no varieties mentioned in this list but what we would plant ourselves for profit.

The seeds we offer are tested under our personal supervision with a Standard Government Seed Tester before shipment, and every care is taken

THIS YEAR WE MUST COMPLY WITH THE NEW SEED LAW.

Our seeds are tested and on each package you will find the Germination, Purity, Inert Matter and Weed Seeds, so stated as to assure you of its exact contents. Safeguard against crop failures. Buy seeds that are acclimated, hard picked and fresh. When you desire further information as to the reliability of our seeds. We refer you to the Farm Bureau's, located in nearly every county in the state.

PACKAGE SEEDS.

We put up and sell more package seeds than any house in the West. Every package we send out is made here in Provo. Our new Jumbo Flower Papers have the reputation of being the handsomest and best filled packages on the market. See page 7 for prices and varieties.

DRY FARMS.

We carry a fine line of seeds for dry land. Corn, Sorghum, Millet, Kaffir Corn, Milo Maize, Sudan Grass, Feterita; also Grains and Grass Seeds.

We Carry a Large and Choice Stock of Grass Seeds and Field Seeds.

Adapted to the climate of our Western States. Orders always filled promptly at lowest market prices. See our special quotation sheet, which is mailed on application to all wholesale customers regularly. Usually issued once a month.

We Make Special Rates on Large Lots.

We have a fine and complete stock of everything in our line at low prices, and can fill orders, small or large, promptly at any time.

Our Railroad Facilities.

Provo is a Utah common point. Railroads diverge in every direction, and make this a splendid shipping point.

WHOLESALE PRICE LIST

Our Terms: All claims must be made within three days after receipt of goods. All Grass, Field Seeds, Potatoes and Onion Sets are net cash, subject to sight draft in ten days from receipt of invoice. All Garden and Flower Seeds, sixty days from receipt of invoice. two per cent. discount for cash in ten days. From new customers we require cash or satisfactory references.

These prices are for not less than ½ lb., when priced per pound; and not less than 10 lbs. when priced per 100 lbs.; Peas, Beans and Corn not less than 15 lbs. at the 100-lb. rate. When less than these quantities, a proportionate advance will be made. Prices are subject to variation without notice. No invoice made for less than 10 cents. These prices do not include charges for bags and boxes, which are extra at cost.

NOTICE TO PURCHASERS

When not otherwise instructed, we ship most seeds in seamless sacks, for which we charge 65c each. Quantities of 5 to 25 lbs. are usually in cotton sacks, for which we charge 10c each. In every instance where sacks are charged we give net weight of seeds. These sacks will be accepted in return at par when in reasonably good condition.

If we make error in filling your order, write us. Do not return the goods until so instructed by us.

Positively No Drayage.

All prices subject to change without notice.

10 lb. at 100 lb. rate, except beans, corn, peas and where noted

PEAS.

PEAS are a leader with us. Our stock is grown for us in high mountain valleys, and are of very high germination.

For early Peas we recommend Gradus and American Wonder. For medium early or main crop we recommend the big podded pea, the Strategem.

Canary	15.00	.20

One lb. Cartons Mixed Bird Seed,
each 12c.

POULTRY FOODS.

We are just in receipt of a car load
of poultry foods, and with eggs at the
price they are now bringing nothing
pays better than to feed your poultry
with these poultry foods. There is
also a good profit in it for those who
retail this line. Our prices are as
follows:

Per 100 lbs.

Cotton Seed Meal	\$4.75
Green Cut Meat and Bone.....	4.75
Meat Meal	5.00
Blood Meal ..	6.50
Bone Meal ..	4.50
Beef Scrap, ground	5.50
Charcoal, Baby Chick size.....	4.75
Charcoal, Hen size	4.75
Oyster Shell	1.75
Ground Oil Cake	5.50
Mica Crystal Grit	1.50
Milk Mash	3.50

BABY CHICK FOOD—This is a preparation for small chicks which we have manufactured for us and sell in large quantities. It is just the thing to start chicks out with. It contains ten varieties of seed, besides grit, and charcoal. Put up in one hundred pound sacks at \$3.75 per hundred pounds. Do not fail to give this a trial, and you should sell large quantities of it.

CALF FOODS.

Calf Meal, Fancy, per 100 lbs....\$5.50

Calf meal is a preparation made for fattening calves without milk, and is a great saving and gets good results. Give it a trial and you will never be without it.

SULPHUR, strictly pure, per 100 pounds, \$4.00; per pound, 5 cents.

CHILI GOODS.

