FOR SALE BY

ELMER REEVES THE WAVERLY NURSERY

(AT THE SAME LOCATION SINCE 1883)

NORTH-WEST OF I. C. DEPOT

TELEPHONE NO. 375-J

WAVERLY. IOWA

In making these prices I expect to meet any reasonable competition and will gladly correct all mistakes made and replace trees that are unsound or not in good condition when delivered. I want your trade, and can and will do better by you than traveling salesmen can possibly do. Trees will be packed and delivered at depot or express office at rates given in this list, but on large trees the cost of box will be charged. Terms are cash before shipment unless otherwise arranged. Certificate of Nursery Inspection furnished with each order shipped. Write for prices on large orders.

APPLES.

My apple trees are grown by grafting long scions on apple roots grown on my own grounds. This is the method that experience has shown to produce the best trees. The varieties are the hardiest and most valuable for this climate, and all trees are absolutely true to name.

All trees should be planted firmly in well prepared ground. Do not expect a tree to do well where a hill of corn will not grow and mature well. I make the uniform price on apple trees of \$40 per hundred, which is below the present wholesale price, and allow the customer to make his own selection of varieties and sizes of trees. I have all sizes of most sorts up to six feet above ground when planted.

SUMMER VARIETIES.

Duchess, Yellow Transparent, Tetofsky, Red Transparent.
