from

HOWARD E. GATES

FLORIST

THE FLOWERPHONE 121

At The Sign of The Gates

West Center and Illinois Anaheim, California

A PERSONAL WORD FROM HOWARD E. GATES

We believe we have the fastest growing nursery and florist business in Orange County. Our average monthly volume of business for 1920 was ten times the business of our first month, April, 1919.

This growth we attribute to the following reasons.

1. Absolute honesty in our business dealings. Telling the truth about our stock and guaranteeing it. If by accident you buy something that is not true to name we will replace it upon your report.

2. Handling a large stock of the choicest, fresh cut flowers in their seasons.

3. Keeping on hand a large stock of wire designs and accessories for making up floral designs on short notice.

4. Carrying the largest number of varieties of choice rose plants carried by any florist in Orange County.

5. Doing nothing but the best work in our lawn jobs and whatever we attempt.

6. Selling at a fair price, both to you and ourselves.

7. By trying to keep one jump ahead of our market.

8. By giving the best possible service in deliveries and accommodating our patrons.

9. Giving telephone orders the best attention.

10. We are in the business because we like it, not because we expect to get rich.

We Thank You

HOWARD E. GATES

Kentia for house	5.00
Phoenix Canariensis, date palms	2.00

ROSE LIST

By testing many kinds of roses we have found the following list to be the best for this locality. Varieties marked with * are the varieties we recommend to customers who are not well enough acquainted with roses to make their own selection.

These roses are own root, field grown, two year old plants, except the larger size Los Angeles, which have been budded. We find own root roses more satisfactory than grafted or budded. We receive them bare root and put them into gallon cans from which they can be transplanted to the ground any day in the year.

THE NEWEST ROSES

Lillian Moore, Indian yellow, \$1,000 prize winner at

Panama-Pacific Exposition	1.00
*Los Angeles, flame pink, \$1.50 and	2.00

The Florist Telegraph Delivery Association

The Florist Telegraph Delivery Association is an association composed of nearly two thousand up to date florists who have put the delivering of flowers at distant points on a business basis. They have made it possible to order flowers through your florist and have them delivered thousands of miles away in an hour or two. The service is guaranteed all the way through. A special telegraph blank has been made to facilitate this work.

There is no additional charge for this service, except the telegraph toll and if the order is placed early enough it may be mailed.

We are members, and have information on the best way to reach any village in the country. We have current eastern price lists on file too.

Try it.

YOUR LAWN

The planting of a lawn is a task that should be trusted only to honest and experienced workmen.

Honest workmen, because a lawn requires a certain amount of seed and labor that the dishonest might skimp on.

Experienced workmen because to secure a smooth, even surface and to scatter the seed evenly are things that only the experienced laborer can do.

Every man to his trade and lawn making is a trade.

Have Your Lawn Made By Men Who Know

Our usual charge for a new lawn in Anaheim is \$2.50 per hundred square feet. We furnish tools, seed, labor, commercial fertilizer and cover with shavings. In cases where there is much soil to be moved or other adverse conditions to be met a higher charge must be made.
