Maloney's 1921 Catalogue

MALONEY BROS & WELLS CO.
DANVILLE N.Y.
New York State's Largest Nurseries

Trustworthy
Trees & Plants
MEMBERS
AMERICAN ASSOCIATION
OF NURSERYMEN

THOMAS MALONEY
Founder of our Business in 1884

Dear Friend:—

Last Fall there was one question that was asked us so many times by visitors to our nurseries that it became almost a joke. It got so that as we were driving away from farm number four, or the hill farm as we call it, we would expect our friend to lean over and ask "How does it happen that you have so many trees when there are so few everywhere else?"

The answer was very simple. Back in 1915, 16, and 17, when everybody cut their plantings, we increased ours. To do this we drew money out of our personal savings account, bought high priced seedlings and paid high wages to set them, bud them, and cultivate them year after year. That was the only way we knew to have nursery stock to supply our customers and we were not going to fail you after 37 years of making good.

That answer was very simple but as one man said "It sounds easy Mr. Maloney, but I'll bet it kept you awake a good many nights to do it," and between you and me I'll say he was right. But that's all past history now and 1919 was the most wonderful growing season I ever saw. Our trees seemed to increase their caliper and height over night and their root growth was simply remarkable. So I'm mighty glad to be able to tell you that we not only have stock for you but some of the finest stock our nurseries have ever produced.

As is our yearly custom we invite you again to call upon us personally, here in Dansville, and let us show you our nurseries and business methods. We would honestly like to have everybody who reads this catalog come to Dansville personally, but if you can't come, you may be sure your mail orders will receive just as careful accurate attention.

Please remember Maloney Quality and Maloney Service must be satisfactory to you and that we do not want your money unless they are. We sometimes make mistakes but it is up to you to let us make them right.

Yours for success,

W. J. Maloney

Secretary.

We sell Maloney quality trees at cost of production plus one profit.

Here are a few facts it will pay you to consider.

These facts will show you why the agent can not compete with the catalogue house. The agent's one argument is that if you buy from the catalogue house at a lower rate, you will get inferior stock.

The truth of the matter is, it is impossible for him to sell you trees or plants at our prices for he represents some retail house which buys from the grower, who must make a profit. This we will term profit No. 1. The retail house he sells for must have a profit which is profit No. 2. Then the agent who has big traveling expenses must get a price high enough to cover his expenses, as well as his commission, which is profit No. 3. Therefore the tree which we, the growers, sell to you at wholesale plus one small profit is sold by the agent with three profits, consequently the same tree which we sell direct for 85c, the agent must necessarily sell for \$1.50 to \$2.00.

Your letters receive the personal attention of
W. J. MALONEY, Sec.

You can readily see it is not the difference in quality that causes the difference in price, but it is due to his extravagant system as compared with our improved method of selling direct to the consumer, thus eliminating two profits.

Furthermore, when dealing direct with the grower your trees and plants come to you fresh, healthy and vigorous, chucked full of vitality for they are freshly dug and shipped direct to you. Won't you agree that after all buying direct from the grower, is the common sense, economical way? All we ask is a trial order and we will do the rest.

Our hardy upland trees grown at an elevation of 1500 feet establish themselves quickly and make a rapid, vigorous growth, for they are chuck full of vitality. Furthermore, our hardy upland trees are less susceptible to blight, the most satisfactory and profitable tree to plant, for they are the kind that bear early and abundantly.

Maloney Service of Value To Planters In This Time of Nursery Stock Shortage

Maloney Service like Maloney trees is the result of careful planning and the experience gained through 37 years of filling orders from our catalogue.

It is not generally known by fruit tree planters throughout the United States that seedlings used for propagation of fruit trees are practically all imported from France. During the period of the War, production was cut down at least fifty per cent, consequently the importation of fruit tree seedlings to the United States was only one half of the regular quantities used.

There is an acute tree shortage throughout the United States this Spring. Conditions will necessarily remain about the same for several years.

We have been large seedling importers for many years and so have a wide business acquaintance with Seedling Growers in France and importers in this country. We used this acquaintance to advantage and by offering top market prices have been able to get a very fair supply and in this way kept up our planting during the past four years.

This is the reason we have been able to list in this catalogue as you will find, an excellent assortment of varieties, which have proven to be the best for both home garden and commercial planting. It was part of our Service to have the trees to list in the catalogue.—The next step was to be able to fill your order promptly and exactly.

We know that accuracy is your best guarantee of satisfaction, every detail from the time your order reaches this office until the shipment is on the cars is watched over by trained men and women with years of experience in their own kind of work to make them careful and accurate.

When your order is received, it is acknowledged by our Mr. W. J. Maloney, entered by the bookkeeper, then it is sent to another department where it is copied by a competent clerk. It is then returned to the main office where it is checked, it is then filed in our fire proof vault for shipment according to the date given by the customer.

When the shipping season opens these orders are sent to the packing house to be filled—after the order is ready for shipment, the card is returned to the office where a notice of shipment is sent. Then the card is dated and filed again in our vault where it can be referred to at any time.

Right here let us give you a tip. Order as early as possible. We have plenty of trees at this time but there is a tremendous demand and our orders are always filled in the order they are received.

Scientific Culture Plus Constant Supervision Responsible for the Quality of Maloney Trees

Our father, Thomas Maloney established in 1884 the Nursery business which we now own and manage.

Since we were boys of fourteen, we have worked in the nursery—we have heard nursery problems discussed—we have been educated to carry on the nursery business according to the ideals of our father, who said —“Remember boys, you are morally responsible for every tree you sell. Watch over your stock from budding to shipping, so that you *know* each tree is true to name—that it is free from disease—that it is up to size and rooted right—that it is exactly what is ordered by the fruit grower.”

As our nursery business began to grow, we recognized that our responsibility to the fruit grower was constantly increasing.

To be able to accept this responsibility—we studied to make our nursery culture more and more scientific. We bought more farms so that we could keep the soil healthy—farms around Dansville, suitable for growing nursery stock, are worth big money. Yet one of our big farms is devoted this year exclusively to general farming, to let the soil rest. It means a big loss to us, but it also means *better* stock. Next year we will buy the best seedlings France can produce and start using this farm again for nursery culture.

One after another our farms get rested so every year we are able to keep the stock we ship up to the standard known to our thousands of customers, as Maloney Quality.

We have not been content to learn only by experience, but have worked and studied on the theory of the nursery business—we have called upon Agricultural Experimental Stations to aid us in making tests—we have taken courses to improve our business methods—as a result, we not only know how to grow nursery stock, but also how to grow it as economically as possible. We know exactly what every tree in a certain block has cost us to produce. We know how much packing and shipping costs.

That's why we never have to ship anything different in size and quality that we quote upon—when we make a price on trees, we are satisfied with our profits on those trees—and because we grow scientifically, we can quote low prices on Maloney Quality trees.

We have learned that the best trees on earth can be dug, packed, and shipped so carelessly that their first year's growth will be slight, if they don't disappoint you entirely—so we have organized for our customer's benefit, what we call “Maloney Personal Service.” Mr. A. E. Maloney personally oversees the budding, cultivating, digging, hauling, sorting, packing and shipping of every one of our trees. He says it only costs a little more to do a thing right and it's worth it just in the personal satisfaction he gets out of doing it that way.

Of course we cannot do every bit of the work ourselves because it takes about fifty men to grow and ship the trees our customers need—but here is something to think about—the majority of these men have been with us over fifteen years, and are as interested as we are in keeping up Maloney Quality and seeing that our customers receive Maloney Personal Service.

Read this catalogue of ours over carefully. If you have any questions as to what varieties you need, tell us your soil conditions, and let us give you the advantage of our thirty years of successful tree growing experience. We have studied to occupy the same position to the fruit grower, as the lawyer to the business man. Feel at liberty to come to us for advice about trees at any time.

A. E. MALONEY
Propagator

Our Method of Packing Trees in Paper Lined Boxes and Bales

Do you know that splendid trees are frequently ruined by careless handling, for many firms have no houses in which to pack, doing the work in the open where the roots are exposed to the sun and wind. This is very injurious, and undoubtedly will lower the vitality of the trees so the first year's growth will be slight, if they don't disappoint you entirely.

We draw our trees from the field under canvas cover to our large and extensive packing house, where they are fully protected from sun and wind; here they are carefully graded, packed in paper lined boxes and loaded in cars right in our packing house for we have a switch which holds several cars. This is the reason why our trees succeed so much better than those sold by many of our competitors.

This is the way our trees are packed when shipped by express.

Boxing and Packing Free

We box and pack all shipments without charge. All orders are put up in boxes or bales, lined with heavy paper to guard against stock drying out; the trees and plants are packed in moist excelsior and straw.

Apponang, R. I., May 14, 1920.

Maloney Bros. & Wells Co.,
Dansville, N. Y.

Gentlemen:—I received the order of trees and did not expect them so soon. They are as fine a lot of young trees as has been seen in this vicinity for some time. Your packing system is wonderful. It looks to me as though every one is going to live.

Respectfully,
Geo. W. B. Kenyon.

Romance in an Apple Orchard

BEN DAVIS was an awful flirt. He was a TALLMAN and handsome, a native of SPITZENBURG, HOLLAND. He became hopelessly smitten on BELLEFLOWER, who looked like a DUCHESS, dressed beautifully in a RUSSET gown. His attentions to her were so SWEET that he made the MAIDEN BLUSH.

Now she was engaged to another MANN. Although he was a BALDWIN, he was WEALTHY as a KING and when he was advised of this he SWAAR, and with rage turned white as SNOW and nearly took an APPLE-ptic fit.

He at once engaged a SPY who soon informed him that he need SEEK NO FURTHER for her affections. He immediately left ONTARIO for a NEWTOWN down on the ST. LAWRENCE, where he met a ROME BEAUTY and now he declares there are NONSUCH as she.—*Lorne Carey, in Northumberland and Durham Apple Growers Booklet.*

MALONEY'S METHOD OF PACKING IN PAPER LINED BOXES

Why You make no Mistake in Buying from an Old Established Firm

Washington, Pa., May 31, 1919.

Gentlemen: Have been planting trees for the past ten years, and wish to say to you that your firm has proved to be the most honorable nursery company that we ever had any dealings with. I simply wish to express my appreciation of your prompt and businesslike method of doing business.

Yours truly,
M. A. Cooper.

Sunbury, Pa., Nov. 22, 1919.

Gentlemen: I am the party to whom you shipped 1400 Peach trees four years ago this coming spring. I have sold \$508.00 worth of Peaches to date and the trees are looking fine, have lost only a few. The fruit is of the best, the Elberta brought me \$4.50 per bushel and the Carman \$3.20.

Yours truly,
Reuben Ressler.

Truxton, N. Y., April 25, 1920.

Maloney Bros. & Wells Co.,
Dansville, N. Y.

Gentlemen: The apple and other fruit trees arrived in fine condition after more than three weeks on the road, the packing material was still moist. These trees are the best I have ever bought from a nursery.

Very truly yours,
Wm. A. Jones.

Harvard, Mass., May 17, 1920.

Maloney Bros. & Wells Co.,
Dansville, N. Y.

Gentlemen: The trees arrived in good condition Monday the 10th and we are very much pleased with them. Thank you for your good service.

Yours respectfully,
A. W. Bryant.

PLANT MALONEY UPLAND TREES FOR BEST RESULTS

Suggestions on Orchard Planting

SQUARE PLAN for Setting an Orchard. Open circle represents permanents, 40 ft. apart and dots fillers; 20 ft. apart. The latter to be removed in twenty years. These are distances adopted by most planters.

Number of Trees or Plants to an Acre. The following table will show how many trees or plants are required for an acre at any distance apart.

	Square Method	Triangular Method
40 feet apart	27 trees	31 trees
35 feet apart	35 trees	40 trees
30 feet apart	50 trees	55 trees
25 feet apart	70 trees	80 trees
20 feet apart	110 trees	125 trees
18 feet apart	135 trees	155 trees
15 feet apart	195 trees	225 trees
12 feet apart	305 trees	350 trees
10 feet apart	435 trees	505 trees
8 feet apart	680 trees	775 trees
6 feet apart	1,210 trees	1,600 trees
5 feet apart	1,745 trees	2,010 trees
4 feet apart	2,722 trees	3,145 trees
3 feet apart	4,840 trees	5,590 trees
2 feet apart	10,890 trees	12,575 trees
1 foot apart	43,560 trees	50,300 trees

Permanent Varieties

Amer. Blush	Northern Spy
Baldwin	R. I. Greening
Ben Davis	Smokehouse
Gano	Stark
Hubbardston	Tolman Sweet
King	Winter Banana
Newtown Pip.	York Imperial
N. W. Greening	

Filler Varieties

Alexander	Maidens Blush
Duchess	McIntosh
Delicious	Red Astrachan
Ea. Harvest	Rome Beauty
Fameuse	Stayman's Winesap
Fall Pippin	Twenty Ounce
Gravenstein	Wagener
Grimes Golden	Wealthy
Jonathan	Yellow Trans.

TRIANGULAR PLAN for Setting an Orchard. A permanent, set 40 ft. apart. C and B fillers, 20 feet apart, C fillers to be removed in fifteen years. B filler to be removed in 25 years. These are the distances adopted by most planters.