THE SAN LUIS VALLEY or MEXICAN FIELD PEAS—The cheapest and easiest produced stock food. What corn is to Kansas, Nebraska and Iowa these peas are to the mountain states, Colorado, Utah, Idaho, Wyoming and Montana. With these peas one can raise hogs, fatten them and make better pork with less expense than the prairie or corn raising states. How to do it. Prepare your ground the same as for grain. Sow broadcast 75 to 100 pounds of the peas and 30 pounds of oats or barley to the acre. The grain is put in to hold the peas up from the ground while growing. Mark out for irrigating the same as for grain and irrigate often enough to keep the ground moist, not wet. Sow just as early as you can work the ground as frost does not injure them. If cut before fully ripe they make splendid hay for all kinds of stock. If wanted for hogs let them ripen, then cut part of them and put in stack for stock—hogs and brood sows. Then put a hog-tight fence around the balance, turn in your swine and let them gather their own food. Here are a few advantages that peas have over any other kind of crop for hog food. First they will grow and do well as high as 8,500 feet. Second, frost does not injure them and they can always be depended upon to make a crop, which can not be said of small grain. Last season in the high mountain valleys thousands of acres of wheat, oats and barley were completely ruined or badly damaged by early frosts. Third, the hogs and sheep gather them and there is no expense for husking, cutting or threshing. Fourth an acre of peas will fatten just as many hogs or sheep as an acre of corn. We know of farmers who raise and sell three hundred head of hogs off 160 acres of land in one year and get from four to five thousand dollars in cash. They do this by having part of their land in alfalfa pasture for summer feed and the balance in peas. Fifth, peas are a splendid fertilizer. Lands that have become exhausted by a continued small grain raising are often brought back to their original richness.

SUDAN GRASS—Another season has fully demonstrated the fact that Sudan Grass for making hay is the wonder of the age. Just think of a grass standing thick and heavy, furnished with an abundance of broad blades, growing during the past dry season, in a section where there was only one light shower after the grass was up, five feet high for first cutting, and three feet for second cutting, and making a yield of over five tons per acre, where all other crops were a total failure. Think of a grass that with irrigation, made a growth for first cutting of seven to eight feet, and of second cutting of from three to four feet, making a yield of seven to eight tons per acre of hay equal to Timothy.

Think of a grass that a single seed will produce from 100 to 150 stocks of good hay, then combine all these good qualities, and you have some idea of the value of this great forage plant.

We are headquarters for pure northern grown seed.

WHITE TEPARY BEANS.

We offer as the most prolific edible bean in existence. As will be noted it is of an attractive white color and of small size, cooking readily with a pleasing flavor. It is of a different botanical family from other beans being much more prolific, is drouth resistant and immune to many diseases and insects that harm the common beans. It is a native of Arizona where it has survived centuries of Indian farming and perpetuated itself with a nine inch rainfall. While it responds to rich soil, cultivation and moisture it will come nearer making a crop on the desert or poor land than any crop we know of.

If you are interested in dry farming, send for our circular, in which you will find prices and descriptions on all kinds of dry farm seeds.

BULBS

We have a very fine Stock of Dahlias, Paeonies, Cannas, and Gladiolas. Please note the Low Prices. We can assure you that they are first-class in every respect

SEEDS FOR DRY FARMS

There is nothing that can be grown on dry farms better than non-saccharine sorghums and millets. They are not only valuable for the grain they produce, but are very profitable for the large yield of forage which they produce and which can be fed to all kinds of live stock. We wish to call your attention to the Non-Saccharine Sorghum Feterita. This variety is from twenty to thirty days earlier than any of the others. It has been known to yield a heavy crop without a drop of rain. It yields from 60 to 80 bushels of grain and 3 to 4 tons of forage per acre. It takes from 3 to 5 pounds of seed per acre.

We also carry the following: Dwarf Milo Maize, Jerusalem Corn, White and Red Kaffir Corn, German, Siberian, Common and Hog Millets. Write for Prices.

We Carry a Full Line of Spraying Materials, Spray Pumps, Hose and Nozzles. Write for Prices

CORN FOR SILOS

For years we have been strong advocates of the Silo and the past two years has convinced us that the Silo has come to stay. When five acres of Corn will fill a 100 ton Silo with feed equal to the best hay, it is no wonder that the Farm Demonstrators have advised the building of 1000 new silos in the State of Utah during the coming year. We have secured a large lot of Seed Corn which shows a high germination, testing above 90 per cent pure. We can recommend the following varieties for altitudes lower than 5000 feet and they will produce a yield of from 20 to 25 tons per acre: Iowa Gold Mine, Iowa Silver Mine, Leaming and Stowell's Evergreen Sweet Corn.

In altitudes above 5000 feet we would advise planting the following varieties: King of the Earlies, Pride of the North, Sanfords White Flint and Australian White Flint. These varieties yield from 15 to 20 tons per acre. The common White Flint which has been grown in Utah for many years is a much smaller variety and yields only about 10 to 15 tons per acre.

Every farmer who is raising cattle, hogs or sheep should have a Silo.

Buy your Seeds Now. Don't Wait. The price is increasing every day. Corn for Silos a Specialty.

MANCER BEETS—HALF SUGAR

A distinct type of Sugar Beet, producing not only a good crop, but roots of giant size and richest feeding quality. It has yielded 55 tons of clean roots per acre, 3 1-2 tons per acre more than the heaviest producers of other sorts on the list. They have small, clean, top, and are easily trimmed. The roots are heavy, clean shaped, holding their size to the ground, when they gradually taper to a point, stand upright, and three-fourths of their lengths out of the ground. They are so easily harvested that they may be turned out by a push of the foot. The color of the roots are bronzy green nearest the top, the body a light green shade, and changing to a bright rose above ground. The flesh is white, solid, tender and very sweet and imparts a rich, pleasant flavor to dairy products, when fed to milch cows. Our Half Sugar is the most profitable Stock Beet to grow.
