Bulbs that Bloom in the Spring Must be Planted in the Fall

What is more typical of Spring than the delicate green leaves and beautiful colorings of the fragile blossoms of the Hyacinths, Tulips and Daffodils. But if you wish to enjoy these early spring blooms the bulbs must be put in the ground during September, October and November.

We would suggest that you prepare now and order early this Fall for the reason that these choice bulbs, which come to us from Holland, will not be over abundant this season.

The bulbs which we offer in the following pages are true, sound and hardy, and reasonable in price. They may be left in the ground the year around, but some, such as our Exhibition Hyacinths, Paper White Grandiflora Narcissi, and a few others are particularly adapted for indoor culture. Repeated pot plantings of these will give you a succession of beautiful flowers all through the winter.

How To Send Remittances

Money should be sent by Postoffice Money Order, Bank Check, Express Money Order, or Registered Letter. In case it should go astray in the mails it can be traced and a duplicate obtained. Letters containing currency for small amounts should be registered. Postage stamps are accepted.

For Prompt Service

Please write both your name and address distinctly. Frequently we receive orders lacking name, or address, and sometimes both. Be particular about this and insure prompt service.

Another Thing

If you are interested in seeds for Spring planting, write for our General Catalogue, which will go to you in January.

1 peck, \$1.75. P. P. weight, 7 lbs.

Growing Bulbs in Water and Pebbles

Is another very fascinating method. Here, too, fancy bowls, glass or china dishes can be used. Fill the receptacles to very nearly the top with pebbles, then fill with water until it is on a level with them, press the bulbs gently into the pebbles so they stand erect; the roots will wind their way through them and secure a firm hold for the bulbs. Water must be added as it is taken up by the roots for nourishment. The following bulbs are adapted to this method.

CHINESE SACRED LILIES—First size bulbs—20c each, \$2.25 dozen, postpaid.

CHINESE SACRED LILIES—Mammoth bulbs—30c each, \$3.00 dozen, postpaid.

PAPER WHITE NARCISSUS—75c dozen, \$5.00 per 100, postpaid.

GRAND SOLEIL D'OR—Yellow with deep orange cup. \$1.00 doz., \$8.00 per 100, postpaid.

6 Jumbo Paper White Narcissus and
2 lbs. of Prepared Bulb Fiber for 75c
postpaid.

Growing Hyacinths in Glasses

HYACINTHS—The single-flowering varieties can also be grown in water for which especially constructed glasses, known as "Hyacinth Glasses" (see illustration) should be used.

CULTURE—Single Hyacinths do better than Double in glasses, as they produce a much larger and more showy truss. Place the bulbs in the glasses, which should be filled with water so it touches the bottom of the bulbs. Put them in a closed box in a cool place, or on a shelf in the dark part of the cellar, for from six to eight weeks, changing the water every ten days or two weeks; then remove them to the light. If then placed in a cool room they will produce very fine spikes and remain in bloom a long time. A small piece of charcoal in the water is beneficial.

Narcissus Grow Well in Pebbles or Fiber.

HYACINTHS

Single Named Varieties First Size Bulbs

CULTURE—For complete cultural directions secure our leaflet "Bulbs for House Culture." Free for the asking.

The varieties quoted below are all extra selected, first size bulbs, and cannot be excelled. We specially recommend Single Hyacinths; they are preferable to double ones, as they produce larger spikes and force more easily.

Single Red and Pink

Cardinal Wiseman. Large, dark pink.
Duchess of Albany. Bright crimson.
Garibaldi. Glowing carmine.
General de Wet. Light pink.
Gigantea. Blush pink.
Gertrude. Bright rosy red.
Jacques. Clear pink, large spike.
La Victoire. Brilliant scarlet.
Lady Derby. Bright rose.
Moreno. Large, deep pink.
Norma. Clear pink, large bells.
Roi des Belges. Bright scarlet.
Robert Steiger. Deep crimson.

Single White

Arentine Arendsen. Snow white, fine.
Baroness Van Thuyll. Pure white.
British Queen. Pure white, large spike.
General Vetter. Blush white.
Grandeur a Merveille. Large, blush white.
La Grandesse. Pure white; fine bells.
Madam van der Hoop. Pure white.
Mr. Flimsoll. Beautiful ivory white.
L'Innocence. Pure white, large truss.

Single Blue

Czar Peter. Light blue, fine.
Enchantress. Pale porcelain.
Grand Lilas. Silvery lilac.
Grand Maitre. Deep lavender blue.
King of the Blues. Best dark blue.
La Peyrouse. Clear porcelain blue.

Hyacinths.

Four Bulbs each of a Separate Color
for 70c, postpaid.

HYACINTHS

SECOND SIZE NAMED HYACINTHS FOR FORCING OR BEDDING

This grade of named Hyacinths is the best value offered in Hyacinths. Being of the same age as first size bulbs from which they are the second selection, many varieties will produce spikes nearly as large as the former, so that they are splendid for growing in pans or three in a pot. They will produce much better effects when grown in borders than unnamed Hyacinths, not only that the quality is so much better, but a single variety used for a certain shade of color is far more pleasing than a mixture, while the price difference is only slight.