Suitable Distances for Planting

Apples, Standard	30 to 40 feet
Apples, Dwarf	8 to 10 feet
Pears, Standard	18 to 20 feet
Pears, Dwarf	10 feet
Peaches and Apricots	16 to 18 feet
Cherries, Sweet	18 to 20 feet
Cherries, Sour	15 to 18 feet
Plums	16 to 20 feet
Quinces	10 to 12 feet
Grapes	8 to 10 feet
Currants	3 to 4 feet
Gooseberries	3 to 4 feet
Raspberries	3 to 4 feet
Blackberries	5 to 7 feet
Strawberries	1 ½ by 1 ½ feet
Asparagus, in beds	1 by 1 ½ feet
Asparagus in fields	1 by 3 feet

Age That Our 2 Year Apple Trees Begin to Fruit

Three Years After Planting

N. W. Greening	Winter Banana
	Delicious

Seven Years After Planting

Baldwin	Spitzenburg
King	Tolman Sweet
Northern Spy	Wolf River
R. I. Greening	Newtown Pippin

Planting and Care of Stock

Care of Stock on Arrival—All stock should be planted immediately on arrival; but if not convenient to do so, open bundle and heel roots in the ground, covering them thoroughly.

Plant When the Soil is Reasonably Dry—In such condition as you would when planting corn or potatoes.

Pruning—Roots are sometimes bruised in digging. For best results it is imperative that you trim about one-fifth of the root, making a nice smooth cut, thus removing all bruised ends. Cut back one-half of the limb growth.

Planting—Dig the holes deep enough so the trees will be set one inch deeper than they were in the nursery row, and wide enough to admit the roots of the tree to spread out in their natural position. Having dug the hole as directed, let one person hold the tree upright and the other shovel in the earth; fill the hole about one-fourth with the richest dirt, pack it solidly, then put in one pail of water, now fill the hole two-thirds with dirt, pack firmly, then fill up the balance of the hole and pack firmly.

Drainage. Your time and money are wasted if you plant on undrained soil. All hollows should be avoided when selecting positions for planting.

Watering newly-Planted Nursery Stock. A good soaking once or twice a week if the ground is dry should be resorted to. A mulch of long manure, grass clippings or straw helps to retain this moisture and should be provided if possible.

Labels. Labels should be removed and some other method adopted for recording varieties. The wires will cut and damage the limbs.

Cultivation—Ten days after the tree has been planted, work around it to keep the soil loose; do this about every two weeks during May, June, July and August.

These planting directions apply to shrubs and roses, as a matter of fact everything except evergreens. When planting evergreens prune the roots only.

Trimming Shrubby. Newly planted shrubby should be cut back severely; from one-third to one-half of the top should be removed. If the planting is done in the Fall it is usually best to defer this trimming until early the following spring.

Shrubs that bloom before the middle of June should be trimmed just after the blooming period to ensure a profusion of bloom the following year. Shrubs like Altheas and Hydrangeas which bloom later should be pruned in the Winter. Fading flowers and forming seed vessels ought, where practicable, to be removed, that the strength which otherwise would go into ripening seeds may be diverted to forming flower buds for the ensuing year. In trimming shrubs avoid stiff unnatural results and cut so the plant will bear long, graceful branches.

Winter Protection. Most of us have some varieties which are a little delicate or which have so recently transplanted that some Winter protection is necessary. A mulch of manure about one inch deep, spread about such plants after the ground becomes frozen, prevents the alternate freezing and thawing which is disastrous. Leaves are valuable for mulching, especially for the perennial beds; they may be confined by branches of wire netting.

If you use barnyard fertilizer for mulching, allow it to remain until about the 10th of April then work it into the ground for by so doing it will greatly enrich the land, as this is conducive to a healthy, vigorous growth, thus bringing your trees into bearing earlier and your plants, shrubs, vines, etc., will be effective much sooner.

Maloney Cash Discount, Prepaid Express and Freight Offer

FOR SPRING, 1921

We allow 6% Discount on All Cash Orders
received before Apr. 10th--3% after that date

AND

We Prepay Transportation Charges on all cash orders of \$7.50 or more received during the entire spring season of 1921 to all points in the following states : New York, Massachusetts, Rhode Island, Connecticut, Maine, New Hampshire, Vermont, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan, Illinois.

To all other points we prepay one-half transportation charges.

*All orders of \$7.50 and up to \$35.00
will be delivered by Express Prepaid.*

*Those of \$35.00 and up will be de-
livered by Freight Prepaid.*

Our Shipping Season usually opens about the 25th of March and continues into the month of May.

Order Early. As our orders are shipped in the rotation they are received, and as we cannot delay orders received first for orders coming later on, we advise the placing of orders early.

Rates. 50 trees at hundred rate providing there are not less than ten of any one variety.

Terms. We will ship trees and plants C. O. D. providing 25 per cent of the

total of your order is sent in cash. If the order goes by express you pay the balance to your express agent upon arrival. If the order goes by freight you pay the balance at your bank, where you will also find Bill of Lading, which you present to your freight agent who will deliver shipment to you.

How to Remit. By Check, Bank Draft, Express Money Order, Post Office Money Order or Registered Letter.

Boxing and Packing Free. We box and pack all shipments without charge.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

For the Convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

Peach Growing is Today a Great Industry. In all probability more peaches are being planted annually than any other fruit. The comparative ease with which Peach trees may be cultivated, their freedom from disease, the short period before they come into bearing, together with the wonderful demand for the fruit, and the facility with which it may be shipped to markets, make peach growing extremely profitable.

Here is the Important Question that Confronts Every Planter: Where are the peaches that you buy propagated? On some low land that will throw up a big, soft, spongy tree that will freeze out the first cold winter and just when you ought to have a good crop you find your fruit buds are killed? Or are they raised on the upland where they make a strong, hardy, healthy, vigorous growth?

Our Peaches are propagated on the upland at an elevation of 1,500 feet, therefore are absolutely hardy and proof against severe winters. **Our peach pits** are gathered in the mountains of North and South Carolina, where disease is unknown. These two facts prove beyond question of doubt why it is decidedly advantageous to plant Maloney Quality peach trees for best results.

Soil. Peach trees will succeed on any kind of rich soil, but will not thrive on clay, nor damp, low land.

Care of Peach Trees: To keep your trees in a healthy and vigorous state, that will insure good crops, you must keep your ground clean and mellow by harrowing. An occasional dressing of wood ashes will be very beneficial. Do your pruning in the spring. Cut out all dead and useless wood, thereby letting in the necessary light and air to give the fruit color.

Maloney Bros. & Wells Co.,
Danville, N. Y.

Youngstown, N. Y., May 7, 1920.

Gentlemen:—I take great pleasure in advising that the 650 trees arrived. They were exceptionally well packed and of extra fine quality. Thanks for your painstaking attention to this order.

Yours truly, CHARLES M. DIVINS.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Admiral Dewey. Free, good size. Flesh yellow, excellent quality. July 1st.

Alexander. Medium, greenish white, nearly covered with rich red, melting, juicy, sweet. July 1st. Free.

Belle of Georgia. Very large, white. Peach with red cheek. The flesh is white, firm and of fine flavor. Tree rapid grower and very productive. July. Free.

Capt. Ede. A handsome yellow peach, with a faint blush of carmine, resembles Elberta. Fine quality and a splendid shipper. Early Sept. Free.

Carman. Fruit large, color creamy white or pale yellow with deep blush; flesh tender, fine flavor and quite juicy; very hardy and productive every year. This is a favorite variety with many growers, as it is one of the most profitable varieties ever introduced. The fruit stands shipping so well that it always reaches market in prime condition, and its handsome appearance causes it to bring the highest prices. Early Aug. Free.

Chair's Choice. Has no superior in quality and flavor, and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer. Oct. Free.

OUR MEDIUM SIZE PEACH ONE YEAR PLANTED

PLANT PEACH TREES FOR QUICK RETURNS

Crawford's Late. Fruit of large size; skin yellow, or greenish yellow, with a dull red cheek; flesh yellow; tree vigorous, moderately productive. Last of Sept. Free.

Crawford's Early. A magnificent large yellow peach, of good quality. Tree vigorous and very productive. Its fine size, beauty and productiveness make it one of the most popular sorts; no other variety has been so extensively planted. First of Sept. Free.

Champion. Fruit large, beautiful in appearance; flavor delicious, skin creamy white, with red cheek; valuable for commercial orchards, extreme hardiness and splendid quality make it a favorite. Late Aug. Free.

Crosby. Medium size; bright orange yellow streaked with carmine. One of the best standard market sorts. First of Sept. Free.

Engle's Mammoth. Large, round, suture slight; yellow with red cheek; flesh yellow, stone small, free; sweet, rich, juicy. Sept. free.

Early Rivers. Large, light straw color with delicate pink cheek; flesh juicy and melting. Early Aug.

Deal Direct the Catalog Way and Maloney Service Will Satisfy You.

Greene, N. Y., May 12, 1920.

Gentlemen:—The trees arrived May 10th all in good shape and I now have them set out. Am more than pleased with them. They are a fine lot.

Yours truly,
E. H. Johnson.

With Big Prices for Seedlings and High Wages Few Seedlings Were Planted for the Past Three Years—So That There are Only 50 per cent Enough Trees to go Around This Year. Nursery Stock will be Equally as Scarce for Five or Six Years—ORDER EARLY THIS SPRING.

Elberta. The leader of all peaches and the greatest commercial variety on the market; 50 per cent of the peaches planted are Elberta. In all probability no peach will succeed over so wide a range of territory as this kind. It will thrive where any peach can be grown. A beautiful peach of good quality, not only the best orchard variety, but also valuable for planting in the garden. Elberta is hardier in bud than many varieties, therefore a more uniform cropper. It is large, yellow, with red cheek, juicy and high flavor; flesh yellow, free stone. Season medium early, following quick upon Early Crawford. Early Sept. Free.

Fitzgerald. It is one of the hardiest peaches, both in bloom and tree; very prolific, large size. First of Sept. Free.

Foster. Large, deep orange red, becoming very dark red on the sunny side; flesh yellow, very rich and juicy, with sub-acid flavor; earlier than Early Crawford; very handsome. Last of Aug. Free.

Greensboro. A valuable variety; color greenish-white, shaded and splashed with dark red, very hardy and not so subject to rot as are most early varieties. Owing to extreme hardiness of both tree and bud we recommend it for sections where other varieties do not succeed. Late July. Free.

Hill's Chili—Fruit medium size, oblong; skin yellow, shaded with dark red; flesh yellow; very rich and sweet. First of Sept.

Hale (New Yellow). (Freestone). This notable new variety of peach is very large in size. In color it is a deep golden yellow overlaid with bright carmine. The flesh is deep yellow, fine grained with a very delicious flavor. Late Aug.

Kalamazoo. Large, golden yellow, with crimson cheek; flesh thick yellow, superb quality, small pit. Strong grower, early bearer, hardy and productive. First of Sept. Free.

Mountain Rose. Large, red, white flesh, juicy and excellent. Early Aug. Free.

Niagara. Tree hardy, healthy in leaf and bud and bears abundantly. Fruit large, oval, yellow with brilliant red cheek. The stone parts freely from the flesh. Flavor rich and delicious, far ahead of Elberta in this respect. It is indeed a rival for this famous peach. Season is medium early, coming in just before Elberta, overlapping it one week. Last of Aug.

Old Mixon Free. Large, roundish, yellowish, white, marked with red. Early Sept.

Salway. Large roundish ovate yellow, with a crimson cheek; flesh deep yellow, red at the pit; sweet, juicy, good. Late. Valued as one of the best late peaches for market. Oct. Free.

Maloney Personal Service and the Ownership of the Largest Nursery in New York State, make it possible to Deliver Quality Trees Direct at One Half Agent's Prices.

OUR PEACH TREES

5-6 Feet

4-5 Feet

3-4 Feet

Smock Free. (Beers' Smock.) Fruit large; oval; skin orange yellow, mottled with red; a good market sort. Last of Sept.

Rochester. Is in a class by itself because it is the only good sized yellow freestone Peach of fine quality ready for market in the middle of August in the northern states. The fruit is large, yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper.

Wonderful Large Peach uniform in size and shape. Rich golden yellow color nearly covered with bright crimson. Middle of Oct.

Yellow St. John. Of medium size, orange yellow with a red blush on sunny side; flesh tender, juicy and quality very good. Tree is a strong grower and bears heavy crops every season. Reaches the market at a time when the demand for early fruit is at its height, when properly handled, the best prices can be obtained. Middle Aug. Free.

An Apple Orchard with Maloney Upland Trees a Good Investment

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

Why Planters are More Successful with Maloney Quality Trees. Because we aim from the very beginning to give our patrons the most that can be had for the money. Too many Nurserymen economize by propagating on Western grown seedlings. No nurseryman can conscientiously do this for he well knows that Western seedlings are more or less troubled with that harmful crown and root gall. We eliminate this feature by importing our seedlings from France. Any of your inspectors will tell you that trees so propagated are longer lived and will net you greater returns. It is not so surprising after all that **Maloney Quality Trees** are being planted by thousands in every state in the Union east of the Rockies.

Apple Trees should be planted on elevated ground rather than in a hollow or low ground, and they require fertile soil, such as is needed for corn and wheat.

