THE HUNTSVILLE NURSERIES

Growers of High Grade Nursery
Stock for Nearly Fifty Years

HUNTSVILLE - - - ALABAMA

CLP
2-23 1922

Introductory

IN this catalog you will find a list of selected trees, shrubs and plants that we know will prove entirely satisfactory over a wide range of country. We have confined our offerings only to those varieties of proven merit. You will not find any freaks listed nor will you find an exaggerated description of the merits of any of the stock offered. ¶ We have been growing trees and plants here at Huntsville for nearly fifty years, and believe that we are competent to handle your order in a manner that will be entirely satisfactory to you. The experience we have gained during these years is at your service, and we would be glad to help in the selection of proper varieties, arrangement of planting, or in any other way possible. ¶ Below we give some testimonials which prove that our efforts to please have been successful. We solicit your order with every assurance that you will get value received for every dollar spent.

THE HUNTSVILLE NURSERIES - - Huntsville, Alabama

And You Will Be Satisfied Too

MICHIGAN. "Spirea arrived in good condition and am well pleased with the stock you sent."

ILLINOIS. "I received the privet all right, and I want to say they are far better than my expectations. They are graded excellently."

INDIANA. "Trees arrived yesterday in fine shape."

OHIO. "Enclosed find check for the California Privet received from you, which is very satisfactory."

ALABAMA. "Peach trees were certainly fine."

UTAH. "Peach and Pear have arrived in good condition. I compliment your packers. They certainly know how to put them in the box."

COLORADO. "Have handled many cars and boxes of your stock and never handled better."

MISSISSIPPI. "The 100 trees I got from you last season have grown remarkably well, and I expect to send an order for 200 this year."

OHIO. "The stock I received from you last season gave good satisfaction."

KANSAS. "Order No. 341N, per express, in four bales arrived today and opened up entirely satisfactory. Thanks for promptness."

UTAH. "Trees I got from you years ago were quite satisfactory."

GEORGIA. "The undersigned ordered 300 Peach trees from you three years ago. Am glad to tell you we are well pleased with them. They had fine fruit on them and those who see them think they are the finest in the neighborhood."

GEORGIA. "We had splendid results from your trees this past season, only losing two out of the purchase, and they are making fine growth."

How to Send Your Order

ORDER BLANK enclosed in catalog should be used in every case. Please be careful and fill in all blank spaces with the information requested. Also be careful to write name of variety wanted, size and price, very plainly. This helps to avoid errors.

TERMS are cash in every case, although we will ship C. O. D. when 25% of the amount is sent with order.

REMITTANCES should be made by Bank Draft or Postal or Express Money Orders, but we will accept personal checks where it is impossible for you to secure Postal, Express or Bank Drafts.

SELECTION OF VARIETIES. We can sometimes help in the selection of varieties, and a great many customers prefer to leave the selection with us. We will be glad to give you benefit of our experience and judgment in making up the assortment.

SUBSTITUTION. Please state on the order, in the proper space, whether or not we shall substitute in case we are out of any of the varieties wanted, otherwise order will be shipped short.

SHIPMENT of nursery stock will travel better by express, and we recommend this plan wherever possible. However, we hope that all of our customers will state how they prefer shipments to move, whether by freight, express or parcel post.

CLAIMS will not be entertained unless made promptly on receipt of goods. We shall be glad to investigate any claim provided it is made as soon as the stock is received.

GUARANTEE. We guarantee to deliver all trees and plants to the forwarding company in perfect condition, but do not guarantee that all the stock will live, as too much depends on the treatment the stock receives after it leaves our hands.

NON-WARRANTY. We give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any trees, plants or bulbs we send out, and will not be in any way responsible for the crop. We do agree, however, to replace free of charge or refund the purchase price of any trees or plants that prove untrue to name, but we will not be responsible for a larger amount, and all sales are made with this understanding

Suitable Distances for Planting:

Apples, standard.....	30 to 40 feet.	Figs.....	15 to 18 feet.
Pears, standard.....	20 to 30 feet.	Currants.....	3 to 4 feet.
Peaches and Apricots.....	16 to 20 feet.	Gooseberries.....	3 to 4 feet.
Cherries, sweet.....	18 to 20 feet.	Raspberries.....	3 to 4 feet.
Cherries, sour.....	18 to 20 feet.	Blackberries.....	5 to 7 feet.
Plums.....	16 to 20 feet.	Strawberries.....	3½ by 1½ feet.
Grapes (bunch).....	8 to 10 feet.	Pecans.....	60 by 60 feet.
Grapes (muscadine).....	10 to 25 feet.

Belle of Georgia Peaches

Delicious Apple

Apples

We recommend that you plant apple trees 30 feet apart each way and wherever possible the trees should be planted in the fall—November or December are the best months.

We offer only one-year trees, as they have proven more desirable and will make a more satisfactory growth.

EARLY HARVEST. — May and June. Medium size; pale yellow; slightly acid; good quality. Ripens at a season when no other apple is in. Should be in every orchard.

RED JUNE. — Early. Medium size; dark red; white flesh; juicy; sub-acid; ripens over a long period; bears well and a very heavy cropper.

YELLOW HORSE. — Late summer. Large size; yellow—slightly red where exposed to sunshine. One of the best cooking apples and fills in between seasons better than almost any other. Highly satisfactory all over the South.

GRIMES' GOLDEN. — Early winter. Large; golden yellow; of high quality. Tree vigorous and a heavy bearer.

JONATHAN. — Early winter. Medium size; dark red; excellent quality; tender, juicy and of rich flavor; early bearer and vigorous grower.

DELICIOUS. — Late fall. Almost too well known to need description here. Fruit large; dark red; fine-grained flesh; crisp, juicy and of high quality. A splendid shipper and prolific bearer.