Single Red

Lady Derby. Bright rose.	Moreno. Bright pink.
Gertrude. Rosy pink.	Robt. Steiger. Deep crimson.
Victorie. Dark pink.	Roi des Belges. Deep red.
Gigantea. Bluish pink.	

Single White

General Vetter. Blush white.	La Grandesse. Pure white.
Grandeur a Merveille. Blush white.	L'Innocence. Pure white.
Madam Van der Hoop. Pure white.	

Single Blue

Grand Lilas. Porcelain blue.	Pieneman. Dark blue.
Leonidas. Light blue.	Menelik. Purple black.
Potgieter. Light blue.	King of the Blues. Dark blue.
Grand Maitre. Deep blue.	Queen of the Blues. Light blue.

15c each, \$1.50 doz., \$10.00 per 100, postpaid.
\$1.25 doz., \$9.00 per 100, charges collect.

Weeber & Don's SELECTED HYACINTHS FOR BEDDING and POT CULTURE

These are grown for our trade and must not be confounded with the so-called Mixed Hyacinths sold by some, containing the cullings of the trade, immature, undersized bulbs. For massing in borders or design work, or for forcing, they are well adapted. Our mixture is composed of bulbs which are nearly of the same height and flower simultaneously.

Mixed Single Varieties

Dark Red	Light Blue
Red and Rose	Dark Blue and Violet
Pure White	Yellow, all shades
Creamy White and Tints	All Colors Mixed

Mixed Double Varieties

TULIPS

Few, if any, of the Spring-blooming flowers rival the Tulip for brilliancy of bloom or ease of culture. For formal beds on the lawn or garden borders they are excellent subjects. They do not possess the same size of bloom and length of stem of the May-flowering Darwin, Breeder and Cottage varieties, but where early blooms are desired they are frequently used. Many of the varieties may be forced in bloom in January, while all the varieties may be easily had in flower in pots late in February or early March.

Varieties marked (1) generally begin to flower the 20th of April. Those marked (2) after the 1st of May.

DOUBLE EARLY TULIPS

Double Tulips are chiefly grown for their showy effects in masses, and are very lasting. Where a display of color is desired they are very satisfactory. Excellent for growing in pots or pans, but should not be forced into bloom very early.

Varieties marked (1) begin to flower last week in April, and those marked (2) first week in May.

An asterisk (*) indicates varieties especially suited for forcing.

PARROT, or DRAGON TULIPS

These Tulips have large characteristic blossoms, with curiously feathered petals. They are remarkable and exceedingly showy and effective in flower borders, and if grown in hanging baskets the drooping flowers look like Orchids. In height they average about 15 inches and belong to the late-flowering class.

Late May-Flowering Hardy Cottage Garden Tulips

Have mostly been found growing in old cottage gardens in England, Scotland and Ireland, where they have been in some cases for over fifty years. They present a great variety in form and coloring, and have none of the stiff-

ness of other Tulips. On account of their extreme hardiness they are specially adapted for permanent hardy flower borders, where they should be freely planted in large clumps and masses. They grow from 2 to 3 feet high.

GIANT DARWIN TULIPS

MAY FLOWERING

Most Exquisite Race of All May-Flowering Tulips

A strong growing race of Tulips, with large, perfect, cup-shaped, brilliantly colored flowers, carried erect on long, stiff stems, averaging 2 feet in height. Wonderfully showy in beds or in clumps in the herbaceous border or among shrubs.

Grown for cut flowers they will prove very valuable at a time when the gardens yield so little to decorate our rooms. They flower during the middle part of May, when the Spring flowers are over and the Summer flowers, such as Peonies and Roses, have not yet come in. Their chief characteristics are the perfect cup-shape of the flowers and the blue, black or white coloring at the base of the petals inside of the flowers.

An asterisk (*) indicates varieties especially suited for forcing.

NARCISSUS, DAFFODILS AND JONQUILS

ALL LARGEST SIZE BULBS

Narcissus are among the most popular and largely grown of Spring-flowering bulbs and deservedly, too. Their exquisite grace, beauty and charm of habit have been immortalized in the poetry of all times. No garden should be without them.

They are all of the easiest cultivation, thriving in almost any soil and situation, and they may be left alone for several years after once being planted. They do best, however, in a deep and somewhat stiff soil, and in a partially shaded position. They are well adapted for planting by the sides of streams, lakes or ponds, and in mixed flower or shrubbery borders. They are also suitable for naturalizing in the grass, by the side of woodland walks or in open spaces between trees and shrubs.

Lilium Candidum.

Lily of the Valley Clumps

(Ready About 1st of November.)

Are generally used for outdoor planting and should be placed in a shaded locality, where they can be left permanently. They are the most popular of Spring-flowering plants, and are greatly admired on account of their graceful appearance and delicate, bell-shaped, pure white flowers; highly prized for cutting in the early Spring. They are the most charming when grown in large patches in partially shaded localities around the lawn, near the borders of streams, lakes, etc., being perfectly hardy.