Hardy Upland Grown Trees Are the Most Satisfactory to Plant for They Establish Themselves Quickly and Make a Rapid, Vigorous Growth

DANSVILLE'S PIONEER WHOLESALE NURSERIES

SUMMER VARIETIES

Early Harvest. Medium to large size; pale yellow; tender, with a mild, fine flavor. Tree an erect grower and a good bearer; excellent for orchard and garden; one of the first to ripen. Middle to end of Aug.

Golden Sweet. Large, pale yellow, tree a good grower and very productive. August to September.

Red Astrachan. Tree hardy and regular bearer, a very vigorous grower; fruit large, roundish, nearly covered with deep crimson overspread with a thick bloom; juicy, rich and beautiful. This fruit commands the best price of the summer varieties. July and August.

Sweet Bough. Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Williams Early Red. Medium sized; dark red, sometimes yellow splashed; flesh is crisp, tender, juicy and sub-acid. Ranks above all but one or two of this class. Fine in Delaware and the South. Use it—it is a money maker where you can ship to markets in hampers without delay. It is ready for market just about the time people are growing hungry for new Apples, and it brings top prices. August.

Yellow Transparent. Medium size, roundish, oblate, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

AUTUMN VARIETIES

Alexander. Of Russian origin. Large, deep red or crimson; flesh yellowish white, crisp, tender, with pleasant flavor. Tree very hardy. October.

Autumn Strawberry. Medium, streaked, tender, juicy, fine, vigorous and productive. September to October.

Duchess of Oldenburg. Summer. Medium size; red striped; flesh white, juicy and excellent flavored. Trees are natural dwarf growers make fine fillers; require small root and branch space. Crops nearly always large. One of the important varieties for all sections north of Mason and Dixon line. Thrives and yields well of high-grade fruit at all elevations in Pennsylvania, New York, Ohio and other northern states. Trees among the hardiest and one of the few that will stand the climate of Iowa, Minnesota, Montana, and other cold locations. You can depend on Duchess to yield apples you can sell for good prices. Aug. and Sept.

Fall Pippin. Very large, yellow, tender, juicy, and rich. Fine in all localities; tree vigorous. September and October.

Gravenstein. An attractive and excellent quality apple. Fruit large and uniform in size, skin thin, tender greenish yellow overlaid with dark red. September to November.

Maiden's Blush. Large, flat; pale yellow with red cheek; beautiful; tender and pleasant, but not high flavored. Tree an erect grow-

TWO YEAR APPLE BUDS

ONE YEAR BUDS

WINTER VARIETIES

American Blush. (High Quality Red Winter Apple). Here is an apple that is not surpassed the world over for large size, great beauty of color, or for excellent quality. Fruit large, roundish color bright red on yellow skin; flesh yellow with a fine, rich, aromatic flavor, sub-acid. The tree is a vigorous grower, and is exceedingly productive, bearing an abundant crop of fruit every year. November to January.

Baldwin. This is the leading commercial variety in the American markets. It is to apples what Elberta is to peaches and Montmorency is to cherries. One of the best storage apples for export trade. Thousands of barrels of this fruit are exported to England annually. Baldwin is planted extensively and succeeds wonderfully well in all states east of the Mississippi. No variety yields larger crops, bears shipment better or is more attractive in colors, size and shape. It is highly esteemed for an eating and cooking apple. Fruit large, bright red, crisp, juicy and rich. Trees vigorous, upright and productive. For a commercial orchard, it can be relied upon. If ever in doubt what kind of apples to plant, select Baldwin. It should be in every orchard. December to March.

Belleflower. Adapted to the northern and middle states; highly esteemed for its excellent dessert qualities. Oct. to Feb.

Boiken. Annual bearer, vigorous grower. Fair size, hardy; bears young, very attractive and regarded as one of the most valuable apples of recent introductions. November to March.

GRIMES' GOLDEN

Charges. See Page 9**

Year After Year Maloney Service Improves
New York City, May 14, 1920.

Gentlemen:—Answering yours of May 13th we have already received the 175 apple trees at the farm, and my foreman writes they arrived in good condition and in better condition than any trees that we received this year.

Thanking you for taking care of this order, I remain, yours very truly,

E. N. Loomis, 119 Barclay St.

Ben Davis. is hardy and attractive, succeeds wherever apples are grown. There is no apple that has more favors on account of its hardiness, productiveness, beauty and endurance in shipping. It is excellent for cooking. There are better apples but where Ben Davis succeeds one can always be sure of success, owing to its regular and heavy bearing qualities. The fruit is thick-skinned, does not show bruises easily, and presents a good appearance in the package after being handled and shipped in the ordinary way. Nov. to Apr.

Delicious. No new variety has ever so quickly gained popularity in so many different apple sections of our country. Fruit large, nearly covered with brilliant dark red, flesh fine grained, crisp and melting, juicy with a delightful aroma; of very highest quality. A splendid keeper and shipper. Tree one of the hardiest. November to April.

Fameuse. (Snow Apple). Medium size; deep crimson; flesh snowy white, melting and delicious, one of the finest dessert fruits and valuable for market; a good baking apple. October to December.

Gano. An improved Ben Davis, adding to the good qualities of that variety a much handsomer fruit of deep, dark red, that brings a ready sale in market. Dec. to Mar.

Gilliflower. (Black.) An old dessert apple; tree a good vigorous grower and a reliable cropper. October to February.

Grimes' Golden. Medium to large size; skin golden yellow, sprinkled with gray dots; flesh crisp, tender, juicy, sprightly, very good to best. Tree is very hardy and productive, and one of the best fillers, as it comes into bearing very early. Grimes Golden is one of our few best sorts. December to April.

Hubbardston Nonesuch.

Large, striped yellow and red; flesh yellow, juicy and tender, with an agreeable flavor of acidity and sweetness; of the finest quality and very valuable; strong grower; bears well every year; comes into bearing early. You will find it a splendid orchard tree for New York and Pennsylvania. Nov. to Mar.

DANVILLE'S PIONEER WHOLESALE NURSERIES

Jacob's Sweet. Large, yellow with red cheek. Excellent quality and good keeper. December to January.

Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. Will keep well without special care and also stand much handling. November to January.

King. (King of Tompkins Co.) When you see in the market apples of extraordinary size, beautiful red in color, specimens that attract the attention of everybody who passes by, you may know that these are the King apple, an appropriate name since it is of the largest size and possessed of the greatest beauty. The market is never fully supplied with this variety, since its size and beauty make it in great demand. Tree a vigorous grower, good bearer and hardy. November to January.

Mammoth Black Twig. Resembles a large Winesap. Dark red. A very profitable variety to plant for market. It is productive and a long keeper. If a late winter apple is desired you will make no mistake in adding it to your list. December to April.

McIntosh Red. An exceedingly valuable, hardy, attractive apple; good size; nearly covered with red. Flesh white, fine, very tender, juicy and refreshing. Tree hardy, vigorous, a good annual bearer—comes into fruiting early, yielding large crops. Mr. Maloney recommends this variety to our patrons as one of the best used as a filler. The hardness of both tree and fruit and its great early bearing qualities, coupled with its elegant color and splendid flavor, makes it a most valuable apple. Do not overlook McIntosh when selecting varieties for commercial orchard planting; has no superior as an early winter apple. October to January.

Newtown Pippin. Medium to large; yellow delicious flavor; a long keeper. Known throughout Virginia as Albemarle Pippin. November to May.

Northwestern Greening. A round, large attractive, greenish yellow apple; flesh fine grained, juicy, firm, good quality. October to April.

Northern Spy. A hardy, large, red, winter apple. Flesh juicy, rich, crisp, tender, aromatic, of good flavor. Tree very healthy, strong grower, rugged. Blossoms very late, escaping frosts. Its large size, handsome appearance and superfine quality give it first rank for fancy trade, and when well grown and properly packed, it sells for higher prices than any other winter apple. It retains its crispness and high flavor well to the end of its season. December to March.

Rhode Island Greening. This apple has a recognized standing, both in domestic and foreign markets and sells readily for good prices. It is regarded as the very best cooking apple grown and also excellent for desert use. Size large. Flesh yellowish,

firm, fine grained, crisp, tender, juicy, sprightly sub-acid, very good. Skin grass-green to yellow, sometimes with brownish-red blue. Tree large, strong, vigorous, wide spreading. Ripens in December, keeps until April.

Rome Beauty. Large, round; mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points; always sells and always brings good prices. With an established reputation due to real merit. Good grower; blooms late; bears heavily every year; is adapted to a wide range of soils, elevations and conditions. In Ohio, Pennsylvania, New York, West Virginia and Maryland, will make more money than some of the sorts which are now a large part of the total number of trees in commercial orchards. Reliability, due to being frost-proof, strong-growing and sure-bearing, make it a favorite with the grower.

Roxbury Russet. Medium to large. Surface rough, greenish covered with russet. Tree free grower, spreading; a great bearer. Keeps until June. Its great popularity is its productiveness and long keeping. December to May.

Smokehouse. Fruit medium to large, uniform size and shape. Color yellow or greenish mottled with rather dark red, sometimes deepening to a solid bright red. Oct. to Mar.

Spitzenburg. (Esopus.) Unequalled for its high rich flavor, color deep red; flesh yellow, crisp, rich and excellent. Dec. to Mar.

Stark. Large, striped, mild, subacid, good. Valuable as a keeper. Jan. to May.

Stayman's Winesap. Medium to large, attractive; green and yellow, almost hidden by dark red stripes; flesh yellow, not in the least mealy; plenty of juice; quality the finest. Tree a quick and large grower, bears young, often producing a barrel to a tree when five years old. Bears every year, crops uniformly heavy. You cannot find a better sort, either for bearing habit, size of fruit, looks or quality. Except at the highest elevations, is almost always our most desirable apple for east of the Mississippi. Do not hesitate to plant Stayman's Winesap. December to April.

Sutton Beauty. Tree vigorous, upright, spreading, fruit uniform in size and shape, fine grained, crisp, tender, very good. Color bright red striped with carmine. Nov. to Mar.

Tolman Sweet. Medium size; light yellow; flesh white, firm, rich, and very sweet. Excellent for winter baking. This is the old favorite, highly prized for baking, etc. Productive, an early bearer, long keeper. Nov. to Apr.

Twenty Ounce. Very large, yellow striped, red, fine quality apple; good keeper. Tree vigorous grower, productive. Oct. to Jan.

What-Where-When and How to Plant. This book deals with only common practices and simple methods adopted by practical planters. A splendid book for the amateur. . . **Price 25 Cents, Postpaid**

McINTOSH IS VALUABLE AS A FILLER; A HEAVY YIELDER, AND NO LIMIT TO ITS DEMAND

Wagener. (Red Winter Apple) Wagener is one of the most beautiful winter apples ever grown. It is of the highest quality, the flesh being crisp, tender and aromatic. We know of no apple possessing greater beauty or of finer quality than the Wagener. It succeeds well East and West. No orchardist's list of varieties can be complete without this beautiful and superior flavored apple. Of medium to large size; flesh firm, sub-acid and fine quality. Dec. to May.

Wealthy Apple. A patron writes that from 450 Wealthy apple trees five years planted, he sold \$600.00 worth of fruit, some trees yielding a barrel of apples. From one tree four years old he picked three bushels of apples. Wealthy is one of the best red early winter apples. Owing to its early bearing qualities it is planted largely as a filler. Its extreme hardiness makes it a valuable variety for the Eastern States and is considered to be one of the best all around early winter apples to grow. Fruit large, roundish; skin smooth, oily, covered with a dark red. Flesh white, tender, juicy, vinous, sub-acid; quality very good. This variety is particularly valuable for cold climates because the tree is very hardy. Wealthy is being planted largely for commercial purposes as a filler in many sections. Oct. to Jan.

Winesap. Large, roundish, oblong; deep red color, with a few streaks and a little yellow ground appearing on the shady side; flesh yellow, firm, crisp, with a rich, high flavor; quality very good, and highly esteemed in the South and Southwest. Dec. to May.

Winter Banana. Fruit large size, perfect in form; golden yellow, and beautifully shaded and marbled with bright, crimson red; flesh lemon-yellow fine grained, sub-acid, rich, aromatic flavor, and of the highest quality. A good keeper. Tree remarkably strong grower, and on account of its great hardiness, will thrive in any climate. Its early bearing is something simply wonderful, generally producing a fine crop the second year. A valuable market variety. Very popular especially in New York and Pennsylvania. November to January.

Wolf River. Fruit is very large, some specimens weighing 27 ounces; flattened, conical, highly colored. An excellent cooking apple. Sept. to Dec.

York Imperial. A fine, hardy, large, red, winter apple; succeeds over a wide range of country. It comes into bearing at four years from planting, bears regularly and heavily. The fruit is of medium size, skin yellow and almost wholly covered with two shades of red, the darker one disposed in distinct stripes. Splendid variety for Pennsylvania. Nov. to Feb.

BEST HARDY CRAB APPLES

For Prices see Page 14

General Grant. Large, round, yellow, covered with stripes of red, and when exposed to the sun, turning quite dark; flesh white, fine grained. Sept.

Hyslop. Fruit large, deep crimson; produced in clusters; flesh yellow, sub-acid; and popular on account of its large size, beauty and hardiness. Oct.

Transcendent. This is probably one of the best of all crab apples, is popular over the entire country. It is perfectly hardy everywhere and an immense bearer, yielding large crops every year. It is also a rapid grower and often bears fruit three years after planting. The fruit of this crab is held in great esteem by housewives for making jelly. Fruit, bright yellow, striped with red. Sept. to Oct.