ROME BEAUTY. — Winter. Large and handsome; yellow with creamy cheek. Almost covered with bright red where exposed. Its large size and beautiful appearance ren-

der it a valuable market sort. Of vigorous growth and a heavy young bearer.

STAYMAN'S WINESAP. — Winter. Larger and more prolific than the old Winesap. Rich, dark red; firm; fine-grained and juicy; adapted to a wide range of soils and climates.

WINESAP. — Winter. Medium size; dark red; good quality; keeps well. Tree is a hardy grower and good bearer. A popular variety and well liked everywhere.

YATES. — Winter. Small; yellow with dark red stripes. Not, strictly speaking, a commercial apple, but because of its sure and heavy crops has proven one of the most desirable Southern sorts.

Prices.—4-5 ft., 75c each; \$50.00 per 100.
3-4 ft., 50c each; \$35.00 per 100.

There is room for one or more apple trees around almost every home. The satisfaction from the fruit will more than offset the price of the trees.

Pears

Kieffer Pears

We are listing several of the most desirable Pears. All of the varieties listed are adapted for Home Orchards, but for commercial orchard planting Kieffer has proven the most profitable for this section. Pears should be planted on rather high, well drained land, and should not be too heavily fertilized. Excessive moisture and fertilization will induce blight on Pear.

KOONCE. — Very early. Tree a vigorous grower; comparatively free from blight. Fruit medium to large; skin yellow; flesh highly flavored.

BARTLETT. — Probably the most popular of all pears; large; juicy; yellow; sweet and of high value for marketing or canning purposes; bears early and abundantly.

DUCHESS. — Very large; fine quality; keeps well into winter. Tree a strong vigorous grower.

BUERRE de ANJOU. — A large, greenish pear shaded with crimson; highly flavored; rich; vinous and of excellent quality. Tree a vigorous grower and a good bearer.

FLEMISH BEAUTY. — A large, beautiful, melting, sweet pear. Tree vigorous and succeeds well in most parts of the country.

LE CONTE. — Large, with a smooth, yellow skin; flesh white, firm and juicy. Tree is free bearer and vigorous in growth.

GARBER. — Resembles Kieffer in size, appearance and quality. Will succeed almost anywhere; is excellent for canning and preserving and recommended as a pollinizer for the Kieffer.

KIEFFER. — A money-maker on account of its remarkably vigorous growth and early productiveness, its extraordinary size, splendid keeping and shipping quality and its excellence for canning and preserving.

Bartlett Pear

SECKEL. — Fruit medium in size, russet-brown and of very sweet flavor. Probably the finest flavored of all the pears. Particularly valuable for the home orchard.

Prices.—4-5 ft., \$1.00 each; \$75.00 per 100. 3-4 ft., 75c each; \$50.00 per 100.

Early Rose Peaches

Peach

Peaches are easily the most profitable and satisfactory fruit we can grow in the South. Our list of varieties includes all of the best varieties, and a planting made from this list will cover the entire fruit season. The list is arranged in the order of ripening and no date given, as time of ripening varies with the section. We recommend that peaches be planted 20 feet apart each way, on good land, and that as far as possible the trees be planted on high, well drained land, with a northern exposure if possible.

RED BIRD CLING (Cling). — A very early, white-fleshed, red-cheeked peach; an excellent shipper but quality not so good as Early Rose.

MAYFLOWER (Semi-cling). — Probably the earliest of all peaches; small size; bright red. Not as large as Early Rose, but on account of its extreme earliness is a valuable sort; very prolific.

EARLY ROSE (Cling). — One of the most valuable of the recent introductions; ripens about one week later than Mayflower, to which it is far superior; is an extremely free bearer and comes into bearing young. The fruit is roundish, medium to large size and ripens 90% red; is a good keeper and carries well. Last year and again this year this was the only early variety that showed a profit.

ARP BEAUTY (Free). — Medium size; yellow, mottled with bright crimson; flesh is of rich yellow color and is really of very good quality for an early peach. Tree is hardy and very prolific.

GREENSBORO (Semi-cling). — Large; oblong; white with red blush. Not recommended for commercial orchards, but should be in every home orchard.

CHAMPION (Free). — Large; white, lightly blushed; almost round; of good flavor; extremely hardy but not a good shipper.

Should be in the home orchard and grown for local market.

CARMAN (Free) — Large; creamy-white with deep blush; fine flavor; hardy in production; a good shipper; strong grower and early bearer.

Carman

PEACH—Continued

HILEY (Early Belle). — One of the best early shippers; large; white with bright red cheek. Has proven one of the most profitable sorts for commercial orchards.

BELLE OF GEORGIA (Free). — Very large; white with red cheek; firm and excellent flavor; uniformly large and a very prolific and sure bearer.

ELBERTA (Free). — A standard by which all other varieties are judged; very large; yellow with red cheek; flesh yellow; firm; juicy and of high quality; hardy; sure bearer and excellent shipper.

J. H. HALE (Free). — Larger than Elberta; ripens several days earlier and is superior to Elberta in flavor; a beautiful golden yellow with deep carmine blush. Has proven to be one of the best money-makers of recent introduction.

ST. JOHN (Free). — A large, brilliant, showy, yellow peach of good flavor and high quality.

OLD MIXON CLING (Cling). — Skin yellow with red cheek; flesh pale white; very juicy, rich and highly flavored; one of the best of white clings.

CHINESE CLING (Cling). — Large; white with red cheek; excellent quality; exceedingly juicy. A very popular peach, although not recommended for commercial orchards.

Elberta Peach

HEATH CLING (White Heath) (Cling). — Skin and flesh white tinged with red, tender, juicy and of high flavor. A wonderful peach for canning and pickling.

WONDERFUL (Free). — Large; yellow, overspread with carmine; highly flavored and very firm.

SALWAY (Free). — Tree a strong, vigorous grower; very productive; fruit pale yellow tinged with red; juicy and fine.

