Herausgegeben von der

Gesellschaft für Höhlenforschung und Höhlenkunde zu Berlin.

Bearbeitet von

Dr. Benno Wolf

Vorstand des Haupt-Verbandes Deutscher Höhlenforscher.

Diese Arbeit enthält die Aufstellung der gesamten lebenden Tierwelt in Höhlen, deren Größe dem Menschen den Zutritt ermöglicht. — Die Fauna der Micro-Cavernen (wie Maulwurfsnester etc.) und die der Erdspalten, sowie die Quellenfauna sind also nicht mitberücksichtigt. — Das Werk behandelt nicht nur die Tierwelt, die nur in Höhlen vorkommt und sich dem Höhlenleben besonders angepaßt hat, sondern die Gesamtheit derjenigen in Höhlen vorkommenden Tiere, von denen nachgewiesen ist, daß sie in einer irgendwie gearteten biologischen Beziehung zu den Höhlen stehen. Ausgeschlossen sind nur solche Tiere, von denen ganz offenbar ist, daß es an solcher biologischen Beziehung fehlt.

Die Einteilung des Werkes ist so übersichtlich getroffen, daß der Benutzer des Werkes stets sofort die von ihm gewünschte Literatur über die Höhlen und deren Fauna findet:

1. Hinweis auf die Herkunft der Höhlentierwelt, ihre Lebensbedingungen und ihre Anpassung an das Höhlenleben.
2. Die gesamte Höhlenfauna-Literatur (in Werken und Zeitschriften).
3. Die Höhlen geographisch geordnet (also nach Erdteilen, Ländern etc.) soweit ein Vorkommen lebender Tiere in der Literatur bekannt ist. — Angabe der auf jede einzelne Höhle sich beziehenden Literatur in faunistisch-geordneter Übersicht.
4. Die Tierwelt systematisch und geographisch nach Fundorten (Höhlen) geordnet.
5. Register der Tiernamen (Synonyme besonders gekennzeichnet).

Der Umfang des Werkes ist auf etwa 70–80 Bogen zu je 16 Seiten geschätzt. Es erscheint in Lieferungen zu je 8 Druckbogen und soll auf den Zeit-Raum von 3–4 Jahren verteilt werden.

Der Subscriptions-Preis für Bezieher des ganzen Werkes ist pro Bogen etwa M. 1,65 (= holländ. Fl. 1.—) bzw. für jeden Teil (statt M. 18.— = holländ. Fl. 10.60) M. 13,50 = holländ. Fl. 8.—.

Bitte **ausführlichen Prospekt umgehend** zu verlangen.