Egg Harbor, N. J., May 8, 1920.

Gentlemen:—I received the trees which you shipped March 29 and am pleased to state they are in excellent condition due to your careful packing. Thanking you for your prompt attention to my correspondence, I remain,

Yours truly,

Wm. Cifulla.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

How to Plant—For your information cherry roots must not be given much sun or wind exposure—either are just as harmful as a heavy frost. You would not think of leaving them out over night uncovered. It is just exactly as necessary to protect them from sun and wind.

Where to Plant—On any kind of land, other than wet. They will thrive beautifully on a sandy or gravelly soil.

Requires Least Attention of all Fruits, because it has been demonstrated beyond question of doubt that scale cannot live on cherry.

Cherries are very profitable to grow as they come into bearing early, produce heavy crops, and the price averages high so that it is a real money maker. Mr. Frank E. Yarker of Charlotte, N. Y., writes, "I desire to congratulate you on your magnificent strain of Montmorency."

Maloney's Prepay Transportation Charges. See Page 9

Sour Cherries

Baldwin. Fruit very large, almost round, dark red, slightly sub-acid, the sweetest and richest of the Morello type. Remarkable for earliness, quality, vigor, hardiness and productiveness. June.

Dyehouse. A hardy and valuable cherry. The earliest cherry of fine quality. Often bears at two years old, and has the appearance of being covered with a purple cloth, such is the abundance of the fruit. Has the smallest pit of any cherry known. For tarts, pies and especially for canning it has no superiors among cherries. Early June.

Early Richmond. This is one of the most valuable and popular cherries and is unsurpassed for cooking purposes. This hardy cherry fruits on young trees soon after planting. It is the good old variety that yields such marvelous crops in the gardens. The most hardy of all varieties, uninjured by the coldest winters. Tree slender in growth, with a roundish spreading head exceedingly productive. Fruit is medium size, round and dark red. The flesh tender, juicy, and sub-acid. Ripens in June.

English Morello. Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy, for extremely cold latitudes. August.

Louis Phillippe. Large and beautiful fruit of blackish red, flesh tender, mildly acid, good to best. Mid-July.

May Duke. Large red; juicy and rich; an old, excellent variety; vigorous, productive. June 15.

Montmorency—This is the best of all the sour varieties of Cherries. There is a greater demand on the market for this Cherry than for any other. The trees are the cleanest and best growers and are less subject to disease, less affected by wet weather, and are the best bearers of all sour varieties. No matter how unfavorable the season may be, Montmorency can be depended upon for a full crop. The Montmorency is a good shipper, very attractive looking and always brings good prices. The canning factories are always calling for them and want them by the hundreds of tons. The fruit is good-sized, fine flavored and bright clear red. The flesh is of fine quality and sub-acid. Fruit ripens 10 days after Early Richmond.

Olivet. A new Duke of French origin. Unlike most others of this class, it is said to be very early and to ripen over a long period. Fruit very large. June.

Ostheim. A hardy Cherry from Russia. It has been tested in the severest winters of Minnesota, and has been found perfectly hardy. Fruit large. July 15th.

Vladimir Hardy, strong grower, very productive, sub-acid, of excellent quality, juicy. July 15.

Two of Our Large Size Sour Cherry Trees. Note Superior Root System

MONTMORENCY

Wragg. Much like the English Morello. More productive and excels in size, yield and quality. One of the hardiest Cherries and has produced annual crops at the northern-most limit of Cherry culture. August.

**We are one of the Few
Nurserymen in the United
States with a Fair Supply
of Nursery Stock—Order
Early.**

Sweet Cherries

BLACK TARTARIAN

Black Tartarian. This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Bing. This valuable new black cherry succeeds everywhere. Tree very thrifty and upright grower, very hardy and productive, flesh very solid, flavor of the highest quality, a fine shipping and market variety. It is one of the most delicious sweet cherries. This valuable cherry should be followed by Lambert, which is later in ripening. Both are grand cherries. July.

Centennial. A large, light colored sweet cherry; flesh very firm thus making it one of the most valuable of the sweet varieties for shipping. Resembles Napoleon in appearance, of which it is a seedling, but it is larger and more oblate in form. Tree a handsome grower. Its sweetness is very pronounced, being exceedingly sugary. July.

Dikeman. Fruit large, black, firm, of excellent quality, fine keeper and shipper. Early August.

Governor Wood. One of the best cherries; very large, light yellow, marbled with red; juicy, rich, and delicious; tree healthy and a great bearer; hangs well on the trees; vigorous. Last of June.

Lambert. A fine sweet variety originating in Oregon, and one of the largest of all Cherries, dark purple red, turning almost jet black when ripe. Flesh firm, rich, juicy, tree rugged, strong grower and an enormous bearer. The growing of the sweet Cherry is a great industry only fairly well begun. There is an enormous market for the fresh fruit and when canned or preserved the markets of the world are open to the producer. Late July.

Napoleon. Tree medium size, erect with roundish head, fruit borne generally in twos, very large oblong cordate, light lemon yellow with red cheeks in the sun. Flesh very hard, brittle, colorless, reddish at the stone. Good, excellent bearer. Ripe about June 20th.

Schmidt's Biggarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy with a fine, rich flavor. Fruit grows in clusters. It is an excellent shipper and brings good money on the market. July.

Windsor. A splendid, large, liver-colored Cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, the tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Yellow Spanish. Large, pale yellow with red cheeks; firm juicy and excellent, one of the best light-colored Cherries; vigorous and productive. Last of June.

For the convenience of our customers, we have printed in heavy type the names of the best and most profitable varieties.

The planting of Pears is on the increase, so much so that it has been difficult for us to supply the demand. This is especially true of Bartlett, Clapp's, Kieffer and Seckel which are the leaders and in the order as named.

Soil. Pears will succeed best in a clayey soil, although any good heavy soil will do, but avoid planting on sandy loam.

MALONEY TWO YEAR PEAR TREES

6-7 ft.

5-6 ft.

4-5 ft.

Bartlett. Large, coloring when fully ripe to waxen yellow with red blush; juicy, melting, highly flavored, a most delicious fruit; tree bears early and abundantly. We have sold many large orchards of this variety. The fruit ripens just at a time when there is but little competition; in fact, there is no pear ripening at the same time that is in the Bartlett class. It might surprise you to know—nevertheless it is a fact—that there are more of this variety planted than all other kinds of pears combined. That speaks for itself, does it not? You will never make a mistake when planting Bartlett. Sept.

Beurre D'Anjou. This is one of the best known, most popular and profitable late pear. The tree is a vigorous grower, hardy and prolific. The pears are of large size, green in color, but often yellowing when thoroughly ripe. They are very juicy and luscious and of the best quality. For late fall and very early winter use, we have no better variety. Many claim that this is the greatest of late autumn pears. It keeps until January with special care. It is beautiful in shape and color. Season October and November.

Beurre Clairgeau. Large; light yellow, shaded with crimson and russet. Flesh yellowish, melting. Free, early, abundant bearer. Nov. to Jan.

Beurre Bosc. A large and beautiful russet pear, very distinct with a long neck; melting or nearly so, highly flavored and delicious, bears well, ripens in October.

Clapp's Favorite. A superb large, long yellow Pear, richly flushed, with russet-red next the sun. The flesh is fine grained, juicy, melting and buttery. A cross between Bartlett and Flemish Beauty; earlier than Bartlett and resembling Flemish Beauty in growth. It is as hardy as the Flemish Beauty; a fine grower and extremely productive. Early August.

Duchess D'Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

Flemish Beauty. Considered one of the hardiest and best for the northwest in which location it bear great crops of perfect fruit. Sept. and Oct.

Howell. Large, yellow, with red cheek; early bearer and productive. September and October.

Koonce. A very popular early variety. Fruit large, yellow, one-half nearly covered with red. Does not rot at the core. Tree vigorous, hardy and upright grower. Very productive and a good shipper. July.

CLAPP'S FAVORITE

COME TO DANVILLE AS OUR GUEST AND LOOK OVER OUR 400 ACRES OF NURSERY, THE RESULT OF 37 YEARS EXPERIENCE

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Kieffer. Large, rich golden yellow, sometimes tinted red on the sun-exposed side; fair quality, excellent for canning. It has become a profitable market variety on account of its good shipping and keeping qualities. To properly ripen should remain on the trees until leaves begin to fall, then gather carefully and allow to ripen in a cool dark cellar, or other place of even temperature. Tree a most vigorous grower, an early bearer, one of the most resistant to blight, very prolific, and widely planted throughout the country.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter Pear. The tree is hardy, healthy and productive, bearing large crops annually. Nov. and Dec.

Sheldon. A large, round, russet and red pear of very fine quality, melting, rich and delicious. Tree vigorous, erect and handsome, bears well and should be more largely planted. Oct.

Seckel. A beautiful and delicious little Pear that is the standard of excellence in its class. One of the richest and highest flavored Pears known, always in demand for desserts and luncheons and better known than any Pear of its class. The tree makes a somewhat slow but stout and erect growth. Sept. and Oct.

Vermont Beauty. Yellow, bright, carmine cheek. The tree originated in Northern Vermont and is very hardy and thrifty. October and November.

Wilder. One of the very earliest pears, attractively colored and of excellent quality. Of medium to large size, irregular, bell-shaped, but with smooth surface; pale yellow with shadings of russet-red. Early August.

SECKEL PEAR

128 Bates St., N. W., Washington, D. C.
December 1, 1920.

Gentlemen:—Nursery stock ordered from you a few days ago received in first class condition and it surely is No. 1 stock. That's what I call service. I want to thank you for getting the order out so promptly at this rush season. You surely helped me out. It is a great satisfaction to deal with you people. You are careful with filling the orders and the stock is always of the highest grade.

Again thanking you for the favor, I am,

Very respectfully,

W. L. MULLIKIN.

One Acre of 110 Bartlett Pear Trees will net \$600.00 annually, a good investment.

Plums are hardy and grow vigorously in nearly all sections, succeeding on any soil that grows good corn or potatoes. Plum trees are planted about as far apart as peaches; that is, from 15 to 18 feet apart each way. Many growers prefer to plant them closer one way than the other, and eventually to stop cultivation in one direction. If this system is used they may be placed 18 to 20 feet apart one way, and from 10 to 12 feet the other way. The trees are pruned the same way that apple trees are, when planted.

Bradshaw. A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of Aug.

Felleberg Prune. A fine prune, oval; purple; flesh juicy and delicious; parts from the stone; fine for drying; tree very productive. Early September.

German Prune. Medium; oval; purple or blue; juicy, rich, fine. Tree vigorous and very productive. One of the best. Sells for higher prices in market on account of high quality. A leading favorite. There is no easy grown fruit that gives greater or more certain profit than the German Prune. Early September.

Grand Duke. One of the best late plums for market, as large as Bradshaw, of same color, entirely free from rot. Last of September.

Gueii. This is one of the newer varieties originating in New York state. The color is a dark purple. The flesh is firm, sub-acid and agreeable. Size large. September.

Imperial Gage. Rather large; oval; greenish; flesh juicy rich and delicious, parts from the stone. Tree a vigorous grower; very productive

and one of the best of plums. Middle of August.

Lombard. It is a handsome reddish plum, the flesh yellow, juicy and pleasant. It is an excellent variety and can be relied on for a crop when other varieties fail. August.

Moore's Arctic. Fruit grown in clusters. Color dark blue or nearly black when fully ripe. Dr. Hoskins says this is the hardiest plum he has tested. September.

Maloney Prune. We are offering it this year at same prices as other varieties. Season extending from September 15th until freezing weather. Color dark blue; flesh yellow and delicious; freestone; heavy annual bearer. It certainly is a marvel—just what the orchard man has been looking for.

Niagara. Red, large size, makes an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit. Tree is an upright grower, vigorous and healthy. Middle of August.

Reine Claude. (Bavay's Green Gage)—Roundish, oval, greenish, marked with red in the sun; a great favorite. September.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

Shipper's Pride. Large, nearly round; dark purple; quite juicy, sweet; splendid shipper and marketer; moderate grower; productive. Originated in northwestern New York. September.

Shropshire Damson. One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

Thanksgiving Prune. Very productive, good quality. It will keep for weeks after picking. It is extremely hardy, as a matter of fact, will succeed in any state east of the Rockies; absolute proof against severe winters. October.

York State Prune. One of the largest, best in quality and most productive of all prunes; large size, color dark blue, covered with purple black, delicious; originated in Dansville, N. Y.; a vigorous grower and hardy. Is being planted extensively and is considered the best for commercial purposes. Last of Aug.

JAPAN PLUMS

Abundance. One of the best Japan Plums. The tree a rapid grower, healthy, comes into bearing remarkably young and yields abundantly. Fruit of medium size, large when thinned; amber, with markings of red; juicy, sweet, of good quality when well ripened. May be picked when it begins to color; will keep a long time. August.

Burbank. is decidedly the best of Japan varieties unsurpassed for beauty and productiveness, as well as a very hardy tree with foliage so perfect as to contribute in an essential degree to its health. Fruit large, oval, with a reddish purple skin; flesh yellow, juicy and good. A good one. August.

ABUNDANCE

Japan Plums—(Continued.)

Climax. Tree extremely vigorous, upright, with strong branches and very large leaves. Productive as Burbank, about as large and usually two or three weeks earlier. July.