KRUMMEL'S OCTOBER (Free). — Deep yellow with carmine blush on sunny side; later than Salway; a splendid shipper and keeps well.

Prices.—4-5 ft., 75c each; \$50.00 per 100. 3-4 ft., 50c each; \$35.00 per 100.

Apricots

Apricots, as a rule, are not entirely satisfactory due to the fact that the late spring freezes sometime catch them while in bloom. However, we think that every Home Orchard should have one or two Apricots. We are listing only the two most desirable varieties.

EARLY GOLDEN. — Small; pale orange-yellow; juicy and sweet; highly flavored. Recommended for southern planting.

ROYAL. — A standard variety; medium to large; pale yellow with orange cheek; very desirable and equally valuable for canning or drying.

Price.—4-5 ft., \$1.00 each.

J. H. Hale Peach

Abundance Plum

Plum

No Home Orchard is complete without a few plum trees. We are listing only the very best varieties, all of which we know will prove entirely satisfactory. Plums should have about the same treatment as peach or apricot, preferring the higher, better veined soil and responding rapidly to fertilizer.

ABUNDANCE (Botan). — Medium to large; color, bright red overlaying a yellow ground; cling. Tree strong, thrifty and upright grower and an early and prolific bearer. One of the best.

BURBANK. — Large; mottled red and yellow; good quality; cling. Tree a strong straggling grower and immense bearer.

RED JUNE (Red Nagate). — Medium to large; deep red; handsome bloom; very showy; quality good; good shipper and ripens a week earlier than Abundance. Tree a vigorous, upright grower; late bloomer; sure and heavy bearer.

WICKSON. — Probably the most beautiful tree of all plums; color deep red; flesh firm, yellow and of very good quality. The principal objection to this variety is the fact that it is inclined to be a rather shy bearer.

WILD GOOSE. — One of the best known of all the plums; large; deep red when ripe; good quality; very juicy. One of the best native varieties, ripening earlier than the Japanese sorts.

SHROPSHIRE DAMSON. — Medium; dark purple flesh; grown largely for preserving purposes. Probably the best preserving plum.

Compass-Cherry Plum

COMPASS-CHERRY PLUM. — A cross between the Sand Cherry and the Plum; fruit about as large as the ordinary cherry; very bright red; acid. Valuable because of its sure, heavy cropping qualities; used principally for preserving; absolutely hardy.

Prices.—4-5 ft., \$1.00 each; \$75.00 per 100. 3-4 ft., 75c each, \$50.00 per 100.

Large Montmorency Cherries

Cherry

For ordinary planting we do not recommend the sweet or dessert varieties, as they are more generally killed by the late spring freezes. Every Home Orchard should have a few cherry trees, and any of the varieties listed will prove satisfactory. Plant 20 feet apart each way.

BLACK TARTARIAN (Sweet). — Of large size; heart-shaped; purplish black; flesh tender, juicy and of fine quality. Tree an erect, beautiful grower and heavy bearer.

GOVERNOR WOOD (Sweet). — Light yellow; extremely sweet, juicy and of rich flavor. Tree vigorous and productive.

LARGE MONTMORENCY (Sour). — One of the best flavored cherries in its class; larger and finer than Early Richmond and ripens ten days later. Tree of rapid growth and a heavy bearer.

EARLY RICHMOND (Sour). — Extra early; bright red; very valuable for canning. Tree extremely hardy and productive.

ENGLISH MORELLO (Sour). — Fruit large, dark red, almost black; tender; juicy; acid; rich and of good quality. Tree dwarf, slender and bears well.

Price.—3-4 ft., 70c each; \$50.00 per 100.

Quince

The trees are thrifty in almost any soil and more than pay for the trouble by pro-

Early Richmond Cherries

ducing good quantities of fruit. Highly desirable for canning and preserving.

ORANGE. — Very large; yellow; rich and of excellent flavor; one of the best.

MEECH PROLIFIC. — A vigorous grower and very productive; very large; orange yellow; of great beauty and delightful fragrance.

Plant 12 feet apart each way.

Price.—3-4 ft., \$1.00 each.

Grapes

One of the easiest and perhaps the most satisfactory fruit crops that can be grown. Grapevines will grow almost anywhere and require but little cultivation, pruning in the winter to prevent an overcrop being about the only requirement for producing fruit. The vines can be trained to a trellis, fence, summer house or even straight poles. Plant 10 feet apart each way.

CONCORD. — Fruit dark purple, nearly black, extra large and very sweet. One of the best known and most popular of all the grapes.

AGAWAM. — Fruit large, red and of fine flavor. A good cropper and very prolific.

DELAWARE. — Fruit red, rather small, juicy and sweet. We think the best table variety grown.

IVES. — Fruit of medium size; black, sweet. An excellent wine variety. Vine a vigorous grower and very prolific.

DIAMOND. — Fruit of a greenish-white color, very large, sweet and of good quality. Vine perfectly hardy and a good bearer.

NIAGARA. — One of the most valuable white grapes. Bunch and berry large; ripens with Concord. Fruit very tender, sweet and juicy. Highly desirable.

LUTIE. — A true southern variety. Fruit large, brownish-red and of delicious flavor. A good, sure bearer.

Price.—35c each; \$25.00 per 100.

SCUPPERNONG. — Very large, bronze, colored fruit; flesh very sweet; grows in clusters, not bunches.

JAMES. — Large. Fruit of delicate flavor and is borne in large clusters. A strong-growing, black scuppernong.

Price.—50c each; \$40.00 per 100.

Concord Grapes

St. Regis Everbearing Raspberry

Blackberries

Contrary to the popular belief, there is just as much difference in the size and quality of the cultivated blackberries as there is between any cultivated fruit and the seedlings. We list only the two best varieties, either of which will be found profitable.

Early Harvest Blackberry

Plant in rows 6 feet apart with the plants 3 feet apart in the row. Remove all old canes as soon as they have borne their crop, as they fruit but once. The young canes should be pinched when about 3 feet high, which will cause them to branch and increase the next year's crop.

