SPECIAL FOR AUGUST SCENTED GERANIUMS

The American Florist of July says the following in reference to sweet scented Geraniums.

"The grower who has a stock of rose or other sweet-scented Geraniums can turn them to good account by planting them in a bench in the greenhouse and can obtain some fine sprays for winter cutting. The green is very much appreciated by the best trade and there is always a demand in the stores catering to that class for more of this than can be obtained. The sprays are cut 12 to 14 inches long and are used in the boxes of cut flowers. There is also a demand for the leaves, to be placed in the finger-bowls at luncheons. It is easily grown in a cool house and very rapidly makes long sprays fit to cut. The plants can be set about eight inches apart, which will give them plenty of room, provided the sprays are cut as soon as they are long enough for use. We have on hand for immediate shipment a good stock of strong three inch plants of the following kinds:

The Florist Exchange of July 23rd, says as follows: "Practically all Solanums, whether you call them Cherries or Peppers are fine for Christmas, and all the new comers and especially the so-called Cleveland Cherries have been a godsend to the retail growers, for we do a whole lot more business because we have them. There is nothing daintier than the little birdseye pepper for basket work, and attractive pans can be made up with 4-inch stock. This holds good with the Cleveland Cherry and small plants as long as they have plenty of berries, all come in useful. Still time to purchase plants for growing on and they are not expensive; you have almost five months to get them ready and it will pay you to do it. As with other items, you can still call on the big grower to supply you large specimens later on, but why not have at least a few of your own? You can start to sell them in October and November."