Red June. The great early market Plum. Medium to large; deep vermillion red, with beautiful bloom; very showy; flesh light lemon-yellow, firm, slightly sub-acid, delightful. It is the best in quality of any of the early Japanese plums, free from rot. Ripens in early Aug.

Wickson. This, largest of the Japan Plums is superb in every way. The color is bright cherry-red, covered with a light bloom; the pit is small for so large a fruit, the flesh is thick, sweet, tender and rather dry, indicating good keeping and shipping qualities. The fruit sells almost on sight. September.

Block of Two Year Old Plum Trees Growing on our Upland Farm C for Spring Shipment.

Quinces

Wholesale Prices of all Varieties of Hardy Upland Grown Quince Trees

		Height	Caliper		Each	Ten	Hundred
Largest Size	2 Year	4 to 6 Feet	$\frac{5}{8}$ and up	XXX	.95	\$9.00	\$85.00

Fifty at hundred rate, providing not less than ten of any one variety.

PARCEL POST. First class 2-3 ft. Quince trees sent by parcel post, postage prepaid, for 70 cents each, \$6.50 per 10.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Champion. A large, late-ripening sort, that produces good and constant crops. One of the best for sections not subject to early frosts. Last of Oct.

Orange. The best of the older varieties, still more extensively cultivated than any other. Every one is acquainted with the Orange Quince, a good old variety that never disappoints the planter; good for home use and for market. Its large golden yellow fruit of fine quality is to be seen in more or less quantities in nearly every gar-

den or orchard every season, as it rarely fails to produce a crop. Ripens in Oct.

Meech's Prolific. Fruit is large, orange yellow, of great beauty and delightful fragrance. Tree a vigorous grower and immensely productive. Ripens between the Orange and Champion. Last of October.

Rea's Mammoth. Large, rich, golden yellow. Sure to ripen even in Northern latitude. Very hardy and productive. October.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

The Famous Orange Quince

WHOLESALE PRICE	Height	Caliper	Each	Ten	Hundred
Largest Size	2 Year 4 to 6 Feet	5/8 & up	XXX	\$1.00	\$9.50
Medium Size	2 Year 3 to 4 Feet	1/2 to 5/8	XX	.95	9.00

It is generally conceded that there are two or three strains of Orange Quince and that which is grown by most nurserymen is inferior in many ways—flavor, productiveness, size and hardiness—to that of the famous Orange Quince grown by Fred Grover of Pultneyville, Wayne Co., New York.

Many of the most prominent fruit growers pronounce it to be, beyond any question of doubt, the very best Orange Quince grown in the United States. We fully realizing how thoroughly our customers would appreciate having an opportunity to plant trees of this money making variety, made arrangements with Mr. Grover to secure scions from his orchard, and we now offer trees propagated in our upland nurseries from this superior strain. Fruit large, fine grained, almost round in shape, bright golden yellow. Being very firm it stands handling and shipping well. Season Sept. 1st to 15th.

Russian Apricots

Price of all Varieties of Apricot Trees

Apricot	2 Year	4 to 5 Feet	XXX	\$1.00	\$9.50
---------	--------	-------------	-----	--------	--------

PARCEL POST. First class 2 to 3 ft. Apricot trees can be sent by parcel post, postage prepaid, for 70 cents each, \$6.50 per 10.

Beautiful and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian Varieties are quite distinct from the other European sorts; much hardier, earlier bearers and productive.

Alexander. Very hardy and immense bearer; fruit large; yellow, flecked with red; very beautiful, sweet and delicious. July.

Alexis. Very hardy and abundant bearer; yellow with red cheek; large to very large; slightly acid, rich and luscious. July.

Moorpark. One of the largest. Orange with red cheek; firm, juicy, with a rich flavor; very productive. August.

Maloney's Prepay Transportation Charges

We prepay transportation charges on all cash orders of \$7.50 or more received during the entire spring season of 1921 to all points in the following states: New York, Massachusetts, Rhode Island, Connecticut, Maine, New Hampshire, Vermont, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan, Illinois.

All orders of \$7.50 and up to \$35.00 will be delivered by Express, prepaid. Those of \$35.00 and up will be delivered by Freight, prepaid.

WHEN BUYING FROM MALONEY'S YOU KNOW JUST WHAT YOUR TREES WILL COST YOU DELIVERED. (See Page 9.)

It is Important to Order Early Because of the Tree Shortage

Dwarf Fruit Trees

McINTOSH DWARF

Dwarf fruit trees bear larger, better fruit, bear several years earlier, and produce more returns for a given space than standard trees. This is all true and there are even more important points. The low, broad heads are within reach, so that apples or pears can be easily picked. You can plant dwarf trees in your garden and still grow strawberries and most vegetables. With dwarfs some varieties will bear the first year, all will the second and bear a full crop the fourth year.

Dwarf Apple trees are budded on Paradise or Doucin stocks, and Dwarf Pear trees are budded on Quince stock. They will succeed in many places where standard trees fail. In a word, they are the kind of Dwarf trees that will put their strength into fruit instead of wood.

Bearing Age Trees

For Your Back Yard

By this we mean trees which we have allowed to grow in our nurseries until they are old enough and big enough to bear fruit. Each of these trees has been especially selected and cared for during the years it has grown in our nurseries.

Few nurseries can supply these trees because they require certain soil and special scientific treatment. Bearing Age Trees are a specialty with us and we can guarantee your success provided you follow the simple directions for planting given below. Be careful to have your soil loose and mellow before the trees arrive.

The value of these trees to you lies in the fact that they will fruit the first year they are planted. You start picking the fruits of your labor at once instead of waiting for years. We have done the waiting for you. We have cared for the trees in the nursery until they are ready to care for your fruit needs. If you want a few trees for your back yard or small home orchard, these are the trees it will best pay you to plant.

Just read these planting directions and see how easy it will be for you to set out your Bearing Age Trees yourself. They will bear this year, and keep on growing and bearing for years to come.

MALONEY BEARING AGE TREE

Planting Instructions

Cut off about six inches of the limb growth, prune off bruised ends of roots, if any, make a smooth cut, dig hole deep enough so that the tree will be buried to the same depth as when standing in the nursery row, or up to the collar—soak roots in water one-half hour, place trees in hole, fill in one-fourth, tread well; another one-fourth, tread well; the third one-fourth, tread well; then finish filling and tread firmly so that when the tree is set it would require a strong man to pull it out.

Easthampton, Mass.

Nov. 1, 1920.

Gentlemen:—Regarding the trees which I purchased from you in the spring of 1918 and 1919, the 1918 Pear trees bore fruit last year and are loaded with fruit buds this year and the 1919 Plum trees are a flower garden by themselves with blossoms at the present time; in fact all of my 1919 shipment has grown fine and I am well pleased with them.

Respectfully, yours

JOHN KNOX

Cuthbert. This is a valuable variety well tested throughout the country. It has given good results both from home use and market. Cuthbert is a good vigorous grower and possesses vitality necessary for a popular variety. It yields bountifully of large and beautiful bright red berries, which are easily picked and always command good prices. No fruit grower can afford to omit planting Cuthbert, and surely no person who has a garden should attempt to get along without red raspberries.

Loudon. Very hardy, yields 200 bushels per acre, bears best on strong clayey loam, but succeeds well on sand.

Marlboro (Red). A very profitable, early market variety with large, light crimson fruits, of good size and flavor. The crop covers a period of four or five weeks in ripening.

St. Regis. (Everbearing) This promises to be the most valuable addition to the list of Red Raspberries. The only variety known that gives a crop of fruit the same year they are planted, and two crops a year thereafter. Plants that are set early in the spring will give a small crop of fruit the fall following, and the next spring a big crop equaling that of any Red Raspberry known. In size, quantity and quality, to say nothing of its fall-bearing qualities, it is ahead of anything we know of. About the middle of August it commences to set fruit on the young canes, and bears continuously from then until frost. The berries are large, beautiful and attractive. If you have failed with every other variety of Raspberry, either North or South, plant St. Regis and succeed.

Conrath, Early Black. In Conrath we have united vigor, hardiness, large size and productiveness; qualities that will give it a foremost rank.

Cumberland New Black. This new berry is a very valuable acquisition. With its greatly superior size it combines the equally valuable characteristics of great firmness, splendid quality and wonderful productiveness. Fruit very large, firm. Mid-season.

Gregg Black. Of good size; fine quality, very productive and hardy. It takes the same position among black caps as Cuthbert among the red sorts. No one can afford to be without it. The standard black cap by which others are judged.

Kansas Black. This variety is a strong, vigorous grower, standing extremes of drought and cold, and bearing immense crops. Early. Berries size of Gregg, of better color; jet black and almost free from bloom; firm, of best quality, presents a handsome appearance, and brings highest price in market. The average yield of an acre of Kansas in dried raspberries is 500 pounds. The average price, year by year, is twenty cents per pound.

Plum Farmer Black. This very large and productive black raspberry has been thoroughly tested in western New York where it is a great favorite for market or home use. It is covered with a grayish bloom, like the bloom on a grape, which makes it very attractive in appearance. It ripens very early and quickly. The fruit is enormously large.

PURPLE RASPBERRIES

Columbian Purple. A strong grower, unexcelled for productiveness and desirable for canning. Fruit very large, purplish color, rather soft; rich, sprightly flavor.

Wholesale price: 25 for \$1.50, 100 for \$5.00, 1000 for \$35.00.

Eldorado. The vines are very hardy and vigorous, and their yield is enormous. The berries are large, jet black, borne in large clusters and ripen well to-

gether; they are very sweet, melting, have no hard core and keep for eight or ten days after picking with quality unimpaired.

Mersereau. Remarkably strong grower, upright, producing stout, stocky canes. An enormous producer of extra-size berries, which are brilliant black and retain color; extra quality; sweet, rich and melting, without core. Ripens very early.

Minniewaska. This wonderful, hardy, productive, good blackberry has not been forgotten by us, or our old patrons. Its principal points are hardiness, excellent quality, earliness, and continued bearing and productiveness.

Snyder. Extremely hardy, enormously productive; medium size, no hard, sour core; sweet and juicy. Ripens early.

Blower's. Claimed to be the hardiest, most productive, of finest quality and to bring the highest market price.

PARCEL POST. Raspberries and Blackberries can be sent by parcel post, postage prepaid, for two cents per bush extra.

Gooseberries

Plant in good rich soil and give a liberal dressing of manure every season. Regular pruning every year is essential for the production of fine fruit.

Downing. Largest and best of all native American varieties. This valuable variety originated with Charles Downing, greatest of all pomologists. The value of Downing lies in its large size, fine quality, beautiful appearance, vigorous growth, and freedom from mildew. Downing is free from spines, of a transparent color, tending to yellow; bush upright, keeping the fruit from the sand. Enormously productive.

Wholesale Price, 2 year bushes, 45 cents each,
\$4.00 per 10, \$35.00 per 100.

Josselyn. Marvelously productive and bears second, if not the first year planted. The fruit is of large size, color dark red. When making out your order, do not fail to include some of this variety, as it has been thoroughly tested in nearly every state in the country, and is extremely popular everywhere.

Wholesale Price, 2 year bushes, 45 cents each,
\$4.00 per 10, \$35.00 per 100.

Red Jacket. An American seedling of large size, smooth, prolific and hardy, of best quality. Has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the most free from mildew, both in leaf and fruit, of them all. A wonderful cropper.

Wholesale Price 2 year bushes, 45 cents each, \$4.00 per 10, \$35.00 per 100.

PARCEL POST. Gooseberries can be sent by parcel post, postage prepaid, for 3 cents per bush extra.

CORSICAN

Brandywine. (Per.) Late. The strong, upright growing plants produce an abundance of very large berries on erect fruit stems. They are of good color and shape and possess a very fine, peculiar flavor. Begins to ripen in mid-season, and continues until blossoms are killed by the frost.

Corsican. A great strawberry for many reasons. First, it is the biggest berry; second, it is the brightest and best in color; third, it is a great yielder and producer; fourth, and the most important of all, the foliage is exceedingly vigorous and leathery, resisting fungus, drought, weeds, and even neglect of cultivation.

Marshall. An exceedingly handsome, high colored, very large berry of extra fine quality; ripening early.

Senator Dunlap. (Per.) Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through.

William Belt. (Per.) A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use.

FALL BEARING VARIETIES

Americans (Per.) Superb
Productive

These varieties will fruit from early July until cold weather.

PARCEL POST. Garden Roots can be sent by parcel post, postage prepaid, for one cent each extra.

RHUBARB or PIE PLANT

Linnaeus. Large, early, tender and fine. The very best of all. 15 cents each, \$1.25 per 10, \$10.00 per 100.

ASPARAGUS

Price of 2 yr. Strong Plants.
\$1.00 for 25, \$2.50 per 100, \$10.00 per 1000.

To plant, see that the ground is well drained. Work it up fine and deep, make it very rich with well-rotted manure. Locate the plants eight inches apart in rows three feet apart, spread out the roots in a trench made deep enough to permit the crowns to be covered with three or four inches of mellow earth.

ASPARAGUS

Palmetto Asparagus. A very early variety, even, regular size and of excellent quality. It has been tested both north and south and has proven entirely satisfactory.

Conover's Colossal Asparagus. Very large, makes rapid growth; planted mostly by market-gardeners; very productive.

HOLT'S MAMMOTH SAGE. Plants of strong growth. Leaves large, borne well above the ground. Of strong flavor and superior quality.