EARLY HARVEST.—Ripens ten days to two weeks earlier than any other blackberry; very productive and a good shipper. Fruit is of good size and excellent quality.

ELDORADO.—Berries very large, reddish-black, very sweet and without hard core. Late.

Prices.—\$1.00 per 10; \$7.00 per 100.

Raspberries

Raspberries should be planted in rows 5 feet apart and 3 feet apart in the row. Cultivation and method of handling is similar to that of the blackberries.

ST. REGIS.—Sometimes called "Everbearing." Usually produces a good crop in the spring and a second crop in the fall. Berries bright crimson, large and have strong raspberry flavor. Very prolific.

CUTHBERT.—Fruit crimson, large, firm and very juicy. A strong upright grower and perfectly hardy.

CARDINAL.—Large reddish-purple fruit; very strong grower and will succeed where other varieties fail.

Price.—\$1.00 per 10; \$7.00 per 100.

Mulberries

Very valuable for planting in hog pastures and chicken yards. The varieties listed are vigorous growers and heavy fruiters, and will prove entirely hardy. The Mulberry doesn't require any particular soil or cultivation. Plant 25 feet apart.

DOWNING. — Strong, upright grower; fruit large, black. A sure, heavy bearer.

NEW AMERICAN. — Fruit large, black and of delicious flavor. Tree of rapid growth and with large, glossy leaves.

HICKS. — Very heavy bearer; fruit ripens over a long period.

Price.—4-6 ft., \$1.00 each; \$85.00 per 100.

Figs

In North Alabama Figs should be planted in a somewhat sheltered location against buildings, or on the south side of a natural windbreak; the latter would be best. Further south the plants may be set in the open, as the winters are not severe enough to injure the trees. Figs bear quite well and the fruiting season extends over a long period. Plant 12 feet apart each way.

BROWN TURKEY. — Fruit medium to large, pear-shaped; coppery-brown skin with white or yellow tinted flesh. Very productive.

CELESTIAL. — Very hardy; vigorous grower. Fruit small but juicy and of excellent quality.

Price.—3-4 ft., 85c each.

Brown Turkey Figs

Tane Nashi, Japanese Persimmon

Japanese Persimmons

The Japanese Persimmons are a decided improvement over the native or American variety. The trees are vigorous growers and bear heavily while quite young. The fruit is much larger and of better quality than that of the American Persimmon, but should be gathered just before frost and ripened in a cool, dark room. Plant 15 feet apart.

COSTATA. — Fruit medium size, conical and almost seedless. Skin yellow. Flesh light yellow.

HYAKUME. — Fruit large, dark brown, very plump, sweet and meaty. One of the best varieties.

TRIUMPH. — Fruit yellowish-red, smooth skin. Flesh yellow and fine-grained and excellent quality. One of the best varieties.

TANE NASHI. — One of the best known Japanese varieties. Fruit large, smooth, symmetrical and ripens early. Bears young and is productive.

Price.—3-4 ft., \$1.00 each; \$85.00 per 100.

A few Mulberries and Figs should be included in every order for fruit to give a variety

Nut Trees

Chestnut

AMERICAN SWEET. — A native tree too well known to need description. Nuts sweet and of delicate flavor.

JAPAN MAMMOTH. — Of dwarf growth, not strictly speaking a tree; productive and bears extremely young. Nuts of immense size, of fair quality, but not so highly flavored as the native American.

Price.—75c each.

English Walnut

Walnut

ENGLISH WALNUT.—Tree valuable for its shade as well as nuts, which are thin-shelled, full-meated and delightfully flavored.

JAPAN WALNUT. — The tree is a strong, vigorous grower, bears well and is highly productive. Is valuable both as a nut and ornamental tree. Nuts rather thick-shelled and flavored somewhat like the Butternut.

Price.—75c each.

Pecans

We believe that the planting of budded and grafted pecans in the South is one branch of the orchard business that has a great future. The pecan tree is not particularly choice as to its soil and location; it thrives in any soil that will produce the hickory; is comparatively free from insect pests and diseases; of long life and doesn't require a great deal of attention. If properly handled the land on which the trees are planted can be used for growing other crops such as cotton, peas, etc., until the trees are large enough to require more room.

Pecan trees are especially recommended for planting around homes and barnyards, or in fact any place where shade trees are desirable or required. They make beautiful shade trees and at the same time will produce nuts that will more than pay for the little trouble they give.

DELMAS. — Large size; plump and well filled. The tree is a strong grower and productive.

FROTCHER. — Medium to large size; plump; rich meat. Tree very hardy and a strong grower.

SCHLEY.—Thrifty, strong grower. Nut rather long, well filled and of high quality.

STUART. — Probably the best known and most valuable of all the pecans. Extremely hardy and a strong grower. Nuts of good size, plump and well filled.

Prices—Budded and Grafted Pecans.

	Each.	Per 10.	Per 100.
2 to 3 feet.....	\$1.25	\$9.00	\$90.00
3 to 4 feet.....	1.50	11.00	110.00

Stuart Pecan

The Pecan is not only a very profitable tree to grow for its product, but also makes a very fine shade tree. Plant Pecans for Profit and Shade.

BEFORE PLANTING

AFTER PLANTING

Is there any argument against proper landscape planting?

Deciduous Shrubs

THERE is nothing that adds more to the appearance and value of a home than a planting of shrubs. We are listing only the more desirable varieties which may be used for massing against the foundation of houses, to cover up unsightly buildings and walls or they may be used as specimen plants on the lawn. We call your special attention to the various assortments we are offering on pages 15 to 19. These assortments are intended for the planting of various size places. Practically all of the shrubs listed should be planted about 3 feet apart each way.

