WELLER'S HERBACEOUS PERENNIALS

"With That Wonderful Root-System"

For Spring delivery

Why you will find Weller's Perennials the best and most satisfactory

Because we make a specialty of growing them to perfection, and make it our point to give you SERVICE, QUALITY AND VALUE. Besides our land possesses qualities that can hardly be copied anywhere, but around the nursery centers of Boskoop, Holland. Our plants make REAL ROOTS, and what is more important to a Perennial than a GOOD ROOT SYSTEM?

All plants offered in this list are strong field-grown, "With That Wonderful Root System;" the only Perennials that give results and satisfaction. They are far better than pot grown plants, as they are more vigorous and healthy, and sure to flower in abundance the first season. Our nursery is a real garden itself, so why question results when they are a year older. We want your business and keep it, for we are growing more every year. You will not appreciate our stock and good service until you have convinced yourself by a trial order.

DAY LILY (See Hemerocalis)

DELPHINIUMS (Larkspur)

per doz. per 100

It is almost impossible to convey anything like an adequate description of the improved Delphiniums. Their greatest charm lies in the wonderful stateliness of growth, and the rich colors and tints of their striking flowers. Surely there is nothing in blue, to compare with the Delphiniums, and for their value in hardy borders, they are unsurpassed. The florists who have realized their worthiness as cut flowers are now forcing them with marked success. By continuously keeping the blooms cut they may be kept flowering for an extended period, and when other flowers are scarce, they are sold at big prices. We are growing a special heavy grade for forcing and if you have not already given them a trial, do not fail to do so this winter

*BELLADONNA. The most popular variety. The sky blue flowers are freely borne on numerous branching stems until frost. 4 ft.....	\$1.50	\$10.00

PLANT PERENNIALS FOR CUTFLOWERS

No Florist, large or small, should be without a good collection of hardy Perennials in his garden. It's part of his business. It adds to the general appearance of his place, attracts the flower-loving public and affords him a liberal supply of cutflowers when greenhouse flowers are scarce.

Perennials may either be planted in fall or spring with good results, but for the Florists perhaps in September or October is the most favorable.

Perennials planted in the fall, will become thoroughly established before the winter sets in, and with a little covering of straw or litter, will not suffer during the winter and flower in great abundance the first summer.

Be an up-to-the-minute Florist and plant Perennials. It pays.

All Perennials suitable for cutting are marked with a (*) star.

Remember that these plants cost you nothing after they are once planted, and that they give you an abundance of cutflowers every year. Have you ever had anything in your Greenhouse that would yield you a crop from year to year without having to resow, repropagate, rebuy and to repot several times in one year? Make the Perennials your Supply House and save money. Watch the recommendations for the planting of Perennials in the trade-papers.