Price of strong 2 year roots, 25 cents each, 10 for \$2.00.

HORSE RADISH. Will stand a great deal of hardship and exist in soil year after year. Plant in deep, rich, cool soil.

60c per 10, \$5.00 per 100.

PIE PLANT

Grapes

Wholesale Price of Grapes, 2 Year, Vigorous Vines, Except as Noted

	Each	Ten	Hundred
2 Year No. 1 Strong Vines	.50	\$4.50	\$40.00

PARCEL POST. Grapes can be sent by parcel post, postage prepaid, for 2 cents per vine extra.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Every city and country garden should have a dozen or more grape vines. They do admirably trained up the side of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest fruit. Plant about 8 feet apart, by the fence or building. For vineyards, make rows 8 feet apart, 6 to 10 feet in rows.

Brighton. Red. Bunch large, well formed; berries above medium to large, round; excellent flavor and quality; one of the earliest in ripening. One of the very best shippers. Vine hardy and vigorous grower.

Catawba. Dark red when fully ripe. Bunch large, berries medium to large, skin thick, tough; flesh somewhat pulpy, with rich vinous flavor, of best quality for both table and wine.

NIAGARA

Concord. Black. Early. Decidedly the most popular Grape in America and deservedly so. Bunch large, shouldered, compact; berries large, covered with a rich bloom, skin tender, but sufficiently firm to carry well to distant markets; flesh juicy, sweet, pulpy, tender; vine a strong grower, very hardy, healthy and productive. For general cultivation the most reliable and profitable variety. Wholesale price, 45 cents each, \$4.00 per 10, \$35.00 per 100.

Campbell's Early Black. Strong grower, with large, healthy foliage, productive; its keeping and shipping qualities are equalled by no other early grape. Ripens with Moore's Early. Bunch and berry very large, glossy black with blue bloom, sweet and juicy, seeds few and small, part readily from the pulp. Stands at the head of early black grapes for quality.

Delaware. Red. Bunches small, compact, shouldered; berries rather small, round, skin thin, light red; flesh very juicy, sweet, spicy and delicious.

McKinley Early (New White). Strong grower; bunches large, compact and handsome, berries large and oval like Malaga Grapes; green at first, turning to yellow when fully ripe.

Moore's Early Black. Bunch large, berry large round with heavy bloom vine exceedingly hardy. Its earliness makes it desirable for an early market. Its hardiness particularly adapts it to Canada and northern portions of the United States; succeeds admirably in the south.

Niagara White. Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort. Bunch and berries large, greenish white changing to pale yellow when fully ripe. Skin thin but tough; quality much like Concord.

Worden. Black. Bunch large, sometimes shouldered, compact; berries very large, skin thin.

Grapes Vines at a Bargain

135 Division St., Schenectady, N Y.
Nov. 10, 1920.

Gentlemen:—My currant bushes received O. K. on the 4th instant. Am entirely satisfied with the strong, clean stock.

Very truly yours,
GEORGE ANDERSON

Cherry. Bush vigorous, stocky and compact; cluster rather short, with short stems; fruit averages large; color fine, bright red; berry thin skinned, juicy and fine flavored. One of the most productive of the large Currants.

Diploma. Large, solid and of good quality, very attractive appearance, both clusters and berries being very large. Vigorous grower and the most productive red currant.

Fay. (Fay's Prolific.) Bush vigorous but not quite so strong a grower as Cherry; cluster medium to long, with rather long stems; color darker; and berry averages large; juicy and less acid than Cherry. An excellent commercial variety.

Perfection. In color it is a beautiful bright red, a size larger than the Fay; clusters average longer and the size of berries are maintained to the end of the bunch. It is one of the most productive Currants we have ever known.

Red Cross. A strong growing variety. Cluster long; berry medium to large bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

White Grape. Bush vigorous, somewhat spreading, productive; clusters long; berries large to very large, averaging large; of very attractive color, mild flavor and good quality. A good table variety.

Wilder. (President Wilder.) Bush upright, vigorous; clusters above medium length; berries large to very large, averaging large; bright red; excellent, with a mild sub-acid flavor. Ripens early and remains bright and firm until very late. Because of its exceedingly vigorous growth,

great productiveness, high quality and remaining good so long after ripening, we recommend this as one of the best red currants, both for table and market.

Gentlemen:—I received the trees you sent to Crystal Lake all in good condition, and am very much pleased with your promptness.

Respectfully yours,
A. E. Swenson.

If the farmer makes his purchases direct from the nurserymen, he will save expense of middleman or agent, and is less liable to the mistake and injury that may occur through repeated handling.—United States Department of Agriculture. Farmer's Bulletin No. 113.

Satisfaction Guaranteed or Money Refunded

Nut Trees

NUTS ARE VERY NUTRITIOUS

English Walnuts are regular bearers, for the fruit buds are hardy and never injured by late frosts. Nut culture in the United States, is in its infancy. The English Walnut can be grown in the Northern and Eastern States, as well as in California and the South, for nuts grown here find a much more ready sale at advanced prices, as the flavor is decidedly better. The constant and growing demand for English Walnuts, and the immense quantities of them yearly imported to meet it, have given a great impetus to the planting.

So palatable and wholesome are the nut kernels, that they should become a staple article of food here as in Europe. The returns from orchard above illustrated, show plainly how successful nut culture may be made in the Northern and Eastern states.

Until recently little attention has been given to the planting of English Walnuts, therefore, it may be truly said he who plants now, is bound to reap splendid returns. Most farms contain land that would pay better planted to English Walnuts, than anything else, for they will thrive on such land as is suitable for raising potatoes, corn and grain.

Every garden or lawn should also contain one or more of these trees for they are well shaped and provide splendid shade.

While we have a big supply of the 3-4 ft. trees, we anticipate a heavy demand, and would suggest you place your order early and thus avoid disappointment.

Chestnut, American Sweet is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes.

Wholesale Price of 4 to 5 ft. trees, 75 cents each.

Chestnut, Spanish. A handsome round-headed tree, producing abundantly, very large nuts that find a ready market at good prices.

Wholesale Price of Spanish Chestnut trees, 4 to 5 feet, \$1.00 each.

Butternut. A fine native tree producing a large, longish nut, which is prized for its sweet, oily nutritious kernel.

Wholesale Price of Butternut trees, 4 to 5 feet, 75 cents each.

Pecans. This nut is very productive and delicious.

Wholesale Price, 3 to 4 feet, 75 cents each.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Walnut, English. A fine, lofty, growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. Every home garden should have one or more English Walnuts. Tree very hardy, will succeed well in all states east of the Mississippi.

Wholesale Price, 3 to 4 feet, \$1.00 each.

Walnut, Black. The common well-known Black Walnut, the wood of which is most beautiful and valuable. It is very productive in nuts, which are liked by many.

Wholesale Price, 5 to 6 feet, 65 cents each.

Barnard, N. Y., Nov. 22, 1919.

Gentlemen: The box of trees arrived today and are all right.

Yours truly,

Morley H. Pearson.

You Will Find the Growing of Nuts Very Profitable, as the Demand for Them is Increasing Annually

ORNAMENTALS

MORE attention is being paid every year to the proper beautifying of grounds surrounding our homes. The increase of reading matter on this subject has caused us to become keenly alive to the fact that as much thought and attention should be given to the environment of a house as to the house itself, and we realize that a house and its surroundings should be considered as a whole.

Too often is the effect of a good picture spoiled in the framing, and the grounds of a home should be considered as a frame to the picture represented by the house. On the other hand, a poor picture may be wonderfully improved by proper framing, and in the same way a house, inartistic in itself, may be made a thing of beauty by giving extra attention to the laying out and beautifying of its surrounding grounds. The lawn may be considered the canvass upon which the house picture is to be made, and the trees and shrubs, together with the buildings, make up the most important materials to be used in the work, and no satisfactory or beautiful home can be made without them.

In fact, the grounds surrounding a home reflect the individuality and tastes of the owner, and first impressions of people are often gained from the way they plant and keep the grounds surrounding their homes. No country can boast of so many beautiful trees, shrubs, roses, etc., as the United States, and with the addition of the choicest varieties from many other countries now offered by this company, we have the greatest wealth of material for the most elaborate work of home beautification or Landscape Gardening.

Just one word about our hardy upland grown ornamentals. The soil and climatic conditions together with experienced labor enable us to produce stock which gives a very effective appearance first year set, for they are scientifically treated and equipped with a fibrous root system which enables them to establish themselves quickly and make a rapid and continuous growth—sold at cost of production plus one small margin of profit.

Your dollar has twice its purchasing power when dealing direct with us, the growers, for the middleman's commission remains in your pocket.

OUR OFFICE

BEFORE PLANTING

Dear Friends:—Have you not frequently remarked about the beauty of some home while driving through a city, town or country? Has it ever occurred to you just what there was in particular about those places which appealed to your sense of beauty? Was it not due largely to the splendid effect of a few shrubs and ornamental trees promiscuously planted?

Is it not true that a home, no matter how well built, if standing on a bare lot never causes a favorable comment? It's the few dollars invested in shrubs that gives warmth to the house and greatly increases its value. Note the illustrations on this page.

A slight investment in shrubs, roses and ornamental trees will add greater value, comfort and solid satisfaction to your home than dollar for dollar invested in anything else. See pages 43-62.

Anne de Diesbach. Carmine, a beautiful shade; very large. A superior garden sort; fragrant; one of the hardiest.

Blanche Robert. Pure white, large and full, buds very beautiful. A strong grower and a desirable variety.

Bessie Brown. New. Very large, shell-shaped petals of creamy white, faintly flushed with pink, make up into flowers of rare beauty.

Baby Rambler. A dwarf (bush.) Just the thing for beds and borders and for edging walks. They are bound to take the place of geraniums and other plants which have to be removed each year. You can have them in Crimson and White.

Baron de Bonstetten. Flowers large and very double; color rich, dark red, passing to deep velvety maroon. Very fragrant.

Coquette des Alps. White, shaded with carmine; strong grower and a great favorite. This variety is very valuable; it continues to give a profusion of blossoms for weeks after general varieties have finished.

Clio. New. The perfection in Hybrid Perpetuals. Of delicate satin blush with a little deeper center. Large, well shaped and very double. Strong, robust, hardy and prolific. A jewel.

Frau Karl Druschki. Snow Queen. The finest white Hybrid Perpetual Rose, with large, full flowers of splendid form. It is marvelous in its beauty in half opened bud and in the pure white of the full opened bloom. It is the ideal rose for cemetery planting both North and South. It holds its foliage well and is healthy and vigorous and in hardiness it equals any of the Hybrid Perpetuals.

Likes Maloney Hardy Roses Best

Industry, N. Y., April 12, 1919.

Gentlemen:—The stock arrived in good condition and I am very much pleased with all. Especially the rose bushes.

Maloney Hardy Roses Grown at an Elevation of 1500 Feet Are Incomparable

ROSES—Continued

GRUSS AN TEPLITZ, Red

MAMAN COCHET, Pink

BARON DE BONSTETTEN, Red

General Jacqueminot. Brilliant crimson; large and fine. Beautiful in bud and a universal favorite.

Hugh Dickson. Intense crimson, shaded scarlet; very large, full and magnificent form, with high pointed center; growth upright and vigorous, free and continuous blooming; the finest of all autumn roses, highly perfumed.

Killarney. One of the most popular of our garden roses. It is perfectly hardy, a robust grower; color sparkling, brilliant, imperial pink.

La France. Rich satiny peach, changing to deep rose; large and full. A constant bloomer. The sweetest of all.

Magna Charta. Pink and carmine; very large and full; a profuse bloomer. Fragrant. Free grower.

Marshall P. Wilder. Bright cherry carmine; very fragrant and one of the freest bloomers; vigorous.

BLANCHE ROBERTS (white)

MARGARET DICKSON (white)

Mad. Caroline Testout. One of the most popular of the Hybrid Teas for the garden. This is the rose which has made Portland, Oregon, famous. The flowers are extra large, and a brilliant, shining pink.

Rose Collection No. 31

PRINCE CAMILE DE ROHAN

MAD. CAROLINE TESTOUT

Gruss An Teplitz. The color is brightest scarlet, shading to deep, rich, velvety crimson. It is very fragrant, the freest grower and most profuse bloomer.

Maman Cochet. This superb rose is well known as a queen among Roses. One of the best and most beautiful varieties grown, and quite hardy. The flowers are of enormous size, very full and of great depth and substance, borne on long strong stems, just right for making bouquets.

Astoria, L. I., N. Y., May 15, 1920.

Gentlemen:—This is just to acknowledge receipt of the rose bush and the vines which I ordered some time ago. They were received in good condition. I want to thank you for your careful and prompt attention to this matter.

Yours truly,
J. Hedbavny, 275 Park Place.

DANSVILLE'S PIONEER WHOLESALE NURSERIES

ROSES—Continued

Mad. Plantier. Pure white, large and very double. A free bloomer and grower.

Mrs. Laing. Very free flowering; commences early and continues to bloom profusely until fall. Of delicate pink color. Very fragrant.

Margaret Dickson. New, perfectly hardy and very vigorous. A free summer and autumn bloomer. Flowers white with pale flesh center, of a waxy texture and delightful fragrance.

Perle des Jardines. A rich shade of yellow, fragrant—one of the best yellow roses, bush exceptionally hardy.