ALMOND, Flowering (Amygdalus).—A beautiful, early blooming, dwarf shrub of shapely, compact growth, especially valuable because of a profusion of flowers which come very early in the spring. We offer two varieties, white and pink, which are identical in habits of growth, the only difference being in the color of the flowers. 75c each.

ALTHEA, Hibiscus (Rose of Sharon).—A tall, upright, hardy shrub of strong, vigorous growth and adapted to almost any soil. Flowers in great profusion in midsummer and continues to flower until early fall. There are a number of valuable varieties both single and double. We list what we consider the best.

Anemoneoflora.—Very large double red.

Bicolor Hybrida.—Double-white with beautiful purple center.

Pulcherrima.—Double-white striped with pink.

Jeanne d'Arc.—Double, pure white. The best of the whites.

Violet Clair.—Almost double, violet.

Totus Albus.—Single flower, pure white. Very beautiful.

Rubis.—Single bright red flowers.

Coelestis.—Single blue flower.

All varieties of Althea, 40c each.

DECIDUOUS SHRUBS—Continued

Crepe Myrtle

BARBERRY (*Berberis Thunbergi*). — Japanese Barberry. A splendid, hardy, dwarf-growing shrub. Particularly desirable for massed planting against foundation walls or where a low-growing hedge is wanted. Dark green foliage through the summer, changing to various shades of crimson in the fall. In this latitude almost evergreen. In the fall the plants are almost covered with beautiful bright red berries which stay on almost through the winter. 35c each. (See also hedge plants.)

BUTTERFLY BUSH (*Buddleia*).—While comparatively new this shrub has attracted more attention than almost any shrub of recent introduction. Of graceful drooping habit of growth. Blooms in midsummer and flowers are borne in great profusion at the tip of every piece of new growth. Color, violet. 50c each.

CALYCANTHUS. — Sweet Shrub (*Calycanthus Florida*).—One of the best known shrubs; of quick, bushy growth, bearing fragrant chocolate colored flowers. 50c each.

SNOWBERRY — Waxberry (*Symphoricarpos racemosus*).—A very showy shrub with slender branches. Small pink flowers followed by large, white berries which stay on well into the winter. Conspicuous in mass plantings, but not desirable for a damp, poorly drained location. 40c each.

CREPE MYRTLE (*Lagerstroemia Indica*).—Perhaps the best known and most desirable of the older shrubs. Grows to a large size. Flowers produced in profuse panicles, appearing in midsummer and continuing through until fall. We can furnish in four colors: pink, white, purple and red. Specify color wanted. 50c each.

Deutzia

DEUTZIA GRACILIS (Dwarf Deutzia). —A very dwarf, low-growing bush, never taller than 3 feet. Is covered very early in the spring with pure white, bell shaped flowers. Highly desirable. 50c each.

DEUTZIA (Pride of Rochester). — A fine, large growing shrub. Flowers pink in the bud and turn to white when full grown; blooms early. 50c.

DEUTZIA (*Crenata*).—Double white; of strong growing habit, producing an abundance of pure white, double flowers in the early spring. 50c each.

Blooms of Deutzia, Pride of Rochester

Hydrangea Paniculata with Barberry in center. Boston Ivy on walls

Dogwood

WHITE-FLOWERING (Cornus Florida).—Small growing tree covered in the early spring with a mass of large, pure white flowers. 50c each.

RED-FLOWERING (Cornus Florida Rubra).—Habit of growth and time of flowering almost identical with the white variety, but flowers are red or pink. 75c each.

RED-TWIGGED (Cornus Siberica). — Grown as a large shrub. Branches are of a deep crimson. Very beautiful during the winter. 50c each.

Forsythia

GOLDEN BELL (Forsythia). — A very showy, early blooming shrub. Will thrive in almost any soil. Flowers are borne in great profusion in the early spring and are of a beautiful, rich, golden-yellow. 50c each.

Honeysuckle

FRAGRANT BUSH HONEYSUCKLE (Lonicera Fragrantissima).—Vigorous, strong growing shrub. Blooms earliest of all shrubs in the spring. Flowers are creamy-white or light yellow. Very fragrant. 50c each.

JAPANESE BUSH HONEYSUCKLE (Lonicera Morrowi).—A highly decorative, vigorous growing shrub. Flowers of creamy-white in early spring, followed by red berries which stay on far into the fall or winter. 50c each.

Hydrangea

HILLS OF SNOW (Arborescens Grandiflora Alba).—A strong growing, perfectly hardy shrub producing great quantities of beautifully formed white flowers. Somewhat like the old-fashioned snowball. 50c each.

LARGE FLOWERING HYDRANGEA (Hydrangea Paniculata Grandiflora).—An old time favorite. A strong grower and profuse bloomer. Flowers are white and borne in immense pyramidal panicles, beginning to bloom in July and continuing until frost. 50c each.

Deciduous Shrubs—Continued

JAPAN QUINCE (*Cydonia Japonica*). — Strong growing, thorny shrub. Flowers a bright crimson. 50c each.

Lilac

(*Syringa Vulgaris*)
PURPLE LILAC. — A large free growing shrub. Beautiful dark green foliage. Flowers a bluish-purple. Blooms in early spring. 50c each.

COMMON WHITE LILAC. — Same habit of growth as the purple. Flowers white. 50c each.

Mock Orange

MOCK ORANGE (*Philadelphus Coronarius*). — Will be found highly desirable for grouping with other shrubs. Of strong, vigorous growth. Blooms in early summer. Flowers of pure white borne in large clusters. 50c each.

GORDON'S MOCK ORANGE (*Philadelphus Gordonius*). — Blooms later than *Coronarius*. Flowers are pure white and borne in dense clusters. 50c each.

Blooms of Purple Lilac

Mock Orange

PEARL BUSH (*Exchorda Grandiflora*). A highly desirable, tall growing shrub. Large pure white flowers almost covering the plant. Blooms in the early spring. 50c each.

