NEW ALBANY LEDGER PRINT

**I live *in* my Dahlias, *for* my Dahlias, and *by* my Dahlias.
Flowers are God's most beautiful handiwork.**

See Matth. 6: 28-29

THIS little booklet is intended to present to you the names, and as near as possible, the descriptions of the best Dahlias to be had anywhere.

You will find them to be tried and true, or especially meritorious in some way.

This list embraces only about one-half of my stock, as I have some 450 varieties of which I have too small a stock to list, yet should your wants require them, could spare a few of any of them; so, if there is any variety you want, not listed here, write me about it.

The Dahlia is today the **Greatest of All Flowers**, there being a greater variety by far, a much larger range of size and coloring and adaptability, than any other.

The Dahlias of today are the constantly increasing Wonders of the Flower World.

All bulbs are guaranteed true to name, and the prices herein (providing your order amounts to \$1.00 or more) are for delivery prepaid.

One dozen of any one variety will be sent for the price of ten. If choice of varieties is left with me, will send 25 per cent. additional in stock. Or, will send, of my own choice 12 good varieties for \$1.00; 12 fine varieties for \$2.50; or, 12 fine novelties for \$5.00, not prepaid.

All orders must be accompanied by at least 25 per cent. of the amount cash and will then be sent C. O. D. for balance. Should we be sold out of any variety, will send another of equal or better quality, unless otherwise ordered.

In the following list, "B." stands for Ball-type or Show variety, shaped like a ball, and quilled or nearly so; "C." stands for "Cactus" type, having long, pointed or quilled petals; "Cent." stands for "Century," the large Single type; "P." for "Peony-flowered," usually very large and fine stemmed, having two to five rows of artistic petals with curled petals around center; "Pom." stands for Pompon, or miniature Dahlias; "D." for Decorative, the broad, flat petalled varieties; and "Coll." for Collarette, a type of Single Dahlia with an extra row of petals around center.

E. L. KUNZMAN.

The Excellent List

DAHLIAS which have proven especially Beautiful, Striking or Meritorious, and therefore Highly Recommended to my patrons. I do not believe you can make a mistake in ordering any of these.

	Each

WODAN, Hyb.-C. Very massive Old Gold and Apricot having a Wine Pink tip; free and fine	.50
YELLOW KING, P.-C, of all Pale Yellow Dahlias, this is the best; immense size, fine stem and very lasting cutflower	1.00

We have many others which are eligible to the foregoing List, but we have not enough Stock of them to catalog them. Will send, not prepaid, one each of the foregoing list (117 Varieties) regular value \$77.95, for \$65.00.

Meritorious Dahlias

THE FOLLOWING LIST includes only Dahlias which are meritorious enough to please our Patrons—We have discontinued growing several hundred varieties in the past on account of being unsatisfactory or unreliable, or thru finding a better sort of same shape and color. This we will continue to do.

	Each
A. C. IDE, D., large, very fine Crimson Maroon; stately	\$.50
ADELAIDE, Pom. Blush edged Lavender	.15
A. D. LIVONIA, B. One of the best ball varieties; Shell Pink, medium size, very free	.15

GLADIOLUS.

WE WILL HAVE some to spare, this season, of some of the best Cutflower Varieties (We grow them for that purpose), also in Mixture. Should you want any, write us. Will sell the mixture at 50 cents per Dozen; \$3.00 per 100; \$20.00 per 1,000, delivered free, while it lasts.

PEONIES.

We grow Peonies for Cutflowers, but will send any of our Patrons 5 divided roots, each different, for \$1.50 prepaid on orders received before April 1st.

“The King of Commerce”

A triumph in the Commercial Dahlia World—something that Florists have been looking for and not found until now—A TRULY PERFECT DAHLIA.

In Shape, a true Decorative; straight, strong petals, attractively arranged.

Color, a rich Tango, beautifully lighted Old Gold and Orange; irridiscent under both Artificial and Sunlight.

Size, 5 to 6 inches in diameter, NEVER GETS SMALL under any circumstances!

Substance, Exceedingly firm, yet not stiff or formal; never wilts or drops petals; if left on plant will dry up.

Stem 18 to 36 inches or more, clean, strong and wiry, with bloom set squarely on top.

Growth, very vigorous and healthy, branching freely; height 5 feet. Entirely free from all insect ravages. Good, strong tuber growth.

Season, Early to late; the entire season without intermission!

Originated and for sale by

The Indiana Dahlia Farm

E. L. Kunzman, Prop.

New Albany, Ind.

CULTURE OF THE DAHLIA

NO firm or grower can guarantee the growth of any plant, but if the following rules are observed, anyone may have success with Dahlias.

Select the sunniest spot obtainable. Unless the soil is very poor add no fertilizer; if very poor some good dairy or other manure (well rotted preferred) should be broadcasted; spade or plow deeply and pulverize soil thoroly as early as soil can be worked well.

About May 10th to June 15th, plant your tubers horizontally, about 4 inches deep and about 18 inches apart in rows $3\frac{1}{2}$ feet apart. Keep top soil constantly loose (about 2 inches deep), which will conserve moisture and destroy grass and weeds. Never water the plants unless during genuine drouth, then soak them about every eight days, and re-stir top-soil the day following.

Should you wish to form bushy plants, cut back about one-half of growth when plants are 12 to 15 inches high; this will make them branch and become stocky.

If you have quite a number of plants, drive a heavy stake in each row about every 12 plants and fasten a wire (telephone size preferable) the length of the rows to the stakes, about 18 inches above the soil; your plants will grow up into the wire which will stiffen them; also, should necessity arise, you can tie your plants to this wire.

When buds appear apply Phosphate Fertilizer or liquid manure to your plants (about one pound Phosphate to 20 plants), and stir into soil, repeat again in 3 weeks.

Should mildew threaten, spray with Bordeaux Mixture.

Several days after killing frost, dig your roots, remove the tops and what earth comes off easily, let cure 2 or 3 hours in air and then store away, stem downward if possible, in any ordinary cellar, or in sand or soil in a basement as far from the furnace heat as possible.

Examine occasionally during Winter. In the Spring divide the clumps so as to leave at least one eye or sprout to each division, and plant at time above stated.

Should any tubers received from me fail to grow, report them not later than July 15th and I will replace them next Season for one-half regular price.

Wishing you success,
E. L. KUNZMAN.