Prince Camile de Rohan. Very dark velvety crimson, changing to intense maroon.

Paul Neyron. The largest of all. Deep rose color. A free bloomer and vigorous grower.

CLIMBING ROSES

Wholesale price, 2 yr. No. 1 Bushes 65c each, \$6.00 per 10.

Crimson Rambler. New. Of Japan origin. Very vigorous, growing eight to ten feet a season after it is well established. Entirely hardy and extremely prolific. It blooms in clusters. Of a beautiful crimson color and lasts a long time. It is a jewel.

Baltimore Belle. Pale blush, nearly white. Bloom in clusters.

Prairie Queen. Bright rosy red. Very large and fine.

Dorothy Perkins. A most beautiful shell-pink rambler. In hardiness, nothing more could be desired. Flowers are very double of large size, usually two inches across and borne in loose clusters.

CLIO

LA FRANCE

CRIMSON RAMBLER

No Roses Imported

The Government prohibits the importation of roses. About one-half of the roses sold in the U. S. were imported. Under these conditions it is advisable to order early this spring.

HYDRANGAEA PANICULATA

DEUTZIA, PRIDE OF ROCHESTER

Hardy Flowering Shrubs

Wholesale Price	Large Size	2½ to 3 Feet	2 Year	Each	Ten
				.50	\$4.50

PARCEL POST. Shrubs can be sent by parcel post, postage prepaid, for 3 cents per bush extra.

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Shrubs are useful in bringing out the full beauty of a house. Splendid effects can be had by planting an assortment of flowering shrubs on the lawn, not at all difficult to arrange them for a group planted promiscuously here and there, has a splendid effect.

Maloney shrubs are hardy, upland grown at an elevation of 1500 feet; varieties listed are the hardiest, most beautiful and lasting, thrive everywhere and need little care or attention when once established. Year after year they grow larger and more beautiful.

Some shrubbery needs more pruning than others. They should all be trimmed enough to keep them shapely.

Hydrangea should be cut back every spring one-half of the last year's growth. The altheas can be pruned to suit your own fancy.

Nearly all shrubbery grows gracefully, but sometimes a slight pruning will be necessary to make them shapely. The Gold-leaf Syringa, like some other shrubs, can be pruned to any shape desired, like the evergreens.

Althea. A large shrub, sometimes trimmed into tree form, that blooms freely in August or September, when almost every tree is out of bloom. Vigorous grower and succeeds everywhere. Also called Rose of Sharon. We can furnish double varieties in these colors: Althea Double Purple, Red, Pink and White.

Butterfly Bush. Seems to attract butterflies in large numbers. It produces long,

graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. It blossoms from early summer till frost; splendid for cutting.

Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall. All Barberries make very fine hedges.

Calycanthus. (Sweet-scented shrub.) The wood is fragrant; foliage rich; flowers are of chocolate color, having a peculiarly agreeable odor.

Deutzia, Gracilis. Pure white flowers in June. Two feet high when fully grown.

Deutzia, Crenata, Double-Flowering. A hardy, vigorous shrub that does not suffer from insects or diseases and early in the season is fairly covered with very showy double white flowers that on the edge are slightly tinged with rose. Handsome, desirable shrub.

Deutzia, Lemoinei. Dwarf, the flowers are large pure white and produce freely.

Deutzia, Pride of Rochester. Blooms in May. Double, white, tinted with rose on the edge.

Fringe Purple or Smoke Tree. A very elegant and ornamental large shrub, with curious, hair-like flowers of a pinkish brown color which sometimes literally cover the tree and remain all summer.

Maloneys Grow the Trees and Plants They Sell

DANVILLE'S PIONEER WHOLESALE NURSERIES

SHRUBS—Continued

One May Live as Long Without Shrubs and Ornamentals. But—Not so Happily

Conditions will be favorable this spring for doing that planting of shrubs and ornamentals which you possibly planned last spring and postponed on account of labor shortage.

ALTHEA

A modern home costs considerable money, much of the expense being incurred for the sake of beautifying and it is money well spent for Americans like beautiful surroundings. A large portion of the expenditure on a house is devoted to ornamentation; a fireplace here, a moulding there, a higher polish everywhere.

These are the things that ennoble life, that give a sparkle to the eye and conduce to real comfort and satisfaction.

And yet many people who spare neither time nor money on the finish of the house are utterly indifferent about the appearance of their lawn, never thinking that a small investment will make a living picture of their home. To fully realize, appreciate and enjoy ornamental planting just compare two homes of similar conditions, one having the bare lawn, the other with a few shrubs, roses and ornamentals promiscuously planted. And let us advise you that these plantings can be made with the small expenditure of one or two per cent of the cost of building your home. Furthermore the perfume from the shrubs, ornamentals and roses is stated by physicians of authority to be of great improvement to the healthful condition about your home.

Johnson City, N. Y., Nov. 7, 1920.

Gentlemen:—We received the trees and shrubs in splendid condition. The shrubs were the very finest and will recommend you to all our friends.

Respectfully yours,
PAUL McINTOSH, Maple Ave., Box 82.

We Prepay Transportation Charges. See Page 9

SHRUBS—Continued

Fringe White. A popular and much admired shrub of moderate growth, and rounded form, with large, dark green, glossy leaves, and long drooping panicles of beautiful white fringe-like flowers.

Forsythia Fortunei (Golden Bells.) Deep yellow flowers in great profusion in April.

Golden-Leaved Elder. The best of all the colored shrubs. A plant of this bush in a bed, or a border, or on the lawn, is a conspicuous feature, the foliage being as yellow as gold.

Hydrangea Paniculata Grandiflora. Absolutely hardy; thrives in all soils; grows rapidly and blossoms profusely. The flowers are pure white, afterward changing to pink, and are borne in large pyramidal trusses often more than a foot long and six to eight inches in diameter. Begins to bloom early in August, and continues to bloom for several weeks. Wherever known it is considered to be one of the finest flowering shrubs.

Hydrangea, Arborescens Grandiflora Alba (Hills of Snow)—This hardy American shrub is the very finest addition to this class of plants. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished.

Lilac, Purple. An old favorite; purple flowers.

Lilac, White. A well known favorite.

Mock Orange. Flowers white, deliciously perfumed. Derives its name owing to flowers resembling orange blossoms; a delightful substitute for that noble flower.

Quince, Japan. Dark green foliage, and showy deep, scarlet flowers of good size.

Spiraea, Prunifolia. Blooms early, and is very effective with its long gracefully curving branches covered their whole length with small, double white flowers.

Spiraea, Anthony Waterer. A dwarf variety of great beauty. It's broad flat heads of red flowers continue in perfection all summer.

GOLDEN LEAVED ELDER IN BLOOM

Spiraea, Billardi. A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length. A distinctive and beautiful flower and shrub.

Spiraea Callosa Rosea. Has large panicles of deep rosy blossoms; grows freely and blooms nearly all summer; fine.

Spiraea Douglassi. Has spikes of beautiful, deep rose-colored flowers in July and Aug.

Spiraea Van Houttei. This is undoubtedly the best of the spiraeas. The cut shown is a fair one and shows it in full blossom. The blossoms are white. Do not pass it by.

Syringa, Common. Large, white flowers; very hardy.

Syringa, Golden. Large, deep yellow flowers; bush hardy.

Hedge Plants

CALIFORNIA PRIVET BEAUTIFIES THE HOME

California Privet. A vigorous-growing variety, of fine habit, thick, glossy, nearly evergreen leaves. Of all ornamental hedge-plants this is the most highly prized. If cut to the ground one or two years after planting, it makes a very thick hedge right from the bottom, sending up, many strong shoots. The leaves are a rich green and will remain on the plants up to Christmas, and if they are a little sheltered they will keep green almost all winter. This is especially the case if the hedge has attained some age and has frequently been trimmed.

2 Year Strong Plants, well branched, 18 to 24 inches	.15	\$1.25	\$7.00	\$65.00
2 Year Strong Plants, well branched, 2 to 3 Feet	.20	1.50	8.00	75.00

Privet, Amurensis (North)—The best for hedge in the North, has stood twenty degrees below zero, upright growth, foliage similar in appearance to California Privet.

18-24 in. \$3.50 per 10, \$30.00 per 100.

Barberry Thumbergii. A pretty plant of dwarf habit from Japan. Very graceful and its foliage turns to a beautiful red in the fall.

Strong plants, 2 to 3 feet, well branched, \$4.50 per 10, \$35.00 per 100.

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planted without any particular order, but far enough apart to give each tree an opportunity to expand itself in its beauty.

AMERICAN ELM

Ornamental Trees

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

NO home grounds are really complete without some shade and ornamental trees. The shade of Maples and the dark covers under Evergreens are never forgotten by people who in childhood played and lived under the trees. A comparison of a home without shade trees about it, to one with, is the best argument we can advance.

Bloomfield, N. J., Nov. 9, 1920.

Gentlemen:—The stock you sent me arrived in due time in good condition. I set them out at once following directions as nearly as possible. Am well pleased with the stock and its condition.

I thank you for your prompt attention and should I desire anything in your line in the future, will gladly call on you.

Very truly yours,
THEO. N. PARENT.

NOTHING will add more value to your property than ornamental trees, plants, shrubs and vines. If you want to sell your home or estate you will find that these improvements will add immensely to its value and beauty. We offer a large variety of ornamental trees, plants and shrubs to choose from. They are all healthy and vigorous growers.

American Elm. A natural spreading and drooping tree of our own American meadows and forests. It is very attractive in any suitable location, is entirely hardy and easily transplanted. There are more Elm trees planted along our streets and highways than any other variety. This is on account of its dense green foliage, which spreads out from overhead, covering a suitable space of ground in proportion to the size of the tree, which makes it the finest shade tree in the world. **Wholesale**

Price, 8 to 10 ft., \$1.25 each, 10 for \$10.00, 6 to 8 ft., \$1.00 each, 10 for \$8.00.

Maloney's Prepay Transportation Charges

We prepay transportation charges on all cash orders of \$7.50 or more received during the entire Spring season of 1921 to all points in the following states: New York, Massachusetts, Rhode Island, Connecticut, Maine, New Hampshire, Vermont, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan, Illinois.

All orders of \$7.50 and up to \$35.00 will be delivered by Express, prepaid. Those of \$35.00 and up will be delivered by Freight, prepaid.

MAPLE, SILVER LEAVED OR SOFT

CUT-LEAVED WEEPING BIRCH

HORSE CHESTNUT, White Flowering

ORNAMENTAL TREES—Continued

LARGE FLOWERING CATALPA SPECIOSA

Beech, Purple Leaf. The blood-leaved tree possesses all the qualifications of an ordinary beech and, in addition has beautiful red leaves. Will retain its foliage during the winter and will add greatly to the appearance of your lawn.

Wholesale Price of Purple Beech trees, 2 to 3 feet high, \$1.25 each.

Catalpa Bungei. (Umbrella Catalpa.) Grafted on stems 6 to 8 feet high, it makes an umbrella shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped. A very desirable ornamental.

Wholesale Price of Trees, 6 to 8 feet, \$2.00 each.

Catalpa Speciosa. One of the most rapid growers. Valuable for timber, fence posts, railroad ties, etc., possesses wonderful durability. Large, heart-shaped, downy leaves, and compound panicles of white flowers.

Wholesale Price for first class trees, 6 to 8 feet, 75 cents each, 10 for \$7.00

Cut-Leaved Weeping Birch. This noble tree is not only the most popular of the weeping trees, but it is decidedly the best. Its tall, slender, yet vigorous growth, graceful branches, silvery white bark and delicately cut foliage, present a combination of attractive characteristics rarely met with in a single tree.

Wholesale Price of Cut-Leaved Weeping Birch, 5 to 6 feet, \$1.75 each.

Horse Chestnut, White Flowering. The well-known European species; very handsome; has magnificent spikes of white flowers. As a lawn tree or for the street it has no superior.

Wholesale Price, 6 to 8 feet, \$1.00 each.

Maple, Ash-Leaved. (Box Elder.) A fine, rapid-growing variety, with handsome, light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties do not thrive.

Wholesale Price, 8 to 10 feet, \$1.25 each, 10 for \$10.00. 6 to 8 feet, \$1.00 each, 10 for \$8.00.

Maple, Norway. This is one of the hardiest ornamental shade trees, and one of the most beautiful. It makes more of a wide spreading tree than the sugar maple.

Wholesale Price, 8 to 10 feet, \$1.25 each, 10 for \$10.00. 6 to 8 feet, \$1.00 each, 10 for \$8.00.

CATALPA, BUNGEI

NORWAY MAPLE

DANSVILLE'S PIONEER WHOLESALE NURSERIES

ORNAMENTAL TREES—Continued

Maple, Silver-Leaved or Soft. Foliage bright green above and silvery underneath. An exceedingly rapid grower. Makes a large tree. A very satisfactory tree to plant in large quantities.

Wholesale Price of Silver-Leaved Maple, 8 to 10 feet, 85 cents each, 10 for \$8.00; 6 to 8 feet, 75 cents each, 10 for \$6.50.

Maple, Sugar or Rock. This native tree of ours is a universal favorite for street planting, and desirable everywhere. It is considered a slow grower, but is long-lived.

Wholesale Price 8 to 10 feet, \$1.25 each, 10 for \$10.00; 6 to 8 feet, \$1.00 each, 10 for \$8.00.