PRIVET—(See Hedge Plants, page 25)

Snowball

COMMON SNOWBALL (*Viburnum Opulus Sterile*). — An oldtime favorite. Grows to a large size and produces an abundance of globe-shaped white flowers. 50c each.

JAPANESE SNOWBALL (*Viburnum Plicatum*). — An extremely handsome shrub with beautiful foliage and snowy white flowers. Borne in large clusters. 60c each.

The Best Investment

a property owner can make
 is a liberal expenditure for
 Trees and Shrubs.

Weigela Blooms

Deciduous Shrubs—Continued

Spirea

DWARF WHITE SPIREA (*Collosa Alba*).

—Of compact, dwarf growth, with upright branches crowned with large flat clusters of white flowers borne through the summer. 50c each.

CRIMSON SPIREA (*Spirea Anthony Waterer*).—A dwarf, compact growing variety. Perfectly hardy and highly desirable for bordering purposes. Flowers are of a bright crimson, lasting throughout the summer. 50c each.

BRIDAL WREATH (*Spirea Prunifolia*).—A medium size shrub of graceful habit of growth. Beautiful green foliage. Flowers small, white, double and borne in clusters the entire length of the branches. 50c each.

LACE-LEAVED (*Spirea Reevesiana*). — We consider this variety the best of the

strong growing spirea for the South. Flowers are perfectly double, pure white and borne in great profusion. 50c each.

SNOW GARLAND (*Spirea Thunbergi*).—A beautiful, small-growing, dwarf shrub. Branches slender and somewhat drooping. Foliage narrow and of a yellowish-green. Flowers small, white. Blooms very early. 50c each.

BRIDAL BOWER (*Spirea Van Houttei*).—The strongest growing of all the Spireas. Perfectly hardy. Grows anywhere. In early spring the branches are covered with beautiful, pure white blooms. Highly desirable for specimen or mass planting. 40c each.

Weigela

Beautiful shrubs that should not be left out of any planting. They are of quick growth and perfectly hardy. We list only the best of each color.

CANDIDA. — Very beautiful green foliage; white; blooms in the early spring. 50c each.

EVA RATHKE. — Hardly as vigorous as some of the other varieties, but perhaps the most beautiful of all; flowers a deep carmine-red. 60c each.

ROSEA. — If you can have only one Weigela, by all means plant this variety, which is of vigorous growth. Flowers are a deep pink and borne in great abundance. 50c each.

Bridal Bower Spirea Van Houttei—The Most Popular Early Blooming Shrub

Plant liberally of Spirea to beautify the home. There is nothing more satisfactory.

Shade Trees are essential to the cozy comfortable home grounds

Shade Trees

Here in the South ample shade is essential, and any home lacking proper shade trees is deficient in one of the main requisites of an ideal Southern home.

Each of the shade trees we describe below has a special use. Care should be used in selecting the proper variety for each particular purpose.

ASH, American White (*Fraxinus Americana*).—A handsome tree of thick growth desirable for both lawn or street planting. Dark green foliage, changing in the fall to yellow and purple.

Price.—8 to 10 feet, \$1.00 each; 10 to 12 feet, \$1.50 each.

ELM, American White (*Ulmus Americana*).—One of our best known and most appreciated native trees. It is of rapid growth and beautiful appearance. Leaves of moderate size and the tree is ideal for permanent shade.

Price.—8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.

MAGNOLIA Grandiflora (Southern Evergreen Magnolia).—A beautiful pyramidal evergreen tree with large, pure white flowers. Foliage, dark green. Tree large, handsome and vigorous. Not hardy in the North.

Price.—4 to 5 feet, \$2.00 each; 5 to 6 feet, \$2.50 each.

MAPLE, Ash Leaf — Box Elder (*Acer Negundo*).—A very quick growing, soft wooded tree with pale green leaves and bright green twigs. Not recommended for permanent shade.

Price.—8 to 10 feet, 75c each; 10 to 12 feet, \$1.00 each.

MAPLE, Silver (*Acer Dasycarpum*).—An extremely hardy, rapid growing tree of large size. Very valuable for producing a quick shade. Fine for street planting.

Price.—8 to 10 feet, \$1.00 each; 10 to 12 feet, \$1.50 each.

American White Elm

LOMBARDY POPLARS

The Lombardy Poplar is indispensable in Landscaping

Shade Trees—Continued

MAPLE, Sugar (*Acer Saccharum*). — A well known and popular variety somewhat pyramidal in its habit of growth. Foliage of a beautiful green through the summer, changing to all shades of gold, scarlet and crimson in fall. Not quite as quick in growth as Silver Maple, but highly desirable.

Price.—8 to 10 feet, \$1.50 each; 10 to 12 feet, \$2.00 each.

POPLAR, Carolina (*Populus Deltoides Monilifera*).—Not recommended where permanent shade is desired. Pyramidal in form with large, glossy leaves.

Price.—8 to 10 feet, 60c each; 10 to 12 feet, 75c each.

POPLAR, Lombardy (*Populus Nigra Italica*).—This tree grows to an immense height. May be used to good advantage for roadside planting or to break the monotony of low, round top trees. Also valuable as a screen or windbreak.

Price.—8 to 10 feet, 75c each; 10 to 12 feet, \$1.00 each.

RED BUD, Judas Tree (*Cercis Canadensis*).—A native tree which flowers in

early spring, leaves being practically covered with reddish purple flowers. Foliage dark green throughout summer and fall.

Price.—5 to 6 feet, \$1.00 each; 6 to 8 feet, \$1.50 each.

American White Ash

Coniferous Evergreens

There is nothing that can quite take the place of Coniferous Evergreens in the arrangement of the home grounds. They may be used as a background for flowering shrubs, as specimen plants on the lawn or as windbreaks. Any of the varieties listed will prove satisfactory. In arranging and planning for evergreens care should be used in placing the tall pyramidal growing varieties at the back and the lower, more dwarf varieties, towards the front. We should be very glad indeed to help with suggestions as to the proper assortment for a planting of evergreens.

Arborvitae

BERCKMAN'S GOLDEN (*Biota Aurea Nana*). — Very compact, dwarf growing, golden arborvitae. Ideal for cemetery lots, window boxes and tubs. The best of all the dwarf growing arborvitaes. \$2.00 each.

CHINESE (*Thuya Orientalis*). — A tall growing, hardy pyramidal variety. Foliage a dark green. Holds its color through the winter. \$1.50 each.

GLOBE (*Thuya Occidentalis Globosa*). — A very dwarf, globe-shaped variety. Foliage is of a bright green. Well adapted for planting in tubs and porch boxes. \$2.00 each.

Globe Arborvitae

Irish Juniper

PYRAMIDAL (*Thuya Occidentalis Pyramidalis*). — A tall decidedly pyramidal grower. Valuable where a columnar arborvitae is wanted. Foliage bright green and holds its color well through the winter. \$2.50 each.

SIBERIAN (*Thuya Occidentalis Wareana*). — A dense, broad, regular pyramid with dark green foliage. \$2.00 each.

ENGLISH JUNIPER (*Juniperus Communis*). — Of a dense pyramidal growth with slightly drooping branches. Foliage grayish-green and very thick. \$2.00 each.

IRISH JUNIPER (*Juniperus Hibernica*). — Of rigid, upright growth, and extremely formal in character. Foliage deep green with bluish-green tinge. \$1.50 each.

SPRUCE (*Picea Excelsa*). — Of rapid growth, gracefully drooping in habit, regular in outline and perfectly hardy. Grows to a large tree. \$1.50 each.

CONIFEROUS TREES IN NURSERY

Berckman's Golden Arborvitae

Evergreen Shrubs

In the planting of the home grounds Evergreen Shrubs may be used in a great many places where the deciduous shrubs are not desirable. This class of shrubs is particularly desirable because of its habit of holding its leaves throughout the winter and adding a touch of life to an otherwise dull planting.

ABELIA GRANDIFLORA. — The most beautiful evergreen shrub we know. Of graceful arching habit of growth. Brightly colored branches covered with dark, glossy green leaves which stay on through the winter. Flowers are white tinged with pink and are borne in clusters from early spring until frost. \$1.00 each.

EUONYMUS JAPONICA. — A compact, upright growing evergreen shrub with bright, dark green foliage; stands trimming well and shows up beautifully as a specimen plant. \$1.00 each.

EUONYMUS SIEBOLDIANA. — A highly desirable, evergreen shrub of arching growth. Well suited for mass planting. In the fall almost covered with red seed suspended from floral envelope. 75c each.

JAPANESE PRIVET (*Ligustrum Japonica*). — A compact shrub of rapid growth. Large dark green foliage. White flowers in spring followed by clusters of blue-black berries. Stands trimming well. 75c each.

NEPAL PRIVET (*Ligustrum Nepalense*). — A graceful spreading evergreen shrub with thick, silvery, dark green foliage. White flowers, followed by clusters of blue-black

berries. Valuable for banking against walls or makes a fine specimen plant. \$1.00 each.

Japanese Privet at right, Arborvitae in center, Lombardy Poplars for sky line in background.

Clematis Paniculata

Vines

We have selected a few varieties of Vines which will be found to answer practically all purposes.

BOSTON IVY (*Ampelopsis Veitchi*). — One of the finest hardy climbers for covering walls. Clings closely to the smoothest surface, covering with overlapping foliage. Color is a fresh, deep green, changing to the brightest shades of crimson and yellow in autumn. 50c each.

VIRGINIA CREEPER (*Ampelopsis Quinquefolia*). — Large, deeply cut leaves which turn to a beautiful crimson in the fall. Fine for covering trees, walls, rocky surfaces, etc. 50c each.

CLEMATIS PANICULATA (Sweet-Scented Clematis). — Flowers are of medium size, fragrant, pure white, borne in immense sheets in the late summer. 40c each.

CLEMATIS HENRYI. — A large flowering variety. Creamy-white flower and a vigorous grower. 75c each.

CLEMATIS JACKMANI. — Flowers very large, velvety, violet-purple. 75c each.

CLEMATIS MADAME EDOUARD ANDRE. — Large flowers of crimson red. The best in its class. 75c each.

KUDZU VINE. — Large foliage which makes a dense shade. Makes tremendous growth in one season. Not recommended for porch planting but for covering unsightly walls or outhouses. 35c each.

Honeysuckle

HALL'S (*Lonicera Halleana*). — Vigorous in this latitude. Flowers white, changing to yellow. Very vigorous, strong grower. 35c each.

SCARLET TRUMPET (*Lonicera Sem-pervirens*). — The most beautiful and brilliant of all the Honeysuckles. The foliage is bluish green; flowers brilliant scarlet, followed by scarlet berries. 35c each.

YELLOW TRUMPET (*Lonicera Sem-pervirens Flava*). — A beautiful strong growing vine. Bright green leaves. Flowers trumpet shape and of deep yellow. 35c each.

Boston Ivy

VINES HAVE MANY USES IN THE HIDING OF UNSIGHTLY BUILDINGS, SCREENING IN PORCHES, ETC. SURELY YOU HAVE A PLACE FOR A PRETTY VINE OR TWO.

Amoor River Privet Hedge

Wistaria

Wistaria

PURPLE (*Sinensis*). — Light purple and blue flowers in the early spring. Vine of a strong, hardy habit of growth. 40c each.

WHITE (*Sinensis Alba*). — Flowers almost pure white. Vine of strong growth and extremely hardy. 50c each.

Hedge Plants

For the ordinary hedge planting purposes we recommend the Amoor River Privet as being the most desirable. However, we are listing two other varieties of hedge plants both of which have their uses in particular locations.