Maple, Wier's Cut-Leaved. One of the most remarkable and beautiful trees, with cut or dissected foliage. Its growth is rapid, shoots slender and drooping, as graceful as cut-leaved birch.

Wholesale Price, 8 to 10 feet, \$1.25 each, 10 for \$10.00; 6 to 8 feet, \$1.00 each, 10 for \$8.00.

Mulberry Downing. This tree is not alone valuable for the large refreshing berries it bears, but is very handsome as a lawn or street tree. This should be in every yard or garden.

Wholesale Price, 4 to 5 feet, 75 cents each, \$6.50 per 10.

Mulberry Russian. Very hardy, vigorous grower, very productive, fruit black and of medium size.

Wholesale Price, 5 to 7 feet, 75 cents each, 10 for \$6.50.

Mulberry, Tea's Weeping. The most graceful and hardy weeping tree in existence. Forms a perfect shaped head, with long, slender, willowy branches, drooping to the ground.

Wholesale Price, 5 feet, \$2.50 each.

Poplar, Carolina. This tree takes front rank among the best of the poplars. It is one of the most rapid growers among shade trees, frequently growing eight feet during one season and thus making fine shade in two or three years. It is very desirable when planted at the roadside, in parks or along rivers and streams. It has an advantage over other shade trees because it will grow in any kind of soil.

Wholesale Bargain Prices for Caroline Poplar trees 10 to 12 feet high, 60 cents each, 10 for \$5.00, 100 for \$40.00.

8 to 10 feet high, 50 cents each, 10 for \$4.50, 100 for \$30.00

6 to 8 feet high, 45 cents each, 10 for \$4.00, 100 for \$20.00.

Poplar, Lombardy. A well known variety from its tall spire-like form. Where it is desired to mark a boundary line, or where there is an entrance to a driveway these trees are very effective. We have some beautiful specimens and can recommend them highly. They transplant safely, grow quickly and for many purposes are attractive and desirable.

Wholesale Price, 8 to 10 feet, 50 cents each, \$4.50 per 10, \$40.00 per 100.

Thorn, Double Pink. Double pink or rose flowers with white tips.

Wholesale Price for first class Trees, 4 to 5 feet, \$1.00 each.

Thorn, Paul's Double Scarlet. Flowers deep crimson with scarlet shade; very double.

Wholesale Price of Trees, 4 to 5 feet, \$1.00 each.

Bechtel's Crab. When in bloom appears to be covered with delicate pink, perfectly double small roses of delicious fragrance.

Wholesale Price for first class trees, 4-5 ft. \$1.00 each.

WIER'S CUT-LEAF MAPLE

Willow Babylonica. Our common well-known weeping variety; forms a large round-headed, graceful tree; requires plenty of room, and where space can be spared, is quite desirable.

Wholesale Price, 7 to 8 feet, 75 cents each.

CAROLINA POPLAR

Evergreens

EVERGREENS are increasing in popularity rapidly. We are now giving special attention to the propagation and culture of perfectly hardy species and varieties, such as are most useful to the general planter.

We recommend Spring planting. All evergreens will be lifted with ball of earth and roots wrapped in burlap.

American Arbor Vitae. A beautiful native tree much used for hedges, screens, singly on lawn and in tubs for porches. It is a handsome little tree and if allowed to grow natural, will be quite tall and pyramid shape. Can be trimmed and kept in any form or height. In the summer is bright green above and yellow below, and when winter comes, changes to the richest tone of brown and bronze.

Wholesale Price, 2 to 3 feet, 75c each, \$7.00 per ten. Balled and Burlapped

Colorado Blue Spruce. Foliage is blue and sage—that distinctive color which is so rare in the east. The blue Spruce is the most beautiful of conifers. Its silver foliage glistening in the sunlight, makes it surpass in beauty any other evergreen. Tree usually has a symmetrical shape, narrow pyramid or round top. It is very hardy, a good grower, will withstand severe winters as well as excessive moisture and is easily transplanted. **Wholesale price, 2 to 3 feet, \$3.00 each. Balled and Burlapped.**

Norway Spruce. There is no evergreen so largely planted as the Norway Spruce. It is indeed a tree possessed with great beauty at all seasons of the year, but particularly

in winter when its branches are weighed down with newly fallen snow. This spruce is a rapid grower and is often used as a lawn fence between village or city lots. Norway Spruce can be planted most effectively in groups on the lawn, imitating nature, planting without any particular order.

Wholesale Price, largest size, 2 to 3 ft., 75 cents each; \$6.50 per ten; \$60.00 per hundred. Balled and Burlapped.

Irish Juniper. Junipers are handsome evergreens, always neat and clean. This variety grows exceptionally slim and common-like. A general favorite for cemeteries and other planting.

Wholesale Price, 2-3 ft. \$1.25 each, \$10.00 per ten. Balled and Burlapped.

Koster's Select Blue Spruce. (Grafted)—The finest of all blue evergreens, selection from the Colorado Blue of extra fine color and compact free growth. Very dense on branch ends like all spruces and has regular slim branches, all growing to the same length in the same form.

Price, 2 to 3 feet, \$4.00 each. Balled and burlapped.

NORWAY SPRUCE

THIS ILLUSTRATES THE FINE EFFECT OF EVERGREEN PLANTING

Hardy Climbing Vines

6 Per Cent Discount on all Cash Orders received before April 10th. 3 Per Cent after that date

Ampelopsis Veitchi (Boston Ivy.) This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it closely with overlapping foliage, giving it the appearance of being shingled with green leaves.

Wholesale price of strong 2 year plants, 65 cents each.

American Ivy or Virginia Creeper (*A. Quinquifolia*). A native vine of rapid growth, with large luxuriant foliage, which in autumn assumes the most gorgeous crimson and purple coloring.

Wholesale price of strong 2 year plants, 65 cents each.

Dutchman's Pipe. Brownish flowers, resembling a miniature pipe; splendid for archways or verandas.

Wholesale price of strong 2 year plants, 75 cents each.

Halleana (Hall's Japan Honeysuckle). An almost evergreen honeysuckle of the greatest value, being hardy and of strong growth. The flowers are fragrant, of a pure white, changing to yellow.

Wholesale price of strong 2 year plants, 65 cents each.

Henryii Clematis. A vigorous grower and a free bloomer, producing its large pure white flowers constantly during the summer and early autumn. The best flowered variety.

Wholesale price of strong 2 year plants, 65 cents each.

Jackmanni Clematis. The flowers are large, intense, rich, velvety violet-purple, and are produced in such masses as to form a cloud of bloom. This is the best known Clematis, and should have credit of the great popularity now attending this family of beautiful climbers.

Wholesale price of strong 2 year plants, 65 cents each.

Paniculata Clematis (Sweet-scented Japan Clematis). Of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy foliage. The flowers are of medium size, fragrant, pure white,

PANICULATA CLEMATIS

borne in immense sheets in September, when very few other vines are in bloom.

Wholesale price of strong 2 year plants, 65 cents each.

Trumpet Vine. A robust, woody vine; twining tightly with numerous roots along its stems. Its orange scarlet, trumpet-shaped flowers cluster at the tip of the branches.

Wholesale price of strong 2 year plants, 65 cents each.

Wisteria, Chinese Purple. A most beautiful climber of rapid growth and producing long pendulous clusters of pale blue flowers.

Wholesale price of strong 2 year plants, 65 cents each.

PARCEL POST. Climbing Vines can be sent by parcel post, postage prepaid, for 5 cents per vine extra.

CLIMBING VINES ARE VERY ORNAMENTAL

Hardy Perennials and Bulbs

It is no wonder that these grand old fashioned hardy garden flowers continue to increase in popularity because there is not a time during the whole flowering season in which some are not in blossom, and when the wooded shrubs are almost bare of flowers in July and August, these perennials and bulbs may be depended upon to make a grand display, requiring scarcely any attention.

A few beds of Iris, Lillies, Phlox, Gladiolus, Dahlias and Cannas are an important adjunct to the home and its enjoyment.

The planting of perennials and bulbs has received a wonderful impetus during the past few years—it does seem good as you drive through cities, towns, rural districts to note the revival of these delightful color effects so common to the gardens of long ago.

PHLOX

Europa. One of the newer varieties. White with pink eye. Large and a good grower. 25c each, \$2.50 per doz.

Eclaireur. Flowers large, bright purple-car-

mine with lighter center; of fine form. 25c each, \$2.50 per dozen.

W. C. Egan. One of the most beautiful of all—a delicate lilac-pink. 25c each, \$2.50 per doz.

Frau Anton Buchner. Considered the finest white phlox to date. 25c each, \$2.50 per dozen.

Goliath. A new distinct variety of attractive appearance. It is of gigantic growth, producing large trusses with flowers of a bright carmine color, with a dark carmine-red center. A decided acquisition, and flowering very early. 25c each, \$2.50 per doz.

GLADIOLI

Lily Lehman. An early, almost white variety of large size and beautiful form. 25c each, \$2.50 per doz.

War. A new blood red variety. Extra fine. 25c each, \$2.50 per dozen.

Panama. An improved "America" with flowers of a deeper shade of pink and much larger. 25c each, \$2.50 per doz.

GLADIOLUS PANAMA

DANSVILLE'S PIONEER WHOLESALE NURSERIES

HARDY PERENNIALS and BULBS—Continued

PURE WHITE HARDY PHLOX

PEONY COURONNE D'OR

DAHLIAS

Mme. Victor Vassier. An extra fine sulphur-yellow; one of the best. 25c each; \$2.50 per dozen.

LeGrande Manitou. Largest and best fancy decorative Dahlia grown; pure white, striped and splashed with violet-purple. 25c each; \$2.50 per dozen.

Delice. A splendid variety and very generally grown. It is a bright pink, of perfect form and largely grown for cut flowers. 25c each; \$2.50 per dozen.

Souv. de Gustav Doazon. A flower frequently measuring 8 inches in diameter, of a bright orange-red color; always reliable and grown in immense quantities. 25c each; \$2.50 per dozen.

KING HUMBERT

CANNAS

King Humbert. 4 ft. The finest canna grown very broad-leaved foliage, of a rich, reddish bronze color. Flowers orange scarlet, very large. Very free bloomer. 25c each; \$2.50 per doz.

Indiana. 6 ft. Dark green foliage with glistening golden orange blossoms. Six inches or more in diameter. Orchid flowering type. 25c each; \$2.50 per doz.

Pennsylvania. 6 ft. Green foliage, deep orange scarlet flowers; very large, often 7 inches across. 25c each; \$2.50 per doz.

Wyoming. 6 ft. Similiar to Indiana in bloom but with foliage a purplish cast; has the same large fine flowers. 25c each; \$2.50 per doz.

Greenback. 7 ft. An enormous plant of foliage type. Broad rounded leaves resembling a banana plant. Does not bloom, but is a dandy for the tall plants for the center of a bed or a back border. 25c each; \$2.50 per doz.

DELICE DAHLIA

HARDY PERENNIALS AND BULBS—Continued

IRIS LILACINA

IRIS

Blue Sky. Medium size. Standards delicate, bluish lavender, forming a contrast to the purple falls. 25c each, \$2.50 per doz.

Chamelon. Medium size, slightly fragrant. Deep lavender standards, violet-purple falls. 25c each, \$2.50 per doz.

Charlotte Patty. Standards a golden yellow; falls lightly feathered and veined with maroon. 25c each, \$2.50 per doz.

Fairy Queen. Dwarf; late flowering variety. White, falls veined with blue. 25c each, \$2.50 per doz.

Garrick. Orchid type of flower, with opal lights in the sun. Standards pale mauve; falls a light violet. 25c each, \$2.50 per doz.

General Aganemon. Pure white standards, falls tinted and veined with "Pansy Violet." 25c each, \$2.50 per doz.

Leopold. Darkest of the yellow types. Standards bronze yellow, falls are heavily veined with a dark, reddish maroon. 25c each, \$2.50 per doz.

Lilacina. The coloring is most delicate; white standards are lightly traced, tipped with lavender; white falls have a dark bar at their base radiating into violet lines. 25c each, \$2.50 per doz.

Madame de Bonne. Large and attractive. Standards and falls are a clear, amber yellow. 25c each, \$2.50 per doz.

NOTE: We are one of the few Nurserymen in the United States who prepay transportation and charge no more for our stock.

FESTIVA MAXIMA (White)

PEONIES

Avalanche. Late, pure white with delicate pencillings of carmine. 50c each, \$5.00 per dozen.

Courrone D'Or. White with a blotch of red in the center around which is a halo of yellow. Immense, ball-shaped bloom. 50c each, \$5.00 per doz.

Delicatissima. Color is dainty lilac-rose. The large double blooms are freely produced on tall strong stems; fragrant. 50c each, \$5.00 per doz.

Felix Crousse. A leading red peony. An exceptionally striking kind, with large, double, ball-shaped blooms. Extra fine in every way. 50c each, \$5.00 per dozen.

Festiva Maxima. For over fifty years this has been the standard for perfection in peonies. The immense, perfectly double flowers are pure snow-white, with a beautiful flake of carmine in the center. 50c each, \$5.00 per dozen.

Grandiflora. Bright sea-shell pink; overlaid with delicate lilac and salmon pink—an enchanting color. 50c each, \$5.00 per doz.

Mad. Lebon. Valuable late red. Flowers ball-shape, very rich, cherry-rose, 50c each, \$5.00 per doz.