AMoor RIVER PRIVET (*Ligustrum Sinense*).—The most desirable of all the Privet family. In this latitude almost, if not quite, evergreen. If properly cared for, will make a close, dense hedge. \$7.00 per 100.

CALIFORNIA PRIVET (*Ligustrum Ovalifolium*). — Of upright growth. Popular for hedges in the North and East. Not as desirable in the South as the Amoor River Privet. Leaves are dark green and very glossy, but sheds in midwinter. \$5.00 per 100.

BARBERRY (*Berberis Thunbergi*).—Full description of this plant will be found on page 17. Valuable where a hedge of low-growing character is wanted. Highly desirable in the North but not generally recommended for planting in the South. \$10.00 per 100.

Snow Queen

Everblooming or Monthly Roses

In selecting the location of the rose garden care should be used in selecting a spot exposed to the sun all day if possible. No plant responds quicker to intelligent pruning and careful cultivation than does the rose, and nothing will give greater satisfaction than a carefully arranged and cared-for rose garden.

White Roses

BESSIE BROWN. — Of a distinct type in shape and color. Marvelously beautiful. Erect stems, full deep bloom with enormous petals. White flushed with pink growing deeper toward center. 75c each.

SNOW QUEEN (Frau Karl Druschki.) — Hardy everywhere. A vigorous grower with bright green leaves; long buds; magnificent snow-white flowers with large saucer-shaped petals. Rightly named, and is one of the best white roses. 75c each.

KAISERIN AUGUSTA VICTORIA. — Pure white without a trace of pink. Splendid large buds and superb full double blooms. A steady grower and steady bloomer.

WHITE MAMAN COCHET. — Very large and beautifully formed in bud and bloom. Pure waxy-white, taking a faint pink flush out of doors. Vigorous and blooms abundantly.

Pink Roses

PINK MAMAN COCHET. — Rich rosy-pink shading to silvery-rose on out petal; exquisite in color and delightfully fragrant. Unquestionably the best of the Pink Tea Roses. 75c each.

RADIANCE. — Brilliant rosy-carmine shaded with rich opaline-pink tints in the open flower, which is large, full, of fine form with cupped petals; a constant bloomer and is highly satisfactory. 75c each.

Pink Maman Cochet

Pink Roses—Continued

PAUL NEYRON. — The largest of all roses. Blooms of bright, shining pink, beautiful, very double, full and finely scented. Blooms freely throughout the season. Stems almost thornless. 75c each.

Yellow Roses

ALEXANDER HILL GRAY. — Deep lemon-yellow, large full flowers with high pointed center, of perfect form, freely produced and strongly perfumed. One of the very best yellow roses offered. 75c each.

Etoile De Lyon

ETOILE DE LYON. — Deep golden-yellow. A healthy, vigorous grower, blooming freely early and late. Full, deep, rich flowers. Very sweet. 75c each.

Red Roses

GRUSS AN TEPLITZ. — Perfectly hardy and very valuable for budding or mass planting. Flowers vivid, dazzling, fiery-crimson, sweetly fragrant and produced in great quantities. 75c each.

RED RADIANCE. — Clear red without a trace of any other color; is a remarkable bloomer, being constantly in flower from early spring until freezing weather. A strong, vigorous grower and perfectly hardy. 75c each.

GENERAL JACQUEMINOT. — Still holds its place as the premier of red roses. Perfectly hardy and a strong, vigorous grower; large shapely buds and handsome blooms of a bright, shining crimson. Very rich, brilliant, velvety and fragrant. 75c each.

General Jacqueminot

Moss Roses

CRESTED MOSS. — Deep pink buds surrounded by mossy fringe and crest. Very fragrant. Strong grower. 75c each.

RED MOSS. — Light color. Large, full flowers and a very vigorous grower. 75c each.

WHITE MOSS. — Rosy-pink flower. Very large, full and fragrant. Good fall bloomer. 75c each.

Paul Neyron

Climbing Roses

CLIMBING AMERICAN BEAUTY. — Flowers of large size, good form, of rich red color passing to crimson. Very fragrant. Good foliage and absolutely hardy. 60c each.

DOROTHY PERKINS. — Beautiful shell-pink, which holds for a long time, shading to a lovely deep rose. Very sweetly scented, hardy and a strong grower. 60c each.

EXCELSA or Red Dorothy Perkins. — Intense crimson-scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all red climbers. 60c each.

Climbing American Beauty

FLOWER OF FAIRFIELD (Everblooming Crimson Rambler).—Brilliant crimson. Flowers almost continually in brilliant clusters from early summer until frost. 60c each.

CRIMSON RAMBLER. — One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson. 60c each.

Crimson Rambler

TAUSENDSCHOEN (Thousand Beauties).—Varying in shade from a delicately flushed white to a deep pink or reddish-crimson; in bright clusters, almost covering the handsome green foliage. 60c each.

WHITE DOROTHY PERKINS.—A pure white sport from Dorothy Perkins with which it is identical in variety and habits. A valuable addition to the hardy climbing class. 60c each.

Tausendschoen

NAME _____

ADDRESS

Spiraea Van Houtte—One of the earliest and most beautiful Ornamental Shrubs

WHY IS IT that so many home grounds are bare, without trees and shrubs? Surely it must be neglect as any clear thinking home owner knows that a few trees and shrubs cost practically nothing and the value of his property is greatly increased by the proper planting. Then too, trees and shrubs make your home grounds a comfortable place for the children to play in and a pleasant place for you to spend leisure hours. Our trees and shrubs will succeed for you.

The back yard garden can be made a place of real beauty wherein you will want to spend your leisure moments.

THE HUNTSVILLE NURSERIES

*For Nearly Fifty Years Growers of High
Grade Nursery Stock*

HUNTSVILLE, ALABAMA

The foundation planting of shrubs is essential to tie the house to the ground
